Mr. VOLIN. Well, I regard this whole job as an extraordinary situation in that we had never done it before. We had instructions that we were to follow. I interpreted it as our function that we would see that the samples were taken properly and were dispatched to an assayer mutually acceptable to both parties and that we would submit a report. There are reasons why the splits were not retained. I think I went over that before. The principal reason was that if this was to be retained we would be in further responsibility of this job. That is, we would be responsible for those splits. Actually for them to be secure it would have meant that Mr. Appling had to live with them. He had to have them in his possession all of the time for him to certify that they were the same samples and not a change in any way from the splits that he obtained, which was physically impossible. We did not have a secure place for them and so Mr. Appling—and I understand this—Mr. Appling and Mr. McCormick saw fit to destroy the samples together.

Senator NEUBERGER. You just mentioned a minute ago that this entire project was an extraordinary situation, is that right?

Mr. VOLIN. I meant that we had never had this kind of a job given to us before in my experience. I think I testified to that.

Senator NEUBERGER. Let me ask this, because I have never worked for a Government agency with the exception of the time I was in the military. Despite the length of experience of a Government official in a Federal agency, be that experience long or short, is he not bound to follow superior orders which come to him from the policymaking, politically, politically appointed, officials—let us say—in the Solicitor's office, at the various levels of the Department, or in the Secretary's office? When a civil-service official receives orders, instructions, if you please—I suppose you say orders in the military and instructions in the civilian agencies—is he bound to follow them?

Senator NEUBERGER. That is right. In all your experience you had never had this kind of a job given to you before.

Mr. VOLIN. Yes.

Senator NEUBERGER. And that if it had not been for the instructions which came from the Department you would have handled the assignment in a different way.

Mr. VOLIN. You are sure putting me on the spot.

Senator NEUBERGER. You already have said that if it had not been for those instructions you would have sent the samples to the Abbot Hanks or the Emery Laboratories, is that not correct?

Mr. VOLIN. I expressed that opinion, yes.

Senator NEUBERGER. I think then in very substantial degree you answered my question earlier. So I will not press the witness for an answer.

Now, you were asked by members of this committee earlier about the length of service of yourself and some of your superiors in the Bureau of Mines and you testified that that length of service was very considerable.

Mr. VOLIN. Yes.

I can only speak from my own experience, Senator. In the Bureau of Mines I tried to carry out the orders of my superiors including the Director of the Bureau of Mines to the full extent of my ability to do so.

Senator NEUBERGER. And it is not up to you to question those instructions, but to carry them out as explicitly as you possibly can?

Mr. VOLIN. On some occasions I have asked for clarification, but I have never questioned the policy of an order.

Senator NEUBERGER. You attempt to carry out that policy as best you can?

Mr. VOLIN. That's right.

Senator NEUBERGER. I just want to say that I appreciate the very candid and frank way you have answered the questions that I have put to you.

Mr. VOLIN. Thank you, sir.

Senator NEUBERGER. I feel that this entire matter is unfortunate in the embarrassment or the tension and anxiety it perhaps has caused people like yourself who have been in the field in these Government agencies. You are not the only person who worked for a Government agency who testified in this under considerable stress and strain, because this is not your usual role.

We have had forest rangers from the district of the Rogue River National Forest, the mineral examiners of the Bureau of Land Management, and other people. I want to say that so far as I am concerned there is no criticism implied of yourself or those people from the Forest Service or the Bureau of Land Management. I think

that you did what has been your mission to do as a Government employee, to carry out superior orders.

What we are going to try to find out is why those superior orders were given, instead of, as you said perhaps might have been wise procedure, why this was not remanded to the Forest Service and the Bureau of Land Management, which has jurisdiction under the law for further investigation.

I want to thank you very much.

Representative HOFFMAN. Mr. Chairman, I have some more questions.

Senator SCOTT. Congressman Moss.

Go ahead, Congressman.

Representative MOSS. I have no questions at this point.

Senator SCOTT. Go ahead, Mr. Hoffman.

Representative HOFFMAN. You knew that there was a dispute between the company and the Bureau of Land Management and the Forest Service, did you not, about whether these were or were not mining claims?

Mr. VOLIN. I have heard that; yes, sir.

Representative HOFFMAN. You heard of that, anyway?

Mr. VOLIN. Yes, sir.

Representative HOFFMAN. What is wrong, if anything, with the decision of the Secretary of the Interior to call on the Bureau of Mines to make an impartial investigation?

Mr. VOLIN. I don't like to question the decision of the Secretary, sir.

Representative HOFFMAN. I know, but we have gotten into it through the questions of the Senator. About the last thing he said was that the committee wanted to know why the Secretary made this decision, and so the committee staffs called you and other witnesses, who probably do not know what was in the Secretary's mind, instead of calling the Secretary. If they want to know why he made the decision, I do not know why they do not call him and ask him. I would.

Mr. VOLIN. I think I would like to see the Secretary answer that himself.

Senator SCOTT. The Secretary will be called.

Representative HOFFMAN. Yes; after he has been smeared all over the place.

The company was entitled to an appeal, was it not, from the decision made by Rice?

Mr. VOLIN. I don't know the procedures, whether the first case is final, or whether there is a right of appeal. I expressed the opinion that a person should have the right of appeal, I thought.

Representative HOFFMAN. In this case the company appealed, did they not?

Mr. VOLIN. They did.

Representative HOFFMAN. To the Secretary?

Mr. VOLIN. Yes.

Representative HOFFMAN. Then the Secretary designated the Bureau of Mines to make a sampling?

Mr. VOLIN. That's right, to be present at the sampling, sir.

Representative HOFFMAN. Yes. And the company was given the privilege of objecting to the individual who was to make the assay, was it not?

Mr. VOLIN. That's right.

Representative HOFFMAN. Under the instructions you were told that they wanted a man to make it who was agreeable to both parties?

Mr. VOLIN. That's right.

Representative HOFFMAN. Is that not the way they usually get an arbitrator, get somebody who is agreeable to both parties?

Mr. VOLIN. The only thing I can reach back to is the selection of an umpire by an operating mining company and a smelter. That is the origin of the term "umpire" anyway.

Representative HOFFMAN. We have a strike at Westinghouse and I think some 10 or 17 Senators—I do not know how many—have asked for the appointment of an arbitrator. In selecting an arbitrator, they would get somebody that was acceptable to both the company and the union, would they not?

Mr. VOLIN. I believe that is the usual procedure, sir, that it must be acceptable to both sides; yes.

Representative HOFFMAN. Is there anything wrong, then, in selecting the Bureau of Mines to go ahead with this?

Mr. VOLIN. You mean to select the assaying firm?

Representative HOFFMAN. Yes.

Mr. VOLIN. That would be mutually acceptable to both?

Representative HOFFMAN. Yes. Is there anything wrong with that?

Mr. VOLIN. No; I guess there is nothing wrong with that.

Representative HOFFMAN. If you were appealing from a decision made by a Government official, would you not want someone who you thought was impartial to make the assay?

Mr. VOLIN. I would want a reputable person to make the assay; yes, sir.

Representative HOFFMAN. You would want somebody who was not interested. Naturally the Forest Service would be interested in upholding this protest, would they not?

Mr. VOLIN. I suppose—

Representative HOFFMAN. That is human nature, is it not?

Mr. VOLIN. If they had denied one claim they would be guided by that.

Representative HOFFMAN. They would want to make the decision stick.

Mr. VOLIN. Yes.

Representative HOFFMAN. You have noticed how counsel gets an idea and calls witnesses and tries to slant everything to sustain that opinion?

Mr. VOLIN. I believe that is right.

Representative HOFFMAN. Certainly. That is the way we all do. Then, thinking it over, is there anything ethically wrong in permitting a party who has asked for an appeal to have a voice in selecting the one who is to make the decision?

Representative JONAS. Provided it is not the sole voice.

Representative HOFFMAN. Providing, of course, it is not the sole voice, as my associate suggests.

Mr. VOLIN. I guess there is nothing wrong with that, sir.

Representative HOFFMAN. I was just wondering. It seems to be the opinion of counsel and some of the members of the committee that that is a terrible thing to do, although I assume if any one of those gentle-

men had the question of whether he was to run again he would not leave it to anybody I might select to make the decision for him.

Now, who made the first kick about this decision? Where did this controversy all come up first so far as you know? Here is the Bureau of Land Management. They had this application and the Forest Service makes a protest. Then the Secretary made a decision. Who raised a hullabaloo about it and when?

Mr. VOLIN. You mean when did I first hear about this case?

Representative HOFFMAN. Not about the case, but after the decision was made by the Secretary who instigated the hearings so far as you know?

Mr. VOLIN. This investigation?

Representative HOFFMAN. Yes.

Mr. VOLIN. This hearing?

Representative HOFFMAN. Yes; this one or any previous one.

Mr. VOLIN. The first I—

Representative HOFFMAN. The first you knew about it was in the campaign a year or so ago, was it not?

Mr. VOLIN. I didn't know anything about that. I had moved to—

Representative HOFFMAN. You had gone to a better land?

Mr. VOLIN. That's a very nice statement, Congressman.

Representative HOFFMAN. When did you first hear about it—that somebody was yelling "steal"?

Mr. VOLIN. The first I heard about it was by a telephone call in December—I can't tell you the exact date; I believe it was on a Sunday—from McCormick, I believe, telling me about the hearing in Portland.

Representative HOFFMAN. That is this year?

Mr. VOLIN. That is this fall.

Representative HOFFMAN. You did not know about it a year ago?

Mr. VOLIN. No, I did not.

Representative HOFFMAN. So then I get no information about that so far as you are concerned, as to who instigated the complaint?

Mr. VOLIN. No, I didn't know anything about the background on this and my knowledge of it is largely confined to what I have heard here.

Representative HOFFMAN. You did not know the thing had been thrashed out a year ago on the west coast?

Mr. VOLIN. No, sir.

Representative HOFFMAN. On charges made by that distinguished gentleman, Mr. Drew Pearson?

Mr. VOLIN. No, sir.

Representative HOFFMAN. The Senator, I think, used the figure \$600,000 as the value of the timber.

Senator NEUBERGER. I used the figures of anywhere from around \$250,000 to \$600,000 and I said there were various estimates.

Representative HOFFMAN. That is right.

Senator NEUBERGER. If I am not incorrect that is what I said.

Representative HOFFMAN. Do you know anybody besides Drew Pearson who put \$600,000 on it?

Senator NEUBERGER. I am not—

Representative HOFFMAN. You are not a witness; pardon me for asking.

Do you know of anyone who put a \$600,000 figure on it except Drew Pearson?

Mr. VOLIN. I don't know.

Representative HOFFMAN. You do not know what he did even?

Mr. VOLIN. No.

Representative HOFFMAN. You are missing a lot. Do you not realize that?

Mr. VOLIN. I quit reading his column to preserve my blood pressure.

Representative HOFFMAN. For your information the timber was valued by the Forest Service people at \$77,000 and another similar area in quality and timber and access was sold on a public bid at \$78,000 at the same time, so do not let that worry you that you were a part of anything where the Government lost anything.

What became of those samples, if you know, that Mr. Hattan took? I mean the ones that were not used.

Mr. VOLIN. I didn't know that Mr. Hattan had taken any samples.

Representative HOFFMAN. You did not know he had made 2 or 3 or how many—4?

Representative JONAS. Three, I think.

Representative HOFFMAN. The land is still there, so far as you know?

Mr. VOLIN. I judge it is.

Representative HOFFMAN. Whether it is or is not mineral land justifying the issue of a patent could be easily determined if anybody now wanted to go out there and had the ability and integrity to make an accurate assay, could it not?

Mr. VOLIN. It could be done. The procedure could be repeated and you could expect to check it—I mean to have some check on what you had done before.

Representative HOFFMAN. That would be a short and quick way to find out what actually was there?

Representative JONAS. Will my colleague yield?

Representative HOFFMAN. Yes.

Representative JONAS. You do not mean that everybody would be satisfied regardless of what happened, do you?

Representative HOFFMAN. No. No. Pardon me. If I intimated that, it was wrong.

Representative JONAS. I do not see how you could ever select an assayer now that everybody would agree to. Whatever the result is the one that loses will claim the assay is not correct.

Representative CHUDOFF. Would you yield at that point?

Representative JONAS. Yes.

Representative CHUDOFF. Your argument is very good except for one thing; if we could have had the sample that went in the Rogue River we might have been able to make an umpire assay.

Representative JONAS. Where are the Hattan samples?

Representative CHUDOFF. I do not know. I do not know where anything is in this case. That is what I do not like about it.

Representative HOFFMAN. Now may I go back, if my expert from Philadelphia has finished?

Representative CHUDOFF. Thank you, Mr. Hoffman.

Representative HOFFMAN. You did not find any fault with the instructions that were given you at the time, did you?

Mr. VOLIN. No, sir.

Representative HOFFMAN. I mean in your own mind did you have any question?

Mr. VOLIN. They were quite generalized, but I found no fault.

Representative HOFFMAN. Do you know whether or not the Forest Service ever asked for any sort of a resurvey or rehearing after the decision?

Mr. VOLIN. No; I do not know that.

Representative HOFFMAN. Do you know of anyone else?

Mr. VOLIN. No, sir.

Representative HOFFMAN. I think that is all. I would like to have the staff tell us, and I understand my associates would like to know, too, who first made the complaint and what form it was made in, and a copy of it.

Is that right, Mr. Jonas?

Representative JONAS. Yes, sir. But I have a question or two of Mr. Volin when it comes my turn again.

Representative HOFFMAN. I will quit now.

Representative JONAS. May I do it now?

Senator NEUBERGER. I will defer to Mr. Jonas.

Representative JONAS. Mr. Volin, the Senator from Oregon asked you some questions about your previous experience in this sort of thing, and you said you had never been called upon to do exactly what you were asked to do in this case before. You did not mean to intimate or infer from that that your department and your office has not had wide experience in taking ore samples and having them assayed, did you?

Mr. VOLIN. I tried to make that distinction, sir.

Representative JONAS. I did not get it. I think you started to say that you had had considerable experience taking samples, but I do not think you made that point clear for the record.

Mr. VOLIN. Previously in the testimony somewhere I stated that the Bureau had worked for years, exactly from 1939 until—well, maybe they are still doing some of that work—on strategic minerals and essential minerals, exploration projects, or investigations, let us call them, in which sampling is a very important part of the work.

Representative JONAS. So you think, then, your experience was sufficient from the standpoint of sampling, certainly?

Mr. VOLIN. I think that the Bureau has had a great deal of experience in sampling projects.

Representative JONAS. The Senator also expressed considerable surprise that you did not send these samples for assay to your own laboratory at Albany. That is your laboratory at Albany, the Bureau of Mines laboratory?

Mr. VOLIN. That is the laboratory that serves region 2; yes, sir.

Representative JONAS. I thought I understood you to say that you were not even sending your own samples to Albany?

Mr. VOLIN. No. I said—I meant to say again, sir, to clarify that, I meant to say that the load of work at Albany was so large that we had to send some of our samples to outside assayers.

Representative JONAS. And were you having to send some to outside assayers about this time?

Mr. VOLIN. Yes, sir.

Representative JONAS. Was that the only reason you did not select Albany? Is it not true that the Albany laboratory does not have too good a reputation as a lab?

Mr. VOLIN. I do not have that opinion, sir.

Representative JONAS. Did you read the testimony of Mr. Appling before this committee in Portland in which he said that the record of the lab at Albany was very poor?

Mr. VOLIN. I must confess that I have not read the preceding testimony.

Representative JONAS. May I ask you to comment on this line of questioning which appears on page 202 of the Portland transcript? Mr. Redwine addressing a question to Mr. Appling:

What is the reputation of the Bureau of Mines Laboratory at Albany?

Mr. APPLING. Am I under oath?

Mr. REDWINE. Yes, sir.

Mr. APPLING. Very poor. I would please like the record to read that that is under oath.

Representative HOFFMAN. Mr. Appling, I might add, was reluctant to testify.

Representative CHUDOFF. Mr. Chairman——

Representative JONAS. I do not want to yield until I finish this.

Representative CHUDOFF. Will you read the whole page?

Representative JONAS. Yes, sir. [Reading:]

Mr. APPLING. Very poor. I would please like the record to read that that is under oath.

Mr. REDWINE. What is wrong with this assay laboratory?

Mr. APPLING. I have a number of cases in the file where the assays were entirely incorrect by comparison with check samples.

Representative CHUDOFF. Did you ever complain to your superiors about that?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. How many assayers do you have there, or chemists or whatever these fellows are called?

Mr. APPLING. I do not really know. I suppose about 6 or 8.

Representative CHUDOFF. In your opinion, they do not know what they are doing?

Mr. APPLING. Some of them evidently do not.

Representative CHUDOFF. If no good comes of these hearings, at least we will get up there and get some decent assayers.

Mr. APPLING. I would like to see it.

That is the laboratory characterized by your own assistant, Mr. Appling, who was selected by you to take these samples that the Senator from Oregon says you should have sent, these samples in controversy, to be assayed. Would you expect the company complainer to agree to send samples to a laboratory that the people in your own Bureau say is incompetent? You do not think that would be very smart, do you?

Mr. VOLIN. Could I answer your question by giving my opinion of Albany?

Representative JONAS. I asked you if you would expect that a complainant would agree to let a laboratory make this assay when your own representative says it does not have a good reputation.

Mr. VOLIN. If the complainant knew of that, I suppose he would be reluctant to have his samples sent there.

Representative JONAS. I want to ask you another question along that line. The inference has been made here that the company absolutely refused to have anybody do this assay work except the A. W. Williams Co. Is it not true that the company suggested A. W. Williams Co.? You suggested two other assayers, only two; is that correct?

Mr. VOLIN. I also mentioned the Union Assay Co. in Salt Lake City, but I figured it was farther away; that the ones on the coast would be the most accessible.

Representative JONAS. I understood that you only offered the suggestion of two assayers.

Mr. VOLIN. That is what I said before; yes, sir.

Representative JONAS. Did the company absolutely turn thumbs down on those that you suggested, or did they merely offer a counter suggestion that "We would prefer to have the Williams Co."?

Mr. VOLIN. I think Appling will have to tell you that. All I have is what I got from him and it was my impression that they wanted the A. W. Williams Co. and had some reasons for not selecting the two that I suggested.

Representative JONAS. One reason would be quite obvious, would it not: Because it made the assay that the company felt was incorrect?

Mr. VOLIN. If they had had previous experience with those companies, why, they would have reason not to want to send assays to them. I mean samples.

Representative JONAS. What I am trying to get you to say is whatever it was the company representative said, whether it amounted to a categorical rejection of any assayer out there or if it was merely a counter suggestion which you took under consideration and after investigation you agreed to it? Which was it?

Mr. VOLIN. At the time I took it as a counter suggestion, because if I had as a result of my inquiry been dissatisfied with the A. W. Williams Co. I would have rejected it, and we would have had to arbitrate further on the thing.

Representative JONAS. Then you would have had to have a meeting of the minds about some other company?

Representative CHUDOFF. I did not hear your answer. Did you say if the applicant had insisted on the Williams Inspection Co. you would have insisted they give it to somebody else?

Mr. VOLIN. No, I did not say that.

Representative CHUDOFF. What did you say? I did not hear you.

Mr. VOLIN. I said if, as a result of my inquiry about the A. W. Williams Inspection Co. I had been dissatisfied with the answer I received, I would have asked for further discussion, further negotiations, to select an assaying firm.

Representative CHUDOFF. On that point, where did you make your inquiries? Whom did you make them from?

Mr. VOLIN. Sir, it is all in the record as of yesterday. I can go over it for you. I will be glad to do so.

Representative CHUDOFF. Maybe we can shorten this. My recollection is that you communicated either in writing or orally with the State geologist of the State of Alabama.

Mr. VOLIN. No, sir.

Representative CHUDOFF. You tell me.

Mr. VOLIN. I wrote a letter giving the background and the reason for wanting this information from Mr. Thoenen, assistant regional director, region 7, of the Bureau of Mines. I asked him to look, to find out about this firm, and to see whether it would be in his judgment a reputable firm to receive these samples. I told him what the samples were for and the full background on it. I judged that his reply was satisfactory.

Representative CHUDOFF. I note that there was some inquiry made from the State geologist of Alabama?

Mr. VOLIN. His reply stated that this firm has the okay of the State geologist of Alabama and is listed in the Department of Commerce Register.

Representative CHUDOFF. That is Thoenen's reply to you?

Mr. VOLIN. That is Thoenen's reply to me.

Representative CHUDOFF. I just wanted to get that straight in my mind. Thank you.

Mr. VOLIN. Yes, sir.

Representative JONAS. That is all; thank you, sir.

Senator SCOTT. Senator Neuberger?

Senator NEUBERGER. I would not return to this, Mr. Volin, unless it had been reopened here. The Congressman from Michigan, in questioning you about the right of the Al Sarena Co. to exercise a certain veto power over the selection of an assay company, made the comparison of the selection of an arbitrator in, let us say, a dispute between an employing company and its employees, as to arbitration or wages.

I would like to ask you if there is not a somewhat different comparison to be made? In the case of a company and its employees, when they select an arbitrator, there are two things mutually provided: The employees provide labor and the company provides wages.

Do you know of any other situation involving the property of the United States Government where the entire question is one of disposal of Government property, whether it is physical property or cash assets, in which the person seeking Government property has a veto power over who shall umpire the decision?

Let me make several comparisons, inasmuch as the Congressman from Michigan used that one of a company and its employees. If a veteran of a war applies to the United States Veterans' Administration for a disability pension because he was allegedly wounded in that war, is the determination of the veteran's wound and its nature and how it was incurred made by the physician selected or employed by the United States Veterans' Administration, or does the veteran have a voice in what physician shall examine and determine whether he was disabled? Do you know about that?

Mr. VOLIN. To my knowledge, the Veterans' Administration has its own medical staff who makes that determination.

Senator NEUBERGER. The veteran is is not allowed to arbitrate with the Veterans' Administration over—

Mr. VOLIN. I don't know about that angle, whether he has any recourse to review or not, but I do know that the first determination is made by the Veterans' Administration's own medical staff.

Senator NEUBERGER. That has been my assumption. I may be wrong. If a person feels he is not receiving sufficient or proper social-security funds from the Government, is that determination made by the examiners of the Social Security Administration, or is it made by an arbitrator mutually agreed upon by the Social Security Administration and the person seeking a higher benefit from social security?

Mr. VOLIN. I guess it is made by the people with the social-security setup.

Senator NEUBERGER. The reason I am asking you these questions—I do not expect you to know any more about this than I do and my

knowledge of it is rather sketchy—is for this reason: The gentleman from Michigan has compared this entire proceeding in the Rogue River National Forest to an arbitration between people who are mutually giving things of value to each other, as I say, such as a union which provides labor through its people and a company which pays wages in return for the labor. In this situation if the company received a favorable assay and the assay was used to grant patent to the land, the company received all of the land and all of the timber on that land without any payment to the Government, is that not correct; if patent was granted on the basis of a favorable assay?

Mr. VOLIN. I believe there is a fee of \$5 per claim, is there not?

Senator NEUBERGER. A purely nominal fee rather than anything approaching the value of the land or the timber.

Mr. VOLIN. That is the fee for the patent, yes.

Senator NEUBERGER. It is a purely nominal fee and has nothing to do with the value of the land or the value of the timber; is that correct?

Mr. VOLIN. That is right.

Senator NEUBERGER. For that reason I have introduced this to indicate that this, in my opinion, is not in any way comparable to an arbitration. The entire question was one of disposal of Government property, with nothing on the other side.

I just want to ask one other question, inasmuch as this matter of the company's role in the selection of an assaying company was raised by the distinguished Congressman from North Carolina. Is it not a fact that these instructions which gave the company a voice in the selection of an assaying company virtually gave them veto power over any company you might suggest, such as Abbot Hanks, and so on, inasmuch as it had to be mutually agreed upon?

Mr. VOLIN. That could have been determined if we would have carried it out to an impasse, which we didn't do. When they didn't find my suggestions acceptable, I looked into their suggestion and determined that their suggestion was O. K. And if we had come to an impasse then it would have been determined whether they had an absolute veto on the thing or not.

Senator NEUBERGER. However, you did not press the companies that you originally recommended to make the assay. You did not press those recommendations, in other words?

Mr. VOLIN. I did not insist on them; no.

Senator NEUBERGER. You did not insist upon them. In effect you agreed to the company, the assaying company laboratory, proposed by the Al Sarena Co.?

Mr. VOLIN. That's right.

Senator NEUBERGER. Thank you very much.

Senator SCOTT. In this contested case how long would you have retained the split samples?

Mr. VOLIN. That's a good question. If I had instructions to do so I would have retained them. Again I must impress on you that when you are retaining an umpire sample, that it has to be in a secure place. It cannot leave your person at any time as long as you are responsible for it. Under the circumstances I don't see how I could have retained those samples any length of time unless I could have found a bank vault or something to put them in, and after seeing the assays and deciding in my mind whether I thought those assays were regular or not I might have destroyed the samples.

Senator SCOTT. Do you think it is proper that this Al Sarena matter be referred to the Bureau of Mines?

Mr. VOLIN. I thought we covered that. Again that is an opinion. I would like to answer it in this way, if I may, Senator: That in my experience with the Bureau of Mines I have never had any connection or heard of a case like this before.

Senator SCOTT. That is your answer?

Mr. VOLIN. That is what I would like to submit as an answer, sir.

Senator SCOTT. I want to thank you for it.

Are there any other questions?

Representative MOSS. Mr. Chairman, I have just a few questions.

Senator SCOTT. Congressman MOSS has a question.

Representative MOSS. Mr. VOLIN, did you order destruction of the samples or the splits in this case?

Mr. VOLIN. I did not.

Representative MOSS. Would you have ordered their destruction at the time? You were familiar with the fact that when the case was referred to the Bureau of Mines there was some controversy?

Mr. VOLIN. Yes, I realized or knew of that nature of the investigation.

Representative MOSS. You were aware also that previous assays had been made and that apparently a dispute existed as to whether they correctly reflected the mineral value of the land?

Mr. VOLIN. I did not go into the previous reasons for rejection of the patent application. I did not do that. I did not know that previous assays had been taken, but of course in the normal procedure of a patent application it must be supported by assays, but I did not know who took those assays.

Representative MOSS. Did you assume that they must have been taken previously?

Mr. VOLIN. I didn't think about the matter in this way, no.

Representative MOSS. But you did feel that there was some controversy?

Mr. VOLIN. Oh, yes, I knew there was a denial of application; yes, sir.

Representative MOSS. But you were not aware at all as to the results obtained from the previous assays?

Mr. VOLIN. Not for the reasons of the denial; I was not aware of those reasons, no, sir.

Representative MOSS. Knowing that there was an element of controversy would you have ordered the destruction of the samples or the splits, whatever you might call them?

Mr. VOLIN. After seeing the results, noting the general tenor of them and the apparent low-grade character of them, with the exception of one, which might be discounted as having any great bearing on the whole matter, and without a proper place to keep these samples in security, I think I would have destroyed them; yes.

Representative MOSS. You say the "apparent low-grade character." Then at that point you formed an opinion it was low grade and apparently of no great value as a mining claim?

Mr. VOLIN. Now you are asking me for an opinion. I am expressing a personal opinion. It is not necessarily the opinion of the Bureau of Mines or the Department.

Representative MOSS. In view of your background it would be fairly well-informed opinion, however.

Mr. VOLIN. In my personal opinion the character is very low grade. Representative Moss. Now, on this matter of security of these samples, you say they cannot leave your person. Had they not left the person of your assistant during the period from the date they were taken until the results were obtained?

Mr. VOLIN. I think very good care was exercised about the security of the samples, as great a care as could be exercised under the circumstances. From the time that the samples were cut until they were taken to Grants Pass they were always in Mr. Appling's presence, he tells me. At Grants Pass they were lodged with the office of the Department of Geology and Mineral Industries, which is the most impartial people that we could find to take them. I know that Mr. Appling tried to arrange to put them in a bank vault and could not make those arrangements.

Representative Moss. Did the Department of Geology request that they be removed?

Mr. VOLIN. I believe that the Department of Geology would not want to be—I am sure they would not want to be responsible for samples of that character under any length of time, for any length of time.

Representative Moss. But they had had them in custody for how long at the time of destruction?

Mr. VOLIN. Well, the sampling was done in mid-November—I don't remember exact dates—and until they were mailed—I don't know when the samples were expressed; they were sent by express, I believe—I would say it was a matter of several days, a length of several days, that they were lodged with this office in Grants Pass.

Representative Moss. How bulky were they?

Mr. VOLIN. They were not very bulky. They were in—I understand they were pulps in manila paper envelopes.

Representative Moss. What security provisions do you have for safeguarding the samples which are the property of the Bureau of Mines or you expect some test by the Bureau of Mines under the exploration program or strategic minerals? Do you have to exercise the same degree of security in your custody of those samples?

Mr. VOLIN. No, sir. We have no procedure—I should say we have no reason to have a security for the samples. The duplicate pulps are stored with the chem lab, yes, the chemical lab at Albany, in ordinary storage and not under lock.

Representative Moss. You feel, then, that the security question was one almost insurmountable in this instance?

Mr. VOLIN. I feel that it was a difficult thing to comply with; yes.

Representative Moss. Was any effort made prior to determining that they should be destroyed to find a secure place for a longer period of time?

Mr. VOLIN. Yes, sir. Mr. Appling tried to arrange to have these samples placed in a bank vault.

Representative CHUDOFF. Will you yield?

Mr. Appling testified that he tried to get them in a bank vault, but the bank would not take them and they walked 2 blocks to the Rogue River and threw them in. That is in the testimony.

Representative Moss. Had he been requested then by the Department of Geology to take the samples?

Mr. VOLIN. I don't know that point. That is a point that you will have to get from Mr. Appling.

Representative MOSS. You do not know whether that was discussed?

Representative CHUDOFF. I do not want to leave this to my recollection, but to my recollection Mr. Appling's testimony and your testimony are pretty far apart. Mr. Appling testified there was not any thought about sending the samples to Albany, that in his opinion the assayers who worked for the Bureau of Mines were incompetent; that he had made many complaints to his superiors, and I presume you were one of his superiors—he must have complained to you—but they were ignored.

He then said he and McCormick tried to leave the samples at the post office and the postmaster would not take them.

Then he said they took them to the Bureau of Mines and left them there for a couple of weeks until the assay reports were received. I think the assay reports were received some time right before the first of January. He said about 2 weeks later he then took the samples to the bank in wherever they were. I do not remember the town. The bank refused to take them and he and McCormick then walked down to the Rogue River and threw them into the river.

Then I asked him did he ever throw any previous samples in the river and he said "No".

I asked him "Was it not rather unusual to do it?"

He said "Yes".

I asked him why he did it and he said he could not explain.

Did you ever give him any authority to throw samples in the Rogue River?

Mr. VOLIN. No, sir.

Representative CHUDOFF. Did you ever have any conference with Appling, first of all, concerning the ability and competency of the assayers at Albany?

Mr. VOLIN. It had been discussed. I would like to make my statement about the Albany establishment.

Representative CHUDOFF. You have already said they were good assayers, did you not?

Mr. VOLIN. I don't remember whether I was permitted to say—

Representative CHUDOFF. You tell us about it.

Mr. VOLIN. The Albany Lab is a large one and handles a large volume of business. Necessarily they have to use routine procedures, and it will handle many dozens of assays a day. If you submit a sample and do not ask for a check assay they use the normal routine, which is to get out the results. The results might have a variation or some error, but for the purposes that the samples are submitted they are satisfactory.

However, in cases in which you wanted, an engineer wanted, an accurate return, an accurate analysis, he could ask for a check assay and the work of the Albany Chemical Lab in that case was excellent.

Representative CHUDOFF. You were chief of the Bureau—was it the Salt Lake City office?

Mr. VOLIN. No, sir.

Representative CHUDOFF. Spokane office?

Mr. VOLIN. Yes, sir.

Representative CHUDOFF. And the Albany Laboratory was under your jurisdiction?

Mr. VOLIN. No, sir.

Representative CHUDOFF. It was not?

Mr. VOLIN. No. I was chief of the Mine Division and the Albany Laboratory is under the jurisdiction of the regional director, region 2.

Representative CHUDOFF. And Mr. Appling spoke to you about the incompetency of these assayers in Albany?

Mr. VOLIN. He had stated that he had had some wrong results on samples. I think all of us had had occasions to check back, but the general run of results received from Albany were satisfactory for the purposes that they were submitted for.

Now, if you wanted an undisputably accurate assay, you would ask for it. You would ask for a check assay. It means that they have to give you two results which check each other.

Representative CHUDOFF. I understand that, but that was not done in this case, was it.

Mr. VOLIN. Well, these samples weren't sent to Albany.

Representative CHUDOFF. They were not sent anywhere. They were taken good care of. They were taken good care of by depositing them in the State laboratory and then taken good care of by depositing them in the river.

Mr. VOLIN. The samples were sent to the A. W. Williams Inspection Co.

Representative CHUDOFF. There were no check samples sent to A. W. Williams or any other samples.

Mr. VOLIN. You are talking about the splits?

Representative CHUDOFF. Yes. Do you not think, as a public official knowing the bitter controversy in this case as to whether or not there were sufficient minerals in these mines to warrant a patent, that extra precaution should have been taken?

Mr. VOLIN. I think we took extra precaution, sir.

Representative CHUDOFF. Do you not also think, as a public official, Mr. Appling having complained to you about the poor ability of the assayers in Albany, it was your duty if you were in charge of that laboratory to notify the man in charge the assays coming out of there were incorrect and improper and could not be relied on?

Mr. VOLIN. Congressman, I did that on several occasions.

Representative CHUDOFF. Did you do it in writing?

Mr. VOLIN. Yes, I did.

Representative CHUDOFF. And there would be copies of that writing in the files?

Mr. VOLIN. There would be in the files. I believe it would be in a confidential memorandum, however, but it would be in the files.

I do remember writing such a memorandum to ask that the procedures of analysis at Albany be reviewed. On one occasion, or more than one occasion we had some erroneous results.

I still maintain, and I want you to understand that, that if you asked Albany for a check assay, you would get a check assay, and it was accurate.

Representative CHUDOFF. I tell you why I am concerned about that, Mr. Volin. This lab was assaying strategic stockpile minerals with the Government spending millions of dollars and it was important that they have competent assays.

Would you have any recollection when you sent that memorandum and whom you sent it to?

Mr. VOLIN. The Albany lab was not making assays for stockpiling minerals.

Representative CHUDOFF. What were they doing?

Mr. VOLIN. They were making analyses of samples submitted from the field in surveys of mineral deposits. There is a very great difference, Congressman.

Representative CHUDOFF. Let us accept that. Approximately when did you send this note to and whom did you send it to?

Mr. VOLIN. I don't remember now. I think I sent it to Roberson—let me give you the spelling of his name: R-o-b-e-r-s-o-n, who is in charge of the lab, the chem lab; and the date would be some time in 1951 I guess, or maybe 1952.

Representative CHUDOFF. As a result of your complaint was anything ever done and was anybody ever transferred or examined to determine their competency?

Mr. VOLIN. I also spoke about this matter——

Representative CHUDOFF. Now, you answer my question and then you can explain whom else you spoke to.

Mr. VOLIN. Yes; I received a reply from Roberson in which he said that he appreciated my criticism and they were making every effort to do the procedures and get good results, accurate results.

Representative CHUDOFF. And that is in the record, too, the reply?

Mr. VOLIN. I believe that would be in the record, sir.

Representative CHUDOFF. You were going to say that you also complained to somebody else?

Mr. VOLIN. I also, on a number of occasions—I used to make direct visits to Albany, at least once a month. On several occasions I spoke to the regional director about keeping up the quality of our assaying and maintaining that at satisfactory levels.

Representative CHUDOFF. You had made numerous complaints about the competency of the assayers in Albany?

Mr. VOLIN. I haven't said anything about the competency. I don't think I have used that term.

Representative CHUDOFF. What kind of complaints did you make?

Mr. VOLIN. I simply stated that on certain occasions we had received results and sent back for another assay and they didn't check.

Representative CHUDOFF. That would seem to deny it, to say that somebody was not making a proper assay, would it not?

Mr. VOLIN. It might not be his competency. It might be that they are using an unsatisfactory procedure for that particular sample.

Representative CHUDOFF. I am going to ask you how you can reconcile these statements you made in the last 4 or 5 minutes and your prior statement that in your opinion the people in the Albany Laboratory were doing an excellent job. You said that.

Mr. VOLIN. I will say it again.

Representative CHUDOFF. How do you reconcile that?

If you get a lot of wrong assays how does that make them do an excellent job?

Mr. VOLIN. The results that we received out of Albany were very satisfactory for the type of work we were doing, sir.

Representative CHUDOFF. Then in your opinion Mr. Appling was wrong in saying the kind of work being done at Albany was very poor?

Mr. VOLIN. I don't want to be asked to express that opinion, sir.

Representative CHUDOFF. But in your opinion the work was excellent?

Mr. VOLIN. I wish that you would review my statement. I said that if you wanted an accurate assay out of Albany and you asked for a check assay you would receive an accurate assay.

Representative CHUDOFF. Then an accurate assay is a good assay, an excellent assay, is that not right?

Mr. VOLIN. That's right.

Representative CHUDOFF. And an inaccurate assay is a poor assay?

Mr. VOLIN. Not necessarily. There are limits there that sometimes you don't need to know—

Representative CHUDOFF. Assuming there is a certain amount of tolerance allowed. Even when you do precise machine work you are allowed a tolerance. Would you say, giving the laboratory every benefit of tolerances, that they were doing an excellent job?

Mr. VOLIN. I think they are doing a good enough job under the circumstances; yes, sir.

Representative CHUDOFF. Mr. Lanigan?

Mr. LANIGAN. To get back to the taking of samples at the Al Sarena mine, would you say that it would be necessary for the integrity of the sampling and the assaying that Mr. Appling keep the samples in his possession from the time the samples were taken at the mine until they were expressed to the Williams laboratory?

Mr. VOLIN. That's the normal procedure; yes.

Mr. LANIGAN. Do you know that on the same day that the samples were taken at the mine they were brought back by Mr. McCormick and Mr. Appling and left at the post office overnight?

Mr. VOLIN. I knew that they did—at the end of the first day I believe the samples they had taken that day they tried to lodge—they did lodge—with the post office, the nearest post office, overnight. I would consider that a secure place.

Mr. LANIGAN. Would you consider that retaining possession of the samples?

Mr. VOLIN. The same as retaining possession; yes. It is a United States post office and people do not have access to the place where your samples are lodged.

Mr. LANIGAN. How do you know people did not have access?

Mr. VOLIN. I am leaving that to Appling's judgment, that he cautioned the postmaster that these samples would have to be in a place removed from access to the public.

Mr. LANIGAN. On the question of reimbursement for this, I think there came up this \$56 or some such amount charge that would have been required for assaying these samples at Albany. Did anyone reimburse the Bureau of Mines for the salary of Mr. Appling and the traveling expenses in connection with this examination?

Mr. VOLIN. No, sir. I got in touch with the regional office and asked if there were any funds available for this, because otherwise we would have to charge it to our regular funds—

Representative HOFFMAN. Mr. Chairman, we have been all through that and if the Government had gone ahead they would have had to pay \$56. We have been over it backward and forward.

Representative CHUDOFF. Mr. Chairman, I think Mr. Lanigan as counsel for the committee has a right to ask these questions. If Mr. Hoffman wants to object let him object, and you can rule.

Representative HOFFMAN. All right. I can stay here the rest of the week if you can.

Representative CHUDOFF. You know that I like your company, Mr. Hoffman.

Mr. VOLIN. I asked about the availability of funds and what account to charge this work to. Mark Wright, who was acting regional director at that time, wired or called Washington, D. C., about it and there is a reply, a telegraphic reply, in the files I believe that state to refer back to the instructions and that the Bureau would bear the cost of Appling's salary and the salaries of the Bureau men that were helping Appling and any travel cost incurred by them; and that the McDonalds would bear the cost of McCormick's salary, travel, and the cost of the assay.

Mr. LANIGAN. Did you ever compute what the cost of Mr. Appling's salary and those who assisted him and their travel expenses were for the period involved?

Mr. VOLIN. No. We had a work order system in which Mr. Appling kept his own records and he would have—I believe on this he would have charged this to an account by which we could identify the cost of it, but I don't know the cost of it.

Mr. LANIGAN. That is all.

Senator SCOTT. Are there any further questions?

Representative HOFFMAN. Yes. Oh, yes.

Senator SCOTT. Go right ahead.

Representative HOFFMAN. Thank you, Senator.

The distinguished Senator from Oregon tried to draw a distinction between my statement about selecting an arbitrator and the situation that existed here, and he referred to the Social Security Administration and then to the Veterans' Administration, and it was your understanding, I think, to the effect that when a veteran made a claim for let us say, disability, that the physician's decision in the Veterans' Administration was final.

Now, as a matter of fact, I think it is common knowledge that sometimes a Congressman goes down—I know I have—with the physician for the veteran on the Appeals Board and the opinion of the Veterans' physician has been overruled. Did you ever hear of that?

Mr. VOLIN. I should think that would be—

Representative HOFFMAN. It has happened anyway, if you never heard of it.

Mr. VOLIN. I don't know of it.

Representative HOFFMAN. That is one way of getting reelected. If you can win enough of those cases it is very helpful at the time of reelection; and sometimes that applies in a different way to social security.

In addition to that, if you can show fraud anywhere along the line you can always get into court against these Government agencies and, in this particular case, if they could show fraud they could have this determination set aside.

Then the Senator said that the case was different because in this case the Government had certain property. He referred to the value of it, and there was nothing on the other side.

There is this correction that should be made: That the Congress has written certain laws calling them mining laws, and under these laws you can file an application. You are familiar with that, of course?

Mr. VOLIN. I am familiar with that.

Representative HOFFMAN. And these people or their predecessors, beginning in 1897 and up to 1935, filed certain claims and they paid \$5 an acre, the figure fixed by the Government?

Mr. VOLIN. That was the patent fee; yes.

Representative HOFFMAN. And then there is some testimony here that they also spent \$200,000 in mining operations. Then, there is some testimony that they took off some timber which someone says maybe they should not have taken. Then the case dragged along and there was no hearing on the merits. You are familiar with that, are you not, that there was a hearing held, and the attorney for the McDonalds just filed a demurrer and his demurrer was overruled and he walked out. So that left the Government officials no choice but to rule against the claim of the mining company. You are familiar with that, are you not?

Mr. VOLIN. I didn't know anything about—

Representative HOFFMAN. That is the situation on the record since we have been taking testimony.

Mr. VOLIN. The background.

Representative HOFFMAN. Then the case had dragged along for something like 18 months and a suit was filed down in Alabama. On what grounds I do not know, nor what jurisdiction that court would have; but anyway, one was filed against the Department. So it was brought to a head where the Department had to do something.

Then the new Secretary of the Interior, McKay, ordered this sampling of ores to which you have referred, which was conducted under instructions given to you, and a report was made, then the appeal decided the case on that evidence.

With that whole situation in mind, had you been the claimant would you not have wanted an impartial assayer and would you not think you were entitled to one?

Mr. VOLIN. Well, I am sure the claimant would want an impartial referee, but what I was trying to state was that any of the Government agencies concerned with that should be considered impartial.

Representative HOFFMAN. The Forest Service had already ruled against the claimant. What was the use of taking an appeal if he was going to take the Forest Service's judgment? The Bureau of Land Management, Mr. Hattan, had decided against them. I will not say decided against them; he had taken certain samples. However, here it was.

The Secretary, Chapman, had refused to decide the issue and let it drag along. It was up to the new Secretary; so he sends out for an impartial sampling and assay.

You were impartial, were you not, your Bureau?

Mr. VOLIN. We try to be impartial.

Representative HOFFMAN. You are presumed to be, anyway, and presumed to be competent.

Mr. VOLIN. We try to be competent.

Representative HOFFMAN. What was wrong in referring it to you people instead of sending it to the people who had already rendered a decision, if anything is wrong with it?

Mr. VOLIN. Do you want me to answer that, sir?

Representative HOFFMAN. Surely. I would not have asked you if I did not want your opinion.

Mr. VOLIN. Well, since the Secretary of the Interior made his decision to refer it to the Bureau of Mines I suppose it certainly was his prerogative to do so and it was our bounden duty to follow his instructions.

Representative HOFFMAN. You did not object at the time, did you?

Mr. VOLIN. No, sir, I did not object at the time.

Representative HOFFMAN. You had not taken any position as to the merit of the appeal, had you?

Mr. VOLIN. No, sir.

Representative HOFFMAN. You were not involved in any way in the controversy my colleague suggests?

Mr. VOLIN. No, sir.

Representative HOFFMAN. You were not objecting to the extra work, were you?

Mr. VOLIN. I had lots of work, but I didn't object on that score, sir.

Representative HOFFMAN. You were not responsible for anything except a report, were you?

Mr. VOLIN. I was responsible——

Representative HOFFMAN. To pick an able, competent, honest man?

Mr. VOLIN. Yes, sir.

Representative HOFFMAN. And that you did?

Mr. VOLIN. I thought I did.

Representative HOFFMAN. And you have not seen any reason to change your opinion?

Mr. VOLIN. That's right.

Representative CHUDOFF. Mr. Chairman, I just want to keep the record straight. If I am wrong I would like counsel to advise me.

Somewhere back in my mind I have the impression the law says that the Bureau of Land Management is the statutory judge in these cases.

Mr. REDWINE. That is correct.

Senator SCOTT. That is correct.

Representative CHUDOFF. And not the Forest Service. The Bureau of Land Management is the statutory judge to sit in these disputes and make findings.

Of course, I think it goes further to say that the Secretary of Interior has a right to overrule the findings of the Bureau of Land Management and make any decisions he cares to, or to remand it for further proceedings.

Representative HOFFMAN. Of course, if you go back you will find that the Forest Service was lax in making the complaint and protest.

Representative CHUDOFF. The Forest Service, if my recollection is correct, were complainants. They said they contested the right to grant a patent here and they were not even brought into the thing. They were ignored and the Williams Co. was picked to make the assays.

Representative HOFFMAN. Oh, they borrowed Hattan from the Bureau of Land Management.

Senator NEUBERGER. I think to keep the record straight, something should be borne in mind by the witness and by the committee. I have lived in the Northwest all my life. I was born there. Throughout the

Northwest there have been thousands of people prospecting on public land for precious metals, as the witness knows, some fairly large companies, others individual prospectors. I camped with some of those prospectors and I have known people in those companies.

On a good many occasions those people have been denied patent because either the Forest Service, if it was on national forest land, or the Bureau of Land Management on appeal from the Forest Service, if it was on public domain land, ruled that there was not sufficient mineralization; and those people, either individual prospectors or mining companies, have lost their claim to patent.

Yet, in all the time I have lived in the Northwest I have never heard of another proceeding like this, and you, sir, have testified to us that in all your experience with the Bureau of Mines you have never known of another proceeding like this; is that correct?

Mr. VOLIN. That is what I so testified.

Senator NEUBERGER. Thank you.

Representative JONAS. Mr. Chairman, may I ask a question? I see it is about time to adjourn under your order about lunch. Are we through with this witness? If so, I want to ask a question, but I do not want to interrupt if you have other questions.

Mr. REDWINE. I have one statement I would like to make in connection with this witness, if I may, Mr. Chairman.

Representative HOFFMAN. In answer to the Senator, the record shows that at least 15 percent of the regional cases have been overruled by the Secretaries.

Senator NEUBERGER. On the basis of proceedings like this.

Representative HOFFMAN. Not necessarily. They are not all the same. Of course not. You had one overruled yourself.

Senator SCOTT. Mr. Redwine, go ahead.

Mr. REDWINE. In view of the insinuation made earlier this morning in connection with Mr. Volin, I would like to state very emphatically that there has been no reflection cast by the staff on either Mr. Volin's integrity, his honesty, or anything else, and I think he is to be congratulated on the frank manner in which he has testified.

Mr. VOLIN. Thank you.

Representative JONAS. I would like to concur in that. I did not intend to reflect on him at all and as to the questions I asked I thought he was very fair and very frank and candid in all his answers.

Mr. VOLIN. Thank you.

Representative JONAS. A question I wanted to ask—and it would be more properly directed to the chairman of my own subcommittee on the House side—is how did we get into this? I never remember hearing anything about Al Sarena. It was never brought up in any subcommittee meeting to my recollection.

When you sent me an agenda of what was to be investigated in the Northwest you did not say anything about the Al Sarena mine and I never heard of this case until I read this record since coming back to Washington on January 3. I just would like to know what documents have been submitted to our subcommittee or what complaints have been made, and by whom, and on the basis of what did we get into the investigation?

Representative CHUDOFF. To answer the gentleman's question, I want to say first of all that as far as the committee staff of the House committee was concerned, no investigation was made by our staff con-

cerning the Al Sarena case. We got into the Al Sarena case, I would not want to say accidentally, but it came out as a matter of hearings on the timber question in the Pacific Northwest. As we got into the hearing of witnesses in the Pacific Northwest certain references were made to the Al Sarena case, as to the value of the timber on the land, and of course the scarcity of timber in Oregon and in Washington.

Some of the witnesses alluded that timber was given away by the Government to the Al Sarena Mining Co. by granting them patents that they should not have had, and as a result of that I questioned the Members of the Senate and the members of the Senate staff and they said that they had a complete investigation and they would like at that time to go into it since we were out there and a lot of people who work for the Government in Oregon and close by would be in a position to testify and we would not have to hear them in Washington. That is how it came about.

Representative JONAS. Do I understand from what you said that the record will show that these witnesses did raise these questions?

Representative CHUDOFF. Some witnesses spoke about the Al Sarena case. I think we listened to an old prospector in Roseburg, Oreg., who was trying to get a patent for many years and his counsel raised this question. I think you will find that in the record.

Representative JONAS. I wanted to know if I had been derelict in my duty in not knowing that our committee had been requested to go into this. I never remember the matter having come up before the committee.

Representative CHUDOFF. This witness was a man by the name of Craget who appeared with his counsel in Roseburg, Oreg.; and I want to say to you again that our staff has made no investigation. That came as sort of a byproduct of the original timber investigation.

Representative JONAS. It could not have come up suddenly because you said the Senate staff told you when the question was raised that they had made a complete investigation.

Representative CHUDOFF. The counsel was of the opinion, after discussing it, that this was related to the timber investigation which we were authorized to make by a joint committee investigation.

Representative JONAS. There has been a lot of loose talk about charges that have been made. Has the Bureau of Land Management or the Forest Service filed any complaint or offered any criticism of what happened with either of our committees?

Representative CHUDOFF. I want to say this to you: As I said before, we made no investigation. We have no files on the Al Sarena case. All the complaints, if any were made to our committee, were referred to the Senate staff and I think counsel for the Senate committee can answer those questions.

Senator SCORR. The meeting is adjourned until 2 o'clock.

(Whereupon, at 12:25 p. m. the hearing was recessed to reconvene at 2 p. m. the same day.)

#### AFTERNOON SESSION

Senator SCORR. The meeting will please come to order.

Senator Murray asked me to make this statement for the record, and I will read his statement.

STATEMENT OF SENATOR JAMES E. MURRAY, CHAIRMAN, UNITED STATES SENATE  
COMMITTEE ON INTERIOR AND INSULAR AFFAIRS CONCERNING THE AL SARENA  
CASE

I have been informed that some question was raised during this morning's hearings before the subcommittee on the legislative oversight function, and the Subcommittee on Public Works and Natural Resources of the House Government Operations Committee concerning the initiation of the investigations of the so-called Al Sarena case.

I wish to point out that the Senate Committee on Interior and Insular Affairs, of which I have the honor to be chairman, has specific and explicit jurisdiction over all mining legislation, as well as mineral resources of the public lands and forest reserves created from the public domain, under the terms of the Legislative Reorganization Act of 1946, Public Law 601, 79th Congress. As chairman of that committee, I am charged with the duty of insuring that all legislation coming within the purview of the committee's jurisdiction shall be thoroughly studied, investigated and reported on. The Al Sarena case directly involves two of the major jurisdictional areas of this committee; that is, forest reserves and the mining laws.

I doubt the wisdom of anyone questioning the propriety of an investigation by the Senate Interior Committee into a matter of this kind which so clearly comes within the jurisdiction of my committee, nor do I feel compelled to enumerate the various sources of the complaints that have come to me, and to other members of my committee, as well as members of the United States Senate, all of which directly bear upon this alleged giveaway of a valuable segment of our Nation's timber resources.

It is my hope that as a result of these public hearings there will be full disclosure of all the facts, so that some of the more curious aspects of the procedures followed in this case will be revealed for the information of the public, and for the guidance of the Congress in the preparation of any remedial legislation that may be needed.

Representative CHUDOFF. Mr. Chairman, in view of Senator Murray's statement, I would just like to add for the record that, under the rules of the Committee on Government Operations and the jurisdiction of the various subcommittees set up thereunder, the Subcommittee on Public Works and Natural Resources has jurisdiction of Government mining matters, Government timber matters, and has jurisdiction over the Interior Department, the Bureau of Land Management, the Bureau of Mines and all the subdivisions of the Interior Department.

Representative HOFFMAN. Mr. Chairman, I raised no question about the jurisdiction of the Senate committee or the subcommittee nor of the House committee.

I want to put into the record again at this point the letter from Senator Murray which directed the investigation and which called attention, as I recall, to four things:

Public hearings to develop further facts and current information relative to problems of access to Government timber, including access roads, inadequate and outdated inventory data on Federal timber resources, increases in the allowable cut, revised timber sales to provide sales of the size and length that meet the need of small and large operators alike, increased acreage sales of diseased and burned timber, and a reexamination of the effect of marketing area and other restrictions on Government timber sales.

That is dated September 21. It is the letter authorizing the public hearings. It is signed by Senator Murray and nowhere does it mention anything about the Al Sarena Mines, as I recall it.

Representative CHUDOFF. Mr. Chairman, I would like to call the attention of the gentleman from Michigan to page 2 of the Al Sarena mining claims hearings held in Portland, Oreg., where Senator Scott made a statement as to why we were going into the Al Sarena case, and the reasons therefor.

I want to further call the gentleman's attention to the fact that he made no objection at that time. I think that it is rather late to object.

Senator NEUBERGER. I also would like to call attention to the fact that in Roseburg we went into the individual case of one isolated prospector, Mr. Craget, who felt that his presence on public lands was being threatened by a Government order, and Mr. Craget was enjoying no such intervention at the top level as the Al Sarena Co. had, and there was no objection from minority members of the committee that we look into the case of Mr. Craget, this lone little isolated, disabled prospector who was not receiving the benefit of this treatment.

If we can look into this case of Mr. Craget, who did not get the benefit of this "special" treatment, we can look into the Al Sarena case.

Representative HOFFMAN. In addition to what the Senator said, in Roseburg—

Senator NEUBERGER. At Roseburg.

Representative CHUDOFF. On November 17, 1955.

Representative HOFFMAN. May I finish my statement?

Representative CHUDOFF. I wanted to give you the date.

Representative HOFFMAN. At Roseburg they brought in the miner and the miner's dog by photographs of this poor miner on some claim that the Government was going to kick him off, I guess, and they made a very touching, tragic case of it, the purpose of which undoubtedly was to lay the foundation of bringing the Al Sarena case into the record.

I have a very distinct recollection of that. It would be a little exaggerated to say that the committee members were weeping over the situation of that poor miner and his dog.

Representative JONAS. Did you know anything about it?

Representative HOFFMAN. I did not know anything about anything. I was never advised of the purpose of the committee. The custom was to give me a statement, if they gave me any at all, when the witness took the stand.

For example, on a Monday when the committee staff had statements from the witnesses, and you know the rule that they are supposed to be filed and the letter of the Senator requires them to be filed in November, some of the statements were filed on Monday. They gave them to me on Wednesday or Thursday. Well, I was not even a stepchild.

Representative CHUDOFF. You always got the Department of the Interior statements 3 days before the chairman and even the committee. The record shows that you had in your possession many statements before the committee had them.

Representative HOFFMAN. I do not want to be discourteous but there is no truth to your statement. I do not know.

Representative CHUDOFF. If you will check the record, you will see that I complained that you were getting copies of Department of the Interior statements.

Representative HOFFMAN. You were kicking that the Department was giving a hearing. You wanted to convict them without a hearing. The record shows that you objected when Heath gave me information, although this is supposed to be a fact-finding committee. When Mr. Heath gave me some information, you squawked. That is

a good word, "squawked", because that is what you did about the fact that he gave it to me.

Representative CHUDOFF. I objected to you meeting him secretly at lunch and getting information from the Department employee before it was given to the committee, information which was not available until I subpoenaed him.

Representative HOFFMAN. You had investigators there since February and I came along and they recognized a fair individual and gave me the information.

Representative CHUDOFF. I think you have gotten fair treatment and I think nobody could satisfy you.

Representative HOFFMAN. Too bad that they do not channel everything through your staff.

Senator SCOTT. If there is no objection, we will recess at 4:30 sharp this afternoon.

Representative HOFFMAN. I guess that is all right, Mr. Chairman. I just want to call your attention to the fact that the Republican members are sacrificing a great deal to attend, and we intend to attend. We are sacrificing because the Republicans are holding a conference about something at 2:30. But I have no objection. I think this will be more profitable for me.

Representative CHUDOFF. Do you mean to tell me that the Republican Party is not advising you as to what their conference is about this afternoon?

Representative HOFFMAN. They are just trying to devise ways and means to meet the false, vicious charges being made by subcommittees through the use of Government money, and having difficulty in getting it.

Senator SCOTT. That is interesting information.

Representative HOFFMAN. They have me about worn out. You mean that we are going to do some business now?

Senator SCOTT. The first witness is Donald Burgess. If he is present, will he come forward?

Mr. Burgess, will you give your name and connection?

Will Congressman Chudoff swear the witness, please?

Representative CHUDOFF. Will you stand and raise your right hand, please?

Do you solemnly swear that the testimony you are about to give before this committee will be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. BURGESS. I so swear.

#### TESTIMONY OF DONALD R. BURGESS, DIRECTOR, OFFICE OF PUBLICATIONS, MANAGEMENT, DEPARTMENT OF COMMERCE

Mr. BURGESS. My name is Donald R. Burgess. I am Director of the Office of Publications, Management, of the United States Department of Commerce.

Mr. REDWINE. Mr. Burgess, will you identify that document, please?

Mr. BURGESS. This document is the publication called Directory and Commercial and College Laboratories, by the National Bureau of Standards of the Department of Commerce.

Mr. REDWINE. Will you read the first paragraph of the introduction, please?

Mr. BURGESS. The first paragraph of the introduction says:

In accordance with the law, the National Bureau of Standards makes tests and carries out investigations for other Government agencies. The Bureau does not make tests for private individuals if other laboratories can do the work with sufficient accuracy. To inform interested persons of the location of other laboratories, the Bureau has attempted to compile a complete list of commercial testing and research laboratories throughout the country, together with indications of the types of commodities which they are willing to test for commodity acceptance or other purposes. Information is given concerning 20 commercial laboratories, with 80 branches or offices. There is also presented a list of the laboratories of 189 colleges that are used not only for purposes of instruction but also to a considerable extent for research and testing work.

Mr. REDWINE. Mr. Burgess, does this document go into the matter of the competency of any agency or company that is listed there?

Mr. BURGESS. It does not.

Mr. REDWINE. What is the date of it, sir?

Mr. BURGESS. The publication was issued August 30, 1947, and it superseded Bureau of Standards Miscellaneous Publication M171.

Mr. REDWINE. Has this directory been revised by the Department of Commerce since 1947?

Mr. BURGESS. No, sir.

Mr. REDWINE. Has any publication been issued since that time that purports to be the successor of it?

Mr. BURGESS. Not by the Department of Commerce.

Mr. REDWINE. By any other agency?

Mr. BURGESS. Yes, sir. A publication has been issued by the American Society for Testing Materials, which indicates on the cover page that it is the successor to this publication.

Mr. REDWINE. But it is issued by a private organization?

Mr. BURGESS. Yes, sir.

Mr. REDWINE. Do you happen to have a copy of it with you, sir?

Mr. BURGESS. I do not.

Mr. REDWINE. This does not purport to be a complete directory of all firms who do this type of work, does it?

Mr. BURGESS. I do not feel qualified to answer fully on the methods of compilation of that directory, sir.

Mr. REDWINE. Have you ever seen that publication there, Mr. Burgess?

Mr. BURGESS. No, sir.

Mr. REDWINE. Do you know anything about it?

Representative HOFFMAN. Will the counsel identify it so that we know what you are talking about?

Mr. REDWINE. I will be glad to, Congressman.

You have never seen it before?

Mr. BURGESS. No, sir.

Mr. REDWINE. It is the American Council of Independent Laboratories, Inc., their ACIL bulletin.

Mr. Chairman, this is the document that Senator Goldwater offered yesterday and wanted put into the record at some time as to the fact that the Williams Inspection Co. was listed in this publication. I suggest that it go in at this time.

Senator SCOTT. Without objection, it will be in the record.

(The document referred to follows:)

ACIL BULLETIN

AUGUST 1955 SPECIAL EDITION

American Council of Independent Laboratories, Inc., the professional association of independent scientific laboratories, Washington, D. C.—Harold M. Dudley, executive secretary; Ruth Dudley, editor.

CONSTRUCTION INDUSTRY SERVED BY INDEPENDENT LABORATORIES

Forty-nine independent scientific laboratories (members of the American Council of Independent Laboratories, Inc.) are currently serving the construction industry.

The American Council of Independent Laboratories, Inc. is the professional association of independent scientific laboratories. It includes in its membership 65 leading independent testing, research, and inspection laboratories located in the chief metropolitan centers of the country, with an additional 64 branch laboratories. Serving American industry and Government they employ 2,000 chemists, biochemists, biologists, bacteriologists, physicists, engineers, metallurgists, physicians, pharmacologists, and technicians covering practically all phases of industrial needs.

The attached chart is based on a questionnaire showing laboratories qualified to make the inspections, physical and chemical tests by the applicable Federal specifications and American Society of Testing Materials requirements.

Independent laboratories also conduct research work in innumerable categories. Many of these are in the construction field. The present survey does not classify research projects. Requests for information on laboratories doing research should be addressed to this office and will be referred to appropriate member laboratories.

The questionnaire which was sent to all members of the American Council of Independent Laboratories was prepared with the assistance of the Veterans' Administration. Arrangements for its distribution have been made with the advice of the Department of Construction, the Chamber of Commerce of the United States, and the American Association of State Highway Officials.

Chart showing ACIL member laboratories qualified to make inspections, physical and chemical tests required by the applicable Federal specifications and American Society of Testing Materials requirements. Questions relating to specific requirements under "specifications" should be addressed to individual laboratories.

	1. Cementitious materials for concrete, etc.	2. Aggregates for concrete, etc.	3. Concrete	4. Mortar for unit masonry	5. Masonry building units, etc.	6. Refractories, fire brick	7. Waterproofing and roofing materials	8. Wood products and wood preservatives	9. Paint, varnish, lacquer, putty, etc.	10. Adhesives	11. Thermal insulating materials	12. Acoustical treatment materials	13. Floor coverings	14. Natural fiber and synthetic wall coverings	15. Rubber products	16. Plastic products	17. Structural steel	18. Steel and iron components	19. Nonferrous metal components	20. Metallic coatings	21. Soils	22. Investigation of foundations	23. Road and paving materials	24. Water and water treatments

[illegible]

<sup>1</sup> All types of weathering, waterproofing, corrosion and sunlight tests (direct and under glass). Actual exposure to predetermine permanency and durability.

**NOTE.**—Radioactive isotopes are used by a number of member laboratories to inspect metal castings, stressed structures, etc. Inquiries may be addressed to the Washington office.

## BUILDING RESEARCH INSTITUTE

National Academy of Sciences—National Research Council, Division of Engineering and Industrial Research, Washington, D. C.

Within the past decade the volume of building and the market for building products have grown enormously to a point beyond any expectations based on pre-war activity. Construction has become one of the major segments of the American economy.

As a result of this growth, many industries are giving attention to new products of all kinds for the building construction market. Many of these are intended essentially for the housing market and still others are intended for large buildings and heavy construction. Some industries like the plastics industry which heretofore paid scarcely any attention to building markets are now actively engaged in the development of materials and products expressly intended for adaptation to building purposes. Other industries, large and small, which previously served the construction industry as a matter of secondary interest to themselves are now concentrating on the development of new products for the building industry.

All new building products must meet certain performance standards imposed by building codes and regulations. In housing, the minimum property requirements of the FHA are in effect a set of standards which must be met by new products. The FHA is currently developing a national acceptance program under which new building products will be approved by the FHA for use in house construction under the FHA mortgage insurance program.

All of this adds up to many instances where new materials and products must be subject to tests by accredited testing laboratories. Even the biggest manufacturing companies must turn to recognized independent laboratories for such tests.

Many of the smaller industries and companies in the building products field also need the help of independent laboratories in their research and development programs because they themselves do not maintain laboratories of their own.

The general situation should indicate many opportunities in the field of research and testing of building materials and products for the independent laboratories of the United States. Many of the smaller producers in the building industry are new to research and development and undoubtedly are virtually unaware of the facilities which exist and are available to them through the independent laboratories. The laboratories themselves should see to it that the manufacturers hear about what they have to offer.

WILLIAM H. SCHEICK,  
*Executive Director.*

JULY 19, 1955.

Mr. REDWINE. I have here a document entitled United States Department of Agriculture Rural Electrification Administration, February 16, 1953, date of issuance; subject, Inspection companies and inspectors:

**PURPOSE**

The purpose of this bulletin is to furnish electric distribution, power and telephone borrowers with a revised list of inspection companies and their inspectors acceptable to REA to inspect poles, crossarms and other timber products. Additions and deletions have been made. This supersedes all previous issues of Engineering, Power and Telephone Engineering memoranda, 72, 323 and 506.

Then it lists the names and addresses of the series of companies, their hammer number of inspectors.

Are you familiar with that document, Mr. Burgess?

Mr. BURGESS. I have seen it.

Mr. REDWINE. Will you see if you can find the name of A. W. Williams Inspection Co. in there, please, Mr. Burgess?

Mr. BURGESS. Yes, sir.

Mr. REDWINE. What does it say, sir?

Mr. BURGESS. It says:

A. W. Williams Inspection Co., Virginia and Franklin Streets, Mobile 3, Ala.

Mr. REDWINE. Mr. Chairman, I suggest that this also go into the record to show that A. W. Williams Inspection Co. is well qualified, if this gives them any qualification, to inspect REA power poles.

(The document referred to follows:)

Pole Inspection Companies  
Approved Inspection Companies  
Inspection Companies

Representative HOFFMAN. To inspect what?

Representative JONAS. REA power poles.

Mr. COBURN. Mr. Chairman, may I ask the witness a couple of questions?

Senator SCOTT. Yes.

Mr. COBURN. Mr. Burgess, are you prepared to explain to the committee the significance of the symbols appearing in that document?

Mr. BURGESS. Only to the extent that I read them here myself, sir.

Mr. COBURN. I beg your pardon?

Mr. BURGESS. Only to the extent that I read them here myself.

Mr. COBURN. You have no other knowledge?

Mr. BURGESS. No.

Mr. COBURN. Have you made a study of those symbols?

Mr. BURGESS. No, sir.

Mr. COBURN. That is all I have.

Senator SCOTT. Are there any further questions?

Representative HOFFMAN. I have one question.

You have no personal knowledge of the qualifications of any of those people listed in either of those publications, have you?

Mr. BURGESS. No, sir.

Representative HOFFMAN. I have no more questions.

Representative JONAS. I have no questions.

Representative CHUDOFF. There are no questions from the House at this end of the table.

Senator SCOTT. Mr. R. N. Appling, Jr., will you please come forward?

Congressman Chudoff, will you swear him, please?

Representative HOFFMAN. Was he not sworn before?

Representative CHUDOFF. Mr. Appling was sworn in Portland; were you not, Mr. Appling?

Mr. APPLING. Yes, sir.

# **TESTIMONY OF RICHARD N. APPLING, JR., MINING ENGINEER, UNITED STATES BUREAU OF MINES—Resumed**

Mr. REDWINE. Mr. Appling, you testified before this joint committee hearing in Portland, I believe, sir?

Mr. APPLING. That is right.

Mr. REDWINE. Mr. Appling, I would like to direct your attention to your testimony in Portland.

Representative HOFFMAN. What page is that, please?

Mr. REDWINE. Just a moment, sir.

Representative CHUDOFF. It starts at 183, Mr. Hoffman.

Mr. REDWINE. On page 191, which I am reading from now:

Mr. REDWINE. What did you do, keep that alternate sample, as you call it, in the back of your car or where?

Mr. APPLING. No, sir; we deposited that with the State department of geology office in Grants Pass for safekeeping. Mr. McCormick and I took it in and asked them to keep it there until we came after it.

Mr. REDWINE. Then what happened?

Mr. APPLING. Well, we got the assay returns and I wrote the report. Some time afterwards, Mr. McCormick came to Grants Pass and we picked up the samples from the State Department of Geology office and destroyed them.

Mr. REDWINE. At what date?

Mr. APPLING. I could not say, sir.

Mr. REDWINE. I want to go back for a minute. Who received the A. W. Williams assay report?

Mr. APPLING. I do not know.

Mr. REDWINE. Did you receive it?

Mr. APPLING. I have a copy but it was not mailed to me.

Mr. REDWINE. Who told you that it had been received?

Mr. APPLING. Nobody told me. They gave me a copy of the certificate.

Representative CHUDOFF. Whom do you mean by "they"?

Mr. APPLING. I think Mr. McCormick gave it to me.

Mr. REDWINE. You mean this assay report did not come back to the Bureau of Mines? It went to Mr. McCormick?

Representative HOFFMAN. Pardon me. From what page are you reading now?

Mr. REDWINE. 192. [Reading:]

Mr. APPLING. The letter accompanying the assay report is addressed to the Al Sarena Mines, Inc.

Mr. APPLING. It is one of them. I think there were four copies.

Mr. REDWINE. It says here that they went to the First National Bank Building, Mobile, Ala.

Representative CHUDOFF. Do the Al Sarena Mines, Inc., have an office in Mobile?

Mr. APPLING. I could not say, sir.

Mr. REDWINE. You mean that the report did not come directly from the assayer to the Bureau of Mines?

Mr. APPLING. No.

Mr. REDWINE. What was the date that you went and picked up those samples that had been turned over to the Oregon Department of Geology and Mineral Industry?

Mr. APPLING. I cannot say exactly. It was at some time after the date of my report, which was January 2. I honestly couldn't say how long after.

Do you wish to change your testimony as to the date at this time, the date that the destruction of the samples took place and you dumped them into the Rogue River?

Mr. APPLING. Yes, sir. The testimony I gave at that time was to the best of my recollection. I have since checked the files, and I believe that it must have been, it was prior to January 5. The exact date I couldn't say. It may have been the 2d or 3d or possibly before the 1st of January. It was after we got the assay certificate, or after I got it.

Representative CHUDOFF. Pardon me. I want to get this straight.

You said that you got the assay report somewhere around the 2d of January?

Mr. APPLING. No, sir. That was the date of our report. I don't recall the exact date that I got the certificate.

Representative CHUDOFF. How long after you received this certificate did you write your report?

Mr. APPLING. Well, I started writing it right away. That was the date of the final draft.

Representative CHUDOFF. So sometime between January 2 when you wrote your report and January 5, you threw the envelopes into the Rogue River?

Mr. APPLING. No, sir; I wouldn't say January 5. It was prior to that time.

Representative CHUDOFF. Prior to January 5?

Mr. APPLING. Yes.

Representative CHUDOFF. Within 2 or 3 days after you received the assay report?

Mr. APPLING. Well, I really couldn't say. It was several days afterwards, at least. I don't recall exactly when.

Representative CHUDOFF. What did you testify to in Portland, the 15th?

Mr. APPLING. No, sir. I don't think I mentioned any specific date.

Representative CHUDOFF. There is a "15th" in the record somewhere.

Mr. REDWINE. May I read further on page 193:

Mr. REDWINE. How were they destroyed?

Mr. APPLING. They were shaken from the envelopes and dumped in the river, destroyed irrevocably.

Mr. REDWINE. You mean individually?

Mr. APPLING. Yes, sir.

Mr. REDWINE. And you do not remember the date that that was done?

Mr. APPLING. No, sir; for the reasons that I attached no particular importance to it at that time. I had no reason to keep them. The more they would be around, the more they would be open to question.

I would say it was around the 15th of January, but I couldn't say exactly.

Representative CHUDOFF. I thought it was the 15th of something.

Mr. APPLING. If I said that, I didn't really mean that date. I didn't know.

Representative CHUDOFF. What date did you mean?

Mr. APPLING. The 15th of January. If I stated that, I was making a guess and shouldn't have.

Representative CHUDOFF. On what date did you dump the envelopes into the river?

Mr. APPLING. I couldn't say. It was before January 5.

Representative CHUDOFF. Before January 5?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. Within 2 or 3 days after you started writing the report?

Mr. APPLING. No, sir. I can't recall exactly. I believe I received the assays possibly around the 18th or 20th of December, sometime around that.

Representative CHUDOFF. When did you start writing your report?

Mr. APPLING. As soon as I received them.

Representative CHUDOFF. At some time before the 5th of January you destroyed the contents of the check sample envelopes?

Mr. APPLING. Of the alternate samples; yes, sir.

Representative CHUDOFF. Of the alternate samples.

Mr. REDWINE. Mr. Appling, on January 5, Mr. Volin, your superior, wrote the Director of the Bureau of Mines:

The sample splits noted in Mr. Appling's report as stored with the Oregon Department of Geology and Mineral Industry were disposed of upon receipt of the assay results.

Mr. REDWINE. On page 191, which I am reading from now :

Mr. REDWINE. What did you do, keep that alternate sample, as you call it, in the back of your car or where?

Mr. APPLING. No, sir; we deposited that with the State department of geology office in Grants Pass for safekeeping. Mr. McCormick and I took it in and asked them to keep it there until we came after it.

Mr. REDWINE. Then what happened?

Mr. APPLING. Well, we got the assay returns and I wrote the report. Some time afterwards, Mr. McCormick came to Grants Pass and we picked up the samples from the State Department of Geology office and destroyed them.

Mr. REDWINE. At what date?

Mr. APPLING. I could not say, sir.

Mr. REDWINE. I want to go back for a minute. Who received the A. W. Williams assay report?

Mr. APPLING. I do not know.

Mr. REDWINE. Did you receive it?

Mr. APPLING. I have a copy but it was not mailed to me.

Mr. REDWINE. Who told you that it had been received?

Mr. APPLING. Nobody told me. They gave me a copy of the certificate.

Representative CHUDOFF. Whom do you mean by "they"?

Mr. APPLING. I think Mr. McCormick gave it to me.

Mr. REDWINE. You mean this assay report did not come back to the Bureau of Mines? It went to Mr. McCormick?

Representative HOFFMAN. Pardon me. From what page are you reading now?

Mr. REDWINE. 192. [Reading:]

Mr. APPLING. The letter accompanying the assay report is addressed to the Al Sarena Mines, Inc.

Mr. APPLING. It is one of them. I think there were four copies.

Mr. REDWINE. It says here that they went to the First National Bank Building, Mobile, Ala.

Representative CHUDOFF. Do the Al Sarena Mines, Inc., have an office in Mobile?

Mr. APPLING. I could not say, sir.

Mr. REDWINE. You mean that the report did not come directly from the assayer to the Bureau of Mines?

Mr. APPLING. No.

Mr. REDWINE. What was the date that you went and picked up those samples that had been turned over to the Oregon Department of Geology and Mineral Industry?

Mr. APPLING. I cannot say exactly. It was at some time after the date of my report, which was January 2. I honestly couldn't say how long after.

Do you wish to change your testimony as to the date at this time, the date that the destruction of the samples took place and you dumped them into the Rogue River?

Mr. APPLING. Yes, sir. The testimony I gave at that time was to the best of my recollection. I have since checked the files, and I believe that it must have been, it was prior to January 5. The exact date I couldn't say. It may have been the 2d or 3d or possibly before the 1st of January. It was after we got the assay certificate, or after I got it.

Representative CHUDOFF. Pardon me. I want to get this straight.

You said that you got the assay report somewhere around the 2d of January?

Mr. APPLING. No, sir. That was the date of our report. I don't recall the exact date that I got the certificate.

Representative CHUDOFF. How long after you received this certificate did you write your report?

Mr. APPLING. Well, I started writing it right away. That was the date of the final draft.

Representative CHUDOFF. So sometime between January 2 when you wrote your report and January 5, you threw the envelopes into the Rogue River?

Mr. APPLING. No, sir; I wouldn't say January 5. It was prior to that time.

Representative CHUDOFF. Prior to January 5?

Mr. APPLING. Yes.

Representative CHUDOFF. Within 2 or 3 days after you received the assay report?

Mr. APPLING. Well, I really couldn't say. It was several days afterwards, at least. I don't recall exactly when.

Representative CHUDOFF. What did you testify to in Portland, the 15th?

Mr. APPLING. No, sir. I don't think I mentioned any specific date.

Representative CHUDOFF. There is a "15th" in the record somewhere.

Mr. REDWINE. May I read further on page 193:

Mr. REDWINE. How were they destroyed?

Mr. APPLING. They were shaken from the envelopes and dumped in the river, destroyed irrevocably.

Mr. REDWINE. You mean individually?

Mr. APPLING. Yes, sir.

Mr. REDWINE. And you do not remember the date that that was done?

Mr. APPLING. No, sir; for the reasons that I attached no particular importance to it at that time. I had no reason to keep them. The more they would be around, the more they would be open to question.

I would say it was around the 15th of January, but I couldn't say exactly.

Representative CHUDOFF. I thought it was the 15th of something.

Mr. APPLING. If I said that, I didn't really mean that date. I didn't know.

Representative CHUDOFF. What date did you mean?

Mr. APPLING. The 15th of January. If I stated that, I was making a guess and shouldn't have.

Representative CHUDOFF. On what date did you dump the envelopes into the river?

Mr. APPLING. I couldn't say. It was before January 5.

Representative CHUDOFF. Before January 5?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. Within 2 or 3 days after you started writing the report?

Mr. APPLING. No, sir. I can't recall exactly. I believe I received the assays possibly around the 18th or 20th of December, sometime around that.

Representative CHUDOFF. When did you start writing your report?

Mr. APPLING. As soon as I received them.

Representative CHUDOFF. At some time before the 5th of January you destroyed the contents of the check sample envelopes?

Mr. APPLING. Of the alternate samples; yes, sir.

Representative CHUDOFF. Of the alternate samples.

Mr. REDWINE. Mr. Appling, on January 5, Mr. Volin, your superior, wrote the Director of the Bureau of Mines:

The sample splits noted in Mr. Appling's report as stored with the Oregon Department of Geology and Mineral Industry were disposed of upon receipt of the assay results.

Mr. Volin has testified here that you told him over the telephone on the 29th day of December that the splits had been destroyed. Now, just when were they destroyed? Have you any idea, Mr. Appling?

Mr. APPLING. I can't say. I have given as honest an answer as I can give you.

Mr. REDWINE. Mr. Appling, what other testimony that you gave in Portland would you like to change at this time?

Mr. APPLING. I can't think of a bit, sir.

Mr. REDWINE. We will go into that a little bit later.

Mr. Appling, do you have a copy of your report in front of you?

Mr. APPLING. Yes, sir.

Mr. REDWINE. On page 2, under "Development," you discuss the buildings on the property, mill building, timber shed, and so forth. Upon which particular claim were those buildings located. Are they on contested or uncontested claims?

Mr. APPLING. I believe they were on the A. W. Dahlberg, and I do not believe that claim was contested.

Mr. REDWINE. What about the mill equipment which you referred to in your report?

Mr. APPLING. I think that was on the same claim.

Mr. REDWINE. Mr. Appling, will you tell the committee why you have in your report on these contested claims any reference to what is on the uncontested claims? What has that to do with the mineral values? Your job was to sample the property, was it not?

Mr. APPLING. Yes, sir.

Mr. REDWINE. What did that have to do with what the mineral values were?

Mr. APPLING. Just part of the general background information that I thought might be descriptive.

Mr. REDWINE. You were not following your instructions very closely, were you?

Mr. APPLING. I think I followed them to the letter.

Mr. REDWINE. Did you have any instructions to go on any property other than the disputed claims?

Mr. APPLING. I couldn't have gotten on the disputed claims without going on this property.

Mr. REDWINE. Did you have any instructions to inspect the equipment or development that had gone on the undisputed claims?

Mr. APPLING. I had no instruction as to that.

Mr. REDWINE. In other words, you were just doing that on your own?

Mr. APPLING. Yes, sir.

Mr. REDWINE. I believe that you further testified in Portland that the idea of keeping the splits was entirely your own, did you not?

Mr. APPLING. That is right.

Mr. REDWINE. Do you want to change that testimony?

Mr. APPLING. No, sir; I do not. To the best of my recollection, that was it. I won't say entirely my own. I will say that it was an idea that was developed between Mr. McCormick and myself. I am not sure who suggested it.

Mr. REDWINE. Well, was Mr. Volin in error then in testifying that you discussed that?

Mr. APPLING. No, sir; he was not. We discussed that prior to the start of the sampling and, to the best of my recollection, we decided

against it, against the matter of taking splits to send to Albany, and these other samples, these alternate samples that were stored with the State department of geology. Mr. McCormick and I decided on the spur of the moment to save those. I don't believe Mr. Volin knew anything about that at the time. Perhaps his memory was playing tricks on him.

Mr. REDWINE. Well, Mr. Appling, now, you led this committee to believe—and a few minutes later I will refer you to the exact page—to believe in Portland that you had no discussions on this. You referred to it as a “retained sample,” or something like that. You led the committee to believe there that you had had no discussions with anyone in the Bureau of Mines about that.

Representative HOFFMAN. Now, I object to that question as to what he led the committee to believe. If you want to quote the testimony, that is one thing; but to imply or intimate that this witness was trying to put something over on the committee is not fair to the witness. It is not in accordance with legislative procedure.

I certainly have mind enough not to be led into anything to which the witness has not testified.

Mr. REDWINE. Do you want to answer the question?

Mr. APPLING. Would you repeat it?

(The pending question was read by the reporter.)

Mr. APPLING. Well, if that is what the testimony shows, I am sorry for that. I did not mean to lead the committee to believe anything of that sort. I will repeat that the samples that were stored at the State department of geology were saved at the last moment. This was no previous plan to save them.

Mr. Volin and I did discuss sample splits, but we discussed them, sending them to Albany, and we later discarded the plan before the sampling started.

Mr. REDWINE. Mr. Appling, I refer you to page 194 of the hearing in Portland:

Mr. REDWINE. Did Mr. Volin make the decision that the report should come back to the Al Sarena Corp. rather than the Bureau of Mines?

Mr. APPLING. I do not think that that entered into it. I think the conclusion we arrived at was that they were paying for it.

Representative CHUDOFF. Who is Mr. Volin?

Mr. APPLING. He was formerly the chief.

Representative CHUDOFF. He was your superior and called you and told you to destroy the samples?

Mr. APPLING. No, sir. As a matter of fact, it was my idea to retain the samples. There was no mention made of retaining these alternates.

Now, how in the world could the committee come to any conclusion but what you were trying to make them believe that you had not discussed the matter of the retention of the alternates?

Representative HOFFMAN. Read that last question.

(The pending question was read by the reporter.)

Representative HOFFMAN. That is what he said here, is it not? Where is the discrepancy in the witness' testimony in the record?

You call a witness and then you attack his credibility.

Mr. APPLING. I see no discrepancy there.

Mr. REDWINE. You just testified a few minutes ago that you had not discussed it.

Representative HOFFMAN. What does he say on page 194 in the testimony. He says the same thing.

Mr. REDWINE. He has also testified this afternoon that he did discuss it.

Mr. APPLING. The samples that I discussed with Mr. Volin were different samples to be taken for an entirely different purpose. They were to be taken for the purpose of sending to Albany.

Representative CHUDOFF. Mr. Chairman, my recollection of what he said a couple of minutes ago was that he had had a discussion with Mr. Volin about the samples as to whether to send them to Albany.

Representative HOFFMAN. It was about Albany, not about the other place.

Representative CHUDOFF. He certainly could not have testified anything else. Certainly somebody must have known about him taking the samples. Certainly, if Mr. Volin did not want him to take samples, he should have told him not to take them.

Then he testified further that he did not send them to Albany because he had no confidence in the assayers in Albany to do a good job, that they were poor assayers.

On the other hand, Volin testified today that they were competent assayers.

Representative JONAS. May I interject one word?

As I understand the testimony of this witness, he says that before they went out to take the samples, he and Mr. Volin discussed the idea or possibility of taking alternate samples to send to Albany; but then, for some reason, they rejected that and he went on to the sampling grounds under no instructions from Mr. Volin to take samples and with nothing in his mind about taking alternates. Then, after they took the samples, because it was snowing or they were in the winter season, he testified in Portland, as I understand the record—and I have read it carefully—that they decided they would split up the samples just to prevent having to go back out there and take new samples if the ones they sent to Alabama were lost in transit.

Is that correct?

Mr. APPLING. That is absolutely right.

Representative JONAS. And that the idea of taking the alternate samples, which you actually did take and stored with the State geologist, was an on the spur of the moment decision because of the winter conditions?

Mr. APPLING. That is correct.

Representative CHUDOFF. I am not trying to confuse the witness.

Representative JONAS. I think Mr. Redwine is trying to confuse him.

Representative CHUDOFF. It is a two-part question. I think we ought to straighten out whether or not he discussed with Mr. Volin that they should take samples or discussed with Mr. Volin whether they should send the samples to Albany.

Representative JONAS. Let us suspend and start over and let him start over.

Representative CHUDOFF. Do you see what I am driving at?

Mr. APPLING. I think I do. Original discussion between Mr. Volin and I centered around whether or not we should take check samples, samples that would be true splits that would be sent to the laboratory in Albany. We finally decided against that because the instructions did not say the check samples should be taken, and we had no pro-

visions for paying for them. So we discarded that idea completely. That was completely gone from my mind when we did the sampling.

At the time that we prepared the samples, rather than discard the fourth quarter, we decided to retain it in the event the principal samples should be lost in transit.

Representative CHUDOFF. You and Mr. Volin decided that?

Representative HOFFMAN. Mr. McCormick.

Representative CHUDOFF. Were you here yesterday?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. Did you hear Mr. Volin testify?

Mr. APPLING. Part of it.

Representative CHUDOFF. I would like to read from page 417 of the transcript:

Mr. COBURN. Mr. Volin, when you and Mr. Appling were discussing the possibility of sending splits to Albany, to the Bureau of Mines laboratory, were you going to do that as a check against what might come out of the Williams Inspection Co. assays?

Mr. VOLIN. Yes. We had that in mind. We had in mind checking the sampling too. We discussed a number of things, procedures, that might be used in checking the sampling and in checking the assay.

You discussed everything with Mr. Volin, both the question of whether you were to take that sampling and, if you took them, whether you were going to send them to Albany?

Mr. APPLING. No.

Representative CHUDOFF. Did you reach a conclusion as to what you were going to do?

Mr. APPLING. That we were not going to take check samples.

Representative CHUDOFF. You did it anyway.

Mr. APPLING. No.

Representative CHUDOFF. But you took the samples?

Mr. APPLING. None were taken.

Representative CHUDOFF. What were the samples which were thrown into the Rogue River?

Mr. APPLING. They were alternate samples, any name you apply.

Representative CHUDOFF. Will you tell me the difference between a check sample and splits?

Mr. APPLING. A check sample is taken for the specific purpose of assaying. These alternate samples or sample splits were taken for the principal purpose of safeguarding the principal samples. If the main samples should be lost in transit, then we would have duplicate samples to send down there and thereby avoid the expense of re-sampling.

Representative CHUDOFF. They are check samples. What is the difference?

Mr. APPLING. They were not.

Representative JONAS. Would you yield?

Representative CHUDOFF. Yes.

Representative JONAS. Is this not the explanation?

When you took those samples, you pulverized them and mixed them up together and separated them into four quarters?

Mr. APPLING. Yes, sir.

Representative JONAS. You sent three quarters to Alabama, and, if you had not retained the fourth quarter, you would have destroyed it right there; is that true, and you so testified in Portland.

Mr. APPLING. Pardon me. That was almost true. We used two of the quarters for panning to determine the mineralization at the time. Representative JONAS. But you had a quarter left over?

Mr. APPLING. Yes.

Representative JONAS. And you decided, "If these are lost in transit, we will have to come in the snow and take new samples. We will keep this fourth quarter so that we can have this in the event the others are lost in transit."

Mr. APPLING. That is absolutely right.

Representative CHUDOFF. But this fourth quarter could have been used to make an umpire or check assay, or whatever you want to call it?

Mr. APPLING. It could have been done.

Representative CHUDOFF. Is it not true that you did keep the extra in case the Williams Co. would send back an assay that wasn't correct, so that you would send it to your laboratory to make sure?

Mr. APPLING. No, sir.

Representative CHUDOFF. What did you keep it for; in case it might be lost in transit?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. That is the only reason?

Mr. APPLING. That is right.

Representative CHUDOFF. For supersecurity reasons, you took it to a bank and tried to get them to keep it?

Mr. APPLING. Why?

Representative CHUDOFF. Supersecurity reasons?

Mr. APPLING. Yes, sir. We tried to get them in the bank.

Representative CHUDOFF. You got your report. There was no reason to keep that fourth quarter. Why did you try to take them to the bank?

Mr. APPLING. We tried to take them to the bank before we sent the samples.

Representative CHUDOFF. I think you testified that you tried to take them to the bank and, because the bank would not take them, you walked two blocks to the river and threw them in. You said that?

Mr. APPLING. I didn't say that.

Representative CHUDOFF. I will read the testimony.

Representative HOFFMAN. If you would get yourself straightened out, it would not be difficult.

Representative CHUDOFF. The record speaks for itself.

Representative HOFFMAN. I think it does. When you two fellows cannot get the witness to agree, you say that the witness is lying. You have followed that course throughout.

Representative CHUDOFF. I am trying to find out what happened.

Representative HOFFMAN. I would hate to be a Government witness appearing before this committee.

Representative JONAS. I believe you will find that he tried to get them in the bank before taking them to the State geologist.

Representative HOFFMAN. Before that, they had them in the post office, and before that they had some in a car.

Mr. COBURN. Mr. Appling, would it be possible—

Representative HOFFMAN. You have had four of you picking on him.

Mr. COBURN. Would it have been possible for you to put these samples in the locked compartment of your car?

Mr. APPLING. I could have done it. I don't think they would have been as safe as they were in the State department of geology office.

Mr. COBURN. This was your personal car?

Mr. APPLING. No, sir; a Government car.

Mr. COBURN. A Government car?

Mr. APPLING. Yes, sir.

Mr. COBURN. You draw a distinction, then, between a Government car and a Government post office?

Mr. APPLING. Yes, in a sense.

Representative CHUDOFF. I want to read from page 195 of the testimony:

Mr. REDWINE. Why put them in there if it was not a safe place?

Mr. APPLING. That was the only place we could think of to put them. We tried to put them in a bank vault and the bank would not accept them.

I said they could not get them in the bank so they threw them in the river.

Mr. APPLING. I said that?

Representative CHUDOFF. That is the answer, is it not?

Mr. APPLING. No, sir; it isn't. We tried to get them in the bank vault. They wouldn't take them. We took them to the State Department of Geology.

Representative CHUDOFF. How long did you leave them with the State Department of Geology?

Mr. APPLING. I imagine they were there a month or longer.

Representative CHUDOFF. You just testified that you got the assay report back sometime in the latter part of December and you wrote your report sometime prior to January 5, which is not exactly what Mr. Volin said. He said somewhere around December 29 you destroyed them.

Mr. APPLING. That is right.

Representative CHUDOFF. Is it not usual to keep these samples around for 6 months?

Mr. APPLING. No, sir. These were not umpires or check samples. I don't know any place that that would be required.

Representative CHUDOFF. You also said you did not know why you threw them in the river, you could have dumped them on a trash pile just as well.

Mr. APPLING. Well, the main thing is I wanted to put them somewhere and that was as convenient as any.

Representative CHUDOFF. Did you have a discussion with Mr. McCormick before you destroyed these samples?

Mr. APPLING. We did it together.

Representative CHUDOFF. And you went to the State Department of Geology, got the 56 ounces of samples, and then walked down to the Rogue River and threw them in?

Mr. APPLING. We drove down.

Representative CHUDOFF. Was it Mr. McCormick's idea to throw them in the river?

Mr. APPLING. I don't really know whose idea it was.

Representative CHUDOFF. Did you have a discussion as to what you should do with them?

Mr. APPLING. Yes, we did. We were driving back down toward the field office and decided it would be just as easy to take them on down to the river and throw them in. We had no particular reason for doing it.

Representative CHUDOFF. Actually, you had no problem with the samples in the State Geology Department? They were safe there, were they not?

Mr. APPLING. Well, when we put them in, I considered they would be safe there for a short time. It is a public office. Various people are in and out of there. I suppose janitors. They put them up on a bookshelf. As far as the integrity of the personnel in the office, I don't mean to question that; but, on looking over it later, I decided that it was possible that somebody could have tampered with them.

Representative CHUDOFF. Did you have a conference with Mr. McCormick as to why and where you should destroy these samples?

Mr. APPLING. No, we put them in the car and, as I stated, drove back down to our field office and decided on the way that it would be just as convenient to throw them in the river.

Representative CHUDOFF. Who decided? Did you decide or did Mr. McCormick decide?

Mr. APPLING. I don't recall. It was mutually agreeable.

Representative CHUDOFF. Why did you throw them in the river? Were you afraid that somebody might take them and substitute other samples for them?

Mr. APPLING. If a sample is to be disposed of, it should be disposed of in such a fashion to lose its identity.

Representative CHUDOFF. You have disposed of many samples in the capacity in which you are employed by the Bureau, have you?

Mr. APPLING. Not many.

Representative CHUDOFF. How many have you destroyed?

Mr. APPLING. I couldn't say.

Representative CHUDOFF. Five or ten or twenty?

Give us a figure.

Mr. APPLING. I couldn't.

Representative CHUDOFF. Did you ever throw any in the river before?

Mr. APPLING. It has never been convenient to do so.

Representative CHUDOFF. How far is the river from the State department of geology?

Representative HOFFMAN. Mr. Chairman, I want to again put on the record the fact that this was all gone over in Portland. It is completely in the record. This same witness was examined at length by Mr. Chudoff and by members of the staff. The only purpose it can serve here would be to give a little publicity to their claim that there was something rotten in connection with the State department. It is repetition and does not add anything to the record.

Representative CHUDOFF. I will repeat the question.

How far was the river from the State department of geology?

Representative HOFFMAN. And how deep was it?

Representative CHUDOFF. I guess that has something to do with it, too.

Mr. APPLING. I believe it was 6 or 7 blocks from the State department of geology office.

Representative CHUDOFF. And you believe that it was more convenient to drive 6 or 7 blocks?

Mr. APPLING. We had to drive down toward the field office and we just continued 2 blocks and threw them in.

Representative CHUDOFF. Could you not have tossed them into the wastebasket at the Department of Geology? Would that not have gotten rid of them for you?

Mr. APPLING. I suppose we could have, but I could see no reason to clutter up their wastebasket with our samples.

Representative CHUDOFF. You knew this was a controversial case?

Mr. APPLING. I knew very little about the facts.

Representative CHUDOFF. Did Mr. Volin discuss that with you?

Mr. APPLING. He told me they were contested claims.

Representative CHUDOFF. As a matter of fact, in your letter of instructions, he told you that there was a question of who was going to make the assay, that he wanted some people closer by to make the assay and that the company insisted on the Alabama assay company to do it, did he not?

Mr. APPLING. He suggested several assayers in nearer locations—I think Abbott Hanks, Smith-Emery, Union Assay—and the owners expressed a preference for the Williams Co.

Representative CHUDOFF. In spite of the fact that you knew there might be controversy here, you found it convenient to drive 6 or 7 blocks to drop the packages in the river?

Mr. APPLING. No, sir. If I knew this controversy would come up, I would not have.

Representative CHUDOFF. I guess you have not dropped any since, have you?

Mr. APPLING. No, sir.

Mr. LANIGAN. You said that in your earlier discussions with Mr. Volin about taking splits, it was in connection with sending the samples to Albany, and that that was decided against and later the splits were taken on your idea or on your and Mr. McCormick's idea.

Did you inform Mr. Volin that you had taken those splits and put them in the State geologist's office?

Mr. APPLING. To the best of my knowledge, the first he knew about it would have been from reading my report, unless we had a telephone conversation several days earlier in which I might have mentioned it. I couldn't say. I know it is my recollection that he did not know of it until after they had been disposed of.

Mr. LANIGAN. Well, I believe Mr. Volin testified that over the telephone he asked about the splits and you told him that they were destroyed and he was very much surprised by the fact that they had been destroyed.

Mr. APPLING. I read that testimony. I don't recall it.

Mr. LANIGAN. You do not recall exactly what you had told him previously?

Mr. APPLING. No, sir; I don't.

Mr. LANIGAN. All right.

Mr. COBURN. Mr. Appling, whose idea was it in the first place to split up these samples into four quarters?

Mr. APPLING. I don't really recall. I think that probably first came up when Mr. Volin and I discussed sending check samples to Albany.

Mr. COBURN. Could the suggestion have come from Mr. Volin?

Mr. APPLING. It may have been originally. I think part of the reason that we split them was so they would be rejects for panning and so that it would be easier to handle and to ship.

Mr. COBURN. Would you tell the committee what you mean by "rejects for panning"?

Mr. APPLING. Well, when the samples were ground to a powder, they were split, and two of the quarters or the rejects were then panned in a gold pan to show any heavy minerals that may have been present.

Mr. COBURN. I am still not clear. Why do you refer to them as "rejects"?

Mr. APPLING. Well, ordinarily they are discarded unless there is some particular use for them.

Mr. COBURN. In other words, you had four quarters, two of which became rejects?

Mr. APPLING. Yes.

Mr. COBURN. Automatically?

Mr. APPLING. Well, the idea in splitting the samples in the first place is to reduce the bulk so they are easier to handle.

Mr. COBURN. I see.

Mr. APPLING. And you take out the quarter that you want.

Mr. COBURN. How do you select that quarter that you want?

Mr. APPLING. The splitting is done with a mechanical splitter and you take whichever.

Mr. COBURN. It is just a guess?

Mr. APPLING. They are all supposed to be the same.

Mr. COBURN. It is just a guess as to which quarter you want?

Mr. APPLING. Yes, sir; they are all the same.

Mr. COBURN. What is the purpose of panning two of the quarters? Why did you do that?

Mr. APPLING. To show any heavy minerals present.

Mr. COBURN. In the process of panning, those samples then are destroyed; is that correct? Leaving two quarters?

Mr. APPLING. Yes, sir.

Mr. COBURN. One of which you sent in for assay and one of which you kept on your own responsibility?

Mr. APPLING. Yes.

Mr. COBURN. Did Mr. McCormick agree to the retention of that quarter?

Mr. APPLING. Yes, sir. I don't really know who suggested it in the first place, either Mr. McCormick or myself.

Mr. COBURN. I am not asking that question.

Mr. APPLING. He agreed.

Mr. COBURN. He agreed that you should keep one?

Mr. APPLING. As the alternate; yes, sir.

Mr. COBURN. For what purpose?

Mr. APPLING. As a safeguard against loss of the primary samples in transit.

Mr. COBURN. Was there any discussion between you and Mr. McCormick as to the advisability of checking the retained sample against the results obtained from the Williams Inspection Co. on the samples sent in?

Mr. APPLING. No, not exactly, sir.

Mr. COBURN. What do you mean by "not exactly"?

Mr. APPLING. I think I discussed with Mr. McCormick some of the suggestions that Volin had made regarding Albany assays.

Mr. COBURN. What was Mr. McCormick's reaction to Mr. Volin's suggestion that these samples be sent to Albany?

Mr. APPLING. That was at a time after Mr. Volin and I had decided against it, I believe. I don't recall any particular reaction to it.

Mr. COBURN. You say that you and Mr. Volin had already decided against sending them up there when you discussed it with Mr. McCormick?

Mr. APPLING. I just mentioned it. I didn't discuss it.

Mr. COBURN. You mentioned it?

Mr. APPLING. Yes.

Mr. COBURN. What did he say about it?

Mr. APPLING. I don't recall.

Mr. COBURN. Well, did he state any preference?

Mr. APPLING. Well, it was all settled. There was no preference to be stated.

Mr. COBURN. I see. You just mentioned it to him casually, thinking it might be of some interest?

Mr. APPLING. I don't recall why I did mention it.

Mr. COBURN. I cannot understand it either, but I accept that.

Now, how strongly did you support Mr. Volin's suggestions that some western assay house be utilized instead of A. W. Williams Co., or did you support it?

Mr. APPLING. Well, I certainly suggested those places.

Mr. COBURN. You did? To whom?

Mr. APPLING. At a meeting with Mr. McCormick and the owners.

Mr. COBURN. The McDonalds?

Mr. APPLING. Yes.

Mr. COBURN. And you were, in effect, outvoted; is that correct?

Mr. APPLING. I don't recall the exact details on that. I don't really recall that they vetoed that. I know that they expressed a preference for the Williams Co. and gave as a reason that they had established credit there, or they had an open account there, and that it would be more convenient to them.

That, as I recall it now, seemed to be the reason.

Now, I went then and phoned Mr. Volin and told him about the Williams Co.

Mr. COBURN. Well, did you state to the McDonalds and Mr. McCormick why you and Mr. Volin felt that a western assay house should be utilized?

Mr. APPLING. Well, I normally would have suggested Abbot Hanks myself.

Mr. COBURN. I am sorry. I think you misunderstood the question. During the course of your discussions with the McDonalds and Mr. McCormick, when this matter of an assay house came up as you have testified, and they suggested A. W. Williams Inspection Co., then, as I understand you, you suggested these three western assay houses. They then insisted—is that the word—on A. W. Williams Inspection Co?

Mr. APPLING. I wouldn't put it that strongly. I don't believe they did insist.

Mr. COBURN. Let us put it that they expressed a preference.

Mr. APPLING. Well, that is right.

Mr. COBURN. My question is this:

Then what argument or what reasons did you give in support of Mr. Volin's and your suggestion that a western assay house be used, or did you just accept their recommendation?

Mr. APPLING. I don't recall that I objected particularly strongly. I know I suggested, and it would have been more convenient in many ways for me; but, since they were paying the bill and since I knew nothing about the Williams Co., either for or against them, I could see no reason that I should not pass on their preference.

Mr. COBURN. Did you also feel that, under the instructions that you were operating under, in the final analysis the Al Sarena Co. could select its own assay house in the matter?

Mr. APPLING. Well, I realized that we would have, as you might say, the power of veto.

Mr. COBURN. You would have or they would have?

Mr. APPLING. Well, both the company and the Government would have; that it had to be a company that was mutually agreeable.

Mr. COBURN. And you could veto each other?

Mr. APPLING. Well, presumably.

Mr. COBURN. Where would that end up?

Mr. APPLING. A stalemate.

Mr. COBURN. Then what would happen?

Mr. APPLING. I can't say about that.

Mr. COBURN. But you were aware of this all the time, were you not?

Mr. APPLING. It could lead to an impasse. It was contained in the instructions.

Mr. COBURN. And you felt that, because of the snow involved and perhaps other reasons, this had to be done fairly promptly?

Mr. APPLING. It did have to be done promptly.

Mr. COBURN. So you acceded to the preference of the A. W. Williams Co.?

Mr. APPLING. Well, I passed that on to Mr. Volin. I don't think I acceded because of the imminent approach of the winter. I think I just passed the answer on in view of the fact that they would, according to the instructions, have a right to express a preference.

Mr. COBURN. Do you still want to tell the committee, Mr. Appling, that there was no element of haste or speed in the matter?

Representative HOFFMAN. No element of what?

Mr. COBURN. Haste or speed.

Mr. APPLING. There was an element of speed, but I don't believe that that influenced the decision as to the assayer.

Mr. COBURN. No; I understand that.

Mr. APPLING. As far as the samples themselves were concerned, we didn't permit haste to interfere with the taking of them.

Mr. COBURN. Do you recall what you told Mr. Volin after this conference with the McDonalds and Mr. McCormick as to the choice of an assay house?

Mr. APPLING. No; I don't recall exactly. I know that I told him that they wanted the samples assayed at the Williams Inspection Co.

Mr. COBURN. I am sorry, I cannot hear you.

Mr. APPLING. I told him that they wanted the samples assayed at Williams, and asked him if he knew anything about the company. I had never heard of them before.

Mr. COBURN. Now, I want to get this straight for the record. When you and Mr. Volin first conversed on the telephone regarding the methods of procedure to be followed in this case, is it true that at that time Mr. Volin did not suggest to you that these samples be taken, quartered, and submitted to Albany for analysis?

Mr. APPLING. That point was discussed, but it was decided against. We decided not to do it.

Mr. COBURN. This took place in your first conversation with Mr. Volin on the subject?

Mr. APPLING. I presume so.

Mr. COBURN. You are not sure?

Mr. APPLING. No, I don't recall.

Mr. COBURN. How many conversations did you have with Mr. Volin on this matter?

Mr. APPLING. I can say that I think 2 or 3.

Mr. COBURN. Several conversations?

Mr. APPLING. Yes.

Mr. COBURN. And during the last conversation with Mr. Volin, do you recall, was that when you advised him that the samples had been destroyed?

Mr. APPLING. I don't recall saying it over the phone. I don't know whether I told him by phone. It must have been by phone. I don't recall.

Mr. COBURN. You also included that in your report or the letter of transmittal with your report?

Mr. APPLING. That the samples had been destroyed?

Mr. COBURN. Yes.

Mr. APPLING. I don't believe I did.

Mr. COBURN. You did not mention it?

Mr. APPLING. I don't believe I did.

Mr. COBURN. So he must have learned it from you by phone?

Mr. APPLING. I believe so.

Mr. COBURN. You got a copy of the certificate from the A. W. Williams Co.?

Mr. APPLING. Yes.

Mr. COBURN. What did you do with that copy?

Mr. APPLING. That was sent to Spokane with my report.

Mr. COBURN. Is it not true that Mr. Volin testified that there was no certificate?

Mr. APPLING. I think that is right. I can't explain that. I know I sent one in.

Mr. COBURN. That was a copy?

Mr. APPLING. Yes, sir.

Mr. COBURN. Did you ever see the original?

Mr. APPLING. I don't recall that I did. This was a signed copy, however.

Mr. COBURN. This was a signed and certified copy?

Mr. APPLING. Yes.

Mr. COBURN. I see. You sent that to Spokane?

Mr. APPLING. With my report.

Mr. COBURN. Yet, as I understood Mr. Volin's testimony, the certificate did not accompany the report that he saw.

Mr. APPLING. He testified to that. I don't know.

Mr. COBURN. You have no explanation for that?

Mr. APPLING. No, sir; I haven't.

Mr. REDWINE. Mr. Appling, you stated a few minutes ago that you took this retained alternate sample, or whatever you want to call those splits, out of the Department of Geology of Oregon because they had janitors around there that might get to it.

In your testimony in Portland, you testified that you deposited the first 2 days' samples in the post office?

Mr. APPLING. I think that is right.

Mr. REDWINE. Do they have janitors in the post office in Grants Pass or Trail?

Mr. APPLING. I don't know. I imagine the postmaster is the janitor there.

Mr. REDWINE. You testified also a few minutes ago that you waited until you got the assay report to start writing your report of the sampling? Why was that? Why did you have to wait until then when you knew that they needed this report in a hurry?

Mr. APPLING. I don't know. I don't remember too much about that. It may have been other work that was pressing me. At any rate, I couldn't turn the report in until the assay certificate got there.

Mr. REDWINE. When the package was finally prepared for transmission to Mobile, who prepared it?

Mr. APPLING. Mr. McCormack and myself.

Mr. REDWINE. Who took it to the express office?

Mr. APPLING. Mr. McCormack and I.

Mr. REDWINE. The two of you together?

Mr. APPLING. Yes, sir.

Mr. REDWINE. You testified a few minutes ago that, in this discussion that took place as to what assayer you would use, you met with Mr. McCormack and the McDonalds, I believe?

Mr. APPLING. That is right.

Mr. REDWINE. Was that within the scope of your instructions to work out things with the McDonalds or their representative? Which?

Mr. APPLING. I believe my instructions were to contact Mr. McCormick, and I did so; and then Mr. McCormick and I wanted to visit the property to line up the work and plan it, and the McDonalds were there at the time.

Mr. REDWINE. So the discussion between you and Mr. McCormick as to who the assayer should be was participated in by the McDonalds?

Mr. APPLING. Yes.

Mr. REDWINE. Did you hear the testimony yesterday of Mr. McDaniel as to the weight of the samples received by the Williams Co.?

Mr. APPLING. I couldn't hear too clearly. I heard parts of it.

Mr. REDWINE. I believe the record will bear this out, and I do not think anyone will take exception to the statement, that his testimony was that several, he did not remember how many, of the samples were quite small in volume or weight.

How would you explain that?

Mr. APPLING. Well, they were splits.

Representative JONAS. I beg your pardon, sir. I will take exception to that. He did not say "quite small in weight." He said it ranged from a ton and three-quarters to 2 tons.

Mr. REDWINE. Assay tons, Mr. Chairman. I would like to point out that they are not tons.

Representative JONAS. I am using the words he used. He did not say "quite light in weight." I do not remember his saying that.

Mr. REDWINE. Mr. Chairman, I would like to point out that Mr. McDaniel testified that by agreement that he had had with the McDonalds on previous assays, not this particular group of assays, that they had agreed they could only get an accurate report if they had at least 2 assay tons of samples. He further testified that several of these, he did not recall how many, were less than 2 assay tons.

Representative JONAS. Then I asked him when I examined him if he would say how much less than 2, and he said none of them went under  $1\frac{3}{4}$ .

Mr. REDWINE. How could you explain that there was quite a variation in the volume or weight of the samples?

Mr. APPLING. Well, just that some of the samples were larger than others and, when they were quartered down, we therefore had a larger portion in some.

Mr. REDWINE. How come some were smaller than others? In each sample that you took, before it went in the grinder and powderer and splitter, how much volume or weight was involved there?

Mr. APPLING. The weight of the original sample as taken from the outcrop?

Mr. REDWINE. Yes.

Mr. APPLING. That varied considerably. I don't recall. I imagine it went anywhere from several pounds to possibly 8 or 9 pounds, or 10.

Mr. REDWINE. If none of them were less than several pounds, the original samples—

Mr. APPLING. Yes.

Mr. REDWINE. How did it get down then when you got ready to quarter them that you had less than 108 ounces, we will say?

Mr. APPLING. Well, when we use the term "quartering," that is sort of a general term. It is a little more difficult to say they were one-eighth and they were one-sixteenth. In other words, they were split equally down to a size. If the original sample was a hundred pounds, it might be split 15 or 20 times.

Mr. REDWINE. Mr. Appling, let us go back to your report itself on page 2, "Development," those first two paragraphs there under "Development."

I would like for you to tell the committee just what those two paragraphs had to do with your sampling of the 15 disputed claims. Just what did that have to do with it?

Mr. APPLING. This was just background information, things that I observed, and I put them in the report for whatever they were worth. They had no direct connection perhaps to the 15 claims except that I think one of the trenches, this 100-foot trench was on one of the contested claims, I believe.

As a matter of fact, the bulldozers I mentioned there and some of the roads were on contested claims.

Mr. REDWINE. Why, Mr. Appling, did you not point out "on adjacent property such-and-such is the case?" Why did you leave the impression that this was on the property that you were sampling?

Let me ask a question ahead of that and then read that one back.

Do you not think that these two paragraphs there would make any reasonable man think that you were talking about the 15 disputed claims?

Mr. APPLING. That was not the intent.

Mr. REDWINE. Do you not think that it would?

Mr. APPLING. I think, if the report were thoroughly read and the maps studied, no; I do not believe that it would lead to that belief. The mill buildings and the other buildings are plotted on this map that accompanies the report.

Mr. REDWINE. Will you read my question ahead of the last one, please?

(The record was read by the reporter as follows:)

Why, Mr. Appling, did you not point out "on adjacent property such-and-such is the case?" Why did you leave the impression that this was on the property that you were sampling?

Mr. APPLING. In retrospect. It probably would have been better had I done that. I don't believe that the intent was to deceive, and I don't think the effect was deceiving, as I say, if the report were completely and thoroughly read.

Mr. REDWINE. But it does have the effect. Take the first paragraph of your introduction there. You very specifically talk about the fact that you are, at the request of Mr. Davis, going on there on 15 located mining claims.

Do you not think the effect is, then, turning over to the "Development," that you are talking about 15 mining claims, that no reasonable person could think you were talking about anything except those 15 claims?

Mr. APPLING. Except that the map shows some 23, I believe, and I could have gone into more detail on that, I will admit.

Mr. REDWINE. Mr. Chairman, that is all I have at this time.

Senator SCOTT. Does anyone else have a question?

Representative JONAS. I have.

Representative HOFFMAN. Well, you have been grilled here for half or three-quarters of an hour by these three attorneys and, as I understood you when you started out in answer to Mr. Redwine, you said something about changing your testimony with reference to the time those samples were destroyed.

Did I get that right, and, if you were changing your testimony, what change would you make in it?

Your attention was called, I think, to page 193 and from there on. Have you read it?

Mr. APPLING. Yes, sir; I have read it.

Representative HOFFMAN. What change are you making there? I tried to follow through.

Mr. APPLING. I am not exactly sure myself. Evidently there was some statement I made in there that wasn't right.

Representative HOFFMAN. Make up your mind, if you will, now, for me as to when you think you destroyed those samples.

As I get it, you did not know and all you were doing was giving your best recollection.

Read your testimony given out there and see if there is anything you want to change. At one time you say something about a report coming in on the 2d, and then you say over on a subsequent page that you think you destroyed the samples around or about the 15th, but you do not know.

I am not finding any fault with your testimony. I cannot see anything wrong anywhere with it.

Mr. APPLING. I think I stated here that it was at some time after January 2 and that I thought possibly it might have been around the 15th of January.

Representative HOFFMAN. Yes.

Mr. APPLING. Since this testimony was given, I have checked my files and I find that on the 5th of January reference was made to the samples that had been disposed of.

Representative HOFFMAN. On the 5th of January?

Mr. APPLING. On the 5th of January.

Representative HOFFMAN. Was that in a notebook which you had?

Mr. APPLING. No, sir. It was a reference in a letter.

Representative HOFFMAN. As I recall your testimony, without reading the record again, when you were testifying at Portland you did say something about some other records that you would have to check to get the exact date. Whether it was this date or some other, I do not remember.

Mr. APPLING. Well, I couldn't find the exact date. The only reference I could find was one which on the 5th of January said that they had been disposed of.

Representative HOFFMAN. Do you know whether it makes any difference whether you destroyed them on the 2d or on the 5th?

Mr. APPLING. No, sir; I don't see.

Representative HOFFMAN. I do not either. I would hate to be judged by the standards that these gentlemen are trying to set up for you.

I think that is all I have.

Representative JONAS. Mr. Chairman, I have just a couple of questions.

Senator SCOTT. All right.

Representative JONAS. Mr. Appling, how long have you been with the Bureau of Mines?

Mr. APPLING. Steadily since 1950, and temporarily at various times before then.

Representative JONAS. How long have you been in the mining business professionally? When did you finish your education?

Mr. APPLING. I graduated from the University of Oregon with a master's degree in 1949, I believe.

Representative JONAS. And you have been with the Bureau continuously since 1950?

Mr. APPLING. That is right.

Representative JONAS. And you are what we refer to as a career man in the Bureau?

Mr. APPLING. That is right.

Representative JONAS. Under civil service?

Mr. APPLING. That is right, sir.

Representative JONAS. Now, tell me this:

Did anybody from the Department of the Interior, with the exception of Mr. Volin, give you any suggestions or advice or instructions or requests as to how you would assemble these samples or what you would do with them, or what you would do with the alternates?

Mr. APPLING. No, sir; they did not.

Representative JONAS. Did Secretary McKay or anybody in the Department in Washington call you up on the telephone or write you

a letter, or did anyone purport to give you any instructions from anybody concerning any of those matters?

Mr. APPLING. No instructions at all.

Representative JONAS. And you say to the committee that all of the decisions you made were your own decisions, based upon what you thought was the proper way to take the samples, and the proper way to safeguard them and the proper thing to do with the alternate samples after you got the assay certificate back?

Mr. APPLING. That is right, sir.

Representative JONAS. And that the only instructions you had from anybody were those you received from Mr. Volin, and those are the ones about which you testified?

Mr. APPLING. Yes, sir.

Representative JONAS. Did anybody tell you what to put in your report or how to prepare it, or did anyone suggest that you discuss the mining operations there to which Mr. Redwine has adverted in his questions?

Mr. APPLING. No, sir.

Representative JONAS. Did you prepare that report entirely yourself and as a result of what you knew about it, and with the idea of presenting the report that would be understandable and would present the facts as you understood them?

Mr. APPLING. I did my best to do that.

Representative JONAS. And nobody censored the report or told you what to include in it?

Mr. APPLING. No, sir.

Representative JONAS. I believe that is all.

Representative CHUDOFF. Mr. Chairman?

Senator SCOTT. Congressman Chudoff.

Representative CHUDOFF. Mr. Appling, are you still stationed in Oregon?

Mr. APPLING. No, sir; I am in Spokane.

Representative CHUDOFF. When were you transferred from Grants Pass to Spokane?

Mr. APPLING. Early in October, I believe it was.

Representative CHUDOFF. Of last year?

Mr. APPLING. 1955.

Representative CHUDOFF. Up to the time that you were stationed in Oregon was the Al Sarena Mining Co. mining those minerals in those mines?

Mr. APPLING. As far as I know they were not.

Representative CHUDOFF. How long were you in Oregon?

Mr. APPLING. I went there in the fall of 1951.

Representative CHUDOFF. From 1951 to 1955 to your knowledge they never mined this land?

Mr. APPLING. Not as far as I know.

Representative CHUDOFF. Did you have a chance to look at the assay report? I believe you said you did.

Mr. APPLING. Some that we took; yes.

Representative CHUDOFF. And it met the prudent-man test?

Mr. APPLING. I am not aware of it.

Representative CHUDOFF. To determine whether or not a patent shall be granted, is it not determined on the test of whether a prudent

man can mine the land commercially at a profit? Is that not right?

Mr. APPLING. I have no idea.

Representative CHUDOFF. What do the assay reports show? How much gold and silver in a ton of ore?

Mr. APPLING. As near as I can remember it—

Representative CHUDOFF. You may read it if you have it. There is no use guessing.

Mr. APPLING. They seem to vary from a low of 79 cents to a high of \$4.85.

Representative CHUDOFF. \$4.85 is pretty good mineral content; is it not?

Mr. APPLING. Under certain circumstances it can be so considered.

Representative CHUDOFF. For \$4.85 the mine could be mined profitably; could it not?

Mr. APPLING. Sir, that is an opinion. I am not qualified to answer for the reason that I did not have the time to examine those claims and to go into all the details of it. Had I the time to examine that property I could give you an answer. I prefer not to answer it.

Representative CHUDOFF. I heard that for \$1.90 a ton you can probably mine a mine of precious metals.

Mr. APPLING. It has been done.

Representative CHUDOFF. Did you say \$4.85?

Mr. APPLING. Yes, I believe.

Representative CHUDOFF. So at \$4.85, if the Al Sarena Co. were interested in mining that mine they would be mining it every day; would they not?

Mr. APPLING. I don't know. I have no opinion on that.

Representative CHUDOFF. Could you think of any reason why they would not be mining that land at \$4.85 a ton?

Mr. APPLING. I am not aware of the details of it.

Representative CHUDOFF. Could it possibly be they are not interested in mining; they are only interested in getting the timber?

Mr. APPLING. They seemed to talk like subsequent prospectors.

Representative CHUDOFF. Do you know the last time the Sarena mines were mined?

Mr. APPLING. No, sir; I don't.

Representative CHUDOFF. It was some time back; was it not?

Mr. APPLING. I have no idea at all.

Representative CHUDOFF. Mr. Lanigan?

Mr. LANIGAN. I just want to get 1 or 2 things straight. Mr. Volin testified the instructions he had which he delegated to you were to the effect that a Mr. McCormick was to take the samples in the presence of a representative of the Bureau of Mines. When you had these instructions from Mr. Volin you contacted Mr. McCormick. Is that what happened?

Mr. APPLING. Yes, sir.

Mr. LANIGAN. He told you where to contact him?

Mr. APPLING. Yes.

Mr. LANIGAN. And you arranged to go out to the mine?

Mr. APPLING. Yes, sir.

Mr. LANIGAN. Where did you meet him the day you went out to the mine to take the sample?

Mr. APPLING. I don't recall whether I stopped by his home or not. He lives on the Rogue River and the highway goes right by there.

Mr. LANIGAN. Near what town?

Mr. APPLING. His address is Eagle Point. It is a few miles from Eagle Point.

Mr. LANIGAN. Did you go out to the mine in your car or his car?

Mr. APPLING. I think in my car.

Mr. LANIGAN. In your car?

Mr. APPLING. Yes, sir.

Mr. LANIGAN. And when you got out there whose equipment was used in taking these samples?

Mr. APPLING. Our own equipment; hammer and sacks.

Mr. LANIGAN. The ore sacks brought along were your own?

Mr. APPLING. Yes, sir.

Mr. LANIGAN. Who took the samples in the mine?

Mr. APPLING. Mr. McCormick took the first sample while I assisted him by catching the chips in sacks. Thereafter I took the rest of them.

Mr. LANIGAN. How many samples were taken?

Mr. APPLING. I think there were 28 in all.

Mr. LANIGAN. Then you quartered the samples right at the mine site?

Mr. APPLING. Yes.

Mr. LANIGAN. And you panned 2 of the 4 quarters right there?

Mr. APPLING. Yes.

Mr. LANIGAN. Where did the envelopes come from that they were put into?

Mr. APPLING. I brought them along.

Mr. LANIGAN. Did they have Bureau of Mines identification on them?

Mr. APPLING. No; I think they were just plain envelopes.

Mr. LANIGAN. You put the samples in the envelopes at the mine site; is that what happened?

Mr. APPLING. Yes; after we had prepared them. Yes, I believe that's the way it was.

Mr. LANIGAN. Did you have at that time four envelopes for each site from which you had taken samples?

Mr. APPLING. Four? No, sir. I don't recall how many, but we had the primary sample in sacks and we had the alternate samples in sacks for each sample.

Mr. LANIGAN. You had them in sacks?

Mr. APPLING. In the paper envelopes or sacks.

Mr. LANIGAN. Wait a minute. Did you put them in the paper envelopes, or did you put them in the sacks?

Representative HOFFMAN. Will you let me ask a question there?

Mr. LANIGAN. Yes, sir.

Representative HOFFMAN. What color were those envelopes?

Mr. APPLING. I think they were manila.

Representative HOFFMAN. Are you sure?

Mr. APPLING. Well, reasonably sure.

Representative HOFFMAN. I wish you would verify that if you can, because I would like to know.

That is all; thank you.

Representative CHUDOFF. I am glad to learn from you, Mr. Appling, that you are sure of something. You have not been sure of anything up to this point. At least, you are sure about the color of the envelopes.

Mr. APPLING. That was some time ago, sir. It was a short job. I don't recall too many things about it.

Mr. LANIGAN. Did you put the pulp in the envelopes at the mine?

Mr. APPLING. I don't recall exactly how we handled them as far as envelopes or sacks. We split them. We put them into a container, a paper sack, or an envelope, whichever you may call it.

Representative HOFFMAN. Just a minute. Do you want to correct your testimony? Heretofore you have had them in envelopes. Now you have mentioned a paper sack. We would like to have you be accurate, because you are under oath.

Mr. APPLING. Well, let us say that I can't remember whether they were envelopes or sacks.

Representative HOFFMAN. You put them in something anyway?

Mr. APPLING. Yes, sir; I did.

Mr. LANIGAN. Then you took them into the post office, and were the sacks or envelopes sealed at the time they were put in the post office?

Mr. APPLING. I believe what we used were grocery sacks, small manila grocery sacks. I am not sure. I think that's what we used. And they were placed in a cardboard box, and as I recall it, we sealed the cardboard box with tape, and I believe that Mr. McCormick and I wrote our names across the tape so that we could tell if they had been disturbed.

Mr. LANIGAN. What other processing did they go through between the time you put them in that sealed cardboard box and the time they were finally mailed to the Williams Co.?

Mr. APPLING. Well, I believe we transferred them into pulp sacks with wire clips at a later time. I am not too sure of the details. I don't recall that.

Mr. LANIGAN. Were those a particular kind of sack or envelope; pulp sack?

Mr. APPLING. No; except they have a wire fastener and you fasten them down.

Mr. LANIGAN. And were those Bureau of Mines pulp sacks?

Mr. APPLING. Yes; they were not marked Bureau of Mines, but they were Bureau of Mines envelopes.

Mr. LANIGAN. That is all I have.

Mr. REDWINE. Mr. Appling, did you receive a copy of Mr. McCormick's report?

Mr. APPLING. I have since received a copy from Mr. McCormick; yes.

Mr. REDWINE. You received it from Mr. McCormick?

Mr. APPLING. Yes.

Mr. REDWINE. Do you know to whom he submitted his report?

Mr. APPLING. No, sir; I do not. I paid no attention at all to that.

Senator NEUBERGER. I would like to ask a few questions.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. Mr. Appling, in your service with the Bureau of Mines have you ever encountered any situation parallel to this or similar to it in any way?

Mr. APPLING. No, sir; I haven't.

Senator NEUBERGER. Have you ever received any assignment at all similar to this in any way?

Mr. APPLING. No, sir; I have not.

Senator NEUBERGER. The question was asked if you had ever received any orders from Secretary McKay or any other high official of the Department of the Interior and you answered in the negative.

Mr. APPLING. No, sir; I have not.

Senator NEUBERGER. I take it, as a matter of fact, that in no assignment that you have ever undertaken for the Bureau of Mines have you ever received, whether it was this or any other assignment, any orders from the Secretary's Office of the Department of Interior; is that correct?

Mr. APPLING. No, sir; I haven't.

Senator NEUBERGER. To your knowledge have the other officials or personnel whom you know in the Bureau of Mines ever had an assignment similar to that one which you had in this Al Sarena case?

Mr. APPLING. Not as far as I know.

Senator NEUBERGER. You have never talked to anybody in the Bureau of Mines or known anybody in the Bureau of Mines who ever had an assignment at all parallel to this one that you have had in this case?

Mr. APPLING. As far as I know; no.

Senator NEUBERGER. So far as you know the case is extraordinary and unique, at least in your own opinion and that of your associates?

Mr. APPLING. Yes, sir.

Senator NEUBERGER. I just want to say this before the witness leaves the stand, Mr. Chairman: That in my opinion one of the distressing things about this whole case is the obvious tension and distress that has been caused to so many career employees and civil-service employees of the Interior Department and of the Department of Agriculture because of the unique and extraordinary instructions which came from the secretarial level of the Interior Department. That to me is one of the distressing things about this whole case and I would like to thank Mr. Appling for his participation in answering my questions.

Senator SCOTT. Are there any other questions?

Representative HOFFMAN. Yes; I have one.

The distinguished Senator from Oregon here who sits on my right asked you if there was ever any other case like this? Do you know of any other case where the Secretary delayed for 18 months deciding an appeal?

Mr. APPLING. No, sir; I don't know that, either.

Representative HOFFMAN. This is the first one that you have heard of; is it not?

Mr. APPLING. Yes, sir.

Representative HOFFMAN. That is the one that Mr. Chapman held up.

Mr. APPLING. That's right.

Representative HOFFMAN. And then when the new fellow came along and had the Bureau of Mines take a sample and had somebody who appeared to be competent, according to the record up to that time, to make the assay, it was a case of the heck with the pay, was it not?

Mr. APPLING. It looks like it.

Representative HOFFMAN. And it has been ever since?

Mr. APPLING. It sure has been.

Representative HOFFMAN. In the last campaign and now there is another campaign on. It is rehashed again. You took some photographs out there, did you not?

Mr. APPLING. Yes, sir; I did.

Representative HOFFMAN. Out in Portland, if I remember correctly, the committee said they wanted them. Do you have them with you?

Mr. APPLING. Yes, sir; I have them.

Representative HOFFMAN. Does the committee want them? I do not want you to forget anything.

Mr. Chairman, do you want these photographs submitted?

Senator SCOTT. Yes, sir.

Mr. APPLING. They are not identified yet. We had a little trouble in having them processed.

Representative CHUDOFF. I think he ought to tell what the pictures show rather than just offer pictures.

Representative HOFFMAN. I just wanted to be helpful to the committee. The committee asked for them and I thought I could contribute a little.

Mr. APPLING. I can't identify these exactly until I consult my records. They are photographs of the sample locations, in some instances showing the channels we cut.

Mr. REDWINE. Mr. Chairman, I suggest that the witness tell us under what circumstances these were taken; who was present at the time and then properly identify them later on if he cannot do it right now and submit them for the record.

Representative CHUDOFF. Were they taken during the time the sampling taps, or before the sampling taps, or are they recent photographs?

Mr. APPLING. No; they were taken at the time of the sampling taps.

Representative CHUDOFF. I believe if there is no objection we should let the witness keep them and identify them and then submit them to the committee later. He says he cannot identify them now.

Mr. REDWINE. They were taken at the time of the sampling?

Mr. APPLING. Yes.

Mr. REDWINE. Who was present at the time, sir?

Mr. APPLING. Mr. McCormick and Mr. Pattee, my assistant, and Mr. Briggs.

Mr. REDWINE. Mr. Appling, is it a usual procedure where you are doing a sampling job of this type to take a picture?

Mr. APPLING. Well, no, it isn't.

Mr. REDWINE. Why was it done then?

Mr. APPLING. Well, the instructions, among other things, said to be sure of the exact location of each sample. We located them as well as we could by the means we had at hand and then took photographs for further evidence of location and I think that was the principle.

Mr. REDWINE. These are the spots pointed out to you as you testified in Portland, pointed out or designated by the McDonald brothers as their points of discovery; is that correct?

Mr. APPLING. No, sir; that is not correct.

Representative HOFFMAN. No, sir.

Mr. APPLING. They did not point it out as points of discovery or anything else.

Mr. REDWINE. You did not testify to that?

Mr. APPLING. I don't think I did. If I did I was in error. I certainly didn't intend to testify to that.

Representative HOFFMAN. Who pointed it out? Tell us as you did out there?

Mr. APPLING. Well, one of the owners would designate the areas to be sampled. They didn't say whether they were discovery points or what. I suppose some of them may have been.

Senator SCOTT. You have a permanent record of where you took the samples, but you do not have the samples now?

Mr. APPLING. No, sir. We sent those to the assayers.

Senator SCOTT. And you did not keep the rest of them?

Mr. APPLING. No, sir.

Representative HOFFMAN. May I ask, Mr. Chairman, do you have a copy of your report?

Mr. APPLING. Yes, sir.

Representative HOFFMAN. May I have a copy of it? If it is permissible, Mr. Chairman—other parts of the record were offered—I would like to have the press have a copy of his report if that is all right with the chairman.

Mr. APPLING. Do you want the maps that go with it?

Representative HOFFMAN. If you have them.

Mr. APPLING. I only have one copy of this large map.

Representative HOFFMAN. If you will give me a copy of the report that was introduced in the record that will be sufficient.

Unless there is some objection, Mr. Chudoff, I am going to let the press have it if they want it.

Representative CHUDOFF. If it is in the record it is a public record and I have no objection to the press having it. I have no objection to the press having anything in this case. Maybe the Interior Department would like to have a copy of it. They probably will have a copy of it before the day is over.

I wonder if the Forest Service and the Bureau of Land Management have a copy of it?

Representative HOFFMAN. Usually when we were West the press got it long before I knew anything about it. I did not know whether that was customary here or not.

Representative CHUDOFF. Mr. Hoffman, as far as I am concerned you can give anything to the press that you want to, because even if I object you will give it to them anyway.

Representative HOFFMAN. Does that apply to Mr. Parriott, too? May he have the same privilege? He is with the Department.

Representative CHUDOFF. He should distribute material for the Department only and not for witnesses.

Representative HOFFMAN. I would not want him to be in contempt of the committee.

Representative CHUDOFF. I would not want him to be, either.

Mr. REDWINE. Mr. Appling, on page 2 of your report, under the heading of "Location" I find you reported this: "Samples were taken from outcrops, pits, or trenches designated by the McDonalds."

Mr. APPLING. I think that is right. I think I so testified.

Mr. REDWINE. On page 189 of your testimony I read from your report:

Samples were taken from outcrops, pits, or trenches designated by the McDonalds. According to them, locations were selected that had been sampled

with satisfactory results. Location of the sample on the outcrop or in the pit was at the discretion of McCormick and the writer.

Mr. REDWINE. At spots designated by the McDonalds?

Mr. APPLING. Well, in the general locations designated by them; yes, sir.

Those photographs that the Congressman asked be included in the record are photographs of spots designated by the McDonalds?

Mr. APPLING. That's right.

Mr. REDWINE. Thank you.

Representative HOFFMAN. You did not read quite all of it:

Location of the sample on the outcrop or in the pit was at the discretion of McCormick and the writer.

Mr. REDWINE. That was read, Mr. Chairman.

Representative HOFFMAN. And in the general location designated by the McDonalds.

Senator NEUBERGER. I would like to ask several questions more if I may in view of the fact that the distinguished gentleman from Michigan mentioned the alleged delay by Secretary Chapman in this appeal.

Were you informed yourself of the details of that alleged delay by the previous Secretary of the Interior?

Mr. APPLING. No, sir; I was not.

Senator NEUBERGER. To your knowledge, during that alleged delay did this land remain in the possession of the United States Forest Service, and the timber growing on it?

Mr. APPLING. I have no idea. I suppose so.

Senator NEUBERGER. Let me phrase it another way: When you went under the land to take samples that land was still part of the Rogue River National Forest; is that correct or not?

Mr. APPLING. Well, I am not clear as to the law on it. I understand there were location claims at the time and my general understanding there was the location claims in a sense belonged to the locators as long as they are current in their assessment work. Perhaps I am mistaken in that. I don't really know.

Mr. COBURN. Prior to the late change in the law that is correct.

Mr. REDWINE. They had a possessory right only.

Senator NEUBERGER. While they had location claims I would like to ask counsel could they cut the timber?

Mr. REDWINE. Only such timber as was necessary for mining operations.

Senator NEUBERGER. No timber could be cut commercially on the claims until patent was granted?

Mr. REDWINE. That is correct.

Senator NEUBERGER. Let me ask counsel another question so the record is straight on this. While Secretary Chapman allegedly delayed, as claimed by the distinguished gentleman from Michigan, the Al Sarena Co. could not cut commercially any of the timber growing on the land; is that correct or not?

Mr. REDWINE. That is correct, so long as the Secretary of Interior had taken no action overruling the Bureau of Land Management in its decision. The applicant for a patent had no more than a possessory right and could not cut timber.

Senator NEUBERGER. And they could only cut the timber for commercial purposes after final patent was granted?

Mr. REDWINE. That is correct, Senator.

Senator NEUBERGER. And when final patent was granted there was no competitive bidding on the timber by this company or other companies and there was no payment made to the Government for the timber; is that correct?

Mr. REDWINE. That is correct, sir, except I don't know as to whether there was any competitive bidding. That would be between the McDonalds and so forth after they had a patent, sir.

Senator NEUBERGER. I mean there was no competitive bidding in which whatever price was received would go to the United States Government as now takes place under competitive bidding conducted by the United States Forest Service?

Mr. REDWINE. The money would go to the McDonalds.

Senator NEUBERGER. And not to the Government.

Mr. REDWINE. Not to the Government.

Representative CHUDOFF. Do you have anything in your records to indicate exactly how much timber was cut or sold off the land since the patent was granted?

Mr. REDWINE. The testimony by the Forest Service given in Portland, Congressman, was to the effect—I will have to give you this in round figures—that in excess of 2 million board-feet had been cut. The dollar value was attempted to be arrived at and the testimony was that comparable timber in the area, insofar as Douglas fir is concerned, was selling around \$35 a thousand on the stump, and that the four claims upon which timber had been cut off had consisted of about 85 percent Douglas fir, which was worth, comparable timber in the area, approximately \$35 per thousand board-feet. Fifteen percent of what had been cut was sugar pine and it was selling in the area up to \$80 per thousand board-feet.

Representative CHUDOFF. Could you give me—

Representative HOFFMAN. It would be much better if you swear witnesses instead of letting counsel give his opinion, which is all hearsay. He does not pretend to know anything about it himself.

Representative CHUDOFF. You would say roughly there was \$100,000 worth of timber?

Mr. REDWINE. It figures out roughly to something like \$110,000.

Representative CHUDOFF. The record indicates from Mr. Appling's testimony, he being in the neighborhood for 5 years, there had not been any mining at all on the land. They were merely selling the timber and having it cut off.

Mr. REDWINE. That is correct. The testimony in Portland was further to this effect, Congressman, that by the Forest Service charged with the duty of making slash reports "The forester who had been in the area since 1943 said there had been no mining operations up to 1943 and he was quite frequently on the property."

Representative CHUDOFF. I think McDonald himself testified there were no mining operations.

Mr. REDWINE. McCormick.

Representative CHUDOFF. So that actually the Al Serena Mining Co. is in the lumber business rather than the mining business?

Representative JONAS. Mr. Chairman, may I ask Mr. Redwine a question, since he seems to be a witness right at the moment?

Mr. REDWINE. An unwilling witness, Congressman.

Representative JONAS. I remember reading somewhere—and I cannot find it in this record, but it is in here somewhere—that one estimate

made by the Forest Service was that the timber on the disputed claims was estimated as being worth \$77,000. Whose testimony was that? Am I correct in that?

Mr. REDWINE. That was in 1949 when the testimony was given before the hearing officer in the Portland hearing.

Representative JONAS. I mean if they were entitled to a patent or if they ever were entitled to one it will relate back to 1949, would it not?

Senator NEUBERGER. The value of the timber would be what they are going to sell it for.

Representative JONAS. You just let me ask Mr. Redwine a question. Is that not true? They would get the benefit of any enhancement in value if they were entitled to a patent years ago; is that not true?

Mr. REDWINE. That is correct. But the Forest Service, the same men who testified to that effect, also testified in the later Portland hearing that timber was at all times selling at more than twice what the Forest Service was appraising it at. I think you will find that throughout the record of the timber sales hearings.

Representative JONAS. You testified a minute ago that the figure of \$35 a thousand was used and my recollection of the testimony is they said it was somewhere between \$29 and \$30; approximately \$28.

Mr. REDWINE. In excess of \$30, I think it finally came down to.

Representative JONAS. But if I am correct the record does show that the Forest Service estimated the timber on the disputed claims in 1949 was worth \$77,000?

Mr. REDWINE. That is correct.

Representative CHUDOFF. I believe, Mr. Jonas, if you and I owned the Sarena mines and there were \$4.85 worth of precious metals for every ton of ore down there you and I would be mining the devil out of it instead of worrying about the timber.

Representative JONAS. One of the Forest Service reports from the Annes Engineering Co. shows \$2.25 a ton. One of their figures was \$2.25. That is more than just a trace.

Representative CHUDOFF. That was one sample out of 23 claims.

Representative JONAS. I understand. It shows on these disputed claims there is some pretty good mineralization.

Representative CHUDOFF. The thing I cannot understand is why this mining company, anxious to get a mining patent, has not bothered to mine a mine yet and is running around selling timber on the surface.

Representative JONAS. We might ask them. I think we probably will hear they ran out of money, and it takes some money to develop a mine.

Representative CHUDOFF. If they got \$110,000 for the timber they ought to have some money to start mining.

Representative JONAS. Suppose we get them as witnesses. That is what I have been waiting for for 2 days.

Representative CHUDOFF. They have not bothered to sell any more stock in the mine, either.

Representative JONAS. I think we ought to find out whether they have any money and hear from them.

Representative CHUDOFF. The record shows they are just selling timber and not mining minerals.

Senator NEUBERGER. I wonder if we could read for the record a few of the comments made out in the hearings in Portland about the value of the timber.

Representative HOFFMAN. What page?

Senator NEUBERGER. Page 90. Mr. Leavengood, of the Forest Service, is speaking. The previous matter just has to do with the claims, and I will not go into that so as to save time, and I am starting in the middle here:

\* \* \* I believe under Forest Service practice timber would be removed and the value of that timber was around \$77,000 at that time.

Mr. COBURN. \$77,000 at that time?

Mr. LEAVENGOOD. Yes.

Mr. COBURN. Mr. Leavengood, do you think you can get \$30 a thousand for Douglas fir today?

Mr. LEAVENGOOD. Well, I would only be speaking on the Mount Hood Forest. Our bid prices have been averaging somewhat above that recently.

Mr. COBURN. You could say that \$30 is a reasonable price to put on Douglas fir, could you, under present market conditions?

Mr. LEAVENGOOD. Our appraised prices have been running a little less than \$30.

Mr. COBURN. I am talking about fair market value. I do not want to get too technical. I am referring to what can you get today for Douglas fir. Can you get \$30?

Mr. LEAVENGOOD. Are you asking the question for the Mount Hood area or for southern Oregon?

Mr. COBURN. We can confine it to the Mount Hood area.

Mr. LEAVENGOOD. I would say you would get in excess of \$30 at the present time.

Mr. COBURN. But you cannot testify as to what they would get down in the Medford district?

Mr. LEAVENGOOD. Well, I wouldn't be qualified.

Mr. COBURN. Do you think that Douglas fir could bring \$30 down there,

Mr. LEAVENGOOD. Well, wouldn't it be better to check with some of the boys that are working right in that area? They could tell you more specifically.

Mr. COBURN. I understand from counsel that there will be a witness from that area, but you will agree that \$30 is a pretty fair price, that is, a very reasonable price on the Mount Hood area?

Mr. LEAVENGOOD. I would say our appraised prices have been running less than that on the average sale. However, the bid price currently is somewhat more.

Mr. COBURN. Somewhat more than \$28

Mr. LEAVENGOOD. Yes, sir.

Mr. COBURN. That is all.

Senator SCOTT. Are there any other questions?

Representative JONAS. None for me, sir.

Senator SCOTT. Are there any other questions?

Representative JONAS. Sir, may I ask Senator Neuberger to turn back to page 89. You started reading on page 90. What is that response of Mr. Leavengood about \$7 in 1950? Is that in contradiction to what he said later or not?

Senator NEUBERGER. It is my understanding that that very low price is the reason that the total value estimated at that time was only \$77,000, as compared with higher prices today. I think that that is the way it comes out and I think that that was the way they totaled it at \$77,000 at that time.

Representative HOFFMAN. And, Senator, I think it should also be called to attention—I think you did, but not perhaps sufficiently—that Leavengood says here on page 90:

Well, I would only be speaking on the Mount Hood forest.

He does not claim to know anything about the one in question.

Senator NEUBERGER. That is right. I read that three or four times. However, he is a timber appraisal expert and Douglas fir is Douglas fir.

Representative HOFFMAN. You were asking about the price today, and if he did not know anything about it why put it in the record? You might just as well have my opinion.

Senator NEUBERGER. I think we had the people from the Rogue River Forest, so let us put that in if we have it. Here is the testimony of J. H. Wood, who is the forest supervisor of the Rogue River National Forest where this timber has been growing.

Representative CHUDOFF. What page?

Senator NEUBERGER. Page 151.

Mr. REDWINE. What about the sales contracts in that area, Mr. Wood? What is Douglas fir selling for?

Mr. WOOD. Well, currently, we have sales on the forest in Douglas fir that run, oh, roughly between \$20 and \$30. There is a few under that, and a few over that, but the majority of them the Douglas fir has sold in the last year or 18 months for anywhere from \$20 to \$30, depending upon the quality and accessibility and development cost.

Mr. REDWINE. So \$25 maybe would be a fair average, do you think?

Mr. WOOD. Well, fairly close; yes, sir.

Mr. REDWINE. What about sugar pine?

Mr. WOOD. Well, sugar pine is the premium species. It usually sells for not less than \$40. We have one sale that we sold last summer which went for an alltime high of \$80; that is, an alltime high for our forest.

Mr. REDWINE. Mr. Wood, can you tell the committee what the comparable prices for Douglas fir were in 1939?

Representative HOFFMAN. Mr. Chairman, what do you mean by comparable price, fir in the same location?

Mr. REDWINE. Yes, sir.

Representative HOFFMAN. Same road, same everything?

Mr. REDWINE. Same situation.

Let me ask one more question and we will go back to that.

Representative HOFFMAN. Surely.

Mr. REDWINE. This property is served with access roads, is it not?

Mr. WOOD. Yes, sir.

Mr. REDWINE. There are two roads on it, are there?

Mr. WOOD. Yes, sir.

Mr. REDWINE. How long have those roads been there?

Mr. WOOD. A long time, probably 30 years.

Mr. REDWINE. They are Forest Service roads, are they not?

Mr. WOOD. Yes, sir.

Mr. REDWINE. Does that take care of the question you had, Congressman Hoffman? The witness says that the roads have been there probably 30 years. The access situation was the same.

Representative HOFFMAN. He does not tell anything about the elevations or what the cost of hauling to market is. That is my point. If you are going to get a price, conditions should be comparable, of course. Timber might be worth one price one place and something else again, and that \$80 fellow is out of business. He went bankrupt, did he not?

Mr. WOOD. No, sir.

Representative HOFFMAN. You are sure he did not?

Mr. WOOD. Positive.

Representative HOFFMAN. He is not in business, is he?

Mr. WOOD. Yes, sir.

Representative HOFFMAN. Where?

Mr. WOOD. Medford area.

Representative HOFFMAN. What is his name?

Mr. WOOD. Wilson.

Representative HOFFMAN. How much profit did he make on that, do you know?

Mr. WOOD. No, sir, I do not know.

Representative HOFFMAN. Of course what somebody paid for something somewhere is something else again.

Mr. REDWINE. What was Douglas fir worth in 1939, would you say?

Mr. Wood. Mr. Redwine, I don't believe I can answer that question for this reason—

and goes on to say he was stationed elsewhere in the Forest Service.

Representative JONAS. That makes about \$10 difference in the price as intimated by Mr. Redwine and that testified by these witnesses. That makes quite a difference when you are considering two million feet.

Senator NEUBERGER. We have an estimate of \$77,000 based on around \$7 a thousand board feet and yet Mr. Wood, the Forest Supervisor on the Rogue River National Forest has testified between \$20 and \$30, with \$25 a fair average, so \$25 is  $3\frac{1}{2}$  times as much as the \$7. Therefore, if you even have 3 times as much as \$77,000, that is a substantial sum of money.

Representative JONAS. Of course, you are considering modern prices. The \$77,000 figure was based on what timber was worth in 1949 and that is when these people were entitled to their patent if they ever were entitled to one.

Representative HOFFMAN. I will try and bring in another instance of adjoining timber.

Representative JONAS. What if timber had gone down in price? It would have gone from \$77,000 down to something less than that, but there has been an increase in the market price of timber, of course, since 1949.

Senator NEUBERGER. In other words, you are objecting to the fact that we say the timber is worth  $3\frac{1}{2}$  times \$77,000 and you are making the claim that they received timber worth "only" \$77,000 without making any payment to the Government. Is that a defense?

Representative JONAS. No, I don't intend it as a defense. I think when we are talking, though, in terms of the amount of money that has been involved—and I have seen some newspaper reports that claim this timber was worth \$800,000; where they got that figure I have not been able to determine from the record—I just think in our own consideration we ought to try to arrive at the value of the timber at the time they were entitled to the patent, if they ever were entitled to one.

Representative CHUDOFF. They did not get their patent until January 1954, and they had nothing until that time. If you are going to be technical about it, it should be value of timber in 1954.

Representative JONAS. Does it not relate back to the time they applied for their patent?

Representative CHUDOFF. I do not know.

Senator NEUBERGER. Are you saying it was wrong for the Forest Service and Bureau of Land Management to contest this patent if their mineral findings did not support it?

Representative JONAS. Of course, I am not saying that. We are not even on that subject, Senator. We are on the subject of the value of the timber and when you are going to date that value, 1949 or 1956.

Senator NEUBERGER. You are going to date it at the present time, because the Forest Service and the BLM carried out their perfectly legal responsibilities as they are charged with under the law in recommending a denial of patent if their mineral test did not show the patent was warranted, and by so doing it naturally resulted finally in the culmination of these extraordinary proceedings, and so I say that the value of the timber is what it was when finally granted, which was around

at least \$250,000, according to the estimates given us by Mr. Wood and other Forest Service experts.

Representative JONAS. That may be so. I just had an idea that we ought to think in terms of what it was worth at the time they put in their claim for it and if it went up in the meantime. If it went down they would lose.

Senator NEUBERGER. Bear this in mind: The claim was not based on timber. It was on minerals.

Representative JONAS. That is true.

Senator NEUBERGER. It is a mineral claim.

Representative CHUDOFF. It seems to me that the record indicates this: If this company, which is not interested in mining, would have found that the timber value was less than it was when they made their application for a patent they would not press their claim.

The reason why it was well for them to press their claim and why they were fighting so hard to get the patent was because the timber kept going up steadily and steadily. If you have been out with us you would have heard that the prices of timber are getting higher and higher because timber is getting scarcer and scarcer and eventually it is going to be sold at a terrific premium because you are not going to be able to get timber the way they are cutting it down.

Representative HOFFMAN. May I ask the Forest Service or somebody here to come in at the next meeting with the record of the sale in the same township, the Sunshine Creek sale in 1952 and the Jim Creek sale on January 9, 1954, similar timber right adjoining this? Let us see what they sold it for. It was sold on the open market.

Senator SCOTT. We will get that. The Forest Service is going to testify, so we will get that at that time.

Mr. REDWINE. Chairman Scott, you announced that we would adjourn at 4:30, I believe, this afternoon.

Senator SCOTT. That is right.

Mr. REDWINE. It looks like there are further questions that we will probably want to ask Mr. Appling that cannot be developed this afternoon. Mr. Coburn has something he would like to say.

Let me suggest that this witness hold himself in readiness for further appearance which you will tell him at the conclusion, when the decision is made, when we will be here.

Mr. COBURN. Mr. Chairman, I have here from Senator Murray a letter directed to Senator Murray by Senator Morse, dated January 9, 1956, and with your permission and the permission of the committee, I have been requested to read it into the record.

Senator JAMES E. MURRAY,

*Senate Office Building, Washington, D. C.*

MY DEAR SENATOR: It is my understanding that your committee will conduct further hearings in the Al Sarena mining case, which has been a subject of controversy in Oregon. A number of my constituents have sought information on it, and in view of their inquiries, I wish to put some of these questions to you.

1. In what ways do the procedures used in this case differ from other mining appeal cases in the Department of the Interior?

2. Is the Government usually the contestant in mining-patent appeal cases? In such cases, how is the public interest protected by the Department of the Interior, and were adequate steps taken in this case to protect it?

3. By years, how many dollars' worth of minerals were removed from the contested claims as distinguished from the uncontested claims? Also, please segregate by period before and since the patent was issued.

4. What are the periods when active mining operations were conducted on these claims, and particularly the periods since issuance of patent?

5. What was the extent of actual mining or discovery work at the time application for patent was filed?

6. If mining is now in progress, are the contested claims under active operation?

7. What are the theoretical advantages of securing a patent over mining without a patent? Which of these theoretical advantages have actually been exercised by the patentee in this case since issuance of the patent?

8. Is it true that the contestant was allowed to select the assay firm?

9. If so, why was not the protestant, the Forest Service, allowed to participate in the selection of an assay firm or send portions of the samples to a Government laboratory or other assayer?

10. Were the results of the two western-performed assays earlier submitted by the Forest Service ignored in the final decision? Was there any basis for believing these two assays were inaccurate as compared to the one performed in Alabama?

11. The Forest Service and the Secretary of Agriculture have long tried to protect our forests from questionable mining claims. Is it true that they were not consulted as to the final action being taken on this matter?

12. What are the species volume and value (at bid rates for the area at the time of application) of the timber on the contested claim? For the uncontested claims? What are the values on the same basis at the times when the various appeals were filed? What are today's values?

13. Has timber been cut from the claims since patent was issued? If so, from which claims (contested or uncontested), and in what amounts from each?

I realize that this is a rather formidable list of questions and I hope that most of these will be answered by witnesses in the course of your hearings and by the report of your committee. The people are entitled to the facts and I am glad a full and complete view of this much-publicized episode is being undertaken. I shall await the results of the hearings before advising my constituents in any way upon this matter.

When I was in Oregon, I understood that statements were made that unfair treatment was accorded some of the individuals supposedly involved in this case. Having been subjected to wholly unfounded smear attacks, I know you are familiar with the tactic of unfair allegations being made against people who have long and honorably served this Nation. Consequently, I am sure that you will make certain that justice is done to all concerned.

I would consider it a courtesy, if you would make this letter a part of the record during your hearings on this matter.

With warmest personal regards.

Sincerely,

WAYNE MORSE.

Representative HOFFMAN. I just want to call attention of the chairman of the difference between the statement from Senator Morse and the refusal to let Congressman Mack and Congressman Ellsworth participate in the hearings. Of course, they did file a statement; and I have one I would like to read myself, Mr. Chairman, for the record. May I do that?

Representative CHUDOFF. Before you rule on that I just want to say that Congressmen Mack and Ellsworth made statements before this committee both in Oregon and in Washington. They were granted every consideration. The only thing is, under the rules of the House I refused to allow them to ask questions. I am bound by the rules of the House. I am sorry about that.

Representative HOFFMAN. So the Senator submits his list of questions.

Representative CHUDOFF. If Congressmen Mack and Ellsworth want to submit the same kind of letters I have no objection to putting them in.

Representative HOFFMAN. How about reading my own statement to put in the record, Mr. Chairman?

Senator SCOTT. If you will hold it just a minute we will let you do that.

Representative HOFFMAN. I will get it in before the day is over?

Senator SCOTT. Yes, sir.

In view of what has been said so far I would like to say, having been assigned the job of carrying out this investigation by Senator Murray, I intend to do the job and do it thoroughly.

I am aware of the fact that the testimony we have heard so far has created a lot of doubt and confusion about what really took place in the Al Sarena case, how it was handled, and whose decision it was to handle it in the manner in which it was handled.

I would like to say for myself, as acting chairman of this subcommittee, that I intend to get at the bottom of all these questions. I will do this in spite of the repeated cries of politics and smear—and I will do it even if I have to go to Oregon and dig some samples myself and get them analyzed.

I want it to be very clearly understood that I intend to bring out all the facts in a fair and impartial manner and that all persons interested in this case will be given an opportunity to be heard. I will do this regardless of any and all efforts to guide this investigation off its course and efforts to label it as a vehicle in partisan politics.

I want to adjourn this meeting at 4:30 when the time comes, so be guided by your statements.

Right at the present time we will hear from Congressman Hoffman for his statement.

Representative HOFFMAN. First, I want to commend the chairman on that fine declaration of principles and intentions. It is a dandy, if I may use such a word with reference to a congressional hearing.

Senator SCOTT. That is a good word.

Representative HOFFMAN. It is a common word, one that most everybody understands.

Senator SCOTT. We understand that.

Representative HOFFMAN. This statement that I have is rather long and I do not care too much for the sound of my own voice, so unless you have some objection I will just put it in the record and give it to the press.

Representative CHUDOFF. I might object to it. I do not have a copy of it.

Representative HOFFMAN. I will give you a copy.

Representative CHUDOFF. Let me read it.

Representative HOFFMAN. I will give you the original copy.

Senator NEUBERGER. I would like to have it read.

Representative HOFFMAN. This is rather long and I am not a very good reader.

Senator NEUBERGER. Have counsel read it.

Representative HOFFMAN. I am not ashamed of it. In fact, I take a little pride in it, but that is an admission. I would just as soon give it to the press. They have it. They probably do not care about my reading it.

Senator SCOTT. It will just appear in the record, then.

Representative HOFFMAN. All right.

(Statement referred to follows:)

**STATEMENT OF CLARE E. HOFFMAN, MINORITY MEMBER OF THE COMMITTEE, TO  
BE INCORPORATED IN THE RECORD OF HEARINGS**

During my service in the Congress, I have never seen anything to match the handling of this investigation.

Civil liberties, basic concepts of justice and ordinary courtesy and decency seem to have been forgotten.

Yesterday, those responsible for this reprehensible episode graduated from character assassination to a course of conduct bordering on legislative committee lynching.

A witness, a reputable professional man, was flatly accused of untruthfulness by a member and given no chance to defend himself.

A company's reputation was maligned and manhandled. When a witness sought to defend the company's integrity, he was denied the opportunity to testify.

A Member of the United States Senate was gagged when he asked for recognition of his right to be heard.

The Department of the Interior was subjected to another vicious attack and charged—also without an opportunity to answer, of improper activities in relation to these hearings.

An employee of the Department, a lawyer, was disgracefully abused because he had the rashness to pass out to newspapermen copies of a statement which had been prepared for their convenience.

The committee is now in the ridiculous position of having some members who denounce Government departments in the newspapers up and down the land for withholding information, while other members attack an Interior employee because he performs so simple a task as handing out information to the press.

The bias and cowardly tactics exhibited in the conduct of these hearings is unprecedented in our experience.

This case has been shamelessly tried in the press from its inception. A brazen attempt has been made to indict and convict the principals in the public mind before the first word of testimony was taken.

On November 25, last, in Portland, Oreg., the acting chairman issued a statement before the taking of any testimony on the matter. As reported in the press he said: "The committee \* \* \* would be derelict in its duty if it did not seek to determine the truth or falsity of the charges that have been made that, as a result of high level interference in the Department of the Interior, weasel-worded legal opinions and questionable mineral sampling and assaying practices have been substituted for the dedicated judgment and experience of men trained in the art of determining which lands are, or not not, eligible for patent under the mineral laws of the land."

What kind of an inflammatory, prejudiced statement is that, to come from one who knows he is destined to preside at what should be an impartial hearing by a committee of the Congress, where United States citizens will seek justice?

On what is it based, except the reckless and irresponsible allegations of New Deal smear artists? Certainly, it could not have been based on the record of these hearings which did not then, and which does not now, exist.

Also, as reported in the press, the chairman of the House subcommittee, on December 28, last, called the Al Sarena case "the give-away" of rich timber. Does this indicate an unbiased attitude in the matter at issue?

The news story telling of this Member's charge states that it was included in a letter written from Philadelphia to a newsmen in Washington. The assumption is that it must have been after the Member's return from a pre-Christmas trip with 3 or 4 members of the subcommittee staff to the Virgin Islands, where, we understand, he held hearings in violation of the committee rules.

It should be borne in mind that those responsible for these unfair, one-sided hearings are among the very ones who were loudest a few months ago in demanding censure of a Member of the United States Senate for the manner in which congressional committee hearings were allegedly conducted under his direction.

The charges in this case were made prior to the 1954 election by a syndicated mouthpiece for the Democratic Party. They are being revived for 1956 campaign purposes.

It is our understanding that, for the past year, the committee has had two full-time investigators, with unlimited travel authority, trying to substantiate this smear attempt on the Eisenhower administration and the Interior Department.

The minority members of this committee are without an investigative staff or counsel. They have been denied the usual information on witnesses to be called and the nature of the testimony to be offered.

As a further example of the fine, impartial manner in which these proceedings are being conducted, it is our information that the Department of the Interior was arbitrarily denied an official copy of the transcript of the Portland hearing until certain published accounts revealed that others, outside the Government, had access to it.

The record should show that the staff of the House committee is loaded with former New Deal employees of the Department. The object of their present endeavors is plain.

The record should also show that 1 former Department lawyer worked there for the present administration for 2 years; then quit his job on Saturday night and went to work Monday morning for the committee which was then investigating the Department.

This may be common practice in the legal circles in which the lawyer moves. It is not the practice among the lawyers we have known.

The committee has also shown an enthusiastic lack of concern for the pocket-books of American taxpayers in making this inquiry. The same group traveled at taxpayers' expense to California, Oregon, and various other points in the West and Northwest last fall for the ostensible purpose of holding hearings on "timber problems."

It sat in Medford, Oreg., the home community of many of the principals and experts in the case and only 45 miles from the mining claims themselves. But the committee did not bring the matter up at that time. Instead, it waited until it got to Portland, some 300 miles away, where a carefully stage-managed hearing was held before metropolitan newspapermen and radio representatives, as distinguished from the less elaborate coverage similar proceedings would have had in Medford.

The hearing was called with virtually no warning to the minority. Groundwork for it was laid by renewed publication of the reckless charges by a New Deal character assassin. It lasted 1 day. Witnesses seeking to offer testimony in defense of their activities and reputations were told to submit written statements or come to Washington if they wanted to be heard.

Typical and characteristic of the manner in which the hearings have been held was the statement made at the close of the hearings yesterday afternoon by the chairman of the Senate committee that the Interior Department had coached the witnesses.

The accuracy of that statement is challenged.

The charge is evidently based upon the fact that the witness, Mr. J. A. McDaniel, one of those who made the assay of the samples taken by the Bureau of Mines, had at the request of an Interior Department official, called at the Department to advise the Department of the manner in which the assay had been made and of the usual and customary procedure of his company.

In the record there is not one word of testimony which, even by inference, could be construed as an effort on the part of anyone in the Department to change or influence the trend of the witness' testimony or to coach the witness. Since when has it been either criminal, reprehensible, or unethical for department officials to make inquiry of witnesses as to charges which have been made against the department because of its decisions?

A Department of the Interior official was called before the committee and publicly criticized because he had exercised his right, under the Constitution, to give to the press the statement of the witness who had made the assay of the mining samples and who, by inference if not directly, was accused of fraud.

Apparently, the chairman of the committee and those supporting his position have forgotten all about the Constitution, fair treatment, and orderly procedure. They would apparently deny to anyone and to everyone accused of any unethical conduct by any member of their staff or a former employee of a New Deal administration, an opportunity to be heard. One need but to read the record of these hearings to realize that we might well, in our congressional hearings, attempt to follow procedure which would assure those who have been publicly accused of misconduct a fair hearing, before we make an effort to reform the Communists and certain other groups who practice tyranny.

Senator SCOTT. The press has it.

Representative HOFFMAN. It goes with Senator Goldwater's. He had one this morning that I read.

Senator SCOTT. That is right.

I guess it goes to Drew Pearson, too, does it?

Representative HOFFMAN. I do not know. If he does not stick any closer to the truth than he has in the past it would not be worth much.

Senator SCOTT. Mr. Chudoff, do you have anything further?

Representative CHUDOFF. I would like very much to finish reading this statement.

Senator SCOTT. In the meantime, Senator Neuberger, do you have anything further?

Representative HOFFMAN. Why don't you put in one in answer, if I might make a suggestion, when we meet again?

Mr. REDWINE. Senator, may I suggest that Mr. Appling be requested to return Tuesday at 2 o'clock?

Senator SCOTT. No objection. We will look for you at 2 o'clock.

Representative CHUDOFF. Senator Scott, I have no objection to Mr. Hoffman's political oration.

Representative HOFFMAN. You concur in it?

Representative CHUDOFF. I do not concur in it, but I certainly think you have a right to say it.

Senator SCOTT. In other words, you are just saying it is a good political oration?

Representative CHUDOFF. I think it is an excellent one.

Senator SCOTT. If there is nothing further this meeting will adjourn until Tuesday, January 17, at 2 o'clock.

Mr. Appling will be on hand.

(Whereupon, at 4:20 p. m., Wednesday, January 11, 1956, the hearing was adjourned to reconvene at 2 p. m., Tuesday, January 17, 1956.)

## AL SARENA CASE

TUESDAY, JANUARY 17, 1956

UNITED STATES SENATE,  
SUBCOMMITTEE ON LEGISLATIVE OVERSIGHT FUNCTION, OF  
THE SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS,  
HOUSE OF REPRESENTATIVES,  
SUBCOMMITTEE ON PUBLIC WORKS AND RESOURCES,  
OF THE HOUSE COMMITTEE ON GOVERNMENT OPERATIONS,  
*Washington, D. C.*

The subcommittees met at 2 o'clock p. m., in the caucus room, Senate Office Building, Washington, D. C., Hon. W. Kerr Scott (chairman of the Senate subcommittee), presiding.

Present: Senators Scott (N. C.); Richard L. Neuberger (Oreg.).

Also present: Senators Henry C. Dworshak (Idaho), and Barry Goldwater (Ariz.).

Present: Representatives Earl Chudoff (Pa.), (chairman of the House subcommittee); John E. Moss, Jr. (Calif.); Clare E. Hoffman (Mich.); Charles Raper Jonas (N. C.); Victor A. Knox (Mich.), and William E. Minshall (Ohio).

Senator Scott (chairman of the Senate subcommittee). The hearing will please come to order.

Mr. Appling, will you please come forward?

### TESTIMONY OF RICHARD N. APPLING, JR., MINING ENGINEER, UNITED STATES BUREAU OF MINES—Resumed

Representative JONAS. Mr. Chairman, before you inquire of Mr. Appling, might I make a very short statement?

Senator SCOTT. Yes, sir.

Representative JONAS. Last Thursday, or on January 11 which I think was Thursday, I asked a question and directed it to Mr. Chudoff, chairman of the House subcommittee, inquiring as to the charges or complaints into the matter of how our committee became involved in this hearing. We never discussed the matter in the subcommittee meeting and our committee has never formally had this matter before it.

I was not aware of what complaints had been filed or what the charges were that we were investigating, and I asked that question of Mr. CHUDOFF. He made a response and the Senator from North Carolina was present and heard the response.

Then later, immediately following the resumption of the hearing after the noon recess, the sitting chairman, the Senator from North Carolina, read a statement from the Senator from Montana in which he made the statement that he doubted the wisdom of anyone question-

ing the propriety of an investigation by the committee, and he stated that he did not feel compelled to enumerate the sources of complaints.

If I was out of order or out of line in directing my inquiry to the chairman of the House subcommittee, I will stand corrected. I thought that, as a member of the subcommittee, I was entitled to know something about the nature of the charges in the case and who had presented them, and I think, further, that I am not out of place asking that I, as a member of the committee, be informed by the staff of the nature of the investigation and what witnesses are proposed to be called and what is expected to be shown by the witnesses.

I may be wrong about this, and my only purpose in making the statement is to explain why I directed the inquiry to Mr. Chudoff the other day and to apologize to Senator Murray. If I offended him in any way by asking the question, I did not intend to do so.

The AP sent out a story over the wires, the first sentence of which is that I had demanded to know why Congress is investigating this matter. I made no such demand. I certainly did not intend it as a demand. I do not think that anything I said could reasonably be construed as making any demand. I was simply raising a question, inquiring how our subcommittee happened to become involved in this and what the nature of the charges was.

I felt that I could do a better job on the committee if I had that information. I did not think it was secret information and I did not think then, nor do I think now, that it is improper for me to have made that request of the chairman of the House subcommittee.

Thank you, sir.

Senator SCOTT. Congressman Jonas, that went from Senator Murray only to the Senate committee, so that nothing was directed at you by that statement.

Representative JONAS. I see.

Senator SCOTT. Mr. Appling, it has been called to my attention that Mr. Clarence Davis, in commenting on the testimony given in this room last week, has suggested that he perhaps learned from you the contents of your report dated January 2, and the results of the assays made by the A. W. Williams Co.

Did you at any time between December 17, 1953, and January 6, 1954, communicate in any way with Mr. Davis or anyone else in Washington, D. C.?

Mr. APPLING. Yes, I did. Mr. Davis phoned me on December 29, asking me about the sampling and assays.

Senator SCOTT. Mr. Redwine, will you take over from there?

Mr. REDWINE (counsel, Senate subcommittee). Mr. Appling, why have you kept hidden, until this moment, that conversation?

Mr. APPLING. I didn't mean to keep it hidden. I have tried to answer any questions that have been put to me as far as I could. The question was not asked.

Mr. REDWINE. You were very definitely asked whether you had had any communications other than with your immediate superior on this matter.

Mr. APPLING. I believe I understood that question—I don't recall the exact words, but I took it to mean had I received instructions from anybody concerning the sampling. I did not.

Senator SCOTT. That was the impression which you left with all of us. At least you left it with me.

Mr. APPLING. I regret that, sir. I meant to convey that I had received no instructions in this.

This particular call was a request for information. It was not instructions concerning the sampling at all.

Mr. REDWINE. On what date did you say that telephone conversation was?

Mr. APPLING. December 29, by reconstructing a paragraph in my letter of transmittal accompanying the report, I stated it in the letter of transmittal that accompanied my report forwarded to Spokane. The letter is dated January 2 and I state that Mr. Davis called me from Washington on Tuesday. I did not give the dates except to say "Tuesday." The previous Tuesday would have been the 29th.

Mr. REDWINE. From what are you reading?

Mr. APPLING. My letter of transmittal that accompanied my report when it was sent to Spokane.

Mr. REDWINE. May I see that letter of transmittal?

Mr. APPLING. I have a copy here.

Mr. REDWINE. Thank you.

Mr. Chairman, I wish at this time to ask members of the committee who are here to examine this copy that Mr. Appling has handed to me, and I call your particular attention to the fact, each of you, that this paragraph in reference to Mr. Davis appears to be an afterthought. Look at the difference in the type.

Was that not, as a matter of fact, typed here, Mr. Appling?

Mr. APPLING. It was not, Mr. Redwine. That was typed in my office in Grants Pass before January 2 or on January 2, 1953.

Mr. REDWINE. Why is there the difference in the physical appearance?

Mr. APPLING. It was added after the letter had been typed. The reason for the difference in type, I think, is that I did not put the carbon copies in later. It was typed at that time, not later.

Mr. REDWINE. Mr. Appling, since you last testified, with what employees of the Department of the Interior from Mr. Davis on down have you conferred? Name each of them, please.

Mr. APPLING. I have talked with Mr. Parriott. I have talked with Mr. Miller. I believe I talked with Mr. Armstrong and a number of other employees in the Department wherein Al Sarena was not discussed.

Representative HOFFMAN. Will you yield?

You talked with me, too, did you not? I asked you how your wife and child were and you told me they were sick?

Mr. APPLING. Yes, sir; I did.

Mr. REDWINE. Mr. Parriott, Mr. Miller, and Mr. Armstrong?

Mr. APPLING. I think that is all of the persons in the Department when the Al Sarena matter was discussed.

Mr. REDWINE. Is Mr. Miller in the room, please?

Will you step forward, Mr. Miller?

Mr. Miller, do you have with you a copy of the letter of transmittal of Mr. Appling to his superior, Mr. Volin?

**STATEMENT OF THOMAS H. MILLER, ACTING DIRECTOR, BUREAU OF MINES**

**MR. MILLER.** Mr. Redwine, the correspondence we have in Washington was that transmitted by the Spokane office to Washington. Mr. Appling brought with him the Spokane file. I have brought with me the Washington file.

**MR. REDWINE.** Mr. Miller, will you immediately get in touch with the Spokane office and get the original of Mr. Appling's letter of transmittal?

**MR. APPLING.** Mr. Redwine, if I may interrupt, this is the original copy. This file came from our Spokane office. This is the original. It has the Spokane date stamp on the front.

**MR. REDWINE.** Mr. Miller, state your full name, please.

**MR. MILLER.** My name is Thomas H. Miller, Acting Director of the Bureau of Mines.

Representative JONAS. Mr. Chairman, may the witness sit down?

Senator SCOTT. Certainly.

**MR. REDWINE.** Mr. Miller, who turned over to Mr. Appling the file that he is talking about now?

**MR. MILLER.** Mr. Appling brought the file he has with him when he came from Spokane. This file has not been a part of the Washington file at all.

**MR. REDWINE.** May I have a look at the file, please, Mr. Appling? Is this the original?

**MR. APPLING.** That is the original.

**MR. REDWINE.** May I take it up and show it to the chairman and the members of the committee, please. (Handed.)

Mr. Chairman, I ask you and other members of the committee to examine that and look at the difference in the type. The original has nothing to do with the order in which the carbon was in the sheets.

**MR. COBURN** (chief counsel, Senate subcommittee). Mr. Appling, do you wish to stand on the statement that when the Solicitor of the Department of the Interior, a very high-ranking officer of the Department of the Interior, called you in Oregon and wanted to get your opinion on the value of these samples that thereafter you thought it of sufficiently little importance not to mention it at all during the course of these hearings?

**MR. APPLING.** Well, I recall no questions where that answer would have been pertinent.

**MR. COBURN.** Then I direct your attention to a question by Congressman Jonas when you were testifying last:

Representative JONAS—

Representative HOFFMAN. What date is that?

**MR. COBURN.** That is the record for January 11, Congressman, on page 581:

Representative JONAS. Now, tell me this:

Did anybody from the Department of the Interior, with the exception of Mr. Volin, give you any suggestions or advice or instructions or requests as to how you would assemble these samples or what you would do with them, or what you would do with the alternates?

**MR. APPLING.** No, sir; they did not.

Now, at that time did it not occur to you, and do you not think that in fairness to the Congressman's question, you should have answered more fully than that?

Mr. APPLING. In retrospect, perhaps I should. I believe it was the intent of the question, or at least it was the way I took it at the time, "Did I receive any instructions," and I did not receive instructions from Mr. Davis.

Mr. COBURN. Now, Mr. Appling, the question is more than just instructions. It says:

Did anybody from the Department of the Interior with the exception of Mr. Volin, give you any suggestions or advice or instructions or requests—and so on.

Representative JONAS. Read the rest of it—

as to how you would assemble these samples \* \* \*

Mr. COBURN. I read that once.

Representative HOFFMAN. Mr. Chairman, there is not a thing in the record contradictory to the testimony he gave. Counsel is trying to say that the witness is falsifying because he did not volunteer.

I might say that it is a cowardly attempt to attack the credibility of his own witness. The testimony read does not dispute him.

I can show throughout the record where these three counsel have attempted to get witnesses to testify to their view of the case instead of letting the witness give his version.

Senator SCOTT. Let us have order.

Representative HOFFMAN. You have had order.

Senator SCOTT. I suggest that you leave with us, and I am going to turn it over to the FBI to check and give committee a report on whether this entire document came from the original typewriter, the same typewriter, some other typewriter, or what, and how much it has been doctored, if any.

Representative HOFFMAN. I suggest—

Senator SCOTT. Just a moment.

Apparently, by way of bringing out information here, you were hiding behind saying you were not asked this or that. There may be something that we should have asked and we have not asked.

If you want to correct something, now is the time to do it. Do not come back here later and say that you were not asked this or that. We want to know what you know about this case.

We are going to ask the FBI now to take this copy that you have and to make a report to this committee available to all members of the committee.

Representative HOFFMAN. I am heartily in accord with that. I wish they would have the FBI or any interested lawyer or investigator read the testimony of Leavengood from page 86 on and note the deliberate attempt of three counsel to get Leavengood to testify as to the value of that timber and put on it a high valuation.

I submit that any reading of the record will show that that is what they deliberately did, and Leavengood would not go for it.

Mr. COBURN. Mr. Chairman, speaking for myself, the implications made by the distinguished Congressman are on the record. I have never at any time during the course of these hearings done anything but try to elicit as full information as I could get from a witness. That is all that I am doing here.

I point to the language of Congressman Jonas when he says "requests."

You must have had a request from Mr. Davis.

Mr. APPLING. A request as to how I would assemble these samples, or what to do with them, or what I would do with the alternates. There was no mention of that.

Mr. COBURN. But you did not feel at that time, in answer to that question, that it was incumbent to elaborate to the extent that Mr. Davis made a request to you as to the value of the samples?

Mr. APPLING. No, sir; it did not occur to me that that was implicit in the question.

Mr. REDWINE. Mr. Chairman, in line with the questions that Mr. Coburn has been asking, I do not believe this last paragraph has been read into the record. It reads:

Mr. Davis called me from Washington on Tuesday. He questioned me about the sampling, and about the property in general. He particularly desired a personal opinion of the value of the property from a mining man, which I answered. He also asked that I send him a copy of the report direct, while sending a copy through regular channels as well. I hedged on this by stating that he would undoubtedly receive a copy by the middle of next week (January 6 or 7). In view of this statement, I would suggest that the report be transmitted as soon as possible.

Representative JONAS. Mr. Chairman.

Senator SCOTT. Yes.

Representative JONAS. While we are on this particular subject, I have been leafing through the transcript of the hearing last Tuesday to try and place the questioning. I cannot put my finger on it. Maybe counsel can.

I have a distinct recollection that Mr. Appling testified somewhere in his testimony when he was on the stand that he was asked a question by Mr. Davis as to his personal opinion.

Can you put your finger on where that occurred in the testimony? Do you recall what member of the committee or staff asked questions that elicited that answer that might throw light on this?

Mr. REDWINE. Congressman Jonas, I have sat through all the hearings and I have read the transcript. I certainly would not want to argue with the Congressman's memory. I have no recollection of anything like that appearing in the transcript, sir.

Representative JONAS. May I ask the witness a question?

Senator SCOTT. Yes.

Representative JONAS. Were you asked at any time when you were on the stand previously, or did you state, that in any conversation Mr. Davis or someone from the Department asked you something about your personal opinion concerning the appearance of this land?

Mr. APPLING. I don't believe I did, sir. I don't recall.

Mr. REDWINE. No, Congressman. I do not think he said it.

Senator NEUBERGER. I do not recall it, but it may be.

Mr. REDWINE. Mr. Appling, referring back to the last time you were on the stand, you say that you had had a conversation with Mr. Parriott, Mr. Miller, and Mr. Armstrong?

Mr. APPLING. Yes, sir.

Mr. REDWINE. That is all?

Mr. APPLING. That is all I can recall.

Mr. REDWINE. What was the substance of your conversation with Mr. Parriott?

Mr. APPLING. I have actually had several conversations with him in which Mr. Parriott asked me about certain phases of this case.

Mr. REDWINE. What phases, please?

Mr. APPLING. The conversation with Mr. Davis was one phase.

Mr. REDWINE. Was Mr. Parriott surprised to learn that you had had a conversation with Mr. Davis?

Mr. APPLING. I believe I had mentioned that to him before. He asked me about that before, so he was not surprised.

Mr. REDWINE. What was the date of your first conversation with Mr. Parriott following your last appearance on this stand?

Mr. APPLING. It may be Thursday or Friday of last week. I do not recall which.

Mr. REDWINE. When did you talk to Mr. Miller?

Mr. APPLING. I have talked to him several times; probably every working day since then.

Mr. REDWINE. When did you talk to Mr. Armstrong?

Mr. APPLING. I believe that was Thursday or Friday of last week.

Mr. REDWINE. Let us pin it down. Was it Thursday or Friday? Can you pin it down?

Mr. APPLING. I can't say.

Mr. REDWINE. You have the most convenient forgetter of any witness.

Mr. APPLING. That is not right, Mr. Redwine.

Mr. REDWINE. Certain things you have very definite memory on. On others you have a very convenient forgetter, Mr. Appling.

Mr. APPLING. It is not convenient. I simply do not remember.

Mr. REDWINE. It certainly is fortuitous.

Representative HOFFMAN. I object to that. It is not within the province, as I understand the rules, of the House or Senate, for that matter, for any counsel to question the motives of a witness or to charge him indirectly with falsifying. That is the thing you raised heck about over in the Senate when McCarthy, you said, was doing something wrong.

Representative CHUDOFF. Mr. Chairman, the gentleman is not referring to me. I have made some remarks about a witness telling the truth at one time and you said I have no right to do that. I think I have a right to tell a witness that I do not think he is telling the truth if I do not think he is.

Representative HOFFMAN. It is not within the province of any staff member or any member of the committee to tell him he is a liar.

Representative CHUDOFF. I did not say that. I said he was not telling the truth.

Representative HOFFMAN. Who made you a judge of the witness' truthfulness?

Representative CHUDOFF. I can express my opinion. You have a right to defend him, Mr. Hoffman. I think that the trouble with all the testimony so far, except from one witness, is that we have not been getting all of the facts.

Mr. REDWINE. Mr. Appling, when did you talk to Mr. Armstrong; did you say?

Mr. APPLING. I believe it was Thursday or Friday of last week.

Mr. REDWINE. Did you seek him out or did he seek you out?

Mr. APPLING. I was in Mr. Parriott's office and Mr. Parriott asked me to go with him to Mr. Armstrong's office.

Mr. REDWINE. Who was present besides Mr. Parriott?

Mr. APPLING. That was all.

Mr. REDWINE. Mr. Armstrong and Mr. Parriott and yourself?

Mr. APPLING. Yes.

Mr. REDWINE. What was the conversation with Mr. Armstrong?

Mr. APPLING. I believe it centered around Mr. Davis' phone call to me.

Mr. REDWINE. Mr. Appling, you say you believe that was only last Thursday or Friday. Had you ever before been in the office of the Solicitor of the Department for which you work?

Mr. APPLING. No, sir.

Mr. REDWINE. It seems to me that you would remember what the conversation was; not "I believe"?

Mr. APPLING. I may have been just a little bit bewildered by it all.

Mr. REDWINE. Take a few minutes and refresh your memory as to what the conversation was.

Mr. APPLING. I believe it centered around Mr. Davis' phone call to me and a discussion of why check samples were not taken.

Mr. REDWINE. You do not want to leave the impression that check samples were not taken—but not retained, you meant?

Mr. APPLING. Why did we not take check samples? We did not take check samples.

Mr. REDWINE. Go ahead.

Mr. APPLING. That is about all there was to it.

Mr. REDWINE. Did you have with you at that time this file that you brought from Spokane with you when you were in Mr. Armstrong's office?

Mr. APPLING. I believe I may have had that with me; yes. I believe I did.

Mr. REDWINE. Did you and Mr. Parriott and Mr. Armstrong take a look at it?

Mr. APPLING. No, sir.

Mr. REDWINE. You kept it under your arm or on the desk?

Mr. APPLING. Yes.

Mr. REDWINE. It was not opened at all?

Mr. APPLING. I don't believe that it was. I don't recall that it was.

Mr. REDWINE. When you left Spokane to come to appear before this committee, you brought that file with you?

Mr. APPLING. Yes, sir.

Mr. REDWINE. Where has it been since then?

Mr. APPLING. I have had it in my possession part of the time and it has been at the Bureau office in Mr. Miller's office part of the time.

Mr. REDWINE. Other than Mr. Miller's office, where has it been?

Mr. APPLING. In the Bureau of Mines office.

Mr. REDWINE. What other office is there?

Mr. APPLING. That is it. In Mr. Miller's office.

Mr. REDWINE. In other words, any time that this was out of your possession it was in the possession of Mr. Miller; is that correct?

Mr. APPLING. I may have had it in my hotel room.

Mr. REDWINE. I said "out of your possession."

Mr. APPLING. Well, if you consider that my possession. I didn't always have my hands on it; no. I believe that that is right. It has either been in Mr. Miller's office or in my own possession.

Mr. REDWINE. Mr. Appling, you sat here in this room and in the other room in which we met throughout the time that Mr. Volin testified. Did you not?

Mr. APPLING. Yes.

Mr. REDWINE. Are you mad at Mr. Volin?

Mr. APPLING. No, sir; I am not.

Mr. REDWINE. You heard Mr. Volin questioned at length about any communication in respect to the transmittal of your report to Washington, and so forth.

You heard the questions asked of Mr. Volin, did you not?

Mr. APPLING. I heard part of them. The reception was very poor. I didn't hear all of it.

Mr. REDWINE. Did you hear Mr. Volin asked in particular about any phone call that might have gone from him to Washington in respect to this report?

Mr. APPLING. I don't recall.

Mr. REDWINE. You forget again. Well, if you had heard Mr. Volin testify that he made no phone call and you had no phone call to Washington in respect to this report, would you have suddenly shown him this file to show that there was a call between you and Mr. Davis?

Mr. APPLING. I don't believe I understand your question.

Mr. REDWINE. Will you read the question?

(The pending question was read by the reporter.)

Mr. APPLING. No, sir.

Mr. REDWINE. You would not have?

Mr. APPLING. If I understand the question, you mean would I have shown him this file recently to describe the phone call to Mr. Davis. He has seen the file. The letter was addressed to him.

Mr. REDWINE. Would you have refreshed his memory that there was a phone call, that his testimony was in error? Would you have paid him that courtesy?

Mr. APPLING. I don't think that I did.

Mr. REDWINE. Well, you say you did not hear his testimony in that respect?

Mr. APPLING. I didn't hear that particular part.

Mr. REDWINE. I am asking you if you had heard that testimony and that he testified that there was no telephoning done on this matter back to Washington, would you have refreshed his memory that you had reported to him you did?

Mr. APPLING. Well, maybe I am dense today, but I still don't understand the question, Mr. Redwine.

Mr. REDWINE. Did you have a conversation with Mr. Volin in respect to a phone call that you now say you had with Mr. Davis?

Mr. APPLING. I don't believe that I remarked on this phone call to Mr. Volin except that it was so stated in the letter.

Mr. REDWINE. Why didn't you?

Did you talk to Mr. Volin when he was here in town?

Mr. APPLING. Yes; I did.

Mr. REDWINE. Why did you not refer to that?

Mr. APPLING. I could see no particular reason to. I think he had a copy of that letter. I think he knew that it was there.

Mr. REDWINE. Let me ask you this, Mr. Appling: Would it not have been the natural thing for you to do, if you had had a phone call from the Solicitor of the Department of the Interior, to notify your chief, Mr. Volin, that you had had such a call?

Mr. APPLING. I think that is the intent of the letter.

Mr. REDWINE. Mr. Volin has testified that you talked to him on the 29th and the 30th and so forth. Why did you not tell him on the telephone?

Mr. APPLING. I believe that Mr. Volin may have called me before I talked to Mr. Davis. I would certainly have mentioned it on the phone to him if I had talked to Mr. Davis first.

Mr. REDWINE. Mr. Chairman, I suggest that the chairman direct the Secretary of the Interior to furnish this committee with a copy of the telephone charge in this purported telephone conversation between Mr. Davis and Mr. Appling and, if the chairman sees fit, one of the staff will prepare a letter to that effect for delivery this afternoon.

Senator SCOTT. That may be done.

Mr. REDWINE. Mr. Chairman, on this particular phase of inquiry of this witness, I have no more questions at the moment. I have some other questions which I want to direct to the witness.

May Mr. Coburn take over the examination at this time?

Senator SCOTT. We are glad to have Senator Goldwater back with us this afternoon.

Senator GOLDWATER. Thank you. It is a great pleasure to be here.

Senator SCOTT. We want to adjourn at 4:30.

Representative CHUDOFF. Mr. Chairman, may I ask the witness a couple of questions, please?

Senator SCOTT. Yes.

Representative CHUDOFF. Mr. Appling, I looked at this memorandum dated January 2, 1954, to the acting chief of the mining division, region No. 11. That is where the extra paragraph has been added in lighter type.

I quote:

He also asked that I send him a copy of the report direct, while sending a copy through regular channels as well. I hedged on this by stating that he would undoubtedly receive a copy by the middle of next week (January 6 or 7).

Why was it necessary that you hedge with Mr. Davis on the information he requested?

Mr. APPLING. I don't know, except that I was acting under orders directly from Spokane. Mr. Davis was in Washington. Frankly, I didn't even know who the Solicitor to the Department was or what his particular capacity was or how important a man he was.

Representative CHUDOFF. You know that the solicitor for a department has a pretty high-level position and has a lot of responsibility; do you not, Mr. Appling?

Mr. APPLING. I so understand now. I didn't at that time.

Representative CHUDOFF. What did you have to hide from him that you were going to tell somebody else?

Mr. APPLING. I had nothing to hide from him. I don't think I suggested that I did.

Representative CHUDOFF. Well, you said you hedged. That means you were not going to give him the right answer; does it not?

Mr. APPLING. No; that does not.

Representative CHUDOFF. What does it mean?

Representative HOFFMAN. Let the witness answer, Mr. Chudoff. Give him that courtesy.

Now, Mr. Chairman, the counsel asked a question and before the witness can answer he cuts him off. I say we like to have a little orderly procedure.

Representative CHUDOFF. Mr. Appling, I apologize for cutting you off.

Will the stenographer read the question, please?

Mr. APPLING. I think I remember the question.

Representative CHUDOFF. If you remember it, would you answer it?

Mr. APPLING. We have rather strict regulations in a region, such as that regarding correspondence and channels through which reports should be sent. I was not aware that Mr. Davis would have the authority to supersede those instructions that we had had. That was the reason that I did not want to send the report directly to him. I wanted it to go through channels.

Representative CHUDOFF. In what way did Mr. Davis' request differ with the written or oral instructions you had from your superiors?

Mr. APPLING. It is my understanding of it that our reports are to be sent to our supervisor and he in turn sends it to his supervisor until they finally get up to the Department. Those were the normal channels.

Representative CHUDOFF. Now, if you got a request from Mr. Davis to send some information to which you were not sure he was entitled, why did you not refer the request to your superior rather than hedge? Could you not say, "I am sorry. I don't now if I can give it to you. It will have to go to Mr. Volin," who was your superior?

Mr. APPLING. Yes, sir. I could have done that. However, Mr. Davis seemed satisfied with the fact that the report would reach him by the middle of the following week.

Representative CHUDOFF. So that, actually, you did not even give the Solicitor of the Department a proper answer?

Mr. APPLING. I don't see anything improper in it, if he was satisfied with that arrangement.

Representative CHUDOFF. Will you tell me exactly what Mr. Davis said to you in your telephone conversation, if you recall?

Mr. APPLING. I don't recall the exact words.

Representative CHUDOFF. Tell us to the best of your recollection.

Mr. APPLING. Well, as nearly as I can remember, he asked me when the report would be through, if it had been sent in, or what was the status of the report.

I told him I believed that I had some of the maps to prepare yet and that I would forward it in the very near future. In general, I think I gave Mr. Davis over the phone the substance of my report. We discussed the matter, the assays, and in general how it was conducted, and he pressed me for an opinion of the value of the property, of the potential of the property.

I recall words to the effect that Mr. Davis said he had a decision to make as to whether to issue the patents or not and needed all the information he could get on which to base that decision.

Representative CHUDOFF. Well, now, he asked you about the samples?

Mr. APPLING. Yes.

Representative CHUDOFF. And he asked you about the property in general, did he not?

Mr. APPLING. Yes.

Representative CHUDOFF. Is that right?

Mr. APPLING. Yes.

Representative CHUDOFF. You say you answered that. How can you reconcile that testimony with the fact that you said you hedged with him because you thought you would have to give the information to your own superior? How can you give him answers to one question and refuse to answer other questions if you have to give everything to your superior?

Mr. APPLING. He didn't ask a question of the report. He merely requested that I send him a copy of it directly. That is what I referred to in that paragraph as "hedging."

Representative CHUDOFF. I think, Mr. Appling, that you are quite an expert when it comes to hedging, not only with Mr. Davis, with your superior, but with us, too.

I have no further questions.

Mr. REDWINE. May I ask a question at this point, Senator?

Senator SCOTT. All right, Mr. Redwine.

Mr. REDWINE. Mr. Appling, how do you account for the fact that Mr. Davis knew you were the man that was handling this thing for the Bureau?

Mr. APPLING. I suppose there was correspondence between the Spokane office and the Washington office on that. I believe there was a letter in there in which Mr. Volin stated that he had given the assignment to me.

Mr. REDWINE. You say that Mr. Davis wanted you to give your personal opinion as to the value of the property, or something like that?

Mr. APPLING. Yes, sir.

Mr. REDWINE. What did you tell him, please?

Mr. APPLING. I would like to say that I was reluctant to answer for the reason that I didn't have all the facts. I did not have enough time to make a thorough investigation of the property. I answered it with reluctance.

In effect, I said to him that I thought the assays were sufficiently good in my own personal opinion to warrant a program of exploration of the property.

Mr. REDWINE. What else?

Mr. APPLING. Well, in substance, that is what it was.

Mr. REDWINE. You are qualified to make such an evaluation of the property, are you not, Mr. Appling?

Mr. APPLING. Yes, sir.

Mr. REDWINE. Let me ask you this:

Did you take the A. W. Williams report of the assays and read it from 1 to 28 to Mr. Davis?

Mr. APPLING. I can't recall that I did. I may have done so. I know that the assays were discussed. I believe that I recall that I gave him the maximum and minimum assays and the general average of the assays. Whether I read them out one by one, I can't honestly say.

Mr. REDWINE. How long did this conversation take place, Mr. Appling?

Mr. APPLING. It was a long conversation. It may have been 30 minutes.

Mr. REDWINE. Mr. Davis was really interested in this matter, was he not?

Mr. APPLING. I would assume so when he talked that long on a long-distance wire.

Mr. REDWINE. What time of day was it?

Mr. APPLING. I couldn't say.

Mr. REDWINE. Was it daytime or nighttime?

Mr. APPLING. It was during office hours; yes, sir. It was sometime between 8 and 5.

Mr. REDWINE. I have no further question of this particular phase of the matter.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. Mr. Appling, I would like to ask several questions, if I may.

At any time in your Government career have you ever received a telephone call from an official correspondingly high in the Department of the Interior?

Mr. APPLING. No, sir; I have not.

Senator NEUBERGER. One thing that strikes me as somewhat curious is this: On this report from you in Grants Pass to the Spokane chief of the Bureau of Mines, why is the paragraph about Mr. Davis' phone call in so much lighter type, so far as the typewriter ribbon evidently is concerned, on the document?

Mr. APPLING. I believe the answer, sir, is that the body of the letter had several carbon copies. I don't know exactly why, but I believe that I added that paragraph as an afterthought without the carbon copies in it.

I would like to state this, if I may: that that last paragraph was added at the time that the letter, or on the date or very near the date that the letter was first written. It was written on the same typewriter. It has not been, as was suggested, added recently.

Senator NEUBERGER. May I ask: Was the additional paragraph done on the same typewriter?

Mr. APPLING. I can't recall. I seem to think it was. I had a portable typewriter and a standard typewriter. I think I probably used the standard on both. Both machines are in Spokane at the present time and can be checked.

Senator NEUBERGER. I am certainly not an expert, although I have done a lot of typing in my career. It just looks to me from a very cursory study that the numbers "6" and "7" in the last paragraph referring to Mr. Davis are not quite the same species or kind of type as the numbers on page 1. I certainly could not make that as a flat statement because I am not an expert at typewriter construction, but I would like to have you look and see if you do not think that is true.

Mr. APPLING. I have not examined it that closely, sir. It may possibly have been on a different typewriter.

Senator NEUBERGER. What would your opinion be as to that, because your opinion is just as good as mine as to the type of type face?

Mr. APPLING. Frankly, sir, I would rather not give an opinion if I could. There is an apparent difference. I think it is probably because there were no carbons under the paper when the last paragraph

was added. I really believe they were on the same typewriter, but it is hard to tell from this.

Senator NEUBERGER. You would say, Mr. Appling, that the fact that there were no carbons underneath would make a difference in the appearance of the type?

Mr. APPLING. Well, I am certainly no expert on it, either. If the characters are different, it is a different typewriter, but I couldn't see the difference myself.

Senator NEUBERGER. I would like to ask another question. This is a report to your chief in Spokane; is it not?

Mr. APPLING. Yes, sir; a letter of transmittal.

Senator NEUBERGER. Why would something as important as a phone call from the very highest echelons of the Interior Department be something that you would add as an afterthought to your own immediate superior?

Mr. APPLING. Well, probably I didn't recognize the importance of it. As I stated, I didn't know exactly what position within the Department the Solicitor's Office was. As a matter of fact, this was the first time that I had heard of the Solicitor's Office.

Senator NEUBERGER. In other words, when you prepared your original report to your chief, you did not feel that it was of sufficient importance to tell him that you had had a telephone call about this matter which lasted for about 30 minutes, as you say, from the Solicitor of the Department of the Interior?

Mr. APPLING. Well, I could see no reason to add it in my report. That is why I included it in the letter of transmittal. No, sir; I did not consider it part of the report itself.

Senator NEUBERGER. Was it not something that surprised you?

Mr. APPLING. Mr. Davis' call, you mean?

Senator NEUBERGER. Yes.

Mr. APPLING. Yes; I was very much surprised.

Senator NEUBERGER. It had never before happened to you in your career; is that correct?

Mr. APPLING. No, sir; it had not.

Senator NEUBERGER. Yet you did not include reference to it either in your report or in the first writing which you made of the letter of transmittal?

Mr. APPLING. Well, this was the first writing of the letter of transmittal.

Senator NEUBERGER. But you said you added it as an afterthought?

Mr. APPLING. Yes. I thought you meant that there had been a rough draft prior to this. I really can't explain why I added it as an afterthought. I am sure that is the way it was.

Senator NEUBERGER. Again I do want to ask you about the question of the typewriter. You note how much lighter this final paragraph is on the original. There is no comparison, so far as the texture of the ribbon is concerned.

Now, do you believe that additional carbon copies under the first piece of paper could make that difference in the appearance?

Mr. APPLING. Well, in view of the cushioning effect, I would think it could. It would round the letters or make them a little broader. I may be wrong on that, sir. I am certainly no expert.

Senator NEUBERGER. This paragraph finally added was, if I am not mistaken, without the many carbon copies; is that correct?

Mr. APPLING. Yes.

Senator NEUBERGER. And the heavier type was when you had a good many carbon copies?

Mr. APPLING. Yes.

Senator NEUBERGER. And you think that perhaps the contrast in the extremely dark type and here the extremely light type could be caused by the fact that the last paragraph was without the numerous carbon copies?

Mr. APPLING. I would say that is possible. I am certainly not an expert on it. I don't know.

Senator NEUBERGER. How many copies in all were made of this?

Mr. APPLING. I imagine 3 or 4. I don't recall that either.

Senator NEUBERGER. Now on the carbons of this, did you add this as an original or did you use a carbon?

Mr. APPLING. No, sir. It did not show on the carbon.

Senator NEUBERGER. You just added it to the original?

Mr. APPLING. Yes.

Senator NEUBERGER. In other words, you did not feel that the information about the phone call from the Solicitor of the Interior Department was sufficiently significant to be put on the carbons?

Mr. APPLING. Well, probably not. I don't recall my feeling at the time, but it must have been that way.

Senator NEUBERGER. What was your rating and what salary did you receive at the time this phone call came from Mr. Davis?

Mr. APPLING. I was a GS-7.

Senator NEUBERGER. GS-7?

Mr. APPLING. Yes, sir. I believe it was a salary of \$4,300 or \$4,330.

Senator NEUBERGER. Did it seem at all usual or extraordinary in your mind that a GS-7 in Grants Pass in Oregon should receive a phone call from the Solicitor of the Interior Department when there was in existence in that region your own superiors in the Bureau of Mines?

Mr. APPLING. Well, it did seem odd; yes, sir.

Senator NEUBERGER. Yet you still did not see fit to include it in the first writing of your letter of transmittal or to put it on the carbons of that?

Mr. APPLING. No, sir.

Senator NEUBERGER. Thank you very much.

Mr. REDWINE. Mr. Chairman, may I permit the press to take a look at this? We have had a request from a member of the press.

Senator SCOTT. Without objection, all right.

Representative CHUDOFF. Are you still a GS-7?

Mr. APPLING. No, sir.

Representative CHUDOFF. What are you now?

Mr. APPLING. GS-9.

Representative CHUDOFF. What is the difference in salary?

Mr. APPLING. Well, together with the overall increases, about \$1,200.

Representative CHUDOFF. When did you become a GS-9?

Mr. APPLING. I believe it was effective just about the time this took place. I think it was December of 1953.

Representative CHUDOFF. You became a GS-9?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. You skipped over an eight?

Mr. APPLING. Pardon me.

Representative CHUDOFF. Did you skip over an eight?

Mr. APPLING. Yes, sir. I think that is standard procedure in the professional rating.

Representative CHUDOFF. You say you were a GS-7 when you got the call in from Mr. Davis?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. How long after you got the call from Mr. Davis was it before you became a GS-9?

Mr. APPLING. Perhaps I was a little wrong. I think it came through as a Christmas present, you might say. It came through right after this time. I may have actually had the nine at the time Mr. Davis called. I don't know that I knew about it.

Representative CHUDOFF. It was right close to the time Davis called; either a little before or a little after?

Mr. APPLING. Yes.

Representative CHUDOFF. Thank you.

Senator SCOTT. Are there any further questions?

Senator NEUBERGER. Not at the moment.

Senator SCOTT. Senator Goldwater?

Senator GOLDWATER. I would yield to the Congressman.

Senator SCOTT. Congressman Jonas.

Representative JONAS. Mr. Hoffman.

Representative HOFFMAN. This office memorandum, United States Government, date January 2, 1954, to acting chief, mining division, region II; to whom was that sent? What individual got it?

Mr. APPLING. Thomas Howard, the acting chief at that time in the Spokane office, actually received it. Mr. Volin was in the process of being transferred right at that time.

Representative HOFFMAN. You do not know whether Volin or Howard got it?

Mr. APPLING. I think they both saw it. I don't know who received it.

Representative HOFFMAN. Counsel, do you have a copy of the original or have you the original here?

Mr. COBURN. No, sir.

Representative HOFFMAN. Then I suggest, Mr. Chairman, that we get the original. That will show what was on it at the time. That is the best evidence.

Representative CHUDOFF. Is not that the original?

Senator NEUBERGER. The original is at the press table.

Senator GOLDWATER. That is a photostat.

Representative HOFFMAN. Where did the original come from? Did you produce it?

Mr. APPLING. I brought it from Spokane.

Representative HOFFMAN. Is this so-called afterthought on that, too?

Mr. APPLING. Yes, sir.

Representative HOFFMAN. Who wrote this report? Did you?

Mr. APPLING. Yes. I wrote that letter.

Representative HOFFMAN. That is all I have on that.

They have asked you 3 or 4 times or more if you can ever recall when so high an official in the Department called you and you said, "No." Do you know of any other case that has hung fire for 18 months waiting a decision, in which you were interested?

Mr. APPLING. No, sir; I don't.

Representative HOFFMAN. I think that is all I have.

Senator NEUBERGER. Were you interested in this case for 18 months?

Mr. APPLING. No, sir; I knew nothing about it.

Senator SCOTT. Are there any further questions?

Representative HOFFMAN. He was interested in making a survey, Mr. Senator.

Senator SCOTT. Congressman Jonas?

Representative JONAS. Mr. Appling, you were asked about your promotion.

Mr. APPLING. Yes, sir.

Representative JONAS. Had that been in the books for some time? Were you expecting it? An inference was at least possible from the questions that you were given that this promotion was to pay you off for this report.

Mr. APPLING. That wasn't the case, sir. It had been in the mill for about 10 or 11 months. As I recall, there was what we termed a "promotion freeze" or something like that at the time which had stopped the promotion.

Representative JONAS. How long had your papers been in process?

Mr. APPLING. I think at least 6 or 8 months before they had been originally submitted.

Representative JONAS. You mean you were in line for this promotion before you were given this assignment to take these samples?

Mr. APPLING. Yes, sir; some time before.

Representative JONAS. Now, I want to go back to a question I asked you earlier. I could not have dreamed this up. I definitely read it in this record as testimony by you or Mr. Volin, or I heard somebody say that you or he, one, had been asked the question as to your personal opinion as to whether this looked like a mining operation or not.

Do you recall any testimony before this committee, in Portland or in Washington, along that line?

Mr. APPLING. No, sir; I can't recall it. Of course, I have not remembered all the phases of this testimony, but I do not recall that.

Representative JONAS. Did you not testify the other day that you had a telephone call from Washington as to when your report would be forthcoming?

Mr. APPLING. I don't remember that.

Representative JONAS. Did Mr. Miller call you about anything?

Mr. APPLING. No, sir.

Representative JONAS. Did Mr. Volin testify that someone from Washington called him and asked him when the report was coming in?

Mr. APPLING. That may be. I don't recall that he had knowledge about it. He may have so testified.

Mr. REDWINE. Mr. Sidney Gottley called Mr. Volin.

Representative JONAS. Counsel said that Mr. Volin testified that he received a telephone call. As far as you can remember, today is the first time you have responded to any question with the statement that you talked to anyone in Washington?

Mr. APPLING. That is right, sir.

Representative JONAS. Now, do you have any independent recollection now, sometime after this happened, and please refresh you mem-

ory if you do not recall it at the moment as to when during that day or how soon thereafter it was before you completed your report?

Mr. APPLING. After Mr. Davis called you, you mean?

Representative JONAS. Was it in preparation at the time?

Mr. APPLING. It was in preparation at the time. I seem to recall that I finished the rough draft on it and I wanted to do a little polishing on the report and finish several of the maps. That was the only thing remaining to be done.

Representative JONAS. Now, do you think you had finished the rough draft before you talked to Mr. Davis?

Mr. APPLING. I believe I did.

Representative JONAS. And the part of the report that is in evidence here today was the final draft with the addition of the final paragraph?

Mr. APPLING. On the letter of transmittal—perhaps I misunderstood your question. When you said “report,” I thought you referred to my report on the samples.

Representative JONAS. I mean the letter of transmittal.

Mr. APPLING. I just don’t recall, sir. I assume that this letter was written on January 2. That is the date that I have here. Why I would have added that paragraph as an afterthought, I can’t say.

Representative JONAS. And you say to the committee now under oath that the paragraph in question was added by you in your office at Spokane?

Mr. APPLING. I think it was in Grants Pass.

Representative JONAS. At Grants Pass in your office at the same time you prepared your letter of transmittal, or shortly thereafter?

Mr. APPLING. Yes, sir. I don’t recall the exact details of it but that in substance I would swear to.

Representative JONAS. You have not added anything to that letter of transmittal since you mailed the letter of transmittal?

Mr. APPLING. I have not; no, sir.

Representative JONAS. So the paragraph under consideration you would swear was on the letter of transmittal at the time you put it in the post office?

Mr. APPLING. Yes, sir; I am sure that it was.

Representative JONAS. All right. That is all.

Representative HOFFMAN. Would you yield, Mr. Jonas?

Representative JONAS. Yes, sir.

Representative HOFFMAN. Is there anything in that added paragraph which in your opinion adds to or detracts from the fact that there was a mining claim down there?

Mr. APPLING. As far as I know, it does not.

Representative HOFFMAN. That is all I have.

Senator SCOTT. Are there any further questions?

Senator GOLDWATER?

Senator GOLDWATER. I would like to ask a few questions, if I might.

Mr. APPLING, you may have done this before I came in, but can you remember sufficient details of your conversation with Mr. Davis to bring them out here?

Mr. APPLING. I think I can recall in a general fashion what was said. I can’t recall the exact conversation. I know that Mr. Davis stated to me that he had to make a decision on this matter and that he wanted all the information that he could get and would I—well,

I went over the substance of my report and discussed or described the sampling, and went over the assays and some questions.

I don't recall whether I read the assays to him individually. At any rate, I have the impression that I gave him the maximum and minimum assays and an average figure and, as I previously stated, he then pressed me for an opinion of the value of the property and I gave him a personal opinion that I thought the assays would warrant a program of exploration; and, in substance, that was the conversation which I had with him.

Senator GOLDWATER. Do you recall gaining any impression at that time of what reason might lie behind Mr. Davis' call?

Mr. APPLING. Well, yes, sir. Perhaps I am imagining it as far as the actual words, but he gave me the very distinct impression that he had said that "I have a decision to make in this matter as to whether or not to issue the patents. I need all the information I can in order to help make the decision." Again I can't say those were the exact words, but that was my recollection of them.

Senator GOLDWATER. Now, Mr. Appling, I am not confident that this has been brought out in the testimony thus far. We seem to get a little bit astray in this investigation from what I think is the original purpose, and I would like, by questioning you to your knowledge of mining and being an employee of the Bureau of Mines, to see if we cannot get into the record the easy way in which claims could be patented prior to last year or this fiscal year.

In your work with the Bureau of Mines, could you tell us how a claim was patented prior to the enacting of the new law?

Mr. APPLING. Well, I have never been involved in any other patent cases. It was my understanding that any location plan prior to that time could be patented by performing, I believe it was, \$500 worth of work on the claim, having a mineral survey made and then by application and payment of the fee. There, of course, had to be mineral value on the property.

Senator GOLDWATER. Now, are you certain that the law required that there may be mineral value?

Mr. APPLING. No, sir; I am not certain of the law. I haven't read it. It was my understanding that there should be mineral value there to issue the patent.

Senator GOLDWATER. I attempted to put something into the record the other day that would show what historically had been used as the yardstick, but that was refused. However, the promise was made that it will be put on at a future time. It will be very valuable.

Actually, are you aware of the fact that all you had to show was discovery and discovery does not actually entail value of ore?

Mr. APPLING. No, sir; I was not aware of that.

Senator GOLDWATER. You are not aware of that as a member of the Bureau of Mines?

Mr. APPLING. As I say, I have had very little to do with that.

Senator GOLDWATER. Let me put it this way:

Are you a mining engineer?

Mr. APPLING. I am a graduate geologist. My civil-service rating is mining engineer.

Senator GOLDWATER. If a man had a claim staked out on a ledge, the geologic formation of which would lead any reasonable geologist

or mining engineer to suppose that one might expect to find similar ore under his claim, that would be ground for discovery purposes.

Are you aware of the fact that not one but tens of thousands of claims have been patented on that type of evidence?

Mr. APPLING. Well, I believe I misunderstood your first question. I understand that that is right, yes.

Senator GOLDWATER. Are you aware of that?

Mr. APPLING. That there must be some discovery of mineralization. is my understanding.

Senator GOLDWATER. Mineral position?

Mr. APPLING. That is my understanding, and some reasonable reason to believe that there is an extension of that point of discovery.

Senator GOLDWATER. So that the actual determination can be through assay on which there does not have to be, according to law, any particular value. You will find, for instance, in my State of Arizona, that the average yield per ton last year of gold was 9 cents a ton and the average yield on silver was 9.1 cents per ton. Yet we have heard evidence introduced here that would lead a person not acquainted with mining to believe that 9 cents and 10 cents would be unprofitable, and we are talking about \$2.10 here.

Mr. Appling, you have been in the Bureau of Mines long enough to know that both the Bureau of Mines and the Forest Service with whom you work have long protested the looseness in the old mining law; is that correct?

Mr. APPLING. Yes, sir.

Senator GOLDWATER. You are aware of the fact that efforts have been made in the Congress previous to this to change the mining law to prevent just what has been happening in the West? Are you aware of that?

Mr. APPLING. Yes, sir.

Senator GOLDWATER. The practice of patenting land in the West had become so loose, so promiscuous, that it came to the attention of this administration that changes were needed, and last year, thank the Lord, those changes were made.

I might inject this:

I never liked the old mining law any more than my Democrat friends, who are trying to make something out of their old practice, appeared to like it. I did not like to see people obtain valuable land with no mineral content, but you and I know that that went on, not for 1 year or 10 years; it has gone on practically since the old mining laws were written.

Now, I want to get to one point, having gotten this far. The old mining law said, in effect, that a patent could be issued, or would be issued, when \$500 worth of work was done, and discovery or evidence of a discovery was made.

Are you aware of the fact that an effort was made to patent this land, I understand, 18 months before? In fact, I think it goes back many more years than that.

Mr. APPLING. I understood that it had been started.

Senator GOLDWATER. Would you not be led to believe, then, that we were being governed here more by the law of man than by the letter of the law?

Mr. APPLING. I would rather not answer that, sir.

Senator GOLDWATER. Well, as long as I have opened it up, it is my impression from the history of this case that Secretary Chapman not only sat on this, he sat on innumerable cases in the West. I think it totaled over 280, but that figure is subject to correction, where he put himself above the law and he was going to decide whether or not these claims were to be patented.

I do not want you to comment on that because you expressed a desire not to do so. He never even gave an opinion.

I might say this, and I intend to bring this out in a speech which I am going to make on the floor later:

If this committee wants to investigate something, Secretary Chapman gave away most of the future water supply of the city of Tuscon in the Avra Valley land case in complete violation of the Desert Land Act, which was later changed by this administration.

I was particularly interested in asking you these questions because, from the Director of the Oregon State Department of Geology and Mineral Ind, which I believe is industry, I get the information that there was 1 claim patented in 1948 for 185.66 acres; 2 claims for a total of 94.36 in 1949; none in 1950; 2 in 1951 for a total of 90 acres, and 4 for a total of 146.40 in 1952; so that, in Oregon, as in all Western States, there was a dribble of mining claims being approved.

Now, the fact that this mining claim was on forest land is nothing new either. In fact, I imagine that in as many cases as not you will find minerals under trees, or trees over minerals.

You are aware of the fact, too, that, in this new mining law, the trees on the land do not belong to the patentee. He can only use what he needs in his mining, but under the old law he could use all of the trees or anything on that land or above it to the blue skies, or below it to the center of the earth. Is that true?

Mr. APPLING. That is my impression.

Representative CHUDOFF. Senator, would you yield at that point?

I am grateful for your expression of the laws. I do not have any mines in Philadelphia where I come from, and we do not have these problems.

Did I understand that under the new law the timber does not go with the patent?

Senator GOLDWATER. It is my understanding of the new law that it is only the timber used in the mining operation.

Representative CHUDOFF. I do not know, but my counsel informs me that the timber goes along.

Senator GOLDWATER. I would suggest that the counsel read the law. It was before our committee last year. It is my understanding of the new law that timber is subject to the control of the Forest Service.

Representative CHUDOFF. I wonder if you would let Mr. Lanigan answer the question he raised?

Mr. LANIGAN (counsel, House subcommittee). I will check with the counsel from the Senate committee, but it is my understanding that under the new law the timber does go to the patentee when the land is patented. The only change is in the amount of control the Government has over the timber prior to patent.

Under the old law, the Government felt it could not sell the timber off the claims prior to patent, and that has been changed so that now mature timber can be cleared.

Senator GOLDWATER. I think we might put that new law into the record. I think it would be helpful. If I am wrong on that point, I am glad to be corrected. It is not an important point.

The thing I am trying to bring out here is that at this late date the opposition party is suddenly interested in investigating practices that went on, I might say, under both administrations for years and years past, and that the opposition has had 20 long years to correct what we in the West have asked to be corrected for that length of time and longer. That is my whole point.

We have not been able to get anything into the record about how claims come about, how they are patented. We have not had anything put into the record as to how a patent is issued. I think it is high time in this discussion that we do get it in there. That is my whole purpose.

I am sorry that Mr. Appling has not had closer association with the actual, down-to-earth claim end of mining. I think it is very necessary to get this cleared up.

I am just as anxious as any of you people to find where laws have been taken advantage of. I am also anxious to find cases in this administration or the past where the man himself has put himself above law. I am interested in finding out all of the details of the land that has been obtained under law.

Mind you, any land could be given under these mining claims and patents. I am anxious to see how much of it was done 20 years ago, 10 years ago, 5 years ago, and I think we have to have some basis on which to proceed other than the rather roundabout questioning in which we have been indulging for several days.

That is all I have, Mr. Chairman.

Representative JONAS. Mr. Chairman, may I ask a question?

Senator SCOTT. Yes.

Representative JONAS. In line with the comments made by Senator Goldwater, I would like to ask when it is proposed that we hear from the Department of the Interior? I think we ought to have in this record the law applicable to patents, and I think we should have had it at the beginning, if I may be permitted to say so.

I do not know what the law is concerning how you go about getting patents. We have had newspaper comments that this land was given away or sold for \$5 an acre. I would like to know whether there is any requirement that work be done on the property, and some of the documentary evidence I think ought to be in the record at the beginning so that we can consider testimony in the light of knowledge of what the law is.

We are arguing this afternoon as to what the law is concerning patents.

Representative HOFFMAN. Would you yield there?

Senator SCOTT. Mr. Jonas, as we go along, the Department of the Interior will be called.

Representative JONAS. Mr. Chairman, can we not have the law put into this record so that we can all have the benefit of knowing what you have to do to get a patent.

Representative HOFFMAN. Mr. Chairman, Mr. Jonas said he would yield.

I want to offer at this time chapter 43 of the regulations put out by the Department. I find that I did not bring the book with me.

I would also like to offer title 31, which contains the statutory provisions.

I want to offer a photostat of the notes on section 41. That is an old section but, nevertheless, it contains the law and cites the court decisions all the way through, and the sum and substance of it is that to constitute discovery it is necessary that minerals be found under such circumstances and such character that a reasonably prudent man—and so on. There is no requirement in the law anywhere that I can find that there shall be a certain amount of mineralization. It is nowhere, either in the regulation or the law.

I can understand why counsel never put it in. It was because they did not want it in.

Representative CHUDOFF. Mr. Chairman.

Representative HOFFMAN. Will that be received?

Senator SCOTT. Yes, sir.

I would like to know by whom those notes were prepared.

Representative HOFFMAN. Well, sir, this came from the library and is a photostat from the code. Is that reliable?

Representative CHUDOFF. Probably the United States Code, Annotated; is it, Mr. Hoffman?

(The material referred to follows:)

#### MINERAL LANDS AND MINING

(Title 30, § 23, Note 141, Ch. 2)

It is only necessary to discover a genuine mineral vein or lode, whether small or large, rich or poor, at the point of discovery within the lines of the location to entitle the miner to make valid location of such vein or lode. *North Noonday Min. Co. v. Orient Min. Co.*, C. C. Cal. 1880, 1 F. 522, 531. See, also, *Meydenbauer v. Stevens*, D. C., Alaska 1897, 78 F. 787, 790; *Book v. Justice Min. Co.*, C. C. Nev. 1893, 58 F. 106, 125; *Jupiter Min. Co. v. Bodie Consol. Min. Co.*, C. C. Cal. 1881, 11 F. 668, 675; *Hedrick v. Lee*, 1924, 227 P. 27, 39 Idaho 42.

When the locator finds the rock in place, containing mineral, he has made a discovery, within the meaning of this section, whether the rock or earth assays high or low. *Migeon v. Montana Central R. Co.*, Mont. 1896, 77 F. 249, 255, 23 C. C. A. 156. See, also, *Lange v. Robinson*, Alaska 1906, 148 F. 799, 801, 79 C. C. A. 1; *Nevada Sierra Oil Co. v. Home Oil Co.*, C. C. Cal. 1899, 98 F. 673, 676; *Shoshone Min. Co. v. Rutter*, Idaho 1898, 87 F. 801, 807, 31 C. C. A. 223, reversed on other grounds, 1900, 20 S. Ct. 726, 177 U. S. 505, 44 L. Ed. 864; *Bonner v. Meikle*, C. C. Nev. 1897, 82 F. 697; *Montana Central R. Co. v. Migeon*, C. C. Mont. 1895, 68 F. 811, 814, affirmed *Migeon v. Montana Ry. Co.*, C. C. A. 1896, 77 F. 249; *Book v. Justice Min. Co.*, C. C. Nev. 1893, 58 F. 106; *Murray v. White*, 1911, 42 Mont. 423, 113 P. 754, Ann. Cas. 1912A, 1297; *Fox v. Myers*, 1906, 86 P. 793, 29 Nev. 169, 184; *Muldrick v. Brown*, 1900, 37 Or. 185, 61 P. 428; *McShane v. Kenkle*, 1896, 44 P. 979, 18 Mont. 208, 212, 33 L. R. A. 851, 56 Am. St. Rep. 579; *Shreve v. Copper Bell Min. Co.*, 1891, 11 Mont. 309, 28 P. 315; *Debney v. Iles*, 1907, 3 Alaska 438, 450.

The requirements of this section have been met where minerals have been discovered and the evidence is sufficient to justify a person of ordinary prudence in making an expenditure of labor and money, with a reasonable prospect of success, in developing a valuable mine, though the claim may not contain ore in paying quantities. *Chrisman v. Miller*, Cal. 1905, 25 S. Ct. 468, 471, 197 U. S. 313, 49 L. Ed. 770, affirming *Miller v. Chrisman* 73 P. 1083, 74 P. 444, 140 Cal. 440, 98 Am. St. Rep. 63. See, also, *Mason v. Washington-Butte Mining Co.*, Mont. 1914, 214 F. 32, 130 C. C. A. 426; *Multnomah Mining, Milling & Development Co. v. U. S.*, Wash. 1914, 211 F. 100, 102, 128 C. C. A. 28; *U. S. v. Lavenson*, D. C. Wash. 1913, 206 F. 755; *Cascaden v. Bortolis*, Alaska 1908, 162 F. 267, 268, 89 C. C. A. 247, 15 Ann. Cas. 625; *Charlton v. Kelly*, Alaska 1907, 153 F. 433, 84 C. C. A. 205, 13 Ann. Cas. 518; *Lange v. Robinson*, Alaska 1906, 148 F. 799, 802, 803, 79 C. C. A. 1; *Steele v. Tanana Mines R. Co.*, C. C. A. Alaska 1906, 148 F. 678, 680; *Cascaden*

v. Bartolls, Alaska 1906, 146 F. 739, 741, 77 C. C. A. 496; Shoshone Min. Co. v. Rutter, Idaho 1898, 87 F. 801, 31 C. C. A. 223, reversed on other grounds, 1900, 20 S. Ct. 726, 177 U. S. 505, 44 L. Ed. 864; Bonner v. Meikle, C. C. Nev. 1897, 82 F. 697, 703; Migeon v. Montana Central Railway Co., Mont. 1896, 77 F. 249, 255, 23 C. C. A. 156; Montana Central R. Co. v. Migeon, C. C. Mont. 1895, 68 F. 811, affirmed Migeon v. Montana Central R. Co., C. C. A. 1896, 77 F. 249; Murray v. White, 1911, 113 P. 754, 42 Mont. 423; Golden v. Murphy, 1909, 103 P. 394, 31 Nev. 395, rehearing denied, 1909, 105 P. 99, 31 Nev. 395; Mutchmor v. McCarty, 1906, 87 P. 85, 149 Cal. 603; Fox v. Myers, 1906, 86 P. 793, 29 Nev. 169; Ambergis Min. Co. v. Day, 1906, 85 P. 109, 12 Idaho 108, 117; Muldrick v. Brown, 1900, 61 P. 428, 37 Or. 185; Sanders v. Noble, 1899, 55 P. 1037, 22 Mont. 110, 116; Michael v. Mills, 1896, 45 P. 429, 22 Colo. 439; McShane v. Kenkle, 1896, 44 P. 979, 18 Mont. 208, 33 L. R. A. 851, 56 Am. St. Rep. 579; Brownfield v. Bier, 1895, 39 P. 461, 15 Mont. 403, 409; Shreve v. Copper Bell Min. Co., 1891, 28 P. 315, 11 Mont. 309, 338, 343; Burke v. McDonald, 1888, 13 P. 351, 2 Idaho, Hasb., 339; Harrington v. Chambers, 1881, 1 P. 362, 3 Utah 94; Duffy v. Strandberg, 1915, 5 Alaska 353; Cook v. Johnson, 1908, 3 Alaska 506, 541; Charlton v. Kelly, 1906, 2 Alaska 532.

While a vein or lode discovered by a locator in the side of a hill or mountain and within well-defined walls will assay but a small amount per ton as compared with the cost of extracting, removing, and milling the ore, yet if the miner has good reason to believe from his experience and from that of others in the same mining district that the ore is liable to be richer at a greater depth than at the point of the discovery, he has made such a discovery as will entitle him to make a valid location within the meaning of this section. *Book v. Justice Min. Co.*, C. C. Nev. 1893, 58 F. 106, 124. See, also, *Holdt v. Hazard*, 1909, 102 P. 540, 10 Cal. App. 440, 443.

Discovery made in running a tunnel where there were small seams of iron oxide, quartz, and small quantities of carbonate of lead, and where the indications were of a character which the miners in that district would follow in the expectation of finding ore, and where the rock in such seams was different from the country rock, and where such seams were similar in character to the seams or veins of mineral matter that had induced other miners to locate claims in the same district, is a sufficient discovery to justify a belief in the existence of a lode or vein of great value, and to show that the location was made in good faith and not upon a conjectural or imaginary existence of a vein or lode, which cannot be permitted. *Shoshone Min. Co. v. Rutter*, Idaho 1898, 87 F. 801, 31 C. C. A. 223, reversed on other grounds, 1900, 20 S. Ct. 726, 177 U. S. 505, 44 L. Ed. 864. See, also, *King v. Army & Silversmith Min. Co.*, Mont. 1894, 14 S. Ct. 510, 152 U. S. 222, 227, 38 L. Ed. 419; *Lange v. Robinson*, Alaska 1906, 148 F. 799, 802, 79 C. C. A. 1.

The discovered vein or lode on which a location can be based must be one that from all indications has a present or prospective value. *Montana, etc., R. Co. v. Migeon*, C. C. Mont. 1895, 68 F. 811, 814, affirmed *Migeon v. Montana Central R. Co.*, C. C. A. 1896, 77 F. 249. See, also, *Madison v. Octave Oil Co.*, 1908, 99 P. 176, 154 Cal. 768, 772.

A prospector or miner is not prohibited by this section from making a valid location until he has fully demonstrated that the vein or lode of quartz or other rock in place bearing gold or silver which he has discovered will pay all the expenses in removing, extracting, crushing, and reducing the ore, and leave a profit to himself. *Book v. Justice Min. Co.*, C. C. Nev. 1893, 58 F. 106, 124. See, also, *Fox v. Myers*, 1906, 86 P. 793, 29 Nev. 169, 185.

The discovery of mineral on a hillside may, as against other placer locators of the same ground, be sufficient for a court to say that there had been a discovery of mineral in place. *Migeon v. Montana Central R. Co.*, Mont. 1896, 77 F. 249, 255, 23 C. C. A. 156. See, also, *Ritter v. Lynch*, C. C. Nev. 1903, 123 F. 930, 936; *McShane v. Kenkle*, 1896, 44 P. 979, 18 Mont. 208, 214, 33 L. R. A. 851, 56 Am. St. Rep. 579.

When controversy is between two mineral claimants, the rule respecting the sufficiency of a discovery of mineral is more liberal than when it is between a mineral claimant and one seeking an agricultural entry, since where land is to be taken out of category of agricultural lands, the evidence of its mineral character should be reasonably clear. *Hagan v. Dutton*, 1919, 181 P. 578, 20 Ariz. 476. See, also, *Chrisman v. Miller*, Cal. 1905, 25 S. Ct. 468, 197 U. S. 313, 323, 49 L. Ed. 770; *Lange v. Robinson*, Alaska 1906, 148 F. 799, 803, 79 C. C. A. 1; *Steele v. Tanana Mines R. Co.*, Alaska 1906, 148 F. 678, 680, 78 C. C. A. 412.

The apex of a vein is not necessarily a point, but often a line of great length, and any portion of the apex on the course or strike of the vein found within

the limits of a claim is a sufficient discovery to entitle the locator to obtain title. *Larkin v. Upton*, 1892, 12 S. Ct. 614, 144 U. S. 19, 36 L. Ed. 330, affirming *Upton v. Larkin*, 17 P. 728, 7 Mont. 449. See, also, *Debney v. Iles*, 1907, 3 Alaska 438.

Even slight indications of a defined and mineral bearing ledge have been held sufficient to support a location of a valid mining claim. *Montana, etc., R. Co. v. Migeon*, C.C.Mont.1895, 68 F. 811, 813, affirmed *Migeon v. Montana Cent. R. Co.*, C.C.A.1896, 77 F. 249.

A valid location may be made of a ledge deep in the ground and appearing at the surface, not as ore, but as vein matter only. *Burke v. McDonald*, 1892, 2 Idaho 1022, 29 P. 98. See, also, *Hayes v. Lavagnino*, 1898, 53 P. 1029, 17 Utah 185, 196; *Shreve v. Copper Bell Min. Co.*, 1891, 28 P. 315, 11 Mont. 309; *Harrington v. Chambers*, 1881, 1 P. 362, 3 Utah 94, affirmed *Chambers v. Harrington*, 1884, 4 S.Ct. 428, 111 U.S. 350, 28 L.Ed. 452.

It is enough that gold and silver bearing rock showing on the surface is found. *Score v. Griffin*, 1905, 80 P. 331, 9 Ariz. 295, reversed on other grounds, 1905, 83 P. 350, 9 Ariz. 347.

There must be such a discovery of mineral as gives reasonable evidence of the presence of a vein or lode, or if a placer claim that it is valuable for such mining. *Chrisman v. Miller*, Cal.1905, 25 S. Ct. 468, 197 U.S. 313, 323, 49 L.Ed. 770. See, also, *Cascaden v. Bortolis*, Alaska 1908, 162 F. 267, 268, 89 C.C.A. 247, 15 Ann. Cas. 625.

To constitute discovery, it is necessary that minerals be found, under such circumstances and of such character that a reasonably prudent man, not necessarily a skilled miner, would be justified in expending time and money developing the claim, with the reasonable expectation of finding ore in paying quantities. *U. S. v. Lavenson*, D.C.Wash.1913, 206 F. 755. See, also, *Cameron v. U. S.*, 1920, 40 S.Ct. 410, 252 U.S. 450, 64 L.Ed. 659, affirming, C.C.A.Ariz. 250 F. 943; *Erhardt v. Boaro*, Colo.1885, 113 U.S. 527, 536, 5 S.Ct. 560, 28 L. Ed. 1113; *U. S. v. Ohio Oil Co.*, D.C.Wyo.1916, 240 F. 906, affirmed *U. S. v. Grass Creek Oil & Gas Co.*, C.C.A.1916, 236 F. 481; *Lange v. Robinson*, Alaska 1906, 148 F. 799, 802, 79 C.C.A. 1; *Shoshone Min. Co. v. Rutter*, Idaho 1898, 87 F. 801, 807, 31 C.C.A. 223, reversed on other grounds, 1900, 20 S.Ct. 726, 177 U.S. 505, 44 L.Ed. 864; *Ambergis Min. Co. v. Day*, 1906, 85 P. 109, 12 Idaho 108, 115; *Behrends v. Goldsteen*, 1902, 1 Alaska 518, 525.

To constitute a discovery which will support the location of a gold placer claim as against another mineral claimant it is not necessary that gold should have been found thereon in paying quantity, but there must have been such a discovery of gold as gives reasonable evidence that the ground is valuable for placer mining, taking into consideration its character, location, and surroundings, and this implies not only that the conditions warrant a reasonably prudent man in so proceeding with such reasonable expectation but that the applicant for patent has that expectation.

Representative CHUDOFF. I just wanted to say, Mr. Jonas, that this is a long record and I cannot put my finger on it but, if you will go through the testimony on the Al Sarena case as taken in Portland, Oreg., you will find that the law has been stated innumerable times.

Representative JONAS. Pardon me. It has been somebody's opinion of what the law is that has been stated. I want the statute.

Representative CHUDOFF. I do not think that it is any harm to put it in, but this is not the first time that the law was discussed.

Representative JONAS. You know that lawyers cannot always agree on what the law means. That is why we have courts.

Representative CHUDOFF. I agree definitely on that.

Representative JONAS. I would like to know a little more than I know now as to what a person has to do to qualify for a patent. We have no testimony on that.

Representative CHUDOFF. I think the law speaks for itself and you do not need it in the record. It is in the United States Code. If you want it in, I see no harm in that.

Representative JONAS. I could go to the library and look it up.

Representative CHUDOFF. Under the law, anybody that paid \$5 an acre and could prove that there was enough mineral content in the land so that a prudent man would mine it—I think that is broad enough—would get a patent.

Representative JONAS. I think there is more to it. You must file a claim after a discovery.

Senator NEUBERGER. May I ask several questions of the witness?

Senator SCOTT. Senator Neuberger.

We are glad to have Senator Dworshak back with us.

Senator NEUBERGER. Mr. Appling, in your testimony, I think, if I can recall it, just recently you said you were not certain of the law in answer to one question, and then you said you had never done mining-claim work prior to this case. Am I correct?

Senator Goldwater said, in addressing you, that he was sorry that you had not had down-to-earth experience in administration of the claims. Do you recall that?

Mr. APPLING. Yes, sir.

Senator NEUBERGER. In view of all those circumstances, do you think it strange that a high official of the Interior Department would be granting patents to these lands solely on the basis of a telephone conversation to you?

Mr. APPLING. Well, I would like to be excused from the question, if I may, for the reason that I don't understand all the background material on it. My job in the matter was that of sampling the claims and, as I understood it, my only job was to see what the values were. I presume that he was basing that on my report on the value rather than my opinion.

Senator NEUBERGER. You do not think it was strange that anyone should base granting patents to these lands solely on the basis of a telephone conversation with you, in view of your admitted inexperience in this matter?

Mr. APPLING. Well, my job there was, as I say, reporting the mineral values. I think my experience and qualifications are sufficient for that. If it involved points of law, yes, I would say it would be strange.

Senator NEUBERGER. Mr. Chairman, I would like to answer Senator Goldwater briefly because his remarks were not questions to Mr. Appling but they were, in effect, a statement or speech or whatever you want to call it, and Secretary Chapman was under attack. I can understand the desire to shift the scenery so far as this issue is concerned, but I think we had better get back to the core of the issue. The core of the issue, Mr. Chairman, is this:

While Mr. Chapman, who was attacked here today or criticized, was Secretary of the Interior, these timberlands in the Rogue River National Forest remained in the possession of the United States Forest Service. After Mr. Chapman left office, these timberlands passed into the possession of the Al Sarena Timber Mining Co. That is the meat of the coconut.

Now, why did this take place? We have had on the witness stand a variety of career officials of various Federal agencies in both the Department of Agriculture and the Department of the Interior. They are men whose careers date back through Secretary McKay, Secretary Chapman, Secretary Krug, Secretary Ickes, Secretary Wilbur, and perhaps some of the men's careers date back even earlier.

These men have testified that in all their experience in the handling of mining claims, including mining claims on timberlands, that they have never encountered any such proceeding as this, regardless of the identity of the political party in control of the Government or who happened to be Secretary of the Interior.

The Senator from Arizona said that the loophole in the law regarding timberlands had finally been closed. Of course, that is not true. I submitted a minority report on the law which was passed last year, objecting to the fact that the loophole was not closed and that it still is possible, contrary to the claims made by the Senator from Arizona, for a mining patentee who gets patented lands, as the Al Sarena Co. did, to sell for commercial purposes the timber growing on that land.

The Senator from Arizona is wrong in other particulars of this case as well as to the law.

There is nothing which requires a Secretary of the Interior to overrule the United States Forest Service and his own Bureau of Land Management, as was done in this case. There is no reason why Secretary of the Interior should not let stand an adverse ruling on a mining claim by the Forest Service and the Bureau of Land Management, as was the situation in the Al Sarena case.

The Senator from Arizona and others are trying to make out that there was something obligatory in the law which compelled Secretary Chapman or his successor to act on this.

Let me point out that as long as no action was taken, the ruling of the United States Forest Service stood and the ruling of the Bureau of Land Management stood, and that ruling was that patents should not be granted because the assays conducted by the Forest Service and the Bureau of Land Management did not warrant granting patents.

The Forest Service is the agency that is charged by law with administering these lands in Rogue River National Forest. Now these lands are no longer forest lands. They are now private lands, as a result of the decision reached by the present Secretary of the Interior and his associates.

Again I emphasize that it is incorrect to say that there was anything illegal about letting the decision of the Forest Service and the Bureau of Land Management stand, and time and time again, through many administrations in the Interior Department, such decisions have been let stand.

I should like to say this in conclusion, Mr. Chairman:

The test of this matter is just in one brief question. If this procedure which the Department of the Interior has applied to the Al Sarena Co., of permitting that company to have a voice in who shall assay minerals on the mining claim it seeks, is proper, why does not the Interior Department go ahead and apply that to the thousands of other mining applicants on forest lands all over the United States? If that was proper procedure, why do they not apply that to others?

Then the further question occurs: If it was proper procedure, and they apply it to others, what will become of the national forests?

Representative JONAS. Will the Senator yield?

Senator NEUBERGER. Surely.

Representative JONAS. Is it not true that these claims were on appeal from the Hearing Examiner to Secretary Chapman and remained unacted upon by him for 18 months?

Senator NEUBERGER. And as long as he did not act upon them—  
Representative JONAS. You have stated that. I know that. But do you not think it is incumbent on an executive officer of the Government, where a citizen claims that he has been mistreated, to take action, either deny his claim for relief or grant it?

Senator NEUBERGER. There was no question of relief. These people wanted the timber.

Representative JONAS. That was the relief they asked. They were asking for a patent. He refused to either overrule or affirm the lower decision.

Senator NEUBERGER. As long as he did not, the decision of the Forest Service and the Bureau of Land Management, in very proper hearings, stood.

Representative JONAS. What redress does a citizen have if he cannot appeal to a proper administrative department of the Government to review what he claims are improper decisions?

Senator NEUBERGER. The Bureau of Land Management and the Forest Service are the proper agencies.

Representative JONAS. The law authorizes the Secretary of the Interior to make the final determination, and the only right that the citizen has is to appeal from the adverse ruling of the lower official. I think that if a proper case comes to the Secretary of the Interior on appeal from a citizen of the United States who claims that his rights have not been taken care of in the lower hearing, it is his duty to look at the case and either affirm the lower decision or reverse the lower decision, and not just pocket the thing or put it in his desk drawer and keep it there for 18 months.

Senator NEUBERGER. I have every confidence in Secretary Chapman, and particularly in the Forest Service and the Bureau of Land Management. These people had received the hearing that nearly everybody who goes onto Federal land and files a mining claim receives. The proper agencies concerned with the administration of that natural resource had ruled that they did not have a valid mining claim.

Representative JONAS. There is something strange about the procedure, because the hearing officer did not even want to make the decision. He sent his file to Washington and asked his superior to write the report.

Senator NEUBERGER. Because the mining company had walked out on a hearing, the kind of hearing that this man had given to hundreds of other mining applications.

Representative JONAS. Was that not strange procedure?

Senator NEUBERGER. The whole thing has been a strange procedure.

Representative JONAS. I think it required some strange or new procedures to have it corrected. I do not see anything wrong with the Secretary of the Interior asking the Bureau of Mines, which is particularly qualified to engage in mining operations or certainly qualified to know what is a mining operation, to take samples. I cannot see what is wrong with the Secretary bringing in a brandnew agency of the Government, in view of the controversy that had been raging below for 18 months with a lot of name calling between the claimant and these branches of the Government, which went to such an extent that the hearing officer did not even want to write the report because of the charges and countercharges that had been made.

Do you think it is altogether strange that the Secretary should bring in a brand new agency of the Government, one that is filled with career people in which no politics are supposed to be involved whatever?

The Director of the Bureau has been an officer of the Government for 37 years. What is wrong with the Secretary of the Interior bringing in that agency and saying to it, "Go out there and see that proper samples are taken so that both sides of this controversy can be heard and we can finally come to a determination based on facts and not on charges"?

Senator NEUBERGER. Do you think it is strange that the Secretary of the Interior should say that the mining company should virtually have a veto power over who makes the assay and that there is no money in the Federal budget to pay for this assay?

Representative JONAS. That is not what he said.

Senator NEUBERGER. He said the company should pay for its own assay.

Representative HOFFMAN. That is the law.

Representative JONAS. Is that not correct in all cases?

Senator NEUBERGER. No; it is not correct.

Representative JONAS. The Government does not pay for assays made by claimants.

Senator NEUBERGER. The Government does not pay for assays made on public lands.

Representative JONAS. I am talking about claimants. The Government does not discharge the debts of claimants. They have to prove their own cases and pay for their own assays.

Senator NEUBERGER. In other words, when an assay is taken on Government land, then you believe that the claimant should furnish his own assay and pay for it and that should be determinative?

Representative JONAS. I did not say determinative.

Senator NEUBERGER. However, it was in this case.

Representative JONAS. No. The Secretary had before him the Hattan report and these reports also.

Senator NEUBERGER. And he allowed the claimant's own assay to overrule the Hattan report and Forest Service report.

Representative JONAS. If he had not done so, then the claimant would have contended that he had not received justice yet and we would still have a controversy, would we not?

Senator NEUBERGER. No; the Forest Service would have been upheld and the BLM would have been upheld.

Senator GOLDWATER. Where there is such a controversy raging, where the claimant is dissatisfied with assays made by the Government and the Government is dissatisfied with assays made by the claimant, what is wrong, and why this continual talk about this being some unusual and strange procedure and because it is new it therefore is wrong? What is wrong with the Government or the Secretary of the Interior saying to the Bureau of Mines, "You have not been in this controversy. You have not been charged with any wrongdoing. Nobody is mad at you. You are an independent agency of the Government filled up with career employees. You go out there and see that samples are taken and you have them assayed or you see that they are assayed by a proper party"?

Representative JONAS. They said, "You pick an assay firm that is satisfactory to both sides."

Senator NEUBERGER. What is the difference? If it has to be satisfactory to both sides the claimant had a veto power. We had testimony under oath from Mr. Volin that he recommended two west coast firms which the company rejected.

Representative JONAS. He recommended, but he admitted himself he did not insist upon them.

Senator NEUBERGER. He said if the final say had been with him he would have taken one of those two firms, if I am not mistaken.

Representative JONAS. He said, in response to questions I asked him, that he accepted the responsibility himself of selecting the Williams Co. and that he did not press upon the company the selection of one of the western assay houses.

Senator NEUBERGER. After this recommendations had been flatly rejected by the company.

Representative JONAS. I beg your pardon, sir. He positively testified they were not rejected. He said they offered countersuggestions and he went along with the countersuggestions.

Senator NEUBERGER. They certainly did not accept his recommendations. I do not know what other language there is.

Representative JONAS. There is quite a difference between Mr. Volin standing up and insisting upon the use of a western assay house and going along with the countersuggestion.

Senator NEUBERGER. Because he was under instructions from his superior that the company had to agree.

Representative JONAS. No; he was under simple instructions that he select an assay house that was satisfactory to both sides of a controversy. What can be fairer than that?

Senator NEUBERGER. Could he have selected someone the company did not agree with?

Representative JONAS. He did not offer but two assay houses and the company had experience with both of those and did not like them.

Senator NEUBERGER. Then he could not select anybody with which the company did not agree. You have answered the question.

Representative JONAS. There were scores of other assay houses out in the Far West, I would assume.

Senator NEUBERGER. So they took someone from Mobile, Ala., 3,000 miles from the claim, in the hometown of the company concerned.

Representative JONAS. That is correct, and the only thing I object to is your constant contention that the Secretary of the Interior was responsible for that selection, when I say it was a career employee of the Bureau of Mines.

Senator NEUBERGER. Acting within his instructions.

Representative JONAS. Who had complete authority to make a selection that he thought was satisfactory, just so it was agreeable with both sides.

Senator NEUBERGER. Why do you think, Congressman, that the instructions said the company had to pay for the assay?

Representative JONAS. They did not say it had to pay. I think the instruction said, "The company will pay for the assay. Do not obligate the Government for any expenditure of money."

Senator NEUBERGER. I wonder who paid for the earlier assays when the company was claiming this?

Representative JONAS. I imagine the company paid for all of the assays it had made by the Williams Co., and the Bureau of Land Management probably or the Forest Service probably paid for the assays they had taken. That would be an assumption. I have no way of knowing.

Senator NEUBERGER. Do you think when there is at stake timber worth perhaps a quarter of a million dollars that the Government should not pay a few dollars for its own assay?

Representative JONAS. I think the Government had paid money for assays. The Hattan assays, I would assume, the Government did pay for.

Senator NEUBERGER. Why did they not pay for this assay?

Representative JONAS. I do not know. Maybe you have some point. Maybe the Government should have paid for them, but I still do not see anything obligatory in the instructions that the Secretary issued to Mr. Volin. He had complete freedom of choice and freedom of action. Nobody pressured him into doing anything. He was not instructed and no suggestion was made by the Department of the Interior that the Williams Co. be selected. Yet in all of the inferences that can be drawn from this hearing, and it is even in this statement that I read this afternoon, there is the inference that Solicitor Davis had these samples sent to Alabama, 3,000 miles away from the scene, when he did no such thing, and the record clearly shows that all he said to Mr. Volin was, "You send a representative of the Bureau of Mines out there to see that proper samples are taken and then you see to it that these samples are assayed by a reputable assay house that is acceptable to both sides." I see nothing wrong with the procedure up to that point.

Senator NEUBERGER. A privilege never before granted, if we are not incorrect, to any other mining applicant on our forests and public lands of all the thousands and thousands of applicants that there are and have been; and you do not regard that as extraordinary, although the career people who testified did say it was extraordinary in all their experience?

Representative JONAS. They did not say it was extraordinary. They said they had never been called upon to do this before.

Senator NEUBERGER. I think Mr. Volin said it was extraordinary.

Representative JONAS. If I were a citizen with a claim against the Government I would feel I was entitled to have a say-so in the assay house that was going to make the final assay or final determination of what was in the sample.

Senator NEUBERGER. In other words, you think this procedure was fair?

Representative JONAS. I think it is fair so far as what we are talking about now. I see nothing wrong in the instructions that the Secretary issued and I see nothing wrong in his bringing the Bureau of Mines into the picture.

Senator NEUBERGER. Why does not your side of the table, then, bring in a bill authorizing this procedure in the future for other mining applicants on our national forests?

Representative JONAS. I do not think a bill is necessary. Congress cannot tell Secretaries of the Interior what assay houses to use in determining assays. I do not think that would be proper for a congressional act.

Representative JONAS. They said, "You pick an assay firm that is satisfactory to both sides."

Senator NEUBERGER. What is the difference? If it has to be satisfactory to both sides the claimant had a veto power. We had testimony under oath from Mr. Volin that he recommended two west coast firms which the company rejected.

Representative JONAS. He recommended, but he admitted himself he did not insist upon them.

Senator NEUBERGER. He said if the final say had been with him he would have taken one of those two firms, if I am not mistaken.

Representative JONAS. He said, in response to questions I asked him, that he accepted the responsibility himself of selecting the Williams Co. and that he did not press upon the company the selection of one of the western assay houses.

Senator NEUBERGER. After this recommendations had been flatly rejected by the company.

Representative JONAS. I beg your pardon, sir. He positively testified they were not rejected. He said they offered countersuggestions and he went along with the countersuggestions.

Senator NEUBERGER. They certainly did not accept his recommendations. I do not know what other language there is.

Representative JONAS. There is quite a difference between Mr. Volin standing up and insisting upon the use of a western assay house and going along with the countersuggestion.

Senator NEUBERGER. Because he was under instructions from his superior that the company had to agree.

Representative JONAS. No; he was under simple instructions that he select an assay house that was satisfactory to both sides of a controversy. What can be fairer than that?

Senator NEUBERGER. Could he have selected someone the company did not agree with?

Representative JONAS. He did not offer but two assay houses and the company had experience with both of those and did not like them.

Senator NEUBERGER. Then he could not select anybody with which the company did not agree. You have answered the question.

Representative JONAS. There were scores of other assay houses out in the Far West, I would assume.

Senator NEUBERGER. So they took someone from Mobile, Ala., 3,000 miles from the claim, in the hometown of the company concerned.

Representative JONAS. That is correct, and the only thing I object to is your constant contention that the Secretary of the Interior was responsible for that selection, when I say it was a career employee of the Bureau of Mines.

Senator NEUBERGER. Acting within his instructions.

Representative JONAS. Who had complete authority to make a selection that he thought was satisfactory, just so it was agreeable with both sides.

Senator NEUBERGER. Why do you think, Congressman, that the instructions said the company had to pay for the assay?

Representative JONAS. They did not say it had to pay. I think the instruction said, "The company will pay for the assay. Do not obligate the Government for any expenditure of money."

Senator NEUBERGER. I wonder who paid for the earlier assays when the company was claiming this?

Representative JONAS. I imagine the company paid for all of the assays it had made by the Williams Co., and the Bureau of Land Management probably or the Forest Service probably paid for the assays they had taken. That would be an assumption. I have no way of knowing.

Senator NEUBERGER. Do you think when there is at stake timber worth perhaps a quarter of a million dollars that the Government should not pay a few dollars for its own assay?

Representative JONAS. I think the Government had paid money for assays. The Hattan assays, I would assume, the Government did pay for.

Senator NEUBERGER. Why did they not pay for this assay?

Representative JONAS. I do not know. Maybe you have some point. Maybe the Government should have paid for them, but I still do not see anything obligatory in the instructions that the Secretary issued to Mr. Volin. He had complete freedom of choice and freedom of action. Nobody pressured him into doing anything. He was not instructed and no suggestion was made by the Department of the Interior that the Williams Co. be selected. Yet in all of the inferences that can be drawn from this hearing, and it is even in this statement that I read this afternoon, there is the inference that Solicitor Davis had these samples sent to Alabama, 3,000 miles away from the scene, when he did no such thing, and the record clearly shows that all he said to Mr. Volin was, "You send a representative of the Bureau of Mines out there to see that proper samples are taken and then you see to it that these samples are assayed by a reputable assay house that is acceptable to both sides." I see nothing wrong with the procedure up to that point.

Senator NEUBERGER. A privilege never before granted, if we are not incorrect, to any other mining applicant on our forests and public lands of all the thousands and thousands of applicants that there are and have been; and you do not regard that as extraordinary, although the career people who testified did say it was extraordinary in all their experience?

Representative JONAS. They did not say it was extraordinary. They said they had never been called upon to do this before.

Senator NEUBERGER. I think Mr. Volin said it was extraordinary.

Representative JONAS. If I were a citizen with a claim against the Government I would feel I was entitled to have a say-so in the assay house that was going to make the final assay or final determination of what was in the sample.

Senator NEUBERGER. In other words, you think this procedure was fair?

Representative JONAS. I think it is fair so far as what we are talking about now. I see nothing wrong in the instructions that the Secretary issued and I see nothing wrong in his bringing the Bureau of Mines into the picture.

Senator NEUBERGER. Why does not your side of the table, then, bring in a bill authorizing this procedure in the future for other mining applicants on our national forests?

Representative JONAS. I do not think a bill is necessary. Congress cannot tell Secretaries of the Interior what assay houses to use in determining assays. I do not think that would be proper for a congressional act.

Representative **HOFFMAN**. No, and when an executive officer down there does recommend somebody for business they have a congressional committee on his neck right away, even though it has been customary in the city they have been talking about to divide the business between a Democratic and a Republican organization.

Representative **CHUDOFF**. I think if they went to Albany and had a Government assay maybe we would not be here today.

Representative **JONAS**. If I had been Mr. Volin I do not think I would have sent them to Alabama. I would have insisted on the selection of an assay house that had never assayed samples from this claim.

Senator **NEUBERGER**. He did not have the latitude to do that.

Representative **JONAS**. He did have. He did not so try. He so testified. Let us be fair about it. I asked him the question and he responded to it frankly. I said, "Do you not feel that you have to assume the responsibility for the selection of the Williams Co.?"

He said, "I will have to assume that responsibility."

Senator **NEUBERGER**. He said if the choice had been his he would have taken 1 of the 2 west coast assay houses.

Representative **JONAS**. He did not try it.

Senator **NEUBERGER**. The choice was not his.

Representative **HOFFMAN**. Of course, it was not. Why should it have been?

Senator **NEUBERGER**. Because he was representing the Government. It was the Government's interest at stake.

Representative **HOFFMAN**. Under the law and all fair and decent procedure, you would deny the defendant a chance even to have an attorney or to be represented?

Senator **NEUBERGER**. To be represented by an attorney.

Representative **HOFFMAN**. You would have an assistant prosecutor represent him.

Senator **NEUBERGER**. An assay is a proceeding to protect the Government's interest if there is not mineralization.

Representative **HOFFMAN**. And also to protect the claimant if there is.

Senator **NEUBERGER**. He should not have a stake in the selection of the assay house if that has not been vouchsafed to by other claimants of mining claims on our national forests.

Representative **HOFFMAN**. You yourself have appealed to executive officers with reference to timber sales.

Senator **NEUBERGER**. Yes; in support of competitive sales, where the Government would get the highest price for the timber sold and where the person offering the maximum price would get it, whoever he might be, and not where the timber would go for nothing.

Representative **JONAS**. I would like you, sir, to understand me: I am not defending the selection of Williams. I do not think I would have agreed to the Williams firm if I had been Mr. Volin. All I am saying is that under the instructions from the Secretary of the Interior it looks to me as though Mr. Volin had a perfect right to offer other suggestions and to go much further than he did in trying to get the company to agree to an assay house that had not had any experience with this claim at all.

Representative **HOFFMAN**. May I get this law in?

Senator **SCOTT**. Do not read it.

Representative HOFFMAN. No, no. It is Title 43, Public Lands: Interior, revised 1954. It is the Code of Federal Regulations, beginning with "Procedure to obtain patent," and it begins with section 185.38 and runs over to and includes section 185.64.

May that be printed in the record somewhere? It is the regulations of the Department.

Representative CHUDOFF. Mr. Hoffman, I have no objection, except I would like to know, No. 1, whether that regulation was effective on January 6, 1954, when this controversy arose, because it would not be binding after January 6, 1954.

Representative HOFFMAN. It was in force then and is in force today.

Representative CHUDOFF. January 6, 1954?

Representative HOFFMAN. Yes.

Representative CHUDOFF. What is the date of the regulation? It might be after the controversy.

Representative HOFFMAN. No, no, no. It goes as far back as I could go. I think it was back in 1860 or sometime in there it began.

Representative CHUDOFF. Is there not a section of that code that provides that the Forest Service, the Department of Agriculture, shall represent the Government in making assays of mineral claims on public lands? I think that is part 205. I think we ought to have that, too.

Representative HOFFMAN. I am putting in all the regulations which have to do with the procedure to obtain a patent. If there is anything else you want in, put it in. There is the whole procedure. There is no reason why it should not be in. It is the law. Can those be printed, Mr. Chairman?

Senator SCOTT. Yes.

(The material referred to follows:)

## TITLE 43—PUBLIC LANDS: INTERIOR

### CHAPTER I—BUREAU OF LAND MANAGEMENT

\* \* \* \* \*

#### SUBPART D—PROCEDURE TO OBTAIN PATENT

AUTHORITY: §§ 185.38 to 185.72 issued under R. S. 2478; 43 U. S. C. 1201.

#### LODE CLAIMS

§ 185.38 *Application for survey.* The claimant is required, in the first place, to have a correct survey of his claim made under authority of the proper cadastral engineer, such survey to show with accuracy the exterior surface boundaries of the claim, which boundaries are required to be distinctly marked by monuments on the ground.<sup>1</sup>

§ 185.39 *Survey must be made subsequent to recording notice of location.* The survey and plat of mineral claims required to be filed in the proper land office with application for patent must be made subsequent to the recording of the location of the claim (if the laws of the State or Territory or the regulations of the mining district require the notice of location to be recorded), and when the original location is made by survey of a mineral surveyor such location survey can not be substituted for that required by the statute, as above indicated.<sup>2</sup>

<sup>1</sup> Application for authorization of survey should be made to the cadastral engineer of the appropriate area Cadastral Engineering Office. In States for which there is no area office, applications for survey should be made to the Director of the Bureau of Land Management, Washington, D. C.

<sup>2</sup> All matters, relating to the duties of mineral surveyors, and to the field and office procedure to be observed in the execution of mineral surveys, are set forth in Chapter X of the Manual of Instructions for the Survey of the Public Lands of the United States, 1947.

§ 185.40 *Plats and field notes of mineral surveys.* When the patent is issued, one copy of the plat and field notes shall accompany the patent and be delivered to the patentee.

§ 185.41 *Particulars to be observed in mineral surveys.* (a) The following particulars should be observed in the survey of every mining claim:

(1) The exterior boundaries of the claim, the number of feet claimed along the vein, and, as nearly as can be ascertained, the direction of the vein, and the number of feet claimed on the vein in each direction from the point of discovery or other well-defined place on the claim should be represented on the plat of survey and in the field notes.

(2) The intersection of the lines of the survey with the lines of conflicting prior surveys should be noted in the field notes and represented upon the plat.

(3) Conflicts with unsurveyed claims, where the applicant for survey does not claim the area in conflict, should be shown by actual survey.

(4) The total area of the claim embraced by the exterior boundaries should be stated, and also the area in conflict with each intersecting survey, substantially as follows:

	<i>Acres</i>
Total area of claim-----	10.50
Area in conflict with survey No. 302-----	1.56
Area in conflict with survey No. 948-----	2.33
Area in conflict with Mountain Maid lode mining claim, unsurveyed----	1.48

(b) It does not follow that because mining surveys are required to exhibit all conflicts with prior surveys the areas of conflict are to be excluded. The field notes and plat are made a part of the application for patent, and care should be taken that the description does not inadvertently exclude portions intended to be retained. The application for patent should state the portions to be excluded in express terms.

§ 185.42 *Certificate of expenditures and improvements.* (a) The claimant at the time of filing the application for patent, or at any time within the 60 days of publication, is required to file with the manager a certificate of the office cadastral engineer that not less than \$500 worth of labor has been expended or improvements made, by the applicant or his grantors, upon each location embraced in the application, or if the application embraces several contiguous locations held in common, that an amount equal to \$500 for each location has been so expended upon, and for the benefit of, the entire group; that the plat filed by the claimant is correct; that the field notes of the survey, as filed, furnish such an accurate description of the claim as will, if incorporated in a patent, serve to identify the premises fully, and that such reference is made therein of natural objects or permanent monuments as will perpetuate and fix the locus thereof.

(b) In case of a lode and millsite claim in the same survey the expenditure of \$500 must be shown upon the lode claim.

§ 185.43 *Mineral surveyor's report of expenditures and improvements.* (a) In the mineral surveyor's report of the value of the improvements all actual expenditures and mining improvements made by the claimant or his grantors, having a direct relation to the development of the claim, must be included in the estimate.

(b) The expenditures required may be made from the surface or in running a tunnel, drifts, or crosscuts for the development of the claim. Expenditures for drill holes for the purpose of prospecting and securing data upon which further development of a group of lode mining claims held in common may be based are available toward meeting the statutory provision requiring an expenditure of \$500 as a basis for patent as to all of the claims of the group situated in close proximity to such common improvement. Improvements of any other character, such as buildings, machinery, or roadways, must be excluded from the estimate, unless it is shown clearly that they are associated with actual excavations, such as cuts, tunnels, shafts, etc., are essential to the practical development of and actually facilitate the extraction of mineral from the claim.

(c) Improvements made by a former locator who has abandoned his claim can not be included in the estimate, but should be described and located in the notes and plat.

§ 185.44 *Supplemental proof of expenditures and improvements.* If the value of the labor and improvements upon a mineral claim is less than \$500 at the time of survey the mineral surveyor may file with the cadastral engineer supplemental proof showing \$500 expenditure made prior to the expiration of the period of publication.

§ 185.45 *Amended mineral surveys.* (a) Inasmuch as amended surveys are ordered only by special instructions from the Bureau of Land Management, and the conditions and circumstances peculiar to each separate case and the object sought by the required amendment, alone govern all special matters relative to the manner of making such survey and the form and subject matter to be embraced in the field notes thereof, but few general rules applicable to all cases can be laid down.

(b) The expense of amended surveys, including amendment of plat and field notes, and office work in the Bureau of Land Management office will be borne by the claimant.

(c) The amended survey must be made in strict conformity with, or be embraced within, the lines of the original survey. If the amended and original surveys are identical, that fact must be clearly and distinctly stated in the field notes. If not identical, a bearing and distance must be given from each established corner of the amended survey to the corresponding corner of the original survey. The lines of the original survey, as found upon the ground, must be laid down upon the preliminary plat in such manner as to contrast and show their relation to the lines of the amended survey.

§ 185.46 *Mineral surveyors may not act in certain matters.* The duty of a mineral surveyor in any particular case ceases when he has executed the survey and returned the field notes and preliminary plat, with his report, to the cadastral engineer. He will not be allowed to prepare for the mining claimant the papers in support of his application for patent. He is not permitted to combine the duties of surveyor and notary public in the same case by administering oaths. It is preferable that both preliminary and final oaths of assistants should be taken before some officer duly authorized to administer oaths, other than the mineral surveyor. In cases, however, where great delay, expense, or inconvenience would result from a strict compliance with this section, the mineral surveyor is authorized to administer the necessary oaths to his assistants, but in each case where this is done, he will submit to the proper cadastral engineer a full written report of the circumstances which required his stated action; otherwise he must have absolutely nothing to do with the case, except in his official capacity as surveyor. He will not employ field assistants interested therein in any manner.

CROSS REFERENCE: For practitioner disqualifications see § 1.5 of this title.

§ 185.47 *Parties who may not assist in making surveys.* The employing of claimants, their attorneys, or parties in interest, as assistants in making surveys of mineral claims will not be allowed.

§ 185.48 *Contract for surveys.* (a) The claimant is required, in all cases, to make satisfactory arrangements with the surveyor for the payment for his services and those of his assistants in making the survey, as the United States will not be held responsible for the same.<sup>\*</sup>

(b) Neither the cadastal engineer nor the area administrator has jurisdiction to settle differences relative to the payment of charges for field work, between mineral surveyors and claimants. These are matters of private contract and must be enforced in the ordinary manner, i. e., in the local courts. The Department has, however, authority to investigate charges affecting the official actions of mineral surveyors, and will, on sufficient cause shown, suspend or revoke their appointment.

§ 185.49 *Appointment of mineral surveyors.* (a) Pursuant to section 2334 of the Revised Statutes (30 U. S. C. 39), each area administrator will appoint as surveyors for the survey of mining claims applicants found to be competent, to the extent needed to meet the demand for that class of work. Each appointee shall qualify as prescribed by the area administrator and shall furnish a performance bond of not less than \$5,000 before entering on duty. Each mineral surveyor shall be eligible to survey mining claims in the States within the region in which he is appointed and in adjoining States. Each area administrator shall maintain a register showing the names and addresses of mineral surveyors appointed for the region and eligible for the survey of mining claims. The area administrator shall furnish the area administrator of each adjoining area with a copy of such register, and shall advise them of any changes therein.

(b) A mineral claimant may employ any United States mineral surveyor qualified as indicated in paragraph (a) of this section to make the survey of

<sup>\*</sup>All matters relating to the duties of mineral surveyors, and to the field and office procedure to be observed in the execution of mineral surveys, are set forth in Chapter X of the Manual of Instructions for the Survey of the Public Lands of the United States, 1947.

his claim. All expenses of the survey of mining claims and the publication of the required notices of application for patent are to be borne by the mining claimants.

§ 185.50 *Payment of charges of the public survey office.* With regard to the platting of the claim and other office work in the Bureau of Land Management office, including the preparation of the copies of the plat and field notes to be furnished the claimant, that office will make an estimate of the cost thereof, which amount the claimant will deposit with it to be passed to the credit of the fund created by "Deposits by Individuals for Surveying Public Lands."

§ 185.51 *Plat and notice to be posted on claim.* The claimant is required to post a copy of the plat of survey in a conspicuous place upon the claim, together with notice of his intention to apply for a patent therefor, which notice will give the date of posting, the name of the claimant, the name of the claim, the number of the survey, the mining district and county, and the names of adjoining and conflicting claims as shown by the plat survey.

§ 185.52 *Proof of posting on the claim.* After posting the said plat and notice upon the premises the claimant will file with the proper manager a copy of such plat and the field notes of survey of the claim, accompanied by the statement of at least two credible witnesses that such plat and notice are posted conspicuously upon the claim, giving the date and place of such posting, a copy of the notice so posted to be attached to and form a part of said statement.

§ 185.53 *Application for patent.* (a) At the time the proof of posting is filed, as required by § 185.53, the claimant must file an application for patent showing that he has the possessory right to the claim, in virtue of a compliance by himself (and by his grantors, if he claims by purchase) with the mining rules, regulations, and customs of the mining district, State, or Territory in which the claim lies, and with the mining laws of Congress, such statement to narrate briefly, but as clearly as possible, the facts constituting such compliance, the origin of his possession, and the basis of his claim to a patent. The application should contain a full description of the kind and character of the vein or lode and should state whether ore has been extracted therefrom; and if so, in what amount and of what value. It should also show the precise place within the limits of each of the locations embraced in the application where the vein or lode has been exposed or discovered and the width thereof. The showing in these regards should contain sufficient data to enable representatives of the Government to confirm the same by examination in the field and also enable the Bureau of Land Management to determine whether a valuable deposit of mineral actually exists within the limits of each of the locations embraced in the application.<sup>4</sup>

(b) Every application for patent, based on a mining claim located after August 1, 1946, shall state whether the claimant has or has not had any direct or indirect part in the development of the atomic bomb project. The application must set forth in detail the exact nature of the claimant's participation in the project, and must also state whether as a result of such participation he acquired any confidential, official information as to the existence of deposits of uranium, thorium, or other fissionable source materials in the lands covered by his application.

CROSS REFERENCE: For definition of fissionable source materials, see Atomic Energy Commission's regulation, 10 CFR 40.2.

§ 185.54 *Evidence of title.* (a) Each patent application must be supported by either a certificate of title or an abstract of title certified to by the legal custodian of the records of locations and transfers of mining claims or by an abstractor of titles. The certificate of title or certificate to an abstract of title must be by a person, association, or corporation authorized by the State laws to execute such a certificate and acceptable to the Bureau of Land Management.

(b) A certificate of title must conform substantially to Form 4-1246.

(c) Each certificate of title or abstract of title must be accompanied by single copies of the certificate or notice of the original location of each claim, and of the certificates of amended or supplemental locations thereof, certified to by the legal custodian of the record of mining locations.

(d) A certificate to an abstract of title must state that the abstract is a full, true, and complete abstract of the location certificate or notice, and all amendments thereof, and of all deeds, instruments, or actions appearing of record purporting to convey or to affect the title to each claim.

<sup>4</sup> Blank forms of applications for mineral patents are not furnished by the Bureau of Land Management.

The application should be filed in duplicate. See 52 L. D. 199.

(e) The application for patent will be received and filed if the certificate of title or an abstract is brought down to a day reasonably near the date of the presentation of the application and shows full title in the applicant, who must as soon as practicable thereafter file a supplemental certificate of title or an abstract brought down so as to include the date of the filing of the application.

§ 185.55 *Evidence relating to destroyed or lost records.* In the event of the mining records in any case having been destroyed by fire or otherwise lost, a statement of fact should be made, and secondary evidence of possessory title will be received, which may consist of the statement of the claimant, supported by those of any other parties cognizant of the facts relative to his location, occupancy, possession, improvements, etc.; and in such case of lost records, any deeds, certificates of location or purchase, or other evidence which may be in the claimant's possession and tend to establish his claim, should be filed.

§ 185.56 *Publication in newspaper.* Upon the receipt of applications for mineral patent and accompanying papers, if no reason appears for rejecting the application, the manager will, at the expense of the claimant (who must furnish the agreement of the publisher to hold applicant for patent alone responsible for charges of publication), publish a notice of such application for the period of 60 days in a newspaper published nearest to the claim. If the notice is published in a daily paper, it shall be published in the Wednesday issue for nine consecutive weeks; if weekly, in nine consecutive issues; if semi-weekly or tri-weekly, in the issue of the same day of each week for nine consecutive weeks. In all cases the first day of issues shall be excluded in estimating the period of 60 days.

§ 185.57 *Contents of published notice.* The notices published as required by the preceding section must embrace all the data given in the notice posted upon the claim. In addition to such data the published notice must further indicate the locus of the claim by giving the connecting line, as shown by the field notes and plat, between a corner of the claim and a United States mineral monument or a corner of the public survey, and thence the boundaries of the claim by courses and distances.

§ 185.58 *Manager to designate newspaper.* The manager shall have the notice of application for patent published in a paper of established character and general circulation, to be by him designated as being the newspaper published nearest the land.

§ 185.59 *Proof by applicant of publication and posting.* After the 60-day period of newspaper publication has expired, the claimant will furnish from the office of publication a sworn statement that the notice was published for the statutory period, giving the first and last day of such publication, and his own statement showing that the plat and notice aforesaid remained conspicuously posted upon the claim sought to be patented during said 60-day publication, giving the dates.

§ 185.60 *Payment of purchase price and statement of charges and fees.* Upon the filing of the statement required by the preceding section, the manager will, if no adverse claim was filed in his office during the period of publication, and no other objection appears, permit the claimant to pay for the land to which he is entitled at the rate of \$5 for each acre and \$5 for each fractional part of an acre, except as otherwise provided by law, issuing the usual receipt therefor. The claimant will also make a statement of all charges and fees paid by him for publication and surveys, together with all fees and money paid the manager of the land office, and a patent shall be issued thereon if found regular.

§ 185.61 *Trustee to disclose nature of trust.* Any party applying for patent as trustee must disclose fully the nature of the trust and the name of the cestui que trust; and such trustee, as well as the beneficiaries, must furnish satisfactory proof of citizenship; and the names of beneficiaries, as well as that of the trustee, must be inserted in the final certificate of entry.

§ 185.62 *Allowance of entry; transfers subsequent to application not recognized.* No entry will be allowed until the manager has satisfied himself, by careful examination, that proper proofs have been filed upon the points indicated in the law and official regulations.<sup>6</sup> Transfers made subsequent to the filing of the application for patent will not be considered, but entry will be allowed and patent issued in all cases in the name of the applicant for patent, the title conveyed by the patent, of course, in each instance inuring to the transferee of such applicant where a transfer has been made pending the application for patent.

<sup>6</sup> If the proof is found regular, certificate should issue even though a protest may have been filed but the claimant should be advised that patent will be withheld by the Bureau of Land Management pending a report by the authorized officer upon the bona fides of the claim.

§ 185.63 *Failure to prosecute application with diligence.* The failure of an applicant for patent to a mining claim to prosecute his application to completion, by filing the necessary proofs and making payment for the land, within a reasonable time after the expiration of the period of publication of notice of the application, or after the termination of adverse proceedings in the courts, constitutes a waiver by the applicant of all rights obtained by the earlier proceedings upon the application.

§ 185.64 *Resumption of patent proceedings after suspension due to adverse claim or protest.* The proceedings necessary to the completion of an application for patent to a mining claim, against which an adverse claim or protest has been filed, if taken by the applicant at the first opportunity afforded therefor under the law and departmental practice, will be as effective as if taken at the date when, but for the adverse claim or protest, the proceedings on the application could have been completed.

#### MILL SITES

§ 185.65 *Application for patent.* (a) Land entered as a mill site must be shown to be nonmineral. Mill sites are simply auxiliary to the working of mineral claims. Section 2337 of the Revised Statutes (30 U. S. C. 42) provides for the patenting of mill sites.

(b) To avail themselves of this provision of law, parties holding the possessory right to a vein or lode claim, and to a piece of nonmineral land not contiguous thereto for mining or milling purposes, not exceeding the quantity allowed for such purpose by section 2337, or prior laws, under which the land was appropriated, the proprietors of such vein or lode may file in the proper land office their application for a patent, which application, together with the plat and field notes, may include, embrace, and describe, in addition to the vein or lode claim, such noncontiguous mill site, and after due proceedings as to notice, etc., a patent will be issued conveying the same as one claim. The owner of a patented lode may, by an independent application, secure a mill site, if good faith is manifest in its use or occupation in connection with the lode and no adverse claim exists.

§ 185.66 *Mill sites applied for in conjunction with a lode claim.* Where the original survey includes a lode claim and also a mill site the lode claim should be described in the plat and field notes as "Sur. No. 37, A," and the mill site as "Sur. No. 37, B," or whatever may be its appropriate numerical designation; the course and distance from a corner of the mill site to a corner of the lode claim to be invariably given in such plat and field notes, and a copy of the plat and notice of application for patent must be conspicuously posted upon the mill site as well as upon the vein or lode claim for the statutory period of 60 days. In making the entry no separate receipt or certificate need be issued for the mill site, but the whole area of both lode and mill site will be embraced in one entry, the price being \$5 for each acre and fractional part of an acre embraced by such lode and mill site claim.

§ 185.67 *Mill sites for quartz mills or reduction works.* In case the owner of a quartz mill or reduction works is not the owner or claimant of a vein or lode claim the law permits him to make application therefor in the same manner prescribed for mining claims, and after due notice and proceedings, in the absence of a valid adverse filing, to enter and receive a patent for his mill site at the price named in the preceding section.

§ 185.68 *Proof of nonmineral character.* In every case there must be satisfactory proof that the land claimed as a mill site is not mineral in character, which proof may, where the matter is unquestioned, consist of the statement of two or more persons capable from acquaintance with the land to testify understandingly.

#### PLACERS

§ 185.69. *Application for patent.* (a) The proceedings to obtain patents for placer claims, including all forms of mineral deposits excepting veins of quartz or other rock in place, are similar to the proceedings prescribed for obtaining patents for vein or lode claims; but where a placer claim shall be upon surveyed lands, and conforms to legal subdivisions, no further survey or plat will be required. Where placer claims cannot be conformed to legal subdivisions, survey and plat shall be made as on unsurveyed lands.

(b) The price of placer claims is fixed at \$2.50 per acres or fractional part of an acre.

CROSS REFERENCE: For patents, generally, see Part 108 of this chapter.

§ 185.70 *Proof of improvements for patent.* The proof of improvements must show their value to be not less than \$500 and that they were made by the applicant for patent or his grantors. This proof should consist of the statement of two or more disinterested witnesses.

§ 185.71 *Data to be filed in support of application.* (a) In placer applications, in addition to the recitals necessary in and to both vein or lode and placer applications, the placer application should contain, in detail, such data as will support the claim that the land applied for is placer ground containing valuable mineral deposits not in vein or lode formation and that title is sought not to control water courses or to obtain valuable timber but in good faith because of the mineral therein. This statement, of course, must depend upon the character of the deposit and the natural features of the ground, but the following details should be covered as fully as possible: If the claim be for a deposit of placer gold, there must be stated the yield per pan, or cubic yard, as shown by prospecting and development work, distance to bedrock, formation and extent of the deposit, and all other facts upon which he bases his allegation that the claim is valuable for its deposits of placer gold. If it be a building stone or other deposit than gold claimed under the placer laws, he must describe fully the kind, nature, and extent of the deposit, stating the reasons why same is by him regarded as a valuable mineral claim. He will also be required to describe fully the natural features of the claim: streams, if any, must be fully described as to their course, amount of water carried, fall within the claim; and he must state kind and amount of timber and other vegetation thereon and adaptability to mining or other uses.

(b) If the claim be all placer ground, that fact must be stated in the application and corroborated by accompanying proofs; if of mixed placers and lodes, it should be so set out, with a description of all known lodes situated within the boundaries of the claim. A specific declaration, such as is required by section 2333, Revised Statutes (30 U. S. C. 37) must be furnished as to each lode intended to be claimed. All other known lodes are, by the silence of the applicant, excluded by law from all claim by him, of whatsoever nature, possessory or otherwise.

(c) While these data are required as a part of the mineral surveyor's report in case of placers taken by special survey, it is proper that the application for patent incorporate these facts.

(d) Inasmuch as in case of claims taken by legal subdivisions, no report by a mineral surveyor is required, the claimant, in his application in addition to the data above required, should describe in detail the shafts, cuts, tunnels, or other workings claimed as improvements, giving their dimensions, value, and the course and distance thereof to the nearest corner of the public surveys.

(e) The statement as to the description and value of the improvements must be corroborated by the statements of two disinterested witnesses.\*

(f) Applications awaiting entry, whether published or not, must be made to conform to this part, with respect to proof as to the character of the land. Entries already made will be suspended for such additional proofs as may be deemed necessary in each case.

§ 185.72 *Applications for placers containing known lodes.* Applicants for patent to a placer claim, who are also in possession of a known vein or lode included therein, must state in their application that the placer includes such vein or lode. The published and posted notices must also include such statement. If veins or lodes lying within a placer location are owned by other parties, the fact should be distinctly stated in the application for patent and in all the notices. But in all cases whether the lode is claimed or excluded, it must be surveyed and marked upon the plat, the field notes and plat giving the area of the lode claim or claims and the area of the placer separately. An application which omits to claim such known vein or lode must be construed as a conclusive declaration that the application has no right of possession to the vein or lode. Where there is no known lode or vein, the fact must appear by the statement of two or more witnesses.

Senator NEUBERGER. Just to set the record straight regarding what Mr. Jonas said, the question as to whether Mr. Volin said this was an extraordinary situation, on page 472 Mr. Volin said, "Well, I regard this whole job as an extraordinary situation in that we had never

\*The proof showing must be made in duplicate. See 51 L. D. 205 and 52 L. D. 190.

done it before. We had instructions that we were to follow," et cetera. I will not read the whole thing, but Mr. Volin himself did use the word "extraordinary" and went on to explain why.

Representative JONAS. Mr. Chairman, I request permission to read into the record immediately following that the question I directed to Mr. Volin with respect to the assumption of responsibility as to the selection of the Williams Co. and his response to that question.

Senator SCOTT. You may proceed.

Representative JONAS. I will have to find that and will ask permission to put it in following the insertion of the Senator from Oregon. I do not want to hold up the committee. I will have to find it. I have it now, if you will permit me to put it in before we go any further.

Senator SCOTT. Yes.

Representative JONAS. Starting at the bottom of page 453 there is the following:

Representative JONAS. Was it not your responsibility as the independent umpire or the representative of the Government to inspect this sampling and supervise it, to agree upon the assayer to do the work?

Mr. VOLIN. I believe it was; yes, sir.

Representative JONAS. And do you feel that you discharged that responsibility and that duty to your entire satisfaction by the procedures you followed in the selection of Williams?

Mr. VOLIN. I was satisfied at the time, sir.

Representative JONAS. If anybody made a mistake in the selection or agreeing to the use of the A. W. Williams Co. to make this assay, you would have to take the responsibility of the mistake; would you not?

Mr. VOLIN. I am afraid so, sir.

Representative JONAS. Because you did it yourself, thinking it was the thing to do and the proper thing to do and the reasonable thing to do under the circumstances, but without any suggestion from Secretary McKay or anybody in his Department?

Mr. VOLIN. That is right.

Senator NEUBERGER. May I follow with this, Mr. Chairman, just so we have the full record?

Senator SCOTT. Yes, sir.

Senator NEUBERGER. This is on page 469:

Senator NEUBERGER. May I ask you this: In view of the experience of the Abbot Hanks Laboratory with samples taken on national forests and since it had been used by the United States Forest Service in similar situations, do you think it might have been preferable if these samples had been sent to the Abbot Hanks Laboratory?

Mr. VOLIN. My experience with Abbot Hanks was not on the basis of samples sent by the Forest Service but on previous work before I came to the Bureau of Mines. I knew that that is a reputable firm of long standing and I recommended it on that basis.

Senator NEUBERGER. And your recommendation of Abbot Hanks and the Annes Laboratories, I believe you mentioned, and Smith-Emery, your recommendation of those laboratories on the Pacific coast were rejected by the Al Sarena Co.?

Mr. VOLIN. That is right.

Representative CHUDOFF. Mr. Chairman, so we have everything in the record, I would like to offer in the record at this time, to supplement Mr. Hoffman's offer, from the 1949 edition of the Code of Federal Regulations, title 43, Public Lands: Interior, paragraph 205.9, which covers the notice to officers of the Department of Agriculture of answers, appeals, motions, orders, and decisions.

Senator SCOTT. That may be made a part of the record.

(The material referred to follows:)

§ 205.9 *Notice to officers of Department of Agriculture of answers, appeals, motions, orders, and decisions.* In all Government cases before managers involving lands or claims within a national forest, the regional attorney, Office of the Solicitor of the Department of Agriculture, shall be served with copies of all answers, appeals, motions, orders, and decisions required to be noted under the rules in cases of private contests. The proper officers of the Department of Agriculture shall have a right of appeal from any decision by the Bureau of Land Management and a right to take other like action in the same manner as a private contestant, and shall receive like notices of proceedings and decisions: *Provided, however,* That the Department of Agriculture shall not be required to take formal appeals from decisions of managers.

Representative HOFFMAN. That is all right. That is the one that requires 60 days within which to file their protest.

Representative CHUDOFF. I will read it to you.

Representative HOFFMAN. I can read it later.

Senator SCOTT. If all these things would not be read we would save a lot of time, but time does not seem to be of the essence.

Senator GOLDWATER. I had one question here that came to my mind.

Mr. Appling, you said, I believe in being asked about your conversation with Mr. Davis, that you told him that in your opinion there was justification in granting this patent, or words to that effect.

Mr. APPLING. I do not believe I said that. I think my statement was I considered the assays sufficiently good to warrant a program of exploration of the property.

Senator GOLDWATER. Do you have any way of knowing the size of that deposit or deposits?

Mr. APPLING. I have a map which shows the claims and the arrangement of the claims, and I know there is a considerable area involved.

Senator GOLDWATER. Has there ever been any determination by the Bureau of Mines as to the possible diameter or length of the deposit?

Mr. APPLING. No, sir. We haven't done that. I might be able to make a guess from the map.

Senator GOLDWATER. I ask that, Mr. Chairman, because someplace I have heard that this deposit was some 3,600 feet in diameter. I cannot recall where I heard that, but if he has such information I think it would be proper to be in the record.

Mr. REDWINE. Mr. Chairman, may we ask the witness if the map he is referring to now is the map that he previously put in the record?

Mr. APPLING. I believe a copy of this has been entered into the record; yes, Mineral Survey No. 879, Oregon. The maximum dimensions on this map are about, I would judge, 5,500, possibly 7,500, feet in one direction and 5,100 feet in the other direction. Those are maximum dimensions. I imagine that about 5,000 by 3,600 feet would be pretty close to the average dimensions.

Mr. REDWINE. Senator, may I interrupt at this point and ask the witness if he is describing now all of the 23 claims, or the 15 contested claims?

Mr. APPLING. I think this includes all of the 23.

Senator GOLDWATER. That was my understanding, too. I am talking about the whole project, not just the contested claims.

It appears to me necessary here to develop the fact that people in mining felt that there was a sizable body here and that people other than yourself have considered it to be worthy of exploration. Did

that fact enter into your mind when you suggested that it might be worthy of further exploration?

Mr. APPLING. Yes, sir; it did. In view of the size and the apparent size of the deposit and based on the assays that I saw, I would say there is justification for exploration.

Senator GOLDWATER. Let me ask you a question. You do not have to answer this. However, if you, with your mining experience, were looking for an investment would you consider this a good investment?

Mr. APPLING. It would take quite a bit more money than I would have to invest.

Senator GOLDWATER. I thought that might be involved in the answer, but let us assume that you were way past a GS-9 and you were able to afford something like this.

Mr. APPLING. That is a difficult question to answer. I know this: that if I had the funds to finance such exploration I would certainly take a closer look at it and I would go over it with much more detail than I did before. I would say with the results that I saw the assays were sufficiently encouraging for that. I would hate to go beyond that.

Senator GOLDWATER. Then, everything you have seen in your experience with this Al Sarena Mining Co. or claim would lead you to believe that there is sufficient value in the land to warrant a prudent man developing it or exploring it further?

Mr. APPLING. Yes, sir; I do. I would agree to that.

Senator GOLDWATER. That is all I have.

Mr. Chairman, of course I cannot let this opportunity pass to exchange pleasantries with my friend from Oregon. It seems that the only point we differ on is that he feels it is a good idea to have men in Government that cannot make up their minds.

Representative CHUDOFF. I just want to ask one question, Mr. Chairman.

Senator SCOTT. Before you ask that, we have had Senator Dworshak here with us for 4 or 5 different meetings and we have not had a word from him yet. I would like to give him an opportunity if he cares to speak.

Senator DWORSHAK. Mr. Chairman, I am not a member of the subcommittee. I have at intervals watched the development, and so far as I am concerned as a member of the full committee I shall do everything I can to terminate this rather shameful hearing which obviously has no other objective than to smear the Secretary of the Interior by innuendoes, and insinuations, and charges that he has been guilty of some malfeasance in the discharge of his duties. I think that it is the duty of our committee to hold hearings and not to continue them indefinitely. I think we ought to make an honest, sincere effort—and I question whether that has been done so far by this joint committee—to get the facts and then to present them to the two committees, the House Committee on Government Operations and the Senate Committee on Interior and Insular Affairs, so that they will have some jurisdiction and some control over the actions of their subcommittees.

I do not think that our Committee on Interior and Insular Affairs has ever authorized the appointment of this subcommittee and I am going to raise that question on Friday. I believe in orderly procedure

at all times and I think it was a shameful demonstration and an abuse of senatorial and congressional power to have held hearings in the Western States for many weeks without reaching any conclusions other than to clutter the pages of our press with publicity with the obvious objective of trying to smear somebody without bringing the facts before reputable jurisdictional committees of both the House and the Senate. Thank you.

Representative CHUDOFF. Will the Senator yield at that point? Does the Senator infer that the House Committee on Government Operations and this subcommittee have no jurisdiction over this matter?

Senator DWORSHAK. Whether you have or not, I question whether you have the right to continue indefinitely hearings when you are not reporting the facts. When do you expect to report the conclusions and findings of this committee?

Representative CHUDOFF. When we finish hearing the testimony of the witnesses.

Senator DWORSHAK. You have traveled all over the West.

Representative CHUDOFF. Will you let me finish?

Senator DWORSHAK. I am sorry.

Representative CHUDOFF. If the Senators will stop making speeches and allow us to question the witnesses I think we will be able to get finished.

Senator DWORSHAK. How many months or years will that take?

Representative CHUDOFF. I do not know, but if we keep having speeches by 4 or 5 Senators we will never get finished.

Senator SCOTT. In other words, you would stop looking at the height of the trees and the width of the trees?

Senator DWORSHAK. No, Mr. Chairman, I would not do that. I would think that under ordinary procedures it would be possible to call in witnesses and to get the pertinent and relevant information dealing with this particular problem. If there has been any abuse—and I am not saying that there has not been—I certainly think it is not in the interest of orderly procedure to drag out such hearings for weeks, and weeks, and weeks, without trying to bring them to some conclusion. If there has been any violation, if there has been malfeasance in the high Office of the Secretary of the Department of the Interior, then I think we ought to lay the facts on the table before the two committees in the House and the Senate and then we will take the proper action.

Representative CHUDOFF. You will not get the facts on the table with everybody making speeches.

Senator NEUBERGER. Mr. Chairman, just for Senator Dworshak's information—I know he will want this—he spoke about traveling around the West for weeks. I think this committee held hearings in the West for about 2 weeks on Federal timber policies. With the exception of about 5 hours of those 2 weeks spent on the Al Sarena case all the rest of those hearings was involved in a study, which was very largely noncontroversial, into the various aspects of managing, selling, and controlling Federal timber on Indian lands, on Forest lands, and on public domain lands; and I think at the most 5 hours of those 2 weeks were spent in the West on Al Sarena.

Representative CHUDOFF. As a matter of fact, Congressman Ellsworth said when he made his statement in Portland, when he testified

before this committee, that the committee was doing a wonderful job, the study was needed, and he hoped we would be able to work out something to meet the problem.

Representative HOFFMAN. Except he excepted the Sarena mining hearings; did he not?

Senator NEUBERGER. Yes.

Representative CHUDOFF. Of course, there was no controversy on the timber investigation.

Representative HOFFMAN. And he was so, so mistaken about the timber. May I get in the rest of the law, Mr. Chairman?

Senator SCOTT. Yes.

Representative CHUDOFF. Could I just ask the witness one question?

Senator SCOTT. Let Mr. Hoffman get the balance in the record.

Representative HOFFMAN. Title 30 of the United States Code, Chapter II: Mineral Lands and Regulations in General, beginning with section 21 over to 34, inclusive. That is the Federal statute.

Representative CHUDOFF. I want to get back to the last question you answered, Mr. Appling. One of the Senators, I believe, asked you whether or not in your opinion the assays justified a prudent man developing the minerals on that particular land, and you said they did; is that right?

Mr. APPLING. I believe he stated exploration. They are different terms.

Representative CHUDOFF. However, you know that this land has not been mined since 1943, do you not?

Mr. APPLING. I don't know.

Representative CHUDOFF. You know personally it has not been mined since 1950?

Mr. APPLING. As far as I know it has not.

Representative CHUDOFF. That is all.

Mr. COBURN. Mr. Chairman, pursuing that question and Senator Goldwater's a little further, could I ask him a question?

Senator SCOTT. Mr. Coburn.

Mr. COBURN. Mr. Appling, this goes to the old 1872 mining law. Is it not true under that law which Senator Goldwater questioned you about that a mining claimant on a valid claim—let us say that he recorded that claim on a national forest—could develop, mine, and sell those ores without any restraints whatever except those imposed by the market conditions?

Mr. APPLING. You are speaking of location claims?

Mr. COBURN. Yes.

Mr. APPLING. I don't know the law. The only thing that I know in that respect is that it is common practice in the mining profession to avoid expensive operations on a location claim. It involves a matter of title or clear deed to the land. Many persons feel that it would not be safe to do so.

Mr. COBURN. But for the color of title problem, and but for the possibility that you could sell no stock in an unpatented claim, and but for the fact that you could not use the timber except for bona fide mining purposes, there is nothing, is there, in the law or the custom of the West, to preclude a man from taking all the ore off that property he wants to and selling it?

Mr. APPLING. I am really not familiar with the law.

Mr. COBURN. Are you familiar with the experience of mining locators?

Mr. APPLING. Yes, sir.

Mr. COBURN. Has that not been common practice?

Mr. APPLING. I know that very little mining, extensive mining, is done on location claims.

Mr. COBURN. Very little what?

Mr. APPLING. Very little mining of any extent, that is, other than small deposits, are mined from location claims.

Mr. COBURN. And you say that in your experience; and that is 5 years with the Bureau of Mines?

Mr. APPLING. Yes.

Mr. COBURN. I think the testimony will show, Mr. Chairman, that that is quite common practice in the West. I think Senator Goldwater may agree that it is.

Senator GOLDWATER. I not only agree with you; I have been very vociferous for years in my objections to the looseness of the mining laws. In fact, I think most western mining people have the same feeling against them. My only reason for bringing that in was to show the people in the East that this is nothing new and that we have objected to it strenuously for many, many years. I do not condone the giving away of anything; if that is the truth. What I maintain is that it has been the granting of patents. It has been going on since the mining laws first went into effect; and if we had not changed the law last year to some extent there would still be some of that looseness in there. I will agree that the present law is not tight enough in my opinion.

Mr. COBURN. Mr. Appling, did you hear the testimony that was given by some witness—and I am sorry I cannot identify it more precisely at the moment—who I believe testified that there has been \$30,000 to \$40,000 in ores or in gold taken off this property? Did you hear that?

Mr. APPLING. I heard something like that.

Mr. COBURN. That was prior to 1943.

Mr. APPLING. I believe it was.

Mr. COBURN. So that there was mining at one time of precious metals on this property?

Mr. APPLING. Yes, sir.

Mr. COBURN. However, there has not been any since 1950?

Mr. APPLING. As far as I know, there has not.

Mr. COBURN. With respect to this office memorandum dated January 2, your letter of transmittal, did this ever get back to Washington, D. C.?

Mr. APPLING. As far as I know it did not.

Mr. COBURN. Did not?

Mr. APPLING. As far as I know it did not.

Mr. COBURN. Was it made a part of the file that you transmitted, that is, the assay report, your report?

Mr. APPLING. No, sir. That letter of transmittal went to Spokane and stayed there.

Mr. COBURN. What was transmitted?

Mr. APPLING. My report.

Mr. COBURN. In other words, this was taken off the file, and kept in Spokane?

Mr. APPLING. Yes.

Mr. COBURN. So when the file got back to Washington, D. C., and was purportedly examined by someone back here this document was not there?

Mr. APPLING. I don't believe it was; no.

Mr. COBURN. Since you have been here you have testified that you have had numerous conferences with Mr. Parriott and Mr. Miller. Did you say Mr. Davis, too?

Mr. APPLING. I did meet Mr. Davis.

Mr. COBURN. During these meetings were you briefed as to your testimony before the committee?

Mr. APPLING. No, sir; I wouldn't say that I was briefed.

Mr. COBURN. Was your prospective testimony discussed?

Mr. APPLING. Yes, sir. I was asked to repeat my part in the matter.

Mr. COBURN. To them?

Mr. APPLING. Yes, sir. I don't recall—I don't think Mr. Davis asked me for that.

Mr. COBURN. Did Mr. Parriott?

Mr. APPLING. Yes, sir; Mr. Parriott asked me to repeat to him what I had done, my actions in the matter.

Mr. COBURN. Did you prepare any written statement?

Mr. APPLING. No, sir.

Mr. COBURN. During these briefings did you ever receive any threats of reprisal or promises of benefit?

Mr. APPLING. No, no, sir; I did not.

Mr. COBURN. You were not told what to say?

Mr. APPLING. No, sir; I was not told.

Mr. COBURN. That is all, Mr. Chairman.

Senator SCOTT. Mr. Redwine.

Mr. REDWINE. Mr. Appling, I notice there, in answer to a question by Mr. Coburn, that you apparently discussed this matter with Mr. Davis too; is that true?

Mr. APPLING. Pardon me?

Mr. REDWINE. With Mr. Davis too.

Mr. APPLING. I met Mr. Davis. That was very soon after I got here and I believe it may have been before my first testimony.

Mr. REDWINE. Are you sure whether it was since you last testified or prior thereto?

Mr. APPLING. It was not since I last testified, no.

Mr. REDWINE. Not since you last testified?

Mr. APPLING. No.

Mr. REDWINE. When did you first discuss with Mr. Parriott, Mr. Miller, Mr. Armstrong, or anyone else this letter of transmittal?

Mr. APPLING. Mr. Parriott asked me if I had received a phone call from Mr. Davis and when. I believe that was yesterday, and I replied by showing him a copy of that letter of transmittal.

Mr. REDWINE. Was he surprised that you had such a document with you?

Mr. APPLING. I don't know that I would say he was surprised.

Mr. REDWINE. Gratified?

Mr. APPLING. Well, he may have been that, yes, sir.

Mr. REDWINE. Did you discuss it with Mr. Armstrong?

Mr. APPLING. I believe I did. I know we discussed the phone call Mr. Davis made and I may have mentioned the letter to him.

MR. REDWINE. Mr. Appling, with respect to that day back on December 29 when Mr. Davis called you up, you just talked freely to him when he began to ask you these questions?

MR. APPLING. No, sir; I wouldn't say that. I know when he asked me an opinion of the property I was reluctant to give it.

MR. REDWINE. You did not question in your own mind as to whether this was Mr. Davis, the Solicitor of the Department? You just answered the call and he said, "I'm Davis of the Department of the Interior," and you started babbling to him about what was in your confidential report?

Representative HOFFMAN. What was that question? Will you read that? I do not think that is proper, if I understood him right, "started babbling to him." What business has a member of the staff asking that?

MR. APPLING. I wouldn't say that I babbled to him. He asked me questions about it.

MR. REDWINE. How did you become convinced in your own mind that the Solicitor of the Department of the Interior called you up and asked you about a simple matter like this?

MR. APPLING. Merely that he said—I think that the call was first put through by Mr. Armstrong, who I understand was Assistant Solicitor at that time, and he said that Mr. Davis, the Solicitor, wanted to talk to me.

MR. REDWINE. You talked to Mr. Armstrong also?

MR. APPLING. He put the call through.

MR. REDWINE. You talked to Mr. Armstrong?

MR. APPLING. I had no conversation with him other than what I just described.

MR. REDWINE. And he told you, "This is Mr. Armstrong talking"?

MR. APPLING. He told me who he was, identified himself, and said that Mr. Davis wanted to talk to me.

MR. REDWINE. Had you at the time that you received that phone call—I believe you said you had some polishing up to do on your report; is that correct?

MR. APPLING. Yes.

MR. REDWINE. That was your testimony?

MR. APPLING. Yes.

MR. REDWINE. Had you finished writing that section in your report that you entitled "Development"?

MR. APPLING. I believe the whole report was finished at that time. I believe that was probably it, yes, sir.

MR. REDWINE. However, you are not sure of it?

MR. APPLING. Well, yes, I think it was. My recollection is that the report was completed except for final submission, punctuation, spelling, and so forth.

MR. REDWINE. Mr. Appling, did anyone tell you prior to the time you received that phone call that Mr. Davis would call you or might call you?

MR. APPLING. No, sir.

MR. REDWINE. Just came out of the clear sky, the call did?

MR. APPLING. Yes, sir.

MR. REDWINE. That is all I have, Mr. Chairman.

Senator SCOTT. Mr. Lanigan.

Mr. LANIGAN. You testified, I believe, that there had been some time in the past about \$30,000 or \$40,000 removed from these claims.

Do you know whether the ore was removed from the 8 claims which were approved for a patent, or from the 15 claims which were originally not approved for patent?

Mr. APPLING. I don't believe that I testified that that value had been removed. I think that I agreed that I have heard that in the testimony, and I do not know where the ore came from.

Mr. LANIGAN. You do not know which claims it came from?

Mr. APPLING. No, sir, I do not.

Mr. LANIGAN. Did you make any memorandum of the phone call from Mr. Davis to you?

Mr. APPLING. I don't believe I did.

Mr. LANIGAN. That is all that I have.

Senator SCOTT. Is there anything further?

Mr. REDWINE. Mr. Appling, I am going to ask you a hypothetical question. In answer to questions put to you by Senator Goldwater and others, you said that you had advised Mr. Davis that this was pretty good property and so forth. Now, I want you out of your experience to answer this hypothetical question. I will give you a copy of it so you can read it carefully. I will read it for the record while you are reading it:

Please consider that you are now acting in a private capacity as a professional mining engineer. In 1954 you were approached for your opinion on a mine of the following characteristics with the idea that you would recommend a substantial investment therein and would at the same time invest some of your own or your family's or friends' funds:

1. The mine is located at approximately 3,400 feet elevation, in a part of the country which might in winter be cut off from transportation for a few days at a time due to winter snows. The mine is about 46 miles from the nearest railroad shipping point and on good roads excepting for the last 5 miles which is a fair forest road with somewhat steep grades. It is about 600 miles from the nearest smelter by rail.

2. Although there are wide zones of low-grade mineralization, the better grade mineralized vein is narrow, averaging about 3 feet, and the average values per ton at present prices would produce mill heads of \$5.50 per ton in gold and silver.

3. The metallurgy has been worked out and recoveries of from 85 to 90 percent can be made in the mill concentration ratio 25 to 1.

4. Milling equipment of a satisfactory type can be installed to make the above recoveries without cyanidation. The mill capacity will be 75 tons per day or 24 hours. Ample milling water is available. Tailings disposal presents no problem.

5. Excepting for the narrow stoping widths which will restrict tonnage production and may cause serious dilution of the ore, mining is not difficult as the vein is nearly vertical and the ground stands well. Plenty of timber is available on the property.

Now, Mr. Appling, (A) is it your opinion that such a mine could be operated at a profit under 1954 cost conditions, assuming, of course, that the necessary capital would be available?

Representative HOFFMAN. I want to object to that question because, first, before a hypothetical question can be put, there must be evidence establishing each and every element in the question, and there is no such evidence in the record.

In the second place, this gentleman has not qualified as an expert because under the law no one can be required to accept an opinion or express an opinion who is not an ordinarily prudent man. There is not any evidence in here that he has the money or that he is ordinarily prudent in business ventures. Whatever he might say would be only a

guess and would have to take into consideration other assumptions. He has already said that he did not have the money. There is no evidence that he is an ordinary prudent man.

Mr. REDWINE. Mr. Chairman, the witness has testified that he has advised the Solicitor how he should go about his decision in this matter, that it is a good property. He has gone into his educational background. His profession itself is one that calls for him advising people in the mining world. I submit that it is a fair hypothetical question to ask the witness.

Representative HOFFMAN. It is merely an attempt to get this subordinate in the Department to express an opinion adverse to the Secretary's opinion and to get him into disfavor with what you might call the higher ups.

Senator SCOTT. Go ahead.

Mr. APPLING. In the first place, there are no figures as to the extent or grade of the low-grade areas. That would be critical in this hypothetical question. If there were no low-grade areas involved, if it were strictly a matter of the ore in the better grade mineralized vein of a 3-foot width and under other conditions, I don't suppose that it could be done unless speaking strictly from the standpoint of the higher grade ore. If there were figures on the extent and grade of the low-grade deposit, it could change the picture materially.

Mr. REDWINE. If you believe that this mine could be operated, as you have qualified it, what kind of net profit per ton before taxes could be expected?

Mr. APPLING. As I said before, I can't answer that because there are not sufficient facts on which to base it.

Mr. REDWINE. What kind of facts did you have when you talked to Mr. Davis about this?

Mr. APPLING. My statement to Mr. Davis was that I thought the assays and the apparent size would be sufficient to justify a program of exploration. That statement doesn't go as far as these questions.

Mr. REDWINE. Were you taking into consideration when you told Mr. Davis what you did only the 15 disputed claims, or this other property that you had described in such detail as to the development that had been done on it?

Mr. APPLING. I was assuming that the whole property would be similar to everything that I saw.

Mr. REDWINE. You certainly went outside the scope of your instructions in that; did you not, Mr. Appling?

Mr. APPLING. I don't know that I did. I could not help seeing the claims that were previously patented. It would seem to me that the whole property were to be developed, the whole property would be developed, and not just one part of it.

Mr. REDWINE. That is all I have, Mr. Chairman.

Representative JONAS. May I ask him a question, Senator Scott?

Senator SCOTT. Yes.

Representative JONAS. Mr. Appling, I take it from your responses to these questions that you looked at the claims that are not in dispute as well as the claims that are in dispute?

Mr. APPLING. We did not sample them.

Representative JONAS. I know, but you examined and inspected the entire area?

Mr. APPLING. Well, we saw it all; yes, sir.

Representative JONAS. And it is true, is it not, that this very claimant, the Al Sarena people, now hold patents on adjacent claims to those in dispute?

Mr. APPLING. That's my understanding.

Representative JONAS. Do you know what Secretary of the Interior granted those patents?

Mr. APPLING. No, sir; I don't. I suppose the previous Secretary.

Representative JONAS. Under what administration were they granted?

Mr. APPLING. I believe it was the previous administration.

Representative JONAS. And it is your opinion from an examination of the entire area without having taken samples from each and every individual claim that the entire area was about the same with respect to mineralization?

Mr. APPLING. Well, I would assume so on the basis of what I saw. I don't know that that's the case. It was an assumption on my part.

Representative JONAS. Out of your general experience would it be reasonable to assume that mineralization if it existed in one claim right here, would also exist right next to it?

Mr. APPLING. In some cases in the case of fissure veins you find it in small restricted areas. In this case it seemed to be a disseminated type of deposit that normally may have ore to a considerable extent, which this appeared to be.

Representative JONAS. Of course, that was merely an opinion based upon your experience in mining and as a geologist?

Mr. APPLING. Yes, sir.

Representative JONAS. And you offer it simply as an opinion without having anything to base it on except your inspection of the area?

Mr. APPLING. Yes, sir; my personal opinion after cursory inspection.

Representative JONAS. All right. Thank you.

Senator NEUBERGER. Mr. Appling, do you know what the Forest Service found, whether it found that there was a difference on the 8 claims which were granted and the 15 claims which the Forest Service requested be denied?

Mr. APPLING. Yes, sir; I believe the testimony was that they considered the 15 claims were not sufficiently mineralized.

Senator NEUBERGER. They did find a difference; is that not correct?

Mr. APPLING. Yes, sir.

Senator SCOTT. Are there any further questions?

Representative HOFFMAN. Yes. Have you ever been a witness in court?

Mr. APPLING. No, sir.

Representative HOFFMAN. Have you ever been a witness before a committee?

Mr. APPLING. No, sir.

Representative HOFFMAN. Would you not say then that your experience here has been unusual and extraordinary?

Mr. APPLING. I would certainly admit to that, sir; yes, sir.

Representative HOFFMAN. And you would not welcome a return just for your own amusement?

Mr. APPLING. Frankly, I hope I never see it again.

Representative HOFFMAN. Thank you, sir. I hope you never do either. I sympathize with you.

**Mr. REDWINE.** Mr. Chairman, I see 4:30 is about here. I have been advised by Congressman Chudoff's counsel that his parent committee is meeting tomorrow morning.

**Representative CHUDOFF.** The full Committee on Government Operations meets the third Wednesday of every month at regular meeting unless the chairman cancels the meeting.

**Mr. REDWINE.** I suggest, Mr. Chairman, that we adjourn until 2 o'clock tomorrow afternoon in this room and Mr. Appling return, please.

**Senator SCOTT.** Without objection, we will do that.

**Representative HOFFMAN.** Before you adjourn, Mr. Chairman, without being requested to do it, but in behalf of Mr. Appling, may I ask about how long it will be before he can be excused and return to his wife and family? I understand they are ill.

**Senator SCOTT.** I could not say at this time.

**Representative HOFFMAN.** I hope you appreciate that, Mr. Appling. I mean the reply.

**Mr. APPLING.** Yes, sir.

**Mr. REDWINE.** Mr. Chairman?

**Representative JONAS.** May I interject? Mr. Appling was on the stand in Portland. He was on the stand here last week. He has occupied the witness chair for this entire afternoon. I think we ought to be able to tell him about how long he will be expected to stay here and when he can go back to Spokane.

**Senator SCOTT.** I will say this: That if he would not be so evasive we could move along faster.

**Representative HOFFMAN.** That is merely your opinion of his testimony. I say that it is unjustified, to call a witness before you, subpoena him, and then misuse him and abuse and charge him with lying and almost everything else.

**Senator SCOTT.** He has been evasive and he could have saved us time, and some of the remarks here by all the committee have been time-consuming and time-killing, but if that is what you folks want, it is a long time to plant corn and if you want to stay here that long it is all right.

**Representative HOFFMAN.** And I want to put on the record that he has been subjected to what is known as police court methods, the third degree.

**Senator SCOTT.** The meeting is adjourned.

(Whereupon, at 4:25 p. m., the hearing was adjourned until 2 p. m., Wednesday, January 18, 1956.)

## THE AL SARENA CASE

---

WEDNESDAY, JANUARY 18, 1956

UNITED STATES SENATE,  
SUBCOMMITTEE ON LEGISLATIVE OVERSIGHT FUNCTION OF  
THE SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS,  
HOUSE OF REPRESENTATIVES,  
SUBCOMMITTEE ON PUBLIC WORKS AND RESOURCES,  
OF THE HOUSE COMMITTEE ON GOVERNMENT OPERATIONS,  
*Washington, D. C.*

The subcommittees met at 2 p. m. in the caucus room, Senate Office Building, Washington, D. C., Hon. W. Kerr Scott (acting chairman of the Senate subcommittee) presiding.

Present: Senators W. Kerr Scott (North Carolina), and Richard L. Neuberger (Oregon).

Also present: Senators Henry C. Dworshak (Idaho); Thomas H. Kuchel (California); Frank A. Barrett (Wyoming); and Barry Goldwater (Arizona).

Present: Representatives Earl Chudoff (Pennsylvania), (chairman of the House subcommittee); Clare E. Hoffman (Michigan); Victor A. Knox (Michigan); and Charles Raper Jonas (North Carolina).

Senator Scott (acting chairman of the Senate subcommittee). The meeting will please come to order.

Yesterday we asked for telephone memorandums and for the tab sheet on that. I believe we have that. If the gentleman has that, would he please come up and be sworn?

Will you stand, please, and raise your right hand and give your name?

Mr. DAVISON. I am C. C. Davison.

Senator Scott. Do you solemnly swear that the testimony you are about to give will be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. DAVISON. I do, so help me God.

### TESTIMONY OF C. C. DAVISON, ASSISTANT CHIEF CLERK, DEPARTMENT OF THE INTERIOR

Mr. REDWINE. I am sorry; I came in late. What is your name?

Mr. DAVISON. C. C. Davison.

Mr. REDWINE. Whom are you with?

Mr. DAVISON. I am the Assistant Chief Clerk of the Interior Department?

Mr. REDWINE. Do you have any telephone records, call cards, with you, sir?

Representative HOFFMAN. Of course, I want to call attention to the

point that the committee, as far as the House is concerned, has no jurisdiction because there is only one member of the House committee here.

Senator SCOTT. Go right ahead, sir.

Mr. REDWINE. You do have some records with you, sir?

Mr. DAVISON. I do, sir. I have a certified copy of some records and I brought with me a certified copy of the telephone call that was made, as well as the copy of the bill from the telephone company.

I also have with me the telephone operator who placed that call, identified by her signature on the ticket, and the assistant chief operator.

Senator SCOTT. They will be placed in the record.

(The material referred to follows:)

UNITED STATES OF AMERICA,  
DEPARTMENT OF THE INTERIOR,  
Washington, D. C., January 18, 1956.

Pursuant to title 28, section 1733, United States Code, I hereby certify that each annexed paper is a true copy of a document comprising part of the official records of the Department of the Interior:

Ticket covering telephone call made on December 29, 1953, to R. N. Appling, Grants Pass, Oreg.

Bill from Chesapeake & Potomac Telephone Co., showing that this call consumed 18 minutes and cost \$13.25.

In testimony whereof, I have hereunto subscribed my name, and caused the seal of the Department of the Interior to be affixed on the day and year first above written.

C. C. DAVISON,  
*Acting Chief Clerk.*

(See illustration on facing page.)

(The telephone service statement referred to is filed with the committee.)

Mr. REDWINE. Sir, will you explain to the committee just what that shows, please?

Mr. DAVISON. This shows that on December 29, 1953, Mr. Davis placed a telephone call to Grants Pass, Oreg., to R. N. Appling, of the Bureau of Mines.

Mr. COBURN (chief counsel, Senate subcommittee). Is that 4:52 p. m., eastern daylight saving time?

Mr. DAVISON. It was placed from the Department of the Interior and that would be eastern daylight.

No, not daylight; standard, December. And the bill shows that the call consumed 18 minutes and cost \$13.25.

Mr. REDWINE. Sir, let me interrupt at this time. Does the ticket in front of you show what time the call was completed? I mean by that what time the conversation started, not the time that it was placed?

Mr. DAVISON. No.

Mr. REDWINE. Or as to the time that is shown there, is that the time that the call was placed with the telephone company, or the time that the conversation—

Mr. DAVISON. No. That is the time that the operator filed the call.

Mr. REDWINE. Filed the call. What I would like to know, sir, is: Have you any record there as to what time the call was completed, and when I say "completed" I mean when contact was made between the parties?

Mr. DAVISON. No, sir; I do not. I do not have anything. Of course, the telephone company takes the call and then we receive a

Mr. DAVISON. That is correct.

Mr. REDWINE. Those are all the questions I have, Mr. Chairman.

Senator SCOTT. Are there any other questions?

Mr. COBURN. I have no questions.

Representative HOFFMAN. I have one. You do not know, and your records do not show, whether the call was placed by Mr. Davis or whether it was placed by someone in the office for him; do you?

Mr. DAVISON. I can't answer that. I would have to ask the operator and I doubt whether she would know, but you can call her.

Representative HOFFMAN. All you know about it is what the telephone record shows; is it not?

Mr. DAVISON. That is correct.

Representative HOFFMAN. That is, you are testifying now from the bill given you by the telephone company?

Mr. DAVISON. And this ticket that we made in the Department when the call was placed.

Representative HOFFMAN. Who made the ticket in the Department when the call was placed?

Mr. DAVISON. The operator, Mrs. White.

Representative HOFFMAN. Does she not know when the connection was made?

Mr. DAVISON. I doubt whether she would remember, but we may call her.

Representative HOFFMAN. No; does not the record show?

Mr. DAVISON. No.

Representative HOFFMAN. Do the records of the telephone company show?

Mr. DAVISON. I can't answer that.

Representative HOFFMAN. Of course, Mr. Chairman, if the matter is of any importance, proper procedure would be to get the report of the telephone company when it was placed, when the connection was made, and when it ended, if you want it.

Mr. REDWINE. Mr. Chairman, I see no reason to pursue this matter any further. I do not know what the other members of the staff think.

Representative CHUDOFF. I just want to ask one question.

Are your records confined to just this one call, or did you bring all the records for a week or two before or after December 29?

Mr. DAVISON. I have with me the records for the long-distance calls made that particular day in the office of the Secretary.

Representative CHUDOFF. Only on that particular day?

Mr. DAVISON. That is correct.

Representative CHUDOFF. Do you have any records on that day that show any calls of any other members of the Secretary's staff calling Mr. Appling?

Mr. DAVISON. No, sir.

Representative CHUDOFF. You do not have any other day, like 2 weeks before or 2 weeks after, do you?

Mr. DAVISON. No, sir.

Representative CHUDOFF. That is all.

Mr. REDWINE. Sir, you have the records of the call made on that day by Mr. Gottley, I believe it was, Sidney Gottley, to Mr. Volin? Do you have a record of that call?

Mr. DAVISON. I do not have any with me. That we would have to check.

Mr. REDWINE. Will you furnish the committee with a record similar to this in reference to that call on the same day?

Mr. DAVISON. The same day from Mr. Gottley to Mr. Appling?

Mr. REDWINE. From Mr. Sidney Gottley to Mr. Volin.

(The material referred to was submitted on the following day.)

Senator SCOTT. Is there anything further?

Representative HOFFMAN. I have some questions, if you are through. You have before you here a pink slip.

Mr. DAVISON. Yes, sir.

Representative HOFFMAN. The young lady who made those slips is here in the room; is she not?

Mr. DAVISON. The one who made this particular slip?

Representative HOFFMAN. The slip we are talking about.

Mr. DAVISON. That is correct.

Representative HOFFMAN. And who handled the call?

Mr. DAVISON. That is right.

Representative HOFFMAN. You do not know anything about it except as she reported to you?

Mr. DAVISON. As she reported to me.

Representative HOFFMAN. Why do you not put her on?

Representative CHUDOFF. I think, under the usual course of business, the rules are that this man is competent to testify.

Let me ask you this: Is it your practice in your office that when a long-distance call is made a ticket is written out; is that right?

Mr. DAVISON. That is correct.

Representative HOFFMAN. And is eventually filed with you as evidence of the call?

Mr. DAVISON. There is a copy kept in the telephone room. The original goes to the telephone company, which they check against their records, and then a copy goes to our accounts.

Representative CHUDOFF. That is your normal course of business; is it not?

Mr. DAVISON. That is the normal course of business.

Representative HOFFMAN. Mr. Chudoff, will you yield there?

I am not making any formal objection. I was just trying to point out that the easy way and the accurate way, and the way that would give us the information, was available here, and you just do not want it.

Senator SCOTT. Are there any further questions?

If not, we thank you for coming. We will call you again if necessary, but I do not think we will need you.

Mr. Appling, would you please come forward? We hope to get through with you in less time than we have been able to so far. It will depend upon the others.

#### TESTIMONY OF RICHARD N. APPLING, JR., MINING ENGINEER, UNITED STATES BUREAU OF MINES—Resumed

Mr. REDWINE. Mr. Chairman, I think we can get through with Mr. Appling very quickly so far as I am concerned. I am sure all of us want Mr. Appling to get back to his family who, I understand, are sick.

Mr. APPLING. Thank you very much.

Mr. REDWINE. Mr. Appling, yesterday afternoon you testified that this call from Mr. Davis came during business hours, between 8 and 5.

Mr. APPLING. Yes, sir; I believe that's right.

Mr. REDWINE. Have you just heard the testimony of the last witness?

Mr. APPLING. Yes, sir.

Mr. REDWINE. The records of the Department of the Interior show that that call was made at 4:52 p. m., placed at that time, in the afternoon.

Do you want to change your testimony in that respect, or what are the business hours and what is the difference in time between Washington and Grants Pass?

Mr. APPLING. If the call originated here at 4:52, that would have been 1:52 in Grants Pass. There is 3 hours' difference in time.

Mr. REDWINE. However, it is still within business hours and all that?

Mr. APPLING. Yes, sir; yes, sir, it is.

Mr. REDWINE. Mr. Appling, there are several other places in your testimony of yesterday where there are some discrepancies, and I am not referring to this particular thing now.

The committee later on may want to ask you some questions about that, but in view of the fact that you have sickness in your family, Mr. Chairman, I suggest that this witness be dismissed from further attendance at this time.

Senator SCOTT. Does anybody want to ask any questions?

Representative CHUDOFF. Mr. Lanigan would.

Senator SCOTT. Mr. Lanigan.

Mr. LANIGAN (counsel, House subcommittee). I just wanted to ask two questions.

First, I think in your report, in your testimony you indicated there was a mill and some other building on the claims adjacent to the ones you were examining.

Mr. APPLING. Yes, sir.

Mr. LANIGAN. Were those new or old buildings?

Mr. APPLING. Well, they were older buildings, possibly 10, 15 years old, I would judge, from the condition of them. They were in good repair but they were not recent.

Mr. LANIGAN. The other question is this: When Mr. Davis called you and you told him that you thought this claim would merit further exploratory work, can you recall just what the nature of the question was to which you gave that answer?

Mr. APPLING. Well, no, sir; I can't exactly, except that he, Mr. Davis, pressed me for my opinion.

Mr. LANIGAN. He wanted your——

Mr. APPLING. He wanted my opinion of the value.

Mr. LANIGAN. Of whatever facts were in your report?

Mr. APPLING. Yes, sir; that's right.

Mr. LANIGAN. And you gave him the opinion which you have related?

Mr. APPLING. Yes, sir. I would like the record to read that I was rather reluctant to give an opinion. As I have stated before, I didn't feel that I had sufficient time to investigate all the facts, but I gave the best I know on what I had seen.

Mr. LANIGAN. When you say he wanted your opinion, was that as to the value of the claim?

Mr. APPLING. I would say he probably desired an opinion of the potential of the claim, rather than the value: Was it a deposit that might be developed? Was it a deposit that had merit? That's the way I recall it, the impression I have.

Mr. LANIGAN. That is all I have.

Senator SCOTT. Are there any further questions?

Mr. APPLING. Mr. Chairman, immediately after I testified yesterday afternoon, Mr. Parriott reminded me that in regard to my testimony as to my file being in my possession, that he had requested the file and that I had given it to him and he kept it overnight. I would like to assure you that I didn't intentionally forget that, but Mr. Parriott did bring it to my attention and I did give him my file—I believe it was on Thursday night—and I got it back from him on Friday morning. I would like to amend my testimony to that extent.

Representative CHUDOFF. What did he need your file for?

Mr. APPLING. I think it was in regard to the letter that I gave to the committee yesterday. I think he wanted to look at that or look over the file.

Representative CHUDOFF. Did he want it for the purpose of advising you as to how to testify or how not to testify?

Mr. APPLING. No, sir; I did not get that impression.

Representative CHUDOFF. He just wanted to read the letter?

Mr. APPLING. I think so.

Representative CHUDOFF. He could have read that in 5 minutes. He did not have to keep the file.

Mr. APPLING. As I recall, he was in a hurry or I was, 1 of the 2, and he wanted it, at any rate.

Representative CHUDOFF. The whole file?

Mr. APPLING. Yes, sir.

Representative CHUDOFF. Did you get it from him the next morning?

Mr. APPLING. Yes, sir; I did.

Representative CHUDOFF. Did you have any discussion with him about the file?

Mr. APPLING. I don't recall that we did.

Representative CHUDOFF. He did not tell you what he read or what the situation was, what he thought the proper thing for you to do was?

Mr. APPLING. No, sir; he had no suggestions like that.

Representative CHUDOFF. He just took the file to read the letter and you got it back from him without comment the next morning?

Mr. APPLING. There may have been comments. I don't recall them if there were. I am not even sure as to why he wanted the file, whether it was in regard to that letter or just anything else that may have been in it.

Representative CHUDOFF. One thing we have learned from the questioning of you, Mr. Appling, is that you have a very bad memory. Your recollection is not very good. That is the only thing we have learned from you, as far as I am concerned.

Representative HOFFMAN. That is not a matter of agreement on the committee by a long shot. I say he has a very good memory and that he has shown a high degree of patience under the third-degree methods that you fellows have employed throughout his examination.

I think he has had a demonstration of how a committee should not treat a citizen, apparently a decent, respectful individual, and a man of good character in the community in which he lives, and treated here as though he were a criminal.

Representative CHUDOFF. Now that we have your opinion and my opinion on the record, I guess we ought to excuse the witness.

Senator SCOTT. If there are no further questions.

Representative HOFFMAN. Wait a minute. I have some questions and so has my colleague, and maybe Senator Goldwater has. Go ahead, Mr. Jonas.

Representative JONAS. I would like to ask Mr. Appling a question. Were you entirely familiar with your file all the time?

Mr. APPLING. Yes, sir; I was.

Representative JONAS. It is your file that you brought with you from Portland?

Mr. APPLING. Yes, sir; Spokane.

Representative JONAS. It is the file that you have maintained regarding this subject since it came up?

Mr. APPLING. All of the papers in the file have gone through my hands. The file was actually put together by the secretaries in the Spokane office and I took it from there.

Representative JONAS. Were you familiar with the contents of the file when you came to Washington?

Mr. APPLING. Yes, sir; I was.

Representative JONAS. Were you familiar with the contents before you let Mr. Parriott have the file?

Mr. APPLING. Yes, sir; I was.

Representative JONAS. Did you examine it after it was returned to you?

Mr. APPLING. Yes, sir; I have.

Representative JONAS. Did you find it intact or did you find anything added to it, or had anything been removed, so far as you could tell?

Mr. APPLING. I saw nothing that had been added or removed.

Representative JONAS. Would you tell the committee whether you observed that any of the documents or papers had been altered, or tampered with, or mutilated?

Mr. APPLING. I saw no alterations at all.

Representative JONAS. Any additions to the file that came to your attention?

Mr. APPLING. No, sir.

Representative JONAS. As you sit here—you are about to be excused, Mr. Appling, and will be on your way back home, we hope, soon—I ask you to reflect for a minute before you answer this question:

You have been subjected to some rather severe cross-examination and I expect it has been rather trying for you. You have been on the stand several times and you have been here over a week now. I would like you, in answer to my final question, to tell me whether at any time throughout this entire experience you have been subjected to any pressure, or have received any instructions, or any suggestions or any requests from Mr. McKay or any official in the Interior Department concerning the sort of testimony you would give or what you would say in response to questions?

It has been intimated that some of the witnesses were coached. Would you tell this committee whether you were coached by anybody in the Interior Department as to how you would answer questions or testify?

Mr. APPLING. Yesterday I believe I testified that I had talked to Mr. Parriott and Mr. Miller, and I also talked to Mr. Armstrong and I met Mr. Davis. No one has coached me in what I should say, if I understand the meaning of coaching.

Mr. Parriott has asked me at several times to repeat my part in the proceedings, and he has advised me to offer to this committee as facts only those things that I know to be facts and not to offer as facts any conjecture or guesswork or anything of that nature. That is the only suggestion that I have received. If that is coaching, why—

Representative JONAS. You were not under any pressure from anybody in the Department to testify a certain way, or did anybody help you formulate the story you have related to the committee, or does it represent the facts as they occurred?

11. Mr. APPLING. The testimony that I have given have been the facts  
as nearly and as accurately as I can remember them. There has been  
no pressure brought to bear on me. Nobody has offered rewards or  
punishment for testifying in any particular fashion. The things that  
I have said have been true as nearly as I can remember.

10. Representative JONAS. Thank you.

Senator SCOTT. Are there any further questions. If not, that is all.

Mr. APPLING. Thank you, Mr. Chairman.

7. Representative HOFFMAN. Yesterday, you were asked, were you not,  
about the time that this call went through between you and Mr. Davis?

Mr. APPLING. Yes, sir; I believe I was.

71. Representative HOFFMAN. You said, as I recall, that it was during  
business hours.

Mr. APPLING. Yes, sir.

Representative HOFFMAN. Today you were here when they put on  
the record the time that the call was placed, were you not?

Mr. APPLING. Yes, sir; I was.

Representative HOFFMAN. And the record shows that it was placed  
at 4:52 p. m., in the afternoon?

Mr. APPLING. Yes, sir.

Representative HOFFMAN. Apparently counsel were figuring here  
and they got to figuring the wrong way. They were going to show  
that it came sometime other than business hours. As a matter of fact,  
what time was it out there when it was 4:52 here?

Mr. APPLING. It would have been 1:52.

Representative HOFFMAN. In the afternoon?

Mr. APPLING. Yes, sir.

Representative HOFFMAN. If it took, say 8 minutes to put it through  
you would have gotten the call about 2 o'clock?

Mr. APPLING. That is approximately right.

Representative HOFFMAN. You did not lie about that; did you?

Mr. APPLING. No, sir; I didn't.

Representative HOFFMAN. I think that is all.

Senator NEUBERGER. May I ask a question?

Senator SCOTT. Yes.

Senator NEUBERGER. I just want to recollect one thing about your  
testimony yesterday, Mr. Appling.

Did you testify that this particular episode involving the Al Sarena  
claims was the first time in your experience and career that you had  
worked on mining claims?

Mr. APPLING. I don't believe it was quite that way. What I in-  
tended to convey was I had never been involved in a patent proceeding  
or a contested patent claim. I have done work on mining claims in  
the course of other work.

Senator NEUBERGER. In other words, you have never before been  
involved in taking assays or determining assays which would be a  
factor in whether patent would or would not be granted to mining  
claims?

Mr. APPLING. No, sir; I have not.

Senator NEUBERGER. You never before had any experience in that  
way?

Mr. APPLING. Never before; no sir.

Senator NEUBERGER. Thank you.

Senator BARRETT. Mr. Chairman, may I ask him a question?

Senator SCOTT. Yes, sir.

Senator BARRETT. Mr. Appling, do I understand the purport of your answer is that you have had considerable experience with mining claims, but that relatively few of the mining claims in that area have gone to patent?

Mr. APPLING. Well, I don't believe that I testified to that. I think that that is—

Senator BARRETT. I think that is true over the country, Mr. Appling, and I would be very much surprised if it were not true out in Oregon.

Mr. APPLING. I think that probably is correct.

Senator BARRETT. I would like to ask you this question, Mr. Appling:

Are you familiar with the provision of law that if a mining claimant holds a mining claim for a period longer than the statutory period of limitations in the State in which it is located, and has performed all of the requirements of the mining law, then he is protected in his possessory right to the claim?

Mr. APPLING. No, sir; I don't know that.

Senator BARRETT. Are you versed in the provisions of the law with regard to mining claims?

Mr. APPLING. Only in a general way. Our work doesn't usually take us into that.

Senator BARRETT. Let me ask you this question then: Assuming that the law provides that if the mining claimant has performed all of the requirements of the mining law and is in possession of the claim for a period longer than the statute of limitations, which I assume is 10 years in Oregon—it may be 20, but in this case I understand that the claimant has been in possession longer than that period—then is there any way under the sun that he could be dispossessed of that claim, save and except through fraudulent actions?

Mr. APPLING. I really don't know, sir. I'm not familiar with the law.

Senator SCOTT. If there are no further questions, I would like to say to the new Senators that have come in for the first time that we will adjourn at 4:30, and I wonder when the committee can meet again.

Representative CHUDOFF. That depends on what happens in the House today. I understand that if they finish the two bills that they are on today without a rollcall, we will have a free day tomorrow and have hearings.

If they are going to have rollcalls tomorrow on these two bills, we are probably going to have to be in the House to answer rollcalls, and things like that.

Senator SCOTT. I was just trying to move along.

Representative CHUDOFF. Mr. Chairman, I tried to get the information before I came over here, and that is the best information I could get from the leadership and the Parliamentarian. They will not know what the program is until they finish the debate today.

Representative JONAS. Before you leave that, may I ask a question of the staff or of the chairman?

Senator SCOTT. Yes.

Representative JONAS. I do not want to keep referring to this—I have mentioned it once or twice—but I think it is pretty important in the interest of fairness and because the public generally having been

made aware of this situation—and whether intentional or not, many inferences have gone out of this committee room concerning what transpired—and I think we ought to have the Department witnesses up here before any further delay occurs.

I am not trying to tell the committee how to run its affairs, but I just believe in fairness, the Secretary of the Interior or whoever handled this matter in the Department should have an opportunity without any further delay to put his story before the committee.

Senator SCOTT. I will ask Mr. Redwine to give you the information on that.

Mr. REDWINE. Mr. Chairman, the order that the staff is working on by the direction of the chairman is this:

The next witness that will be called will be Mr. J. R. Thoenen.

Representative HOFFMAN. Who is he?

Mr. REDWINE. He is a gentleman in the Bureau of Mines who participated in the selection of the Williams Co. I do not see why we should not get through with him in 15 minutes. Of course, it depends on what the Congressmen and the Senators ask.

Representative HOFFMAN. You mean what the staff asks.

Mr. REDWINE. We will be through in 5 minutes, the staff will, and then the next witness will be the Chief of the Forest Service.

The next witness following that will be Mr. Holderer of the staff who will qualify as an expert in engineering.

The next witness, as the staff visualizes it, subject to the approval of the chairman, of course, and members of the committee, is Mr. Davis. I see no reason why we should not get to Mr. Davis soon. I think that we need another half-day after this afternoon, sir, and then Mr. Davis.

Representative HOFFMAN. All right.

Off the record.

(Discussion off the record.)

Senator SCOTT. Without objection, then, suppose we meet tomorrow morning at 9:30, and by that time we will be able to determine whether we will meet in the afternoon or not.

Representative CHUDOFF. I can find that out this afternoon, as soon as the House adjourns.

Mr. REDWINE. Mr. Chairman, we are having a difficulty of this kind:

Before we decide this thing about tomorrow morning, I would like to get my secretary to check with the clerk of the committee and see if we can find a room to meet in tomorrow morning. We are up against that kind of difficulty.

Representative HOFFMAN. You may have my office.

Representative CHUDOFF. We can get the Caucus Room of the Old House Office Building, Room 362, if you are stuck.

Senator SCOTT. The next witness.

Mr. REDWINE. Mr. J. R. Thoenen, please.

Senator SCOTT. Congressman Chudoff, will you swear him in, please?

Representative CHUDOFF. Will you stand and raise your right hand, please? What is your full name?

Mr. THOENEN. John Roy Thoenen.

Representative CHUDOFF. Do you solemnly swear the testimony you are about to give before this committee shall be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. THOENEN. I do.

Representative CHUDOFF. Be seated, please.

**TESTIMONY OF JOHN ROY THOENEN, CHIEF, KNOXVILLE OFFICE  
BUREAU OF MINES**

Mr. REDWINE. Mr. Thoenen, will you state your official position?

Mr. THOENEN. Chief of the Knoxville field office, Bureau of Mines.

Mr. REDWINE. How long have you been in that position?

Mr. THOENEN. Since about the first of the year; that is, first of last year. Pardon me.

Mr. REDWINE. What was your position with the Bureau of Mines in 1943?

Mr. THOENEN. Acting regional director of Region VII.

Mr. REDWINE. Stationed where, sir.

Mr. THOENEN. Knoxville.

Mr. REDWINE. You have been in Knoxville continually since that time?

Mr. THOENEN. That's right.

Mr. REDWINE. When did you first go to that region?

Mr. THOENEN. Well, now, you mean to Knoxville or to the region? I was in the region before I went to Knoxville.

Mr. REDWINE. To the region, sir.

Mr. THOENEN. I was in the region when the region was formed.

Mr. REDWINE. When was that?

Mr. THOENEN. I went to Tuscaloosa in 1945.

Mr. REDWINE. Are you familiar with the mineralogy of the State of Alabama?

Mr. THOENEN. Somewhat.

Mr. REDWINE. How much gold and silver production is there in Alabama?

Mr. THOENEN. There's been none for some years.

Mr. REDWINE. Well, what is the potential?

Mr. THOENEN. What percent?

Mr. REDWINE. Potential.

Mr. THOENEN. I don't know of any operating gold or silver mines.

Mr. REDWINE. Mr. Thoenen, it has been testified earlier that you received a telegram and a letter from Mr. Volin in connection with the Al Sarena Mines.

Mr. THOENEN. Yes.

Mr. REDWINE. Requesting you to determine and advise Mr. Volin as to the reputation and capability of the A. W. Williams Inspection Co. in the assaying of gold and silver.

Mr. THOENEN. That's right.

Mr. REDWINE. What did you do? Step by step, what did you do to fulfill that request?

Mr. THOENEN. Well, first, I got a telegram or teletype—I don't recall which; it's on teletype form, telegraph form quoting or referring to Mr. Volin's letter which had been mailed the day before. I got the telegram first.

I replied to that by a telegram. I did not know anything of the Al Sarena case. Neither did I know anything about the company that was mentioned. I had no recollection of ever having heard of them before.

Mr. REDWINE. Just tell the committee the steps that you took to determine the answer to the question posed by Mr. Volin.

Mr. THOENEN. I looked through our records, and the Bureau of Mines has a brief publication of some companies that do this sort of analysis work. I did not find their name in that publication.

I had another publication in my desk by the Department of Commerce and did find the name listed in that publication. I then thought of Walter Jones, the State geologist of Alabama, and thought possibly he might know of them. I called him on the telephone and he said he did and, so far as he knew, they were O. K.

Mr. REDWINE. So far as he knew, they were O. K.?

Mr. THOENEN. That's right.

Mr. REDWINE. I believe that in your reply to Mr. Volin you said that you had a telephone conversation with the State geologist of Alabama, Walter Jones, or you did mention his name in that.

Mr. THOENEN. That's right.

Mr. REDWINE. And that they were O. K.?

Mr. THOENEN. He said they were O. K.

Mr. REDWINE. Do you consider "so far as he knew they were all right" is the same as "O. K."?

Mr. THOENEN. I don't quite get your question.

Mr. REDWINE. You just testified that Walter Jones, the State geologist of Alabama, said that the A. W. Williams Co., so far as he knew, were all right. Do you consider that that statement of his was not exaggerated when you wired to Mr. Volin that Jones said they were O. K.?

Mr. THOENEN. No; I don't think so.

Mr. REDWINE. You don't think there is any difference in that?

Mr. THOENEN. No.

Mr. REDWINE. You were specifically requested by Mr. Volin to determine whether they were O. K., shall we say, for the purpose of making assays of gold and silver?

Mr. THOENEN. That's right.

Mr. REDWINE. Did you ask Mr. Jones in particular as to gold and silver?

Mr. THOENEN. I can't answer that. I don't know. It's been so long ago.

Mr. REDWINE. I realize it has been a long time.

Mr. Thoenen, this directory of the Department of Commerce, how carefully did you examine that directory, or were you already familiar with it? Answer that first. Were you familiar with that directory?

Mr. THOENEN. I was familiar with the directory, but not a good many details in it; no.

Mr. REDWINE. Is that a standard document in all Bureau of Mines offices? Is it usual to have a directory of the Department of Commerce of that kind in it?

Mr. THOENEN. I don't know.

Mr. REDWINE. However, you did?

Mr. THOENEN. I did have; yes.

Mr. REDWINE. And you were familiar with the directory?

Mr. THOENEN. That's right.

Mr. REDWINE. Are you familiar with their symbols?

Mr. THOENEN. I knew they had symbols. I wouldn't be familiar with the symbols without checking.

Mr. REDWINE. Did you check them at that time?

Mr. THOENEN. I did.

Mr. REDWINE. Do you know anything about how that directory is compiled?

Mr. THOENEN. Do you know as to who compiled it?

Mr. REDWINE. As to how it is compiled. How does a firm get its name in that directory?

Mr. THOENEN. No.

Mr. REDWINE. You are not familiar with that?

Mr. THOENEN. No, sir.

Mr. REDWINE. Mr. Thoenen, if you were in private practice, and a client you represented wanted some assays made which would be the base upon whether he did or did not invest a lot of money, would you rely upon the Department of Commerce directory as to the capability of the assay house picked to decide that question?

Mr. THOENEN. That's a little hard question for me to reply to. I don't know whether I would or not.

Mr. REDWINE. Particularly if the directory that you were checking from was dated 1947 and this was in 1943? Could you answer that question, Mr. Thoenen?

Mr. THOENEN. I have. I say I don't know whether I would or not.

Mr. REDWINE. What do you think you would have done?

Representative HOFFMAN. I object to that line of questioning. It is another one of those "iffy" hypothetical questions which do not state the facts, and it is only calling for an opinion by this witness on a matter in which he was not interested, or rather informed. He correctly answered. He says he does not know whether he would or would not. It is wholly a matter of speculation. An answer would not add any evidential weight to the hearings.

Mr. REDWINE. I submit when the witness replied to Mr. Volin, Mr. Chairman, that he also gave an opinion.

Mr. THOENEN. No, I gave no opinion.

Mr. REDWINE. Just what you had found.

Mr. THOENEN. That's all.

Mr. REDWINE. However, it was your opinion at that time that you had complied with the request?

Mr. THOENEN. No.

Mr. REDWINE. Of Mr. Volin?

Mr. THOENEN. No. I told him that I had no other information.

Mr. REDWINE. Let me ask you this, Mr. Thoenen:

Did you take into consideration when you replied to Mr. Volin that here was a directory 5 years old about which you knew absolutely nothing as to how they decided whether any given name should be in the directory or not? Did you take that into consideration, Mr. Thoenen?

Mr. THOENEN. I merely told him——

Mr. REDWINE. However, you, on the other hand, did not know how they compiled it. On the preface of it, did they disclaim any responsibility as to the competency of the firms listed there?

Mr. THOENEN. I don't know whether they did or not. I don't recall that.

Mr. REDWINE. Mr. Chairman, those are all the questions I have of this witness.

Senator NEUBERGER (presiding). Are there any other questions?

Representative JONAS. May I ask a question? It is not my time.

Senator NEUBERGER. Go right ahead.

Representative JONAS. I yield to the Senator.

Senator KUCHEL. May I ask this question of the counsel?

Is it the purpose of the counsel in asking these questions to impeach the Williams Co. through the use by the witness of a Department of Commerce publication? Is that the purpose for the counsel's question?

Mr. REDWINE. No, not at all.

Senator KUCHEL. What was the purpose of calling this witness?

Mr. REDWINE. As to what precautions were taken by the Bureau of Mines employees to determine whether the assayer selected that the Government representatives had agreed to make this assay was a competent assayer.

Senator KUCHEL. I will ask the witness:

What was the tenor of the teletype message which you received? Did it order you to take any specific action? I mean will you repeat your answer to the earlier question?

Mr. THOENEN. I have the teletype telegram here.

Senator KUCHEL. Would you read it, please?

Mr. THOENEN. It is addressed to John R. Thoenen, acting regional director, region VII, Bureau of Mines, Norris, Tenn.:

Re our letter to you November 9 information on A. W. Williams Inspection Co., post-office box 314, Mobile, Ala. Check reputation of firm for assaying gold, silver, lead, zinc, and possibly other metals in connection umpire on appeal of patent application mining claims. Acting as Government representative in this resampling claims. Applicant wants samples assayed by Williams Inspection Co. Wire reply because sampling must be undertaken immediately to avoid snow conditions.

M. E. VOLIN,

*Chief, Mining Division, Bureau of Mines, Spokane.*

Senator KUCHEL. I will ask you the question whether or not you acceded to that directive and carried it out.

Mr. THOENEN. Well, I took it as a request. It is not a directive. It is a request to me.

Senator KUCHEL. All right; call it a request.

Mr. THOENEN. To which I replied as follows:

Re your telegram today. Williams Inspection Co., of Mobile, is listed in Department of Commerce directory and has O. K. of State geologists of Alabama by telephone to me today. No other information available. Letter not received.

Senator KUCHEL. Had you known the State geologist of Alabama by reputation?

Mr. THOENEN. Yes; for a number of years.

Senator KUCHEL. Did he have a good reputation in his professional field?

Mr. THOENEN. Yes.

Representative HOFFMAN. Will the Senator yield there?

Senator KUCHEL. Yes.

Representative HOFFMAN. You notice when Mr. Redwine was asking him about this, he omitted the State geologist. He tried to get the witness to swear to the wrong thing, that he relied upon the Commerce report, which was not true.

Senator KUCHEL. I say very frankly to the chairman that it seems to me that the time taken by the committee in listening to this Federal

employee is productive of very little good because I think the directive or the request and his answer speak for themselves, and it seems to me that in asking information from the topmost employee at the State government for a professional answer is about all that anyone would normally or reasonably do.

Those are all the questions I have, Mr. Chairman.

Mr. COBURN. Mr. Chairman, could I ask the witness just one question?

Senator NEUBERGER. Mr. Coburn.

Mr. COBURN. Mr. Thoenen, did you, at the time of this inquiry which was made of you by Mr. Volin, have any knowledge of the competency or the reliability of the A. W. Williams Co.? Did you yourself have that knowledge?

Mr. THOENEN. No, sir.

Mr. COBURN. Had you ever heard of the company?

Mr. THOENEN. No, sir.

Mr. COBURN. That is all.

Representative CHUDOFF. I would like to ask the witness one question. I think you testified that when you received this inquiry concerning the reputation of the Williams Co., you contacted the State geologist of the State of Alabama and he said as far as he knew, they were O. K. Did you attempt to make further inquiries with anybody else to determine their competency?

Mr. THOENEN. No, sir.

Representative CHUDOFF. In other words, you just felt that if the State geologist of Alabama said he was O. K., then that made it positive.

Mr. THOENEN. It was satisfactory to me.

Representative CHUDOFF. You did not know the reason why they wanted this information?

Mr. THOENEN. No. Well, except in this telegram.

Representative CHUDOFF. Had you known it was concerning the Al Sarena case and you knew about the Al Sarena case, you certainly would have made further inquiries?

Mr. THOENEN. I think that was mentioned. Oh, possibly in his letter, which came later.

Representative CHUDOFF. However, you did not have the letter at the time?

Mr. THOENEN. No.

Representative CHUDOFF. However, you knew there was a very, very substantial controversy concerning the Al Sarena case?

Mr. THOENEN. No, sir.

Representative CHUDOFF. You did not know anything about it?

Mr. THOENEN. No.

Representative CHUDOFF. Had you known there was a controversy, certainly you would not have just left it to the State geologist of Alabama; you would have made other inquiries; would you not?

Mr. THOENEN. In the first place, I don't know where I would have made other inquiries. I thought Walter would know better than anyone to whom I could refer.

Representative CHUDOFF. So what you were trying to tell me, Mr. Thoenen, is that, as far as you were concerned, you were not a very good source of information to determine whether Williams—

Mr. THOENEN. Very poor source.

Representative CHUDOFF. And if they really wanted to find out about the Williams Co., they should have gone to somebody else, not you?

Mr. THOENEN. Yes.

Senator BARRETT. May I ask a question?

Senator NEUBERGER. Certainly, Senator.

Senator BARRETT. Apparently from your wire you had the O. K. of the State geologist of Alabama, and I believe you testified that you had confidence in his integrity and his ability, and his knowledge of the field, and also you found the name of the Williams Inspection Co. in the book listed by the Department of Commerce for 1947.

I would like to ask you this question: Have you had occasion since the inspection was made to determine the standing of the Williams Inspection Co. and, if so, I would like to ask you to tell the committee here and now whether the Williams Inspection Co. is reliable according to the information available to you at this time?

Mr. THOENEN. I have had no occasion to look into the matter further since that telegram.

Senator BARRETT. Do you know of any reason to suspect or to doubt the ability or the integrity or the honesty of the Williams Inspection Co. at this time?

Mr. THOENEN. No, sir.

Representative CHUDOFF. Did you know about the reports of the GSA, the General Services Administration, concerning the bad assays they had received from the Williams Co.?

Mr. THOENEN. No, sir.

Representative CHUDOFF. Did you hear the testimony, or were you here when the testimony was given, concerning the bad results they got from the Williams Co. when the letter was read into the record?

Representative JONAS. Will you yield there, my colleague, chairman of my subcommittee?

Representative CHUDOFF. I do not mind yielding.

Representative JONAS. I do not think you have asked him a proper question. The GSA has not testified.

Representative CHUDOFF. A letter was read from the GSA.

Representative JONAS. And it was not dated until September 1955; and what this man did was in 1953.

Representative CHUDOFF. All I am asking him is whether he heard the letter read. I am not asking him anything about the contents. Did you hear the letter read?

Mr. THOENEN. I heard parts of it. I could not hear too well in the back of the room.

Representative CHUDOFF. From what you heard, will you agree that the GSA complained that this company did not do a good job?

Mr. THOENEN. I would not know.

Representative CHUDOFF. You do not know enough about it?

Mr. THOENEN. No; I do not.

Senator GOLDWATER. I would just like to comment on that last line of questioning by the Congressman.

It never was developed that day, that I can recall, whether or not the number of cars that were in dispute was an unusually large number. In this type of program it is not unusual to have a contest between the Government and those who are shipping it. I do not think we can judge the Williams Co. on the number of cars that were pre-

sented in evidence that day unless that number was in excess of what is happening around the country.

I think we have been extremely unfair to the Williams Co.

In fact, I make this statement:

If I were the Williams Co. and read the editorial in the Washington Post, my lawyers would have been in their office the next morning.

I do not think it is right to judge here. We have not presented any evidence, to my knowledge, that would cause me to question the Williams Co. I think that should be explored further, if you wanted to press that point.

Representative HOFFMAN. Mr. Chairman, will the Senator yield?

Senator GOLDWATER. Yes.

Representative HOFFMAN. One of the complaints of GSA, as I recall, was that certain cars had been sent on without being tested, but the testimony also showed beyond any dispute that those cars were removed by the railroad company and not on the orders of Williams.

Representative JONAS. Will you yield?

Representative HOFFMAN. Surely. The Senator has the time.

Representative JONAS. The only evidence and the only testimony that is before this committee involving the GSA is that they never made any complaint to the Williams Co. whatsoever, and the only scrap of paper indicating any dissatisfaction was the letter which was dated in September of this year; but I asked yesterday, "Why do we not call the inspector from GSA if we wanted to get the facts about that situation from Atlanta, the inspector who inspected the material?" He is the one who will know; not Mr. Walsh downtown.

Representative CHUDOFF. I just say that all this is much to do about nothing. I think we ought to proceed. What we are doing is arguing the Williams-GSA case, and certainly this is a factfinding body. Let us get some facts.

The letter is in the record. It speaks for itself.

Representative JONAS. Before the witness leaves I have a question. Had you finished?

Senator GOLDWATER. Yes; I finished.

Representative JONAS. Mr. Thoenen, your jurisdiction embraces Alabama?

Mr. THOENEN. Yes, sir.

Representative JONAS. How many other States? Tennessee and Alabama?

Mr. THOENEN. Tennessee; seven States in all. At that time we had Mississippi. Since, Mississippi has been—

Representative JONAS. All I am interested in is Alabama.

Did your duties for you to go to Alabama frequently?

Mr. THOENEN. Occasionally.

Representative JONAS. How often had you been in the State of Alabama?

Mr. THOENEN. Well, I lived at Tuscaloosa for 8 years at our station there.

Representative JONAS. Did you have any representatives in the State of Alabama under your control?

Mr. THOENEN. Yes.

Representative JONAS. Where were they located?

Mr. THOENEN. Tuscaloosa.

Representative JONAS. How far is that from Mobile?

Mr. THOENEN. Oh, I'd say 200, 300 miles.

Representative JONAS. What is he, a subordinate of yours?

Mr. THOENEN. At that time, yes. I was acting as regional director and he was then in the experiment station at Tuscaloosa.

Representative JONAS. You mean you had an experiment station there?

Mr. THOENEN. That's right.

Representative JONAS. When you were put on notice by this telegram from Mr. Volin that a controversy existed and he was seeking information as to the reliability of the Williams Co., and he worked for the same Bureau of Mines that you work for, and you acted upon his telegram, why did you not display a little more initiative and aggressiveness in finding out something about the Williams Co.? Why did you not call your own office in Tuscaloosa?

Mr. THOENEN. Well just prior to the time that I went to Knoxville, I had been for 8 years superintendent of the Tuscaloosa station, and was fairly familiar, quite familiar I might say, with the records in that office. I didn't know of anything that we had in that office that would refer to the Williams Co.

Representative JONAS. Well, you had a man there.

Mr. THOENEN. That's right.

Representative JONAS. How many staff members?

Mr. THOENEN. Oh, probably 30.

Representative JONAS. Thirty? The only reason you say you did not get in touch with that office is because you did not think they would know anything more about it than you?

Mr. THOENEN. That's right.

Representative JONAS. You could not think of anybody else in the State of Alabama except the state geologist to inquire of?

Mr. THOENEN. Oh, I probably could have thought of some other people, but I thought he would know better than anyone else.

Representative JONAS. That is a very good answer and I think that is the reason you relied on his statement.

Mr. THOENEN. That's right.

Representative JONAS. However, there is not any doubt in your mind now, and there was no doubt in your mind at the time you received that telegram, that this was an important matter you were being asked to give some counsel on?

Mr. THOENEN. That's right.

Representative JONAS. Because the telegram specifically directed your attention to the fact that they want this assay house to act as an umpire in the settlement of a dispute.

Mr. THOENEN. That's right.

Representative JONAS. And he was asking you to investigate and report on the reliability of the Williams Co.

Mr. THOENEN. Yes.

Representative JONAS. And you, as a responsible official of the Bureau of Mines, undertook to do that to the best of your ability: is that right?

Mr. THOENEN. That's correct.

Representative JONAS. And you think you did do that and satisfied yourself at least that this was a reliable house and one that you could recommend to the Spokane office?

Mr. THOENEN. I expressed no opinion of my own at all.

Representative JONAS. I know you did not. You stated that the State geologist said they were O. K.

Mr. THOENEN. That's right.

Representative HOFFMAN. And he says the State geologist is all right, so what more do you want?

You do not regard everybody you do business with with suspicion, do you?

Mr. THOENEN. No.

Representative HOFFMAN. You better if you are going to do business with the House committees.

Representative JONAS. I was just wondering if there was something else he might have done to bolster his judgment, or some other information he might have elicited from some other source.

However, you think the office of the State geologist was the proper place to go for that information?

Mr. THOENEN. I thought so at the time.

Representative JONAS. What do you think now?

Mr. THOENEN. I still think so.

Representative HOFFMAN. Do you not know, if you had been floating around with a half dozen other fellows, they would accuse you of taking tax dollars?

Mr. THOENEN. Probably.

Representative HOFFMAN. How much did it cost, do you know, to bring you up here on this one? Your testimony is not any different from that of Mr. Volin, is it?

Mr. THOENEN. No.

Representative HOFFMAN. And how long have you been here?

Mr. THOENEN. Well, I came up last week and went back, and came back again this week.

Representative HOFFMAN. And I think you testified a while ago that ever since this you have never heard anything against the Williams Co.?

Mr. THOENEN. No, sir.

Representative HOFFMAN. Except what has been thrown around here in the committee room by counsel.

Mr. THOENEN. That's right.

Representative HOFFMAN. And you would not want to rely on that, would you? You need not answer that.

Representative JONAS. You mean you were here last week?

Mr. THOENEN. Yes, sir.

Representative JONAS. How many days have you been in Washington on this?

Mr. THOENEN. I was here 2 days and went back, and I was here yesterday and today.

Representative HOFFMAN. Who called on you when you were down home? Mr. Redwine?

Mr. THOENEN. No.

Representative HOFFMAN. Who did? Anybody?

Mr. THOENEN. No. From the committee, you mean?

Representative HOFFMAN. Yes.

Mr. THOENEN. No.

Representative HOFFMAN. They just told you to come up?

Mr. THOENEN. That's right.

Representative HOFFMAN. I have no more questions.

Mr. COBURN. Mr. Thoenen, how long have you known Mr. Volin?

Mr. THOENEN. I think I met Mr. Volin about 1951 or 1952. I'm not sure what year it was.

Mr. COBURN. You had known him before you received this inquiry from him?

Mr. THOENEN. That's right.

Mr. COBURN. You had been associated together in the work of the Bureau of Mines?

Mr. THOENEN. No. He was in the West. I have been in the East.

Mr. COBURN. Did you, at the time that you received the inquiry, realize that Mr. Volin was relying on you for an accurate appraisal of the Williams Co.?

Mr. THOENEN. My impression, whether wrong or right I don't know, but my impression at the time was that I was probably one of several that he had inquired of.

Mr. COBURN. You heard his testimony to the effect that this was the sole inquiry that he made?

Mr. THOENEN. Yes, sir.

Mr. COBURN. You were present in the room at that time?

Mr. THOENEN. Yes, sir.

Mr. COBURN. You also heard him state that he would have to take responsibility for that decision?

Mr. THOENEN. Yes, sir.

Mr. COBURN. That is, to rely on the information you gave him, and to rely solely on that information?

Mr. THOENEN. I don't recall that he said that.

Mr. COBURN. I think the record will show that he said he had to admit that he relied solely on that information. However, you did not realize that at the time of the inquiry?

Mr. THOENEN. No.

Mr. COBURN. You just thought it was a routine inquiry?

Mr. THOENEN. That's right.

Mr. COBURN. Despite the language of the telegram?

Mr. THOENEN. Well, I took the language of the telegram into consideration, yes.

Mr. COBURN. So that you knew there was a controversy?

Mr. THOENEN. That's right.

Mr. COBURN. You knew it was of some importance to Mr. Volin?

Mr. THOENEN. That's right.

Mr. COBURN. And yet the two sources that you contacted were the 1947 directory of the Department of Commerce and the word of the State geologist?

Mr. THOENEN. Yes, sir.

Mr. COBURN. That is all.

Representative CHUDOFF. Mr. Chairman.

Mr. Thoenen, did you have any conversation with any of the lawyers of the Interior Department before you testified here today?

Mr. THOENEN. I talked to Mr. Parriott on the telephone and I talked to him in my hotel room for a few minutes one night last week.

Representative CHUDOFF. Did he call you and see you, or did you call and ask him to come over?

Mr. THOENEN. He called to see me.

Representative CHUDOFF. And he asked you what you were going to testify to; is that it?

Mr. THOENEN. He asked me if I had known of the Williams Co. before that or if I had known anything of them after this matter, this exchange of telegrams; that's all.

Representative CHUDOFF. And you had no other conferences with any other members of the Interior Department?

Mr. THOENEN. I talked to Tom Miller, the acting director, yes, on the telephone.

Representative CHUDOFF. Did he call you, or did you call him?

Mr. THOENEN. I don't recall.

Representative CHUDOFF. What did you talk about?

Mr. THOENEN. The same thing. He asked me if I knew anything about the company prior to this telegram, or had made any inquiry concerning them since.

Representative CHUDOFF. That is all.

Mr. LANIGAN. I just want to ask you this:

When you said that the Williams Co. was listed in the Department of Commerce directory, did you mean that they were listed as assayers?

Mr. THOENEN. Yes.

Mr. LANIGAN. And what was the basis of your deciding they were listed as assayers?

Mr. THOENEN. There was some 30 or more different code numbers listed opposite their name referring to the type of investigations they made. Those codes were referred to in an earlier listing of codes in the same publication.

Mr. LANIGAN. Do you recall which symbols you concluded meant that they did assay work?

Mr. THOENEN. Chemical symbol C.

Mr. LANIGAN. You relied on the chemical symbol?

Mr. THOENEN. Yes.

Senator NEUBERGER. May I ask a question?

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. Prior to the time you received the telegram or teletype from Mr. Volin, had you ever heard of the Williams Inspection Co., Mr. Thoenen?

Mr. THOENEN. No, sir.

Senator NEUBERGER. Yet you have said that you were familiar with mining operations in Alabama.

Mr. THOENEN. That's right.

Senator NEUBERGER. Is that correct?

Mr. THOENEN. That's right.

Senator NEUBERGER. However, you had not heard of the Williams Inspection Co.?

Mr. THOENEN. No, sir.

Senator NEUBERGER. How long have you been with the Bureau of Mines?

Mr. THOENEN. Since 1927.

Senator NEUBERGER. Had you ever before encountered any such proceedings or instructions such as you received in this case in your own role?

Mr. THOENEN. I haven't received any instructions in this case.

Senator NEUBERGER. As far as your own role is concerned in checking on this company with respect to the ore samples and so on, had you had similar requests made of you?

Mr. THOENEN. I don't recall any.

Senator NEUBERGER. Have you ever heard of any other occasion when ore samples or mineral samples were sent from Oregon or some other Pacific Northwest State to Alabama for assaying? Is this the only time in your experience that you have heard of such a transcontinental assaying or testing of ores?

Mr. THOENEN. So far as I'm officially concerned with the Bureau, yes.

Senator NEUBERGER. Thank you very much. That is all I have.

Senator SCOTT. Are there any further questions?

Representative JONAS. Mr. Chairman, I will have to ask one following the questioning of Mr. Chudoff.

You testified that you have spoken with Mr. Miller, your superior, in the Bureau of Mines, and with Mr. Parriott?

Mr. THOENEN. That's right.

Representative JONAS. Since coming to Washington?

Mr. THOENEN. Yes.

Representative JONAS. And you have related the subject of the conversations with him. Did either one of those gentlemen coach you in how you should testify here, or undertake any advice to you as to what you should say, or try to get you to change your testimony in any way?

Mr. THOENEN. No, sir.

Representative JONAS. Did anyone in the Department of the Interior or elsewhere undertake to subject you to any pressure about what you would testify about in this case?

Mr. THOENEN. No, sir.

Representative JONAS. Or offer you any advice or any suggestions as to what you should say?

Mr. THOENEN. No, sir.

Representative JONAS. Was the sum and substance of their inquiries of you just about what it has been here today, what steps you took to check on the Williams Co.?

Mr. THOENEN. That's right.

Representative JONAS. You did not consider it was improper, the sort of things they asked you?

Mr. THOENEN. No, sir.

Representative JONAS. Thank you.

Senator BARRETT. Let me ask one question, Mr. Chairman.

Since this matter has come up, have you had any reason to doubt the veracity or the action taken by the State geologist in O. K.'ing this company?

Mr. THOENEN. No, sir.

Senator BARRETT. Do you think that you fulfilled your duty insofar as this wire was concerned by requesting the advice and the judgment of the State geologist of Alabama insofar as the standing of this Williams Inspection Co. is concerned?

Mr. THOENEN. I do.

Senator BARRETT. If you had to do it over, would you do anything different?

Mr. THOENEN. I doubt it.

Senator BARRETT. Of course not.

Senator SCOTT. Are there any further questions?

I want to thank you for appearing and being willing to come and come willingly, for your provided vacation away from your work.

Mr. McArdle, the chief of the Forest Service, will you come forward, please, sir?

Mr. McArdle, I will ask Congressman Chudoff to swear you in, please, sir.

Representative CHUDOFF. Will you please raise your right hand?

What is your full name?

Mr. McARDLE. Richard E. McArdle.

Representative CHUDOFF. Do you solemnly swear the testimony you are about to give before this committee shall be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. McARDLE. I do.

Representative CHUDOFF. Be seated, please.

Senator SCOTT. Mr. Redwine.

#### TESTIMONY OF RICHARD E. McARDLE, CHIEF, FOREST SERVICE, DEPARTMENT OF AGRICULTURE

Mr. REDWINE. Mr. McArdle, I am kind of at a loss as to how to address you; Mr. McArdle, Dr. McArdle, or what? Out in the field, I found almost without exception your subordinates rather affectionately called you the chief.

What shall we say? Dr. McArdle or the chief?

Mr. McARDLE. Any term you please, Mr. Redwine, only don't call me too often.

Mr. REDWINE. Chief, do you happen to have a statement with you you would like to read at this time, sir?

Mr. McARDLE. I do, Mr. Redwine. I think it might help to clarify the situation, but I am at your disposal to answer questions or read this 2- or 3-minute statement if you like.

Mr. REDWINE. Will you please read your statement, sir?

Senator SCOTT. Go right ahead, Doctor.

Mr. McARDLE. Mr. Chairman and other members, I am glad to respond to your request to testify in connection with your investigation of mining patents issued to Al Sarena Mines, Inc., on the Rogue River National Forest in Oregon. At field hearings in Portland, Oreg., last November you received testimony from several Forest Service witnesses

I have reviewed the transcript of their testimony and have only a brief supplementary statement to make.

The national forests in the West are largely reserved from the public domain by Presidential proclamation pursuant to the act of March 3, 1891. The lands of the Rogue River National Forest, within which the mining claims in question were located, were reserved for national forest purposes under Presidential proclamation of September 28, 1893.

Such national forest lands are subject to mineral location under the general mining laws in the same manner as public domain lands not reserved for national forest purposes. The mining claims in question were located at various times from 1897 through 1936.

The Department of Agriculture administers the surface resources of the national forests. The Department of the Interior administers the mining laws. Therefore, both departments have an interest in, and responsibility with respect to, mining claims and applications for patent under the mining laws when the lands involved are national forest lands.

The Department of Agriculture has always favored and encouraged the bona fide development of the mineral resources underlying the national forests. It has opposed the use of the mining laws by individuals who do not have a bona fide interest in mining, and whose purpose is to obtain use or title to tracts of lands in the national forests primarily valuable for timber or other nonmineral purposes.

There are estimated to be about 200,000 mining claims on the national forests embracing about 4 million acres.

The enactment of Public Law 167 in July 1955 by the 84th Congress was evidence that the mining industry, conservation interests, and administrators of Federal land can work together with the Congress toward solution of the conflicts of interest which arise between surface and subsurface resources.

By a joint order of the Secretaries of Agriculture and Interior which dates back to 1915, the Department of the Interior notifies the Department of Agriculture of all applications to patent mining claims occurring on national forest land. All such claims are examined by qualified mineral examiners employed by the Forest Service, or by mineral examiners from the Bureau of Land Management. These mineral examiners are qualified and experienced mineralogists, geologists, or mining engineers.

The purpose of such examinations is to determine whether the claimant has met the requirements of the mining laws respecting the discovery of minerals and performance of minimum development work. Based on reports of these mineral examiners, the regional foresters, in turn, report to the appropriate field officials of the Bureau of Land Management either recommending issuance of patent or filing a protest against issuance.

If the Forest Service files a protest and if the applicant decides to press his application notwithstanding such protest, a hearing is held by Bureau of Land Management field officials and a decision rendered by them. This decision of the Bureau of Land Management field office may be appealed by either party to the Director of the Bureau of Land Management in Washington, and ultimately to the Secretary of the Interior.

The application for patent of the Al Sarena mining claims has been handled in a standard and normal manner insofar as Forest Service actions have been involved.

In accordance with the agreement between Agriculture and Interior and the rules of practice of the Department of the Interior, the Manager of the Bureau of Land Management office at Portland sent a copy of the application for patent by Al Sarena Mines, Inc., to the Portland office of the Forest Service on December 7, 1948. At that time the Forest Service did not have a mineral examiner assigned to our Portland office, so the regional forester there arranged with the Bureau of Land Management for Mr. E. M. Hattan, a Bureau of Land Management mineral examiner, to make the examination for the Forest Service. This was done in May 1949.

Mr. Hattan's examination and the assay results of the samples he took raised a question in his mind as to whether there was a sufficient showing of minerals to meet the requirements for patenting on some of the 23 claims.

In order to forestall any possibility of error, Mr. Hattan recommended that a Forest Service mineral examiner collaborate with him in a reexamination of the claims.

In accordance with this request, a Forest Service mineral examiner, William C. Sanborn, assigned to our San Francisco office, accompanied Mr. Hattan on a reexamination of the claims July 12-15, 1949. Both of these men testified before your committee last November in Portland.

A report was then prepared by Mr. Hattan, concurred in by Mr. Sanborn, and submitted to our regional forester at Portland. This report recommended that application for patent be protested for 15 of the 23 claims involved.

The Regional Forester accepted this recommendation and formally filed his protest on April 11, 1950.

In September 1950, a hearing was held before the manager of the Bureau of Land Management's Portland office, at which the Forest Service presented its evidence.

On December 14, 1950, the manager rendered a decision denying application for patent to the 15 protested claims. This was appealed by Al Sarena Mines, Inc., to the Director of the Bureau of Land Management, and a decision was rendered by the assistant director on April 27, 1951, sustaining the original decision.

The claimants appealed that decision to the Secretary of the Department of the Interior, acting under delegation from the Secretary, reversed the earlier decisions, and ordered that patent be issued to all 23 of the claims. This patent was issued on February 11, 1954.

Since that time the Forest Service has treated the patented lands exactly as any other private lands within the exterior boundaries of the national forests.

The briefs filed by the Forest Service and the testimony of Forest Service employees before the manager of the Bureau of Land Management in Portland fully reflected Forest Service views and reasons why the Forest Service protested issuance of patent to 15 of the 23 claims.

The views of the Forest Service and its evidence were presented to the Department of the Interior at the hearing before the manager and were a part of the record on the appeals to the director of the Bureau of Land Management and the Secretary of Interior.

Because of the attention directed to this case by your committees, I have checked into Forest Service actions with respect to it with the utmost care.

I am convinced that the Forest Service employees associated with the case acted in good faith and performed their duties in a satisfactory manner.

Mr. REDWINE. Chief, tell the committee something about your career and background in the Forest Service, will you, please?

Mr. McARDLE. I have been in the Forest Service for 32 years, starting in Idaho and in Oregon and in Washington, and in Colorado, Wyoming, and South Dakota; then in the southeastern States, and finally here in Washington.

I started in the research field and changed to the branch which has to do with cooperative relationships with States and private industry, and have been the director of two forest experiment stations.

I was assistant chief here in Washington for about 8 years before I became chief in June of 1952.

Mr. REDWINE. Chief, I believe the chairman of the Senate Committee would be interested in knowing whether you were ever stationed in his State.

Mr. McARDLE. I was stationed in Asheville, N. C.

Senator SCOTT. You worked largely, then, with the Pisgah National Forest and program in the western Carolinas?

Mr. McARDLE. Yes, sir, but the territory at that time, Senator Scott, included also Virginia and West Virginia, Kentucky, and South Carolina.

Senator SCOTT. And you also knew about the Biltmore estate and that development there by Mr. Pinchot, who later became Governor of Pennsylvania?

Mr. McARDLE. I do; yes, sir.

Senator SCOTT. That was a good piece of work; was it not?

Mr. McARDLE. That was a fine piece of work.

Senator SCOTT. The time when you were there which, as you mentioned in the beginning of your testimony, was around 1949, was when this thing became active out in Oregon?

Mr. McARDLE. May I correct you slightly, Senator Scott? I came to Washington in 1944 as Assistant Chief. You were probably thinking of 1939. You are thinking of a meeting that you and I had in, I think, about 1939.

Senator SCOTT. That has been a long time ago. A lot of things have happened. I was commissioner of agriculture and we had a lot of mutual problems which we needed to discuss from time to time. That is when I became acquainted with you.

Mr. McARDLE. We did; yes, sir.

Senator SCOTT. Proceed.

Mr. REDWINE. Chief, getting right down to the nub of what the committee wants to know, among many things, from you, relating directly to the sampling and assaying of the 15 contested claims and the decision of the Solicitor that flowed from that, was the Forest Service ever advised that such a procedure was going on?

Mr. McARDLE. Do I understand you, Mr. Redwine, to mean the sampling done by the Bureau of Mines?

Mr. REDWINE. Yes, sir.

Mr. McARDLE. We were not informed; no, sir.

Mr. REDWINE. You were never informed. The first you knew of it was when? How did you first learn that there had been this sampling, these additional assays, and a decision rendered based on them?

Mr. McARDLE. When we read the decision of the Solicitor in January of 1954.

Mr. REDWINE. Chief McArdle, has there ever been such procedure followed in any other case respecting forest lands?

Mr. McARDLE. Not to my knowledge. It is within the province of the Secretary of the Interior under the rules of the Department to call in outside witnesses.

Mr. REDWINE. That is beside the point, sir. I do not blame you for bringing that in, but, to your knowledge, that has never been done except in this case involving forest lands?

Mr. McARDLE. So far as I know, in no case affecting the Forest Service.

Senator SCOTT. When the Secretary or Assistant Secretary overrules in a matter of this kind, is the Department called into the matter to let you know what is going to be done or anything of that kind?

Mr. McARDLE. The Department of Interior rules of practice require that the party appealing a decision provide the other party with a copy of his appeal brief. We are thus informed each time a claimant appeals a decision of the Manager or Director of the Bureau of Land Management.

Senator SCOTT. Would you call this an unusual procedure as developed in this case?

Mr. McARDLE. Well, it was different than anything I experienced before; yes, sir.

Mr. REDWINE. Chief McArdle, do many cases arise where one seeks patent on forest lands and the Forest Service protests the granting of patents?

Mr. McARDLE. I couldn't give you a figure. I would say that it is more than occasional.

Mr. REDWINE. It is more than occasional. Let us pursue that. Then it goes to the Bureau of Land Management hearing officer for determination; does it not?

Mr. McARDLE. If the claimant objects to our protest.

Mr. REDWINE. Assuming that the claimant objects to your protest, then it goes to a hearing before a Bureau of Land Management hearing officer?

Mr. McARDLE. A local Bureau of Land Management employee.

Mr. REDWINE. Yes, local.

Let me ask you this: May either the Bureau of Land Management or the petitioner for a patent appeal that decision?

Mr. McARDLE. The decision is made by the local manager for the Bureau of Land Management and we may appeal or the claimant may appeal.

Mr. REDWINE. To whom? I am talking about appeal from the local hearing officer.

Mr. McARDLE. To the Director of the Bureau of Land Management.

Mr. REDWINE. Yes, sir. Then what happens?

Mr. McARDLE. Then, if that decision does not suit either party, either party may appeal to the Secretary of the Interior.

Mr. REDWINE. Now, in your experience, where the question was on appeal to the Secretary of the Interior, have you ever been called in to offer additional testimony or anything of that nature to the Secretary of the Interior on an appeal?

Mr. McARDLE. Mr. Redwine, I don't know the answer to that question. I think the original record is made at the local level and that is the record which is reviewed at each stage as it goes up, but I don't know exactly.

Mr. REDWINE. In other words, it is your recollection that the matter is decided at the Secretary's level on the basis of the evidence presented at the local level?

Mr. McARDLE. I think that is the answer; yes.

Mr. REDWINE. That is normal procedure, according to your belief?

Mr. McARDLE. That has been normal procedure; yes, sir.

Mr. REDWINE. That has been normal procedure?

Mr. McARDLE. I think so, but, if you want the exact answer to that, you must ask it of our lawyers.

Mr. REDWINE. Will you make one of the solicitors of your department available to us if the committee desires to ask that question?

Mr. McARDLE. Yes, sir.

Mr. REDWINE. Can you, from memory, tell the committee whether there has ever been a case where a matter was on appeal and the Secretary remanded it back to the lower level for further proceedings?

Mr. McARDLE. I can't answer that, either.

Mr. REDWINE. I make the same request from your solicitor, please.

Mr. McARDLE. I can furnish the answer.

Mr. REDWINE. Please furnish that in writing. We will furnish the questions in writing, and may that be included in the record, Mr. Chairman?

Senator SCOTT. Will you do that, Doctor?

Mr. McARDLE. Yes; we will do that.

Senator SCOTT. It will be included in the record.

(See p. 433.)

Representative JONAS. Before you go on, I do not quite understand what Mr. Redwine proposes. He is going to ask a lawyer in the office of the Forest Service something about the procedure followed in the office of the Secretary of the Interior.

That is not quite according to Hoyle, is it?

Mr. REDWINE. Mr. Chairman, if I may say, what we are asking for is what has been the experience of the Forest Service in respect to Forest Service lands up for patent in a case such as has been postulated; what has been the experience as to whether it is remanded for further hearing, or just how is it handled.

Representative JONAS. Well, the Forest Service does not have anything to do with the hearing. It is one of the contesting parties at the hearing. It is the Bureau of Land Management that conducts the hearing.

Mr. REDWINE. But the Forest Service is the interested party.

Representative JONAS. It is just one of the parties to a contest.

Mr. REDWINE. One of the parties; yes, sir.

Representative JONAS. You are asking one of the parties to a contest to tell you something about the procedures used by the judge when you have the judge available. I think the inquiry should be directed to the Bureau of Land Management or to the Secretary of the Interior if you want the best answer.

Mr. REDWINE. Mr. Chairman, may I say that what we are trying to develop here is: Does the contestant, which in a case of this kind is the Forest Service, ever get an opportunity to offer additional testimony, or are they shut out, as was done in the Al Sarena case? Do they have an opportunity to rebut the new testimony offered by the petitioner and to cross-examine, which the rules of procedure very definitely call for, that both parties shall have the right to cross-examine the witnesses offered by the other side?

Mr. REDWINE. That is beside the point, sir. I do not blame you for bringing that in, but, to your knowledge, that has never been done except in this case involving forest lands?

Mr. McARDLE. So far as I know, in no case affecting the Forest Service.

Senator SCOTT. When the Secretary or Assistant Secretary overrules in a matter of this kind, is the Department called into the matter to let you know what is going to be done or anything of that kind?

Mr. McARDLE. The Department of Interior rules of practice require that the party appealing a decision provide the other party with a copy of his appeal brief. We are thus informed each time a claimant appeals a decision of the Manager or Director of the Bureau of Land Management.

Senator SCOTT. Would you call this an unusual procedure as developed in this case?

Mr. McARDLE. Well, it was different than anything I experienced before; yes, sir.

Mr. REDWINE. Chief McArdle, do many cases arise where one seeks patent on forest lands and the Forest Service protests the granting of patents?

Mr. McARDLE. I couldn't give you a figure. I would say that it is more than occasional.

Mr. REDWINE. It is more than occasional. Let us pursue that. Then it goes to the Bureau of Land Management hearing officer for determination; does it not?

Mr. McARDLE. If the claimant objects to our protest.

Mr. REDWINE. Assuming that the claimant objects to your protest, then it goes to a hearing before a Bureau of Land Management hearing officer?

Mr. McARDLE. A local Bureau of Land Management employee.

Mr. REDWINE. Yes, local.

Let me ask you this: May either the Bureau of Land Management or the petitioner for a patent appeal that decision?

Mr. McARDLE. The decision is made by the local manager for the Bureau of Land Management and we may appeal or the claimant may appeal.

Mr. REDWINE. To whom? I am talking about appeal from the local hearing officer.

Mr. McARDLE. To the Director of the Bureau of Land Management.

Mr. REDWINE. Yes, sir. Then what happens?

Mr. McARDLE. Then, if that decision does not suit either party, either party may appeal to the Secretary of the Interior.

Mr. REDWINE. Now, in your experience, where the question was on appeal to the Secretary of the Interior, have you ever been called in to offer additional testimony or anything of that nature to the Secretary of the Interior on an appeal?

Mr. McARDLE. Mr. Redwine, I don't know the answer to that question. I think the original record is made at the local level and that is the record which is reviewed at each stage as it goes up, but I don't know exactly.

Mr. REDWINE. In other words, it is your recollection that the matter is decided at the Secretary's level on the basis of the evidence presented at the local level?

Mr. McARDLE. I think that is the answer; yes.

Mr. REDWINE. That is normal procedure, according to your belief?

Mr. McARDLE. That has been normal procedure; yes, sir.

Mr. REDWINE. That has been normal procedure?

Mr. McARDLE. I think so, but, if you want the exact answer to that, you must ask it of our lawyers.

Mr. REDWINE. Will you make one of the solicitors of your department available to us if the committee desires to ask that question?

Mr. McARDLE. Yes, sir.

Mr. REDWINE. Can you, from memory, tell the committee whether there has ever been a case where a matter was on appeal and the Secretary remanded it back to the lower level for further proceedings?

Mr. McARDLE. I can't answer that, either.

Mr. REDWINE. I make the same request from your solicitor, please.

Mr. McARDLE. I can furnish the answer.

Mr. REDWINE. Please furnish that in writing. We will furnish the questions in writing, and may that be included in the record, Mr. Chairman?

Senator SCOTT. Will you do that, Doctor?

Mr. McARDLE. Yes; we will do that.

Senator SCOTT. It will be included in the record.

(See p. 433.)

Representative JONAS. Before you go on, I do not quite understand what Mr. Redwine proposes. He is going to ask a lawyer in the office of the Forest Service something about the procedure followed in the office of the Secretary of the Interior.

That is not quite according to Hoyle, is it?

Mr. REDWINE. Mr. Chairman, if I may say, what we are asking for is what has been the experience of the Forest Service in respect to Forest Service lands up for patent in a case such as has been postulated; what has been the experience as to whether it is remanded for further hearing, or just how is it handled.

Representative JONAS. Well, the Forest Service does not have anything to do with the hearing. It is one of the contesting parties at the hearing. It is the Bureau of Land Management that conducts the hearing.

Mr. REDWINE. But the Forest Service is the interested party.

Representative JONAS. It is just one of the parties to a contest.

Mr. REDWINE. One of the parties; yes, sir.

Representative JONAS. You are asking one of the parties to a contest to tell you something about the procedures used by the judge when you have the judge available. I think the inquiry should be directed to the Bureau of Land Management or to the Secretary of the Interior if you want the best answer.

Mr. REDWINE. Mr. Chairman, may I say that what we are trying to develop here is: Does the contestant, which in a case of this kind is the Forest Service, ever get an opportunity to offer additional testimony, or are they shut out, as was done in the Al Sarena case? Do they have an opportunity to rebut the new testimony offered by the petitioner and to cross-examine, which the rules of procedure very definitely call for, that both parties shall have the right to cross-examine the witnesses offered by the other side?

Representative HOFFMAN. It does not state that they have that right before the Secretary, does it; or, if it does, where is the law that says they shall have the right to put in witnesses before the Secretary?

Mr. REDWINE. Mr. Chairman, the whole question goes as to remanding the matter to the hearing officer, as to what the procedure is on that.

Representative JONAS. I think we would all stipulate that the Secretary has the right to remand or the right to affirm or the right to reverse. I mean that we do not need to clutter up the record getting testimony on that. Will we not all agree that the Secretary could have remanded this case if he had elected to do so?

Mr. REDWINE. The answer that counsel is trying to develop is as to whether in the past it has been the practice to remand in cases of this kind, or whether this is the first and only time where the taking of additional testimony was allowed that it was not remanded but was handled at that level.

Representative CHUDOFF. I would like to understand the issue in this case, because I get confused as to what is going on.

The issue is that they got notice of the appeal, but they got no right to examine the new evidence produced by the claimants, the Al Sarena Co., concerning the assays. They did not have an opportunity to combat the new evidence given by them or to cross-examine it to determine whether it was good evidence.

Representative HOFFMAN. Mr. Chairman, both Sanborn and Hattan took samples and put in their case in September 1950 before the examiner.

Representative CHUDOFF. Is it not good court and hearing procedure that where new evidence is to be taken, the appellate division of the court refers it back to the lower court to take the evidence? They do not take the evidence themselves and decide the case on the basis of new evidence without giving the other side the opportunity to examine and cross-examine on it.

Representative JONAS. My difficulty is that I do not know what was in the Secretary's mind. That is the reason I think we ought to have him here.

Senator SCOTT. I think that that is what we all want to know.

Representative CHUDOFF. I agree. I think that if we finish with these witnesses, we will get Mr. Davis and the Secretary here.

Senator SCOTT. Let us get back to Dr. McArdle now.

Mr. COBURN. Doctor, on page 2 of your statement, in the first full paragraph, you say that there are estimated to be about 2,000 mining claims on the national forests embracing about 4 million acres.

Now, you have also testified, have you not, that this was an unusual procedure in your experience, this Al Sarena case?

Mr. McARDLE. Mr. Coburn, there was nothing unusual about this up to the point that I testified on, that the referral of this to the Bureau of Mines was different than we had experienced before.

Mr. COBURN. That is precisely what I was referring to. Perhaps the question was a little too general.

Mr. McARDLE. The rest of it was routine.

Mr. COBURN. The rest was routine, up until it reached the higher echelons of the Department of the Interior?

Mr. McARDLE. That is right.

Mr. COBURN. If the later procedure followed by the Secretary in ordering the Bureau of Mines into the procedure were to become a

precedent, and I assume that it is a precedent inasmuch as it has been done, what would happen to the administration of the national forests where you say there are 200,000 mining claims?

Mr. McARDLE. That would make a difficult situation even more difficult, but I should say that we considered that matter and, in the opinion of our lawyers, it did not set a precedent, in this particular case.

Mr. COBURN. Your lawyers are hopeful that it did not establish a precedent?

Mr. McARDLE. Yes, sir.

Mr. COBURN. But you will concede, will you not, Dr. McArdle, that, insofar as precedents within the Department of the Interior are concerned, what your lawyers think in the Department of Agriculture may have little bearing?

Mr. McARDLE. We were fearful that it would become a precedent.

Mr. COBURN. You were fearful. You are not fearful now?

Mr. McARDLE. Well, I trust in the lawyers.

Mr. COBURN. They say that this will not be a precedent of the Department of the Interior in its actions in the future?

Mr. McARDLE. That is my understanding.

Representative HOFFMAN. There you go again, Mr. Coburn.

Here we have hearsay. He is telling what his lawyers tell him. Why not follow the usual rules about producing evidence?

Mr. COBURN. Mr. Chairman, I think that is a fair question to ask the witness.

Representative HOFFMAN. I know that or you would not have asked it.

Senator NEUBERGER. I have kept quiet this afternoon. I think that is a fair question.

The gentleman from Michigan has asked the witnesses about their opinion of the committee and their opinion of how they are treated.

Representative HOFFMAN. I have also expressed my opinion about how the committee treated them.

Mr. COBURN. Let us get to this point:

Do your lawyers also tell you that, in their opinion, their belief as to the nature of this precedent would be binding on the Department of the Interior?

Mr. McARDLE. I have not inquired as to that point.

Mr. COBURN. Now, pursuing this a little further, on what legal basis did the Forest Service protest this application for patent?

Mr. McARDLE. I am not absolutely certain, Mr. Coburn, of the legal basis, but I referred in my testimony to the fact that, by joint order of the Secretary of Agriculture and the Secretary of Interior, made in 1915, the Bureau of Land Management, acting for the Department of the Interior, reports to us all applications for patent which involve national forest lands.

Mr. COBURN. That is the normal way of doing it, established in 1915?

Mr. McARDLE. That is the routine manner.

Mr. COBURN. You felt that the Forest Service in this case was duty bound and bound by the order to proceed as it did?

Mr. McARDLE. We did.

Mr. COBURN. And the Forest Service conclusion, at least at the lower echelon, was that there was not sufficient mineralization?

**Mr. McARDLE.** We acted on the recommendation of Mr. Hattan, the mineral examiner for the Bureau of Land Management who served for us in this case.

**Mr. COBURN.** What about the evidence produced by your own man, Mr. Sanborn?

**Mr. McARDLE.** That confirmed the evidence obtained by Mr. Hattan.

**Mr. COBURN.** How many tests were taken in all?

**Mr. McARDLE.** I can provide that information. I don't have it.

**Mr. COBURN.** The record will show that at least three were taken.

**Mr. McARDLE.** If the samples collected by the claimant are included, more than that were taken.

**Mr. COBURN.** More than three. On the basis of the evidence produced by these competent mineral engineers of the Forest Service and the Department of the Interior, your Regional Forester decided that the application for patent should not be granted, or decided to protest?

**Mr. McARDLE.** He decided to protest.

**Mr. COBURN.** He decided to continue this protest?

**Mr. McARDLE.** The protest was carried through to the Secretary of the Interior by the applicant.

**Mr. COBURN.** Can you give us at this time any estimate of the value of the merchantable timber on these mining claims?

**Mr. McARDLE.** I am referring now only to the 15 protested claims.

**Mr. COBURN.** Precisely.

**Mr. McARDLE.** I have no information on the other eight claims.

**Representative JONAS.** Pardon me.

Before he responds, will you have him designate as of what date?

**Mr. COBURN.** I said as of this date.

**Representative JONAS.** Mr. Chairman, I would respectfully suggest that the value of the timber should be dated as of the time application for the patent was made, which would have been 1948, because that is the time the claim was made and, if it is ever approved, relates back to the date it was filed, and the value of the timber, of whatever worth it is to us, should be based on its market value at the time the patent was applied for.

**Mr. COBURN.** Mr. Chairman, perhaps the Chief of the Forest Service would be able to give us both figures. Would that be satisfactory?

**Representative JONAS.** I do not think that the present day figure will have any relationship. It will be worth maybe twice that much 10 years from now, but of what value is that to the committee?

**Mr. COBURN.** Well, it might turn out that, since as I understand it very little timber has been cut to date, we may be able to preserve this natural resource in some way.

**Representative JONAS.** If we have the right to upset this, that is a different matter.

**Mr. COBURN.** Mr. Chairman, I think it is fair to try to determine as accurately as we can the value of this timber, (a) when Congressman Jonas wants it to, (b) what it is today, so that the present public will know what is involved here.

**Representative CHUDOFF.** Mr. Chairman, that has come up before. That was argued yesterday.

**Senator SCOTT.** I think that Mr. Coburn is right in that we ought to have that information as of today as well as on the date referred to by Congressman Jonas.

**Representative CHUDOFF.** I want to make a further request.

I understand that Representative Jonas would like the date as of the date application for the patent was made, and Mr. Coburn would like it as of today.

I would like it as of January 6, 1954, the date that the final decision was entered. I think that is the date that is the prevailing date.

If this had declined in value, the Al Sarena people would not be pressing their claim. You know, if you read the record on our timber investigations, that timber is going to be worth more and more and more because of the scarcity of timber in the Northwest.

I think we can get those three dates, and everybody will be happy.

Senator SCOTT. I think, too, at this point it will be well to bring out, for the reason that we may need it if we need to plug up some more loopholes, and it is being brought out very definitely, not only here but by personal experience wherever we go, that values in all fields are changing and what was of little consequence, say, in 1949, is very important now, not only in this field but in all other fields.

I think that we ought to bring our thinking up to the current date on it and be guided as to what we should do.

Senator NEUBERGER. I think, Mr. Chairman, that one vital thing to remember is this: that the important thing is the value of the timber at the time this company might sell and market it commercially, because all during this proceeding the people who have been defending what happened have been claiming that this is a valid mining operation, that this is not, according to their own claim, a commercial-timber operation. They say it is a valid mine.

Thus, the basic thing is the value of the timber at the time they might market and sell it commercially, which has nothing to do with any mining operation.

Senator GOLDWATER. Mr. Chairman, might I suggest that that is quite a supposition.

Dr. McARDLE has just said, if I heard correctly, that there has been no commercial cutting of timber on this claim.

Mr. McARDLE. I did not say that, Senator Goldwater.

Senator GOLDWATER. What did you say?

Mr. McARDLE. Senator, I said that it was my understanding that little timber had been cut to date.

Senator GOLDWATER. So that when we assume that this Al Sarena Mining Co. is more interested in the timber than in the testified to bulk of ore underneath it, we are treading on the thin ice of supposition, and I think also that that is one of the claims to which we have constantly been objecting.

Representative JONAS. Before we leave that subject, and then I will not ask anything else, will counsel correct me if I am wrong in my recollection that there is evidence in the record that the Al Sarena people were filing claims to this property at a time when timber was not worth anything in Oregon, or from \$2 a thousand? Is there any testimony to that effect in the record anywhere?

Mr. COBURN. There is none, to my recollection, which says it was worth nothing. The values were considerably lower.

Representative JONAS. That property was being sold for taxes, so that the timber was not worth the tax.

Mr. COBURN. That might be true as to other areas.

Representative JONAS. I mean the areas as to these 23 claims.

Mr. COBURN. I recall no testimony as to these claims.

Representative JONAS. I will look it up. I am sure that it is in here.

Representative HOFFMAN. I ask the witness to tell us whether he is basing his estimate of the value of the timber on Drew Pearson's estimate or basing it on Leavengood's.

Mr. McARDLE. I can answer that question. The estimates which I will give the committee if I am asked—and I understand that is what you want at present, but you have asked so many different estimates that I will have to have it clarified—will be based basically on the examination made by our man, Leavengood, whom you heard in Portland, Mr. Hoffman.

Representative HOFFMAN. Let me interrupt once more. Then I understand that your testimony as to value is based solely on the testimony of Mr. Leavengood as contained in the record and which you have read?

Mr. McARDLE. And as contained in his notes on which he based his testimony.

Representative HOFFMAN. Are those before you?

Mr. McARDLE. Mr. Hoffman, as far as I can find from the testimony, the only figure that Leavengood gave the committee was the figure of an average stand of about 25,000 board-feet per acre.

Representative HOFFMAN. Let me interrupt you and then I will not interrupt you again. You are basing your testimony upon the record as made and which you have had before you, and you said something about notes. Did Mr. Leavengood show you other notes that are not in the record?

Mr. McARDLE. That is correct; his field notes that he had in testifying before the Bureau of Land Management.

Representative HOFFMAN. I would like to have those so that I may look at them when I ask the questions, if I may. That would be only fair; would it not?

Mr. McARDLE. Yes, sir; but I wanted to point out that he testified before the committee only to 25,000 board-feet per acre, and then the committee asked him to hazard a guess as to the growth rate, which he did, and then asked for a value figure as of 1950, when he made his survey.

Representative HOFFMAN. And he also testified to 250 feet in the young growth.

Mr. McARDLE. Two hundred and fifty board-feet per acre growth.

Representative HOFFMAN. Young growth?

Mr. McARDLE. Yes, sir; and testified that the old growth—the old timber—was making very little net growth.

Representative HOFFMAN. And that 250 was in addition to the 25,000?

Mr. McARDLE. The 25,000 was average stand or volume of the old overmature timber.

Representative HOFFMAN. I am sorry to interrupt.

Mr. CORBURN. Mr. Chairman, I do not mean this as facetiously as it sounds, but I raise this question: Is it necessary to qualify the Chief of the United States Forest Service to make an estimate of timber growing on a national forest?

Senator GOLDWATER. I might suggest that you have been challenging the qualifications of graduate mining engineers and geologists to tell what is a good assayer and what is not. I do not doubt Dr. McARDLE's word. I think that the Forest Service has the best estimates on board-

feet in the country. I have heard him testify many times on lands that he and I have worked on together. I would like to hear his testimony.

Representative CHUDOFF. Since we agree that Dr. McARDLE is able to give us the value and is competent, I think that we ought to have a value at the date the patent was filed, the date the final decision was made, and the value today, and everybody on the joint committee will have the figure he wants.

Representative JONAS. I do not follow that at all. I can have all the confidence in the world in a witness and I have nothing to say against him at all, but what can he know about the value of some timber in Oregon unless he has inspected it; or is not his evidence bound to be hearsay?

Representative HOFFMAN. All he is testifying to is what Leavengood said.

Representative CHUDOFF. Why are you so anxious to lower the value of this timber? Are you not interested in the true value of the timber?

Representative JONAS. Of course I am, but all I want to know is whether the information he gives us is from an independent investigation he has made or what he got from his subordinates.

Senator NEUBERGER. Let me interject one thing, please.

If the Congressman from North Carolina is going to criticize independent investigations rather than those that come from the Government, the only independent investigation I know of that was included into this was Williams Assay Co.

Representative JONAS. I am not criticizing any independent investigation.

Senator NEUBERGER. You have.

Representative JONAS. I asked him to say whether the information he gives us now comes from Leavengood, who has already testified.

Representative CHUDOFF. He has already said it does. He says it comes from Mr. Leavengood's testimony and from the notes which Mr. Leavengood made, which are not in the record, and he is willing to give us the notes. What better information than that can we get?

Representative JONAS. Go ahead.

Mr. REDWINE. Go ahead, Mr. McARDLE.

Mr. McARDLE. What shall I go ahead with?

Mr. COBURN. We would like to have your estimate of the value of the timber at the time the application was filed.

Mr. McARDLE. I can't give you that because that, if my memory serves me correctly, was in 1948, but the hearing on the protest was held in Portland in September 1950, and Mr. Leavengood made his examination early in September of 1950. He made his calculations based on 1950 prices.

Mr. COBURN. All right, sir.

Mr. McARDLE. Briefly, Mr. Leavengood found that this stand of timber covering some 294 acres on the 15 protested claims consisted about 85 percent of overmature, or at least very mature, Douglas fir timber and about 15 percent sugar pine, also mature.

Mr. COBURN. By "overmature," you mean merchantable?

Mr. McARDLE. I mean it was old timber and merchantable. For trees 16 inches and larger in diameter, he estimated—and you do not

have this figure so far as I know in your record anywhere—7,350,000 board feet on the 15 claims.

Again I will say that that is the total figure for the merchantable old growth timber 16 inches and larger.

He also testified that there was some additional young growth timber. He estimated an average stand per acre of 25,000 board feet, from trees 16 inches and larger in diameter.

It is estimated that, at 1950 prices, Douglas fir would be appraised at \$14.40 a thousand; the sugar pine at \$32.90 a thousand; or an average total price for both species of \$17.17 a thousand board feet.

Mr. COBURN. On 7,750,000 board feet, that comes to how much?

Mr. McARDLE. The figure that you have in the record is \$77,000.

Senator GOLDWATER. Would the counsel allow me to question something there?

Doctor, would you go back over the averaging that you did? You had \$14 for Douglas fir and then you had what for the sugar pine?

Mr. McARDLE. \$32.90. Senator, you do not add those and divide because the volume of each species is different.

Senator GOLDWATER. That \$17 seems a little high with an 85 percent weight on the 14.

Mr. McARDLE. The stand, as estimated by Leavengood, was 6,250,000 board feet of Douglas fir at \$14.40 per thousand. There was 1,100,000 board feet of sugar pine at a price of \$32.90 a thousand.

If you will multiply those out, you will find that the average is \$17.17.

Senator GOLDWATER. Thank you.

Mr. McARDLE. I think I need, Mr. Coburn, to clarify one thing that is in the record.

You have had in the record, and reference has been made to it, a \$77,000 value of this timber. But Mr. Leavengood's testimony was based on cutting approximately two-thirds of the merchantable timber and leaving about one-third, which at that time was standard Forest Service practice.

I assume this committee wants the total value of the total merchantable stand?

Mr. COBURN. That is correct.

Mr. McARDLE. I think it would clarify things if reference were made to total stand and not to a partial stand.

Mr. COBURN. What is the total, then, based on the total merchantable timber stand at that time?

Mr. McARDLE. With the figures that I have given you, the total value of this merchantable stand at 1950 prices was \$126,190.

Mr. COBURN. Now, may we have the same data as to the date January 6, 1954, the date when Mr. Davis rendered his decision.

Mr. McARDLE. I cannot give that figure to you. I can give you the 1955 figure.

Mr. COBURN. As of now?

Mr. McARDLE. Well, as of last year.

Mr. COBURN. As of last year. All right.

Mr. McARDLE. 1955 prices.

Mr. COBURN. Is it possible to compile a figure as to the date that Congressman Chudoff wants; that is, January 6, 1954?

Mr. McARDLE. Yes, sir.

Mr. COBURN. Will you get that information?

(See p. 434.)

Mr. McARDLE. We will get that information.

Mr. COBURN. What is the 1955 figure?

Mr. McARDLE. The figure for 1955—and you will, of course, recognize that, as Congressman Jonas has pointed out, there has been a sharp increase in prices—the figure of \$126,000 changes to \$231,775.

Mr. COBURN. Over a quarter of a million dollars; is that correct?

Mr. McARDLE. There has been a substantial increase.

Mr. REDWINE. Chief, would you at this particular point testify as to this:

All these figures that you have given, including the 1955 figure, give timber 16 inches and under remaining on the stands; do they not?

Mr. McARDLE. Correct, sir. They do not include timber below 16 inches in diameter.

Mr. REDWINE. In that area, what is the practice? Are they cutting timber below 16 inches?

Mr. McARDLE. In some places they are.

Mr. REDWINE. What is the value of timber of that size, sir?

Mr. McARDLE. I would have a hard time guessing at that because, as far as I know, there is nothing in Leavengood's notes to substantiate anything I would say.

Mr. REDWINE. Let us be sure that each knows what the other is thinking.

In the Rogue River, are they cutting timber from 10 to 16 inches in size?

Mr. McARDLE. In some places they are.

Mr. REDWINE. I realize that you may not have these figures at your fingertips, but will you determine and let the committee know what the stand of timber is from 10 inches in diameter up to 16 estimated, and what the going price is in that area for such timber at this time?

Mr. McARDLE. We will attempt to do it.

I understand that it is that area, not on these particular claims.

I have no specific information for these particular claims to answer the question just asked.

Mr. REDWINE. Will you give it area-wise?

Mr. McARDLE. I will attempt to do it.

(See p. 434.)

Mr. COBURN. So long as the patents have been issued, Doctor, you have no way of getting information as to these 15 claims, do you?

Mr. McARDLE. That is private land.

Mr. COBURN. That is correct.

Senator KUCHEL. Mr. Chairman, may I ask a couple of questions?

Senator SCOTT. Yes.

Senator KUCHEL. Dr. McArdle, from a procedural standpoint, did the 23 patents which were sent to your office constitute just one petition? In other words, the petition of this company was composed of 23 different proposed patents?

Mr. McARDLE. Senator Kuchel, I cannot answer that. I believe it is correct that there was one application covering the whole.

Senator KUCHEL. At any rate, the 23 were considered by the Forest Service at the same time?

Mr. McARDLE. We considered all 23 claims included in the application for patent and determined on the basis of the report by the mineral examiner, not to protest 8 but to protest 15.

Senator KUCHEL. Is it fair to say that by not protesting 8 of them you have proved 8 of them and found the balance, the 15, deficient in mineral deposits?

Mr. McARDLE. In the opinion of these experienced mineral examiners, they felt that the mining laws had been complied with and that there would be no reason for objecting.

Senator KUCHEL. Do those 23 patents represent contiguous land in Oregon?

Mr. McARDLE. I have seen the map and, to my recollection, they all adjoin each other.

Senator KUCHEL. Under the law, at what time would title be presumed to vest in this applicant, this Al Sarena Co.; at the time that they filed the petition to the extent that it would not be objected to thereafter by the Department?

Mr. McARDLE. Senator Kuchel, you are over my head now in some legal matters. I would assume that it was when patent was issued.

Senator KUCHEL. What I am getting around to is this:

I think that if we want to make a fair estimate of timber value which is involved in this congressional hearing, it is first necessary to determine whether or not the Al Sarena Co. was deemed to be the owner of 8 of the patents at the time in 1948 at which it originally applied for them and, if that is true, then it would follow that the 1948 value to that extent, I suppose, should be put on at least those patents.

Are you able to break down the value which you have placed on the entire group of 23 and to indicate to the committee the value which you would place on the 8 patents to which no objection was made by you, as of the time the petition was filed?

Mr. McARDLE. May I make one point clear?

The figures I gave you apply only to the 15 protested claims and not to the entire 23. We have absolutely no information on the eight which we did not protest.

Senator KUCHEL. That is helpful to me.

In other words, the figures that you have then given for both 1950 and 1955 represent only those against which you made an objection?

Mr. McARDLE. Yes, sir.

Senator KUCHEL. And you cannot state under the law at what time title to those 15 would be deemed to vest in the Al Sarena Co.?

Mr. McARDLE. In my opinion, it was when patent was issued, February 11, 1954.

Senator KUCHEL. And it would not date back to 1948?

Mr. McARDLE. So far as I am aware, no sir; but that is a legal question which I think you had better inquire further on.

Mr. REDWINE. Mr. Chairman.

Senator SCOTT. Mr. Redwine.

Mr. REDWINE. Would you pardon me, Senator Kuchel?

I have just learned that the Associate Solicitor of the Department of Agriculture, who is adviser to Chief McArdle, is in the room. To clear up some earlier testimony that we asked the Chief to furnish us in writing, may we interrupt at this time, Mr. Chairman, and let Mr. Mynatt come forward and answer some of these legal questions? Then we will call the Chief back.

Senator KUCHEL. I have just a couple more questions. Then I will be through with Dr. McArdle.

Senator SCOTT. I would just like to say, Senator Kuchel, that we want to adjourn at 4:30.

Senator KUCHEL. Yes, sir.

Mr. REDWINE. Pardon me.

Mr. Chairman, I think that the Chief might have his counsel sitting at his side at this time.

Senator KUCHEL. This will not be a legal question.

Representative HOFFMAN. This is the first time, I think, that the Senator has been able to be here. Can we not show him the courtesy and let him finish?

Senator KUCHEL. I will proceed.

Doctor, earlier in your testimony you suggested that it was not and I think you used the word "regular" for you to be notified of the disposition which the Secretary determined to make of this matter. By that do you mean that in other instances where an appeal has been taken after the Forest Service has filed objections that the Secretary's Office has notified you or the Forest Service of every subsequent step it was taking?

Mr. McARDLE. I think my testimony is a little different than that. We are notified of each appeal along the way as a customary, routine procedure. That is normal.

Senator KUCHEL. After the matter is taken by way of appeal to the Secretary?

Mr. McARDLE. All the way for each appeal from the beginning when patents are first applied for.

Senator KUCHEL. Now, I want to be sure that I understand.

Are many appeals taken by private people on their patent petitions after the Forest Service registers objections to them?

Mr. McARDLE. Senator Kuchel, it is not at all unusual for a claimant to object and protest our protest, if I may say it that way.

Senator KUCHEL. Now, when such an appeal is taken, has it been, to your own knowledge, the practice of the Secretary to attempt to obtain other assays on the disputed properties?

Mr. McARDLE. I testified earlier that, to my knowledge, it has not happened before.

Senator KUCHEL. Then what type of notices have you received, Doctor, from the Secretary after an appeal has been taken? What has the procedure on appeal been as you recall?

Representative CHUDOFF. Senator, the procedure is provided for in the rules of procedure; section 205.9 gives the exact procedure. If you will take a look at the 1949 edition of the Code of Federal Regulations, you will find the exact procedure set forth in the regulations.

Senator KUCHEL. But this witness has answered the question as to whether it was regular or not. Since he has answered a question and said it was not regular in his opinion, then I think it would be fair for this record to indicate what has been regular, so far as he knows, in the past.

Mr. McARDLE. May I volunteer something there?

I attempted to clarify my position because of the use of the word "regular." I said it had not been customary. I also said, and again I refer to the word "regular," that, as I understand the regulations of the Secretary, he does have authority to do this. It could be regular

procedure because he has authority. I only said that it was not customary, that it had not been, to my knowledge.

Senator KUCHEL. I have no further questions.

Senator GOLDWATER. Mr. Chairman, before you get the counsel on the stand, I think we ought to have some continuity in this. I have just 1 or 2 short questions to ask.

I would like to ask the chairman to allow the witness to submit for insertion in the record a year-by-year compilation of the timber values on these claims from 1935 up to and including the figures that you have given. I ask that for this reason:

I believe that the McDonalds showed an interest in this property. If that is true and my information is correct, you could buy patented timberland in Oregon at that time on tax sales; there could have been very little incentive at that time other than the mineral value.

I would like to have that put in the record, Mr. Chairman.

Mr. McARDLE. Are you asking me, Senator Goldwater, if the timber had value at what date?

Senator GOLDWATER. I would like you to get from your experts the figures, year by year, of the value of that timber on these claims from 1935 up to 1955, I suppose.

Mr. McARDLE. I can get you the average price paid for national forest timber in comparable circumstances, but I cannot give you the value for the particular area of these 15 protested claims, because we never made any examination of the timber on them until 1950.

Senator GOLDWATER. Is it not possible for you, with your records of growth for Oregon, to give a fairly good estimate of what that timber would have been worth in 1935 at 1935 prices?

Mr. McARDLE. We could make a wild guess; yes, sir.

Representative HOFFMAN. Will the Senator yield?

Senator KUCHEL. Yes.

Representative HOFFMAN. You sold timber in this immediate vicinity, some adjoining this claim: Jim Creek, Sunshine Creek. You have those figures?

Mr. McARDLE. I have.

Representative HOFFMAN. That is what the Senator wants.

Mr. McARDLE. I think he is talking about going back to 1935, and Sunshine Creek and Jim Creek timber were sold in the 1950's.

Representative HOFFMAN. That is right, but I would like those figures as to what this other timber adjoining sold for.

Senator GOLDWATER. I have perfect confidence in Dr. McArdle and I think he knows what we want.

Representative CHUDOFF. Up to 1948, they were not interested. I do not think it makes any difference prior to 1948, but, if you want it in there, I have no objection.

Senator GOLDWATER. Mr. Chairman, I am trying to say that any man who has the courage to go into western lands in the middle of the depression and lay out claims and do his claiming up work where timber values were practically nothing, had something else in mind besides timber. I think it is perfectly proper that this be introduced because the charge has been made that the Department of the Interior has given away X number of dollars of timber.

If those lands had been patented in 1936 or 1940, the timber values would have been negligible. I think that is the same thing as criticiz-

ing the Federal Government for allowing lands to go under patent for \$5 for uranium when a man gets \$25 million.

I think that it is normal business procedure.

I wanted to ask one other question.

Dr. McArdle, in your testimony you state that there are 200,000 mining claims on the national forests, embracing about 4 million acres. What is the total acreage in the national forests?

Mr. McArdle. In the Continental United States, 160 million acres.

Senator GOLDWATER. And you have 4 million acres that are now patented by virtue of the mining laws?

Mr. McArdle. No; I said those are covered by claims. That does not include those which have been patented.

Senator GOLDWATER. You do not have any idea how much has been patented?

Mr. McArdle. I do, but I do not have the figures here.

Senator GOLDWATER. Would you be willing to submit that?

Mr. McArdle. Oh, yes.

(See p. 434.)

Senator GOLDWATER. Would you also have any records to indicate how many of those acres have been abused in the practices of timbering?

Mr. McArdle. I think there is a good deal that we can draw on there, Senator Goldwater, in the testimony on the law which Congress passed last year, on which you worked and which has done so much to correct the situation of the abuse of the mining laws.

We have some information of that kind in that testimony. We can get you the information which I think you want, and we will try.

Senator GOLDWATER. I think that that would be pertinent. I do think that we should know how much land we are talking about when we are talking patented lands in the forests, patented by virtue of the mining laws.

Would you be able to submit that?

Mr. McArdle. I can get you that information and submit it.

Senator GOLDWATER. Thank you.

(The information referred to follows:)

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
Washington D. C., February 10, 1956.

U (C).

Adjustments. R-6, Rogue River.

Al Sarena Mines, Inc.

HON. W. KERR SCOTT,

*Chairman, Legislative Oversight Subcommittee,*

*Committee on Interior and Insular Affairs, United States Senate.*

DEAR SENATOR SCOTT: At the hearings on the Al Sarena mining claims certain questions were asked of Mr. McArdle on January 18 and 19 with the request that he provide the answers for the record. The questions as he understood them and the answers are listed below. They are referenced to the page number of the typed transcript of the record.

[P. 797]

Q. Has there ever been a case on appeal to the Secretary of the Interior where he remanded it back to the Director of the Bureau of Land Management for the taking of additional evidence and testimony?—A. So far as Forest Service records show, there has been no such case involving national-forest lands. We believe a more complete statement on this matter could be obtained from the Department of the Interior. However, the Forest Service is aware of some cases which would

fall in the prescribed category. These include: *State of California, Standard Oil Company of California, et al., Transferees* (51 I. D. 141, 144 (1925)); *Challenge to Validity of Mining Claims in National Parks* (53 I. D. 491 (1931)); *Ainsworth Copper Co. v. Rex* (53 I. D. 382 (1931)); *Chichagoff Extension Mining Co.* (53 I. D. 669 (1932)); *Ohio Oil Co. v. W. F. Kissinger* (58 I. D. 753 (1944)); *R. L. Shire v. John H. Page, et al.* (57 I. D. 252 (1941)); *The Shale Oil Co.* (55 I. D. 287 (1935)); *United States v. Robert L. Ferrin* (54 I. D. 276 (1933)); *Ralph T. Richards* (52 I. D. 336 (1928)); and *State of New Mexico* (52 I. D. 741 (1929)).

[P. 816]

Q. What was the appraised value of the timber on the 15 contested claims as of January 6, 1954?—A. The appraised value of the timber on the 15 contested claims as of January 6, 1954, is \$140,600.

[P. 818]

Q. What is the volume and value of timber from 10 to 16 inches in diameter on the 15 contested claims?—A. Mr. Leavengood made no estimate of the volume of timber from 10 to 16 inches in diameter at the time of his examination. In answer to our request for this information, our regional office at Portland, Oreg., estimates that the average stand per acre in this area would contain about 2,000 board feet of merchantable timber from 10 to 16 inches in diameter with 85 percent of the stand Douglas-fir and 15 percent pine.

The estimated appraised value of this timber as of January 6, 1954, is \$2,000,

[P. 825]

Q. What is the value of the timber 16 inches in diameter and up on the 15 contested claims for each year from 1935 through 1955?—A. As no examination was made of the timber on the 15 contested claims prior to 1950, our estimates of the total value of the timber by years prior to 1950 are based on the average prices received for Douglas-fir and sugar pine on the Rogue River National Forest from 1935 to 1950. The timber values from 1950 through 1955 are based on Forest Service appraisal of the timber on the contested claims.

Year:	Total timber value	Year—Con.	Total timber value
1935-----	\$10, 650	1946-----	\$45, 060
1936-----	10, 650	1947-----	59, 200
1937-----	10, 650	1948-----	82, 980
1938-----	12, 850	1949-----	84, 130
1939-----	12, 850	1950-----	126, 190
1940-----	13, 440	1951-----	166, 540
1941-----	17, 080	1952-----	138, 000
1942-----	27, 970	1953-----	136, 240
1943-----	27, 430	1954-----	140, 600
1944-----	35, 070	1955-----	231, 775
1945-----	41, 570		

[P. 827]

Q. What is the area of patented mining claims in the national forests?—A. As of January 1, 1953, there were approximately 924,000 acres of patented mining claims within the national forests.

[P. 828]

Q. Do you have any records to indicate how much of the acreage of patented mining claims has been abused in connection with timbering operations?—A. We do not understand how patented claims may be "abused" with respect to timbering operations. When patent is issued claimant receives fee-simple title and his logging operations are subject only to State regulatory laws, if any exist. The Forest Service treats such lands as any other private land and has no complete information on logging operations subsequent to patent. However, selected

statistical information on patented and unpatented mining claims within the national forests follows:

*Patented mining claims on the national forests (as of Jan. 1, 1952)*

State	Number of claims	Acreage	Estimated percent which are or have ever been commercial mining operations
Arizona.....	1, 110	1 53, 370	5
California.....	3, 068	134, 807	14½
Colorado.....	17, 000	300, 000	12
Idaho.....	3, 203	80, 802	28
Montana.....	5, 124	116, 575	17½
Nevada.....	675	12, 205	50
New Mexico.....	706	24, 498	16
Oregon.....	1, 370	26, 634	22
South Dakota.....	1, 000	74, 000	7
Utah.....	1, 359	57, 210	10
Washington.....	1, 184	20, 738	8
Wyoming.....	761	17, 687	1½
Total.....	36, 660	918, 526	14½

*Estimated number of unpatented mining claims on the national forests (as of Jan. 1, 1955)*

State	Thousand claims	Thousand acres	Estimated percent which are producing minerals in commercial quantities	Estimated percent considered valid under the mining laws	Timber on claims	
					Volume (thousand feet board measure)	1951 value
Arizona.....	34.3	684	9.0	22	70, 000	\$700, 000
California.....	21.0	602	.8	30	3, 460, 000	50, 177, 000
Colorado.....	16.7	375	1.0	37	80, 000	368, 000
Idaho.....	18.4	408	4.3	42	1, 170, 000	8, 425, 000
Montana.....	14.6	282	1.7	48	85, 000	440, 000
Nevada.....	5.2	106	2.0	60	.....	.....
New Mexico.....	8.7	223	3.0	24	225, 000	2, 000, 000
Oregon.....	6.7	215	1.8	55	2, 301, 000	36, 307, 000
South Dakota.....	4.8	103	4.5	30	81, 000	542, 000
Utah.....	28.4	583	2.0	50	7, 000	40, 000
Washington.....	5.3	94	2.2	62	751, 000	4, 111, 000
Wyoming.....	2.1	78	.6	55	36, 000	417, 000
Total.....	166.2	3, 755	2.0	40	8, 266, 000	103, 527, 000

As of January 1, 1955, it is estimated that unpatented mining claims supported over 10 billion board feet of timber with \$112 million.

Very truly yours,

RICHARD E. MCARDLE, *Chief.*  
By EDWARD C. CRAFTS.

Senator NEUBERGER. Mr. Chairman, I am speaking now as a Senator from Oregon, the State which is involved in this controversy, and I should like to say that I think that the distinguished Senator from Arizona has put his finger on the nub of the whole issue.

I help represent in the Senate the leading lumber-producing State in the Union. I do not know of anything which requires a mining operation to be reimbursed with timber owned by the public.

The Senator from Arizona has pointed out that these people first went on this land in 1935 when timber was of a relatively negligible value and we were still in the depression. Between then and 1948 the value of the timber, as a result of the ending of the depression and a vast worldwide war, soared astronomically.

Between 1935 and 1948 the Al Sarena Co. was perfectly free to operate the mine. If I am not mistaken, they could take out minerals and they could take out ore.

The Senator from Arizona has highlighted the whole issue by emphasizing that the company did not apply for patent until 1948 when the value of the timber had gone up enormously. They could operate the mine until 1948, but the thing which they could not do, unless they secured patent, was to harvest and cut this timber commercially, and I thank the Senator from Arizona for so emphasizing and highlighting the whole crux of this controversy.

Representative JONAS. Would the Senator yield?

Senator NEUBERGER. I yield.

Representative JONAS. Now, what would the Senator say with respect to the eight claims on which patents were granted? Did somebody make a mistake there?

Senator NEUBERGER. No, I have great faith in the Forest Service, but just because 8 claims were granted, it does not follow that 15 contiguous claims have to be granted. If that were the case, the whole national forest could go.

If you are arguing about a contiguous claim necessarily having value, you or I could go out and find one valid mining claim and stake out 23 or 24 others and argue that, because they were contiguous, we ought to get those also.

Representative JONAS. But they did not take any minerals off of the eight claims between 1935 and 1948, and then somebody comes along and makes no objection to the eight and grants patent.

Senator NEUBERGER. The only thing the patent changed was their ability to harvest the timber commercially. Even before patent, Congressman Jonas, they could off all the timber they wanted for legitimate use in mining operations, such as pit props or chutes. The one thing which they could not do without patent was to cut this timber for commercial sale.

Representative JONAS. I am directing my arguments to the contention which has been advanced that these people are not interested in mining at all but that their interest in this property arose by reason of the fact that it had valuable timber on it, and I point out that, if that is a valid argument, it applies equally to the eight claims on which patents were granted.

Senator NEUBERGER. I do not know whether they have evidenced any interest in mining either, but the point I am making is that they did not ask for patent until the value of timber had soared astronomically, and I think the Senator from Arizona has brought up an important point which would be valuable to show the difference in that timber between 1935 and 1948, and then in the years after that.

Senator GOLDWATER. The Senator from Oregon should be acquainted with what is going on in his State. Has he any evidence that the claims that were patented in 1939 have been timbered commercially?

Representative **HOFFMAN**. They could have cut it all in 1955, had they wanted to do that.

Senator **NEUBERGER**. I am informed by the counsel that there is a map in the record showing that some of the timber has been cut; how much, I do not know. The point is that these people, as a result of the patent which was given them in January of 1954, now own this timber in fee simple. They can do anything they want with it. They can let it stand for a higher value, or cut it down. It is theirs.

I would like to ask the Chief a question.

Am I right or wrong in this, Dr. McArdle?

Those claims that were granted to patent in January of 1954 are now considered by the Forest Service to be private lands?

**Mr. McARDLE**. All 23 claims; yes, sir.

Senator **NEUBERGER**. The 8 which were not contested and the 15 which were contested and later granted are all considered to be private lands and outside of your jurisdiction?

**Mr. McARDLE**. That is correct.

Representative **JONAS**. May I ask a question before we leave that subject?

Can you tell the committee whether patents were actually granted on the 8 claims in 1949?

**Mr. McARDLE**. No, I cannot. I think that the patents for all 23 claims were granted February 11, 1954.

Representative **JONAS**. If you did not protest the 8, were they not subject to patent then?

**Mr. McARDLE**. I believe that goes back to a question Senator Kuchel raised as to whether all 23 claims were covered in a single application for patent.

Representative **HOFFMAN**. May I ask one question?

Senator **SCOTT**. Will you wait because I want to ask a question?

Representative **HOFFMAN**. If this was a steal of \$600,000 worth of timber, how come you or the Forest Department did not ask for some suit to set it aside on the ground of fraud? Who said it was a steal? You fellows on the staff and Drew Pearson have been charging it as a steal for the last 2 years.

Why did you not appeal to the Justice Department if this was a fraud?

Representative **CHUDOFF**. We are trying to find out if it was a fraud and, if it was, I will ask the Justice Department.

Representative **HOFFMAN**. He has not answered my question.

**Mr. McARDLE**. In the first place, the value of the timber at the time the protest was made was not \$600,000 but \$126,000. I do not know what the value was in January 1954, but I have been asked to find out and will do so.

Senator **SCOTT**. Right at that point, Dr. McArdle, did not this thing become of intense interest on January 6, I believe, of this year, when it was determined to be worth about \$231,000 or \$235,000? That is when it became of interest to the public?

**Mr. McARDLE**. A lot of figures have been bandied about, Senator Scott. The only ones I know about are the ones that my own people have computed. Those are the two figures that I have given you.

**Mr. COBURN**. Mr. Chairman, may I ask one question along that line?

Senator **SCOTT**. Yes.

The Senator from Arizona has pointed out that these people first went on this land in 1935 when timber was of a relatively negligible value and we were still in the depression. Between then and 1948 the value of the timber, as a result of the ending of the depression and a vast worldwide war, soared astronomically.

Between 1935 and 1948 the Al Sarena Co. was perfectly free to operate the mine. If I am not mistaken, they could take out minerals and they could take out ore.

The Senator from Arizona has highlighted the whole issue by emphasizing that the company did not apply for patent until 1948 when the value of the timber had gone up enormously. They could operate the mine until 1948, but the thing which they could not do, unless they secured patent, was to harvest and cut this timber commercially, and I thank the Senator from Arizona for so emphasizing and highlighting the whole crux of this controversy.

Representative JONAS. Would the Senator yield?

Senator NEUBERGER. I yield.

Representative JONAS. Now, what would the Senator say with respect to the eight claims on which patents were granted? Did somebody make a mistake there?

Senator NEUBERGER. No, I have great faith in the Forest Service, but just because 8 claims were granted, it does not follow that 15 contiguous claims have to be granted. If that were the case, the whole national forest could go.

If you are arguing about a contiguous claim necessarily having value, you or I could go out and find one valid mining claim and stake out 23 or 24 others and argue that, because they were contiguous, we ought to get those also.

Representative JONAS. But they did not take any minerals off of the eight claims between 1935 and 1948, and then somebody comes along and makes no objection to the eight and grants patent.

Senator NEUBERGER. The only thing the patent changed was their ability to harvest the timber commercially. Even before patent, Congressman Jonas, they could off all the timber they wanted for legitimate use in mining operations, such as pit props or chutes. The one thing which they could not do without patent was to cut this timber for commercial sale.

Representative JONAS. I am directing my arguments to the contention which has been advanced that these people are not interested in mining at all but that their interest in this property arose by reason of the fact that it had valuable timber on it, and I point out that, if that is a valid argument, it applies equally to the eight claims on which patents were granted.

Senator NEUBERGER. I do not know whether they have evidenced any interest in mining either, but the point I am making is that they did not ask for patent until the value of timber had soared astronomically, and I think the Senator from Arizona has brought up an important point which would be valuable to show the difference in that timber between 1935 and 1948, and then in the years after that.

Senator GOLDWATER. The Senator from Oregon should be acquainted with what is going on in his State. Has he any evidence that the claims that were patented in 1939 have been timbered commercially?

Representative HOFFMAN. They could have cut it all in 1955, had they wanted to do that.

Senator NEUBERGER. I am informed by the counsel that there is a map in the record showing that some of the timber has been cut; how much, I do not know. The point is that these people, as a result of the patent which was given them in January of 1954, now own this timber in fee simple. They can do anything they want with it. They can let it stand for a higher value, or cut it down. It is theirs.

I would like to ask the Chief a question.

Am I right or wrong in this, Dr. McArdle?

Those claims that were granted to patent in January of 1954 are now considered by the Forest Service to be private lands?

Mr. McARDLE. All 23 claims; yes, sir.

Senator NEUBERGER. The 8 which were not contested and the 15 which were contested and later granted are all considered to be private lands and outside of your jurisdiction?

Mr. McARDLE. That is correct.

Representative JONAS. May I ask a question before we leave that subject?

Can you tell the committee whether patents were actually granted on the 8 claims in 1949?

Mr. McARDLE. No, I cannot. I think that the patents for all 23 claims were granted February 11, 1954.

Representative JONAS. If you did not protest the 8, were they not subject to patent then?

Mr. McARDLE. I believe that goes back to a question Senator Kuchel raised as to whether all 23 claims were covered in a single application for patent.

Representative HOFFMAN. May I ask one question?

Senator SCOTT. Will you wait because I want to ask a question?

Representative HOFFMAN. If this was a steal of \$600,000 worth of timber, how come you or the Forest Department did not ask for some suit to set it aside on the ground of fraud? Who said it was a steal? You fellows on the staff and Drew Pearson have been charging it as a steal for the last 2 years.

Why did you not appeal to the Justice Department if this was a fraud?

Representative CHUDOFF. We are trying to find out if it was a fraud and, if it was, I will ask the Justice Department.

Representative HOFFMAN. He has not answered my question.

Mr. McARDLE. In the first place, the value of the timber at the time the protest was made was not \$600,000 but \$126,000. I do not know what the value was in January 1954, but I have been asked to find out and will do so.

Senator SCOTT. Right at that point, Dr. McArdle, did not this thing become of intense interest on January 6, I believe, of this year, when it was determined to be worth about \$231,000 or \$235,000? That is when it became of interest to the public?

Mr. McARDLE. A lot of figures have been bandied about, Senator Scott. The only ones I know about are the ones that my own people have computed. Those are the two figures that I have given you.

Mr. COBURN. Mr. Chairman, may I ask one question along that line?

Senator SCOTT. Yes.

Mr. COBURN. The figures you have given the committee, however, are based on the appraised value of that timber; is that correct?

Mr. McARDLE. That is correct.

Mr. COBURN. Not the fair market value?

Mr. McARDLE. Not what might be bid if there was spirited competition.

Mr. COBURN. Is there a spirit of competition in Oregon in the Rogue River National Forest?

Mr. McARDLE. There is at present.

Mr. COBURN. Haven't bid prices been substantially higher on the average than appraised prices?

Mr. McARDLE. Yes, sir.

Mr. COBURN. Thank you.

Senator NEUBERGER. Where timber is sold at competitive bid and under competitive conditions in the Northwest, it generally goes for much more than the appraised price; is that not right?

Mr. McARDLE. That is common knowledge, Senator Neuberger.

Representative CHUDOFF. Mr. Chairman, I would like to ask one question and I will be through with Dr. McArdle.

Doctor, I am extremely interested in reading your statement. I think it is an excellent piece of work and I think it is clear and concise. I want to say that in your last sentence you say, and I quote:

I am convinced that the Forest Service employees associated with the case acted in good faith and performed their duties in a satisfactory manner.

That means, Doctor, that in your opinion if they had not acted as they did they would have been derelict and negligent; is that right?

Mr. McARDLE. If they had not, I would have been very much interested in finding out about it.

Senator NEUBERGER. I would like to say to Congressman Chudoff and for the record that, as one of the Senators from Oregon, I have been cognizant of the discussions on this in our State, that, regardless of the political group speaking or regardless of the newspaper commenting. I have never heard one word of public criticism in this case directed against the Forest Service or the Department of Agriculture generally, not one word.

Mr. McARDLE. Thank you, Senator Neuberger, very much.

Senator SCOTT. It is rather gratifying to see a chief of the division backing up his field men. That is really gratifying to the chairman of this committee.

I wonder if we have information about whether we can meet tomorrow?

Mr. REDWINE. Congressman Chudoff is trying to get that right now.

Senator, I would like, if I may, to suggest that we have about 5 minutes of testimony from Mr. Mynatt before we adjourn.

Chief, will you remain available to the committee tomorrow if we meet tomorrow?

Mr. McARDLE. Tomorrow morning?

Mr. REDWINE. Yes, sir. We would like you to sit there now with Mr. Mynatt.

Senator SCOTT. Mr. Mynatt, have you been sworn in?

Mr. MYNATT. I have not, Mr. Chairman.

Representative JONAS. Have we finished with Dr. McArdle?

Senator SCOTT. Will you swear him in?

Representative HOFFMAN. Do you solemnly swear that the testimony which you shall give here before this committee shall be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. MYNATT. Yes, sir.

**TESTIMONY OF E. F. MYNATT, ASSISTANT GENERAL COUNSEL,  
DEPARTMENT OF AGRICULTURE**

Mr. REDWINE. State your name and position, please.

Mr. MYNATT. My name is E. F. Mynatt. I am assistant general counsel for the Department of Agriculture.

Mr. REDWINE. In that position you are the legal officer for the Forest Service; is that correct, sir?

Mr. MYNATT. That is correct.

Mr. REDWINE. Mr. Mynatt, you heard the questions asked of Chief McArdle in respect to remanding of appeals. Will you tell the committee briefly, please, what has been the custom in that respect?

Mr. MYNATT. The custom with respect to claims appealed from the Director of the Bureau of Land Management to the Secretary of the Interior has been this: that in the event additional testimony was taken, they have been remanded to the Bureau of Land Management for the taking of that testimony.

Mr. REDWINE. Mr. Mynatt, how long have you been in your present position?

Mr. MYNATT. Ten years, and in the Department, 25.

Mr. REDWINE. During all of your experience, have you ever heard of a case where there was taking of additional testimony and it was not remanded to the field for further hearing?

Mr. MYNATT. No, sir; I have not.

Mr. REDWINE. The Al Sarena case is the only case that you have come across in which that occurred?

Mr. MYNATT. Yes, sir; that is correct.

Mr. REDWINE. That is all I have, Mr. Chairman.

Representative HOFFMAN. I have one question along that same line about this being unusual.

This case was decided when?

Mr. MYNATT. This was decided January 6, 1954.

Representative HOFFMAN. Yes.

Did you ever hear of a case, we will say, along about November 22, 1952, an attorney who is a National Democratic Committeeman from the State of Colorado, who offered to take this matter up and continue conferences here:

My associates in Washington, the law firm of Hudson, Greuke & Lipscomb, will arrange for a hearing in Washington and are willing to represent your firm at the hearings. I will also be available to assist, and have reason to believe that we can obtain a favorable decision.

The gentleman says before that:

Several conferences have been held with officials of the Department of Interior and my associates in Washington concerning the issuing of patents on your mining claims. The following report and recommendations—  
and so on.

He had had the matter up with Chapman and says:

The fee for this service will be \$10,000, of which \$2,000 is payable in advance as a retainer fee and to cover expenses. The remainder of \$3,000 will be due

and payable only if a favorable finding is obtained. In other words, the last \$8,000 of the fee will be on a strictly contingent basis.

Do you know anything about that?

Senator SCOTT. Congressman Hoffman, would you mind introducing that for the record?

Representative HOFFMAN. The whole letter?

Senator SCOTT. Yes.

Representative HOFFMAN. You can have a copy of it.

Senator GOLDWATER. Put in the whole thing.

Representative HOFFMAN. It is suggested that we put in this one, which is earlier, August 22, 1952. It says:

Secretary Chapman will be in Denver this weekend and I will discuss the matter with him while he is here. I am also sending a copy of the brief \* \* \*

Senator SCOTT. Without objection, that will be in the record.

(The letters referred to follow:)

DENVER, COLO., August 27, 1952.

Mr. H. P. McDONALD, Jr.,  
Secretary-Treasurer, Al Sarena Mines, Inc.,  
Mobile, Ala.

DEAR MR. McDONALD: Thank you for your letters of August 23 and 25 and for sending me the briefs in your case. I will get these reviewed within the next day or two.

Secretary Chapman will be in Denver this weekend and I will discuss the matter with him while he is here. I am also sending a copy of the brief into Washington and will advise you further as soon as possible.

It is a pleasure to try to be of service to you and every effort will be made to effect an early understanding.

Sincerely yours,

GEORGE F. ROCK, Attorney at Law.

DENVER, COLO., September 9, 1952.

Mr. H. P. McDONALD, Jr.,  
Secretary-Treasurer, Al Sarena Mines, Inc.,  
Mobile, Ala.

DEAR MR. McDONALD: Thank you for your letter of September 4. I discussed the matter with Secretary Chapman while he was in Denver but he knew nothing about it. He informed me that the matter was undoubtedly in the solicitor's office and had not come to his personal attention.

Secretary Chapman is at present on the Pacific Coast and will not return to Washington for another week. He has asked me to prepare a brief on the matter, which he will personally review at his first opportunity.

In the meantime, my associates in Washington are studying the matter and will make a recommendation in the near future. They have asked me to determine the present status of the case and to inquire as to what disposition was made for summary judgment. Please let me have this information as soon as possible.

With very best personal wishes, I am

Sincerely yours,

GEORGE F. ROCK, Attorney at Law.

DENVER, COLO., September 27, 1952.

Mr. H. P. McDONALD, Jr.,  
Secretary-Treasurer, Al Sarena Mines, Inc.,  
Mobile, Ala.

DEAR MR. McDONALD: It has been impossible to do anything about your case inasmuch as Secretary Chapman has been in and out of Washington almost continually since he was in Denver. I am sure he will review the matter at his first opportunity.

It is most difficult to say whether or not anything can be accomplished by October 1. If it is your desire to set a time limit on the matter, I will be unable to handle it for you.

Yours very truly,

GEORGE F. ROCK, *Attorney at Law.*

---

DENVER, COLO., October 18, 1952.

Mr. H. P. McDONALD, Jr.,  
*Secretary-Treasurer, Al Sarena Mines, Inc.,  
Mobile, Ala.*

DEAR MR. McDONALD: Enclosed is a letter received from the Secretary of the Interior regarding your matter, which came in the same day of our telephone conversation.

It will undoubtedly be necessary to discuss the matter with the Secretary before I can give you any worthwhile information. I expect to talk with him within the next few days and will advise you further.

With very best personal wishes, I am

Sincerely yours,

GEORGE F. ROCK, *Attorney at Law.*

---

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SECRETARY,  
Washington 25, D. C., October 9, 1952.

Mr. GEORGE F. ROCK,  
*Attorney at Law,  
Denver, Colo.*

DEAR GEORGE: In compliance with the request contained in your letter of September 27 to me, I have inquired regarding the status of the appeal of Al Sarena Mines, Inc., which is pending in the Office of the Solicitor.

The appeal (A-26248) is from a decision of the Assistant Director of the Bureau of Land Management, who held for cancellation mineral entry Oregon 0665 insofar as that entry embraces 15 lode mining claims situated within the Rogue River National Forest in Oregon.

After the receipt of the appeal by the Solicitor, and while it was under consideration, the corporation instituted in the United States District Court for the Southern District of Alabama a suit against the United States and the Secretary of the Interior. As the suit involves the same subject matter as the appeal in the administrative proceeding, further consideration of the appeal has been postponed until after the final disposition of the litigation. The suit is still pending.

Sincerely yours,

OSCAR L. CHAPMAN,  
*Secretary of the Interior.*

---

1534 CALIFORNIA ST., DENVER, COLO.,  
November 22, 1952.

Dr. H. P. McDONALD, Jr.,  
*Al Sarena Mines, Inc.,  
Mobile, Ala.*

DEAR DR. McDONALD: Several conferences have been held with officials of the Department of the Interior and my associates in Washington concerning the issuing of patents on your mining claims. The following report and recommendations are given to you as a result of these conferences:

Nothing can be done about the matter as long as the suit filed by your company in the United States district court in Alabama is pending. It is the policy of the Department of the Interior to hold in abeyance any administrative proceedings as long as court action is pending.

There is some doubt as to the validity of the suit that has been filed. There is a question as to whether or not a suit can be maintained against the Secretary of the Interior outside of Washington and there is also a question as to whether or not you have obtained valid service of the summons.

It is my opinion that the suit should be dismissed and it will then be possible to reopen administrative proceedings in Washington. Dismissal of the present

suit will in no way prejudice your rights as a suit can be dismissed without prejudice and a new suit filed at any time.

My associates in Washington, the law firm of Hudson, Greuke, and Lipscomb, will arrange for a hearing in Washington, and are willing to represent your firm at the hearings. I will also be available to assist, and have reason to believe that we can obtain a favorable decision.

The fee for this service will be \$10,000, of which \$2,000 is payable in advance as a retainer fee and to cover expenses. The remainder of \$8,000 will be due and payable only if a favorable finding is obtained. In other words, the last \$8,000 of the fee will be on a strictly contingent basis.

With very best personal wishes, I am

Very truly yours,

GEORGE F. ROCK.

Representative HOFFMAN. That is unusual for a Democratic national committeeman from the State to ask to get a patent.

Senator NEUBERGER. Inasmuch as this has been introduced, and Mr. Chapman's name has been bandied about, I should like to cite for the record the fact that these importuning letters were written while Secretary Chapman was Secretary of the Interior, but patent was not granted to these timberlands until Secretary McKay became Secretary of the Interior.

Representative HOFFMAN. That is right. They delayed 18 months.

Senator NEUBERGER. They were written to the McDonalds, who were seeking these claims. But the point which I think is very important and should be made in fairness to Secretary Chapman, who is not here, is that the fact is that these letters, and I do not know whether they were proper or not and they sound bad to me—

Representative HOFFMAN. They are all right, Senator.

Senator NEUBERGER. These letters were written while Oscar Chapman was Secretary of the Interior but, in fairness to Mr. Chapman, it should be emphasized that the patents were granted only after Mr. McKay succeeded Secretary Chapman as Interior Secretary.

Senator GOLDWATER. Mr. Chairman, I might point out that Mr. Chapman made no decision. He neither denied nor approved.

Senator NEUBERGER. They were unable to get away with the political pressure with Mr. Chapman. While he was Secretary, these lands remained the property of the United States Government.

Senator GOLDWATER. I might remind the Senator from Oregon that I mentioned a case yesterday that is very flagrant that went on under Mr. Chapman, and one of our objections is that under the old administration we were not administered by law but were administered by the whims of man, and hundreds of claims were sat on by Secretary Chapman.

Senator NEUBERGER. We are on the Al Sarena claims.

Representative HOFFMAN. They did not come across with the \$8,000.

Senator GOLDWATER. I point out that he did not make up his mind, and I think this is an important point.

If you want to defend a government made up of men who sit on things and determine the law for themselves, I cannot go along with you. I think that that is where you and I differ. If the law is plain and Secretary Chapman preferred to sit on it, we criticize him for it.

Senator NEUBERGER. I would prefer a Secretary who sat on a case and allowed the national forests to remain in the possession of the people to a Secretary who relinquished them.

Representative HOFFMAN. There you have the nub. You do not like the present Secretary.

Senator NEUBERGER. I do not like his policies. I like him personally.

Senator GOLDWATER. We never approved of the policies of straddling and sitting. If the Senator wants to discuss with me some of the cases in my State where we had real giveaways, I will be glad to go into them. He did not straddle them then.

Mr. REDWINE. Mr. Chairman, Congressman Chudoff advises me that he can meet in the morning.

May I suggest that we meet tomorrow morning at 9:30 in room 457 of this building?

We are unable to get this room tomorrow morning and we will have to make that change.

Could we have both Mr. Mynatt and the chief here for about 10 minutes in the morning?

Senator SCOTT. Without objection, we will make it 10 o'clock in the morning.

The hour of adjournment has arrived.

Mr. COBURN. Mr. Chairman, could I ask the Solicitor just this one question? It will not be controversial and will not hold us here.

Senator SCOTT. All right.

Mr. COBURN. Mr. Mynatt, a question was raised here the other day about the status of a mining patent under the new law.

Is it not true that under the new law as well as under the old law when a man gets a patent on a mining claim, he has title to the trees, to the sky, and the ground underneath?

Mr. MYNATT. He has a fee simple title under the new law as well as the old.

Mr. COBURN. Thank you.

Senator SCOTT. The meeting is adjourned.

(Whereupon, at 4:35 p. m., the hearing was adjourned, to reconvene at 10 a. m., Thursday, January 19, 1956.)

## AL SARENA CASE

THURSDAY, JANUARY 19, 1956

UNITED STATES SENATE,  
SUBCOMMITTEE ON LEGISLATIVE OVERSIGHT FUNCTION OF  
THE SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS;  
HOUSE OF REPRESENTATIVES,  
SUBCOMMITTEE ON PUBLIC WORKS AND RESOURCES,  
OF THE HOUSE COMMITTEE ON GOVERNMENT OPERATIONS,  
*Washington, D. C.*

The subcommittees met at 10 o'clock a. m., in room 457, Senate Office Building, Washington, D. C., Hon. W. Kerr Scott (chairman of the Senate subcommittee) presiding.

Present: Senators W. Kerr Scott (North Carolina), Richard L. Neuberger (Oregon), and George W. Malone (Nevada).

Also present: Senators Henry C. Dworshak (Idaho) and Barry Goldwater (Arizona).

Present: Representatives Earl Chudoff (Pennsylvania), (chairman of the House subcommittee); Clare E. Hoffman (Michigan), and Charles Raper Jonas (North Carolina).

Senator SCOTT. The meeting will please come to order.

Representative HOFFMAN. Let the record show that we have no quorum, but personally I do not care.

Senator SCOTT. We will put in the record this certified ticket of a telephone call from Mr. Gottley to Mr. M. E. Volin on December 29, 1953.

(The document referred to follows:)

[1-480]

UNITED STATES OF AMERICA,  
DEPARTMENT OF THE INTERIOR,  
*Washington, D. C., January 19, 1956.*

Pursuant to title 28, section 1733, United States Code, I hereby certify that each annexed paper is a true copy of a document comprising part of the official records of the Department of the Interior:

Ticket of telephone call from Gottley to M. E. Volin on December 29, 1953.

Bill from the Chesapeake & Potomac Telephone Co. showing that this call consumed 9 minutes and cost \$6.90.

In testimony whereof, I have hereunto subscribed my name, and caused the seal of the Department of the Interior to be affixed on the day and year first above written.

[SEAL]

C. C. DAVISON,  
*Acting Chief Clerk.*

Mr. REDWINE. Will Mr. McArdle and Mr. Mynatt come forward, please?

**TESTIMONY OF RICHARD E. McARDLE, CHIEF, FOREST SERVICE  
AND E. F. MYNATT, ASSISTANT GENERAL COUNSEL, DEPARTMENT OF AGRICULTURE—Resumed**

Mr. COBURN. Dr. McArdle, I have been furnished with some information from the House Government Operations Subcommittee, which was given to the committee by the Forest Service and the Bureau of Land Management preliminary to their investigation of the administration of timber resources in the Northwest.

I wanted to check these figures against whatever knowledge or information or data you have.

These figures go to the increase in the competitive-bid price over your appraised-price figures which you gave the committee yesterday. I want to make sure that they are accurate. Here is what they are:

There was a 61-percent increase in prices received on competitive-bid for timber in the Rogue River working circle over the Forest Service appraised prices. This is an average figure.

Mr. McARDLE. During what period?

Mr. COBURN. Let me finish—for the year 1954. Is that a dependable figure?

Mr. McARDLE. If you got that figure, Mr. Coburn, from our people in Portland, I would assume that they had actually added up and given you the actual figure.

Mr. COBURN. This information was furnished, according to my understanding, from officials of the Forest Service both in Portland and here.

Mr. McARDLE. Last year they were running, as I recall, about 50 percent above our appraised prices in that area.

Mr. COBURN. You do not recall the figure in 1954?

Mr. McARDLE. I do not recall the figure for 1954.

Mr. COBURN. But in 1955 they ran about 50 percent higher?

Mr. McARDLE. About 50 percent is my recollection.

Mr. COBURN. Now, the record also shows that in those sales between February 1954 and March 1955 where competition occurred, Douglas-fir appraised prices were increased on an average of 49 percent by bidders—this is for Douglas-fir only—white fir was 59 percent, and pine, 8 percent over your appraised prices.

Mr. McARDLE. I assume our people in Portland simply gave you the actual figures that they had.

Mr. COBURN. Therefore, all other factors being equal—that is conditions of accessibility to the timber on these particular claims—you could say, could you not, that if the timber on those claims were sold today by the Al Sarena people, the price received would be substantially in excess of the figure you gave the committee yesterday?

Mr. McARDLE. I would estimate it would be about 50 percent higher if there were sharp competition.

Mr. COBURN. Thank you.

This is on a different subject. When the appeal was taken by the Al Sarena Co. to the Secretary of the Interior and subsequently the Secretary of the Interior directed the Bureau of Mines to conduct an independent investigation, were you or the Forest Service at any

time furnished with the information developed as a result of that independent investigation?

Mr. McARDLE. I don't believe we were, Mr. Coburn. I want to check on that to be absolutely sure.

Mr. COBURN. Do you know, Mr. Mynatt?

Mr. MYNATT. As far as the general counsel's office is concerned, we were not furnished the information.

Mr. COBURN. And would you not the general counsel's office in the usual customary fashion of conducting these things be the office that would be notified?

Mr. MYNATT. Generally speaking, that is true, because we are the attorneys of record in that case.

Mr. COBURN. That is right, and you would have to, as counsel for the protestant, know what new evidence had been adduced so that you could rebut it if you felt that you should protest it; is that correct?

Mr. MYNATT. That is correct.

Mr. COBURN. But that never happened, you say?

Mr. MYNATT. We did not receive any information of this kind.

Mr. COBURN. As a matter of fact, is it not true also that you were never notified that the Bureau of Mines had been asked to do this job?

Mr. MYNATT. That is correct. We were not.

Mr. COBURN. You had no knowledge whatsoever?

Mr. MYNATT. No, sir; we did not. Our first knowledge was when we received a copy of the decision.

Mr. COBURN. That is all I have at the moment, Mr. Chairman.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. Yes.

Dr. McArdle, I would like to ask you about a collateral matter, if I can. It is somewhat under a question of personal privilege, Mr. Chairman, because of an attack made upon my integrity.

Dr. McArdle, I think you perhaps are in better position to comment upon this than any other person I know.

A press release was distributed on January 10 of which I will not read the whole thing because it was many pages long:

A more recent example of such aid was the intercession of Senator Neuberger of Oregon to ask Chief Forester McArdle to reverse the decision of a local forester and thus make it possible for a lumber company to buy 75 million feet of timber in the Umpqua National Forest. That intercession, Senator Neuberger said, was his duty to Oregon. The fact that one official of the lumber company had donated \$1,000 to his campaign and another had acted as a county campaign manager for him had no bearing on his action, he said.

I presume this refers to the proposal to sell so-called low-value sub-Alpine timber near Crescent Lake in Oregon. I would like to ask you several questions about that, if I may.

Did I ever ask you in any way to favor any one lumber company in the sale of any timber in Crescent Lake or anywhere else?

Mr. McARDLE. At no time, never. That may not be grammatical, Senator, but I think it expresses my opinion.

Senator NEUBERGER. Have I ever asked you to depart in any way from normal Forest Service procedures in the sale or disposal of timber or any other property under your custody?

Mr. McARDLE. No.

Senator NEUBERGER. If this sale is finally consummated at Crescent Lake, will it be a competitive sale open to all bidders?

Mr. McARDLE. It will.

Senator NEUBERGER. Will the timber go only to that company or companies which offer the highest price to the United States Government?

Mr. McARDLE. Yes; it will.

Senator NEUBERGER. Maybe I did not phrase that right.

In other words, under the terms of this proposed sale, the company getting the timber would be the company that offered the highest price at bid to the Federal Government?

Mr. McARDLE. It must be the high responsible bid. Another bid might be higher but the company might not be able to make good on it.

Senator NEUBERGER. I understand. It will be a competitive sale and any legitimate company can participate in the sale?

Mr. McARDLE. It will in nowise be different from thousands of other such sales that have been made.

Senator NEUBERGER. The harvesting of the timber, as I understand it, would be under the direction of the United States Forest Service?

Mr. McARDLE. Completely.

Senator NEUBERGER. The Forest Service would retain ownership of the land?

Mr. McARDLE. Yes.

Senator NEUBERGER. Is that correct?

Mr. McARDLE. Yes.

Senator NEUBERGER. I would like to read, if I may, a letter which I wrote to you on July 18, which I have here, concerning this sale, because of this comment in this press release that I have favored one company. I would like to offer it for the record and ask you if this is the letter I sent you:

JULY 18, 1955.

HON. RICHARD E. McARDLE,  
*Chief, Forest Service, Department of Agriculture,*  
*Washington, D. C.*

DEAR MR. McARDLE: I should like to state very briefly, for the record, my position concerning the application of the L. & H. Lumber Co. for the letting of bids on timber in the Crescent Lake area and the objections to that application.

As a Senator from Oregon, I would not take sides in any controversy which involves the interests of two communities in my State, concerning the disposition and use of a public resource. I do not do so now.

My major interest is in seeing to it that Oregon has the maximum possible employment from its timber, without doing damage to sound conservation or to watershed protection. Between 1952 and 1954, Oregon suffered the greatest proportionate drop of any State in Federal tax collections, and this fact affords some measure of the urgent need in Oregon for further profitable employment. If subalpine timber species in the Crescent Lake region proves to be a valuable economic resource which can help to provide payrolls, I think that is a desirable goal, regardless of what company or companies develop the timber.

As a Senator, I cannot pass finally upon such matter as watershed protection, conservation of recreational values, and upon proper logging methods. My confidence in the United States Forest Service is such, however, that I feel your agency will authorize no logging which would imperil these goals.

In conclusion, let me again state that I make no choice between the interests of Bend and of communities west of the divide of the Cascade, but I merely urge that the maximum economic use and employment be realized—subject to sound conservation practices—from the timber in question at this time.

I appreciate the interest and time which the Forest Service is devoting to this question which is of such vital importance to Oregon.

Is that, to your recollection, the letter that I addressed to you concerning this?

Mr. McARDLE. Yes; it is. May I volunteer a comment?

Senator NEUBERGER. As far as I am concerned; yes.

Senator SCOTT. Would you speak louder, Doctor?

Mr. McARDLE. Senator, as you have been talking, I have been trying to recall when it was that you came to my office with two officials of—I assume we are referring to—the L. & H. Co.

Senator NEUBERGER. That is right.

Mr. McARDLE. I believe it was in June, early June, but I cannot be absolutely positive of that.

I do recall, however, that you stayed perhaps less than 5 minutes. You were on your way to, as I recall, another meeting. You said that you wanted to meet me—we had not met before—that you wanted to introduced these two constituents from Oregon, that they had a business matter to propose to us, that you knew very little about it, you didn't know enough to comment one way or the other but that you were a Senator from Oregon in favor of anything which would promote the interests of Oregon and would want us to consider this proposal, whatever it was, entirely on its merits. And, with that, as I recall, you took your departure and we did consider it on its merits, and whatever decision was made in that case would be my decision and mine only.

Senator NEUBERGER. Thank you.

Mr. McARDLE. And I might also add—and perhaps this is a comment that maybe I should not make—that it has been my happy experience to have that same attitude taken by a very great many Members of the Congress. It is almost standard operating procedure with Members of the Congress in dealing with us. They ask us only to consider these things on their merit.

Senator NEUBERGER. Thank you very much.

Senator SCOTT. Are there any questions?

Mr. Lanigan?

Mr. LANIGAN. I just want to ask Mr. McArdle whether the Forest Service has any record of the amount of timber cut to date on the 15 claims?

Mr. McARDLE. That question was asked us once before and somewhere along the line I think I wrote or said to someone that we did not have it. Subsequent to that time I find that one of our local Forest Service people, under agreement with the State forester of Oregon, made an examination of the adequacy of slash disposal on the portion of the Al Sarena claims which have been logged over. I know that we do that elsewhere in the State of Oregon, also under agreement with the State forester.

In November of 1955, this man checked on the area, the Al Sarena claims, all 23 claims, because timber had been cut from both the protested and the clear-listed claims, and made an ocular estimate of the timber that had been cut as of November 21 when his report was made.

You will bear in mind that this is not an actual measurement of the timber but an ocular estimate turned into the State forester in his capacity as an agent of the State forester.

From the 15 contested claims he estimated that 962,000 board feet had been cut, and from the 8 uncontested claims 1,658,000 board feet had been cut, or a total of 2,620,000. I have no way of knowing whether that is an accurate estimate or not.

Mr. REDWINE. Chief McArdle, what was the name of the man who made this report?

Mr. McARDLE. I think it was Mr. Ash; but let me check.

That is correct. The man's name was Ash, A-s-h.

Mr. REDWINE. Chief, the report to which you are referring, made by Mr. Ash, was that subsequent to the time that he made his regular slash report on this property?

Mr. McARDLE. According to my records, Mr. Redwine, on July 1 Mr. Ash—and if you want the initials, it is Lowell W. He is the fire-control assistant on that ranger district—he received a copy of the Oregon State Harvesting Permit No. 11441, dated June 24, 1954, that had been issued by the State of Oregon to the Al Sarena Co. to log part of the patented claims.

There was also a permit to the Holman Lumber Co., I believe, to operate a sawmill there, and he made his first inspection on July 8. He made an inspection of the sawmill on July 12. He made additional inspections on August 10 and 13 and September 5 and 9 for compliance with the State law.

On December 6, 1954, he submitted his final annual hazard and conservation status report.

Mr. REDWINE. What was that date?

Mr. McARDLE. December 6.

Mr. REDWINE. 1955?

Mr. McARDLE. In 1954. Then, on November 21, 1955, he submitted his final conservation and hazard reduction report for 1955.

I have attempted to give you here the complete record of all inspections made by Mr. Ash.

Representative JONAS. Mr. Redwine, before you leave that, could we get a dollar value put on that amount?

Mr. REDWINE. I am going to work on another phase of it. I interrupted Mr. Lanigan. I do not know what he has in mind.

Representative JONAS. I would suggest to the chairman at this point that I would like to have an idea of the dollar value of that timber, if it would be possible to get it.

Senator SCOTT. Could you give us that figure?

Representative JONAS. 962,000 board feet.

Representative CHUDOFF. Mr. Chairman, do you not think that, instead of us speculating as to the value, the average value and things that have no real value in evidence, we ought to find out who bought it and how much they paid for it, and then we will find out what it is worth?

Representative JONAS. Mr. McArdle yesterday gave us some dollar values.

Representative CHUDOFF. He gave us an appraised value and told us that the actual value, because of the spirit of competition in timber bidding, was 50 percent in excess. I think we will be guessing.

If we find who bought it and how much they paid, it would give the exact worth of the timber.

Mr. McARDLE. Mr. Chudoff, I have no idea how much the timber was sold for.

Representative CHUDOFF. I understand. I would not expect that you would, Chief. I think that perhaps the owners of the Al Sarena Mine could tell us whom they sold it to and give the figures of what they got for it.

I would not expect you to know it, but I think we ought to have the correct figure and do away with a lot of guessing.

Mr. McARDLE. In that way you might get a more accurate estimate of the amount of timber cut also.

Representative CHUDOFF. I think you are right about that.

Representative HOFFMAN. Mr. Chairman, I suggest that, if they want to talk about the value of the timber, they call the McDonalds and find what they did sell it for.

Are you going to call them?

Mr. REDWINE. Yes.

Representative CHUDOFF. I think that is right, sir.

Senator SCOTT. Mr. Lanigan, will you proceed.

Mr. LANIGAN. After the Forest Service received the decision of January 6 in the Al Sarena case, Mr. McArdle, did you protest or make any recommendation concerning the action that the Forest Service would take on that matter?

Mr. McARDLE. The answer to your question is, "No, Mr. Lanigan, we did not." We received the decision about the 20th of January 1954 and we debated what we should do about it. The only course open to us was to ask the Secretary of Agriculture to intercede personally with the Secretary of the Interior and ask him to reverse the decision.

We had made as complete a case as we knew how to make. We had given all the evidence we had. We did not know what additional evidence was before the Secretary of the Interior in making his decision. We were certain that he had reviewed the whole case, because that is required by the rules of the Department of the Interior and it has been standard practice.

I am afraid we spent most of our time trying to decide whether this would constitute a precedent, and about the time that we had reached that decision, the claims had been patented.

Mr. LANIGAN. As I understand it, you then were concerned as to whether or not this case would constitute a precedent?

Mr. McARDLE. We were concerned with that; yes, sir.

Mr. LANIGAN. Why were you concerned with that?

Mr. McARDLE. I think I had better ask Mr. Mynatt to answer that. I can volunteer my own opinion if you would like it.

Mr. LANIGAN. Perhaps it would be best to get the opinion of both of these gentlemen on that question, Mr. Chairman.

Senator SCOTT. Mr. Mynatt, could you answer that?

Mr. MYNATT. Yes, sir.

First I would say, Mr. Chairman, that as to the question of precedent, I don't think that this was a precedent which would require the Secretary of the Interior to follow this same course in every future case, if that is the idea of the precedent.

I do think it was an indication that the Secretary of the Interior under facts which he deemed appropriate could use this method in future cases.

Mr. LANIGAN. I asked Mr. McArdle why he was worried about whether or not it was a precedent.

Mr. McARDLE. Essentially the same point. We were in conference with each other, the General Counsel's office and the Forest Service, and Mr. Mynatt has expressed my opinion.

Mr. LANIGAN. Were you concerned as to whether or not in future cases evidence would be taken without consultation and notice to the Forest Service?

Mr. McARDLE. Yes, sir.

Mr. LANIGAN. If that occurred, would you think that that would be harmful to the administration of the national forests?

Mr. McARDLE. Not necessarily, but I think we would like to know what is being done.

Representative CHUDOFF. Could I ask your solicitor a question at this point, sir?

Your name is Mynatt?

Mr. MYNATT. Yes; M-y-n-a-t-t.

Representative CHUDOFF. Mr. Mynatt, you are familiar with paragraph 205.9 of the Code of Federal Regulations, chapter 1?

Mr. MYNATT. Yes, sir.

Representative CHUDOFF. Would you say in your opinion that the Secretary of the Interior ignored or forgot or refused to be bound by these regulations in the procedure adopted in this particular case?

Mr. MYNATT. Mr. Chudoff, I would have to answer that question in this way:

The regulations, to me, are not clear as to whether we are or are not entitled to notice where the Secretary of the Interior decides to use Bureau of Mines in arriving at the conclusion. I would just have to say that we were unable to determine whether, on those regulations, we were entitled to notice.

Representative CHUDOFF. Under the regulations you feel you were entitled to it, but you are not sure whether the Secretary, having taken into consultation Bureau of Mines, had to notify you?

Representative HOFFMAN. Read that question.

Representative CHUDOFF. I would like to get it straight, that is all. (The pending question was ready by the reporter.)

Representative HOFFMAN. I understood the counsel to say that there was not anything in the regulations, so far as he knew, or in the statutes although he did not mention it, which requires the Department to notify him. You are trying to get him to say that there was.

Representative CHUDOFF. I am not trying to get him to say anything. I am trying to find out whether or not, in his opinion, the regulations were followed by the Secretary, or did he ignore them.

You say he was not bound to notify you if he took in the Bureau of Mines?

Mr. MYNATT. I said I wasn't sure whether the regulation applied where he took in the Bureau of Mines.

Representative CHUDOFF. To your knowledge, had the Secretary ever taken in the Bureau of Mines before in any case of this type?

Mr. MYNATT. No, sir; not in any case within my knowledge involving national forest lands.

Representative CHUDOFF. This was the first time within your knowledge in the history of these cases that your department was ignored and the Bureau of Mines was taken in on the case?

Mr. MYNATT. Well, it is the first instance in which this procedure was used in our case.

Representative CHUDOFF. And you would say it was very unusual due to the fact that your department had protested and had decided that there was not enough mineral content in the assays to develop the land as a mining claim?

Mr. MYNATT. Mr. Chudoff, I would have to answer that by saying that it wasn't the customary way in which our cases had been handled in the past.

Representative CHUDOFF. And that you did not know anything about this decision or what was being done until you read the final decision itself?

Mr. MYNATT. That is correct, sir.

Representative CHUDOFF. Thank you.

Senator GOLDWATER. Mr. Chairman, might I ask the counsel a question?

Is there anything illegal in the methods used by the Department of the Interior in granting this patent?

Mr. MYNATT. Senator Goldwater, I know of nothing illegal. The question is simply this:

We believe that there was power under the regulations for the Secretary of the Interior to have asked the Bureau of Mines for assistance under circumstances which were known to him. We don't know what those facts were.

We simply say that under the regulations, under appropriate circumstances he could have asked the assistance of the Bureau of Mines.

Senator GOLDWATER. There is nothing in the law that said he had to do so?

Mr. MYNATT. Had to what?

Senator GOLDWATER. Had to seek the Bureau of Mines' assistance?

Mr. MYNATT. No, sir.

Senator GOLDWATER. In other words, what the Department of the Interior did in this case was no infringement of any law?

Mr. MYNATT. It is not an infringement of any statute; no, sir.

Representative HOFFMAN. Any regulation?

Mr. MYNATT. Any law.

Senator GOLDWATER. You and Dr. McArdle have expressed a concern in this case that it might establish a precedent.

Now, these patents were granted in 1954. That is 2 years ago. In 2 years since, has anything happened that would give you any cause to thing that a precedent had been established?

Mr. MYNATT. No, sir.

Senator GOLDWATER. That is all I have.

Representative CHUDOFF. Can I ask you one more question?

Mr. Solicitor, had your department known or received notice about the proposed grant of patents, you would have vigorously opposed it, would you, on the basis of your investigation, your decision, and so forth?

Mr. MYNATT. Well, had we known that additional evidence was to be presented, we would have reviewed that evidence and determined what additional evidence, if any, we could have introduced to give the Secretary of the Interior full information.

Representative CHUDOFF. But you never got the additional evidence? You did not know what was going on? The first thing you knew was when you got the final decision?

Mr. MYNATT. The first we knew that there had been some additional assaying done was when we received the copy of the decision in our office about January 20, 1954.

Representative CHUDOFF. Then, as a result of that, Dr. McArdle went to the Secretary of Agriculture?

Mr. McARDLE. No.

Representative CHUDOFF. You said something about somebody contacting the Secretary of Agriculture and asking him to talk to the Secretary of the Interior about either reconsidering or overruling his decision. Did you say that, Doctor, or was I mistaken?

Mr. McARDLE. No, sir. May I correct that?

I said that we debated what might be done and considered that that probably would be the only course open to us.

Representative CHUDOFF. But you never did go to the Secretary of Agriculture?

Mr. McARDLE. We did not.

Representative JONAS. May I ask Mr. Mynatt a question?

Senator SCOTT. Yes.

Representative JONAS. Mr. Mynatt, you have stated that you do not know of any case that has arisen while you have been in the Department in which this procedure was followed.

Mr. MYNATT. Within the national forests, Mr. Jonas.

Representative JONAS. Now, can you tell us whether you have known of any case in which there was a contest between a claimant or a patentee and the Forest Service, before the Bureau of Land Management, in which the claimant did not press his evidence but stood on a demurrer, and thereby sought to question the right of the Bureau of Land Management to take action in the case because of legal matters?

Mr. MYNATT. There have been cases, Mr. Jonas, in which for some reason or other the claimant failed to produce his evidence before the manager.

Representative JONAS. I am asking you if you have ever heard of a case, or if you know of a case, in which the claimant elected to stand on a demurrer as was done in this case?

Mr. MYNATT. No, sir; I do not.

Representative JONAS. So in that respect, therefore, when the file came to Washington it did present a very unusual situation and one which had never arisen before to your knowledge?

Mr. MYNATT. Well, yes, in the respect that the claimant decided to rely on a demurrer rather than introduce his evidence at the hearing.

Representative JONAS. Now, may I ask you this further question:

Is it true that in Oregon where the hearing was first held a very acrimonious dispute developed between representatives of the Forest Service, the Bureau of Land Management, and the claimants?

Mr. MYNATT. Mr. Jonas, I don't know about that. Our attorneys out there may, but I don't know about that.

Representative JONAS. You never heard that there were a lot of charges back and forth about bad faith?

Mr. MYNATT. At the time of the hearing or before the hearing?

Representative JONAS. Yes, and subsequent to the hearing.

Mr. MYNATT. Oh, I have heard something about it since the hearing; yes, sir; but not prior to the time of the hearing before the manager. There may have been, but I am just not aware of it.

Representative JONAS. You have heard that it developed into a rather bitter name-calling contest between representatives of the Forest Service and the Bureau of Land Management on one side, and these claimants on the other?

Mr. MYNATT. I don't know to what extent the Forest Service was involved, but I know that there was a good deal of discussion about it; yes, sir.

Representative JONAS. Do you know that the hearing examiner who heard the case felt that the dispute had grown so bitter that he didn't even want to render the decision and sent the file to his superior in Washington and asked him to render the decision?

Mr. MYNATT. No, sir; I don't know that.

Representative JONAS. You do not?

Mr. MYNATT. No, sir; I don't.

Representative JONAS. May I ask you one other question?

Mr. MYNATT. Yes, sir.

Representative JONAS. This is a question on the Bureau of Mines. That is an agency of the Government?

Mr. MYNATT. Yes, sir.

Representative JONAS. Do you have confidence in the Bureau of Mines?

Mr. MYNATT. Well, Mr. Jonas, I have confidence in all Government agencies.

Representative JONAS. I did not ask you if you had confidence in all of them. I asked you if you have confidence in the United States Bureau of Mines?

Mr. MYNATT. I have never done any work with the Bureau of Mines, but I would answer that question "Yes."

Representative JONAS. Do you think it is a reputable agency of the Federal Government, staffed by people who know their business?

Mr. MYNATT. Well, to my knowledge; yes.

Representative JONAS. Would you think that the Bureau of Mines would be qualified to take samples of ore and have them assayed?

Mr. MYNATT. Yes; I think that is one of their purposes.

Representative CHUDOFF. Mr. Jonas, let me get this straight from you.

The Bureau of Mines did not assay; the Williams Co. assayed. As a matter of fact, Mr. Appling testified that he had no confidence in the assayers of the Bureau of Mines.

Representative JONAS. Do you want me to ask the question?

Representative CHUDOFF. You may ask the question.

Representative JONAS. Will the stenographer please read the question I asked Mr. Mynatt?

(The question was read by the reporter.)

Representative JONAS. Mr. Chudoff, did you hear the question? The question I asked is, Does the witness think the Bureau of Mines would be qualified to take samples of ore and have them assayed?

Representative CHUDOFF. That is a general question. That applies to all cases.

Representative JONAS. That is exactly what happened in this case. They took samples and had them assayed.

Would you think the Bureau of Mines would be qualified to do that sort of thing?

Mr. MYNATT. I do.

Representative CHUDOFF. Could I ask a question?

There has been a lot of talk about demurrers, and when I used to try civil cases or criminal cases, they used to say that when we demurred the evidence, we say we are admitting everything that the case said in a criminal case or admitting everything that the plaintiff said in a civil case, but we still think that we win.

Is that generally what a demurrer is:

I will not offer any evidence. Based on what the plaintiff offered, we win.

Mr. MYNATT. Yes, sir.

Representative CHUDOFF. This was an argument between the Federal agency and the Al Sarena Mines. The Al Sarena Mines refused to offer any evidence, refused to counteract anything that the Government agency had put in. Therefore, how could the Government agency possibly decide for the mining company without any counteracting evidence or cross-examination?

As a matter of fact, I believe they walked out of the hearing.

Mr. MYNATT. It is my information that they walked out of the hearing.

Representative CHUDOFF. So, on the basis of the record, there could not be any other decision than against the company.

Mr. MYNATT. Mr. Chudoff, as I understand it, on the question of demurrer—and whether this would be the kind of demurrer we use in a court is a question—this is an administrative proceeding. What they asked was a ruling on the demurrer before they presented their evidence.

Representative JONAS. That is right.

Mr. MYNATT. When they didn't get that ruling, they walked out.

That is my understanding of the proceedings in Portland.

Senator NEUBERGER. Mr. Chairman, I think two facts should be put on the record at this point.

First, I think that, in fairness to committee counsel, it should be pointed out that Mr. Jonas quite properly addressed a whole series of questions to Mr. Mynatt based on Mr. Mynatt's opinions.

That was, Mr. Jonas, quite properly right, but I think it should be noted that for the past week there has been constant criticism by members of this committee whenever either Mr. Redwine or Mr. Coburn addressed a question to any witness asking his opinion of something.

I think that should be put on the record.

Secondly, the Senator from Arizona asked if it were not true that this decision was handed down in January of 1954, and there has been no repetition of it since. Mr. Mynatt said that, to his knowledge, that was correct.

I think it should be noted for the record that in February of 1954 there began constant public criticism of this decision in the State of Oregon and the Pacific Northwest generally by people in public life, by conservation groups and by many segments of the press, 1 month after it was handed down. I think that that should be noted for the record, too.

Senator GOLDWATER. I agree with the Senator from Oregon that everything that his people in Oregon have said about this should be

in the record. My question was not directed at anything that pertained to remarks that the Senator has just made.

The question has been repeatedly asked here, has this established a precedent, and if it established a precedent, then I think something would have been done in the intervening 2 years about granting similar patents in a similar manner.

I merely wanted to bring out, and I think I have, that it has not established a precedent.

Representative HOFFMAN. Mr. Chairman, where are we now?

Representative CHUDOFF. In order to settle that question, I have the record of the hearings in Portland, and I think Mr. Rice was testifying and Mr. Redwine said to him:

Mr. REDWINE. At that time did the Al Sarena company and counsel leave the hearing without presenting evidence?

Mr. RICE. Not at that particular time. At the conclusion of the ruling on the demurrer and the motions, the counsel for the Forest Service asked for permission to proceed with the hearing. At that point \* \* \*

and so forth.

It appears from Mr. Rice's testimony that at the conclusion on the ruling of the demurrer and motion they left. Evidently he did make a ruling.

I think the solicitor testified that no ruling was made upon the demurrer. In view of Mr. Rice's testimony, he would be the best person to know.

Representative HOFFMAN. The point of order is that we have been back and forth on that. There is no contest on that, that the attorney got mad and walked out, and then the examiner did the only thing that he could do; rule against him and in favor of the Department.

What is the use of wasting any more time about it?

Representative CHUDOFF. The question of facts is whether he walked out before or after the ruling on the demurrer.

The Solicitor for the Department said he thought he walked out before the ruling. According to Mr. Rice's testimony, it shows he walked out after the ruling on the demurrer.

Representative HOFFMAN. I will concede. I do not care when he walked out, before or after, but he left.

Representative CHUDOFF. I want to keep the record straight, Mr. Hoffman.

Senator SCOTT. Are there any further questions?

Senator MALONE. Mr. Chairman, I would like to ask a couple of questions of Mr. McArdle.

I looked over your statement of yesterday, Mr. McArdle. Unfortunately, I could not be here all the time. We had a meeting of the Senate Finance Committee on a bill. Business is rather pressing.

It is clear from your statement that you have protested issuance of patents on these claims. First, I would like to ask you during what period were these claims located?

Mr. McARDLE. I think I covered that in my statement, Senator, that the mining claims in question were located at various times from 1897 through 1936. Some of the noncontested claims were not located until 1939.

Senator MALONE. 1936 was the last location. How many of them were located, we will say, in 1897 and in the early 1900's?

Mr. McARDLE. I would have to look that up, Senator.

Senator MALONE. You do have the dates, though?

Mr. McARDLE. We must have the dates in our files, but I don't have them with me here today.

Senator MALONE. Then would you complete your testimony by making the dates of original location a part of your testimony?

Mr. McARDLE. Yes, I would be glad to do that.

Senator MALONE. If you could, do that in time so that the transcript in the morning will show it. I will appreciate it. Some of us just have to read the testimony.

Senator SCOTT. Would you do that in the morning?

Mr. McARDLE. We can do that today, I feel quite sure.

Senator MALONE. Thank you.

(The information referred to follows:)

DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
Washington, D. C., January 19, 1956.

C(U).

Adjustments, R-6, Rogue River.

Al Sarena Mines, Inc.

Hon. W. KERR SCOTT,

*Chairman, Legislative Oversight Subcommittee,  
Committee on Interior and Insular Affairs,  
United States Senate, Washington, D. C.*

DEAR SENATOR SCOTT: Following are two items of information requested by Senator Malone today when Mr. McArdle was testifying before the joint subcommittee investigating the Al Sarena Mines matter:

1. The 23 claims were located in the following years:

Date of location and claim name:

1897—J. W. Merritt	1933—Rainboe
1897—Peter Applegate	1934—Alabama
1897—W. C. Leever	1934—Sulphide
1897—Mark Applegate	1934—Staples
1897—H. McKenzie	1936—Oro Real
1897—J. L. Grubb	1936—La Jolla
1897—J. D. McKinnon	1936—Arroyo Verde
1897—Henry Applegate	1936—Oro Escondido
1897—A. W. Dahlberg	1936—Cougar
1897—D. McKinnon	1939—Oro Alto
1932—Telluride	1939—Oro Rico
1932—Manganese	

2. The number of mining claims of the national forests which have been patented as of January 1, 1955, is 36,770.

Sincerely yours,

RICHARD E. McARDLE, *Chief,*  
By HOWARD HOPKINS.

Senator MALONE. Now, the basis of your protest really, when we come down to it, is the acquisition of mining claims in the Forest Service often proves later that the timber or the surface product is worth more than the mineral that they seek to mine. Is that not about the basis of your protest?

Mr. McARDLE. No, Senator. The protest was made on advice of the Bureau of Land Management mineral examiner, plus additional examination of our own mineral examiner, that the requirements of the mining law had not been met by valid discovery, and on five of the claims the required development work.

Senator MALONE. I guess I am calling for something that I criticized here the other day. I have been reading the papers myself. The claim that you get from the publicity is that there has been collusion

or some kind of crooked work and that you acquire the title to this timber, which is more valuable than the minerals.

You have never said that? You have never said that they located the mining claim in order to get title to the timber and have no interest in the mine?

Mr. McARDLE. To the best of my knowledge, we have never made that statement.

Senator MALONE. All right. Now, what does the mining law provide for patent? What do you have to show to secure patent to a mining claim?

Mr. McARDLE. You have asked me the question. I will attempt to answer it, but you will bear in mind that I am not a lawyer and I will have to give you my own conception of it.

Senator MALONE. You may refer to your lawyer if you wish.

Mr. McARDLE. In order to obtain a patent on a mining claim, a claimant must show evidence of a valid discovery. By that is meant a discovery sufficient to justify, in the words of the law:

\* \* \* a prudent man to spend additional money to develop it.

He must do \$500 worth of development work. He must pay fee of \$5 an acre and he must have the land surveyed.

That is my understanding of what he must do.

Senator MALONE. He must have what?

Mr. McARDLE. He must have a mineral survey made.

Senator MALONE. Did they have \$500 worth of work done?

Mr. McARDLE. Our mineral examiner decided they had not on 5 of the 15 protested claims.

On eight claims which were not protested we felt that all of the requirements of the law including development had been met.

Senator MALONE. And on the other two? There are 15 claims. You have accounted for 13 now. What about the other two?

Mr. McARDLE. I said on eight claims he gave us his opinion that all of the requirements had been met. He recommended no protest. That left 15 claims out of 23.

Senator MALONE. Now, on 5 of the remaining 15 there was not enough development work?

Mr. McARDLE. In his opinion, no, sir.

Senator MALONE. Then what was your protest based on on the other 8?

Mr. McARDLE. We made no protest on the eight.

Senator MALONE. That would be 10 claims left.

Did they patent 23?

Mr. McARDLE. Twenty-three claims were patented.

Senator MALONE. Then there would be 10 claims. What did you do with the 10 claims? Did you protest the other 10?

Mr. McARDLE. There were 23 claims in this lot.

Senator MALONE. I am trying to get the picture.

Mr. McARDLE. Our examiner examined all of them. On 8 of them he recommended no protest. On 15 he did recommend making a protest, and on 5 of those 15 he said that, in addition, there had not been the required development work, in his opinion.

Senator MALONE. Then what was the basis of the protest on the remaining 10. This accounts for 13.

Mr. McARDLE. The basis of the protest on the remaining 10 was that there had not been enough showing of minerals; and that, in his opinion, the requirements of the law had not been met in that respect.

Senator MALONE. As to the development, has there been an engineer's report or does the mineral surveyor's report show that the work that had been done altogether totaled enough work or that it was not done in a manner to develop these claims?

Mr. McARDLE. Now, you are getting into a situation, Senator, where the question should be directed to a mining engineer. But, as I read Mr. Hattan's report, he was the mineral examiner from the Bureau of Land Management who made the first examination, he said that while a large amount of development work had been done which would apply to the 8 unprotested claims, he did not think that all of that development work could apply to all of the remaining 15 because of topography and for other reasons.

Senator MALONE. And he specified those reasons, that the total development work could not apply to these five that you mention specifically?

Mr. McARDLE. He did, and that is in Mr. Hattan's report, as I recall, which has been made a part of this testimony.

Senator MALONE. And also the 10 in addition to the 5? That would apply to the 10, too, that this work had not been done in development?

Mr. McARDLE. No, he made no recommendation that the protests on the remaining 10 be based on insufficient development work.

Senator MALONE. He thought that development work applied in the development of 10?

Mr. McARDLE. He did.

Senator MALONE. And on only 5 of the 23, development work would not apply?

Mr. McARDLE. That was his recommendation.

Senator MALONE. I understand thoroughly now what you mean. That, then, would be a matter of judgment of the Secretary of the Interior if he had reports that showed that the development work did apply, would it not?

Mr. McARDLE. Yes.

Senator MALONE. And that could be a matter of judgment among engineers. I have not myself seen the claims. I am asking you.

Mr. McARDLE. It would be a matter of his judgment of deciding under the law whether the required development work had been done.

Senator MALONE. And whether or not this development work applied to the development of these five claims that were excepted by Mr. Hattan?

Mr. McARDLE. That is my understanding, yes.

Senator MALONE. Then, if another engineer reported to the Secretary differently, or if one of his inspectors reported differently, it was up to the judgment of the Secretary of the Interior?

Mr. McARDLE. That is my understanding; yes, sir.

Senator MALONE. And the law allows such judgment, does it not?

Mr. McARDLE. It does.

Senator MALONE. Now, as to the assay, did all of these claims carry some kind of mineral; that is to say, you got some kind of assay on each of the 23, or were there some barren?

Mr. McARDLE. As I recall the statements in Mr. Hattan's report and later in the testimony by Mr. Hattan and Mr. Sanborn, there was

some trace of certain minerals on all of the claims. I could be wrong on that. It could be that on some of them they found nothing.

Senator MALONE. You are not sure about that?

Mr. McARDLE. I would have to go back and refresh my memory with his report.

Senator MALONE. Now, does the law provide that, at the time of application for patent, it is necessary to show feasibility of mining a mineral on which the work had been done and for which you seek patent?

Mr. McARDLE. Now, Senator, you go to a matter of interpretation of the law, and I am not competent to answer that.

Senator MALONE. I will come to your attorney pretty soon. He testified, I think, that there had been a court decision or at least something that you go by that there must be a discovery of mineral in order to be patented that would convince a prudent man that he should spend his money in development.

Mr. McARDLE. The words I said were:

\* \* \* would justify a prudent man in spending his money for further development.

Senator MALONE. Have you had any experience in mining?

Mr. McARDLE. No, sir.

Senator MALONE. I did not want to ask you any embarrassing questions.

Are you familiar at all with engineers' reports on mines?

Mr. McARDLE. Only those that I have read.

Senator MALONE. Or with engineers' reports on prospects?

Mr. McARDLE. Only those few that I have read. I have made none myself.

Senator MALONE. I am going to ask you a question now that I am asking you because you are here protesting something in a business with which you yourself say you are not familiar.

Do you know what causes a prudent man to dig on ground where there is no showing of minerals at all?

Mr. McARDLE. Senator, I do not know that; nor does our regional forester who made the original protest know that. He relies upon the judgment of experienced mineral examiners and their recommendation.

Senator MALONE. Now, was it an experienced mineral surveyor that made the surveys?

Mr. McARDLE. I assume that he was. There was no protest made regarding his survey, so far as I know.

Senator MALONE. There has been no protest on the capability of the engineer, or whoever made the survey. Has anyone protested?

Mr. McARDLE. We are talking about the surveyor or the mineral examiner?

Senator MALONE. The surveyor.

Mr. McARDLE. As far as I know, no protest.

Senator MALONE. Now, for your information, I am going to tell you that much money is spent on ground where there are geological reports by competent engineers and geologists where there is very little, if any, immediate showing of mineral.

You have never heard of that sort of thing, have you?

Mr. McARDLE. Yes; I have heard of that.

Senator MALONE. Then you know that many important companies make money, companies known nationally and internationally, and they do that all the time. Are you familiar with their methods?

Mr. McARDLE. Yes, they do that; but we are talking about an application for patent, Senator.

Senator MALONE. In other words, I am directing this to the prudent man idea which you brought out. I understand that there is a Supreme Court decision along that line that if a prudent man would not dig on a certain discovery, you would not consider it a discovery.

Mr. McARDLE. There has been, as you know far better than I do, a large body of law on this subject dealing with the interpretation of the mining laws, Senator.

Mr. MALONE. That is true, and it is one reason why I have been against amending this mining law every time the moon changes, because we do have that long line of decisions. I understand it very well.

I am now addressing these questions to you because you are the protestant and I want to know what you know about it.

Mr. McARDLE. My protest and the Regional Forester's protest is based on the opinion of men that we consider competent mineral examiners.

Senator MALONE. They are men that work for you?

Mr. McARDLE. Mr. Hattan is an employee of the Bureau of Land Management. The other mineral examiner, Mr. Sanborn, is an employee of the Forest Service.

Senator MALONE. Do you have the records of those men here?

Mr. McARDLE. I don't have their records with me, but their records were read into the testimony at Portland.

Representative CHUDOFF. They gave a full disclosure of everything they had in the record of the Portland hearing.

Senator MALONE. I want to be sure that they are in the record because over many years one of the great differences of opinion occurring among engineers—

Representative CHUDOFF. These men not only gave their records, but also testified.

Senator MALONE. If you will allow me, I will complete the testimony here because I happen to be in the engineering business, and that is where the grave difference of opinion in mining and in the feasibility of projects comes.

Representative CHUDOFF. Senator, I am not trying to stop you. I just wanted you to know that that information was in the record.

Senator MALONE. I already found that out. Thank you, anyway.

Now, then, if you are convinced that not particularly the Al Sarena Mines—but that happens to be under consideration, but if geological reports and engineering reports recommended that money be spent in the development of these claims, or any claim as a matter of fact, and the amount of work up to \$500 per claim had been done on the claims, would you then protest the patent?

Mr. McARDLE. You say who made these examinations?

Senator MALONE. No. I say if reputable engineers and geologists recommend that money be expended, maybe \$1,000, \$2,000, \$5,000, or \$50,000 be expended on a showing on a claim, a discovery which may be a trace of gold or a quarter of 1 percent manganese, or 10 percent manganese or some other metal, but due to the geological formation,

the geologist or engineers recommend that money be expended for further development of this ground, would you then say that they were not prudent men to follow these recommendations?

Mr. McARDLE. I am going to answer your question, but first I want to comment that Mr. Hattan made exactly that recommendation in the case of the uncontested claims, that there were several claims showing no metal, but the geologic formation indicated further research and development.

As to the question, I don't want to answer it exactly in the form it was asked in my position, and I cannot forget that I am an employee of the Government.

Senator MALONE. Do the best you can. Answer it in any way you want.

Mr. McARDLE. I would want to employ a Government mineral examiner, a man in whom I had confidence. If I didn't have confidence in him, I would get another one, but I would want him to report direct to me and have no other connection.

Senator MALONE. What if there was a difference of opinion?

Mr. McARDLE. And I think I would be guided very strongly by his recommendation because, as I would have volunteered if you had not brought it out, I am not competent to speak on the mining aspect.

Senator MALONE. We understand that. In engineering you can talk freely because you are not responsible, and in law I can talk freely because I would not be responsible. We will have that understanding to start with.

Now, if a reputable engineer in whom men who had the money had confidence, and on his recommendation they did spend the money, recommended that they dig on these claims with the hope of developing a zone or finding a mineralized zone, would that shake your faith at all in a strong protest?

Mr. McARDLE. It would cause me to hesitate and to question whether I had the right answer or not.

Senator MALONE. How much money had these people expended on these claims?

Mr. McARDLE. I have heard various figures, Senator. They range from \$50,000 to \$250,000. I do not know.

Senator MALONE. I have heard a figure around \$100,000 to \$200,000 also, but, at least, if they spent \$50,000, they must have had some advice that they might find mineral if they expended that amount of money. Do you not think so?

Mr. McARDLE. They must have hoped that they would find something, but again I would have to point out something which you know far better than I do, that the protest cannot be based on how much money they spent. It has to be based on whether or not our mineral examiner found any evidence of mineralization.

Senator MALONE. I am going to tell you one thing now that will help you in the future. I have been a mineral surveyor for 30 years, and I have sat in the United States Senate, and I have never been asked a question as to whether or not it was currently a commercial project that we were patenting.

Did you ever hear that question being asked of a mineral surveyor?

Mr. McARDLE. No; I don't believe I did.

Senator MALONE. I do not think you will ever find it.

Now, when you come down to the basis of your protest—and I am here for 2 or 3 more years and I suppose you are, at least—I ask you what is the basis of your protest, why your interest, because all the publicity is that you think they are getting a valuable property, much more valuable for the timber than for the minerals, and that that is their interest in it. Is that what you believe?

Mr. McARDLE. I said that our protest was based on the fact that, in the opinion of our mineral examiner and in the opinion of the Bureau of Land Management mineral examiner, the requirements of the mining law had not been met.

Senator MALONE. Well, then, in my question a while ago I thought I cleared that up, that they did spend the money and had advice from mining engineers that it was well spent in the search for minerals, and that, when you talk about a prudent man digging, a prudent man, if he has the money, digs where his engineer tells him if he has confidence in that engineer. You understand that?

Mr. McARDLE. Yes.

Senator MALONE. I want to say another thing to you. I am interested in prospectors who are not prudent men. If a prospector never located anything except what a prudent man will spend his money on, 99 percent of the mines we now have would never have been discovered. Do you have any knowledge along that line?

Mr. McARDLE. That may be true, Senator.

Senator MALONE. It is true. I give you that for what it is worth.

A prospector is a man who is convinced and feels that, when he locates a mining claim and has a discovery, whether it runs 1 percent or one-tenth of 1 percent, that if he keeps digging he is going to find a mine, and if he finds it it belongs to him. That is the reason that we have jealously protected this prospector's rights, that when he walks over these mountains and public lands, all he has to do when he makes a discovery which he thinks is a discovery, whether at the moment it assays or not, if it is on a mineralized zone and a geologic formation with promise of mineral, he can stick up his stake and file his application with the county clerk and put up his money to comply with the law, and it belongs to him. You are familiar with that?

Mr. McARDLE. Senator, I think it was read into the testimony when you were not here that while a claim is in claim status he can do all the work on it he wants. Nobody is going to protest and nobody can protest unless some other one, not the Government, finds that he does not do the \$100 worth of assessment work. We are talking now about when he goes to patent.

Senator MALONE. I had not quite finished.

Mr. McARDLE. Pardon me, sir.

Senator MALONE. Then when he does the \$500 worth of work on the development of this discovery, regardless of whether it is a commercial claim at the moment or not, if he has a mineral surveyor survey this claim, that complies with all the Federal and State laws, and if he pays the fees necessary and pays \$5 an acre for the land, it goes to patent; is that right?

Mr. McARDLE. That is correct.

Senator MALONE. And you yourself would not protest, according to your previous testimony, if the work is done to develop this mineralized zone?

Mr. McARDLE. I believe I brought out in my testimony yesterday, Senator, that by joint order of the Secretary of Agriculture and Secretary of the Interior that dates back to 1915, the Bureau of Land Management notifies us of any applications for patent on national-forest land, and that is how we got into this picture.

Senator MALONE. Well, I think that is a very good understanding and I think you should work together in that manner. Is there anything in the law that requires it?

Mr. McARDLE. That requires that?

Senator MALONE. Yes.

Mr. McARDLE. Not to my knowledge in the 1872 mining laws; no.

Senator MALONE. Is there anything in any mining law that requires it?

Mr. McARDLE. So far as I know, nothing requires it nor prohibits it.

Senator MALONE. I am glad that you are doing it. I think it shows a very fine cooperative spirit between the Secretary of the Interior and the Secretary of Agriculture, but it would not affect a mining patent; would it?

Mr. McARDLE. In what way?

Senator MALONE. It would not affect it at all, whether you were notified or not. Maybe you might get mad at each other; it still would not affect a mining patent?"

Mr. McARDLE. No; it would not.

Senator MALONE. Well, now, what was this timber worth in 1897 when they first started to locate this claim? Did it have great value then?

Mr. McARDLE. I would say it had very little value.

Senator MALONE. Did not that situation obtain up until the early 1930's when they were selling timber for taxes up in that country and in various other parts of the country out there? Were there not times when the timber was worth very little?

Mr. McARDLE. Yes.

Senator MALONE. What I say is true; that they were bidding in timberland for taxes and very slight payments on other categories, and people just did not have the money and there was no sale for timber. Is that about right?

Mr. McARDLE. That is about right.

Senator MALONE. 1936 was the last time they located?

Mr. McARDLE. That is right.

Senator MALONE. Well, would it seem to you that they had their eye on this timber from 1897 to 1936, or would it seem that these people had their eye on the minerals?

Mr. McARDLE. Senator, that calls for an expression of opinion as to what was in someone's mind, and I do not know.

Senator MALONE. I hope that you stay with that from now on, because I have been reading in the papers a lot of statements and I did not start reading them until I attended this first hearing. You are credited with an awful lot of statements to the contrary.

Mr. McARDLE. I can only refer you to the record.

Senator MALONE. That is what I am going to refer to from now on; that you do not know anything about that; that it would only be conjecture and you do not want to enter that field at all and you do not believe, and I will ask this further question, that it should have anything to do with patenting the claim anyhow.

Mr. McARDLE. I am not sure I understand that question.

Senator MALONE. I will say it again. We are talking about the law and patents of claims.

Under the law, would it have anything to do with a legitimate issuance of a patent by the Secretary of the Interior if the patent law were otherwise complied with?

You do not understand it yet? I will give it to you again.

Regardless of what is on top of the ground, if all of the patent law has been complied with, first the location and next the work of the discovery and everything complied with, does anything located on top of the ground have anything to do legally with the patenting of a mining claim?

Mr. McARDLE. I can't answer your question because it goes to interpretation of the mining law, on which previously we both agreed there was a large body of court decisions.

Senator MALONE. I did not agree with that and you did not agree with it, either. Let me say this again.

You are a very clever witness and you are getting better as we go along, but I would rather you would be frank with me because we are going to be here a while, at least 2 or 3 years, as I told you.

If a man goes out and locates a claim and does the work, and all the laws, regardless of any decision, are complied with in the application for patent, can the Secretary of the Interior take into consideration in the issuance of this patent whether or not there is something on top of the ground that has a value?

Mr. McARDLE. I believe it has been interpreted that he may, but that question should be directed to the Secretary of the Interior.

Senator MALONE. Well, it was, and he granted the patent.

Now I am going to ask your attorney that question.

You are a lawyer now? Your name is Mynatt?

Mr. MYNATT. Mynatt.

Senator MALONE. And you work for the Department of Agriculture?

Mr. MYNATT. Yes, sir.

Senator MALONE. You heard the question. You may answer it.

Mr. MYNATT. Senator Malone, before I answer that question I would like to make this explanation.

Senator MALONE. Make the explanation afterwards.

Mr. MYNATT. Then I cannot answer that question.

Senator MALONE. All right. Go ahead.

Representative HOFFMAN. Mr. Chairman.

Senator MALONE. That is all right.

Representative HOFFMAN. Will the Senator yield for one question?

Senator MALONE. Let me finish and then you take over.

Representative HOFFMAN. Pardon me.

Senator MALONE. You fellows have plenty of time. You have been here for 10 days.

Mr. MYNATT. Senator Malone, we realize that the practice of law with respect to the mining laws is a highly specialized field. For that reason, for a period of 25 or 30 years the authority to handle these claims has been lodged in our field attorneys in the West. We have men in each of those areas who we feel are qualified in that specialized field of law.

I do not claim, sir, to be qualified in that field, and I have tried to limit my statements here to those things that occurred in Washington. That, sir, is the way we have worked for many years.

Senator MALONE. If you cover this Washington area, you have your hands full. I have only been here for 10 years and they have less common horsesense here than any place I have ever been.

I will then ask you one more question at least.

Is the Department of Agriculture in fact charged with any responsibility whatever in the issuance of the patent on a mining claim?

Mr. MYNATT. By law, no, sir. No, sir; we are not. The answer is definitely "No."

Senator MALONE. Well, that is very good. I guess the rest of your answer would not make much difference anyway because the Secretary of the Interior, in your opinion, is charged with the full responsibility of issuance of patents on mining claims.

Mr. MYNATT. Yes, sir; the Secretary of the Interior is charged by statute specifically with that authority.

Senator MALONE. Now, then, if he finds as a fact that all of the rules, regulations, and laws that are indicated in the mining law are complied with in his judgment, and he issues a patent, in the absence of fraud who can question his decision?

Mr. MYNATT. I don't know of anyone. We have no authority. There is no appeal. He is the final authority.

When this decision of January 6, 1954, was issued, it was issued by the person who had the responsibility for making that decision.

Senator MALONE. Now I have got news for you. I do not think it is news for you.

There has been an attack on the mining laws of this country for 23 years. This is the 24th year. The 1872 act did result in turning the prospector loose so that he was absolute boss of his mining claim if he complied with the law; when he had done enough work in the regular manner and proved it before the Secretary of the Interior and secured a patent, he could do anything with it that he wanted.

That law has resulted in major mining developments on public lands over the period since 1872. Any time you clip the prospector's wings, any time you clip his independence, after complying with the law, by putting him under someone in Washington who, by his own admission, would have to say that he sits on that question and reads the rules and regulations and does his mining right here in Washington, it is the beginning of the end for the mining industry in the United States of America on public lands.

Now, there is a continual attack, and this is the 24th year of attack. Last year the attack was made. I opposed it as long as I conveniently could in committee, and then on the floor. Now there will be another amendment offered this year after the public is entirely sold that we are stealing timber under this mining law and that there must be an amendment to the law to allow someone in Washington to determine whether this claim is more valuable for something on top of it than underneath it, and the projectors of this legislation hope that the public will force its passage.

Then, if not this year, very soon thereafter there will be a bill introduced to put it under a leasing act to repeal entirely the location act. That is the final objective of the bureaus in Washington, to get this little old prospecting miner under their thumb so that he will

have to dig where they tell him or get off the claim. When that time comes, that is the end of mining as you and I know it on public lands in America.

I thank you both very much because you have both denied that you have any knowledge at all that this was not valuable enough as a mineral to patent it. The rest is a matter of law and I will be here when the Secretary of the Interior or the Government witnesses come.

I think you have made good witnesses on the record, and I hope that you stay with it in your public statements.

Thank you.

Senator NEUBERGER. I would like to ask a question if I may.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. To begin with, I would like to just say this for the record: So far as I am concerned, whether the replies of the representatives of the Government agencies in this or any other hearing satisfy me or not, I will judge any future policy or personnel of that agency on the merits, regardless of how they answer me in these hearings or any other hearings.

The question was raised, Dr. McArdle, about the value of the timber in 1897, and you agreed that the value was trifling or negligible; is that correct?

Mr. McARDLE. I think that would be common knowledge, Senator.

Senator NEUBERGER. And you also agreed that the value of the timber was still relatively low in 1935 and 1936; is that correct?

Mr. McARDLE. I agreed to that yesterday and I think again today.

Senator NEUBERGER. Is it not a fact that the company did not seek patent until 1948?

Mr. McARDLE. The application for the patent was made in 1948; yes, sir.

Senator NEUBERGER. Prior to 1948, then, the company could not have sold the timber commercially; is that correct?

Mr. McARDLE. That's correct.

Senator NEUBERGER. In 1948 had the timber increased substantially in value?

Mr. McARDLE. I judge that you are referring to the price it might have brought on the market.

Senator NEUBERGER. Yes.

Mr. McARDLE. The answer is "Yes."

Senator NEUBERGER. In other words, until patent was applied for in 1948 the company could not have marketed or sold the timber commercially?

Mr. McARDLE. Legally they could not have marketed or sold it; but let's assume that this had been private land and timber there, probably there would have been a market for it. I don't know if I understood you correctly.

Senator NEUBERGER. What I mean is legally. In other words, until the Al Sarena Co. applied for the patent in 1948 and until patent was granted in 1954 the Al Sarena Co. had no legal right to sell that timber commercially?

Mr. McARDLE. Until February 11, 1954, they had no legal right to sell the timber.

Senator NEUBERGER. Do you mean January or February?

Mr. McARDLE. February.

Senator NEUBERGER. And they did not apply for patent until 1948?  
Mr. McARDLE. That's right.

Senator NEUBERGER. I just wanted to clear up that question concerning the value of the timber.

Your original testimony referred to some 200,000 mining claims on national forests; is that correct?

Mr. McARDLE. That's right; yes, sir.

Senator NEUBERGER. To your knowledge as a former field officer in the Forest Service would you say that a good many of those mining claims are operated by "little prospectors on the land"?

Mr. McARDLE. A great many of those that are operated are operated by little prospectors, but many of those 200,000 claims are not operated at all.

Senator NEUBERGER. To your knowledge in your service and tenure with the Forest Service have any of these prospectors, be they little or large, ever been accorded the procedure and treatment which the Al Sarena Co. received?

Mr. McARDLE. Not so far as I know; but, Senator, they were entitled to a full procedure of hearings all along the line.

Senator NEUBERGER. To your knowledge have any of these prospectors—again I repeat the question, and I am just asking to your knowledge—ever received this procedure?

Mr. McARDLE. By that do you mean—

Senator NEUBERGER. The matter would be referred to the Bureau of Mines that there would be a stipulation from the highest level of the Interior Department that there should be agreement between the Bureau of Mines and claimant as to who should make the assay, and so on.

Mr. McARDLE. So far as I know they have not.

Senator NEUBERGER. To your knowledge they have not.

I want to ask several other questions, if I may.

Reference was made to the advisability of undertaking development work, if recommended by engineers, even if there was "very little showing of minerals" or perhaps where there was "a trace." Considering that there are 200,000 claims on national forests involving some 4 million acres of forest land, if patent is to be granted where there is "very little showing of minerals" or "a trace," what do you think might be the result of those 4 million acres?

Mr. McARDLE. Senator, I have no idea.

Senator NEUBERGER. Would you believe that it would be advisable to grant patent on those 200,000 claims on the national forests based on an engineer's recommendation of development work even if there is very little showing of minerals or only a trace of minerals?

Mr. McARDLE. I don't think in the first instance the engineer would recommend that. I think he'd ask for more adequate showing; try to find more adequate showing. If he made such a recommendation to me, that although there was only a trace he thought perhaps the situation was such as to justify granting the patents, I don't believe that I would protest.

Senator NEUBERGER. Reference was made to the expenditures by this company on mining claims in the Rogue River Forest. To your knowledge were those expenditures made on the 8 uncontested claims or on the 15 disputed claims?

Mr. McARDLE. As I understand Mr. Hattan's report, they were made on all 23 claims, but in insufficient amount on 5.

Senator NEUBERGER. I am referring back to the total expenditures which have been made since the claims were first staked out. Do you know in what proportion they were made on the——

Mr. McARDLE. No.

Senator NEUBERGER. Eight uncontested claims and on the 15 disputed claims? I again want to get to a question which to me seems rather important in this whole thing.

In your experience—I asked the question yesterday and I want to repeat it—had this procedure ever before been followed with either a large or small mining claim or operation on the national forests?

Mr. McARDLE. Not so far as I know.

Senator NEUBERGER. That is all I have for the moment.

Senator MALONE. Mr. Chairman, I would like to clear some of this up. Who was it who testified that there were 200,000 mining claims located in the national forests?

Mr. McARDLE. I so testified.

Senator MALONE. Can you testify that 200,000 mining claims are in good standing with the location work done on these claims?

Mr. McARDLE. I didn't make that statement. I made the statement that there were 200,000 claims estimated.

Senator MALONE. Yes. I think you might be right, but I imagine that only a relatively small number have been kept up.

You see, in the history of location mining claims—that is one good thing about it—there have been millions and millions of mining claims located, but if you fail to do your \$100 worth of work you no longer have the claim. Someone else comes in and files or, as a matter of fact, if you just quit doing the work it is not in good standing, and many times a prospector will locate a mining claim thinking he has something and will do \$10 worth of work or \$1,000 worth of work and walk off and leave it because he believes there is nothing to it; is that true?

Mr. McARDLE. That is correct, and so long as that claim is in existence neither can the Government do anything with the land.

Senator MALONE. As long as it is in good standing?

Mr. McARDLE. It is in good standing if located in accordance with law and another claimant can not jump it if the required assessment work has been done. But the Government can't jump it even if the required assessment work has not been done. The law passed this last year changed this somewhat.

Senator MALONE. Cannot the Secretary of the Interior under the mining law clear that up if the work has not been done?

Mr. McARDLE. If there has not been a valid discovery he can under the new law which was passed by the Congress last year.

Senator MALONE. That is the law, is it not?

Mr. McARDLE. That's right.

Senator MALONE. And he can clear it up, so you have nothing to complain about now in that regard?

Mr. McARDLE. Correct.

Senator MALONE. You did not mention those 200,000 mining claims to confuse the issue, did you? You just mentioned them because you have found that number of claims filed with the county clerks of the counties in which this forest land is located?

**Mr. McARDLE.** It was not so testified in my statement yesterday, but those are estimates, as has been testified previously in Congress, based on our own field examinations.

**Senator MALONE.** There are that many claims that have been filed over what period of years in the counties in question?

**Mr. McARDLE.** The national forests have been in existence for 50 years. The mining law has been in existence, as you know, since 1872, so some of those must have been there before these were created national forests.

**Senator MALONE.** This forest land was not created in 1897, then?

**Mr. McARDLE.** The national forests were, some of them.

**Senator MALONE.** Was this established before the located first claims?

**Mr. McARDLE.** The lands of the Rogue River National Forest, within which the mining claims in question were located, were reserved for national forest purposes under presidential proclamation of September 28, 1893.

**Senator MALONE.** I just wanted to clear up that date.

How can they estimate the number of claims that were located in the forests?

**Mr. McARDLE.** Well, there are various ways of knowing that, Senator. As you well know, there are records in the county, which were examined.

**Senator MALONE.** You just ask of each county clerk the number of claims in the counties in the forest reserve areas and the claims that have been filed?

**Mr. McARDLE.** Yes. There are ways of knowing that. Of course, if they are not filed you don't know of their existence, until they are filed.

**Senator MALONE.** No; if they are not filed they are not legal claims.

**Mr. McARDLE.** That is right.

**Senator MALONE.** And if they are filed and the work has not been done, then there is plenty of legislation to clear it up?

**Mr. McARDLE.** There is now, yes.

**Senator MALONE.** Now is when we are operating, is it not?

**Mr. McARDLE.** That's right.

**Senator MALONE.** I will venture a guess that a very small percentage of the 200,00 claims have been kept up to date with current work done on them. I say that for what it is worth because I operate in that country.

**Mr. McARDLE.** We think it is very small, too.

**Senator MALONE.** How small? How many, do you think?

**Mr. McARDLE.** I would want to check my figures on that, but probably not more than a small percent of those within the national forests have ever been carried through to patent. I doubt if more than 10 or 15 percent have ever produced any minerals.

**Senator MALONE.** Do you not believe that 10 or 15 percent are in good standing at the present time?

**Mr. McARDLE.** Yes, I do.

**Senator MALONE.** Then, that would be 20,000 claims, not 200,000.

**Mr. McARDLE.** That is right, but under the law we have to work on all of them, not just the 20,000.

Senator MALONE. All you have to do is apply to the Secretary and let him do the work, is that not right?

Mr. MCARDLE. No; we have a good deal of work to do ourselves, but we can do it by areas of our choosing. We can take a national forest, we can take a county, or we can take a whole State. Then the point that you are talking about can be cleared up once and for all time under the law passed last year.

Senator MALONE. Are you doing that?

Mr. MCARDLE. We are doing that now.

Senator MALONE. That will be very helpful, but I think 10,000 claims might be a very liberal estimate at the present time.

Mr. MCARDLE. We think that very few of these claims are active.

Senator MALONE. I think about half of the 10,000, maybe 5,000, are in good standing, if you really get at it. As a matter of fact, have there not been very few patents issued in the Forest Service over the years?

Mr. MCARDLE. Yes; comparatively few.

Senator MALONE. Do you have the number?

Mr. MCARDLE. I don't have the number with me.

Senator MALONE. Could you get that for the record?

Mr. MCARDLE. I can get that for the record.

Senator MALONE. Will you make it a point to do that today, if you can?

Mr. MCARDLE. We can do that, and I will try to get it in today.

(The information referred to follows:)

The number of mining claims on the national forests which have been patented as of January 1, 1955, is 36,770.

Representative JONAS. Will the Senator yield?

Senator MALONE. Let me get through some of this business here.

Representative JONAS. I would like to ask him if he would not like to include in that how many of those claims the Forest Service protested.

Senator MALONE. I am not interested in that because they only show the protest here because they did not actually think—and his testimony has been very good today—a prudent man would have done this mining.

Your protest is only based on the fact that you believe a prudent man would not have done this mining? That is the substance of your testimony, is it not?

Mr. MCARDLE. That is correct.

Senator MALONE. A prudent man would not have done this mining, would not have expended \$50,000 or \$100,000 or \$200,000, and therefore he should not have patents?

Mr. MCARDLE. That is what I testified.

Senator MALONE. Then you also said that was a matter of judgment under the Secretary of Interior's charge?

Mr. MCARDLE. It is a matter of judgment of whether he will take the recommendation of the experienced mineral examiner, yes, sir; that is what I said.

Senator MALONE. My friend, I know a thousand engineers, maybe 50,000, in the United States and they work for different people. Engineers who know their business do not generally work for the Government for very long, unless they are getting to the point where they are slowed up a little bit.

I am working for the Government for the first time in my life and I am a little older too, but I come here for a purpose and this is one of the purposes, to be where I could do something about this kind of stuff.

However, if you mean what you have said today, that you are only basing a protest because you think a prudent man would not have expended this money and therefore they should not have been issued patents, I think I have earned my money for the day. You did say that, did you not?

Mr. McARDLE. Quite certainly I said it.

Senator MALONE. All right. If a miner then, along with these other 5,000 or 10,000, kept in good standing, without locating one tomorrow, and complied with the law and did \$100,000 worth of work or did \$5,000 worth of work, and has a showing of mineral, and there is discovery, and he applied for a patent, then until Congress itself changes the law the exercise of the power lies exactly where it is, in the Secretary of the Interior? Unless there is improper showing in the issuance of the patent, then the law passed by Congress is satisfied; is that true?

Mr. McARDLE. Until Congress changes it, the authority for administration of the mining laws, as has been testified, rests with the Secretary of the Interior.

Senator MALONE. And as long as Congress does not change that law, the Secretary of Agriculture can protest for any reason he wants to protest, or any other Cabinet officer, or any engineer, or any citizen of the United States?

Mr. McARDLE. That is correct.

Senator MALONE. And he has the discretion to decide whether or not a patent should be granted under the showing made by the mineral surveyor in presenting the request for patent; is that true?

Mr. McARDLE. Yes.

Senator MALONE. Thank you.

Senator SCOTT. Are you ready for the next witness?

Representative HOFFMAN. Do you want to give us a chance over on this side?

Senator SCOTT. Yes, sir. You had it all morning. Go ahead.

Representative HOFFMAN. That is the first I heard of it. I remember distinctly the Senator could only be with us occasionally and for short periods of time. I would like to have him stay.

Senator SCOTT. Go ahead.

Representative HOFFMAN. Now?

Senator SCOTT. Right now.

Representative HOFFMAN. All right. The first thing we had this morning, as I recall, was the distinguished Senator from Oregon calling attention to—was this the article in the Oregon Journal of December 16? Was that the one you were referring to, Senator, please?

Senator NEUBERGER. I was referring to your press release here that you distributed the other day.

Representative HOFFMAN. I thought you were referring to this article in the paper under date of December 16, 1955: "Politics Cried in Timber Hearings." I have looked through all I have. It may be on the back page, but it does not mention my name. This is by Larry Smith. Was that not what you were referring to?

Senator NEUBERGER. I was referring to your press release of January 10. I do not know whether you remember the attacks you make upon people, but you referred to me in that press release on page 3 and that is what I read from.

Representative HOFFMAN. It is the same charge made in this newspaper out there.

Senator NEUBERGER. It is the same charge you made at the timber hearings out in Oregon, which was refuted by the testimony of Mr. Lund and Mr. Stone, which I will be glad to read here also.

Representative HOFFMAN. You mean about this political contribution?

Senator NEUBERGER. That is right.

Representative HOFFMAN. Is that it?

Senator NEUBERGER. That is exactly right.

Representative HOFFMAN. I will ask about that some more then.

Have you read the record on the timber hearings?

Mr. McARDLE. No, we haven't.

Representative HOFFMAN. The ones we held at Redding, Klamath Falls, Roseburg, Medford, and so forth?

Mr. McARDLE. Not yet.

Representative HOFFMAN. And Portland?

Mr. McARDLE. We have just gotten them.

Representative HOFFMAN. On the mining? You are interested in forestry and interested in timber. Why did you not read the testimony of the hearings?

Mr. McARDLE. I intend to read them. We ordered them promptly, but have just received them. I certainly intend to read them, Mr. Hoffman.

Representative HOFFMAN. I hope you do not have as much trouble as the Interior Department did in getting them.

I think I might state, because there is no question on the record, that one of the questions involved was the question of whether there should be large or small sales of timber. Have you taken a position on that?

Mr. McARDLE. No, we have never taken a positive position on that, Mr. Hoffman.

Representative HOFFMAN. I should have also added, if you will pardon me, long-term large sales.

Mr. McARDLE. Yes, that's right. As you know, the bulk of the volume of sales of national forest timber has been with larger sales, long-term sales, because of the cost of opening up the country, but the bulk of the number of sales has been with fairly small sales. It is a question which we know your committee is considering and which we will want to discuss with the committee and with other representatives of the Congress to come to some fairly definite policy on the matter.

Representative HOFFMAN. However, heretofore it has been up to the Forest Service to say whether they sold it in large long-term sales, competitive bids, or whether they sold it on an appraised value, has it not?

Mr. McARDLE. Yes, sir, but all sales of over \$2,000 value are sold to the highest bidder.

Representative HOFFMAN. What has been the policy in the past? Maybe I asked that question before.

Mr. McARDLE. Mr. Hoffman, I did not hear you.

**Representative HOFFMAN.** What has been the policy of your Department with reference to that situation as to whether you should make large long-term sales, competitive bidding, or small negotiated sales?

**Mr. McARDLE.** Our policy has been to make both large and small sales because there are large and small industries, dependent on national forest timber.

**Representative HOFFMAN.** That is to say, there are locations where to get the most for the Government you must make the large long terms and in other places where you can sell to the little fellow?

**Mr. McARDLE.** I would rephrase it slightly by saying there are a great many places on the national forests which heretofore have been undeveloped, roadless hinterland where the only way to sell the timber, would be to make a fairly large sale to a company financially able to participate in building the roads and in logging that timber. It requires a large investment.

**Representative HOFFMAN.** That was one of the issues in these hearings that we have been holding, as to whether there should be, and as I understood it, there was a great deal of opposition to the selling, as Senator Neuberger described it often, to the big fellow to the exclusion of the little fellow. There was some sort of intimation that they were cutting the little fellow out of an opportunity to get the business.

**Mr. McARDLE.** We have tried to do both. Perhaps there is disagreement on the relative proportion of volume which should go to each class, and bear in mind that there are differing opinions as to what is a little fellow. A small one on the Pacific Coast would be a large one in the national forests of the East.

**Representative HOFFMAN.** Then referring to this procedure that was followed by the Secretary in this case and to the taking of the samples by the Bureau of Mines, I understood you to say—you correct me if I am wrong—that the procedure was not irregular, but not customary?

**Mr. McARDLE.** I testified yesterday that the taking of the additional samples under the direction of the Bureau of Mines had not been a customary procedure.

**Representative HOFFMAN.** However, you did not say it was irregular?

**Mr. McARDLE.** I think I said that the Secretary of the Interior had administrative authority to do that if he wanted to.

**Representative HOFFMAN.** Well, do you find any fault with that? Do you think it was improvident or inadvisable for the Secretary when this dispute came up to call upon the Bureau of Mines to take the samples; and if you did tell us why?

**Mr. McARDLE.** I think I would have to answer that by saying that since he has administrative authority to do that sort of thing, that I could hardly say that it's improper, because I don't believe that it is.

**Representative HOFFMAN.** Whether it was customary or not, are you critical of that, that he did it?

**Mr. McARDLE.** I was only asked the question whether it was customary or not.

**Representative HOFFMAN.** However, are you critical of the action of the Secretary in this case, that is, in his assumption of jurisdiction and the use of his discretion?

Mr. McARDLE. No; he had the authority. I am not critical of him.

Representative HOFFMAN. You are not finding any fault then as a member of the Forest Service?

Mr. McARDLE. No; I have not now and have not in the past.

Representative HOFFMAN. You never have at any time?

Mr. McARDLE. That is right.

Representative HOFFMAN. There was not anything unusual about the Secretary overruling the examiner; was there?

Mr. McARDLE. No. That's been done before too.

Representative HOFFMAN. You have had that happen to you, have you not, or you have done it, have you not?

Mr. McARDLE. Well, the answer is "Yes" to both questions.

Representative HOFFMAN. That is to say, sometimes you have overruled the other fellow and sometimes you have been overruled?

Mr. McARDLE. Yes.

Representative HOFFMAN. Which side were you on in the L. & H. timber sale? That is the 75 million feet, the big sale on a long term, on competitive bid?

Mr. McARDLE. And your question is?

Representative HOFFMAN. Which side were you on? Were you overruled or did you overrule somebody?

Mr. McARDLE. I overruled the regional forester. The appeal has been taken to the Secretary and the Secretary has not acted. We are talking about something entirely different now, Mr. Hoffman, than the Al Sarena case.

Representative HOFFMAN. Was that after you had a consultation with Senator Neuberger?

Mr. McARDLE. Which was after?

Representative HOFFMAN. Your decision overruling the regional man.

Mr. McARDLE. In point of time it was, but we did not have a conference, as I testified this morning.

Representative HOFFMAN. No; I understood this morning that the Senator did grant 3, 4, maybe as long as 5 minutes. Was your decision before or after that?

Mr. McARDLE. It was after that in point of time.

Representative HOFFMAN. Understand, Senator, I do not find anything to criticize, if it makes any difference. If it had been my district I would have been there on one side or the other. I know that.

It is not unusual to have Senators or Congressmen come to see you about matters of their constituents?

Mr. McARDLE. I made that point this morning and volunteered the information that many, many Members of Congress make their position as clear as Senator Neuberger made his position clear, that he was not taking sides, that he was introducing a constituent.

Representative HOFFMAN. Yes. My colleague suggests I ask were there two sides to this thing, then?

Mr. McARDLE. At that time I don't know that there were.

Representative HOFFMAN. Who was it who wanted a large sale made on a long term?

Mr. McARDLE. Let's go back and bring it up to date then.

Representative HOFFMAN. Answer that before you go back because I might forget where I was.

Mr. McARDLE. Yes; there were objections to the decisions of the regional forester not to proceed with advertising, making a sale. There were also folks who wanted him to do that.

Representative HOFFMAN. Mr. Netzorg was one of them, was he not? He is a former employee of the Department.

Mr. McARDLE. Of Interior?

Representative HOFFMAN. Yes.

Mr. McARDLE. That's right.

Representative HOFFMAN. He was an attorney out there. He was attorney for the L. & H. Lumber Co.?

Mr. McARDLE. That's correct.

Representative HOFFMAN. And they are the gentlemen who wanted this 75 million feet sold on a competitive-bid basis instead of being broken up?

Mr. McARDLE. That's correct.

Representative HOFFMAN. And the regional forester refused to do it?

Mr. McARDLE. Our regional forester had decided against that on the basis largely that he had insufficient money to prepare the sale, but following that Congress gave us an increase in our timber-sale money and we did have money to make the sale, and my decision to go ahead with preparing the sale and advertising it for a full public competition for bidding was based pretty largely, as I stated in my decision, on the basis of money being made available.

Representative HOFFMAN. Well, the question I asked you was whether Mr. Netzorg wanted it sold in long-term large sale.

Mr. McARDLE. That's correct.

Representative HOFFMAN. Surely. And the regional fellow had decided against it?

Mr. McARDLE. He decided he couldn't offer the timber for sale because he didn't have money to prepare it.

Representative HOFFMAN. Pardon me?

Mr. McARDLE. He didn't have money to make the sale. His money for making timber sales was fully used up.

Representative HOFFMAN. I did not ask you why. I just asked you if he did not decide against Mr. Netzorg.

Mr. McARDLE. He decided against making the sale to anybody.

Representative HOFFMAN. Well, Mr. Netzorg was the fellow who wanted it and the fellow who presented the issue?

Mr. McARDLE. He was one of those involved in——

Representative HOFFMAN. Who was against it, my associate wants to know?

Mr. McARDLE. The community of Bend, Oreg.

Representative HOFFMAN. Pardon me?

Mr. McARDLE. The community of Bend. The city of Bend, Oreg., was principally the group that were objecting to the sale of this timber at this time.

Representative HOFFMAN. Did they not want sales made to smaller folks? I mean smaller quantities of timber.

Mr. McARDLE. No. They were more anxious to reserve this timber for manufacture in Bend.

Representative HOFFMAN. That would help the town.

Mr. McARDLE. Yes.

Representative HOFFMAN. And you in overruling the regional forester ruled that it should be sold on a competitive bid on a long term?

Mr. McARDLE. Five years.

Representative HOFFMAN. You ruled in favor of the big fellow?

Mr. McARDLE. No.

Representative HOFFMAN. Did you not?

Mr. McARDLE. No; I didn't rule in favor of the L. & H. Co. or any company. I simply ruled that the timber would be offered on the open market and sold to the highest bidder.

Representative HOFFMAN. That is right; and L. & H. could bid and the other big companies could bid, but the little fellow could not bid, could he?

Mr. McARDLE. Not the very small ones, but at the same time we were making a large number of sales to small operators.

Representative HOFFMAN. However, when it was decided, and when you overruled the regional man, the effect of your decision was to cut out the smaller operator, was it not, because he would not have money enough to handle it?

Mr. McARDLE. Your question goes to why we favored a big sale?

Representative HOFFMAN. Pardon me?

Mr. McARDLE. Your question goes to why we favored a big sale in that instance?

Representative HOFFMAN. I am asking you if the effect of your ruling was to let the big fellow in to bid competitively, or the big fellows, and to cut out the smaller operators? That is obvious, is it not?

Mr. McARDLE. That's obvious.

Representative HOFFMAN. Surely. Therefore, in this particular case it was the big fellow who got the decision, was it not? I am not finding any fault with the decision. Do not misunderstand me.

Mr. McARDLE. You are correct. The sale, had it been made, would have been a sale for 75 million feet, which is a large sale, for a period of 5 years.

Representative HOFFMAN. And a member of the L. & H. Co., who wanted it sold this way, one of the owners, was the one who contributed the \$1,000 to the Senator's campaign which the Senator promptly returned; is that right?

Mr. McARDLE. I know nothing about that.

Representative HOFFMAN. You did not know about that?

Senator NEUBERGER. Mr. Chairman, I think a few of the facts should go in here, inasmuch as Mr. Hoffman has tried through his press releases, and today, to turn this into an attack upon me. I think a few other facts should be repeated.

Mr. Hoffman was present in Portland when he raised this issue before. Mr. Walter Lund—if I am not mistaken, Walter is his first name—assistant regional forester in charge of timber sales, was in the room. I asked that he return to the witness stand, and these questions were asked of Mr. Lund, and I will read them.

Representative HOFFMAN. What page?

Senator NEUBERGER. Page 2072 (reading):

Senator NEUBERGER. I have some questions. In connection with this proposed Crescent Lake sale which Mr. Hoffman introduced as an issue, Mr. Lund, does it not involve, if I am not mistaken, a species of subalpine timber which, in the past, has not generally been at stake in the normal commercial sales; is that correct?

Mr. LUND. That is right. It involves largely mountain hemlock and Shasta fir, with a minor amount of white pine. It is in an area that heretofore has had no active cutting.

Senator NEUBERGER. This type of timber in the past, or until very recently, or even until now, has not been used commercially to any substantial extent in our State?

Mr. LUND. That is right.

Senator NEUBERGER. Under the proposed terms of this sale, would this timber be sold at competitive bid?

Mr. LUND. Yes, it would.

Senator NEUBERGER. Has there been any request, to your knowledge, under the L and H proposal that there be a negotiated sale or any other extraordinary situation applying to the method at which it would be sold?

Mr. LUND. None at all.

Senator NEUBERGER. In other words, if this timber is sold in the Crescent Lake area, the L and H firm can acquire that timber only if their bid is the highest received by the Forest Service. Is that correct, or is that wrong?

Mr. LUND. That is correct.

Senator NEUBERGER. I repeat that so that it is in the record. The L and H Co. cannot obtain this timber species at Crescent Lake unless the price which they offer to the Forest Service is the highest one you receive at this public sale?

Mr. LUND. That is right.

Senator NEUBERGER. There has never been any suggestion that it be a negotiated sale, to your knowledge?

Mr. LUND. That is right. We have no authority to make it on that basis.

I will not go on and read further, but there are further replies by Mr. Lund in that tenor.

I think that it further should be pointed out—Mr. Hoffman knows about this, but I think it should be pointed out for the record—that a firm known as the L and H firm made a proposal that certain low value timber be harvested in the Crescent Lake area and used for wood chips. The State of Oregon is confronted with a very desperate employment situation and I have a very detailed letter from the United States Treasury Department pointing out that from 1952 to 1954 income-tax collections in Oregon dropped proportionately more than any other State except Wyoming, and I offer that for the record.

(The letter referred to follows:)

UNITED STATES TREASURY DEPARTMENT,  
COMMISSIONER OF INTERNAL REVENUE,  
Washington, D. C., June 23, 1955.

HON. RICHARD L. NEUBERGER,  
United States Senate,

Washington, D. C.

MY DEAR SENATOR: Your letter to Commissioner Andrews, dated June 6, 1955, and referring to the decline in internal revenue collections in the State of Oregon from 1952 to 1954, has been referred to me for reply.

As you know, internal revenue collections on a nationwide basis decreased by 1.7 percent from 1952 to 1954, while collections in Oregon decreased by 15.2 percent. The only State to show a decline proportionately larger than that of Oregon was Wyoming, where collections fell off 16.5 percent. Oregon's decline resulted from the combination of a slight increase in withheld individual income taxes, which comprised almost half of total 1954 collections, and substantial decreases in all other major classes of tax collections. Nonwithheld individual income taxes fell off 20 percent in Oregon as compared with 10 percent for the Nation; corporation income and profits taxes declined by almost one-third in Oregon and only about one-tenth in the country; other internal revenue, consisting of estate, gift, excise and miscellaneous taxes decreased by almost one-fourth in Oregon as compared with only 2 percent nationally.

An examination of number of returns filed in the calendar years 1952, 1953, and 1954, indicates a trend for Oregon fairly consistent with that for the country as a whole in regard to all classes of tax other than employment. Oregon and the Nation as a whole increased in individual income tax and all other income tax returns other than corporations. Decreases occurred in corporation

Representative HOFFMAN. And you in overruling the regional forester ruled that it should be sold on a competitive bid on a long term?

Mr. McARDLE. Five years.

Representative HOFFMAN. You ruled in favor of the big fellow?

Mr. McARDLE. No.

Representative HOFFMAN. Did you not?

Mr. McARDLE. No; I didn't rule in favor of the L. & H. Co. or any company. I simply ruled that the timber would be offered on the open market and sold to the highest bidder.

Representative HOFFMAN. That is right; and L. & H. could bid and the other big companies could bid, but the little fellow could not bid, could he?

Mr. McARDLE. Not the very small ones, but at the same time we were making a large number of sales to small operators.

Representative HOFFMAN. However, when it was decided, and when you overruled the regional man, the effect of your decision was to cut out the smaller operator, was it not, because he would not have money enough to handle it?

Mr. McARDLE. Your question goes to why we favored a big sale?

Representative HOFFMAN. Pardon me?

Mr. McARDLE. Your question goes to why we favored a big sale in that instance?

Representative HOFFMAN. I am asking you if the effect of your ruling was to let the big fellow in to bid competitively, or the big fellows, and to cut out the smaller operators? That is obvious, is it not?

Mr. McARDLE. That's obvious.

Representative HOFFMAN. Surely. Therefore, in this particular case it was the big fellow who got the decision, was it not? I am not finding any fault with the decision. Do not misunderstand me.

Mr. McARDLE. You are correct. The sale, had it been made, would have been a sale for 75 million feet, which is a large sale, for a period of 5 years.

Representative HOFFMAN. And a member of the L. & H. Co., who wanted it sold this way, one of the owners, was the one who contributed the \$1,000 to the Senator's campaign which the Senator promptly returned; is that right?

Mr. McARDLE. I know nothing about that.

Representative HOFFMAN. You did not know about that?

Senator NEUBERGER. Mr. Chairman, I think a few of the facts should go in here, inasmuch as Mr. Hoffman has tried through his press releases, and today, to turn this into an attack upon me. I think a few other facts should be repeated.

Mr. Hoffman was present in Portland when he raised this issue before. (The letter referred to follows:)

UNITED STATES TREASURY DEPARTMENT,  
COMMISSIONER OF INTERNAL REVENUE,  
Washington, D. C., June 23, 1955.

HON. RICHARD L. NEUBERGER,  
United States Senate,  
Washington, D. C.

MY DEAR SENATOR: Your letter to Commissioner Andrews, dated June 6, 1955, and referring to the decline in internal revenue collections in the State of Oregon from 1952 to 1954, has been referred to me for reply.

As you know, internal revenue collections on a nationwide basis decreased by 1.7 percent from 1952 to 1954, while collections in Oregon decreased by 15.2 percent. The only State to show a decline proportionately larger than that of Oregon was Wyoming, where collections fell off 16.5 percent. Oregon's decline resulted from the combination of a slight increase in withheld individual income taxes, which comprised almost half of total 1954 collections, and substantial decreases in all other major classes of tax collections. Withheld individual income taxes fell off 20 percent in Oregon as compared with 10 percent for the Nation; corporation income and profits taxes declined by almost one-third in Oregon and only about one-tenth in the country; other internal revenue, consisting of estate, gift, excise and miscellaneous taxes decreased by almost one-fourth in Oregon as compared with only 2 percent nationally.

An examination of number of returns filed in the calendar years 1952, 1953, and 1954, indicates a trend for Oregon fairly consistent with that for the country as a whole in regard to all classes of tax other than employment. Oregon and the Nation as a whole increased in individual income tax and all other income tax returns other than corporations. Decreases occurred in corporation

and excise tax returns. The decrease in excise tax returns is largely attributable to the change in filing requirements from a monthly to a quarterly basis. In the case of employment tax returns, Oregon departed significantly from the national trend. Nationwide employment tax returns increased slightly from 1952 to 1954; in Oregon, however, such returns fell off by more than 5 percent.

We have no knowledge of the specific factors, economic or other, which are responsible for the decline in Oregon collections from 1952 to 1954. We have, however, examined our collections data trend with references to other economic indexes: namely, population and income payments data. Census Bureau estimates of population by States as of July 1, 1952, and July 1, 1953, indicate an increase of 1.6 percent in the Nation's population, while Oregon was 1 of only 8 States which suffered a slight decline in population. The August 1954 issue of the Department of Commerce publication *Survey of Current Business* provides analyses of income payments nationally and by States for the 1952 and 1953 years. These indicate that total income payments in the United States and in the Far West region, which includes Oregon, rose by 6 percent from 1952 to 1953, with the largest percentage increase, 11 percent nationally and 10 percent regionally, occurring in manufacturing payrolls, which account for more than one-fourth of total income payments. Total income payments in Oregon, however, rose only by 1 percent, while manufacturing payrolls showed no increase. In fact, Oregon's trend failed to keep pace with the national trend and the Far West regional trend as respects Government income payments, trade and service income, manufacturing payrolls, and construction payrolls.

There is no direct relationship between income payments made to individuals and income tax collections for a specific calendar year, since collections in a given year are in part attributable to current year income and in part attributable to prior years' income. The quantitative impact of the changes in income payments from 1952 to 1953 on internal revenue collections cannot be measured, but the depressed trend of Oregon payments as compared with those for the Nation as a whole appears to support the sharp decline in Oregon's collections as compared with the more moderate national decline.

I realize that this information does not provide the detailed reasons for the decline in Oregon but I hope it will be of value to you in appraising the situation.

Very truly yours,

E. H. VAUGHN,  
*Acting Assistant Commissioner.*

Senator NEUBERGER. I was aware of the fact that the Oregon Water Resources Committee, a State agency of our Republican State government had been prepared to report to the legislature in January 1955, the detailed material along this line from pages 74 to 76 recommending that the lumber industry in Oregon could take up the slack in employment due to a decline of saw timber mainly if they brought about an increase in the use of low value subalpine timber. The L and H Co. has three principal stockholders. Two of them were active supporters of mine in the 1954 campaign. The other stockholder was an active supporter of my opponent and in fact made a very bitter attack upon me at a meeting of lumbermen in October of 1954, at Roseburg.

After this criticism had been made of the proposed sale by Mr. Hoffman and by one ex-Republican member of the Oregon Legislature, it became a matter of controversy in the State of Oregon.

I was invited by the Oregon Journal, a newspaper which did not support me in the campaign, but which supported my opponent, to submit a guest editorial setting forth the reasons why I favored the L and H sale at Crescent Lake. I thought it would be in the public interest. That appeared December 31, 1955, and I submit that for the record.

(The editorial referred to follows:)

[From the Oregon Daily Journal]

**'SCRUB' TIMBER USE CAN BOLSTER OREGON PAYROLLS**

(By Richard L. Neuberger, United States Senator from Oregon)

Treasury Department reports show that, in recent years, Oregon has experienced one of the biggest drops in Federal tax collections of all the States. Between 1952 and 1954, while manufacturing payrolls rose nearly 10 percent in the Far West regionally, those in Oregon did not rise at all. Furthermore, during almost 3 weeks of congressional hearings on timber policies this fall, I listened to spokesmen for many Oregon communities warning of economic calamity unless new sources of supply can be tapped for lumber mills.

That is why I favor the sales proposed by the Roseburg L and H mill of subalpine timber species in the Crescent Lake area and by the Johns-Manville Co. of "scrub" lodgepole pine in the Klamath Falls region. These species are so-called low-value trees not before considered merchantable in our State. The sales would be competitive and open to all comers. They would be held under standard forest service rules. I cannot quite go along with a Journal editorial of December 23 that the Crescent Lake sale would have an adverse impact on any community.

It is true that certain political leaders from Bend have been loudly complaining. Yet I must agree with James P. Rogers, attorney for a number of prominent lumber companies, who told a Department of Agriculture hearing that Bend mills "might well band together to buy in this sale and themselves establish the mill required to develop these timber types."

As I wrote to the Chief of the Forest Service on July 18, it makes no difference to me which Oregon town or mill is the successful bidder. That is in the lap of destiny. But, as a Senator, I expect to use my limited influence to prevent any clique or faction from acting as dog-in-the-manger to thwart use of a new timber supply which might add payrolls to the State that suffered a 15.2 percent drop in Federal tax collections from 1952 to 1954, as compared with a national decline of a mere 1.7 percent.

In January the Oregon Water Resources Committee reported to the legislature that the pulp industry in the State "can be increased many fold through a more intensive use of our forests by utilizing species and trees too small for saw-log production. We are close to the time when it will be profitable to use this material. It is conservative to suggest that the pulp and paper industry could be increased five times without competing with saw-log production."

Such facts tend to refute completely the bitter and politically motivated objections to the proposed sales of low-value scrub timber.

In his decision supporting the Crescent Lake sale, Dr. Richard E. McArdle, present Chief of the Forest Service, made this crucial point: "The regional forester and the Washington office staff agree that economic utilization of the extensive timber resource of the so-called 'subalpine' type in Oregon and Washington is highly desirable as a means of increasing the allowable annual cut from the national forests of the Pacific Northwest."

Best of all, this can be done, in the opinion of a man as dedicated to conservation as Dr. McArdle, without imperiling watershed or recreational values. The State fish and game authorities also assented to the Crescent Lake project.

I believe that public, competitive sales of subalpine fir and lodgepole pine can help to bolster Oregon's economy at a time of crisis. Selfish objections, premised on partisan politics and alarm over healthy competition, should not be permitted to block the way.

**Senator NEUBERGER.** Following its appearance I received a letter from Mr. James P. Rogers, a leading lumber attorney who was a very active supporter of my opponent in the 1954 campaign, and a very prominent member of the Republican Party.

I am going to submit this letter for the record. It is very short, and I will read it:

**DEAR SENATOR NEUBERGER:** Although you may not see this, I simply wanted to say that I had read with much interest your guest editorial in the Saturday, December 31, Oregon Journal and thought it stated a sound position excellently.

I can't think what there is in McArdle's record, or the record of the Forest Service generally, which would justify anyone's suggestion that this proposal was not passed on in the light of good forestry, or yours to suggest that you would support unsound conservation principles.

In short, it appears to me that this is one argument with you and the Forest Service which the boys should never have started and that your guest editorial well stated the case which is really here involved.

With kindest personal regards, I remain

Very truly yours,

JIM ROGERS.

The implication was made in the press release put out by Mr. Hoffman that this sale was just for one company. On December 23, 1955, I received a letter from the regional forester in the Pacific Northwest, Mr. J. Herbert Stone. I wrote and asked him—I am sorry I do not have a copy of my request here—very briefly when I was out in Oregon if other companies than the L and H. Co. were interested or had been informed of this sale.

I am going to read his letter for the record:

DEAR SENATOR NEUBERGER: Your letter of December 23 is received and I thank you for the clipping which was enclosed.

Insofar as we have been able to ascertain, a number of other operators are interested in the proposed Windigo Pass sale—

I want to state that that is the same as the Crescent Lake sale—

but we have no sure means of determining just how many or what steps some of them may have taken to obtain specific data on the timber. We do know that at least one other party has been definitely interested since the sale was first proposed. A Mr. Jim Healy of Bend, Oreg., and associates expressed a specific interest in the sale from the beginning. Their proposal, in event they were the successful bidders, is to install a log chipping plant in the vicinity of Uml, some 10 miles south of Crescent Lake. \* \* \*

I will not read all of this, but it goes into detail as to how the operation would be technically.

Then I will go on and read further. I will submit the whole letter for the record.

Representative HOFFMAN. I just wonder how you broke into my witness and my time.

Senator NEUBERGER. Because you are making an attack upon me and you made it in the press release when you made a false statement that this was a sale to one company, and I feel as a member of this committee I am entitled to put the full facts on the record.

Representative HOFFMAN. I am not kicking at all. When you say it is a false statement, that is a matter of opinion.

Senator NEUBERGER. Would you rather go ahead?

Representative HOFFMAN. Go ahead. I would rather see you put in your defense.

Senator NEUBERGER. No defense is necessary.

Representative HOFFMAN. It seems to be an explanation. You dragged it in this morning.

I want to make one correction. I guess—my associate called my attention to it—I was in error. It was Senator Morse who returned the thousand-dollar-campaign contribution to one of these outfits, not you. I do not know whether you returned it or you did not. I am ignorant on that subject.

Senator NEUBERGER. I will also put in some facts of my campaign contributions.

Representative HOFFMAN. I will also put in the record these other newspaper articles.

Representative CHUDOFF. I am glad about one thing, Mr. Hoffman, that you went along with our committee, because now you are a champion of the little fellow and I hope when we have new good legislation you will be fighting for the little fellow.

Representative HOFFMAN. You were the champion of the little fellow and that was the issue out there. I just defend anybody, big or little.

Representative CHUDOFF. You are becoming a champion of the little man, too.

Representative HOFFMAN. Let's you and I apologize to the Senator and let him go ahead.

Senator NEUBERGER. I will resume reading the regional forester letter. I will skip some material about the technicalities of the operation.

\* \* \* It is also our understanding that Brooks Scanlon, Inc., of Bend, Oreg., and Gilchrist Timber Co., of Crescent, Oreg., have expressed a definite interest and that their foresters have examined the sale area but we do not know how detailed such examination may have been. In addition, Mr. E. T. Cobb, Albany, Oreg., who is connected with a mill at Chiloquin, Oreg., has made inquiry regarding the sale and expressed a definite interest in it but so far as we know has not yet examined the sale area.

Small sample sales of approximately 100,000 board-feet have been made to L. & H. Lumber Co., and to Diamond Lake Lumber Co., although the latter joined in the protest against making the major sale. Last September the Umpqua Forest issued a preliminary prospectus on the sale, copies of which were sent to 14 operators in the general area, including all of those named above. A number of the other operators receiving this notice have expressed some interest but so far as we know have not yet made any examination of the sale area.

Judging from present indications, it would be our guess that, should it be decided to offer the sale, more than one bid will be received.

That is signed J. Herbert Stone, regional forester.  
(The letter referred to follows:)

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
PACIFIC NORTHWEST REGION,  
*Portland, Oreg., December 28, 1955.*

Sales: Umpqua, Windigo Pass.

Hon. RICHARD L. NEUBERGER,

*United States Senator, Portland 5, Oreg.*

DEAR SENATOR NEUBERGER: Your letter of December 23 is received and I thank you for the clipping which was enclosed.

Insofar as we have been able to ascertain, a number of other operators are interested in the proposed Windigo Pass sale but we have no sure means of determining just how many or what steps some of them may have taken to obtain specific data on the timber. We do know that at least one other party has been definitely interested since the sale was first proposed. A Mr. Jim Healy of Bend, Oreg., and associates expressed a specific interest in the sale from the beginning. Their proposal, in event they were the successful bidders, is to install a log chipping plant in the vicinity of Umli, some 10 miles south of Crescent Lake. Most of the timber especially suited to production of high quality chips such as the mountain hemlock and true firs would be converted into chips at this plant and the sawlogs of other species sold to existing mills. They have been advised that such a proposal would result in a degree of utilization acceptable to the Forest Service and it is our understanding that their foresters have made a rather detailed examination of the proposed sale area.

It is also our understanding that Brooks Scanlon, Inc., of Bend, Oreg., and Gilchrist Timber Co., of Crescent, Oreg., have expressed a definite interest and that their foresters have examined the sale area but we do not know how detailed

such examination may have been. In addition, Mr. E. T. Cobb, Albany, Oreg., who is connected with a mill at Chiloquin, Oreg., has made inquiry regarding the sale and expressed a definite interest in it but so far as we know has not yet examined the sale area.

Small sample sales of approximately 100,000 board feet have been made to L. & H. Lumber Co. and to Diamond Lake Lumber Co. although the latter joined in the protest against making the major sale.

Last September the Umpqua Forest issued a preliminary prospectus on the sale, copies of which were sent to 14 operators in the general area, including all of those named above. A number of the other operators receiving this notice have expressed some interest but so far as we know have not yet made any examination of the sale area.

Judging from present indications, it would be our guess that, should it be decided to offer the sale, more than one bid will be received.

Sincerely,

J. HERBERT STONE, *Regional Forester.*

Senator NEUBERGER. I think it is significant to point this out: If Mr. Hoffman wishes to make it the stand of his party that they are opposed to these sales of subalpine timber in our State I think it is significant to point out that there is widespread public opinion in our State in favor of such competitive sales if they can be accomplished consistent with the conservation practices of the United States Forest Service.

I think it also should be on the record—I think Dr. McArdle will bear me out on this if I am not mistaken—that the Johns-Manville Co. has made a request for a sale of similar low-value timber, but in far greater quantity than that suggested in the proposed Crescent Lake sale.

Is that correct or is that wrong?

Mr. McARDLE. That is correct.

Senator NEUBERGER. And that whether or not this low-value timber will be brought into production in Oregon also involves other proposed sales in addition to the one at Crescent Lake; is that correct?

Representative HOFFMAN. Now you are taking over the witness. I thought you were just making a statement on your own behalf.

Senator NEUBERGER. I am asking him if I am correct in saying that there have been other proposed sales of this low-value timber.

Representative HOFFMAN. I do not think there is any question about it.

Senator NEUBERGER. I am just putting it on the record.

Representative HOFFMAN. May I correct you this way, if I may, Senator? You said something about my speaking for the party. Bless your heart, I never did speak for the party. I am just down at the tail end of the outfit. I am only speaking for myself and I have enough trouble doing that and making it understood.

What I was talking about and what I was trying to show was, as Mr. Chudoff said over there, that you gentlemen were all for the little fellow in these hearings we held out there. You were the champions of the little boy. For example, the miner and his dog. You remember he brought in a picture of the miner's dog and said what treatment he got and then compared that with the treatment that the mining company got, this Al Sarena Co., and you laid the foundation for this thing up in Portland.

All I was trying to show was that in this particular case—and he was trying to show, too, all of the counsel anyway, although I will not say anything about Senator Scott as I do not know what he was

trying to do—counsel was trying to show that it is a very unusual procedure for the Secretary to do what he did, and I say that to the witness. That has run all through these cases.

Mr. McARDLE, I have no opinion and do not know a thing about the wisdom or lack of wisdom in the decision that you made. What I was trying to show was that in this particular case these champions of the little fellow switched and they got behind Mr. Netzorg and Mr. Buchanan out there, who made this great to-do about the miner. I am just trying to show their inconsistency, that is all, and also, incidentally, if you got campaign funds, Senator, from the big fellow, maybe I am just envious.

Senator NEUBERGER. Doctor, may I ask you about the standards of the lumber industry in Oregon? Would you regard the L. & H. Co. a big company or a small company?

Mr. McARDLE. Not a large company; no, sir.

Senator NEUBERGER. Just to make this record clear, I would like to ask you again, was it ever suggested that this be anything but a competitive sale open to any bidder?

Mr. McARDLE. Not to my knowledge.

Senator NEUBERGER. Was there anything extraordinary, unusual, or irregular or abnormal in any way about the proposal for this sale of timber at Crescent Lake?

Mr. McARDLE. The answer to the question is "No," but I want to make one further statement on it: That in this particular instance we would not want to sell it in such a way that full utilization of this rather badly decadent timber could not be obtained. We would like to see full utilization, and that can best be obtained with some such proposal as this particular company was making of converting it to chips. If it was simply sawed into logs, it would be a great deal of waste. The country would be left rather desolate and the decadent timber all jackstrawed up, a bad fire hazard. We were after some kind of operation that would result in as complete as possible utilization, and ordinarily we do not attempt to specify what the timber should be manufactured into, and we probably would not here, but we wanted to sell the timber in such a way that complete utilization would have to be made. We did take that extra precaution in this instance.

Senator NEUBERGER. However, it would be a sale under competitive conditions and any bona fide lumber operator could bid on it?

Mr. McARDLE. Completely; no different whatever from the other 27,000 sales we make every year.

Senator NEUBERGER. It would be no different from the other 27,000 sales?

Mr. McARDLE. Not at all.

Senator NEUBERGER. Thank you very much.

Representative HOFFMAN. Now I go back. However, in this particular case, did I understand you to say that there were some objectives that you had in mind, that is, that this particular company could better utilize the timber because of certain manufacturing facilities?

Mr. McARDLE. No, Mr. Hoffman. This is high-altitude timber. It is badly decadent. It is rotting. It is a forest, so to speak, that is running downhill. It is not gaining any growth.

Representative HOFFMAN. Something like the Smith River?

Mr. McARDLE. No. It is far more decadent than anything you may have seen on Smith River. If this timber is merely sawed into boards and the operator leaves the material which won't make a good board, then he leaves most of the tree in the woods. We were trying to avoid that and to see if we couldn't get an operation which would use more of the timber—

Representative HOFFMAN. Practically everything, if I may interrupt you? That is what you were trying to do?

Mr. McARDLE. That's right; good utilization.

Representative HOFFMAN. The most complete utilization out of it; is that not right?

Mr. McARDLE. This was one of the first times we had been approached by anyone who wanted to do more than turn it into boards.

Representative HOFFMAN. Do not misunderstand me. I am not objecting to that. I did not know anything about timber when I went out there, but I did learn that there were sections of timber where only a large company could utilize it; that is, they would get more out of it through byproducts and all that. As you said a moment ago, it has been customary over some time, anyway, a long period of time, to just try to sell lumber. That is it, is it not, and what you have been trying to do is to get the utmost out of the timber so in some cases you should to the big fellows—it was best to put it up to competitive bidding—and in some cases the little fellow could use it; is that not it?

Mr. McARDLE. That's correct, but the more determining factor usually is the financial ability of an operator to construct the necessary roads, which may cost as much as \$50,000 or more.

Mr. HOFFMAN. Now we have it; and many times the little fellow could not build the roads to get it out if you gave it to him.

Mr. McARDLE. I must go on so that the record will be clear on this. The cost of building a road is not stood by the purchaser of the timber. The cost of building the road is paid for by the Government, whether it pays for it in cash or pays for it in timber. The price of the timber is reduced by the cost of the development of roads made by the purchaser.

Representative HOFFMAN. Yes, but they take the cost of the road, as I understand it, out of the timber; do they not?

Mr. McARDLE. That is correct. The Government takes it out.

Representative HOFFMAN. And when you told me yesterday that on an adjoining section up here there was spent \$400,000 in building roads to get into it and get it out, what you meant was that cost would come out of the timber?

Mr. McARDLE. That meant that the Government would sell it for less money than it would otherwise.

Representative HOFFMAN. How much was this 75 million feet worth?

Mr. McARDLE. I don't know.

Representative HOFFMAN. Just an estimate.

Mr. McARDLE. We made no appraisal.

Representative HOFFMAN. What was the bid?

Mr. McARDLE. There hasn't been any bid.

Representative HOFFMAN. Pardon me.

Mr. McARDLE. It hasn't been advertised.

Representative HOFFMAN. You have not gotten around to that yet?

Mr. McARDLE. We have made no appraisal yet, haven't offered it

for sale, haven't advertised it for sale, and that's the status it is in now.

Representative HOFFMAN. All you decided was to sell it in a big piece and on a long term?

Mr. McARDLE. What we got was an expressed interest in buying the timber if we offered it for sale. We got it from this company and from some half dozen other companies.

Representative HOFFMAN. And you have no idea as to the value?

Mr. McARDLE. We haven't made that survey yet.

Representative HOFFMAN. I say you have no idea at all now.

Mr. McARDLE. No; I have none now.

Representative HOFFMAN. Were you ever on the Al Sarena claims yourself?

Mr. McARDLE. I have never been there. The closest I have been to Al Sarena has been the community of Trail, which is about 20 miles south of there, and the community of Prospect—

Representative HOFFMAN. The nearest you have ever been to the timber on the Al Sarena land was 20 miles?

Mr. McARDLE. That's correct.

Representative HOFFMAN. So your testimony here is based upon the testimony which was taken at Portland?

Mr. McARDLE. Yes.

Representative HOFFMAN. And then the other testimony that you have given, about whether there was mineralization or not—did you express an opinion about that, whether there was or was not?

Mr. McARDLE. I have tried not to express an opinion on that, but to always say it was the opinion expressed by these two competent mineral examiners.

Representative HOFFMAN. You mean Hattan and Sanborn?

Mr. McARDLE. Yes. If I have expressed any personal opinion as to the mineralization, that was an error; and I don't think I have.

Senator SCOTT. Mr. Hoffman, will you yield just a minute?

Representative HOFFMAN. I have just one more question right now. The opposition to this big sale was by the citizens of Bend?

Mr. McARDLE. That's correct.

Senator NEUBERGER. Mr. Chairman, just as a matter of personal privilege, because Mr. Hoffman has attempted to divert the issue by raising the question of campaign contributions to my senatorial campaign in 1954, I should just like to put one very brief sentence on the record.

My office does not have the complete files which were sent to the secretary of state of Oregon under the law on campaign expenditures, but one of the people on my staff did check the New York Times and found that the New York Times for April 8, 1955, in a column by Mr. Arthur Krock, of the New York Times, included the following sentence, and I would just like this sentence to be a part of the record. This is the sentence in Mr. Krock's story:

Senator Guy Cordon, defeated by Richard L. Neuberger, was the beneficiary of \$141,284.01 paid out by 30 committees and 4 individuals, and for Neuberger the spending of \$87,652.64 was reported.

Senator SCOTT. The committee will meet at 2 o'clock and will try to not hold you too long, if you can be here promptly so we can get started.

Representative HOFFMAN. In this same room?

Mr. McARDLE. No. It is far more decadent than anything you may have seen on Smith River. If this timber is merely sawed into boards and the operator leaves the material which won't make a good board, then he leaves most of the tree in the woods. We were trying to avoid that and to see if we couldn't get an operation which would use more of the timber——

Representative HOFFMAN. Practically everything, if I may interrupt you? That is what you were trying to do?

Mr. McARDLE. That's right; good utilization.

Representative HOFFMAN. The most complete utilization out of it; is that not right?

Mr. McARDLE. This was one of the first times we had been approached by anyone who wanted to do more than turn it into boards.

Representative HOFFMAN. Do not misunderstand me. I am not objecting to that. I did not know anything about timber when I went out there, but I did learn that there were sections of timber where only a large company could utilize it; that is, they would get more out of it through byproducts and all that. As you said a moment ago, it has been customary over some time, anyway, a long period of time, to just try to sell lumber. That is it, is it not, and what you have been trying to do is to get the utmost out of the timber so in some cases you should to the big fellows—it was best to put it up to competitive bidding—and in some cases the little fellow could use it; is that not it?

Mr. McARDLE. That's correct, but the more determining factor usually is the financial ability of an operator to construct the necessary roads, which may cost as much as \$50,000 or more.

Mr. HOFFMAN. Now we have it; and many times the little fellow could not build the roads to get it out if you gave it to him.

Mr. McARDLE. I must go on so that the record will be clear on this. The cost of building a road is not stood by the purchaser of the timber. The cost of building the road is paid for by the Government, whether it pays for it in cash or pays for it in timber. The price of the timber is reduced by the cost of the development of roads made by the purchaser.

Representative HOFFMAN. Yes, but they take the cost of the road, as I understand it, out of the timber; do they not?

Mr. McARDLE. That is correct. The Government takes it out.

Representative HOFFMAN. And when you told me yesterday that on an adjoining section up here there was spent \$400,000 in building roads to get into it and get it out, what you meant was that cost would come out of the timber?

Mr. McARDLE. That meant that the Government would sell it for less money than it would otherwise.

Representative HOFFMAN. How much was this 75 million feet worth?

Mr. McARDLE. I don't know.

Representative HOFFMAN. Just an estimate.

Mr. McARDLE. We made no appraisal.

Representative HOFFMAN. What was the bid?

Mr. McARDLE. There hasn't been any bid.

Representative HOFFMAN. Pardon me.

Mr. McARDLE. It hasn't been advertised.

Representative HOFFMAN. You have not gotten around to that yet?

Mr. McARDLE. We have made no appraisal yet, haven't offered it

for sale, haven't advertised it for sale, and that's the status it is in now.

Representative HOFFMAN. All you decided was to sell it in a big piece and on a long term?

Mr. McARDLE. What we got was an expressed interest in buying the timber if we offered it for sale. We got it from this company and from some half dozen other companies.

Representative HOFFMAN. And you have no idea as to the value?

Mr. McARDLE. We haven't made that survey yet.

Representative HOFFMAN. I say you have no idea at all now.

Mr. McARDLE. No; I have none now.

Representative HOFFMAN. Were you ever on the Al Sarena claims yourself?

Mr. McARDLE. I have never been there. The closest I have been to Al Sarena has been the community of Trail, which is about 20 miles south of there, and the community of Prospect—

Representative HOFFMAN. The nearest you have ever been to the timber on the Al Sarena land was 20 miles?

Mr. McARDLE. That's correct.

Representative HOFFMAN. So your testimony here is based upon the testimony which was taken at Portland?

Mr. McARDLE. Yes.

Representative HOFFMAN. And then the other testimony that you have given, about whether there was mineralization or not—did you express an opinion about that, whether there was or was not?

Mr. McARDLE. I have tried not to express an opinion on that, but to always say it was the opinion expressed by these two competent mineral examiners.

Representative HOFFMAN. You mean Hattan and Sanborn?

Mr. McARDLE. Yes. If I have expressed any personal opinion as to the mineralization, that was an error; and I don't think I have.

Senator SCOTT. Mr. Hoffman, will you yield just a minute?

Representative HOFFMAN. I have just one more question right now. The opposition to this big sale was by the citizens of Bend?

Mr. McARDLE. That's correct.

Senator NEUBERGER. Mr. Chairman, just as a matter of personal privilege, because Mr. Hoffman has attempted to divert the issue by raising the question of campaign contributions to my senatorial campaign in 1954, I should just like to put one very brief sentence on the record.

My office does not have the complete files which were sent to the secretary of state of Oregon under the law on campaign expenditures, but one of the people on my staff did check the New York Times and found that the New York Times for April 8, 1955, in a column by Mr. Arthur Krock, of the New York Times, included the following sentence, and I would just like this sentence to be a part of the record. This is the sentence in Mr. Krock's story:

Senator Guy Cordon, defeated by Richard L. Neuberger, was the beneficiary of \$141,284.01 paid out by 30 committees and 4 individuals, and for Neuberger the spending of \$87,652.64 was reported.

Senator SCOTT. The committee will meet at 2 o'clock and will try to not hold you too long, if you can be here promptly so we can get started.

Representative HOFFMAN. In this same room?

Senator SCOTT. This same room at 2 o'clock.

(Whereupon, at 12:20 p. m., a recess was taken until 2 p. m. this same day.)

#### AFTERNOON SESSION

Senator SCOTT. The committee will please come to order.

Mr. COBURN. Mr. Chairman, may I offer a document for the record?

Senator SCOTT. Yes.

Mr. COBURN. Mr. Chairman, this is a letter dated May 17, 1955, from the Department of Agriculture to Senator James E. Murray as chairman of the Committee on Interior and Insular Affairs, and it is in the nature of a report on S. 1713, which is the so-called multiple-use bill that Congress passed last year. The report contains some very valuable information regarding the number of mining claims and included acreage by States in the national forests as of January 1, 1955, and a table which shows the estimated number of unpatented mining claims on the national forests as of January 1, 1952, and the number of patented mining claims on the national forests as of that same date.

I think it would be a valuable part of the record. It is all factual and not at all controversial, Mr. Chairman.

Senator SCOTT. Without objection, it will be in the record.

(The report referred to follows:)

DEPARTMENT OF AGRICULTURE,  
Washington, D. C., May 17, 1955.

HON. JAMES E. MURRAY,

*Chairman, Committee on Interior, and Insular Affairs,  
United States Senate.*

DEAR SENATOR MURRAY: Reference is made to your request of April 20 for a report on S. 1713, a bill to amend the act of July 31, 1947 (61 Stat. 681), and the mining laws to provide for multiple use of the surface of the same tracts of the public lands, and for other purposes.

We strongly recommend early enactment of S. 1713 with one clarifying amendment as subsequently described.

S. 1713 is identical to House bills 5561, 5563, 5572, 5595, 5742, and almost identical to H. R. 5577.

This bill would apply to all lands of the United States subject to the general mining laws. Its major provisions are:

(1) Common varieties of sand, stone, gravel, pumice, pumicite, and cinders would be removed from the purview of the United States mining laws and made subject to disposal only under the provisions of the Materials Act of July 31, 1947 (61 Stat. 681), by the Secretary of Agriculture for lands under his jurisdiction and by the Secretary of the Interior for other public lands of the United States.

(2) Mining claims located after enactment of the bill could not, prior to patent, be used for other than mining purposes without authorization from the United States, and such locations would be subject to the right of the United States to manage and dispose of the vegetative surface resources, to manage other surface resources thereof (except minerals subject to the mining laws), and to use so much of the surface as necessary for such purposes or for access to adjacent land; provided that any use of the surface by the United States, its permittees or licensees, could not endanger or materially interfere with mining uses. Mining claimants could not use surface resources subject to management and disposal by the United States except to the extent required for mining purposes, and any timber cut for such purposes, except for clearance, must be in accordance with sound principles of forest management.

(3) Under a procedure similar to that provided in Public Law 585 of the 83d Congress, the Secretary of the Interior shall, at the request of the Federal department having the responsibility for administering the surface of lands of the United States, initiate action for a determination of surface rights as to a given area. Under this procedure, a holder of a claim located prior to enactment of this bill could assert and establish his rights in the lands covered by his claim, and such claim would be unaffected by the proceedings. If such a claimant fails

to establish his rights, or fails to assert his rights, or if he voluntarily waives his rights to the surface, he will be in the same position as a holder of a claim located after enactment of this bill. The procedure does not affect the right of a claimant to apply for patent, and if patent is granted he would acquire the same title as he would under the existing law.

We believe S. 1713, if enacted, would go far toward correcting some of the very difficult problems confronting this Department in its administration of those national forests and title III Bankhead-Jones lands subject to the general mining laws of the United States. We also believe that for the first time an area of agreement has been reached on this problem between the administrators of public lands under the jurisdiction of both the Departments of Interior and Agriculture, representatives of the mining industry, and conservation groups.

The Department of Agriculture desires to encourage legitimate prospecting and effective utilization and development of mineral resources of the national forests and title III lands. We would not favor legislation which would interfere with such development of minerals nor work hardship on the bona fide prospector or miner. We also recognize that the mining industry does not condone the use of mining claims on the public lands for other than mining purposes.

However, on the national forests the mining laws are sometimes used to obtain claim or title to valuable timber, summer home sites, or lands blocking access to Government timber and to water needed in the grazing use of the national forests.

As of January 1, 1952, there were 36,600 mining patents on the national forests, covering 918,500 acres. Only about 15 percent of these mining patents have been or are commercially successful mines. As of the same date, there were approximately 84,000 claims, covering 2.2 million acres. Only 2 percent of these claims were producing minerals in commercial quantities and probably not more than 40 percent could be considered valid under the requirements of the mining laws. Yet, on these national-forest claims, there was tied up over 8 billion feet of commercial sawtimber, valued at about \$100 million which the Government could not sell without consent of the claimant. In other words, national-forest timber exceeding in quantity and value that cut from all national forests in any one year is tied up on mining claims and cannot be sold by the Government. The two tables attached to this report supply these basic statistics by States.

The effect of this situation is increased costs of administration, obstruction of orderly management and competitive sale of timber, and obtaining high-value, publicly owned surface resources by a few individuals at nominal cost.

In the last 3 years there has been a tremendous increase in the number of mining claims on the national forests, principally as the result of prospecting for uranium and other fissionable materials. For example, as of January 1, 1955, it is estimated that there were 166,000 claims on the national forests, covering nearly 4 million acres or about a 100-percent increase in the past 3 years. At the rate claims are currently being filed, we estimate that by the end of this calendar year there will be about 225,000 mining claims on the national forests. It is also estimated conservatively that there are now over 10 billion board feet of timber tied up on national-forest mining claims, having a current stumpage value of \$112 million.

Following is an estimate of the number of claims and included acreage by States in the national forests as of January 1, 1955:

State	Thousand claims	1955 claims as multiple of 1952 claims	Thousand acres	1955 acreage as multiple of 1952 acreage
Arizona.....	34.3	6.9	684	6.2
California.....	21.0	1.1	602	1.0
Colorado.....	16.7	1.8	375	1.5
Idaho.....	18.4	1.2	408	1.2
Montana.....	14.6	2.1	282	2.1
Nevada.....	5.2	1.8	108	2.3
New Mexico.....	8.7	3.7	223	2.8
Oregon.....	6.7	.9	215	.8
South Dakota.....	4.8	1.9	103	2.0
Utah.....	28.4	3.6	583	3.2
Washington.....	5.3	1.8	94	1.3
Wyoming.....	2.1	2.5	78	2.4
Total.....	166.2	2.0	3,755	1.7

The number of claims is "snowballing" so fast that the situation on the national forests is rapidly getting out of hand. The above summary, for example, shows that there are nearly 7 times as many mining claims in Arizona as 3 years ago, and nearly 4 times as many in New Mexico and Utah. The increase has been large in other States, too. Equitable corrective action, as would be provided by S. 1713, is urgently needed. It is needed quickly because new claims are being filed at the rate of about 5,000 per month.

We suggest the following be added after the word "except" in line 22, page 3:

"that revenues from the lands described in the act of August 28, 1937 (50 Stat. 874) and the act of June 24, 1954 (68 Stat. 270) shall be disposed of in accordance with the provisions of such acts, and except"

The purpose of this amendment is to make it clear that revenues from O. & C. lands under the administration of the Department of the Interior and lands administered by the Department of Agriculture under the 1954 act will be placed in the O. & C. fund.

To effectively implement the provisions of S. 1713, particularly those of section 5, it is estimated that about \$750,000 to \$1 million would be needed annually by this Department for roughly a 10-year period, after which costs would drop to a relatively small amount. After claims located prior to enactment of the bill had been processed in accord with section 5, costs relating to this bill would be limited primarily to costs of issuing permits for disposal of materials under the Materials Act. Such costs would be offset in whole or in part by revenues from such permits.

In summary, this Department recommends enactment of S. 1713 since it will do much to solve the serious problems presented by mining claims in the management of public lands and resources. It will correct deficiencies in the mining laws and prevent many of the abuses by other than bona fide miners, but it will not obstruct or interfere with bona fide mineral prospecting, mining, and development. The Department is anxious to see these measures taken and strongly endorses the bill. However, S. 1713 does not include all of the changes in the mining laws which would be desirable from a good public land management standpoint and some problems would remain with respect to mining on the national forests and title III lands that this bill would not correct.

The Bureau of the Budget advises that, from the standpoint of the program of the President, there is no objection to the submission of this report.

Sincerely yours,

EZRA T. BENSON.

*Estimated number of unpatented mining claims on the national forests (as of Jan. 1, 1952)*

State	Number of claims	Acres	Estimated percent which are producing minerals in commercial quantities	Estimated percent considered valid under the mining laws	Timber on claims	
					Volume (thousand feet, board measure)	1951 value
Arizona	5,000	95,400	9.0	22	70,000	\$700.00
California	19,640	582,700	.8	30	3,460,000	50,177.00
Colorado	9,450	256,000	1.0	37	80,000	368.00

Senator SCOTT. Mr. Holderer, will you please come forward.

Congressman HOFFMAN, will you please swear the witness?

Representative HOFFMAN. Yes, but are you through with Mr. McArdle?

Senator SCOTT. We dismissed him a while ago.

Representative HOFFMAN. What? Why, I am sorry, Mr. Chairman, but I had not finished with Mr. McArdle.

Senator SCOTT. We can get him back if you want him.

Representative HOFFMAN. Do you solemnly swear that the testimony which you shall give here in the hearing before the subcommittee will be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. HOLDERER. I do.

Representative HOFFMAN. Why do you have me swear him?

Senator SCOTT. We will try to adjourn at 3 o'clock today, and not later than 4 o'clock, for the information of those present. Then we will come back in session at 2 o'clock next Tuesday. I am not sure of the place of meeting at this time. Those interested will be kept posted on that by the committee.

Mr. REDWINE. Senator, I have just been informed that we can have the caucus room, room 318, on Tuesday. That is definite.

Senator SCOTT. We will have the meeting in room 318 of this building next Tuesday at 2 o'clock.

Representative JONAS. Mr. Chairman, before we proceed, I came in late. Were you talking about Mr. McArdle? I had a couple of questions to ask him.

Senator SCOTT. We dismissed him at lunch time, thinking he was through. We are trying to get these meetings adjourned.

Representative JONAS. I did not know that he was not returning at 2 o'clock.

Senator SCOTT. We dismissed him. We can have him back at a later date if you want.

Representative JONAS. How about Tuesday? I had several questions I wanted to ask him. I never asked him a single question. I asked the lawyer a few questions.

Mr. REDWINE. Mr. Chairman, for the information of the committee, Mr. Clarence Davis has been in touch with the chief clerk of the committee trying to arrange his personal schedule to fit in with our scheduling here, and we have already told Mr. Clarence Davis that he is tentatively scheduled for 2 o'clock on Tuesday. We can change that, however, if the members wish to have Mr. McArdle back at that time.

Senator SCOTT. Would you like to have him at that time, Congressman?

Representative JONAS. No, sir; just any time. If I had known that he was going to be dismissed, I would have asked him the questions before we recessed for lunch.

Representative HOFFMAN. Let us clear it up. I would like to have the stenographer read the last thing that happened before we adjourned. I understood that Mr. McArdle was to be back at 2 o'clock.

Senator SCOTT. We will get him back.

Representative HOFFMAN. All right.

Mr. REDWINE. Mr. Holderer, will you state your name and position?

**TESTIMONY OF GEORGE B. HOLDERER, STAFF ENGINEER, SUBCOMMITTEE ON MINERALS, MATERIALS, AND FUELS OF THE SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS**

Mr. HOLDERER. George B. Holderer. I am the staff engineer of the Subcommittee on Minerals, Materials, and Fuels of the Senate Interior and Insular Affairs Committee.

Mr. REDWINE. For how long have you held that position, Mr. Holderer?

Mr. HOLDERER. Three years.

Mr. REDWINE. Prior to that time will you give us your history, professional or otherwise, sir?

Mr. HOLDERER. Prior to that time I was the Chief of the Ferro Alloys Division in the DMPA.

Mr. REDWINE. What is that agency?

Mr. HOLDERER. Defense Materials Production Agency. It was the successor to the DMA, which was Defense Minerals Administration, which was located in the Department of the Interior.

I have been a consulting engineer a good part of my life. I have been connected with almost every phase of mining over a period of more than 50 years, beginning with my high-school summer days. I am a graduate mining engineer from the School of Mines at the University of Columbia.

Mr. REDWINE. In your work with the DMPA, just what function did you perform, Mr. Holderer?

Mr. HOLDERER. There was a vast number of applications for assistance of various types to stimulate the mining industry of this country when we got into the Korean war in 1951, and after DMPA was formed, which was September or later in the year 1951 or 1952—I forget the exact date—I went over to DMPA as Chief of the Ferro Alloys Division, and that Division covered tungsten, manganese, and chromite.

Many millions' of dollars' worth of applications passed over my desk for loans, production loans, assistance in exploration, and various phases of research and metallurgical work.

Mr. REDWINE. And those loan applications would be accompanied by engineering reports, assay reports, and matters of that kind?

Mr. HOLDERER. That is correct. We demanded all the information that it was possible to get or that the applicant could supply.

Mr. REDWINE. Then it was your duty to analyze all this technical data that was submitted and determine whether or not the Federal Government should grant a loan?

Mr. HOLDERER. That is true.

Mr. REDWINE. Did you have any connection with the War Production Board earlier, Mr. Holderer?

Mr. HOLDERER. I was an assistant to the Director of the Copper Division of the War Production Board.

Mr. REDWINE. What were your duties there, Mr. Holderer?

Mr. HOLDERER. I had no routine duty as assistant to the Director. Our job was to stimulate the copper production of the country, and every day brought new problems. It was a case of using the long-distance telephone. If that wasn't enough, I would hop on the first plane and go out to interview the responsible officials to see what could be done to spur their production.

Mr. REDWINE. Mr. Holderer, in your experience over the years, you are experienced in mining, milling, and so forth; are you not?

Mr. HOLDERER. I have been connected with all phases of mining.

Mr. REDWINE. Mr. Holderer, in the last few days, did Chairman Murray, of the Interior Committee, direct you to make a study of certain files?

Mr. HOLDERER. I will read from his instructions:

The chairman would like you to drop anything you may be working on and study the technical side of the Al Sarena case from the RFC files, mining reports, or any other data available that Mr. Redwine will put at your disposal. Condense the material into a short report on the property, with particular emphasis upon the economics of the mine.

Mr. REDWINE. You have performed that assignment?

Mr. HOLDERER. I have.

Mr. REDWINE. Before we go into the report that you have made on that, Mr. Holderer, may I direct your attention to the RFC file and a report contained therein signed "D. Ford McCormick." Do you have that before you?

Mr. HOLDERER. I think this is it.

Mr. REDWINE. Mr. Holderer, is that report a part of a loan application?

Mr. HOLDERER. The RFC file that I have before me is the application that was submitted to the RFC requesting a loan of \$51,000. The request for a loan was made on January 23, 1940, and this is the application.

Mr. REDWINE. Covering the 23 claims that are involved in this dispute?

Mr. HOLDERER. That is correct.

Mr. REDWINE. And you have before you as a part of that application a report signed "D. Ford McCormick"?

Mr. HOLDERER. That is right.

Mr. REDWINE. Would you refer to that part of his report where he discusses the timber on that property?

Mr. HOLDERER. The company lists?

Mr. REDWINE. In his report, please, Mr. Holderer, the McCormick report, will you read the paragraph relating to the amount of timber on those claims as set forth by Mr. McCormick?

Mr. HOLDERER. I am quoting:

It is estimated that there are 20 million feet of excellent fir and pine timber on the claim.

Mr. REDWINE. Will you now refer to that portion of the report which the company designated as a pro forma balance sheet?

Mr. HOLDERER. The company submitted a pro forma balance sheet on January 23, 1940. They submitted a list of their assets.

Mr. REDWINE. Will you read out their assets as listed by them?

Mr. HOLDERER (reading):

Cash, \$903; accounts receivable due from smelter, approximately \$2,250; mining claims, approximately 400 acres in 23 claims, \$80,000; timber resources, approximately 20 million feet of timber on said claims, \$80,000; ore blocked out, 27,595 tons at \$260,070.

Representative JONAS. Read that last one again, please.

Mr. HOLDERER (reading):

Ore blocked out, 27,595 ton at \$260,070.

Then their capital assets are given as:

Machinery and tools, old, \$26,205; new machinery and tools, \$10,659; mill construction, \$10,316.50; mine development, \$54,286.07—

to a total of \$101,467.07, less depreciation reserves of \$3,420.

Mr. REDWINE. That is all right, Mr. Holderer.

Mr. HOLDERER. That gives a total of \$521,270.07 as their assets.

Mr. REDWINE. While we are at it, let us give the liabilities, also. That is very short.

Mr. HOLDERER. "Liabilities, contracts payable, due on 10 mining claims, \$35,000 less credit due, \$4,000." That is a total of \$31,900. And the capital stock, 10,000 shares, no par value listed, at \$489,370.07.

Mr. REDWINE. Mr. Holderer, can you tell the committee as to the mining claims valued at \$80,000; does that indicate, from your experience in reading such applications, the value that they place on the mining claims without the timber and without any machinery?

Mr. HOLDERER. That is the way it is stated in their pro forma report. They put down a figure of \$80,000 for the mining claims, \$80,000 for the timber.

Mr. REDWINE. Mr. Holderer, you are familiar with the mining laws, are you not, and how you go about patenting mining claims?

Mr. HOLDERER. That is true.

Representative HOFFMAN. I understood he asked if he was familiar with both.

Mr. HOLDERER. The mining law.

Representative HOFFMAN. And you said you were?

Mr. HOLDERER. I did.

Mr. REDWINE. Mr. Holderer, is it not true that this company back in 1940 was claiming that it, as a part of its assets, had \$80,000 worth of timber to which it had no more title than a snowman?

Mr. HOLDERER. That is the figure they put down in their pro forma balance sheet.

Mr. REDWINE. But the land had not gone to patent?

Mr. HOLDERER. That is correct.

Mr. REDWINE. The timber was not theirs?

Mr. HOLDERER. I would say it was not.

Mr. REDWINE. Yet they were claiming as an asset \$80,000 worth of timber?

Mr. HOLDERER. That is right.

Mr. REDWINE. And they said it had 20 million feet on it?

Mr. HOLDERER. That is correct.

Representative JONAS. May I ask Mr. Redwine something?

I do not believe the witness has said who made that application. Will you let that be established?

Mr. REDWINE. I am going into that, if I may, right now.

Now, in your examination of these RFC files, applications for loans, I believe that you find there that the Al Sarena Mines, Inc., filed an application in 1936, was it not?

Mr. HOLDERER. I think it was 1936. I believe so, sir.

Mr. REDWINE. For \$19,642, I believe that was, was it not?

Mr. HOLDERER. That is correct.

Mr. REDWINE. Then in 1940, this application from which you are reading now was filed by Al Sarena Corp., was it not?

Mr. HOLDERER. I would have to check that to get that exactly. It was filed by Cecil R. Haden, president, Al Sarena Corp.

Mr. REDWINE. And attached to that application is a copy of the lease agreement between Al Sarena Mines, Inc., and Al Sarena Corp., is it not?

Mr. HOLDERER. That is correct.

Mr. REDWINE. The report that we are talking about as to the 20 million board-feet of timber was signed D. Ford McCormick, was it not?

Mr. HOLDERER. That is right.

Mr. REDWINE. Now, going back to this pro forma balance sheet, Mr. Holderer, as to this ore blocked out, \$260,070 worth, will you discuss that?

Read your report on this and discuss that fully, please.

Representative JONAS. Do we have copies of the report?

Mr. REDWINE. We have only one copy. I will have some made.

Representative HOFFMAN. Is that the report to Senator Murray?

Mr. REDWINE. Yes, sir.

Representative HOFFMAN. Mr. Chairman, I want to object on the record to the receipt of this report because it is clearly a matter of hearsay.

As I understand the situation, the witness does not contend that he has any personal knowledge. He is basing his report upon the documents which he finds in the file and, of course, the only question here as a matter of law is whether a reasonably prudent man would have proceeded under this showing to attempt to mine the claim.

Mr. REDWINE. Mr. Chairman.

Representative HOFFMAN. Unless he is an expert and qualified on that.

Mr. REDWINE. Mr. Chairman, Mr. Holderer has testified that for several years in Government service it was his duty to analyze such documents as he has analyzed here and to this in answer to a directive given to him by Senator Murray, chairman of the committee. He is certainly qualified as being competent, having had a great deal of experience in Government service in doing this same thing.

Representative HOFFMAN. Mr. Chairman, I can anticipate the ruling, but I want to put on the record that counsel's statements would prove that it is hearsay and would not be received in any court.

Mr. REDWINE. Mr. Chairman, let me say this: That this man's hearsay, if that is what you want to call it, his analysis of such reports as this determined whether the Government during the war years loaned millions of dollars or turned down applications for loans when the application itself showed that it did not deserve a loan, that it did not offer sufficient security to the Government to make a loan.

Representative CHUDOFF. Is that the application by the Al Sarena Mining Co. for an RFC loan from the RFC?

Mr. REDWINE. Yes, sir.

Representative CHUDOFF. That certain statements were attached and certain questions, and there is a paragraph at the end of the application making it a criminal Federal offense to make false statements?

Mr. REDWINE. Yes, sir.

Representative CHUDOFF. This witness is a former employee of the RFC?

Mr. REDWINE. No, sir; but he did this very same kind of work in the DMA and War Production Board throughout the war. He has qualified as an expert.

Representative CHUDOFF. He is an expert in mineral analysis?

Mr. REDWINE. Yes, sir.

Representative JONAS. However, the record shows, Mr. Chudoff, that this application was not filed by the claimants to the patent but by a different corporation.

Representative CHUDOFF. Actually, it was filed by a corporation from which the Al Sarena Mining Co. succeeded in buying the assets of the other corporation.

Representative JONAS. It was a different corporation from the Al Sarena Mines, Inc., the applicants for the patent.

Representative CHUDOFF. But it covered the same geographical territory and everything else, and anything alleged as to the value of the ore in that application would cover the value of the ore in the Al Sarena Corp.

Mr. REDWINE. Mr. Chairman, I would like to suggest that this has nothing to do with the qualifications of this witness as an expert to analyze and interpret this loan application.

Representative HOFFMAN. Mr. Chairman, I do not mind helping counsel out.

Why do you not ask him, assuming those facts to be true, and get his opinion?

Senator NEUBERGER. Mr. Chairman, speaking of hearsay, I think it ought to be noted for the record that we have had testimony that the Interior Department officially granted final patent to these lands based on a telephone call from a subordinate Government employee.

Representative JONAS. We have not had that testimony and will not have it until Mr. Davis gets on the stand.

Senator NEUBERGER. I think Mr. Appling testified.

Representative JONAS. He testified to a conversation, but we do not yet know whether that was the basis on which the decision was made.

Senator NEUBERGER. We will have Mr. Davis on Tuesday, I believe the chairman said.

Mr. REDWINE. Will you read your report first and then go into the matter?

Mr. HOLDERER. You wish me to read the part having to do with the sampling, or the entire report?

Mr. REDWINE. The entire report, please.

Mr. HOLDERER (reading):

The opinions expressed in this report are based on information obtained from the hearings on this case in Portland, Oreg., November 25, 1955, Washington, D. C., January 10, 1956, and information supplied by the company to the Reconstruction Finance Corporation when an application for a loan was made on January 23, 1940. The loan was denied by RFC.

In the company's application to the RFC, there was a section on sampling which was signed by George P. Sopp. The following statements are taken from this section of the application, and I quote:

"Sampling, as carried on at Al Sarena Mine since the beginning of February, has been greatly hampered by inaccessible drifts, caved stopes, and weak timbered ground.

"Large samples could not be taken without a considerable outlay for equipment.

"No sampling on the vein could be done between these two levels, No. 1 and No. 2 tunnel levels, and therefore too much reliance should not be placed on the value obtained for this block, No. 2 block, of ore. The number of samples taken on this block is small compared to the size of the block.

"Approximately 250 feet of the drift in No. 1 tunnel is inaccessible. Values obtained in previous sampling were used. The writer knows nothing of the method used in taking these previous samples and cannot answer for their accuracy.

"Valuation of an ore body based on such a small number of samples cannot be considered as extremely accurate especially when these samples are small.

"To get a more accurate value for the ore on the vein, it would be necessary to sample stopes and drifts now inaccessible, to do either some surface work or intersect and drift on the vein from No. 5 tunnel. Larger samples taken at closer intervals would give greater accuracy."

My own opinion follows:

Reserves—From the above statements quoted from Mr. Sopp's report, no reliance can be placed upon the company's estimate of 24,917 tons of ore reserves valued at \$232,600. A good deal of work has been done on the property, but much of it in barren ground.

Reference is made to the possibility of this being a very large low-grade deposit which could be mined cheaply. In fact, a reference is made to the Alaska-Juneau mine, but no diamond or churn drilling was ever done on the property. Not by the wildest stretch of imagination could a deposit of this character with narrow veins be compared to property like Alaska-Juneau, which for many years paid dividends on ore averaging a lot less than \$1 per ton, but it must be remembered that 10,000 tons a day were mined.

All of the great copper mines in this country in Arizona, New Mexico, Montana and Nevada are mining ore where recovery is less than 1 percent of copper per ton. In the case of Kennecott's property at Bingham Canyon, 100,000 tons per day are mined with a recovery of about 0.75 percent per ton, and at the other mines many thousands of tons are mined per day.

In the attached pages there are figures taken from assay sheets which are exhibits in the hearings. It is my opinion that from the information available, it would be most difficult for this property to produce 200 tons a day at most, and even 100 tons a day would be difficult because of the small working faces.

In the report to the RFC an operating cost of \$3 per ton is given. Mine labor is quoted at \$4.50 per shift with other labor at comparable amount. Many items in figuring the cost are omitted, indicating a complete unfamiliarity with the mining operation.

The cost of mine labor in the Coeur d'Alene mining district of Idaho, which is the nearest mining district of good size to this property, for the past 3 years has been \$15.94 per shift, to which must be added \$1.88 per shift for nonwage payments; such as compensation, insurance, social security, vacation pay, et cetera, bringing the total pay to almost \$18.

Production in small mines varies from  $1\frac{1}{2}$  to  $2\frac{1}{2}$  tons per shift per man for the overall total of men employed. An average would be 2 tons per man-shift. Thus it can be seen that for labor alone the charge would be a minimum of \$9 per ton, and in mine operations generally labor can be considered to be 45 percent of the total cost of mining, which brings the total cost of mining not far from \$16 or \$17 per ton. Another \$5 per ton would be a fair figure for milling cost and there is still no provision for amortization, taxes, and numerous other overhead expenses.

It is my opinion that a property of this kind could not be operated profitably with values at less than \$20 per ton. The property certainly could not be operated now at a profit, nor do I believe that it could ever have been operated at a profit, even in the days when labor was said to be \$4.70 per shift, which it has not been for many years.

Mr. REDWINE. Will you stop at that point?

Representative HOFFMAN. May we have a copy of that?

Mr. REDWINE. We are having it prepared right now.

Representative HOFFMAN. I think we should have copies so that we could be prepared to look them over before the witness is excused.

Senator SCOTT. He is getting copies for you.

Representative HOFFMAN. I know that, but it is after the witness is on the stand and has testified. What opportunity do I have to prepare to question the witness?

I do not know what the Senate rule is, but under the rule of the House, we should have that at least 24 hours before the witness takes the stand. That has been the procedure all along, to deny us any look at what is to come before the committee, and I want to protest. It is not fair to us.

Representative CHUDOFF. Mr. Hoffman, so that there is no wrong impression by anybody listening or by members of the press, I do not have a copy either and have not seen a copy.

Representative HOFFMAN. That has not a single thing to do with the rule.

Representative CHUDOFF. I understand, but I do not want you to insinuate that, as chairman of the House subcommittee, I have a copy and you do not. Sometimes you have copies when we do not.

Representative HOFFMAN. When you were in the Virgin Islands there, I got a copy of something through the chairman or the general counsel.

Representative CHUDOFF. We try to give you every copy of every thing we have.

Representative HOFFMAN. Yes, I want to compliment you on every occasion.

Senator SCOTT. As far as I know, the chairman did not know there was such copy available.

Mr. REDWINE. Mr. Holderer, let us go back to something that is copied except in the RFC report. Will you discuss this ore body for us while we are waiting for these copies of your report?

Mr. HOLDERER. From the information given, there are probably four veins, all of them of extremely narrow width.

Mr. REDWINE. What do you mean by extremely narrow width, Mr. Holderer?

Mr. HOLDERER. Two feet, and it would be impossible to mine a reasonable tonnage on a vein as narrow as that without getting a great deal of waste rock which would still further cut the value of the ore per ton. So that disposes of the idea that this is a gigantic body that might be mined on a huge scale.

Mr. REDWINE. It has very narrow veins?

Mr. HOLDERER. Very narrow veins. They would have to really be put to it to secure 100 tons a day, day in and day out, and month in and month out.

Representative JONAS. Mr. Chairman, would you have him identify the document from which he gets that information so that I can see it later?

Mr. REDWINE. Will you do that, Mr. Holderer?

Mr. HOLDERER. The part that I just finished reading is——

Representative JONAS. I mean the part upon which you base this comment that there were only veins of a very narrow width.

Mr. REDWINE. It is mentioned in both the Sopp and McCormick reports; is that right?

Mr. HOLDERER. Yes, sir.

Mr. COBURN. May I interject a question, sir?

Has anyone told you what to put in that report, or has anyone coached you?

Mr. HOLDERER. I have taken my instructions from the letter that I received from the chairman of the committee.

Mr. COBURN. Has anyone discussed the nature of your report, what you were going to say?

Mr. HOLDERER. No. The opinion I am giving is my own opinion, uninfluenced by conversations with anyone else.

Mr. COBURN. Thank you.

Mr. REDWINE. And all from Government records and the transcript of the Portland hearing which reported the Hattan and Sanborn testimony?

Mr. HOLDERER. I only looked at two transcripts, the one from Portland, and the one from Washington on January 10. I did not read those transcripts. All that I took out of them was the information from the assay sheets. That is all that I took from those two transcripts.

Senator SCOTT. Did you show this report or discuss it with anyone before you came up here?

Mr. HOLDERER. No; I did not. I gave a copy of the report to Mr. Redwine as I came up.

Representative JONAS. Mr. Chairman, may I ask him a question before we get away from that point?

Senator SCOTT. Yes.

Representative JONAS. Do the comments you have just made about the veins and their width, and so forth, apply to the eight uncontested claims, the ones that the Forest Service admits are sufficiently mineralized?

Mr. HOLDERER. After looking at the assay sheets, I concluded that they were so completely bad that any further examination of the problem was useless.

Representative JONAS. What do you mean?

Mr. HOLDERER. If the assays are no good, then the whole thing is not good as far as an opinion is concerned.

Representative JONAS. So the opinion you now express that the property was absolutely without any economic value as a mine would apply to the eight claims that the Forest Service agreed to?

Mr. HOLDERER. It would apply to everything that was supposed to be mineralized.

Representative JONAS. Thank you, sir.

Representative HOFFMAN. May I ask him this question, in view of what you said: Will you repeat what you said—that if the assays were not good, then what happened?

Mr. HOLDERER. If the assays were no good, any further discussion of the problem as to its economic value would be entirely useless.

Representative HOFFMAN. And your opinion would be useless?

Mr. HOLDERER. Absolutely.

Mr. REDWINE. Mr. Holderer, will you go on with the report that you have submitted, taking up what you have prepared in respect to assays and going slowly when you get to that point where you identify what set of assays you are talking about?

Mr. HOLDERER. As a start, there were 12 assay sheets, containing 142 assays. This is a little résumé that does not appear on the typed copies. I made it up afterward.

There was 1 assay that went \$7.70 for the total gold and silver: 1 at \$4.85; 1 at \$3.70; 1 at \$2.25; 1 at \$2.20; and all the others were under \$2. A great many of them were simply "trace" or "zero." That is a quick rundown on the entire lot.

Now, taking the sheets separately, on page 51 in the Portland transcript, or the sheet that is given as opposite page 51, there are 23 assays, and those were given to the Annes Engineering Co., Grants Pass, and there is no date on the assay report. It was presented by Elton M. Hattan.

Page 58, assay report of Abbot A. Hanks, August 10, 1949. There were 29 assays presented by Hanks.

Now, this batch of assays is similar to the one that was handed to the Annes Co. for assaying. They are practically identical:

Gold, 1 assay ran \$3.32; 2 ran at 17 cents; 1 at 35 cents; 2 at 70 cents; 1 at "zero"; 1 at \$6.65; and 1 at \$7.70; and the balance were "trace."

Silver, 1 assay at 34 cents; 1 at 5 cents; 1 at \$1.64; 1 at 27 cents; and the balance were "zero" or "trace."

Page 109, report of R. N. Appling, Jr., dated January 2, 1954. This is the same set that was submitted to A. W. Williams Inspection Co., which appears on page 294 of the Washington transcript:

Gold, 1 assay ran \$4.20; 1 at \$3.50; 1 at \$2.80; 5 at \$2.10; 1 at \$2.45; and 1 at 70 cents; and 18 ran between \$1.05 and \$1.75.

There were 24 silver assays, which ran between 5 cents and 65 cents per ton.

Total values, 1 assay at \$4.85 per ton; 1 at \$3.95; and the balance ran between 79 cents and \$2.85.

Now, this comes to page 263 from the Washington transcript, January 10, reports from the A. W. Williams Inspection Co., dated November 18, 1949, 15 assays:

One ran \$2.25 per ton, gold and silver. The balance were between 90 cents and \$1.86. Ten are "zero."

Page 267 of the Washington transcript, and these are assays from the Williams Co.:

September 27, 1949, 7 assays, the highest of which was \$1.86.

Page 278, October 14, 1949, 8 assays, 6 of which ran "trace" or "zero." One ran 98 cents; 1 ran \$2.20, total value.

Page 281, Washington transcript, 13 assays. The highest was \$1.84 and 5 were only "trace."

Page 285, one was "zero."

Page 290, October 7, 1953, 18 assays: 7 assays were "zero"; 6 were "trace"; 5 were \$1.80; and 1 was 5 cents.

Page 291, October 9, 1953, 10 assays: 1 assay was "zero"; 1 was "trace"; and 8 were \$1.80.

Page 292, October 14, 1953, 4 assays, 2 of which were "zero" and 2 were \$3.70.

Page 294, November 4, 1953, six assays: 1 assay was \$1.14; 1, \$1.06; 1 at 53 cents; 2 at 18 cents, and 1 at 27 cents.

Page 294, October 29, 1953, three assays, all of which were "zero." Rarely have I seen as poor a batch of assays as that.

Mr. REDWINE. Mr. Holderer, in looking over your recap of all the assays that have come into the record, I find 1 here of \$6.65 and 1 of \$7.70, and no other over \$5. Now, the most favorable set of assays, the set of assays showing the greatest values, is the assays of the A. W. Williams Co., 28 of them upon which this decision was rendered; is that correct?

Mr. HOLDERER. I don't know on what the decision was rendered. There was one here.

Mr. REDWINE. Well, the ones that show in the Appling report. Let us reword that.

Mr. HOLDERER. Yes; there was 1 that had \$7.70.

Mr. REDWINE. The \$7.70 was not in the Appling report, was it?

Mr. HOLDERER. In the Hanks.

Mr. REDWINE. Going to the Appling report, the assays that showed in there, of all the sets of assays that you have seen, the highest values are in that Williams Inspection Co. report that shows in the Appling report; is that correct?

Mr. HOLDERER. That is correct.

Mr. REDWINE. And none of those exceed what?

Mr. HOLDERER. \$4.20 was high in that batch.

Mr. REDWINE. Correct me if I am wrong in this. Yet you testified a few minutes ago that, from your examination of the engineers' report on this property and all that, you could not possibly operate this mine with values of less than \$20; is that correct?

Mr. HOLDERER. That is correct.

Mr. REDWINE. Mr. Coburn, would you like to ask some questions at this time?

Mr. COBURN. No, sir.

Mr. REDWINE. Mr. Holderer, I would like to ask you a hypothetical question. No; I do not believe I will.

Mr. HOLDERER. I might add that, after having summarized these assays, I made no further attempt to discuss the economics of the mine because there are none.

Mr. REDWINE. There are just no economics there?

Mr. HOLDERER. The economics is zero.

Mr. REDWINE. That is all I have of this witness, Mr. Chairman.

Representative HOFFMAN. May I ask a few questions?

Senator SCOTT. Yes.

Representative HOFFMAN. You said you were a member of the War Production Board. Over what period?

Mr. HOLDERER. Practically throughout, from 1942 to late 1945; about 3 years.

Representative HOFFMAN. Do you ever remember being before the Howard Smith special committee as a witness?

Mr. HOLDERER. I never did appear as a witness.

Representative HOFFMAN. You never did appear?

Mr. HOLDERER. No.

Representative HOFFMAN. With the War Labor Board members?

Mr. HOLDERER. No.

Representative HOFFMAN. To testify?

Mr. HOLDERER. I was in the Copper Division. We never appeared before any committee; or at least I did not.

Representative HOFFMAN. As you recall?

Mr. HOLDERER. I recall that I did not.

Representative HOFFMAN. You are an expert, as I understand it?

Mr. HOLDERER. I am a mining engineer. When you say an expert, an expert of what?

Representative HOFFMAN. That is what I was wondering.

Mr. HOLDERER. I am an expert on mines and mining.

Representative HOFFMAN. You are here to testify that the reasonably prudent man would not invest any money in this thing?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Did you ever operate a mine?

Mr. HOLDERER. I have.

Representative HOFFMAN. Where?

Mr. HOLDERER. Practically in every part of the Western Hemisphere.

Representative HOFFMAN. It was a mine that you owned yourself?

Mr. HOLDERER. I have owned 1 or 2.

Representative HOFFMAN. Well, did you make or lose on them.

Mr. HOLDERER. On one I lost.

Representative HOFFMAN. Were you reasonably prudent when you went into that one?

Mr. HOLDERER. I was reasonably prudent when I started.

Representative HOFFMAN. You thought you were when you went in.

Mr. HOLDERER. When I went in. As soon as I started losing, I called it quits and got out.

Representative HOFFMAN. You have owned two mines, as I understand it; is that right?

Mr. HOLDERER. That is right.

Representative HOFFMAN. And you made money on the other one?

Mr. HOLDERER. A little.

Representative HOFFMAN. What percentage on your investment, let us say?

Mr. HOLDERER. Oh, probably 20 or 30 percent.

Representative HOFFMAN. Over what period; a year?

Mr. HOLDERER. A couple of years.

Representative HOFFMAN. So that in each year you think you made 20 or 30 percent on it?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Then what happened?

Mr. HOLDERER. Well, the ore body played out and that was the end of it.

Representative HOFFMAN. What were the net results? How much did you put in and how much did you get out? Did you balance your budget, in other words?

Mr. HOLDERER. Scarcely, when I took into consideration the value of my time.

Representative HOFFMAN. So you were not a reasonably prudent man on that one, were you?

Mr. HOLDERER. No. That is right.

Representative HOFFMAN. Did you have a patent on those mining claims?

Mr. HOLDERER. I did on one batch, on the batch that I lost money on. In the other, I was in a partnership.

Representative HOFFMAN. Somebody in the Department then made a mistake in letting you have a patent, did they not?

Mr. HOLDERER. As to that, I wouldn't say. I don't know.

Representative HOFFMAN. Mr. Redwine asked you about this timber. It seems that somebody made an application to the RFC and said the timber was worth \$80,000.

I noticed that you noticed in the testimony that Mr. Leavengood said it was worth \$77,000 at a certain time. The company only had \$3,000 more than he did. That is about right?

Mr. HOLDERER. The only figure I have is the figure given in this application to the RFC.

Representative HOFFMAN. That was \$80,000?

Mr. HOLDERER. That was \$80,000.

Representative HOFFMAN. And there being \$80,000 on there, did you consider in passing on the validity or the desirability of the RFC making the loan that the company was claiming that it had \$80,000 worth of timber?

Mr. HOLDERER. They claimed that as one of their assets.

Representative HOFFMAN. Was it not?

Mr. HOLDERER. They had no ownership to that timber until the patent was granted.

Representative HOFFMAN. But did you not have a right to use any and all of it, every last board foot of it if they use it in their mining operations?

Mr. HOLDERER. That is true. They could use that timber at any time.

Representative HOFFMAN. But you are still critical of their putting that in.

Mr. HOLDERER. As an asset.

Representative HOFFMAN. It was a potential asset. It was there on the ground and they had a right to use it, did they not, if they needed it in the mining?

Mr. HOLDERER. There is a difference between an asset and a potential asset.

Representative HOFFMAN. Oh. I was just thinking of that paragraph on page 15 of Hattan's report:

While the Forest Service has no accurate cruise of the timber embraced within the area of all the claims, the Oregon Mine Handbook, page 197, states that approximately 12 million board feet of timber is estimated to be available and on the mining claim. If the mine is developed as contemplated, a large amount of timber will be necessary. In fact, it might well be to the advantage of the company to set up a sawmill on the property and produce the timber which will be needed in such a large scale operation.

There is, of course, nothing to prevent the company after they get a patent cutting all of it.

Representative HOFFMAN. Do you ever remember being before the Howard Smith special committee as a witness?

Mr. HOLDERER. I never did appear as a witness.

Representative HOFFMAN. You never did appear?

Mr. HOLDERER. No.

Representative HOFFMAN. With the War Labor Board members?

Mr. HOLDERER. No.

Representative HOFFMAN. To testify?

Mr. HOLDERER. I was in the Copper Division. We never appeared before any committee; or at least I did not.

Representative HOFFMAN. As you recall?

Mr. HOLDERER. I recall that I did not.

Representative HOFFMAN. You are an expert, as I understand it?

Mr. HOLDERER. I am a mining engineer. When you say an expert, an expert of what?

Representative HOFFMAN. That is what I was wondering.

Mr. HOLDERER. I am an expert on mines and mining.

Representative HOFFMAN. You are here to testify that the reasonably prudent man would not invest any money in this thing?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Did you ever operate a mine?

Mr. HOLDERER. I have.

Representative HOFFMAN. Where?

Mr. HOLDERER. Practically in every part of the Western Hemisphere.

Representative HOFFMAN. It was a mine that you owned yourself?

Mr. HOLDERER. I have owned 1 or 2.

Representative HOFFMAN. Well, did you make or lose on them.

Mr. HOLDERER. On one I lost.

Representative HOFFMAN. Were you reasonably prudent when you went into that one?

Mr. HOLDERER. I was reasonably prudent when I started.

Representative HOFFMAN. You thought you were when you went in.

Mr. HOLDERER. When I went in. As soon as I started losing, I called it quits and got out.

Representative HOFFMAN. You have owned two mines, as I understand it; is that right?

Mr. HOLDERER. That is right.

Representative HOFFMAN. And you made money on the other one?

Mr. HOLDERER. A little.

Representative HOFFMAN. What percentage on your investment, let us say?

Mr. HOLDERER. Oh, probably 20 or 30 percent.

Representative HOFFMAN. Over what period; a year?

Mr. HOLDERER. A couple of years.

Representative HOFFMAN. So that in each year you think you made 20 or 30 percent on it?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Then what happened?

Mr. HOLDERER. Well, the ore body played out and that was the end of it.

Representative HOFFMAN. What were the net results? How much did you put in and how much did you get out? Did you balance your budget, in other words?

Mr. HOLDERER. Scarcely, when I took into consideration the value of my time.

Representative HOFFMAN. So you were not a reasonably prudent man on that one, were you?

Mr. HOLDERER. No. That is right.

Representative HOFFMAN. Did you have a patent on those mining claims?

Mr. HOLDERER. I did on one batch, on the batch that I lost money on. In the other, I was in a partnership.

Representative HOFFMAN. Somebody in the Department then made a mistake in letting you have a patent, did they not?

Mr. HOLDERER. As to that, I wouldn't say. I don't know.

Representative HOFFMAN. Mr. Redwine asked you about this timber. It seems that somebody made an application to the RFC and said the timber was worth \$80,000.

I noticed that you noticed in the testimony that Mr. Leavengood said it was worth \$77,000 at a certain time. The company only had \$3,000 more than he did. That is about right?

Mr. HOLDERER. The only figure I have is the figure given in this application to the RFC.

Representative HOFFMAN. That was \$80,000?

Mr. HOLDERER. That was \$80,000.

Representative HOFFMAN. And there being \$80,000 on there, did you consider in passing on the validity or the desirability of the RFC making the loan that the company was claiming that it had \$80,000 worth of timber?

Mr. HOLDERER. They claimed that as one of their assets.

Representative HOFFMAN. Was it not?

Mr. HOLDERER. They had no ownership to that timber until the patent was granted.

Representative HOFFMAN. But did you not have a right to use any and all of it, every last board foot of it if they use it in their mining operations?

Mr. HOLDERER. That is true. They could use that timber at any time.

Representative HOFFMAN. But you are still critical of their putting that in.

Mr. HOLDERER. As an asset.

Representative HOFFMAN. It was a potential asset. It was there on the ground and they had a right to use it, did they not, if they needed it in the mining?

Mr. HOLDERER. There is a difference between an asset and a potential asset.

Representative HOFFMAN. Oh. I was just thinking of that paragraph on page 15 of Hattan's report:

While the Forest Service has no accurate cruise of the timber embraced within the area of all the claims, the Oregon Mine Handbook, page 197, states that approximately 12 million board feet of timber is estimated to be available and on the mining claim. If the mine is developed as contemplated, a large amount of timber will be necessary. In fact, it might well be to the advantage of the company to set up a sawmill on the property and produce the timber which will be needed in such a large scale operation.

There is, of course, nothing to prevent the company after they get a patent cutting all of it.

It would not have been unusual if they had tried to cut the timber and used it in opening the mine, would it?

Mr. HOLDERER. Well, there obviously was no prospect of ever mining the property for mineral wealth.

Representative HOFFMAN. How do you know what the McDonalds had?

Mr. HOLDERER. There was nothing on that property that was—

Representative HOFFMAN. Any good?

Mr. HOLDERER. That was minable at a profit.

Representative HOFFMAN. That is what you think. That is your opinion as an expert.

Mr. HOLDERER. Based on the information at my disposal.

Representative HOFFMAN. That is what?

Mr. HOLDERER. Their application to the RFC.

Representative HOFFMAN. Based on that, but do you know anything about the taking of the samples?

Mr. HOLDERER. I have no knowledge of the competency or the personal integrity of anyone who did any sampling.

Representative HOFFMAN. Or how they were taken?

Mr. HOLDERER. Or how they were taken.

Representative HOFFMAN. Or whether or not they were protected.

Mr. HOLDERER. That is right.

Representative HOFFMAN. And if they were not properly taken and were not properly protected, your opinion does not amount to anything? Did you not so testify?

Mr. HOLDERER. Wait a minute. My opinion is based on the assay sheets that were at my disposal.

Representative HOFFMAN. And the question is: If the samples were not properly taken, if the assay was not properly conducted, your opinion does not amount to anything?

Mr. HOLDERER. If the assay sheets themselves were worth nothing.

Representative HOFFMAN. Just answer my question. You are an expert. Come on.

Mr. HOLDERER. If the assay sheets are worth nothing, consequently my opinion would be expressed as the whole thing as worth nothing.

Representative HOFFMAN. Would it make any difference in your opinion as an expert mining engineer if the samples were not protected and guarded all the time?

Mr. HOLDERER. If they were not protected and guarded properly, I would say the assays would be highly susceptible to suspicion.

Representative HOFFMAN. You would not use the conclusion to base an opinion on unless the record showed that the sample was properly protected by the man who took it, or somebody in between, until it got to the assay office, would you?

Mr. HOLDERER. I certainly would not render a favorable opinion. I would ask to be excused from rendering any opinion if I had reason to believe that the assays had been tampered with.

Representative HOFFMAN. Well, the same would hold true unless it appeared affirmatively that the sample had been properly guarded, would it not?

Mr. HOLDERER. I know nothing about how the samples were taken or how they were guarded.

Representative HOFFMAN. Sure, and you do not know anything about the competence of the fellow who made the assay, do you?

Mr. HOLDERER. My information——

Representative HOFFMAN. Wait a minute. Answer that question.

Mr. HOLDERER. I know nothing about the competence of anyone who took them, but in Mr. Sopp's report, he questions that very thing.

Representative HOFFMAN. What you do is accept the conclusions that have been given to you there where you were asked to render an opinion.

Mr. HOLDERER. My conclusions are based on the application of the company who applied for a loan.

Representative HOFFMAN. Wait a minute. You also brought in the samples and the assays. Your opinion is also based on that, is it not?

Mr. HOLDERER. They give some of those, too, yes.

Representative HOFFMAN. Yes.

Mr. HOLDERER. It goes without saying that, when an applicant is asking for a loan, he is putting his best foot forward. He is not going to say anything that might be derogatory toward his request.

Representative HOFFMAN. And, as I understand your testimony, if everything in the application was true, it still would not work out as a mine?

Mr. HOLDERER. That is my opinion.

Representative HOFFMAN. And it is also your opinion as an expert that if everything that was claimed by these assays were true, even the most favorable, that would not work out as a mine?

Mr. HOLDERER. That is my opinion.

Representative HOFFMAN. Yes. Now, you said you were familiar with the mining law. Where is the provision in the mining law or in the regulations of the Department governing the granting of patents on mines that requires any percentage of mineral of any kind in order to justify a patent?

Now, I am asking about the statute, or in the regulation?

Mr. HOLDERER. I cannot point to any statute that I know of.

Representative HOFFMAN. There is no statutory requirement anywhere which calls for any degree of mineralization before patent is granted, is there?

Mr. HOLDERER. Not that I know of.

Representative HOFFMAN. And there is no regulation of the Department that calls for a specified degree of mineralization, is there?

Mr. HOLDERER. Not that I know of.

Representative HOFFMAN. And the only place that we ever find anything about this judgment of the ordinarily prudent individual being satisfied before he puts his money into it comes from decisions of the courts; does it?

Mr. HOLDERER. So far as I know.

Representative HOFFMAN. That is where that comes in?

Mr. HOLDERER. So far as I know.

Representative HOFFMAN. That is where that comes in. That is some court law that has been written.

You never were on this property?

Mr. HOLDERER. I have never seen it.

Representative HOFFMAN. This is a repetition. All you are going by is——

Mr. HOLDERER. The information in the RFC application.

Mr. REDWINE. Mr. Holderer, the RFC did turn the applications down, this same data that you have referred to?

Mr. HOLDERER. They denied the application.

Representative HOFFMAN. They turned down a good many applications and made some bad loans, too; did they not?

Mr. HOLDERER. On the average I would say their batting average was very high for accepting good ones.

Representative HOFFMAN. Do you know what I asked you?

Mr. HOLDERER. You said they turned down a good many.

Representative HOFFMAN. Did you answer it?

Mr. HOLDERER. They did turn down a good many, yes.

Representative HOFFMAN. And some of them were good, or don't you know?

Mr. HOLDERER. I don't know. I never worked for the RFC.

Representative HOFFMAN. They had certain groups like Kaiser. They gave him a lot of money; did they not?

Mr. HOLDERER. I don't know what they gave him. I have no knowledge of that.

Representative HOFFMAN. You have no knowledge of the Kaiser application?

Mr. HOLDERER. I never worked for the RFC so I cannot answer that.

Representative HOFFMAN. You never worked for the RFC?

Mr. HOLDERER. No.

Representative HOFFMAN. You are just taking their file. I see. What is the standard for granting an RFC loan as to mineralization? Is there any?

Mr. HOLDERER. I don't know. Their loans, one of the requirements was that loans were to be limited to critical minerals, and gold and silver are not critical minerals.

Representative HOFFMAN. At that time?

Mr. HOLDERER. That is right.

Representative HOFFMAN. So you did not take any gold and silver into consideration. That did not count, did it, as to whether a loan should be granted?

Mr. HOLDERER. That is true.

Representative HOFFMAN. So we can throw out everything about gold and silver. What did that leave you; anything?

Mr. HOLDERER. They didn't have any other values of any consequence.

Representative HOFFMAN. Of any consequence. Then, if you were permitted to and felt like expressing an opinion, you would say that the McDonalds were just throwing their money down a rathole?

Mr. HOLDERER. I would say just that, yes.

Representative HOFFMAN. I think that is all I have.

Senator SCOTT. Are there any questions?

Representative JONAS. Yes, sir. Mr. Chairman, I would like to ask the Chair whether it would be possible to have this witness return next week for examination. He has based his testimony on what he says are two reports in this file that I have just now begun to read while he was testifying. I was trying to read and listen at the same time. That makes it pretty difficult to try to understand.

I find in this Sopp report a lot of information that, as a layman, I would say does not bear out his characterization of this mine as

having no value, but I would not be prepared to examine him without going through it and making a little study of the Sopp report.

The same thing is true of the McCormick report. He said he based his answers to the questions on the McCormick report attached to this application.

I understand that Mr. McCormick is in the room. I do not know that. I have never met the gentleman, but I have heard that he is here today and, if he is here, I would most respectfully make the suggestion that we allow him to come up and testify with respect to this report that he made and of which the witness has said that, upon his analysis, he finds that it does not justify a finding that this is much of a mine.

I do not mean that I am trying to tell the committee how to run its business, but obviously I could not examine this witness about the Sopp report or the McCormick report or any other data in this file without having at least an hour or two to take a look at it.

Senator SCOTT. I would suggest this:

If you need an hour or two to look at it, that we not call Mr. McCormick this afternoon. We can get him back here in enough time.

Representative JONAS. I was thinking that you have an hour to run yet and Mr. McCormick is a long way from home. That is just a suggestion of mine. I thought that we might use this hour to let him say what he has to say about what this gentleman says about his report.

Mr. REDWINE. Mr. Chairman.

Senator SCOTT. Mr. Redwine may finish his questioning.

Mr. REDWINE. Mr. Chairman, may I say that when Mr. McCormick takes the stand, his testimony is probably going to take several hours. This is just one phase of the matters that he will be called upon to testify to.

Representative HOFFMAN. Now, Mr. Chairman, that is all right. Mr. McCormick sits back here. He is disputing some of these things, not your testimony but what was in the report of the RFC. He says he has been sitting here since a week ago Monday. He came in from Oregon at the committee's request. I was out there and I know about that, too.

It seems to me, Mr. Chairman, that in all fairness some of these people that are accused of making false reports or not taking samples correctly or not regarding their samples as what was intimated ought to have a chance to answer.

Senator SCOTT. They will.

Representative HOFFMAN. Should they be kept here?

Senator SCOTT. They certainly will be kept here.

Mr. REDWINE. May I explain?

Mr. McCormick was asked if he wanted to testify in Portland. He did and he testified in Portland.

Prior to the opening of the meetings in Washington, he was notified that these hearings would be held in Washington and that, if he desired to testify, he would be permitted to do so. He is not here at the request of the committee.

Representative CHUDOFF. Not only that, but I think that, in all fairness to the witness, if we want to be fair he ought to have an opportunity to hear everything that is being testified so that he

can answer everything at one time rather than make piecemeal answers.

We would never have orderly procedure if we let a witness answer a question and then tell the fellow who disagrees to come up and disagree and then ask the witness another question.

In every orderly procedure, in every court of the Nation, the first man finishes his case and then the defendant presents his case and the complainant has a chance to rebut, and then the defendant has a chance for surrebuttal.

Mr. JONAS. I think all through Springfield, Mo., and Denver, Colo., and Idaho Falls, Idaho, this happened.

Representative JONAS. I have the old-fashioned idea that a man under charge ought to be permitted to answer.

Representative HOFFMAN. This is the situation.

Senator SCOTT. Let the witness go ahead.

Representative HOFFMAN. This witness has testified as an expert, using statements allegedly made by Mr. McCormick, who sits here in the room and wants to answer.

Senator SCOTT. Let him make the statements that he has to make.

Representative HOFFMAN. The witness is finished, as I understand it.

Would you not like to hear what Mr. McCormick has to say about it? He is the fellow who took the samples.

Mr. HOLDERER. That is up to the chairman, sir.

Representative HOFFMAN. You would like to hear it, would you not?

Representative JONAS. I do not think so.

Senator SCOTT. Senator Neuberger?

Senator NEUBERGER. Mr. Holderer.

Representative HOFFMAN. This is a hit-and-run. I never knew of a third degree that had anything on this one.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. Mr. Holderer, you were asked if samples were not properly taken and protected and the assay not properly conducted, what would be the value of the samples? I think you were asked that question; were you not?

Mr. HOLDERER. The value of them would be zero.

Senator NEUBERGER. That could apply to any sample?

Mr. HOLDERER. That could apply to any sample, any time, any place.

Senator NEUBERGER. Could it apply to the samples in the area on which final patent was granted in this case?

Mr. HOLDERER. It might.

Senator NEUBERGER. I want to ask you one thing about the timber estimates included in that application for the RFC loan. The figure, I believe, was 20 million board feet of timber; is that correct?

Mr. HOLDERER. That is right.

Senator NEUBERGER. Would it be possible to use 20 million board feet of timber in the operation of a mine?

Mr. HOLDERER. Not in that mine.

Senator NEUBERGER. Twenty million board feet of timber is a lot of timber; is it not?

Mr. HOLDERER. It is a lot of timber.

Senator NEUBERGER. Do you believe that 20 million board feet of timber was listed in that application at a value of \$80,000? I believe it was 1940. Was that the date?

Mr. HOLDERER. They give \$80,000 as the value of the timber in their pro forma balance sheet.

Senator NEUBERGER. For what year was that?

Mr. HOLDERER. When they made the application, in 1940.

Senator NEUBERGER. To continue my question, do you believe, Mr. Holderer, that there was any reason to list 20 million board feet of timber for any other reason except for its commercial value as commercial timber on a lumber company?

Mr. HOLDERER. I can't say as to that.

Senator NEUBERGER. I could not hear you.

Mr. HOLDERER. I can't say as to that. They wanted to make their balance sheet look as good as possible. That is quite obvious.

Senator NEUBERGER. But you do not believe that it would be possible to use 20 million board feet of timber in the operation of a mine?

Mr. HOLDERER. I cannot conceive of that much timber being used at that mine.

Senator NEUBERGER. Thank you very much.

Representative HOFFMAN. I have one more question, if I may.

You will at least concede that they were acting in good faith, were they not, if they put that much money in, and it is just a hole in the ground?

Mr. HOLDERER. I don't know whether they acted in good faith or not.

Representative HOFFMAN. Or whether they lacked judgment of any kind?

Mr. HOLDERER. I would say that they lacked judgment.

Representative HOFFMAN. Of any kind?

Mr. HOLDERER. Of any kind.

Representative HOFFMAN. If everybody proceeded on this theory, we would never develop anything.

Mr. HOLDERER. A lot of mines would not be developed.

Representative HOFFMAN. And a lot of oil wells would not be discovered.

Mr. HOLDERER. I will grant you that.

Representative HOFFMAN. There would be a lot of dry holes all over.

Mr. HOLDERER. That is right.

Representative JONAS. Has he finished, sir?

Senator SCOTT. Go ahead, sir.

Representative JONAS. I do not think that I can go into those two reports, but I have a question or two, if you wish to continue with him.

Mr. Holderer, I invite your attention to this RFC file. One of the documents in it was the letter from John E. Morton, Chief of the Mining Section of the RFC, dated March 14, 1940. In that letter he says, and I quote:

Undoubtedly you realize there has been considerable amount of money spent on prospecting this property and as yet there is very little ore developed. The applications contain some general statements that the property offers development possibilities, but there are also statements that considerably more work has to be done to prove this. It clearly looks to us that any work done now would

be of a prospecting nature with the hope of finding ore, a purpose for which development loans are not made.

Now, that was the basis of the denial of the application, was it not, that the RFC was not in the business of lending money for development purposes and that a fully developed mine ready for operation had to be offered as security?

Mr. HOLDERER. No; I would not say that that was the basis for their denial. They put the basis for their denial finally on the grounds that the gold and silver were not critical metals.

Representative JONAS. Gold and silver were not critical?

Mr. HOLDERER. Yes.

Representative JONAS. And most of the minerals alleged to exist out there were gold and silver?

Mr. HOLDERER. Well, that is the alleged value of the property.

Mr. REDWINE. Pardon me, Congressman. I am aware of the fact that you have not looked through the file, Congressman. Let me ask the witness a question to bring out a point there; will you please?

Representative JONAS. Go ahead.

Mr. REDWINE. Is it not true that the files here also show that there was an additional application for a \$20,000 loan that was not a development loan, and it was also denied by the RFC?

Mr. HOLDERER. That is right.

Representative JONAS. Does that appear here?

Mr. HOLDERER. Yes, sir.

Representative JONAS. What was the basis of that denial?

Mr. HOLDERER. I don't remember the exact wording. It should be in there.

Representative JONAS. In hurriedly glancing through this file, I saw in somebody's letter to somebody a statement that the report of Mr. McCormick which you examined was based upon an examination or investigation of this property several years prior to the filing of this application. I believe it was in 1937.

Mr. HOLDERER. Well, I quote from Mr. Sopp's section in the application dealing with the sampling.

Representative JONAS. I asked you if you do not recall a letter here with reference to this claim which indicates that Mr. McCormick's investigation and his report were based on an examination of this property in 1937.

Mr. HOLDERER. I have seen that, but I don't recall the wording.

Representative JONAS. And at that time this ore had not been outlined?

Mr. HOLDERER. Explored.

Representative JONAS. No; you used the words "blocked out."

Mr. HOLDERER. Yes.

Representative JONAS. Is that true?

Mr. HOLDERER. I don't know. I would have to refer to the letter. I was concerned mainly with the results of the sampling as given on the sample sheets from the assayers.

Representative JONAS. I will ask you to turn to this report of Mr. McCormick, and it is dated July 15, 1937; is it not?

Mr. HOLDERER. That is right.

Representative JONAS. Now, what is this exhibit attached to it? What does he mean when he says "Al Sarena Mine No. 1, 40 feet from portal, 5 feet width cut." What does that mean?

Mr. HOLDERER. That is the width of the vein at which the sample was taken, and those were the gold and silver values and the total values.

Representative JONAS. I ask you to run along that list and tell the committee if that report of Mr. McCormick's does not show that the width of the veins range from 5 feet through 10 feet up to 20 feet. Some of them go as high as 50 feet. Others are 30 feet, and the lowest in width is 5 feet, and you have testified that you gained the information from that report that the width of the veins never exceeded 2 feet.

Mr. HOLDERER. The information shows also that the workings were closed. I know nothing about this information here.

Representative JONAS. Well, you testified that you based the information you were giving the committee this afternoon on an examination of the McCormick report.

Mr. HOLDERER. No; not the McCormick report.

Representative JONAS. The McCormick report and the Sopp report.

Representative HOFFMAN. Yes; he did.

Mr. HOLDERER. I based my information on the assay sheets which were signed by the assayers. As to this information, I have no knowledge as to how accurate this is whatsoever.

Representative HOFFMAN. It is in the file.

Mr. HOLDERER. I did not take this in consideration.

Mr. REDWINE. I think we have the wrong thing, Congressman. That is not the width of the vein. It does not purport to be the width of the vein.

Representative JONAS. He just testified that it is the width of the vein. I asked him.

Mr. HOLDERER. It is the width of the cut. It may or may not be the vein. I do not know.

Representative JONAS. For the record, the table to which I invite the attention of the witness has a number of columns. The column on the left says "sample number." The second column is "location." The third column is "width cut." The next column is—

Mr. HOLDERER. Silver and then gold.

Representative JONAS. The next column is "gold" and then there is "total."

Mr. HOLDERER. Yes.

Representative JONAS. Yes.

Under the column "width cut," the figures would indicate that the vein ranges from 5 feet to 50 feet; does it not?

Mr. HOLDERER. According to this report. I have no knowledge as to how accurate it is.

Representative JONAS. I misunderstood you, then, if I understood you to say earlier this afternoon, in response to Mr. Redwine's question, that among things upon which you based your report, one of those things was the McCormick report which is attached to this file?

Representative HOFFMAN. That is right.

Mr. HOLDERER. I based my information on the general information given in the application to the RFC.

Representative JONAS. Including the McCormick report?

Mr. HOLDERER. No; because I had no knowledge. According to Mr. Sopp's report, these working places as shown on this report are inaccessible and consequently—

Representative JONAS. You mean the Sopp report says that?

Mr. HOLDERER. Yes.

Representative JONAS. May I invite your attention here to——

Mr. HOLDERER. It says:

Approximately 240 feet of the drifts is inaccessible. Values obtained in previous samples were used. Writer knows nothing of the method used in taking these previous samples and cannot answer for their accuracy.

Representative JONAS. When was the Sopp report made? What was its date?

Mr. HOLDERER. Part of it is here.

Representative JONAS. But it is not dated.

Mr. HOLDERER. It is not dated.

Representative JONAS. May 19, 1939. Would that be the date?

Mr. HOLDERER. Well, it says "submitted."

Representative JONAS. It says:

The property covered by this report is known as the Al Sarena Mine, previously known as the Buzzard Mine—

and it is dated May 19, 1939?

Mr. HOLDERER. Yes.

Representative JONAS. In this report Mr. Sopp states that:

Practically the total production of the Al Sarena Mine has been from one vein.

Mr. HOLDERER. Yes.

Representative JONAS. So at that time he was considering only one vein; is that not true?

Mr. HOLDERER. Apparently.

Representative JONAS (reading):

The vein has a strike of north 45 degrees west, and it's practically vertical.

He made this further statement, and I quote:

No definite conclusions can be drawn concerning the variation in the width of the vein, the depth, until more of the vein is exposed on the upper workings.

Where in there does he say the vein is only 2½ feet in the Sopp report?

Mr. HOLDERER. I have seen it in here somewhere. The average width of the vein is about 2½ feet.

Representative JONAS (reading):

However, there is considerable variation of width.

Did he not also state in this report that whereas he only examined one vein there were various outcroppings and other places and offshoots from this vein?

Mr. HOLDERER. And it is on these outcroppings that many of the samples were taken that were sent to Williams and also the Abbot Hanks Co.:

The inside workings were in such condition \* \* \*

Representative JONAS. I am not prepared to examine you on that, because I have not had a chance to see it, but I say the report, as I glance at it, from Mr. Sopp is not as conclusive or is not as adverse as your analysis of it would indicate.

Mr. HOLDERER. Well, I am simply quoting from them when I say "To get a more accurate value for the ore in the vein it would be necessary to sample stocks and drifts now inaccessible."

Representative JONAS. On account of the weather?

Mr. HOLDERER. No; because they were caved or in such bad condition:

Do either some surface work or intersect the drift on the vein. Larger samples taken at closer intervals would give greater accuracy.

He casts considerable doubt on the old sampling.

Representative JONAS. I think you have already testified as to this.

Do you include the eight uncontested claims in your adverse report? You think they were incorrectly granted?

Mr. HOLDERER. I have not taken into consideration the location of the samples. I am looking at the values given on the sample sheets.

Representative JONAS. You mean the overall picture?

Mr. HOLDERER. The overall picture.

Representative JONAS. You are looking at it as a mine, a mass of ground.

Mr. HOLDERER. I am looking at the 12 sample sheets that I had at my disposal. I am looking at those as a whole.

Representative JONAS. Not as individual claims?

Mr. HOLDERER. And not applying them to individual claims. There is not a single sample sheet of the 12 that merits further consideration, in my opinion.

Representative JONAS. You have referred to the other application of the claimant. We have been talking this afternoon so far about the application of the other corporation, the Al Sarena Corp., which was a Delaware corporation, with headquarters in Texas; but the Al Sarena Mines, Inc., the claimant in this hearing, is an Oregon corporation entirely separate and apart.

There was a lease arrangement between the two, and that document is in the file and you examined it. You stated to Mr. Redwine that there is some evidence in this record of another application for \$20,000 made by the claimant.

Will you please turn to those papers and get me the letter denying that application?

Mr. HOLDERER. I have not been concerned with the legal incorporation.

Representative JONAS. I am just talking about the \$20,000 application.

Mr. HOLDERER. I have seen it here.

Representative JONAS. You do not recall what the basis of that denial was, or was it the same as in the other case, that gold and silver were not critical materials?

Mr. HOLDERER. They failed to get one loan, so they tried to work it another way.

Representative JONAS. Which application was filed first?

Mr. HOLDERER. I would have to look at the papers here to get those dates.

Representative JONAS. You would not want the record to show that you contend that these two applicants for loans were identical, would you? You said they tried one way and failed and then tried another way.

Mr. HOLDERER. The principals are probably the same, or nearly identical.

Representative JONAS. May I invite your attention to the lease in here from Al Sarena Mines, Inc., to the Al Sarena Corp., which shows

that the principals have no identity whatever, and list the owners of the stock, and none of the McDonalds are interested in the Al Sarena Corp., but the stockholders are Cecil R. Raden, Laura B. Haden, and Edwin E. Lund.

Mr. HOLDERER. That may well be, but the property is the same.

Representative JONAS. Why are you so interested in this matter that you would try to leave the impression with the committee that the two corporations are identical, or that the principals are the same, when you have nothing to base that on?

Mr. HOLDERER. It is because the applications pertain to the same property.

Representative JONAS. But they were filed by different corporations, by different stockholders, were they not?

Mr. HOLDERER. My only concern is with the virtue of the property, and the property is the same. What different paths may have been taken to request loans, that is beside the point. I am concerned only with the merits of the property.

Representative CHUDOFF. Could I ask a question?

What is the consideration for that lease? Is there any consideration for it? Is it \$1?

Representative JONAS. It starts out and the name of the corporation is Al Sarena Corp. Its principal office is in the State of Delaware. The nature and so forth is given. That is the certificate of incorporation. That is not the lease.

Representative CHUDOFF. There ought to be some rental if there is going to be a lease.

Representative JONAS. There is a copy of the lease here.

Representative HOFFMAN. Just an inquiry. Who is presiding over this committee now?

Representative CHUDOFF (presiding). I am.

Representative HOFFMAN. We lost our Senators.

Representative JONAS. The lease in the files shows that it was executed on the blank day of blank, 19 blank, between Al Sarena Mines, Inc., an Oregon corporation, to the Al Sarena Corp., a Delaware corporation, and it apparently is a royalty lease with \$500 recited as money consideration.

There is a rubber-stamp legend on the lease indicating that the post office address of the Al Sarena Corp. is 2192, Houston, Tex.

Representative CHUDOFF. I wonder if you will look at that document closely and, from what I understand, the Al Sarena Mining Co. was a corporation, and there was either another corporation or individuals.

Who signed the lease for the Al Sarena Mining Co. and who signed the lease for the other corporation?

Representative JONAS. It is right here. The lease shows that it was signed for Al Sarena Mines, Inc., by H. P. McDonald, president, and H. P. McDonald, Jr., secretary, and for Al Sarena Corp. by Cecil R. Haden, president, and Edwin E. Lund, secretary. That is the 20th day of October 1939.

Mr. REDWINE. Mr. Chairman, we have become confused here, I believe, by a couple of loan applications. As a matter of fact, there are three loan applications here. Two of them are for a development loan and one was an operating loan. We have gotten all confused on this thing.

Let me read into the record, if I may, at this time.

Representative CHUDOFF. Mr. Redwine, while you are straightening out the confusion, I would like to know which company made an application for an RFC loan? They must have been incorporated in different States, because certainly no secretary of state would have issued a charter to companies having such close names.

There is an Al Sarena Mining Co., Inc., and there is the Al Sarena Corp.

Representative JONAS. The Texas corporation made the application for \$51,000, about which we have been talking.

There was a lease—

Representative CHUDOFF. The lease had a 5-percent rental on gross receipts for mine operations. If there was not any mining operations, they could not get rental.

Mr. REDWINE. Mr. Chairman, if I may, the file shows that in 1937, Al Sarena Mines, Inc., that is the McDonalds—

Representative CHUDOFF. In what State was that incorporated?

Mr. REDWINE. Incorporated in Oregon. They applied to the RFC for a loan of \$19,642. That loan was never granted and, at the request of the company according to the files, the company requested RFC to hold it in abeyance until they could work out some things. They were going to get some more money.

It went on until 1940 and the Texas group incorporated in Delaware the Al Sarena Corp. That corporation then filed an application for a loan of \$20,000. They first filed for \$51,000. They did not get anywhere with it.

They then filed an application for \$20,000. They did not get anywhere with that.

There were 3 applications filed, 1 by the Al Sarena Mines, Inc., and 2 by the Al Sarena Corp.

Representative CHUDOFF. One by Al Sarena, Inc., and 2 by the Al Sarena Corp.?

Mr. REDWINE. Yes, sir.

Representative CHUDOFF. One for \$50,000?

Mr. REDWINE. Yes, sir. Here is a letter signed by John E. Norton, Chief of the Mining Section, RFC, dated March 14, 1940, and I will read from the second paragraph. It is addressed to Mr. Haden, president of the Al Sarena Corp.:

We have again carefully studied all the data submitted with the applications—

in the plural—

of the Al Sarena Corp. and, based upon these data, it is clearly our opinion that the project does not offer sufficient security for a general mining loan nor do we believe that through the expenditure of a development loan—

that would be the \$20,000—

there would be developed a sufficient quantity of ore of a sufficient value to pay a profit upon mining operations, as required by the act. We wish to advise you that we have given very careful consideration to each report submitted and have not confined our attention to any particular one.

Representative HOFFMAN. Will you add something else for me, Mr. Redwine?

Mr. REDWINE. Yes.

Representative HOFFMAN. One of these loans was applied for in 1937 and had just drifted along without being pressed until 1943 when the file was closed? That is all there was to it?

Mr. REDWINE. That is correct, sir. I think that Mr. Haden, of the Al Sarena Corp., of Houston, Tex., who has been interviewed by the staff, should be called as a witness to testify as to the relationship between his family and the McDonald family, Mr. Chairman.

Representative HOFFMAN. Before you get to that, are you through with this witness?

Mr. Chairman, pardon me. I would like to ask this witness a question before he is dismissed.

Senator NEUBERGER. I think we ought to settle this matter first one at a time. It is agreeable with me. I am just acting chairman in Senator Scott's necessary absence and it is agreeable with me that Mr. Haden be called.

Representative JONAS. Do you propose to bring him all the way from Houston?

Mr. REDWINE. I don't know.

Representative CHUDOFF. I do not suppose we would go all the way to Houston.

Representative JONAS. If you are just asking him whether there is any relationship, maybe we can write him a letter.

Representative CHUDOFF. I have a lot of questions to ask him, now that these corporations came up, that I did not know about. I think I have at least 20 questions to ask him.

Representative JONAS. I would not object—it would not matter if I did—but I do not see now that any relationship between Haden and McDonald would have anything to do with this hearing.

Representative CHUDOFF. You may be right, but I will not know until I ask him.

Representative HOFFMAN. I am in favor of calling everybody except somebody who knows something about it, like the McDonalds and Mr. McCormick.

Senator NEUBERGER. It is my understanding that they will have an opportunity to—

Representative HOFFMAN. If they do not perish by the wayside.

Senator NEUBERGER. I think you will remember that Mr. McCormick had a very extended opportunity to appear before the committee in Portland. He bitterly criticized the committee and the staff. No effort was made to interfere with him. He had his say. He will be given an opportunity again.

Representative HOFFMAN. But never an opportunity to answer what this witness has said nor an opportunity to answer what is in that file.

Representative CHUDOFF. I will see that he gets the opportunity to answer anything this man says.

Representative HOFFMAN. Approximately what month?

Representative CHUDOFF. I do not know. I want to say this to you: If the Republican Members of the United States Senate take 30 minutes by using the starting question and making a speech for 25 minutes we are never going to get through.

Representative HOFFMAN. If you are criticizing me, I agree with you.

Representative CHUDOFF. I am not criticizing you.

Representative HOFFMAN. I want to ask a question.

What is your present occupation, or profession, or avocation?

Mr. HOLDERER. I am a staff engineer on the Subcommittee of Minerals, Materials, and Fuels, subcommittee of the Senate——

Representative HOFFMAN. On the staff?

Mr. HOLDERER. I am the staff engineer.

Representative HOFFMAN. Who else is on this staff with you?

Mr. HOLDERER. I am the only engineer.

Representative HOFFMAN. I asked you who else is on the staff with you.

Mr. HOLDERER. On the staff of the full committee there are a number of others: Mr. Redwine, Mr. Nelson. Those are the other two in the particular room in which I work.

Representative HOFFMAN. So you and Mr. Nelson are working on this together?

Mr. HOLDERER. No. I have never discussed it with Mr. Nelson.

Representative HOFFMAN. No, but Senator Murray asked you to come in and make this report as an expert, and Mr. Redwine is directing the activities of the committee and doing the questioning. You are doing the answering. There is that connection at least; is there not?

Mr. HOLDERER. I happen to be the staff engineer. Mr. Redwine is also——

Representative HOFFMAN. And you happen to be the expert witness.

Mr. HOLDERER. And I happen to be the only mining engineer on the committee. Mr. Redwine is also a member of the committee.

Representative HOFFMAN. And you are thoroughly convinced—and apparently he is—that there is no ground there that might be mined with profit?

Mr. HOLDERER. That is correct.

Representative HOFFMAN. All right. I am glad you agree.

Mr. HOLDERER. That is my opinion; period.

Representative HOFFMAN. And never was on the property?

Mr. HOLDERER. As I have stated before, my opinion is based on the information which I have available.

Representative HOFFMAN. And you never saw any samples from it?

Mr. HOLDERER. I've seen the sample sheets.

Representative HOFFMAN. Are you a lawyer, too?

Mr. HOLDERER. No.

Representative HOFFMAN. Just an engineer?

Mr. HOLDERER. That's all; just a plain engineer.

Representative HOFFMAN. That is all I have.

Representative JONAS. May I ask him a question, please?

Representative HOFFMAN. That is all I have, except to compliment you on the way you two work together.

Mr. HOLDERER. I have endeavored to give plain and straightforward answers.

Representative HOFFMAN. That I am not questioning. I have heard experts before and I admire them and know we are dependent upon them.

Representative JONAS. You said that you looked at the certificate of assay from the Williams Co. That is the Williams Co. assay report?

Mr. HOLDERER. I saw a copy of the Williams certificate, but I don't know what the Secretary based his decision on.

Representative HOFFMAN. Do you ever remember being before the Howard Smith special committee as a witness?

Mr. HOLDERER. I never did appear as a witness.

Representative HOFFMAN. You never did appear?

Mr. HOLDERER. No.

Representative HOFFMAN. With the War Labor Board members?

Mr. HOLDERER. No.

Representative HOFFMAN. To testify?

Mr. HOLDERER. I was in the Copper Division. We never appeared before any committee; or at least I did not.

Representative HOFFMAN. As you recall?

Mr. HOLDERER. I recall that I did not.

Representative HOFFMAN. You are an expert, as I understand it?

Mr. HOLDERER. I am a mining engineer. When you say an expert, an expert of what?

Representative HOFFMAN. That is what I was wondering.

Mr. HOLDERER. I am an expert on mines and mining.

Representative HOFFMAN. You are here to testify that the reasonably prudent man would not invest any money in this thing?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Did you ever operate a mine?

Mr. HOLDERER. I have.

Representative HOFFMAN. Where?

Mr. HOLDERER. Practically in every part of the Western Hemisphere.

Representative HOFFMAN. It was a mine that you owned yourself?

Mr. HOLDERER. I have owned 1 or 2.

Representative HOFFMAN. Well, did you make or lose on them.

Mr. HOLDERER. On one I lost.

Representative HOFFMAN. Were you reasonably prudent when you went into that one?

Mr. HOLDERER. I was reasonably prudent when I started.

Representative HOFFMAN. You thought you were when you went in.

Mr. HOLDERER. When I went in. As soon as I started losing, I called it quits and got out.

Representative HOFFMAN. You have owned two mines, as I understand it; is that right?

Mr. HOLDERER. That is right.

Representative HOFFMAN. And you made money on the other one?

Mr. HOLDERER. A little.

Representative HOFFMAN. What percentage on your investment, let us say?

Mr. HOLDERER. Oh, probably 20 or 30 percent.

Representative HOFFMAN. Over what period; a year?

Mr. HOLDERER. A couple of years.

Representative HOFFMAN. So that in each year you think you made 20 or 30 percent on it?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Then what happened?

Mr. HOLDERER. Well, the ore body played out and that was the end of it.

Representative HOFFMAN. What were the net results? How much did you put in and how much did you get out? Did you balance your budget, in other words?

Mr. HOLDERER. Scarcely, when I took into consideration the value of my time.

Representative HOFFMAN. So you were not a reasonably prudent man on that one, were you?

Mr. HOLDERER. No. That is right.

Representative HOFFMAN. Did you have a patent on those mining claims?

Mr. HOLDERER. I did on one batch, on the batch that I lost money on. In the other, I was in a partnership.

Representative HOFFMAN. Somebody in the Department then made a mistake in letting you have a patent, did they not?

Mr. HOLDERER. As to that, I wouldn't say. I don't know.

Representative HOFFMAN. Mr. Redwine asked you about this timber. It seems that somebody made an application to the RFC and said the timber was worth \$80,000.

I noticed that you noticed in the testimony that Mr. Leavengood said it was worth \$77,000 at a certain time. The company only had \$3,000 more than he did. That is about right?

Mr. HOLDERER. The only figure I have is the figure given in this application to the RFC.

Representative HOFFMAN. That was \$80,000?

Mr. HOLDERER. That was \$80,000.

Representative HOFFMAN. And there being \$80,000 on there, did you consider in passing on the validity or the desirability of the RFC making the loan that the company was claiming that it had \$80,000 worth of timber?

Mr. HOLDERER. They claimed that as one of their assets.

Representative HOFFMAN. Was it not?

Mr. HOLDERER. They had no ownership to that timber until the patent was granted.

Representative HOFFMAN. But did you not have a right to use any and all of it, every last board foot of it if they use it in their mining operations?

Mr. HOLDERER. That is true. They could use that timber at any time.

Representative HOFFMAN. But you are still critical of their putting that in.

Mr. HOLDERER. As an asset.

Representative HOFFMAN. It was a potential asset. It was there on the ground and they had a right to use it, did they not, if they needed it in the mining?

Mr. HOLDERER. There is a difference between an asset and a potential asset.

Representative HOFFMAN. Oh. I was just thinking of that paragraph on page 15 of Hattan's report:

While the Forest Service has no accurate cruise of the timber embraced within the area of all the claims, the Oregon Mine Handbook, page 197, states that approximately 12 million board feet of timber is estimated to be available and on the mining claim. If the mine is developed as contemplated, a large amount of timber will be necessary. In fact, it might well be to the advantage of the company to set up a sawmill on the property and produce the timber which will be needed in such a large scale operation.

There is, of course, nothing to prevent the company after they get a patent cutting all of it.

Mr. REDWINE. In his report, please, Mr. Holderer, the McCormick report, will you read the paragraph relating to the amount of timber on those claims as set forth by Mr. McCormick?

Mr. HOLDERER. I am quoting:

It is estimated that there are 20 million feet of excellent fir and pine timber on the claim.

Mr. REDWINE. Will you now refer to that portion of the report which the company designated as a pro forma balance sheet?

Mr. HOLDERER. The company submitted a pro forma balance sheet on January 23, 1940. They submitted a list of their assets.

Mr. REDWINE. Will you read out their assets as listed by them?

Mr. HOLDERER (reading):

Cash, \$903; accounts receivable due from smelter, approximately \$2,250; mining claims, approximately 400 acres in 23 claims, \$80,000; timber resources, approximately 20 million feet of timber on said claims, \$80,000; ore blocked out, 27,595 tons at \$260,070.

Representative JONAS. Read that last one again, please.

Mr. HOLDERER (reading):

Ore blocked out, 27,595 ton at \$260,070.

Then their capital assets are given as:

Machinery and tools, old, \$26,205; new machinery and tools, \$10,659; mill construction, \$10,316.50; mine development, \$54,286.07—

to a total of \$101,467.07, less depreciation reserves of \$3,420.

Mr. REDWINE. That is all right, Mr. Holderer.

Mr. HOLDERER. That gives a total of \$521,270.07 as their assets.

Mr. REDWINE. While we are at it, let us give the liabilities, also. That is very short.

Mr. HOLDERER. "Liabilities, contracts payable, due on 10 mining claims, \$35,000 less credit due, \$4,000." That is a total of \$31,900. And the capital stock, 10,000 shares, no par value listed, at \$489,370.07.

Mr. REDWINE. Mr. Holderer, can you tell the committee as to the mining claims valued at \$80,000; does that indicate, from your experience in reading such applications, the value that they place on the mining claims without the timber and without any machinery?

Mr. HOLDERER. That is the way it is stated in their pro forma report. They put down a figure of \$80,000 for the mining claims, \$80,000 for the timber.

Mr. REDWINE. Mr. Holderer, you are familiar with the mining laws, are you not, and how you go about patenting mining claims?

Mr. HOLDERER. That is true.

Representative HOFFMAN. I understood he asked if he was familiar with both.

Mr. HOLDERER. The mining law.

Representative HOFFMAN. And you said you were?

Mr. HOLDERER. I did.

Mr. REDWINE. Mr. Holderer, is it not true that this company back in 1940 was claiming that it, as a part of its assets, had \$80,000 worth of timber to which it had no more title than a snowman?

Mr. HOLDERER. That is the figure they put down in their pro forma balance sheet.

Mr. REDWINE. But the land had not gone to patent?

Mr. HOLDERER. That is correct.

Mr. REDWINE. The timber was not theirs?

Mr. HOLDERER. I would say it was not.

Mr. REDWINE. Yet they were claiming as an asset \$80,000 worth of timber?

Mr. HOLDERER. That is right.

Mr. REDWINE. And they said it had 20 million feet on it?

Mr. HOLDERER. That is correct.

Representative JONAS. May I ask Mr. Redwine something?

I do not believe the witness has said who made that application.

Will you let that be established?

Mr. REDWINE. I am going into that, if I may, right now.

Now, in your examination of these RFC files, applications for loans, I believe that you find there that the Al Sarena Mines, Inc., filed an application in 1936, was it not?

Mr. HOLDERER. I think it was 1936. I believe so, sir.

Mr. REDWINE. For \$19,642, I believe that was, was it not?

Mr. HOLDERER. That is correct.

Mr. REDWINE. Then in 1940, this application from which you are reading now was filed by Al Sarena Corp., was it not?

Mr. HOLDERER. I would have to check that to get that exactly. It was filed by Cecil R. Haden, president, Al Sarena Corp.

Mr. REDWINE. And attached to that application is a copy of the lease agreement between Al Sarena Mines, Inc., and Al Sarena Corp., is it not?

Mr. HOLDERER. That is correct.

Mr. REDWINE. The report that we are talking about as to the 20 million board-feet of timber was signed D. Ford McCormick, was it not?

Mr. HOLDERER. That is right.

Mr. REDWINE. Now, going back to this pro forma balance sheet, Mr. Holderer, as to this ore blocked out, \$260,070 worth, will you discuss that?

Read your report on this and discuss that fully, please.

Representative JONAS. Do we have copies of the report?

Mr. REDWINE. We have only one copy. I will have some made.

Representative HOFFMAN. Is that the report to Senator Murray?

Mr. REDWINE. Yes, sir.

Representative HOFFMAN. Mr. Chairman, I want to object on the record to the receipt of this report because it is clearly a matter of hearsay.

As I understand the situation, the witness does not contend that he has any personal knowledge. He is basing his report upon the documents which he finds in the file and, of course, the only question here as a matter of law is whether a reasonably prudent man would have proceeded under this showing to attempt to mine the claim.

Mr. REDWINE. Mr. Chairman.

Representative HOFFMAN. Unless he is an expert and qualified on that.

Mr. REDWINE. Mr. Chairman, Mr. Holderer has testified that for several years in Government service it was his duty to analyze such documents as he has analyzed here and to this in answer to a directive given to him by Senator Murray, chairman of the committee. He is certainly qualified as being competent, having had a great deal of experience in Government service in doing this same thing.

Representative HOFFMAN. Mr. Chairman, I can anticipate the ruling, but I want to put on the record that counsel's statements would prove that it is hearsay and would not be received in any court.

Mr. REDWINE. Mr. Chairman, let me say this: That this man's hearsay, if that is what you want to call it, his analysis of such reports as this determined whether the Government during the war years loaned millions of dollars or turned down applications for loans when the application itself showed that it did not deserve a loan, that it did not offer sufficient security to the Government to make a loan.

Representative CHUDOFF. Is that the application by the Al Sarena Mining Co. for an RFC loan from the RFC?

Mr. REDWINE. Yes, sir.

Representative CHUDOFF. That certain statements were attached and certain questions, and there is a paragraph at the end of the application making it a criminal Federal offense to make false statements?

Mr. REDWINE. Yes, sir.

Representative CHUDOFF. This witness is a former employee of the RFC?

Mr. REDWINE. No, sir; but he did this very same kind of work in the DMA and War Production Board throughout the war. He has qualified as an expert.

Representative CHUDOFF. He is an expert in mineral analysis?

Mr. REDWINE. Yes, sir.

Representative JONAS. However, the record shows, Mr. Chudoff, that this application was not filed by the claimants to the patent but by a different corporation.

Representative CHUDOFF. Actually, it was filed by a corporation from which the Al Sarena Mining Co. succeeded in buying the assets of the other corporation.

Representative JONAS. It was a different corporation from the Al Sarena Mines, Inc., the applicants for the patent.

Representative CHUDOFF. But it covered the same geographical territory and everything else, and anything alleged as to the value of the ore in that application would cover the value of the ore in the Al Sarena Corp.

Mr. REDWINE. Mr. Chairman, I would like to suggest that this has nothing to do with the qualifications of this witness as an expert to analyze and interpret this loan application.

Representative HOFFMAN. Mr. Chairman, I do not mind helping counsel out.

Why do you not ask him, assuming those facts to be true, and get his opinion?

Senator NEUBERGER. Mr. Chairman, speaking of hearsay, I think it ought to be noted for the record that we have had testimony that the Interior Department officially granted final patent to these lands based on a telephone call from a subordinate Government employee.

Representative JONAS. We have not had that testimony and will not have it until Mr. Davis gets on the stand.

Senator NEUBERGER. I think Mr. Appling testified.

Representative JONAS. He testified to a conversation, but we do not yet know whether that was the basis on which the decision was made.

Senator NEUBERGER. We will have Mr. Davis on Tuesday, I believe the chairman said.

Mr. REDWINE. Will you read your report first and then go into the matter?

Mr. HOLDERER. You wish me to read the part having to do with the sampling, or the entire report?

Mr. REDWINE. The entire report, please.

Mr. HOLDERER (reading):

The opinions expressed in this report are based on information obtained from the hearings on this case in Portland, Oreg., November 25, 1955, Washington, D. C., January 10, 1956, and information supplied by the company to the Reconstruction Finance Corporation when an application for a loan was made on January 23, 1940. The loan was denied by RFC.

In the company's application to the RFC, there was a section on sampling which was signed by George P. Sopp. The following statements are taken from this section of the application, and I quote:

"Sampling, as carried on at Al Sarena Mine since the beginning of February, has been greatly hampered by inaccessible drifts, caved stopes, and weak timbered ground.

"Large samples could not be taken without a considerable outlay for equipment.

"No sampling on the vein could be done between these two levels, No. 1 and No. 2 tunnel levels, and therefore too much reliance should not be placed on the value obtained for this block, No. 2 block, of ore. The number of samples taken on this block is small compared to the size of the block.

"Approximately 250 feet of the drift in No. 1 tunnel is inaccessible. Values obtained in previous sampling were used. The writer knows nothing of the method used in taking these previous samples and cannot answer for their accuracy.

"Valuation of an ore body based on such a small number of samples cannot be considered as extremely accurate especially when these samples are small.

"To get a more accurate value for the ore on the vein, it would be necessary to sample stopes and drifts now inaccessible, to do either some surface work or intersect and drift on the vein from No. 3 tunnel. Larger samples taken at closer intervals would give greater accuracy."

My own opinion follows:

Reserves—From the above statements quoted from Mr. Sopp's report, no reliance can be placed upon the company's estimate of 24,917 tons of ore reserves valued at \$232,000. A good deal of work has been done on the property, but much of it in barren ground.

Reference is made to the possibility of this being a very large low-grade deposit which could be mined cheaply. In fact, a reference is made to the Alaska-Juneau mine, but no diamond or churn drilling was ever done on the property. Not by the wildest stretch of imagination could a deposit of this character with narrow veins be compared to property like Alaska-Juneau, which for many years paid dividends on ore averaging a lot less than \$1 per ton, but it must be remembered that 10,000 tons a day were mined.

All of the great copper mines in this country in Arizona, New Mexico, Montana and Nevada are mining ore where recovery is less than 1 percent of copper per ton. In the case of Kennecott's property at Bingham Canyon, 100,000 tons per day are mined with a recovery of about 0.75 percent per ton, and at the other mines many thousands of tons are mined per day.

In the attached pages there are figures taken from assay sheets which are exhibits in the hearings. It is my opinion that from the information available, it would be most difficult for this property to produce 200 tons a day at most, and even 100 tons a day would be difficult because of the small working faces.

In the report to the RFC an operating cost of \$3 per ton is given. Mine labor is quoted at \$4.50 per shift with other labor at comparable amount. Many items in figuring the cost are omitted, indicating a complete unfamiliarity with the mining operation.

The cost of mine labor in the Coeur d'Alene mining district of Idaho, which is the nearest mining district of good size to this property, for the past 3 years has been \$15.94 per shift, to which must be added \$1.88 per shift for nonwage payments; such as compensation, insurance, social security, vacation pay, et cetera, bringing the total pay to almost \$18.

Production in small mines varies from  $1\frac{1}{2}$  to  $2\frac{1}{2}$  tons per shift per man for the overall total of men employed. An average would be 2 tons per man-shift. Thus it can be seen that for labor alone the charge would be a minimum of \$9 per ton, and in mine operations generally labor can be considered to be 45 percent of the total cost of mining, which brings the total cost of mining not far from \$16 or \$17 per ton. Another \$5 per ton would be a fair figure for milling cost and there is still no provision for amortization, taxes, and numerous other overhead expenses.

It is my opinion that a property of this kind could not be operated profitably with values at less than \$20 per ton. The property certainly could not be operated now at a profit, nor do I believe that it could ever have been operated at a profit, even in the days when labor was said to be \$4.70 per shift, which it has not been for many years.

Mr. REDWINE. Will you stop at that point?

Representative HOFFMAN. May we have a copy of that?

Mr. REDWINE. We are having it prepared right now.

Representative HOFFMAN. I think we should have copies so that we could be prepared to look them over before the witness is excused.

Senator SCOTT. He is getting copies for you.

Representative HOFFMAN. I know that, but it is after the witness is on the stand and has testified. What opportunity do I have to prepare to question the witness?

I do not know what the Senate rule is, but under the rule of the House, we should have that at least 24 hours before the witness takes the stand. That has been the procedure all along, to deny us any look at what is to come before the committee, and I want to protest. It is not fair to us.

Representative CHUDOFF. Mr. Hoffman, so that there is no wrong impression by anybody listening or by members of the press, I do not have a copy either and have not seen a copy.

Representative HOFFMAN. That has not a single thing to do with the rule.

Representative CHUDOFF. I understand, but I do not want you to insinuate that, as chairman of the House subcommittee, I have a copy and you do not. Sometimes you have copies when we do not.

Representative HOFFMAN. When you were in the Virgin Islands there, I got a copy of something through the chairman or the general counsel.

Representative CHUDOFF. We try to give you every copy of everything we have.

Representative HOFFMAN. Yes, I want to compliment you on every occasion.

Senator SCOTT. As far as I know, the chairman did not know that there was such copy available.

Mr. REDWINE. Mr. Holderer, let us go back to something that is not copied except in the RFC report. Will you discuss this ore body for us while we are waiting for these copies of your report?

Mr. HOLDERER. From the information given, there are probably four veins, all of them of extremely narrow width.

Mr. REDWINE. What do you mean by extremely narrow width, Mr. Holderer?

Mr. HOLDERER. Two feet, and it would be impossible to mine any reasonable tonnage on a vein as narrow as that without getting a great deal of waste rock which would still further cut the value of the ore per ton. So that disposes of the idea that this is a gigantic body that might be mined on a huge scale.

Mr. REDWINE. It has very narrow veins?

Mr. HOLDERER. Very narrow veins. They would have to really be put to it to secure 100 tons a day, day in and day out, and month in and month out.

Representative JONAS. Mr. Chairman, would you have him identify the document from which he gets that information so that I can see it later?

Mr. REDWINE. Will you do that, Mr. Holderer?

Mr. HOLDERER. The part that I just finished reading is—

Representative JONAS. I mean the part upon which you base this comment that there were only veins of a very narrow width.

Mr. REDWINE. It is mentioned in both the Sopp and McCormick reports; is that right?

Mr. HOLDERER. Yes, sir.

Mr. CORNUM. May I interject a question, sir?

Has anyone told you what to put in that report, or has anyone coached you?

Mr. HOLDERER. I have taken my instructions from the letter that I received from the chairman of the committee.

Mr. CORNUM. Has anyone discussed the nature of your report, what you were going to say?

Mr. HOLDERER. No. The opinion I am giving is my own opinion, uninfluenced by conversations with anyone else.

Mr. CORNUM. Thank you.

Mr. REDWINE. And all from Government records and the transcript of the Portland hearing which reported the Hattan and Sanborn testimony?

Mr. HOLDERER. I only looked at two transcripts, the one from Portland, and the one from Washington on January 10. I did not read those transcripts. All that I took out of them was the information from the assay sheets. That is all that I took from those two transcripts.

Senator SCOTT. Did you show this report or discuss it with anyone before you came up here?

Mr. HOLDERER. No; I did not. I gave a copy of the report to Mr. Redwine as I came up.

Representative JONAS. Mr. Chairman, may I ask him a question before we get away from that point?

Senator SCOTT. Yes.

Representative JONAS. Do the comments you have just made about the veins and their width, and so forth, apply to the eight uncontested claims, the ones that the Forest Service admits are sufficiently mineralized?

Mr. HOLDERER. After looking at the assay sheets, I concluded that they were so completely bad that any further examination of the problem was useless.

Representative JONAS. What do you mean?

Mr. HOLDERER. If the assays are no good, then the whole thing is not good as far as an opinion is concerned.

Representative JONAS. So the opinion you now express that the property was absolutely without any economic value as a mine would apply to the eight claims that the Forest Service agreed to?

Mr. HOLDERER. It would apply to everything that was supposed to be mineralized.

Representative JONAS. Thank you, sir.

Representative HOFFMAN. May I ask him this question, in view of what you said: Will you repeat what you said—that if the assays were not good, then what happened?

Mr. HOLDERER. If the assays were no good, any further discussion of the problem as to its economic value would be entirely useless.

Representative HOFFMAN. And your opinion would be useless?

Mr. HOLDERER. Absolutely.

Mr. REDWINE. Mr. Holderer, will you go on with the report that you have submitted, taking up what you have prepared in respect to assays and going slowly when you get to that point where you identify what set of assays you are talking about?

Mr. HOLDERER. As a start, there were 12 assay sheets, containing 142 assays. This is a little résumé that does not appear on the typed copies. I made it up afterward.

There was 1 assay that went \$7.70 for the total gold and silver: 1 at \$4.85; 1 at \$3.70; 1 at \$2.25; 1 at \$2.20; and all the others were under \$2. A great many of them were simply "trace" or "zero." That is a quick rundown on the entire lot.

Now, taking the sheets separately, on page 51 in the Portland transcript, or the sheet that is given as opposite page 51, there are 23 assays, and those were given to the Annes Engineering Co., Grants Pass, and there is no date on the assay report. It was presented by Elton M. Hattan.

Page 58, assay report of Abbot A. Hanks, August 10, 1949. There were 29 assays presented by Hanks.

Now, this batch of assays is similar to the one that was handed to the Annes Co. for assaying. They are practically identical:

Gold, 1 assay ran \$3.32; 2 ran at 17 cents; 1 at 35 cents; 2 at 70 cents; 1 at "zero"; 1 at \$6.65; and 1 at \$7.70; and the balance were "trace."

Silver, 1 assay at 34 cents; 1 at 5 cents; 1 at \$1.64; 1 at 27 cents; and the balance were "zero" or "trace."

Page 109, report of R. N. Appling, Jr., dated January 2, 1954. This is the same set that was submitted to A. W. Williams Inspection Co., which appears on page 294 of the Washington transcript:

Gold, 1 assay ran \$4.20; 1 at \$3.50; 1 at \$2.80; 5 at \$2.10; 1 at \$2.45; and 1 at 70 cents; and 18 ran between \$1.05 and \$1.75.

There were 24 silver assays, which ran between 5 cents and 65 cents per ton.

Total values, 1 assay at \$4.85 per ton; 1 at \$3.95; and the balance ran between 79 cents and \$2.85.

Now, this comes to page 263 from the Washington transcript, January 10, reports from the A. W. Williams Inspection Co., dated November 18, 1949, 15 assays:

One ran \$2.25 per ton, gold and silver. The balance were between 90 cents and \$1.86. Ten are "zero."

Page 267 of the Washington transcript, and these are assays from the Williams Co.:

September 27, 1949, 7 assays, the highest of which was \$1.86.

Page 278, October 14, 1949, 8 assays, 6 of which ran "trace" or "zero." One ran 98 cents; 1 ran \$2.20, total value.

Page 281, Washington transcript, 13 assays. The highest was \$1.84 and 5 were only "trace."

Page 285, one was "zero."

Page 290, October 7, 1953, 18 assays: 7 assays were "zero"; 6 were "trace"; 5 were \$1.80; and 1 was 5 cents.

Page 291, October 9, 1953, 10 assays: 1 assay was "zero"; 1 was "trace"; and 8 were \$1.80.

Page 292, October 14, 1953, 4 assays, 2 of which were "zero" and 2 were \$3.70.

Page 294, November 4, 1953, six assays: 1 assay was \$1.14; 1, \$1.06; 1 at 53 cents; 2 at 18 cents, and 1 at 27 cents.

Page 294, October 29, 1953, three assays, all of which were "zero."

Rarely have I seen as poor a batch of assays as that.

Mr. REDWINE. Mr. Holderer, in looking over your recap of all the assays that have come into the record, I find 1 here of \$6.65 and 1 of \$7.70, and no other over \$5. Now, the most favorable set of assays, the set of assays showing the greatest values, is the assays of the A. W. Williams Co., 28 of them upon which this decision was rendered; is that correct?

Mr. HOLDERER. I don't know on what the decision was rendered. There was one here.

Mr. REDWINE. Well, the ones that show in the Appling report. Let us reword that.

Mr. HOLDERER. Yes; there was 1 that had \$7.70.

Mr. REDWINE. The \$7.70 was not in the Appling report, was it?

Mr. HOLDERER. In the Hanks.

Mr. REDWINE. Going to the Appling report, the assays that showed in there, of all the sets of assays that you have seen, the highest values are in that Williams Inspection Co. report that shows in the Appling report; is that correct?

Mr. HOLDERER. That is correct.

Mr. REDWINE. And none of those exceed what?

Mr. HOLDERER. \$4.20 was high in that batch.

Mr. REDWINE. Correct me if I am wrong in this. Yet you testified a few minutes ago that, from your examination of the engineers' report on this property and all that, you could not possibly operate this mine with values of less than \$20; is that correct?

Mr. HOLDERER. That is correct.

Mr. REDWINE. Mr. Coburn, would you like to ask some questions at this time?

Mr. COBURN. No, sir.

Mr. REDWINE. Mr. Holderer, I would like to ask you a hypothetical question. No; I do not believe I will.

Mr. HOLDERER. I might add that, after having summarized these assays, I made no further attempt to discuss the economics of the mine because there are none.

Mr. REDWINE. There are just no economics there?

Mr. HOLDERER. The economics is zero.

Mr. REDWINE. That is all I have of this witness, Mr. Chairman.

Representative HOFFMAN. May I ask a few questions?

Senator SCOTT. Yes.

Representative HOFFMAN. You said you were a member of the War Production Board. Over what period?

Mr. HOLDERER. Practically throughout, from 1942 to late 1945; about 3 years.

Representative HOFFMAN. Do you ever remember being before the Howard Smith special committee as a witness?

Mr. HOLDERER. I never did appear as a witness.

Representative HOFFMAN. You never did appear?

Mr. HOLDERER. No.

Representative HOFFMAN. With the War Labor Board members?

Mr. HOLDERER. No.

Representative HOFFMAN. To testify?

Mr. HOLDERER. I was in the Copper Division. We never appeared before any committee; or at least I did not.

Representative HOFFMAN. As you recall?

Mr. HOLDERER. I recall that I did not.

Representative HOFFMAN. You are an expert, as I understand it?

Mr. HOLDERER. I am a mining engineer. When you say an expert, an expert of what?

Representative HOFFMAN. That is what I was wondering.

Mr. HOLDERER. I am an expert on mines and mining.

Representative HOFFMAN. You are here to testify that the reasonably prudent man would not invest any money in this thing?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Did you ever operate a mine?

Mr. HOLDERER. I have.

Representative HOFFMAN. Where?

Mr. HOLDERER. Practically in every part of the Western Hemisphere.

Representative HOFFMAN. It was a mine that you owned yourself?

Mr. HOLDERER. I have owned 1 or 2.

Representative HOFFMAN. Well, did you make or lose on them.

Mr. HOLDERER. On one I lost.

Representative HOFFMAN. Were you reasonably prudent when you went into that one?

Mr. HOLDERER. I was reasonably prudent when I started.

Representative HOFFMAN. You thought you were when you went in.

Mr. HOLDERER. When I went in. As soon as I started losing, I called it quits and got out.

Representative HOFFMAN. You have owned two mines, as I understand it; is that right?

Mr. HOLDERER. That is right.

Representative HOFFMAN. And you made money on the other one?

Mr. HOLDERER. A little.

Representative HOFFMAN. What percentage on your investment, let us say?

Mr. HOLDERER. Oh, probably 20 or 30 percent.

Representative HOFFMAN. Over what period; a year?

Mr. HOLDERER. A couple of years.

Representative HOFFMAN. So that in each year you think you made 20 or 30 percent on it?

Mr. HOLDERER. That is right.

Representative HOFFMAN. Then what happened?

Mr. HOLDERER. Well, the ore body played out and that was the end of it.

Representative HOFFMAN. What were the net results? How much did you put in and how much did you get out? Did you balance your budget, in other words?

Mr. HOLDERER. Scarcely, when I took into consideration the value of my time.

Representative HOFFMAN. So you were not a reasonably prudent man on that one, were you?

Mr. HOLDERER. No. That is right.

Representative HOFFMAN. Did you have a patent on those mining claims?

Mr. HOLDERER. I did on one batch, on the batch that I lost money on. In the other, I was in a partnership.

Representative HOFFMAN. Somebody in the Department then made a mistake in letting you have a patent, did they not?

Mr. HOLDERER. As to that, I wouldn't say. I don't know.

Representative HOFFMAN. Mr. Redwine asked you about this timber. It seems that somebody made an application to the RFC and said the timber was worth \$80,000.

I noticed that you noticed in the testimony that Mr. Leavengood said it was worth \$77,000 at a certain time. The company only had \$3,000 more than he did. That is about right?

Mr. HOLDERER. The only figure I have is the figure given in this application to the RFC.

Representative HOFFMAN. That was \$80,000?

Mr. HOLDERER. That was \$80,000.

Representative HOFFMAN. And there being \$80,000 on there, did you consider in passing on the validity or the desirability of the RFC making the loan that the company was claiming that it had \$80,000 worth of timber?

Mr. HOLDERER. They claimed that as one of their assets.

Representative HOFFMAN. Was it not?

Mr. HOLDERER. They had no ownership to that timber until the patent was granted.

Representative HOFFMAN. But did you not have a right to use any and all of it, every last board foot of it if they use it in their mining operations?

Mr. HOLDERER. That is true. They could use that timber at any time.

Representative HOFFMAN. But you are still critical of their putting that in.

Mr. HOLDERER. As an asset.

Representative HOFFMAN. It was a potential asset. It was there on the ground and they had a right to use it, did they not, if they needed it in the mining?

Mr. HOLDERER. There is a difference between an asset and a potential asset.

Representative HOFFMAN. Oh. I was just thinking of that paragraph on page 15 of Hattan's report:

While the Forest Service has no accurate cruise of the timber embraced within the area of all the claims, the Oregon Mine Handbook, page 197, states that approximately 12 million board feet of timber is estimated to be available and on the mining claim. If the mine is developed as contemplated, a large amount of timber will be necessary. In fact, it might well be to the advantage of the company to set up a sawmill on the property and produce the timber which will be needed in such a large scale operation.

There is, of course, nothing to prevent the company after they get a patent cutting all of it.

It would not have been unusual if they had tried to cut the timber and used it in opening the mine, would it?

Mr. HOLDERER. Well, there obviously was no prospect of ever mining the property for mineral wealth.

Representative HOFFMAN. How do you know what the McDonalds had?

Mr. HOLDERER. There was nothing on that property that was—

Representative HOFFMAN. Any good?

Mr. HOLDERER. That was minable at a profit.

Representative HOFFMAN. That is what you think. That is your opinion as an expert.

Mr. HOLDERER. Based on the information at my disposal.

Representative HOFFMAN. That is what?

Mr. HOLDERER. Their application to the RFC.

Representative HOFFMAN. Based on that, but do you know anything about the taking of the samples?

Mr. HOLDERER. I have no knowledge of the competency or the personal integrity of anyone who did any sampling.

Representative HOFFMAN. Or how they were taken?

Mr. HOLDERER. Or how they were taken.

Representative HOFFMAN. Or whether or not they were protected.

Mr. HOLDERER. That is right.

Representative HOFFMAN. And if they were not properly taken and were not properly protected, your opinion does not amount to anything? Did you not so testify?

Mr. HOLDERER. Wait a minute. My opinion is based on the assay sheets that were at my disposal.

Representative HOFFMAN. And the question is: If the samples were not properly taken, if the assay was not properly conducted, your opinion does not amount to anything?

Mr. HOLDERER. If the assay sheets themselves were worth nothing.

Representative HOFFMAN. Just answer my question. You are an expert. Come on.

Mr. HOLDERER. If the assay sheets are worth nothing, consequently my opinion would be expressed as the whole thing as worth nothing.

Representative HOFFMAN. Would it make any difference in your opinion as an expert mining engineer if the samples were not protected and guarded all the time?

Mr. HOLDERER. If they were not protected and guarded properly. I would say the assays would be highly susceptible to suspicion.

Representative HOFFMAN. You would not use the conclusion to base an opinion on unless the record showed that the sample was properly protected by the man who took it, or somebody in between, until it got to the assay office, would you?

Mr. HOLDERER. I certainly would not render a favorable opinion. I would ask to be excused from rendering any opinion if I had reason to believe that the assays had been tampered with.

Representative HOFFMAN. Well, the same would hold true unless it appeared affirmatively that the sample had been properly guarded, would it not?

Mr. HOLDERER. I know nothing about how the samples were taken or how they were guarded.

Representative HOFFMAN. Sure, and you do not know anything about the competence of the fellow who made the assay, do you?

Mr. HOLDERER. My information: —

Representative HOFFMAN. Wait a minute. Answer that question.

Mr. HOLDERER. I know nothing about the competence of anyone who took them, but in Mr. Sopp's report, he questions that very thing.

Representative HOFFMAN. What you do is accept the conclusions that have been given to you there where you were asked to render an opinion.

Mr. HOLDERER. My conclusions are based on the application of the company who applied for a loan.

Representative HOFFMAN. Wait a minute. You also brought in the samples and the assays. Your opinion is also based on that, is it not?

Mr. HOLDERER. They give some of those, too, yes.

Representative HOFFMAN. Yes.

Mr. HOLDERER. It goes without saying that, when an applicant is asking for a loan, he is putting his best foot forward. He is not going to say anything that might be derogatory toward his request.

Representative HOFFMAN. And, as I understand your testimony, if everything in the application was true, it still would not work out as a mine?

Mr. HOLDERER. That is my opinion.

Representative HOFFMAN. And it is also your opinion as an expert that if everything that was claimed by these assays were true, even the most favorable, that would not work out as a mine?

Mr. HOLDERER. That is my opinion.

Representative HOFFMAN. Yes. Now, you said you were familiar with the mining law. Where is the provision in the mining law or in the regulations of the Department governing the granting of patents on mines that requires any percentage of mineral of any kind in order to justify a patent?

Now, I am asking about the statute, or in the regulation?

Mr. HOLDERER. I cannot point to any statute that I know of.

Representative HOFFMAN. There is no statutory requirement anywhere which calls for any degree of mineralization before patent is granted, is there?

Mr. HOLDERER. Not that I know of.

Representative HOFFMAN. And there is no regulation of the Department that calls for a specified degree of mineralization, is there?

Mr. HOLDERER. Not that I know of.

Representative HOFFMAN. And the only place that we ever find anything about this judgment of the ordinarily prudent individual being satisfied before he puts his money into it comes from decisions of the courts; does it?

Mr. HOLDERER. So far as I know.

Representative HOFFMAN. That is where that comes in?

Mr. HOLDERER. So far as I know.

Representative HOFFMAN. That is where that comes in. That is some court law that has been written.

You never were on this property?

Mr. HOLDERER. I have never seen it.

Representative HOFFMAN. This is a repetition. All you are going by is—

Mr. HOLDERER. The information in the RFC application.

Mr. REDWINE. Mr. Holderer, the RFC did turn the applications down, this same data that you have referred to?

Mr. HOLDERER. They denied the application.

Representative HOFFMAN. They turned down a good many applications and made some bad loans, too; did they not?

Mr. HOLDERER. On the average I would say their batting average was very high for accepting good ones.

Representative HOFFMAN. Do you know what I asked you?

Mr. HOLDERER. You said they turned down a good many.

Representative HOFFMAN. Did you answer it?

Mr. HOLDERER. They did turn down a good many, yes.

Representative HOFFMAN. And some of them were good, or don't you know?

Mr. HOLDERER. I don't know. I never worked for the RFC.

Representative HOFFMAN. They had certain groups like Kaiser. They gave him a lot of money; did they not?

Mr. HOLDERER. I don't know what they gave him. I have no knowledge of that.

Representative HOFFMAN. You have no knowledge of the Kaiser application?

Mr. HOLDERER. I never worked for the RFC so I cannot answer that.

Representative HOFFMAN. You never worked for the RFC?

Mr. HOLDERER. No.

Representative HOFFMAN. You are just taking their file. I see. What is the standard for granting an RFC loan as to mineralization? Is there any?

Mr. HOLDERER. I don't know. Their loans, one of the requirements was that loans were to be limited to critical minerals, and gold and silver are not critical minerals.

Representative HOFFMAN. At that time?

Mr. HOLDERER. That is right.

Representative HOFFMAN. So you did not take any gold and silver into consideration. That did not count, did it, as to whether a loan should be granted?

Mr. HOLDERER. That is true.

Representative HOFFMAN. So we can throw out everything about gold and silver. What did that leave you; anything?

Mr. HOLDERER. They didn't have any other values of any consequence.

Representative HOFFMAN. Of any consequence. Then, if you were permitted to and felt like expressing an opinion, you would say that the McDonalds were just throwing their money down a rathole?

Mr. HOLDERER. I would say just that, yes.

Representative HOFFMAN. I think that is all I have.

Senator SCOTT. Are they any questions?

Representative JONAS. Yes, sir. Mr. Chairman, I would like to ask the Chair whether it would be possible to have this witness return next week for examination. He has based his testimony on what he says are two reports in this file that I have just now begun to read while he was testifying. I was trying to read and listen at the same time. That makes it pretty difficult to try to understand.

I find in this Sopp report a lot of information that, as a layman, I would say does not bear out his characterization of this mine as

having no value, but I would not be prepared to examine him without going through it and making a little study of the Sopp report.

The same thing is true of the McCormick report. He said he based his answers to the questions on the McCormick report attached to this application.

I understand that Mr. McCormick is in the room. I do not know that. I have never met the gentleman, but I have heard that he is here today and, if he is here, I would most respectfully make the suggestion that we allow him to come up and testify with respect to this report that he made and of which the witness has said that, upon his analysis, he finds that it does not justify a finding that this is much of a mine.

I do not mean that I am trying to tell the committee how to run its business, but obviously I could not examine this witness about the Sopp report or the McCormick report or any other data in this file without having at least an hour or two to take a look at it.

Senator SCOTT. I would suggest this:

If you need an hour or two to look at it, that we not call Mr. McCormick this afternoon. We can get him back here in enough time.

Representative JONAS. I was thinking that you have an hour to run yet and Mr. McCormick is a long way from home. That is just a suggestion of mine. I thought that we might use this hour to let him say what he has to say about what this gentleman says about his report.

Mr. REDWINE. Mr. Chairman.

Senator SCOTT. Mr. Redwine may finish his questioning.

Mr. REDWINE. Mr. Chairman, may I say that when Mr. McCormick takes the stand, his testimony is probably going to take several hours. This is just one phase of the matters that he will be called upon to testify to.

Representative HOFFMAN. Now, Mr. Chairman, that is all right. Mr. McCormick sits back here. He is disputing some of these things, not your testimony but what was in the report of the RFC. He says he has been sitting here since a week ago Monday. He came in from Oregon at the committee's request. I was out there and I know about that, too.

It seems to me, Mr. Chairman, that in all fairness some of these people that are accused of making false reports or not taking samples correctly or not regarding their samples as what was intimated ought to have a chance to answer.

Senator SCOTT. They will.

Representative HOFFMAN. Should they be kept here?

Senator SCOTT. They certainly will be kept here.

Mr. REDWINE. May I explain?

Mr. McCormick was asked if he wanted to testify in Portland. He did and he testified in Portland.

Prior to the opening of the meetings in Washington, he was notified that these hearings would be held in Washington and that, if he desired to testify, he would be permitted to do so. He is not here at the request of the committee.

Representative CHUDOFF. Not only that, but I think that, in all fairness to the witness, if we want to be fair he ought to have an opportunity to hear everything that is being testified so that he

can answer everything at one time rather than make piecemeal answers.

We would never have orderly procedure if we let a witness answer a question and then tell the fellow who disagrees to come up and disagree and then ask the witness another question.

In every orderly procedure, in every court of the Nation, the first man finishes his case and then the defendant presents his case and the complainant has a chance to rebut, and then the defendant has a chance for surrebuttal.

Mr. JONAS. I think all through Springfield, Mo., and Denver, Colo., and Idaho Falls, Idaho, this happened.

Representative JONAS. I have the old-fashioned idea that a man under charge ought to be permitted to answer.

Representative HOFFMAN. This is the situation.

Senator SCOTT. Let the witness go ahead.

Representative HOFFMAN. This witness has testified as an expert, using statements allegedly made by Mr. McCormick, who sits here in the room and wants to answer.

Senator SCOTT. Let him make the statements that he has to make.

Representative HOFFMAN. The witness is finished, as I understand it.

Would you not like to hear what Mr. McCormick has to say about it? He is the fellow who took the samples.

Mr. HOLDERER. That is up to the chairman, sir.

Representative HOFFMAN. You would like to hear it, would you not?

Representative JONAS. I do not think so.

Senator SCOTT. Senator Neuberger?

Senator NEUBERGER. Mr. Holderer:

Representative HOFFMAN. This is a hit-and-run. I never knew of a third degree that had anything on this one.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. Mr. Holderer, you were asked if samples were not properly taken and protected and the assay not properly conducted, what would be the value of the samples? I think you were asked that question; were you not?

Mr. HOLDERER. The value of them would be zero.

Senator NEUBERGER. That could apply to any sample?

Mr. HOLDERER. That could apply to any sample, any time, any place.

Senator NEUBERGER. Could it apply to the samples in the area on which final patent was granted in this case?

Mr. HOLDERER. It might.

Senator NEUBERGER. I want to ask you one thing about the timber estimates included in that application for the RFC loan. The figure, I believe, was 20 million board feet of timber; is that correct?

Mr. HOLDERER. That is right.

Senator NEUBERGER. Would it be possible to use 20 million board feet of timber in the operation of a mine?

Mr. HOLDERER. Not in that mine.

Senator NEUBERGER. Twenty million board feet of timber is a lot of timber; is it not?

Mr. HOLDERER. It is a lot of timber.

SENATOR NEUBERGER. Do you believe that 20 million board feet of timber was listed in that application at a value of \$80,000? I believe it was 1940. Was that the date?

MR. HOLDERER. They give \$80,000 as the value of the timber in their pro forma balance sheet.

SENATOR NEUBERGER. For what year was that?

MR. HOLDERER. When they made the application, in 1940.

SENATOR NEUBERGER. To continue my question, do you believe, Mr. Holderer, that there was any reason to list 20 million board feet of timber for any other reason except for its commercial value as commercial timber on a lumber company?

MR. HOLDERER. I can't say as to that.

SENATOR NEUBERGER. I could not hear you.

MR. HOLDERER. I can't say as to that. They wanted to make their balance sheet look as good as possible. That is quite obvious.

SENATOR NEUBERGER. But you do not believe that it would be possible to use 20 million board feet of timber in the operation of a mine?

MR. HOLDERER. I cannot conceive of that much timber being used at that mine.

SENATOR NEUBERGER. Thank you very much.

REPRESENTATIVE HOFFMAN. I have one more question, if I may.

You will at least concede that they were acting in good faith, were they not, if they put that much money in, and it is just a hole in the ground?

MR. HOLDERER. I don't know whether they acted in good faith or not.

REPRESENTATIVE HOFFMAN. Or whether they lacked judgment of any kind?

MR. HOLDERER. I would say that they lacked judgment.

REPRESENTATIVE HOFFMAN. Of any kind?

MR. HOLDERER. Of any kind.

REPRESENTATIVE HOFFMAN. If everybody proceeded on this theory, we would never develop anything.

MR. HOLDERER. A lot of mines would not be developed.

REPRESENTATIVE HOFFMAN. And a lot of oil wells would not be discovered.

MR. HOLDERER. I will grant you that.

REPRESENTATIVE HOFFMAN. There would be a lot of dry holes all over.

MR. HOLDERER. That is right.

REPRESENTATIVE JONAS. Has he finished, sir?

SENATOR SCOTT. Go ahead, sir.

REPRESENTATIVE JONAS. I do not think that I can go into those two reports, but I have a question or two, if you wish to continue with him.

MR. HOLDERER. I invite your attention to this RFC file. One of the documents in it was the letter from John E. Morton, Chief of the Mining Section of the RFC, dated March 14, 1940. In that letter he says, and I quote:

Undoubtedly you realize there has been considerable amount of money spent on prospecting this property and as yet there is very little ore developed. The applications contain some general statements that the property offers development possibilities, but there are also statements that considerably more work has to be done to prove this. It clearly looks to us that any work done now would

be of a prospecting nature with the hope of finding ore, a purpose for which development loans are not made.

Now, that was the basis of the denial of the application, was it not, that the RFC was not in the business of lending money for development purposes and that a fully developed mine ready for operation had to be offered as security?

Mr. HOLDERER. No; I would not say that that was the basis for their denial. They put the basis for their denial finally on the grounds that the gold and silver were not critical metals.

Representative JONAS. Gold and silver were not critical?

Mr. HOLDERER. Yes.

Representative JONAS. And most of the minerals alleged to exist out there were gold and silver?

Mr. HOLDERER. Well, that is the alleged value of the property.

Mr. REDWINE. Pardon me, Congressman. I am aware of the fact that you have not looked through the file, Congressman. Let me ask the witness a question to bring out a point there; will you please?

Representative JONAS. Go ahead.

Mr. REDWINE. Is it not true that the files here also show that there was an additional application for a \$20,000 loan that was not a development loan, and it was also denied by the RFC?

Mr. HOLDERER. That is right.

Representative JONAS. Does that appear here?

Mr. HOLDERER. Yes, sir.

Representative JONAS. What was the basis of that denial?

Mr. HOLDERER. I don't remember the exact wording. It should be in there.

Representative JONAS. In hurriedly glancing through this file. I saw in somebody's letter to somebody a statement that the report of Mr. McCormick which you examined was based upon an examination or investigation of this property several years prior to the filing of this application. I believe it was in 1937.

Mr. HOLDERER. Well, I quote from Mr. Sopp's section in the application dealing with the sampling.

Representative JONAS. I asked you if you do not recall a letter here with reference to this claim which indicates that Mr. McCormick's investigation and his report were based on an examination of this property in 1937.

Mr. HOLDERER. I have seen that, but I don't recall the wording.

Representative JONAS. And at that time this ore had not been outlined?

Mr. HOLDERER. Explored.

Representative JONAS. No; you used the words "blocked out."

Mr. HOLDERER. Yes.

Representative JONAS. Is that true?

Mr. HOLDERER. I don't know. I would have to refer to the letter. I was concerned mainly with the results of the sampling as given on the sample sheets from the assayers.

Representative JONAS. I will ask you to turn to this report of Mr. McCormick, and it is dated July 15, 1937; is it not?

Mr. HOLDERER. That is right.

Representative JONAS. Now, what is this exhibit attached to it? What does he mean when he says "Al Sarena Mine No. 1, 40 feet from portal, 5 feet width cut." What does that mean?

Mr. HOLDERER. That is the width of the vein at which the sample was taken, and those were the gold and silver values and the total values.

Representative JONAS. I ask you to run along that list and tell the committee if that report of Mr. McCormick's does not show that the width of the veins range from 5 feet through 10 feet up to 20 feet. Some of them go as high as 50 feet. Others are 30 feet, and the lowest in width is 5 feet, and you have testified that you gained the information from that report that the width of the veins never exceeded 2 feet.

Mr. HOLDERER. The information shows also that the workings were closed. I know nothing about this information here.

Representative JONAS. Well, you testified that you based the information you were giving the committee this afternoon on an examination of the McCormick report.

Mr. HOLDERER. No; not the McCormick report.

Representative JONAS. The McCormick report and the Sopp report.

Representative HOFFMAN. Yes; he did.

Mr. HOLDERER. I based my information on the assay sheets which were signed by the assayers. As to this information, I have no knowledge as to how accurate this is whatsoever.

Representative HOFFMAN. It is in the file.

Mr. HOLDERER. I did not take this in consideration.

Mr. REDWINE. I think we have the wrong thing, Congressman. That is not the width of the vein. It does not purport to be the width of the vein.

Representative JONAS. He just testified that it is the width of the vein. I asked him.

Mr. HOLDERER. It is the width of the cut. It may or may not be the vein. I do not know.

Representative JONAS. For the record, the table to which I invite the attention of the witness has a number of columns. The column on the left says "sample number." The second column is "location." The third column is "width cut." The next column is —

Mr. HOLDERER. Silver and then gold.

Representative JONAS. The next column is "gold" and then there is "total."

Mr. HOLDERER. Yes.

Representative JONAS. Yes.

Under the column "width cut," the figures would indicate that the vein ranges from 5 feet to 50 feet; does it not?

Mr. HOLDERER. According to this report. I have no knowledge as to how accurate it is.

Representative JONAS. I misunderstood you, then, if I understood you to say earlier this afternoon, in response to Mr. Redwine's question, that among things upon which you based your report, one of those things was the McCormick report which is attached to this file?

Representative HOFFMAN. That is right.

Mr. HOLDERER. I based my information on the general information given in the application to the RFC.

Representative JONAS. Including the McCormick report?

Mr. HOLDERER. No; because I had no knowledge. According to Mr. Sopp's report, these working places as shown on this report are inaccessible and consequently —

Representative JONAS. You mean the Sopp report says that?

Mr. HOLDERER. Yes.

Representative JONAS. May I invite your attention here to—

Mr. HOLDERER. It says:

Approximately 240 feet of the drifts is inaccessible. Values obtained in previous samples were used. Writer knows nothing of the method used in taking these previous samples and cannot answer for their accuracy.

Representative JONAS. When was the Sopp report made? What was its date?

Mr. HOLDERER. Part of it is here.

Representative JONAS. But it is not dated.

Mr. HOLDERER. It is not dated.

Representative JONAS. May 19, 1939. Would that be the date?

Mr. HOLDERER. Well, it says "submitted."

Representative JONAS. It says:

The property covered by this report is known as the Al Sarena Mine, previously known as the Buzzard Mine—

and it is dated May 19, 1939?

Mr. HOLDERER. Yes.

Representative JONAS. In this report Mr. Sopp states that:

Practically the total production of the Al Sarena Mine has been from one vein.

Mr. HOLDERER. Yes.

Representative JONAS. So at that time he was considering only one vein; is that not true?

Mr. HOLDERER. Apparently.

Representative JONAS (reading):

The vein has a strike of north 45 degrees west, and it's practically vertical.

He made this further statement, and I quote:

No definite conclusions can be drawn concerning the variation in the width of the vein, the depth, until more of the vein is exposed on the upper workings.

Where in there does he say the vein is only 2½ feet in the Sopp report?

Mr. HOLDERER. I have seen it in here somewhere. The average width of the vein is about 2½ feet.

Representative JONAS (reading):

However, there is considerable variation of width.

Did he not also state in this report that whereas he only examined one vein there were various outcroppings and other places and off-shoots from this vein?

Mr. HOLDERER. And it is on these outcroppings that many of the samples were taken that were sent to Williams and also the Abbott Hanks Co.:

The inside workings were in such condition \* \* \*

Representative JONAS. I am not prepared to examine you on that, because I have not had a chance to see it, but I say the report, as I glance at it, from Mr. Sopp is not as conclusive or is not as adverse as your analysis of it would indicate.

Mr. HOLDERER. Well, I am simply quoting from them when I say "To get a more accurate value for the ore in the vein it would be necessary to sample stocks and drifts now inaccessible."

Representative JONAS. On account of the weather?

Mr. HOLDERER. No; because they were caved or in such bad condition.

Do either some surface work or intersect the drift on the vein. Larger samples taken at closer intervals would give greater accuracy.

He casts considerable doubt on the old sampling.

Representative JONAS. I think you have already testified as to this.

Do you include the eight uncontested claims in your adverse report? You think they were incorrectly granted?

Mr. HOLDERER. I have not taken into consideration the location of the samples. I am looking at the values given on the sample sheets.

Representative JONAS. You mean the overall picture?

Mr. HOLDERER. The overall picture.

Representative JONAS. You are looking at it as a mine, a mass of ground.

Mr. HOLDERER. I am looking at the 12 sample sheets that I had at my disposal. I am looking at those as a whole.

Representative JONAS. Not as individual claims?

Mr. HOLDERER. And not applying them to individual claims. There is not a single sample sheet of the 12 that merits further consideration, in my opinion.

Representative JONAS. You have referred to the other application of the claimant. We have been talking this afternoon so far about the application of the other corporation, the Al Sarena Corp., which was a Delaware corporation, with headquarters in Texas; but the Al Sarena Mines, Inc., the claimant in this hearing, is an Oregon corporation entirely separate and apart.

There was a lease arrangement between the two, and that document is in the file and you examined it. You stated to Mr. Redwine that there is some evidence in this record of another application for \$20,000 made by the claimant.

Will you please turn to those papers and get me the letter denying that application?

Mr. HOLDERER. I have not been concerned with the legal incorporation.

Representative JONAS. I am just talking about the \$20,000 application.

Mr. HOLDERER. I have seen it here.

Representative JONAS. You do not recall what the basis of that denial was, or was it the same as in the other case, that gold and silver were not critical materials?

Mr. HOLDERER. They failed to get one loan, so they tried to work it another way.

Representative JONAS. Which application was filed first?

Mr. HOLDERER. I would have to look at the papers here to get those dates.

Representative JONAS. You would not want the record to show that you contend that these two applicants for loans were identical, would you? You said they tried one way and failed and then tried another way.

Mr. HOLDERER. The principals are probably the same, or nearly identical.

Representative JONAS. May I invite your attention to the lease in here from Al Sarena Mines, Inc., to the Al Sarena Corp., which shows

that the principals have no identity whatever, and list the owners of the stock, and none of the McDonalds are interested in the Al Sarena Corp., but the stockholders are Cecil R. Raden, Laura B. Haden, and Edwin E. Lund.

Mr. HOLDERER. That may well be, but the property is the same.

Representative JONAS. Why are you so interested in this matter that you would try to leave the impression with the committee that the two corporations are identical, or that the principals are the same, when you have nothing to base that on?

Mr. HOLDERER. It is because the applications pertain to the same property.

Representative JONAS. But they were filed by different corporations, by different stockholders, were they not?

Mr. HOLDERER. My only concern is with the virtue of the property, and the property is the same. What different paths may have been taken to request loans, that is beside the point. I am concerned only with the merits of the property.

Representative CHUDOFF. Could I ask a question?

What is the consideration for that lease? Is there any consideration for it? Is it \$1?

Representative JONAS. It starts out and the name of the corporation is Al Sarena Corp. Its principal office is in the State of Delaware. The nature and so forth is given. That is the certificate of incorporation. That is not the lease.

Representative CHUDOFF. There ought to be some rental if there is going to be a lease.

Representative JONAS. There is a copy of the lease here.

Representative HOFFMAN. Just an inquiry. Who is presiding over this committee now?

Representative CHUDOFF (presiding). I am.

Representative HOFFMAN. We lost our Senators.

Representative JONAS. The lease in the files shows that it was executed on the blank day of blank, 19 blank, between Al Sarena Mines, Inc., an Oregon corporation, to the Al Sarena Corp., a Delaware corporation, and it apparently is a royalty lease with \$500 recited as money consideration.

There is a rubber-stamp legend on the lease indicating that the post office address of the Al Sarena Corp. is 2192, Houston, Tex.

Representative CHUDOFF. I wonder if you will look at that document closely and, from what I understand, the Al Sarena Mining Co. was a corporation, and there was either another corporation or individuals.

Who signed the lease for the Al Sarena Mining Co. and who signed the lease for the other corporation?

Representative JONAS. It is right here. The lease shows that it was signed for Al Sarena Mines, Inc., by H. P. McDonald, president, and H. P. McDonald, Jr., secretary, and for Al Sarena Corp. by Cecil R. Haden, president, and Edwin E. Lund, secretary. That is the 20th day of October 1939.

Mr. REDWINE. Mr. Chairman, we have become confused here. I believe, by a couple of loan applications. As a matter of fact, there are three loan applications here. Two of them are for a development loan and one was an operating loan. We have gotten all confused on this thing.

Let me read into the record, if I may, at this time.

Representative CHUDOFF. Mr. Redwine, while you are straightening out the confusion, I would like to know which company made an application for an RFC loan? They must have been incorporated in different States, because certainly no secretary of state would have issued a charter to companies having such close names.

There is an Al Sarena Mining Co., Inc., and there is the Al Sarena Corp.

Representative JONAS. The Texas corporation made the application for \$51,000, about which we have been talking.

There was a lease—

Representative CHUDOFF. The lease had a 5-percent rental on gross receipts for mine operations. If there was not any mining operations, they could not get rental.

Mr. REDWINE. Mr. Chairman, if I may, the file shows that in 1937, Al Sarena Mines, Inc., that is the McDonalds—

Representative CHUDOFF. In what State was that incorporated?

Mr. REDWINE. Incorporated in Oregon. They applied to the RFC for a loan of \$19,642. That loan was never granted and, at the request of the company according to the files, the company requested RFC to hold it in abeyance until they could work out some things. They were going to get some more money.

It went on until 1940 and the Texas group incorporated in Delaware the Al Sarena Corp. That corporation then filed an application for a loan of \$20,000. They first filed for \$51,000. They did not get anywhere with it.

They then filed an application for \$20,000. They did not get anywhere with that.

There were 3 applications filed, 1 by the Al Sarena Mines, Inc., and 2 by the Al Sarena Corp.

Representative CHUDOFF. One by Al Sarena, Inc., and 2 by the Al Sarena Corp.?

Mr. REDWINE. Yes, sir.

Representative CHUDOFF. One for \$50,000?

Mr. REDWINE. Yes, sir. Here is a letter signed by John E. Norton, Chief of the Mining Section, RFC, dated March 14, 1940, and I will read from the second paragraph. It is addressed to Mr. Haden, president of the Al Sarena Corp.:

We have again carefully studied all the data submitted with the applications—

in the plural—

of the Al Sarena Corp. and, based upon these data, it is clearly our opinion that the project does not offer sufficient security for a general mining loan nor do we believe that through the expenditure of a development loan—

that would be the \$20,000—

there would be developed a sufficient quantity of ore of a sufficient value to pay a profit upon mining operations, as required by the act. We wish to advise you that we have given very careful consideration to each report submitted and have not confined our attention to any particular one.

Representative HOFFMAN. Will you add something else for me, Mr. Redwine?

Mr. REDWINE. Yes.

Representative HOFFMAN. One of these loans was applied for in 1937 and had just drifted along without being pressed until 1943 when the file was closed? That is all there was to it?

Mr. REDWINE. That is correct, sir. I think that Mr. Haden, of the Al Sarena Corp., of Houston, Tex., who has been interviewed by the staff, should be called as a witness to testify as to the relationship between his family and the McDonald family, Mr. Chairman.

Representative HOFFMAN. Before you get to that, are you through with this witness?

Mr. Chairman, pardon me. I would like to ask this witness a question before he is dismissed.

Senator NEUBERGER. I think we ought to settle this matter first one at a time. It is agreeable with me. I am just acting chairman in Senator Scott's necessary absence and it is agreeable with me that Mr. Haden be called.

Representative JONAS. Do you propose to bring him all the way from Houston?

Mr. REDWINE. I don't know.

Representative CHUDOFF. I do not suppose we would go all the way to Houston.

Representative JONAS. If you are just asking him whether there is any relationship, maybe we can write him a letter.

Representative CHUDOFF. I have a lot of questions to ask him, now that these corporations came up, that I did not know about. I think I have at least 20 questions to ask him.

Representative JONAS. I would not object—it would not matter if I did—but I do not see now that any relationship between Haden and McDonald would have anything to do with this hearing.

Representative CHUDOFF. You may be right, but I will not know until I ask him.

Representative HOFFMAN. I am in favor of calling everybody except somebody who knows something about it, like the McDonalds and Mr. McCormick.

Senator NEUBERGER. It is my understanding that they will have an opportunity to—

Representative HOFFMAN. If they do not perish by the wayside.

Senator NEUBERGER. I think you will remember that Mr. McCormick had a very extended opportunity to appear before the committee in Portland. He bitterly criticized the committee and the staff. No effort was made to interfere with him. He had his say. He will be given an opportunity again.

Representative HOFFMAN. But never an opportunity to answer what this witness has said nor an opportunity to answer what is in that file.

Representative CHUDOFF. I will see that he gets the opportunity to answer anything this man says.

Representative HOFFMAN. Approximately what month?

Representative CHUDOFF. I do not know. I want to say this to you: If the Republican Members of the United States Senate take 30 minutes by using the starting question and making a speech for 25 minutes we are never going to get through.

Representative HOFFMAN. If you are criticizing me, I agree with you.

Representative CHUDOFF. I am not criticizing you.

Representative HOFFMAN. I want to ask a question.

What is your present occupation, or profession, or avocation?

Mr. HOLDERER. I am a staff engineer on the Subcommittee of Minerals, Materials, and Fuels, subcommittee of the Senate——

Representative HOFFMAN. On the staff?

Mr. HOLDERER. I am the staff engineer.

Representative HOFFMAN. Who else is on this staff with you?

Mr. HOLDERER. I am the only engineer.

Representative HOFFMAN. I asked you who else is on the staff with you.

Mr. HOLDERER. On the staff of the full committee there are a number of others; Mr. Redwine, Mr. Nelson. Those are the other two in the particular room in which I work.

Representative HOFFMAN. So you and Mr. Nelson are working on this together?

Mr. HOLDERER. No. I have never discussed it with Mr. Nelson.

Representative HOFFMAN. No, but Senator Murray asked you to come in and make this report as an expert, and Mr. Redwine is directing the activities of the committee and doing the questioning. You are doing the answering. There is that connection at least; is there not?

Mr. HOLDERER. I happen to be the staff engineer. Mr. Redwine is also——

Representative HOFFMAN. And you happen to be the expert witness.

Mr. HOLDERER. And I happen to be the only mining engineer on the committee. Mr. Redwine is also a member of the committee.

Representative HOFFMAN. And you are thoroughly convinced—and apparently he is—that there is no ground there that might be mined with profit?

Mr. HOLDERER. That is correct.

Representative HOFFMAN. All right. I am glad you agree.

Mr. HOLDERER. That is my opinion; period.

Representative HOFFMAN. And never was on the property?

Mr. HOLDERER. As I have stated before, my opinion is based on the information which I have available.

Representative HOFFMAN. And you never saw any samples from it?

Mr. HOLDERER. I've seen the sample sheets.

Representative HOFFMAN. Are you a lawyer, too?

Mr. HOLDERER. No.

Representative HOFFMAN. Just an engineer?

Mr. HOLDERER. That's all; just a plain engineer.

Representative HOFFMAN. That is all I have.

Representative JONAS. May I ask him a question, please?

Representative HOFFMAN. That is all I have, except to compliment you on the way you two work together.

Mr. HOLDERER. I have endeavored to give plain and straightforward answers.

Representative HOFFMAN. That I am not questioning. I have heard experts before and I admire them and know we are dependent upon them.

Representative JONAS. You said that you looked at the certificate of assay from the Williams Co. That is the Williams Co. assay report?

Mr. HOLDERER. I saw a copy of the Williams certificate, but I don't know what the Secretary based his decision on.

Representative JONAS. All right. Is it true that that assay report showed that gold and silver were found in the samples ranging in value from 90 cents to \$4.85 a ton?

Mr. HOLDERER. The vast majority of them were under \$2.

Representative JONAS. Yes. I said the range. I think the average works out to about two dollars and something per ton.

Mr. HOLDERER. The average would be much less than that because there are a great many zeroes and a great many traces and a great many under \$1, so the average would not be anywhere near \$2.

Representative JONAS. How many samples were there?

Mr. HOLDERER. There were 142 assays.

Representative JONAS. In the A. W. Williams report? There were only 38.

Mr. HOLDERER. I am not saying in the Williams report; 142 assays total.

Representative JONAS. Mr. Witness, I am sure you must have understood my question. I asked you if you examined the certificate of the report from the Williams Co. of the final assay which it made in 1953 sometime in November or December.

Mr. HOLDERER. The assays of the 142 assays—

Representative JONAS. There were not but 38, according to Mr. McDaniel's testimony before this committee; the man who did the assaying.

Mr. REDWINE. There were only 28.

Representative JONAS. Twenty-eight.

Mr. HOLDERER. I have copies of the Williams assay sheets which show—

Representative JONAS. We have that in the record, do we not: a certified copy of one of the certificates? That is what I want to ask him about. He has it mixed up with 142. Do you have the 28?

Mr. HOLDERER. Twenty-eight, dated January 2, 1954, Williams inspection.

Representative JONAS. They range from \$4.20—

Mr. HOLDERER. \$4.20 down to \$1.05.

Representative JONAS. Down to \$1.05?

Mr. HOLDERER. Yes.

Representative JONAS. That is gold and silver. Are you telling the committee that an assay showing gold and silver which would average around \$2 per ton would not constitute an economic and profitable mining operation?

Mr. HOLDERER. No; absolutely not; not with labor at \$18 a shift.

Representative JONAS. There is some record before this committee indicating that the Juneau mine, I think, operated on less than 50 cents a ton.

Mr. HOLDERER. No; they operated at about 90 to 95 cents a ton and they mined 10,000 tons a day. Not by the wildest stretch of the imagination—

Representative JONAS. Is your statement to us that this would not be economic, even if it goes above \$2 per ton, based on the amount they propose to mine? What if they stepped up that amount?

Mr. HOLDERER. They would never get up to 100 tons, to say nothing of several thousand tons a day. It would be a physical impossibility.

Representative JONAS. Why is that?

Mr. HOLDERER. Because of the size. They have demonstrated nothing that would indicate the ore body was big enough for that.

Representative JONAS. If I came to you without your examining the ore body or knowing anything about it other than that I produced a sample or an assay report showing that I had a mine, the sample showing gold and silver with the value there around \$2 per ton, would you say that I should forget about that and not pursue it at all?

Mr. HOLDERER. I would say that the next step would be exploration work to show the limits of the ore body. They have not done that.

Representative JONAS. That would be enough gold and silver content within itself if there was sufficient ore there to make an economic mine?

Mr. HOLDERER. I would say at today's wages and prices it would be highly controversial as to whether even \$2 would be enough or not.

Representative JONAS. You commented on the Bingham copper mine out of Salt Lake City, and I think the copper content there is about 10 percent; is it not?

Mr. HOLDERER. Oh, heavens, no.

Representative JONAS. One percent?

Mr. HOLDERER. Their recovery is three-quarters of 1 percent. That would be 15 pounds of copper recoverable per ton. Copper is now selling in this country at 45 cents and they probably have a floor contract with the Government to deliver as much as they could for 24½ cents, for the stockpile, so at 45 cents, 15 pounds times 45 is considerably more than \$2.

Mr. REDWINE. What would be the millhead on that; if I may interrupt?

Representative JONAS. I want to get the facts.

Mr. REDWINE. What would be the millhead?

Mr. HOLDERER. The millhead would be about 9 cents, about nine-tenths of 1 percent copper. That would be the run of mine.

Mr. REDWINE. In dollars what would it figure out?

Mr. HOLDERER. One percent is 20 pounds; so the nine-tenths would be 18 pounds.

Mr. REDWINE. Eighteen pounds at what price per pound?

Mr. HOLDERER. At 45 cents. That's the present price of copper.

Mr. REDWINE. What does that come to?

Mr. HOLDERER. If it was 18 it would be \$9.

Mr. REDWINE. Per ton?

Mr. HOLDERER. Per ton.

Mr. REDWINE. What did you say, Mr. Holderer, that the mine cost alone would be? What would it be on a property of this size?

Mr. HOLDERER. The mine cost alone would probably be \$9 per ton with wages at \$18, and the production would only be about 2 tons per man, so that a man getting \$18 could only produce about 2 tons.

Mr. REDWINE. With a value of what? Strike an average on the Williams assays. What would that amount to? Can you strike an average on that, or have you done it?

Representative JONAS. \$2.06 Senator Goldwater said, I think.

Mr. HOLDERER. You cannot take a straight arithmetical average. A number of other factors go into this. I haven't averaged these.

Mr. REDWINE. I think we have been following Senator Goldwater's computation of \$2.06.

Mr. HOLDERER. Call it \$2.

Mr. REDWINE. Assuming that you would have \$2.06 against a \$9 ton mining cost, even using the highest assay figures that have been presented——

Mr. HOLDERER. Which is \$7.70 on these assay sheets.

Mr. REDWINE. However, I mean the highest group altogether has been the Williams Co.

Mr. HOLDERER. Yes.

Mr. REDWINE. Against a mining cost of \$9 per ton?

Mr. HOLDERER. That is only a starter. You have your milling cost. You have, oh, a whole string of other costs. I would say that \$20 would be the minimum value that could be extracted profitably.

Representative JONAS. Where did you get your figures of \$18 a day?

Mr. HOLDERER. I have taken those from the figures that I have on the Coeur d'Alene mining area in Idaho, which is not too far away, and——

Representative JONAS. That is an established mine, is it?

Mr. HOLDERER. It is an area.

Representative JONAS. Is it a unionized mine?

Mr. HOLDERER. The figures I have given are averages for a number of mines, big and small.

Representative JONAS. You do not know whether the same situation would prevail at this location or not, do you?

Mr. HOLDERER. Well, the wages would be the same. They are standard. The miners belong to a union and the union demands that regardless of the size of the mine the miners get the standard wage. The miner does not work at a mine simply because the scenery is nice or the food is good. He is working there to get the standard wage, which is presently about \$18.

Representative JONAS. Do you know anything about the facts in any other cases in which patents have been granted in the last 8 or 10 years?

Mr. HOLDERER. I have not followed that; no.

Representative JONAS. Have you examined any of those cases to see whether patents have been granted on that sort of showing?

Mr. HOLDERER. I have had no occasion to get into the patent end of any of these applications.

Representative JONAS. You do not know, then, whether it would be proper or reasonable to expect that a patent would be granted on an assay that would show, say, \$2 per ton of gold and silver?

Mr. HOLDERER. I have no knowledge of any of the patent routine. It's been a great many years——

Representative JONAS. You mean to say that, in your opinion and in your judgment based on your experience, you do not think the mine can be profitably operated?

Mr. HOLDERER. Based on the assay sheets that I have had before me, I would say "No."

Representative JONAS. Would it change your opinion any if you knew that they had taken from \$40,000 to \$50,000 in gold and silver out of that mine?

Mr. HOLDERER. I have had no information to that effect.

Representative JONAS. You did not know that?

Representative HOFFMAN. That is not what you asked him. You asked him would it change his opinion if he knew.

Representative JONAS. Would that change your opinion?

Mr. HOLDERER. Not necessarily; no, because they might have just hit a small body and a car or two and it would be gone. I don't know. I don't know under what circumstances that might have been extracted.

Representative JONAS. However, it would not change your opinion that this would not be a good place to start mining?

Mr. HOLDERER. No; no, it would not. A great many mines have produced a very small amount of rich ore and then that was the end of it.

If that had continued, if they had continued extracting \$30 or \$40, or a thousand dollars, if that had continued they wouldn't be in the predicament that they are in now. They would have had a mine. They obviously were wise enough not to put any more money into it, to pursue that.

Representative JONAS. It is possible that they ran out of money.

Mr. HOLDERER. And it's also possible, it's highly likely, that it ran out of ore.

Representative JONAS. This is of no importance to the committee, but I think we are just killing time until 4 o'clock. I happen to have a mine in my home county. It is alleged to be a tin mine, and for as long as I can remember it has been the subject of exploration and been prospected by any number of mining corporations who have come there and spent thousands of dollars digging and exploring and trying to determine whether that mine would be a profitable one to operate. Nobody ever mined there commercially until very recently. The latest concern has obtained a long-term lease from the owners of this property. They have spent between \$100,000 and \$125,000 exploring the possibility that this might be a mine from which they would take lithium, and the report around my home is that they propose to build a big mill there. I would say everybody who has ever touched that mine up until now, and there have been scores of individuals and corporations that acquired leases on this property, lost every dollar they put in.

Another concern comes along and finds something else there and they propose to invest a million or so dollars in a concentrating plant and mining equipment.

Would you say that you know enough about the situation out in this particular mine from reading these reports to say that would not be possible out there?

Mr. HOLDERER. There is no indication that other minerals of value have been found; I'll put it that way.

Representative JONAS. You mean there is no indication in the RFC report?

Mr. HOLDERER. In any information I have.

Representative JONAS. You have not examined any data, or any documents, or any material of a date more current than 1940; have you?

Mr. HOLDERER. That is correct.

Representative JONAS. That is, 15 years ago.

Mr. HOLDERER. That is correct.

Representative JONAS. What the situation is since 1940 you have no way of knowing?

Mr. HOLDERER. I would question very greatly if they had spent any money since that time.

Representative JONAS. Why would you do that? What reason do you have for doing that?

Mr. HOLDERER. Because if they had found anything they would have made mention of it. We would have heard of it in the hearings.

Representative JONAS. They have not been on the witness stand. How do you know what they are going to say?

Mr. HOLDERER. If they had found anything of value they would have showed it on the assay sheets.

Representative JONAS. I am asking these questions to try and make up my own mind whether you are entirely disinterested or whether you have some fixed convictions on this subject and that you are not entirely objective in your testimony.

Senator NEUBERGER. I wonder if the Chair might ask a few questions before we close?

Representative JONAS. Yes, sir.

Mr. HOLDERER. I would like to give one more sentence. I want to clarify your last statement. I have a fixed conviction to this extent: that if the assays that are available are no good, I would pay no further attention to the property. That is my fixed conviction.

Representative JONAS. I beg the Senator's pardon.

Senator NEUBERGER. I would just like to ask several questions.

To your knowledge when was the last time that any mining operation was carried on at this property?

Mr. HOLDERER. I have no knowledge of the property other than what is shown in this RFC report, which is 1940.

Senator NEUBERGER. You do not know the last date of any mining activities carried on?

Mr. HOLDERER. Because I have not read the transcripts.

Senator NEUBERGER. I see.

You do not know whether any mining operation has been carried on since the patent was granted?

Mr. HOLDERER. No.

Senator NEUBERGER. The point was made that you had not had experience in mining patent work. Was that correct or not?

Mr. HOLDERER. I didn't get that.

Senator NEUBERGER. It is a little difficult to hear in this room.

I believe a point was made in a question by the Congressman from North Carolina that you had not had previous experience on mining patent work. Is that correct or not?

Mr. HOLDERER. That is right. We had no occasion to do that in the War Production Board, or in the DMA, or DMPA.

Senator NEUBERGER. You know—or perhaps you have not been here—that others who have testified who have been much more directly involved in the case than you are, also testified they have had no experience in mining patent work.

Mr. HOLDERER. And we had lawyers who attended to the legalities of the applications.

Senator NEUBERGER. I am going to say that we are about to recess for today and I would like to make an announcement of quite a substantial change in our plans, the committee plans, and explain the reasons why.

As you know, Under Secretary Davis was scheduled to appear before the committee next Tuesday. The distinguished Senator from Nebraska, Senator Curtis, in whose State Mr. Davis is an official resident.

came to us a few minutes ago and said that Under Secretary Davis had a most important speaking engagement in St. Louis before the United States Chamber of Commerce, I believe, and requested as a matter of courtesy that we reschedule the time when Mr. Davis would appear, so the committee will now be in recess.

I beg your pardon. Mr. Hoffman, will you place what you want in the record now?

Representative HOFFMAN. Yes.

I would like to have this included with the other statements as to the law. In the report in 1950 by the examiner—I think it was Mr. Rice—he referred to section 598 of Ricketts American Mining Law. I want to also offer in addition to that section, section 601 and section 603. I would like to have that printed with the other law.

Representative CHUDOFF. Is that a current volume or current edition? Is that a current law?

Representative HOFFMAN. Oh, that is the latest.

Representative CHUDOFF. I know they changed the law a couple of times.

Mr. COBURN. Could I ask the witness a question?

Senator NEUBERGER. Yes.

First, I had better complete this announcement as to when we will recess to.

After we recess in a few minutes we will meet again on Thursday, January 26, at 10 a. m., when Under Secretary of the Interior Davis will be the first witness.

I regret to say that I am informed by counsel that quarters where we will meet have not yet been arranged, but that information will be available through the Senate Interior Committee.

Again I want to repeat, so members of the press and other interested parties will know, we will meet again on Thursday, January 26, at 10 a. m., when Under Secretary Davis will appear, and we deferred that at his request.

Do you have a question?

Mr. COBURN. A brief question, and I think it will take a brief answer.

Mr. Holderer, as a mining engineer and also as one who is familiar with the mining laws, is there anything in the mining laws that would have prevented the Al Sarena people from mining this property had there been valuable ores there prior to the time they got patent?

Mr. HOLDERER. I do not think so.

Mr. COBURN. You do not think so?

Mr. HOLDERER. No.

Mr. COBURN. Could they have sold that ore?

Mr. HOLDERER. They could have sold that ore.

Mr. COBURN. And they could have used such trees as were on the property in their mining operation?

Mr. HOLDERER. That is my belief.

Senator NEUBERGER. We stand in recess until next Thursday at 10 a. m.

(Whereupon, at 3:55 p. m., the hearing was recessed until 10 a. m., Thursday, January 26, 1956.)

## AL SARENA CASE

---

THURSDAY, JANUARY 26, 1956

UNITED STATES SENATE,  
SUBCOMMITTEE ON LEGISLATIVE OVERSIGHT FUNCTION OF THE  
SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS;  
HOUSE OF REPRESENTATIVES,  
SUBCOMMITTEE ON PUBLIC WORKS AND RESOURCES  
OF THE HOUSE COMMITTEE ON GOVERNMENT OPERATIONS,  
*Washington, D. C.*

The subcommittees met at 10 a. m., in the caucus room, Senate Office Building, Washington, D. C., Hon. W. Kerr Scott (chairman of the Senate subcommittee) presiding.

Present: Senators W. Kerr Scott (N. C.); Richard L. Neuberger (Oreg.), and George W. Malone (Nev.).

Also present: Senators Henry C. Dworshak (Idaho); Thomas H. Kuchel (Calif.); Frank A. Barrett (Wyo.), and Barry Goldwater (Ariz.).

Present: Representatives Robert E. Jones (Ala.); Clare E. Hoffman (Mich.), and Charles Raper Jonas (N. C.).

Senator SCOTT. The meeting will please come to order.

Mr. Davis, due to the high position that you hold, the chairman will not ask that you be sworn in as we have the others unless the members of the committee insist upon it. So will you just have a seat, please, sir? We are glad to have you here today and I assume you have a written statement which you would like to read at this time. If so, I am asking both the staff and all members of the committee to refrain from interrupting you for any questions until you have finished reading it, after which, Mr. Coburn, Chief Counsel for the Senate Interior and Insular Affairs Committee, will initiate the question-and-answer period.

At this time it will be helpful if you will permit staff members to start their examination of the memorandums and records you were requested in my letter of January 24 to bring with you.

Senator BARRETT. Mr. Chairman, I am not a member of this subcommittee, but in all my experience around here for the past 14 years it has been left to the discretion of the witness whether or not he would prefer to be interrupted when he is making a statement for questions and answers. Unless there is some great objection by the committee I would urge that that practice be followed at this time.

Senator SCOTT. It does not make any difference.

**STATEMENT OF HON. CLARENCE A. DAVIS, UNDER SECRETARY OF  
THE DEPARTMENT OF THE INTERIOR**

Mr. DAVIS. Mr. Chairman, my preference is to make this statement without enough interruptions to break the continuity of it, which I think you will recognize as desirable.

Senator BARRETT. Do I understand the witness would prefer not to be interrupted, or would he permit interruptions?

Mr. DAVIS. I think, Senator Barrett, I should prefer to not be interrupted until I have completed the statement.

Mr. Chairman and gentlemen of the subcommittees, I am glad at last to have the privilege of appearing before you to testify to the facts with relation to these claims of Al Sarena Mines, Inc.

These claims and the problems they presented were left pending by the preceding administration. They constituted a matter which had been going through the various levels of bureaucracy of the Department of the Interior for more than 5 years, before I ever heard of them.

I should next point out to you that the matters here involved are not matters of discretion or of political action, but are matters of law and evidence. For that reason, for a very great many years the authority to decide appeals with relation to public lands has been vested in the Solicitor of the Department. His opinions on these matters are final. They are not reviewed by the Secretary unless the Secretary specifically requests it, and they are not in ordinary course ever presented to the Secretary at all. I should like to make clear, therefore, that Secretary McKay has had no part in this sequence of events, and aside from 1 or 2 mentions of it in staff conference he was totally uninformed of any of these events until after the opinion in the case was rendered.

I came into this Department on February 17, 1953, after having been engaged in the practice of law in Nebraska for 37 years, during which time I had been attorney general of the State, counsel to my State in many interstate matters, and counsel to all of the judges of the supreme court of my State, and many other legal connections with which I shall not tire you.

Immediately after taking over the office, I asked the staff for a general briefing of the matters which were pending in the office and of its general duties. At that time I discovered that there were 278 land appeals cases pending in the Solicitor's office, of which the Al Sarena Mines was just another case so far as I knew.

I was informed by the staff that there were several of these backlog cases which had not been handled which were considered "troublesome" and some of which were characterized as "headaches" and had been left for my handling. I was advised that the Al Sarena case was in that category.

On March 8, 1953, our records indicate that Mr. Garber, administrative assistant to Congressman Ellsworth, called me. I did not talk on the call and have no idea what it was about. On March 20, 1953, during my absence from the city, Mr. Garber called and talked to my secretary, requesting an appointment for some of Congressman Ellsworth's constituents. Pursuant to that call, I first met the two brothers McDonald March 30, 1953, when they came into the Solicitor's office. I then learned for the first time that Al Sarena mines were located in southern Oregon; that one of these men lived in Oregon and

the other in Alabama; and that they had been having trouble with reference to some mining claims.

The McDonalds asked the privilege of telling me all about their pending case, and since I had never heard of it before, I told them to go ahead.

They probably talked for an hour and recited a very long list of things which they claimed as grievances against the Interior Department and its long delay in the granting of their patents.

As well as I can remember, in substance, they told me:

That they had a group of 23 mining claims, 10 of which had been filed on as early as 1897, and all of them prior to 1939; that for a long period of years they had been hoping to develop these claims into a profitable mine; that their father was a physician in Mobile, Ala.; that one of the brothers lived in Mobile but that the other brother had lived for years on this mining property.

They told me there was invested, they estimated, nearly \$200,000 in the development of this mining property; that they had well over a mile of tunnels in the mountain; that they had constructed a 100-ton-a-day mill; that they had bunkhouses, an assay lab, a mess hall, tool sheds, had built access roads, et cetera; that they had had dozens of assays made on the claims, some of which showed a high mineral content.

Then they recited a long history of their treatment by the Bureau of Land Management; that they had applied for a patent to the claims in 1948, and despite the lapse of 5 years, still had not received a final decision. They outlined as best a layman could a very long administrative process through which the appeal had gone in the Bureau of Land Management and the Department.

They told of filing their applications for patent and of paying the \$5 an acre standard fee, which is historic in connection with the patenting of such lands. They had with them, I believe, a copy of the final receipt of the land office issued in 1949, showing that all payments had been made. They complained that the land had been transferred by the Federal Government to the tax rolls of the State of Oregon listed in their name, and that taxes were accumulating on it and they were threatened with foreclosure under the Oregon tax laws.

They attacked most bitterly the procedures of the Bureau of Land Management. They described in great detail the hearing on their patent application which had been held in Oregon. They insisted that they had not been given a fair hearing. They insisted that the Department was prejudiced against the granting of mining claims. They insisted that the Bureau of Management had put the Forest Service up to objecting to their claims; that the mineral examiner of the Bureau of Land Management was in collaboration with the Forest Service to help defeat their claims.

They told me the hearing in the Bureau had broken up in dispute and they had walked out; that the hearing examiner had taken the testimony of the Forest Service in their absence without their cross-examination; and they complained that the record before me as Solicitor was incomplete, did not contain much of the evidence which they had filed in the Bureau in Portland; contained only one side of the evidence; and that many of the assays which they had tendered were not in the record.

They told me that they had received the advice of a half-dozen mining engineers, State geologists and other persons familiar with mining, at the time they acquired the claims and from time to time thereafter. They named several persons in that connection who were unknown to me but some of whose opinions now constitute a part of the file, and that all of these mining engineers had indicated they had a mineral deposit which could be developed into a valuable mining property.

They told me that Congressman Frank Boykin of their home city of Mobile, Ala., had interceded in their behalf, and that because of the delay which they felt they were getting, they had started a suit in Alabama to compel the Secretary to deliver to them the patents for which they had applied. That suit had been pending for a year and a half undisposed of. They told me that until some disposition of their appeal to the Department was made, their hands were tied: that if they were granted patents, they hoped to develop a sizable mining operation on the property, but that they could not finance any such operation while their patents were under contest.

They claimed they had tendered several assay reports to the Bureau in Portland which showed paying minerals on the claims, and that many of these assays were not included in the files on which I, as Solicitor, was supposed to pass judgment.

If true, these were serious accusations which I think would cause anyone to examine the records to see if they were true.

At that stage I did make enough of an examination of the file to discover that the assays which they claimed they had filed were not present in the Solicitor's Office; that the evidence in the Solicitor's file consisted largely of testimony by the Bureau of Land Management and the Forest Service; and that all of the evidence which claimants said they had produced was not in the file.

I discovered that the claims had been registered, 10 of them in 1897; that there seemed to be little question there were minerals in more than paying quantities on at least some of their claims, and I discovered that the reports in the files made reference repeatedly to the widely diffused mass of mineral-bearing material which constituted the area on which the claims were located.

It was perfectly obvious to any lawyer that the evidence of the claimants was not in the file, and that on the state of the record as it then existed, judgment on the claimants' evidence could not be made.

I think it is fundamental to both the judicial and administrative process that both sides are entitled to be heard, and that the evidence of both sides is entitled to be considered before final judgment is rendered.

The McDonalds had with them carbons and photostatic copies of numerous assays which they insisted I should take and consider as evidence in connection with their appeal. I told them that I was in the position comparable to a supreme court, and that I could not accept evidence at that stage of the proceedings, although they were welcome to leave their assays if they wished.

They had also prepared a long document of some 28 pages, listing the chronology of events and many of their complaints. It was a document, of course, prepared entirely from their viewpoint, but it contained many points which, if true, I regarded as serious. It is

exhibit No. 63 as the files of the Department have been indexed, and it has been available to the staff of your subcommittees.

At the conclusion of that interview, I told these people that I would try to expedite a determination of their case; that I knew nothing about it except what they had told me; but that I did feel somebody ought to decide and settle any matter which had been pending for 5 years.

As soon as I could find time, I undertook to make an investigation of the files of the case to ascertain the accuracy of the representations which had been made to me. About that time, Mr. J. Reuel Armstrong, a lawyer from Rawlins, Wyo., joined the Department and I referred the files to him for further examination.

Thereafter, from time to time, the matter of the Al Sarena case and what we might do to dispose of it was discussed between us.

The mining laws: I think it should be made clear at this point what the mining laws provide. Under the mining laws which had not been changed since 1872 until last year, a miner who stakes out his claim on public lands and files on it, spends \$500 in the development of it, and proves that he has a valid discovery of minerals, is entitled to a patent.

Mr. Chairman, it is just that simple. There is no reference to timber in the mining laws; whether there is much, little, or no timber makes no difference whatever as a matter of law.

All of the mining business of the West has been established under that law. Throughout the years there have been literally thousands of mining claims gone to patent without the slightest regard to the timber on the land. As a matter of fact, it is not until very recent years that the timber attained sufficient value to be very material. In 1897, at the time the earlier of these claims were filed on, I am told they were cutting down timber in Oregon to get rid of it so the land could be used as farms; that in the 1930's there were hundreds of tax foreclosures on timber in Oregon; and the timber was sold for \$2 to \$5 an acre.

Whatever may be said of the situation in 1956, it would seem clear that at the time these mining claims were filed on, the timber was of little value, but the impression that has been conveyed to the public is that these people filed on these claims merely to get the timber.

I should point out to you that there was a substantial period of years prior to 1953 in which the timber values were continually rising but there was no amendment of the mining laws.

The area: The area in which these claims are located is what the miners call a widely diffused mineralized mass. There are no special rich veins which can be located with certainty. There is gold, some silver, some lead, some zinc, and other minerals widely diffused on the claims. To work such a mine requires the handling of large amounts of material, but in the opinion of the many mining engineers consulted the claims were well worth developing.

The files will verify the fact that there are over a mile of tunnels on this property; that there is a 100-ton-a-day mill; that there are bunkhouses, an assay lab, a messhall, tool sheds, access roads, et cetera. The mine has produced throughout its history some 30 to 40 thousand dollars of gold. A pilot operation sometime in the early 1940's, some lead and zinc was produced in minor quantities. In 1943 the mine was closed, allegedly because of the shortage of labor and materials.

They told me that they had received the advice of a half-dozen mining engineers, State geologists and other persons familiar with mining, at the time they acquired the claims and from time to time thereafter. They named several persons in that connection who were unknown to me but some of whose opinions now constitute a part of the file, and that all of these mining engineers had indicated they had a mineral deposit which could be developed into a valuable mining property.

They told me that Congressman Frank Boykin of their home city of Mobile, Ala., had interceded in their behalf, and that because of the delay which they felt they were getting, they had started a suit in Alabama to compel the Secretary to deliver to them the patents for which they had applied. That suit had been pending for a year and a half undisposed of. They told me that until some disposition of their appeal to the Department was made, their hands were tied: that if they were granted patents, they hoped to develop a sizable mining operation on the property, but that they could not finance any such operation while their patents were under contest.

They claimed they had tendered several assay reports to the Bureau in Portland which showed paying minerals on the claims, and that many of these assays were not included in the files on which I, as Solicitor, was supposed to pass judgment.

If true, these were serious accusations which I think would cause anyone to examine the records to see if they were true.

At that stage I did make enough of an examination of the file to discover that the assays which they claimed they had filed were not present in the Solicitor's Office; that the evidence in the Solicitor's file consisted largely of testimony by the Bureau of Land Management and the Forest Service; and that all of the evidence which claimants said they had produced was not in the file.

I discovered that the claims had been registered, 10 of them in 1897; that there seemed to be little question there were minerals in more than paying quantities on at least some of their claims, and I discovered that the reports in the files made reference repeatedly to the widely diffused mass of mineral-bearing material which constituted the area on which the claims were located.

It was perfectly obvious to any lawyer that the evidence of the claimants was not in the file, and that on the state of the record as it then existed, judgment on the claimants' evidence could not be made.

I think it is fundamental to both the judicial and administrative process that both sides are entitled to be heard, and that the evidence of both sides is entitled to be considered before final judgment is rendered.

The McDonalds had with them carbons and photostatic copies of numerous assays which they insisted I should take and consider as evidence in connection with their appeal. I told them that I was in the position comparable to a supreme court, and that I could not accept evidence at that stage of the proceedings, although they were welcome to leave their assays if they wished.

They had also prepared a long document of some 28 pages, listing the chronology of events and many of their complaints. It was a document, of course, prepared entirely from their viewpoint, but it contained many points which, if true, I regarded as serious. It s

exhibit No. 63 as the files of the Department have been indexed, and it has been available to the staff of your subcommittees.

At the conclusion of that interview, I told these people that I would try to expedite a determination of their case; that I knew nothing about it except what they had told me; but that I did feel somebody ought to decide and settle any matter which had been pending for 5 years.

As soon as I could find time, I undertook to make an investigation of the files of the case to ascertain the accuracy of the representations which had been made to me. About that time, Mr. J. Renel Armstrong, a lawyer from Rawlins, Wyo., joined the Department and I referred the files to him for further examination.

Thereafter, from time to time, the matter of the Al Sarena case and what we might do to dispose of it was discussed between us.

The mining laws: I think it should be made clear at this point what the mining laws provide. Under the mining laws which had not been changed since 1872 until last year, a miner who stakes out his claim on public lands and files on it, spends \$500 in the development of it, and proves that he has a valid discovery of minerals, is entitled to a patent.

Mr. Chairman, it is just that simple. There is no reference to timber in the mining laws; whether there is much, little, or no timber makes no difference whatever as a matter of law.

All of the mining business of the West has been established under that law. Throughout the years there have been literally thousands of mining claims gone to patent without the slightest regard to the timber on the land. As a matter of fact, it is not until very recent years that the timber attained sufficient value to be very material. In 1897, at the time the earlier of these claims were filed on, I am told they were cutting down timber in Oregon to get rid of it so the land could be used as farms; that in the 1930's there were hundreds of tax foreclosures on timber in Oregon; and the timber was sold for \$2 to \$5 an acre.

Whatever may be said of the situation in 1956, it would seem clear that at the time these mining claims were filed on, the timber was of little value, but the impression that has been conveyed to the public is that these people filed on these claims merely to get the timber.

I should point out to you that there was a substantial period of years prior to 1953 in which the timber values were continually rising but there was no amendment of the mining laws.

The area: The area in which these claims are located is what the miners call a widely diffused mineralized mass. There are no special rich veins which can be located with certainty. There is gold, some silver, some lead, some zinc, and other minerals widely diffused on the claims. To work such a mine requires the handling of large amounts of material, but in the opinion of the many mining engineers consulted the claims were well worth developing.

The files will verify the fact that there are over a mile of tunnels on this property; that there is a 100-ton-a-day mill; that there are bunk-houses, an assay lab, a messhall, tool sheds, access roads, et cetera. The mine has produced throughout its history some 30 to 40 thousand dollars of gold. A pilot operation sometime in the early 1940's, some lead and zinc was produced in minor quantities. In 1943 the mine was closed, allegedly because of the shortage of labor and materials.

In this period of 50 years before 1948 we are told there were literally hundreds of assays made on various parts of these claims. They must have been reasonably hopeful or no one would have been foolish enough to continue to put money in the mine.

In this connection your attention should be called to a report of the Geological Survey entitled "Geological Survey Bulletin 893" published in the year 1930. On page 131 and following of that report is a description of this mine, then known as the Buzzard area, giving the history of various mining operations in connection with which it was pointed out that at that time:

The mine workings consist of 3,334 feet of drifts and crosscuts, 1,000 feet of raises and winzes, and 75 feet of open cuts and trenches.

The minerals on the land are described generally, and I shall not take your time to read into the record the description given by the Geological Survey. I should also point out that immediately preceding the description to which I have referred, is plate No. 22, which is a sketch of levels of the Buzzard Mine, Jackson County, Oreg., to show to someone more familiar with mining than I am the approximate layout in 1930.

I have, personally no idea of the cost or the value of these improvements. I am dependent entirely upon the estimates of mining engineers and others, but it seems to be generally considered that there is somewhere from \$150,000 to \$250,000 of improvements on these various McDonald claims.

The files indicate the following sequence of events:

The patent applications: On October 1, 1948, the McDonalds filed applications for patents on all of their 23 claims.

Eight of these claims were not contested by the administration at that time. These claims have on them the same general type of timber that is on the others. They admittedly have a mineralized gold value that would justify their development, and they have been commonly accepted as valid claims by all parties to this controversy from the very beginning.

I think this is somewhat important, for it demonstrates that there are minerals on this mountain and in the immediate vicinity of these 15 claims which are under dispute, since all of the 23 claims are adjacent to each other.

It is also interesting to note that among the claims not contested by the preceding administration were the last two claims which were not even filed upon until 1939, and yet admittedly have an adequate mineralization.

It has seemed to me that this substantiates the reports of all the mining engineers that the minerals on these claims are widely diffused throughout the whole area, and it is probably impossible for anyone to draw a distinct line around the mineralized area until actual development takes place.

October 1, 1948, the regional forester's office was officially notified by the mining company of the filing of patent application.

October 4, 1948, an affidavit of possessory right was filed by the claimants with the Bureau of Land Management.

October 25, 1948, the land office issued an official receipt for the filing fee of the patent application.

December 7, 1948, the Forest Service was officially notified by the Bureau of Land Management of the pending patent applications.

January 13, 1949, final proofs were filed by the claimants with the land office.

On February 8, 1949, exhibit 71, the claimants were advised by the Bureau of Land Management that the purchase money due was \$2,375, at the rate of \$5 per acre or fraction thereof, and they were advised that upon the receipt of a properly executed application to purchase, and the required amount of money, the papers would be examined with the idea of issuing final certificates.

February 10, 1949, exhibit 75, the company filed an application to purchase all of the claims.

February 17, 1949, exhibit 74, the Bureau of Land Management issued its official receipt for the entire price of the property in the amount of \$2,375.

I have read much about the \$5-per-acre price at which this land was sold. Please let me emphasize that this price is fixed by law, that the Interior Department has nothing to do with fixing it, and in any event was the amount billed and the sum paid in 1949 and receipted for under the previous administration.

March 17, 1949, exhibit 51, the regional forester advised the Bureau of Land Management as follows:

Thank to Mr. Hattan, my attention has been called to the fact that I neglected to ask you to withhold action on this application until the Forest Service has had an opportunity to have these mining claims examined. Mr. Hattan is planning to examine these claims for us as soon as weather conditions will permit. Until his report is received we will appreciate it if action can be withheld in accordance with the provisions of regulation 44LD360.

This is directed to your attention for the reason that Mr. Hattan was an employee of the Bureau of Land Management and not of the Forest Service; that the Forest Service had been notified 3 months before of the filing of these claims, and apparently had done nothing about it.

Your attention is directed to the fact that one of the complaints of the McDonalds at all times has been that the Bureau of Land Management asked the Forest Service to intervene in this proceeding; that the proceeding was before the Bureau of Land Management; that the Forest Service used a Bureau of Land Management employee to make an examination for the Forest Service, while at the same time the Bureau of Land Management was undertaking to judge the validity of the claims.

In this connection your attention is directed to a photostatic copy attached to this statement of a letter from Mr. F. W. Libbey, director of the Oregon State Department of Geology and Mineral Industries, dated June 9, 1953, and addressed to the Honorable Harris Ellsworth, the last two paragraphs of which are as follows. The entire statement is available:

Although I hold no brief for people who locate mining claims for the purpose of obtaining timber, I believe that Bureau of Land Management people have set up roadblocks in the way of legitimate mining-claim applications for patent whenever there is timber on the claims, and have been making their own rules concerning the legal definitions under the mining laws.

It seems to be fairly well established that both the Bureau of Land Management and the Forest Service will battle to the last ditch the patenting of mining claims which contain merchantable-timber irrespective of the mineral values on the claims.

April 6, 1949, the Bureau of Land Management issued its Register's Final Clearance of Mineral Entry, stating, however, on the certificate:

Patent will be withheld by the Bureau of Land Management pending a report by the regional administrator, region 10, upon the bona fides of the claim.

April 14, 1949, exhibit 75, claimants were advised by Mr. Leonard B. Netzorg, of the Bureau of Land Management, that—

the Forest Service requested this office on December 15, 1948, to make a field examination and report on the mineral application because it does not have employed a qualified mineral examiner.

It will be noted that the date stated in this letter, December 15, 1948, does not conform to the date of the letter of the Forest Service just quoted, March 17, 1949, exhibit 51.

About this same date the Bureau of Land Management caused all 23 of the claims to be transferred to the tax rolls of Jackson County, Oreg., and listed on the county tax rolls for taxation in the name of Al Sarena Mines, Inc. Subsequent thereto, there is a tax receipt in the file showing that the mining company paid 1950-51 taxes in the amount of \$413.29; exhibit 80.

February 10, 1950, exhibit 50, the Bureau of Land Management, Washington, ordered adverse proceedings against allowing the claim on the ground that there was no adequate proof of mineralization or of necessary improvements. The Bureau of Land Management knew at the time that the claims were in a national forest.

March 14, 1950, a month later, exhibit 49, the Bureau of Land Management reversed its position and ordered the adverse proceedings vacated on the ground that such proceedings, if any, should be brought by the Forest Service.

April 13, 1950, the United States Forest Service filed notice of protest against 15 of the 23 claims, based on charges that the lands were not mineral and that proper amounts had not been spent for their development, and asking the claims be declared null and void.

April 25, 1950, notice of this contest was sent to Al Sarena by registered mail.

May 22, 1950, Al Sarena filed an answer denying the Forest Service's charges, demanding a patent.

June 6, 1950, Congressman Frank W. Boykin, of Alabama, wrote to the Secretary, exhibit 47, urging prompt investigation on behalf of Mr. McDonald who "is a close friend of mine and my constituent."

August 9, 1950, exhibit 46, memorandum to files by Mastin G. White, then Solicitor, Department of the Interior, stating that McDonald had asked for a speedy hearing; that he had promised a speedy hearing, and a teletype would be sent to the manager of the land office in Portland fixing an early date for the hearing in this proceeding.

August 9, 1950, Director Clawson of the Bureau of Land Management ordered the land office manager in Portland to hold an early hearing in the Al Sarena case.

August 15, 1950, this was answered by a telegram objecting to an early hearing.

August 17, 1950, Director Clawson sent a telegram to the regional administrator of the Bureau in Portland, stating:

Upon request of Congressman Boykin, Solicitor White assured him that a hearing on this case would be held prior to September 23 in order to spare the company serious financial loss. Under the circumstances a hearing prior to this date is essential. Please arrange for it.

On the following day the land office manager sent to Washington for file.

September 13, 1950, a hearing was held on the claims before the Bureau of Land Management, Portland. A transcript of the hearing is in the files. At the hearing the attorney for Al Sarena filed demurrers and insisted they be ruled on before proceeding with the hearing. He contended he had an agreement with Mastin White, Solicitor, that the matter would be heard according to the rules of the Federal courts rather than the rules of the Department, and when the examiner refused to proceed in that manner, a scene ensued in which the Al Sarena attorney and prospective witnesses quit the hearing and refused to attend. Any such agreement is explicitly denied by Solicitor White, exhibit 77, but was still insisted upon by Al Sarena counsel.

October 2, 1950, Pierce M. Rice, manager of the Portland office, who had heard the case, sent his views to the Director of the Bureau of Land Management, Washington, with only a recommendation instead of a decision, stating that because of demeanor of counsel for the mining company, an orderly hearing had not been held, but he was submitting the case with only a recommendation that the claims be denied. In his findings, however, he states a summary of the evidence of the Forest Service by Mr. Robert G. Leavengood, timber management assistant:

He estimated that the present merchantable timber to have a value of approximately \$77,000 and, if cut, there would remain a 25-percent stand of 3- to 14-inch growing stock.

November 2, 1950, exhibit 84, Associate Director Zimmerman, Bureau of Land Management, sent a letter to Congressman Boykin advising him that Solicitor White had requested that the decision in the case be expedited. The matter is under immediate consideration and it is hoped that the decision will be out in a very short time.

November 24, 1950, exhibit 52, the Washington office sent the case back to the Portland office with directions to make a decision.

December 14, 1950, exhibit 34, the Portland office rendered a decision sustaining the Forest Service.

April 27, 1951, exhibit 51, the Assistant Director, William Zimmerman, of the Bureau of Land Management, sustained the decision of the Portland office.

The matter was appealed to the Solicitor on June 1, 1951, exhibit 27, and so far as the record discloses, no action was taken from that date for the following 20 months prior to the time I assumed office in February 1953.

The Alabama suit: July 31, 1951, the company started suit in the Federal district court in Alabama against Oscar Chapman, Secretary of the Interior, to compel delivery of the patents, exhibit 70. Since neither the claims nor the land nor the Secretary were in Alabama, it would be clearly apparent that there was no jurisdiction in the court. Interior referred the matter to the Justice Department to defend on August 24, 1951. Justice filed a motion for summary judgment, exhibit 68.

September 12, 1951, exhibit 67, Justice filed a motion to quash the proceeding. It would seem that if these motions had been called up

in court at any time the Alabama suit would have been dismissed and the way cleared for departmental action, but, in fact, this suit was used as an excuse by the Department to keep from passing on these claims.

An example is an undated memo in the files which you may identify as exhibit 65, photostat attached, which says:

We will keep this "on ice" until after the final disposition of the Alabama case.

(Signed) M. G. W.

It was initialed.

The missing records: After the violent protests from the McDonalds that they have been shabbily treated, that much of their own evidence was not of record, and that a lot of evidence which have been filed had not been sent to Washington, I caused inquiry to be made of the Portland office as to whether there were additional papers and documents in that office which had not been sent forward, and some documents were forwarded.

These may have well been omitted from the record because of the confusion that arose at the hearing and because they had been tendered at other times, or because of the admitted confusion or reluctance of the manager of the Portland office to pass upon the question.

The fact that the record was not complete is, I believe, substantiated by exhibit No. 90, a letter from Solicitor Mastin G. White, dated August 3, 1951, addressed to Al Sarena Mines—there is a carbon on the file—which says:

It appears upon the basis of your letter dated June 23, 1951, as supplemented by information received from the manager of the land office to the effect that the reporter failed to obtain a complete transcript of the earlier portion of the proceedings at the hearing on September 13, 1950, that if you desire a further opportunity to submit evidence bearing on the question whether valuable mineral deposits have been discovered on the claims involved in your appeal (A-26248), it would be appropriate to remand the case for a supplemental hearing with respect to that issue \* \* \*

The statement so frequently made in the press and perhaps in your record to the effect that these claims had been denied by the previous Secretary of the Interior is not supported in any manner by any document of any kind in the record. On the contrary, there is a letter dated September 27, 1952, purported to be from George F. Rock, attorney in Denver, which says:

DEAR OSCAR: You will recall that I mentioned a matter pending in your office when you were in Denver. The case is that of the Al Sarena Mines, Inc., of Trail, Oreg., and is pending in the Solicitor's Office.

I will appreciate it very much if you will make inquiry into this matter at your first opportunity and let me know if anything can be done toward arriving at an amicable settlement.

With very best personal wishes, I am,

Sincerely yours,

(Signed) GEORGE

In reply to that letter, there is a carbon copy of a letter Secretary Chapman wrote as follows, on October 9, 1952:

DEAR GEORGE: In compliance with the request contained in your letter of September 27 to me, I have inquired regarding the status of the appeal of Al Sarena Mines, Inc., which is pending in the Office of the Solicitor.

The appeal (A-26248) is from a decision of the Assistant Director of the Bureau of Land Management, who held for cancellation mineral entry Oregon 095 insofar as that entry embraces 15 lode mining claims situated within the Rogue River National Forest in Oregon.

After the receipt of the appeal by the Solicitor, and while it was under consideration, the corporation instituted in the United States District Court for the Southern District of Alabama a suit against the United States and the Secretary of the Interior. As the suit involves the same subject matter as the appeal in the administrative proceeding, further consideration of the appeal has been postponed until after the final disposition of the litigation. The suit is still pending.

Sincerely yours,

(Signed) OSCAR,  
*Secretary of the Interior.*

From other letters it is apparent that at least as late as November 22, 1952, Secretary Chapman had not passed on the case and had not even considered it, and there are no records to the contrary, so far as the files disclosed.

The procedure adopted: In view of the substantial delays and the muddled state of the record in this case, I was frankly puzzled to know what to do with it.

It seemed to me that there were three possible alternatives.

The first and most obvious alternative was to send the matter back to the Bureau of Land Management in Portland to start all over with another hearing.

At first that seemed to me to be the thing to do. I seriously considered it, but in view of the fact that 5 years had then elapsed during which this matter had been dragging along; in view of the accusations of collusion that the McDonalds were making against the Bureau of Land Management and the Forest Service; in view of the fact that the first hearing had broken up in confusion; in view of the fact that much of the evidence of the claimants either intentionally or unintentionally did not appear in the record which was sent to Washington; and in view of the fact that the hearing officer had been reluctant to render a decision; the record of the entire affair was not such as to inspire complete confidence in me of any speedy determination of the matter, and it seemed to me a certainty that to remand the claims to the same field office which made the original record would be a vain act.

The same suspicions and hostile attitudes would be present and this course would simply defer any final disposition of the case another period of years. If there was merit in the claims, the claimants were entitled to a determination of the controversy so that they could finance operations if they wished and pay the taxes which were accumulating. If there was no merit, they should be told.

For these reasons it seemed to me that the alternative of sending the case back to Land Management was not a desirable alternative.

The second alternative was to somehow get the matter into court and let the court decide it. This was discussed in detail but proved to be legally impractical. If the claims were sustained, of course nobody would appeal. If the claims were denied, then it seemed clear that the Solicitor's finding of lack of minerals would be conclusive on the court; and since that was the sole point involved, the company could get no complete review in the courts, even though an adverse ruling were given.

The third alternative seemed to be to get some independent assay of the minerals, if any, on these claims from some disinterested agency that was not a party to any of the previous controversy. I felt that I was in a situation quite comparable to that of a court in a case

where four doctors say the defendant is sane and should be executed and four other equally distinguished doctors say that he is insane and ought to go free.

Under those circumstances the procedure is quite common that the court may call in disinterested experts of its own choosing, hear their testimony and rely on it if it is believed reliable.

The question was who could be chosen as an impartial medium to secure new assays and get the facts straight. Under those circumstances and after staff discussion in Interior, as well as discussion with other lawyers on the Solicitor's staff, I made up my mind that the thing to do was to submit the problem to the Bureau of Mines to secure new assays which would be dependable and beyond dispute.

On June 4, 1953, I discussed the matter with Assistant Secretary Felix Wormser, in charge of the Bureau of Mines, and received some recommendations from him as to 1 or 2 prominent mining engineers whose advice might be dependable.

Meantime, I had discussed the matter with Congressman Ellsworth on June 1, 1953. I told the Congressman that I was much disturbed as to who was believable in connection with the mineral content of these claims. As I recall, I told him that it would be very helpful to me and I would have much more confidence in the situation if he would get for me the opinion of 3 or 4 mining engineers who knew something about the property and who would give their opinion as to whether it was a sincere mining effort.

Pursuant to that suggestion and apparently on June 4, 1953, Congressman Ellsworth wrote to four mining engineers who had previously examined the property. A copy of his letter to them, as he forwarded it to me, is shown as Exhibit 12a in a photostat attached to this statement.

On June 24, 1953, Mr. Ellsworth submitted to me the originals of the responses to his letters of inquiry. His transmittal letter is shown as Exhibit 12, a photostat attached to this statement. The first response is by Alan Kissock & Co., 70 Pine Street, New York, Exhibit 13, photostat attached, in which Mr. Kissock stated that:

There is, however, absolutely no question but that there is on the Al Sarena claims a tremendous mineralized area and in my opinion it is definitely a valid mineral discovery under the mining laws \* \* \*

I therefore suggested to the owners that they should patent their ground and I understand they have sincerely complied with all the necessary requirements to do so. In my opinion this application for patent very definitely merits favorable consideration.

Very truly yours,

(Signed) ALAN KISSOCK

The second letter is from G. Cleveland Taylor, a mining engineer of long experience, then living in Sacramento, and a registered professional engineer of that State, shown as exhibit 14, photostat attached. Mr. Taylor had been quite familiar with the mine as the registered mineral surveyor who had examined the claims. He stated:

I surveyed the claims for patent, spending some 2 to 3 months on the ground, covering the area quite thoroughly, both on the surface and underground.

My conclusion was that a patent should be granted to the applicants. This has been for many years what might well be termed a legitimate mining operation \* \* \*.

The present owners, who acquired the rights of the original locators, have always regarded the mine as a broad-zone and have predicated their activities on that theory \* \* \*.

Of course a great deal of systematic drilling or other additional development work is necessary to actually prove a large low-grade ore deposit, but there appears to be sufficient widespread mineralization to prompt a prudent man to carry out such development.

The third letter is from Mr. D. Ford McCormick, who I believe has already appeared before your subcommittee and whose credentials, I understand, are as high as any mining engineer in that region, shown as exhibit 15, photostat attached.

Mr. McCormick was, of course, employed as a consultant by the McDonalds, which quite naturally subjects him to the allegation of prejudice. Among other things, Mr. McCormick says:

Yes, I would say that the Al Sarena, Inc., group of claims has an excellent chance of developing into a large low-grade operation if a well-planned development and exploration program is carried out at the time when circumstances are right for a profitable operation if the property proves out.

The next opinion is from Col. J. E. Morrison, a registered mining engineer of the State of Oregon, then in the United States Army, as I understand it. His letter is attached as photostat exhibit 16a. Among other things, he said:

There is a fairly large area of porphyry on Elk Creek which has been subjected to one or more periods of mineralization. Gold, silver, and other metals have been deposited along the cracks, crevices, faults, and where the formation was porous enough for the mineralizing solutions to penetrate. I have sampled and seen the assays of over a thousand samples from this mineralized area. Like all mineralized areas, the values do not run uniform throughout. Samples from the more mineralized areas will run as high as \$10 or more per ton. The low assays are obtained from the hard porphyry, which the mineralizing solutions had not penetrated. The Al Sarena people have studied this area and consolidated it into a group of claims. All 23 claims, as I remember them, show evidence of this mineralization and do carry gold and silver values.

This property has been examined by a number of reputable mining engineers. Based upon the findings and recommendations of these engineers, the owner's have spent thousands of dollars and also their time in developing the property into its present state. There are a number of large, low grade properties in North America that have made a success of the operation on lower values than those indicated at the Al Sarena. The 90-day test run proved to me it could be made a successful operation. To declare a portion of this group of claims to be nonmineral, in my mind, would be a gross injustice to the owners who have spent so much time and money in developing the property.

Again apologizing for the delay in answering your letter.

Sincerely yours,

J. E. MORRISON,  
*Mining Engineer,*  
*Oregon Registry No. 1901.*

Mr. Chairman, I have quoted these opinion of mining men in order that you might know that before taking any action on this matter I had secured what I felt was at least enough evidence to justify my regarding the patent application as having been made in good faith.

These 4 engineers, 1 from New York, 1 from Eagle Point, Oreg., from Sacramento, Calif., and from the Army, wrote these letters, apparently with no consultation between themselves, and while they had all, from time to time, taken a look at this property, there is no evidence that they were receiving any compensation at the time, with the possible exception of Mr. McCormick, or had any interest in the matter beyond that which any professional engineer might have.

Therefore, on September 3, 1953, I sent a memorandum to the Bureau of Mines and letters to the Al Sarena Mines, Inc., and Mr. McCormick, as their engineer, assigning the task, and, as I believed, fixing responsibility.

The letter to the Al Sarena Mines, exhibit 33-2, is as follows:

AL SARENA MINES, INC.,

*Trail, Oreg.*

GENTLEMEN: Pursuant to my conversation with Mr. Garber, the following modus operandi is acceptable to me in acquiring further evidence of a valid discovery on your contested claims:

1. I should like N. E. Volin, a mineral expert from the Bureau of Mines in Spokane, to accompany Mr. D. Ford McCormick when samples are obtained for assaying purposes. In the event Mr. Volin is unable to take the assignment, he will designate one or more substitutes from the Bureau of Mines who will be available.

2. The two men may arrange the time and place of meeting to suit their convenience. They should meet as promptly as possible, however.

3. Accurate record should be kept of the location from whence each sample is taken.

4. Samples should be taken from each of the following claims: Henry Applegate, J. W. Merritt, Rainboe, Sulphide, Della McKinnon, Cougar, Oro Escondido, W. C. Leever, J. L. Grubb, J. D. McKinnon, Manganese Claim, Staples, Arroyo Verde, Alabama, and LaJolla.

You may take as many samples of whatever weight from each claim as you desire.

5. The samples should be retained in the possession of Mr. McCormick and the Government representative until shipped or delivered to a qualified assayer who is acceptable to both men.

6. The assay report should be labeled so that they are easily identified to the claims from which they are procured and the reports sent to me promptly.

7. Mr. McCormick's salary and expense and the assaying costs will have to be borne by you. The Government will bear only the expense of its representative.

Very truly yours,

CLARENCE A. DAVIS,  
*Solicitor.*

A copy of this letter was sent to the Bureau of Mines along with a memorandum, exhibit 33-3, which is as follows:

#### MEMORANDUM

To: Director, Bureau of Mines.

From: The Solicitor.

Subject: Al Sarena Mines, Inc.

Enclosed please find a copy of a memorandum which I have sent to the above subject, and a copy of my letter to Mr. McCormick. They are self-explanatory.

In view of the fact that the company did not introduce evidence of discovery at the hearing for patent, it is my desire to give them this opportunity to make their showing. I am aware of the peculiar nature of the area that they say is mineralized and want to approve patent for them if the assays afford us the well-established legal basis therefor. All people concerned should, therefore, cooperate in obtaining samples and assays upon which no doubts will be harbored by anybody. The decision on the application for patent should be considerably easier after we have the new assays.

Mr. Armstrong of my office has talked to you and Mr. Miller concerning this matter and has been told that Mr. Volin at Spokane should be available to represent the Government when the assay samples are taken. I would appreciate your cooperation in sending him the suggested procedure and instruction to contact Mr. McCormick at Eagle Point, Oreg. My principal concern is to have a qualified Government representative present to see that the assay samples are fairly taken from each claim and then delivered to a competent assayer.

CLARENCE A. DAVIS,  
*Solicitor.*

The letter to Mr. D. Ford McCormick on the same date, exhibit 33-1, is as follows:

Mr. D. FORD McCORMICK,  
Route 1, Box 125, Eagle Point, Oreg.

DEAR MR. McCORMICK: As you know, the Al Sarena patent application has been appealed to the Secretary of the Interior. The application, to this point, has been rejected on the ground that the company has not produced satisfactory evidence of a valid discovery on certain of the claims.

In an effort to determine the matter fairly, I have agreed with Congressman Ellsworth, who has interceded on behalf of the company, to ask you and Mr. Volin of the Bureau of Mines, or his substitute, to procure personally, sufficient samples of the deposits on each claim to afford adequate assays on which the Secretary can base his decision on the validity of the discoveries.

I am enclosing herewith a copy of the procedure which I have suggested for you and Mr. Volin to follow. I have also asked Mr. Volin to contact you promptly so that you can arrange the time and place of meeting, convenient to both of you.

Sincerely yours,

CLARENCE A. DAVIS, *Solicitor.*

This procedure of referring matters from one bureau of the Interior Department to another is actually very common. The Interior Department has several highly specialized bureaus of a technical and scientific nature which rank alongside any similar organizations in the country. The Geological Survey, the Bureau of Mines, the Bureau of Land Management, the Bureau of Reclamation, the Fish and Wildlife Service, all have the benefit of years of accumulated experience in certain technical fields.

It has been a common practice for many years when matters arise within the field of one of these agencies regarding which another agency has expert knowledge to refer it to the second agency. This has been done whenever the Secretary feels uncertain of the position of a particular bureau.

Proposed projects of the Bureau of Reclamation, for instance, have been submitted to the Geological Survey or the Fish and Wildlife Service for their appraisal of the situation. Projects of the Bureau of Indian Affairs are frequently submitted to these other bureaus for their advice and guidance. From time to time various Secretaries of the Interior have even set up special groups to advise in the solution of difficult problems.

I am informed of one instance in which this very question of the amount of mineralization on mining claims was referred to the Geological Survey, in the leading case of *United States v. Cameron*, involving mining claims on the Bright Angel Trail in the Grand Canyon. In that case the Secretary referred the matter to the Geological Survey, and I am informed, determined to follow the report of that agency, and was affirmed by the Supreme Court of the United States.

This practice is common wherever the Secretary has felt that a bureau was overoptimistic in its plans, overzealous in its conduct, or where he felt the need of independent advice from one of the other agencies.

As a matter of fact, in the last 2 years the Department has set up an entirely new organization in the Office of the Secretary, called the Technical Review Staff, for the specific purpose of reviewing proposed bureau actions and decisions and advising the Secretary regarding them.

This case was not only a difficult one, but was one in which, in my opinion, the record was not dependable.

The problem involved was to take new mineral samples, dependable samples, on these claims and to have them accurately and honestly assayed. I think it will be conceded that if assays showed adequate mineralization, these people were entitled to their patent under the mining law.

The United States Bureau of Mines is a great technical organization. Out of it for many years have come the finest developments in the field of mineralogy that this country, and the world, have seen. I had then, and I have now complete confidence in the integrity of the Bureau of Mines, and if I may say so frankly, I regret the numerous aspersions that have been cast upon what I consider to be loyal and faithful career employees of that Bureau.

If the Bureau of Mines cannot be trusted to take mineral samples and have them properly assayed and report on them, then I wonder what agency can be trusted with an assignment of this character.

It is, incidentally, a little unfair to attempt to attribute to Secretary McKay in the first year he was in office all of the claimed errors of a Bureau which was completely built and staffed by the preceding administration.

I should also like to point out to you that the personnel of this Bureau had not been in any manner changed by the present administration; that all of these people, so far as I know, had been employed for many years as career people in the Bureau.

Having submitted the matter in the manner that I have outlined, there is nothing that I can add of my own knowledge with reference to what was said or done until after the assays were completed. I should point out to you, however, that the taking of these assays, their preparation and their shipment, as I understand from your record, was all done directly by the Bureau of Mines and the mining engineer consultant of the applicants.

I shall have to leave to the mining people the explanations of how this was done and what they did. I can only point out to you that from the time that I issued the instructions September 3, 1953, until after the assays had been completed and the reports returned, neither I nor any other official of the Department of the Interior outside of the Bureau of Mines, so far as I know, had anything whatever to do with the taking, shipment or assaying of those samples. I relied upon the procedure adopted by the mining engineers.

The reports of the assays: When the assays were completed, as your records already show, duplicate originals were sent to the Bureau of Mines and to the claimants.

The claimants, upon receipt of their copies of the assays, either brought or mailed, and I would have no way of knowing which, a set of the assays to Washington. On December 22, 1953, Mr. Garler, Congressman Ellsworth's assistant, telephoned to make an appointment for me to see the McDonalds, which according to our records I did on the morning of December 24, 1953. The assays do not bear a filing stamp of the Interior Department because they had been hand carried and were delivered in person to me, and only matters received through the Solicitor's docket room bear the incoming stamp. I, in turn, handed them over to Mr. J. Reuel Armstrong, the attorney working on the case.

They appeared to be duplicate originals of the assays. They were on the stationery of the assay company, and the transmittal letter was attached.

Mr. Armstrong worked over them at some length. Each assay number was checked against the corresponding claim from which it had been taken. Photostats of them, bearing his notations, are attached.

On December 29, 1953, Mr. Armstrong came to my office, advised me that a check of the assays had verified what I had been told was the result, and we discussed what should be done about the claims. We were both in my office discussing the matter. We had not received the other set of assays which had gone to the Bureau of Mines, and I suggested to Mr. Armstrong that we call Mr. Appling of the Bureau of Mines in Oregon to find out whether he had one of the sets of the assays and how the situation looked to him.

The call was placed in my name. I am happy that your committee asked for confirmation of that call and that we produced not only the telephone slip showing the call but the operator who placed the call and made the slip originally, the clerk who has had the slip in custody since that time, and further verification by the Department's telephone bill. We showed to you the originals, and we supplied photostatic copies for your record.

Both Mr. Armstrong and I talked at some length—the telephone slip shows 18 minutes—to Mr. Appling. You have heard Mr. Appling's testimony. He went over the substance of his report with us on the telephone and verified the authenticity of the duplicate assays in our possession.

I especially questioned him about the whole matter, the methods of taking the samples, about how carefully they had been guarded against any possible tampering, about how they had been shipped, where to, and asked him why the assay house had been chosen in Mobile. Finally, I asked him as a mining engineer who had been all over the property for several days whether, in his opinion, a man would be justified in developing the property. He stated that in his opinion the property was good enough to well warrant further development.

Mr. Appling has already explained to you why these samples which he took had been sent to Mobile. My instructions to the Bureau of Mines were to select an assay house that was mutually acceptable to the Bureau and to the mining engineer of the claimants. A choice of that nature, by the agreement of parties, is a very common practice, and in this particular case seemed particularly appropriate, in view of the friction and disagreement that there had been between the Bureau of Land Management, the Forest Service, and the claimants.

Mr. Appling advised me that before sending the samples to the Williams Co. in Mobile, the Bureau of Mines had wished to verify the standing of the Williams Co.; that they had called the Bureau of Mines office in Nashville, Tenn., regarding the integrity of the Williams Co.; that the Bureau of Mines office in Tennessee had called the State geologist's office of Alabama which had informed them that the Williams Co. was well known and a reputable assay house. They had also checked the fact that the Williams Co. was on the list of the Department of Commerce as a recognized assay house. These facts, of course, are in Mr. Appling's report. They were also given to me on the telephone and seemed to me at that time adequate evidence of

the integrity of the Williams Co., even though it was the home city of the claimants.

I felt justified in relying upon the same evidence of reliability on which the Bureau of Mines felt justified in relying.

In this conversation Mr. Appling had gone over his entire report in connection with this matter. I asked him to send a copy promptly to me. As I recall, he told me that the copy which he had finished was not very well typewritten and he wished to have it retyped before mailing it in. At any rate, I was given to understand that it would arrive through Bureau channels in due course.

I wish at this point to make very clear that I had before me all of the information and all of the evidence in this case, the assays and the information in the report, verified by Mr. Appling, of the Bureau of Mines.

The opinion: Having this information, the only thing remaining to be done was the preparation of an opinion on the evidence before me.

Before I came into the Department, a draft of opinion had been prepared, I am told, by staff members of the Solicitor's Office, based on the record as it then existed, in which, as I have pointed out, some evidence of the claimants was missing.

There is no record, however, that that preliminary draft opinion was ever considered by the previous Solicitor or signed by him. It did, however, contain a statement of the facts and a discussion of all of the procedural points and irregularities of procedure which appear in the record. These were appropriate to any opinion and comprise the first 12 pages of the opinion in the case.

The only point left to be determined was the question of whether there were adequate minerals on the claims. That, of course, from a legal standpoint was the only question seriously involved. Whether the timber was valuable or not valuable; whether the McDonalds were wise people or foolish people, are points that are not material. If there was a discovery of minerals on these claims, the McDonalds were entitled to patents under the mining law. That was the only point left to cover in the opinion. It depended upon the acceptance of the validity of the assays and the report from the Bureau of Mines which appeared to show adequate mineralization.

In acceptance of that fact, Mr. Armstrong prepared the last 21 1/2 pages of the opinion. The language was modified somewhat by me, and the opinion released on January 6, 1954.

At the time it did not occur to me to have been in any manner more expeditious than the occasion warranted. If the assays were accepted as authentic, that terminated the controversy.

I might also add, although perhaps it is petty detail, that these voluminous files that you see before you do not make a record which is easy to work on intermittently. I can well understand why Mr. Armstrong, after examining these assays and having gone back over this complicated record, felt that he knew as much about it as he would ever know and wished to complete the opinion and put the matter behind him instead of holding it for another period of time and going through it all over again. I think perhaps I shared that feeling.

You must not forget that there had been a constant complaint about delay and a constant pressure for action on this matter through the whole 5-year period that it had been pending. I have intentionally quoted repeatedly from the files to show that under both the pre-

ceding administration and my own there had been pleas to expedite action on the matter, and numerous directives to hasten action had been issued.

The record in the files shows a line of correspondence from Congressman Boykin, of Alabama, highly endorsing the McDonald family and repeatedly asserting that they were being abused and were being damaged by delay and urging that prompt action was necessary. These letters of the Congressman are all photostated and attached to this statement.

In addition to these letters there are numerous other departmental orders and communications, all urging expeditious handling of this matter. There are also several other letters from Congressman Ellsworth, which also are photostated and attached to this statement, directed toward urging some kind of a termination of this controversy and avoiding further continued delays.

In order that the record in that connection may be complete and convenient to you, I should tell you that our records indicate that during the time from February 17, 1953, when I came into office, until this decision was rendered, there were four telephone calls from Mr. Ellsworth's office to me on which I talked to either Mr. Ellsworth or to Mr. Garber, the general substance of which was a plea to expedite this decision. These telephone conversations occurred on April 22, May 4, May 5, and June 25, 1953, and in addition to that I talked to Mr. Ellsworth on June 1 and August 4 in my office.

These calls and telephone conversations were similar to the dozens of other calls which the Solicitor's office received from numerous Members of the Senate and the House when they have matters pending for constituents before the Department.

Mr. Chairman, the language has been used that there was some kind of "high level interference" in this case. I am a little puzzled as to what is meant by that term. I have placed before you very completely the evidence with relation to the various Members of Congress. If you mean by that term interference by Members of Congress, you may judge of it by the record before you.

If you mean by "interference" that the Secretary has overruled the decisions of one of the numerous bureaus, then I must protest the use of the language.

The Secretary of the Interior, and by delegation in this case, the Solicitor, is the final judge of the decisions of the Department. All of the actions of this vast army of 50,000 people employed by the Interior Department can be appealed ultimately to the Secretary for decision.

The system is quite comparable in structure to our judicial system. In both there are numerous decisions made in the field or in the trial court. They may be appealed to bureau chiefs or to circuit courts, and may be appealed to the Secretary or the Supreme Court. If the Supreme Court reverses one of the trial courts, is that "high level interference"? Let me point out to you that when one criticizes a decision of the Secretary merely because it does not follow the decisions of the lower bureaus, one is really criticizing the American system of appeals.

To say that the Secretary should not reverse field decisions or decisions of the bureaus is simply to argue that the decisions of field offices or bureaus should be final, and that we should have a govern-

ment by bureaucracy without interference from the elected executive branch. I hope it was not meant to imply that I am in error merely because I reverse the decision of some bureau. If so, then there is no need for a Solicitor, there is no need for Assistant Secretaries, and there is little need for a Secretary himself.

And let me, as a relative newcomer to the Federal Government, point out to you some startling things that occur by reason of the type of thinking which says that no one should interfere with bureau decisions.

Not long after I came into the Interior Department, I had occasion to review a decision of the field officer of one of our bureaus. I was discussing it with the bureau chief, and it seemed to me the decision was wrong. He was inclined to agree with me, and I ask him what he would do. He said in substance, "I will have to sustain the boys in the field because if I don't sustain them, they will not sustain me."

Such a statement, of course, amounts to saying that an appeal is useless and, that the decisions of bureaucracy should be final. It amounts to a complete abdication of the right of appeal and of the right of elected officials to interfere with the decisions of permanent employees who comprise the bureaus.

I regret the necessity of pointing these things out in this statement, but the implication has been made in the press extensively that merely because a decision was rendered which did not agree with the decision in the field, the top decision was necessarily in error.

There is also running through this case, and certainly through the newspaper comments upon it, a broad conflict of economic ideology.

The wise use of our great national forests is a program supported by all of us. However meritorious that objective, I trust you will agree that we should never distort the law in order to attain it. I have already set forth in this statement a letter from the Director of the Department of Geology and Mineral Industries of the State of Oregon, in which the Bureau of Land Management and the Forest Service are believed to be unsympathetic to the allowance of mining claims. The Department of the Interior for several years, I would suspect, has been equally unsympathetic.

I have already stated the law governing the approval of mining claims, as enunciated by the Supreme Court. It is to the effect that if the miner has filed on these claims, made improvements, and discovered minerals in such quantities to justify him in further exploration and development, the claims should be patented.

It is not required that the mine should be fully developed or should have established a history of profitable operation. Neither is the timber on mining claims material to the allowance of the claim.

That is the way the mining industry was built, and the maintenance of a healthy mining industry is just as essential to the economic well-being of the United States as is the maintenance of other basic industries. For several years the Government has actually been engaged in a program of encouraging mineral prospecting and development.

Much of the economy of the Western States has been based upon mining. The results of mining operations are always speculative, since it is never possible to state with certainty the value of the minerals under the ground.

The patenting of mining claims over the years, therefore, has gone forward by the thousands, based only upon a discovery and the hope

that a profitable venture can be developed. This must be remembered in any consideration of mining problems.

Nevertheless a few years ago the Department of the Interior attempted to inject into the mining laws a standard of discovery which required profitable operation and a showing that the mineral deposits had the greater comparative value than other uses. This is not the standard set up by law.

The Department has the authority to open and close areas to mining locations. When lands are opened they are subject to the mining law as it exists. When they are closed no one can even stake a claim on them.

To allow mining claims to be located and then to judge them on standards other than those set up by the Congress and the Supreme Court is administrative legislation.

If we are to adopt the philosophy that any department of Government is to be vested with such vast powers, then it should be done by an act of the Congress and not by administrative decision.

The timber values: I am reluctant to discuss the timber values, because I must reemphasize at all times that the value of timber on mining claims is not material; that the Congress has never passed legislation which denies mining claims merely because there is timber on them; but there has been comment in the press and I believe from some of the members of your subcommittees to the effect that these claims constitute a timber grab. Let me point out:

1. At the time these claims were filed on as mining claims, there can be no dispute that similar timber could have been purchased in Oregon for as low as \$2 and \$3 an acre. The fact that all the claims were staked between 1897 and 1939 would demonstrate conclusively that at least in the beginning there could have been no thought of any profits out of the timber.

2. The only testimony in the record at the time I passed on the case was the testimony of Mr. G. Robert Leavengood of the United States Forest Service, who has been employed by that agency as a timber management assistant and whose duties were the preparation of timber sales in that district. His testimony is:

We have the two values, the over-story and merchantable timber which could be harvested, incidentally \* \* \* the appraisal on that, using the roads and cutting the timber which the Forest Service would normally cut, leaving perhaps 25 percent standing as growing stock, the value of the timber which we would cut now runs about \$77,000 on the contested claims.

Admittedly, timber has increased in value since this record was made up in 1950, but I have difficulty in believing that it has increased as fantastically as some of the figures which have been so freely used.

3. If the mine has been developed, even without the issuance of any patent, the timber would have been available for the purpose of timbering the mine if underground workings were pursued and would have been largely lost to the Government. Even Mr. Hatton, who examined this property for both the Bureau of Land Management and the Forest Service, in his report said that large amounts of timber would necessarily be used in any underground mining operation, and he further said:

Of the mining methods mentioned above, the central mass, being a low-grade proposition with suitable topography, could probably best be mined by the block-caving method. In any event, this method is the cheapest yet devised for large-scale mining of low-grade deposits.

Such methods, it seems to me, would be destructive of any sustained timber yield. I cite these merely as things to be considered in connection with the charge so freely made that this is only a timber-mining proposition.

In conclusion, Mr. Chairman, I should like to say to you that I am a lawyer. This whole controversy is not now and never been anything more to me than another lawsuit between contending parties.

The problems involved are legal and are not political.

I heard the case in the same mental attitude as any appellate court would hear a case on appeal, trying, from a confused record, to ascertain the truth.

I regret that others have chosen to try this case in the newspapers and to try it on issues which in large part are quite immaterial to the actual problems involved. The Department has been subjected to long weeks of criticism, and I am very grateful for the opportunity, at last, of laying before you all of the facts and circumstances.

Thank you, Mr. Chairman, and now may I make before closing—we have here the files relating to this matter as they have been developed through the years. I would like to mention for the record all of these files have been available to the staff of your committee for many, many months in the past. They have been taken out of our office to the committee room, carried back and forth, and have been of complete access to your staff, members of your committee, at all times.

Thank you very much, sir. I do appreciate at last being called and having an opportunity to lay, if I may say, the other side of this story before your committee.

(The following accompanied Mr. Davis' statement:)

STATE OF OREGON,  
DEPARTMENT OF GEOLOGY AND MINERAL INDUSTRIES,  
Portland, June 9, 1953.

HON. HARRIS ELLSWORTH,  
House Office Building, Washington, D. C.

DEAR MR. ELLSWORTH: This is in reply to your letter dated June 4 concerned with the patent application of the Al Sarena Mines, Inc., in Jackson County.

I am sorry that I cannot give you an opinion and answers to your questions based on a personal examination of the property. However, some members of our staff visited the property in the early 1940's and I also have had some up-to-date information from Mr. D. Ford McCormick, consulting engineer at Eagle Point. I have confidence in Mr. McCormick's opinion and judgment, even though he has, I understand, done consulting work for the owner of the Al Sarena mine.

Based on information given me by Mr. McCormick, I would feel that there is a possibility of a large low-grade disseminated ore body containing probably gold, silver, lead, and zinc. It appears that the rocks of the area, consisting of volcanic breccias, rhyolite, and andesite, are altered and bleached, and Mr. McCormick states that he sampled over a considerable area on the surface by digging surface pits and found mineralization disseminated in sufficient amounts to warrant the opinion that a large low-grade deposit might be developed. You will, of course, understand that proving the occurrence of a large deposit is a very expensive proceeding since everything about the ore body should be known, including size and quality, before plans may be made safely for the design of the proper kind of treatment plant. That is the reason why only large experienced and well-financed companies are able to develop the large low-grade mineral deposits.

Going back to your question regarding valid mineral discovery under the mining laws, I feel that because of the underground evidence of economic mineralization as described in our reports and the report in the United States Geological Survey Bulletin 893, *Metalliferous Mineral Deposits of the Cascade Range, Oregon*, as well as the record of production, there could be no valid question

raised against the legality of mineral discovery of the claims upon which the minerals have been developed. I assume from your question regarding a large disseminated deposit that the Bureau of Land Management has questioned the sufficiency of mineral discovery on claims included in the patent application which do not have economic minerals exposed in the underground workings. It seems to me in this case, also assuming that Mr. McCormick's statement is accurate, the claims on which pits were dug, and gold, silver, lead, and zinc values found, would certainly qualify as legal locations under the mining laws.

Although I hold no brief for people who locate mining claims for the purpose of obtaining timber, I believe that Bureau of Land Management people have set up roadblocks in the way of legitimate mining-claim applications for patent whenever there is timber on the claims, and have been making their own rules concerning the legal definitions under the mining laws.

It seems to be fairly well established that both the Bureau of Land Management and the Forest Service will battle to the last ditch the patenting of mining claims which contain merchantable timber irrespective of the mineral values on the claims.

Sincerely yours,

F. W. LIBBEY, *Director.*

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., June 24, 1953.

Hon. CLARENCE DAVIS,  
*Solicitor, Department of the Interior,*  
*Washington, D. C.*

DEAR MR. DAVIS: As agreed upon at the time of our last discussions in reference to the Al Serena Mines, Inc., case, Oregon 0665, I have made inquiry of sources as nearly unbiased in their judgment as I could find and at the same time having some substantial mining and engineering knowledge on which some objective opinion might be based.

I am transmitting herewith originals of four responses to my letters of inquiry. Also a copy of the text of the letters directed to each of these parties. An inquiry was directed to a former director of the State department of geology, who is now a colonel in the Air Force. I discover that he is on leave and my letter apparently had not caught up with him.

Three of the parties are professional engineers of high standing in their profession and whose integrity I do not believe can be questioned. Mr. McCormick is a registered professional engineer and is on the Oregon State Board of Engineer Examiners. Mr. Kissock, in particular, is one of the country's outstanding experts in the mining field, listed in Who's Who, with more than 30 years' experience in responsible capacities as engineer and metallurgist and for more than 10 years engaged in mining consultant work.

This inquiry on my part satisfies me that there is no reasonable question as to the bona fide nature of the mineral discovery and compliance with the mining laws by the applicant for patent. I thought you would like to have these statements for consideration and comparison with any reports received as a result of the check which you expressed the desire to have made through reliable sources.

With cordial regards,

Sincerely yours,

HARRIS ELLSWORTH.

JUNE 4, 1953.

It is my understanding that you have some familiarity with the Al Serena Mines, Inc., development in Jackson County, Ore. It would be helpful to me if you would give me your objective estimate of the merit of this operation.

The history of this property since the initial claims were staked in 1897 or 1898 is rather familiar to me, as well as the developments in the last few years following the application for patent on the 23 claims in the broad-zone boundaries.

I am particularly interested in any observations you may care to make as to valid mineral discovery under the mining law, and any opinions or observations you might have as to the potential development of a large-scale low-grade mining operation.

Also, I shall welcome any other comments which might be helpful to me in appraising the merit of the application for patent. Such information and comment as you may be able to give me at your early convenience will be greatly appreciated.

Sincerely yours,

HARRIS ELLSWORTH.

ALAN KISSOCK & Co.,  
New York, N. Y., June 15, 1953.

HON. HARRIS ELLSWORTH,  
House of Representatives,  
Washington, D. C.

DEAR MR. ELLSWORTH: I am pleased to acknowledge your letter of June 4 relative to the Al Sarena Mines, Inc., development in Jackson County, Oreg., and, as requested, I am glad to tell you what I can regarding this project.

The Al Sarena was brought to the attention of Alan Kissock & Co. by Mr. H. P. McDonald and his two sons, H. P. McDonald, Jr., and Charles McDonald. I visited and made a preliminary examination of the property in October 1945, to determine if it might be of interest to us. Briefly the results of my investigation were as follows:

Mineralization occurs in what appears to be a roughly circular "chimney" of rhyolite which is more or less surrounded by andesite. The mineralization is unusually widespread and assuming it to be actually circular it is safe to say that the diameter of the "chimney" is fully 3,600 feet. Within this area it is difficult to find a single piece of rhyolite which does not at least show some pyrite or oxidation products thereof.

I do not have my notes before me, nor do I recall the amount of exploratory surface and underground work that has been done. I do know, however, that this is quite extensive and since all the claims are contiguous the cost of this alone is ample to cover the work performance requirement of the whole group. There are, in addition, a number of camp buildings and a rather complete mill for concentration and cyanidation of the ore.

A mineralized area of this extent would require a thorough investigation to properly evaluate its possibilities. It was obviously too big an undertaking for us to consider, so that I limited my examination to more or less general observations. I did, however, take a number of samples to determine what might be expected of some of the then available rhyolite exposures.

Tunnel No. 1, and laterals therefrom, crosscuts and exposes at some depth a considerable area of the rhyolite and confirms the extensive mineralization evident at the surface. This tunnel level had been carefully channel sampled (cuts were 4 inches wide by 2 inches deep and from 4 to 6 feet in length from faces, floor, backs, and walls) by a Mr. George Sopp. My underground sampling was confined to "spot" samples, taken at 3-foot intervals along the walls, over several hundred feet of tunnel No. 1 and its laterals. In all, I took some 30 tunnel samples and a number of surface samples, which were assayed by Abbot A. Hanks, Inc., of San Francisco, Calif. Although definitely low grade, these samples all showed pyrite and, with few exceptions, at least some value in gold, silver, lead, and zinc. Many of my "spot" samples were taken at the same points as those channeled by Mr. Sopp. Fortunately his sample pulps had been saved and my assays of these pulps checked quite closely with my "spot" sampling of comparable areas.

As stated, our company was not in position to undertake anything of this grade and magnitude. There is, however, absolutely no question but that there is on the Al Sarena claims a tremendous mineralized area and in my opinion it is definitely a valid mineral discovery under the mining laws. My recommendation to the owners was that from their own standpoint, or any interested and capable party, the property warranted a careful geological and probably geophysical study which, if favorable, should be followed by an exploratory drilling program. There could well be localized concentrations within that mineralized area and although the whole, from what is now evident, may not be considered of immediate economic value, nevertheless, it is to just such large low-grade occurrences that we must look for our future supplies of minerals.

I therefore suggested to the owners that they should patent their ground and I understand they have sincerely complied with all the necessary requirements to do so. In my opinion this application for patent very definitely merits favorable consideration.

Very truly yours,

ALAN KISSOCK.

G. CLEVELAND TAYLOR,  
Sacramento, Calif., June 10, 1953.

HON. HARRIS ELLSWORTH,  
House of Representatives,  
Washington, D. C.

DEAR MR. ELLSWORTH: Your letter of June 4 regarding the Al Serena Mines in Jackson County, Oreg., has been duly received and I shall be glad to comply with your request.

I surveyed the claims for patent, spending some 2 to 3 months on the ground, covering the area quite thoroughly, both on the surface and underground.

My conclusion was that a patent should be granted to the applicants. This has been for many years what might well be termed a legitimate mining operation. The owners have apparently carried out a policy over the years which was believed to be in accord with the existing laws for acquiring mineral land. Much surface and underground work has been done in good faith; many times that required for patent.

The present owners, who have acquired the rights of the original locaters, have always regarded the mine as a broad zone and have predicated their activities on that theory. A pilot mill was built and mill tests are reported to have been made on material broken in numerous crosscuts driven back into the shear zone and away from the fissure which had been mined in the early work.

I observed the large shear zone, or broad zone, in many places, but my work did not call for any sampling. Little of the sulphide minerals appear in the shear zone at the surface as it has been oxidized. In some of the shallow surface tunnels, however, galena and other economic base minerals are plainly visible.

Of course a great deal of systematic drilling or other additional development work is necessary to actually prove a large low-grade ore deposit, but there appears to be sufficient widespread mineralization to prompt a prudent man to carry out such development.

Large low-grade mines are made by development, and as the exact location of the ore is not known until drilling or other development work has been done, the operator would not now be prudent unless he had title to an area sufficient to protect the ore bodies expected.

If additional information is desired I shall gladly cooperate.

Yours faithfully,

G. CLEVELAND TAYLOR.

EAGLE POINT, OREG., June 15, 1953.

MR. HARRIS ELLSWORTH,  
Representative, Fourth District, Oregon,  
Washington, D. C.

DEAR SIR: Your letter of June 4 was received upon my return from a trip South. It pleases me to note your interest in our mining industry in Oregon, as well as in our United States of America. If incentive is not entirely snuffed out we may see some important developments in several areas when the time is ripe.

I did some work at Al Sarena Mines, Inc., when the pilot plant was in operation. Gold, silver, lead, and zinc concentrates were made from the more concentrated mineralizations in the Buzzard Mine to demonstrate the grade of marketable minerals and the feasibility of such an operation. Samples were taken at that time over a wide area on a number of claims and these showed that values seemed to be disseminated over a considerable area in the district, indicating the potential of a large, low-grade deposit. Many assays were made of samples taken from pits, across exposed faces in open cuts, and in creek bottom as well as cliff wall exposures of the country rock. Since that time I understand that considerably more work has been done by the Al Sarena Mines, Inc., on their claims in this area. It was, and is, my opinion that further exploration work be done, possibly by drilling followed by tunneling, shaft sinking, and open cuts made where the most and best information can be secured at the least cost to

further prove the indicated values already exposed. This is an expensive and a time-consuming operation. It often requires years of exploration and development work to reach an operating stage for volume production. I need not cite the many such instances that have occurred in our neighboring States of Arizona, California, Nevada, Idaho, and right recently in our own Oregon where we now have, at long last, the development of the nickel deposit at Riddle (which was known about for so many years but just now coming into production), or Yerrington in Nevada; or the laterite and kaolin-sand deposits in the Ione, Calif., district where the groups of claims or ownership of mineralized areas has been kept more or less intact for many years so that the large low-grade deposits can be handled as a unit rather than going through the tedious and often impracticable process of trying to organize many claim owners (some of whom become greedy or impossible to deal with and spoil the whole scheme of development) so that a working plan can be carried out and a property developed and put into production. Yes, I would say that the Al Sarena, Inc., group of claims has an excellent chance of developing into a large low-grade operation if a well-planned development and exploration program is carried out at the time when circumstances are right for a profitable operation if the property proves out.

While writing you, I wish to state that I agree with you regarding the regrettable procedure stooped to by some unscrupulous individuals denouncing claims under false pretenses to try and obtain timber lands or recreation locations, as commented on by you in the article published in the Medford Mail Tribune of June 11, 1953, under the heading, "Bill Would Require Mine Stakers To Develop a Mine," copy of which is attached. There should be some way to prevent this fraud, but to pass a law placing a time limit or even fixed added amounts of exploration or development of mineralized areas seems to me to be unfair to the prospector and discoverer of minerals on Federal lands. The prospector is not usually a rich man, he often risks his whole life in the search of minerals and spends his lifetime under rugged conditions, not always rewarded by riches, then if he does make a discovery, to pass a law depriving him of the fruits of a lifetime because he cannot spend a fortune on "developing a mine" as suggested by the heading, seems rather near-sighted legislation to me, and certainly will discourage, rather than encourage, the already fast disappearing prospector to spend his days searching the faraway and often more or less inaccessible places. In our part of the country, just now, the rancher, the sheepherder, the lumber interests, fishermen, etc., seem to be agitating the passing of laws for their special benefits that would hurt the mining industry in the long run. Still the fact remains, as is stated in your article, and I quote, "The problem is to take away the nuisance but leave the incentive." So it is with our patent benefits. Worthy projects should be encouraged wherever valid mineral discovery such as would warrant a reasonably prudent man in developing and extracting the minerals from the deposit, as might well be the case at Al Sarena.

Yours very truly,

D. FORD MCCORMICK

---

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., July 16, 1953

HON. CLARENCE DAVIS,  
*Solicitor, Department of Interior,*  
*Washington, D. C.*

DEAR MR. DAVIS: In further reference to the Al Sarena Mines, Inc., case, Oregon 0665, I am attaching herewith the original of the letter received from Col. J. E. Morrison in response to my letter of some weeks ago, the text of which has been transmitted to you with other responses from mining experts.

Colonel Morrison was formerly with the Oregon State Department of Geology and Mineral Industries and is a registered mining engineer in the State of Oregon. For some years he has been serving with the United States Air Force. Colonel Morrison was on leave at the time I wrote him and did not have the opportunity to reply to my letter until his return to his base, thus accounting for the delay in his reply.

Colonel Morrison's comments concur with those of the other individuals previously submitted, indicating valid mineral discovery on the claims covering the patent application.

Sincerely yours,

HARRIS ELLSWORTH

AERONAUTICAL CHART AND INFORMATION CENTER,  
St. Louis, Mo., July 10, 1953.

HON. HARRIS ELLSWORTH,

*House of Representatives, Washington, D. C.*

DEAR MR. ELLSWORTH: Your letter regarding the Al Sarena Mines, Inc., was waiting for me when I returned from leave. Since then I have been trying to locate what information I have on this mine but without avail. Therefore, I am going to have to depend strictly upon my memory.

I first became acquainted with the property in the summer of 1937 as the mining engineer in charge of the Grants Pass office for the Department of Geology and Mineral Industries, State of Oregon. During 1938 and up to November 1939, I visited the property at least a dozen times, looking over the geologic formations, sampling and sizing the property up as to a possible large, low-grade operation. In November 1940, I was placed in charge of a 90-day test run to determine if a 125-ton plant could pay its way on the more mineralized portion of the area.

There is a fairly large area of porphyry on Elk Creek which has been subjected to one or more periods of mineralization. Gold, silver, and other metals have been deposited along the cracks, crevices, faults, and where the formation was porous enough for the mineralizing solutions to penetrate. I have sampled and seen the assays of over a thousand samples from this mineralized area. Like all mineralized areas, the values do not run uniform throughout. Samples from the more mineralized areas will run as high as \$10 or more per ton. The low assays are obtained from the hard porphyry, which the mineralizing solutions had not penetrated. The Al Sarena people have studied this area and consolidated it into a group of claims. All 23 claims, as I remember them, show evidence of this mineralization and do carry gold and silver values.

This property has been examined by a number of reputable mining engineers. Based upon the findings and recommendations of these engineers, the owners have spent thousands of dollars and also their time in developing the property into its present state. There are a number of large, low-grade properties in North America that have made a success of the operation on lower values than those indicated at the Al Sarena. The 90-day test run proved to me it could be made a successful operation. To declare a portion of this group of claims to be nonmineral, in my mind, would be a gross injustice to the owners who have spent so much time and money in developing the property.

Again apologizing for the delay in answering your letter.

Sincerely yours,

J. E. MORRISON,  
*Mining Engineer, Oregon Registry No. 1901.*

#### PUBLIC LANDS:

We will keep this "on ice" until after the final disposition of the Alabama case.

M. G. W.

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., June 21, 1951.

HON. MASTIN G. WHITE,

*Solicitor, United States Department of the Interior,  
Washington 25, D. C.*

MY DEAR MASTIN: Thanks for your letter of June 19, 1951, acknowledging receipt of my letter of June 13, to the appeal (A-26248) of Al Sarena Mines, Inc.

First, I wanted to tell you how much I appreciate the time and all of the information that you gave to my dear friends and constituents, Messrs. Herbert and Charles McDonald, who were in to see you on June 15, and presented oral argument in support of the appeal. I note you will give careful consideration to it, and when a decision is reached, you will send me a copy.

Now, Mastin, I think I have thought of this more than anybody, maybe, with the exception of the stockholders that have spent so much money out there. I just don't believe that all of you have so terribly much to do really and truly understand this proposition. There are stockholders in many States, the

finest men in this country, that believe in this proposition. They have been spending money out there for many, many long years. They have built roads, not only through the property that they own, but through the Interior Department's property.

Herbert McDonald, one of the men that held the good conference with you, has been out there for 16 long years. His father has, along with his friends, over a quarter of a million cash dollars in this proposition. They already have a 100 acres of land there. They only want the adjoining 340 acres of land there. I know that there are a lot of people trying to get 36,000 square miles. They don't want that. I went down to see Mr. Wyatt and spent an hour with him and told him that they did not want the timber—I am talking about the Al Sarena Mines, Inc. They only wanted enough of the timber to develop the mines, and they would be glad to sign a letter or a contract to this effect, but it seems to me that they have bought and paid for their patent, and it also seems to me, regardless of what the Interior Department thinks about this, that they would be mighty glad to see this great company, and these fine, good Americans, try and develop this. Sometime, one group of us know something that the others don't. Anyhow, I think they have a right to spend their money if they want to. We have hundreds and hundreds of thousands of acres out there, and it certainly won't hurt to give these people a chance to see if they can't develop it. Please read my letter close.

Now, these fine young men, Herbert and Charles McDonald, helped me write that letter to you, of course. Read it carefully. Why not give them a chance? Let them have this, say for 10 years, and then if they don't develop it by that time, then turn it back. You have everything to gain and nothing to lose. Look at the valuable materials that they would develop that we need just at this time, and that country needs developing so terribly bad. These are honest people.

I wish you could have seen some of the letters that were sent to Senator Ke-fauver, some of the letters that were sent to Senator O'Mahoney, some of the letters that were sent to about 21 other Senators, and over 100 of the Congressmen. I asked them not to present these letters yet, but just wait, because I know we can work it out, regardless of if it hasn't been handled just according to Hoyle, and if they did make some mistakes out at the hearing, all we want is commonsense. They have bought and paid for a patent and they have their receipt. They only want a chance to develop this mine. They don't want the timber—only what they will need in the development of the mine, which of course, they would have to have, and they will deed the timber back. Now, why not try and let's give them this. It is costing them a lot of money to make trips here. One of these young men came all the way from Chicago, and the other from Mobile, over 1,100 miles away from here. They are spending their time and their money, 16 long years. They have gotten nothing out of it, but they believe, and they have the finances to go ahead and try and start one of the finest developments out there, that they think will do everything that I told you in that letter, that they would do.

So, why no let's let this go on. It is such a small matter. With the hundreds on hundreds of thousands of acres of land out there, and they are only asking for a small amount of 300 acres out there, wild, undeveloped land, and I understand that many people say it is no good. Well, they do. Herbert McDonald has just returned from taking a special course, and he and Charles McDonald are two of the finest young men I know. Charles has the finest record in the Navy that I have ever read. They are all just fine, good, true, great Americans, that have lived within just a few blocks of me all of their lives, right in Mobile, Ala.

As above stated, they have good stockholders that have their hard-earned money in this proposition, and let's give them a chance to get it out. There is no telling what they will do out there. We have everything to gain and nothing to lose. It certainly can't hurt the Interior Department—it certainly can't hurt the Government—it certainly can't hurt the State, and it will only hurt the men that own this property and the stockholders that are willing to put up their money and see if they can't develop what they think is a great proposition. I think we should encourage them and get behind them and help them in every way we can. They are not getting a Government loan to do this—they are using their own money.

I shall deeply appreciate your looking at this, just in a good old Texas or Alabama practical way, and if there are any little technicalities let's knock them out of the way, and go on and try and start something.

I wish we could get some of the products that they say they can manufacture out there, in Mobile, Ala., now. They need them there very, very bad and all over this country.

I do appreciate all of the time that you have given me, and we have talked so many times about it, and I do appreciate the long conference you gave my friends, Messrs. Herbert and Charles McDonald. I hope that we can do something on this, and please, on receipt of this letter, just give me a ring, and I will run over there and talk to you, or we will talk on the phone, and let's try and finish it up and get it started.

Thanks a million and let me know when and where I can help, and with every good wish to you and yours, now and always, I am

Sincerely your friend,

FRANK W. BOYKIN, *Member of Congress.*

P. S.—If you want me to, I can bring a dozen of the finest Senators in this world, all Westerners and Southerners and Northerners, too, and about a hundred Congressmen over there, who believe in this, just as I do. Please try and help us. I will consider it a personal favor.

Since dictating this letter to you, and I did it before daylight, on the old dictaphone, down here, I have just received a letter from Dr. McDonald, the father of the two young men that you know, telling me that the buildings there have burned down. That makes no difference, they are willing to have some more put up and get new machinery. I am asking the FBI to look into it, as it looks like their buildings were set on fire. I don't know anything about that, but I do hope we can get this other matter straight.

Thanks again.

---

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., June 13, 1951.

Mr. MASTIN WHITE,

*Acting Assistant Secretary of the Interior,  
Department of the Interior, Washington 25, D. C.*

MY DEAR MR. SECRETARY: When we talked on the phone the other day, you told me my people from Mobile did not put their evidence on. I believe, after talking to my people, who are here now, that you overlooked the following facts:

1. The patent application itself, based upon the results of 4 months' work by your own Interior Department appointed expert, Mr. Taylor, and upon the findings of about a half a dozen outstanding experts, filed under oath, perfected by final proofs accepted by the Portland office is legal evidence which was refiled and resubmitted in evidence for the record in the original answer, complete with assays of ore from the claims.

2. Further and additional evidence was submitted to you for your consideration in your office last year in the form of additional assays, etc., which had been taken at the direction of the Bureau of Land Management for the record. This was filed for the official report, and consequently for the record, and should be in your hands.

3. There was an agreement between counsel authorizing the substitution of standard court civil rules of procedure. These people relied completely on that agreement and took an appeal from the rulings on the demurrers and motions only, in open hearing. This legally closed the hearing and made anything introduced after that time by either side completely inadmissible.

4. Since anything in the way of opposing evidence in the hearing is inadmissible, under the agreement, the only evidence in the record which is legal is the evidence refiled and resubmitted in the original answer—all in favor of the company—and unrefuted. The Forestry Service has, therefore, failed to prove any charges.

5. You will recall that the Department accepted an appeal based upon the rules of evidence and the rules of practice as obtain in Federal and State courts and sent the matter upon appeal without a decision. You will also recall that the written notice of appeal recited clearly that the appeal on demurrers and motions only was taken under such rules.

6. Your department accepted their final proofs, kept them an ample time, demanded the money, accepted the money, gave them a final purchase receipt reciting that the money was in payment for specific lands, reciting them, and issued a final certificate, but did not issue the patent.

finest men in this country, that believe in this proposition. They have been spending money out there for many, many long years. They have built roads, not only through the property that they own, but through the Interior Department's property.

Herbert McDonald, one of the men that held the good conference with you, has been out there for 16 long years. CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., June 13, 1951.

Mr. MARTIN WHITE,

*Acting Assistant Secretary of the Interior,*

*Department of the Interior, Washington 25, D. C.*

MY DEAR MR. SECRETARY: When we talked on the phone the other day, you told me my people from Mobile did not put their evidence on. I believe, after talking to my people, who are here now, that you overlooked the following facts:

1. The patent application itself, based upon the results of 4 months' work by your own Interior Department appointed expert, Mr. Taylor, and upon the findings of about a half a dozen outstanding experts, filed under oath, perfected by final proofs accepted by the Portland office is legal evidence which was refuted and resubmitted in evidence for the record in the original answer, complete with assays of ore from the claims.

2. Further and additional evidence was submitted to you for your consideration in your office last year in the form of additional assays, etc., which had been taken at the direction of the Bureau of Land Management for the record. This was filed for the official report, and consequently for the record, and should be in your hands.

3. There was an agreement between counsel authorizing the substitution of standard court civil rules of procedure. These people relied completely on that agreement and took an appeal from the rulings on the demurrers and motions only, in open hearing. This legally closed the hearing and made anything introduced after that time by either side completely inadmissible.

4. Since anything in the way of opposing evidence in the hearing is inadmissible, under the agreement, the only evidence in the record which is legal is the evidence refuted and resubmitted in the original answer—all in favor of the company—and unrefuted. The Forestry Service has, therefore, failed to prove any charges.

5. You will recall that the Department accepted an appeal based upon the rules of evidence and the rules of practice as obtain in Federal and State courts and sent the matter upon appeal without a decision. You will also recall that the written notice of appeal recited clearly that the appeal on demurrers and motions only was taken under such rules.

6. Your department accepted their final proofs, kept them an ample time, demanded the money, accepted the money, gave them a final purchase receipt reciting that the money was in payment for specific lands, reciting them, and issued a final certificate, but did not issue the patent.

7. The only way the so-called field examination was made was by the use of false and misleading statements over the signature of the Acting Regional Administrator of the Bureau of Land Management, falsely alleging that the Forest Service had complied with its regulations for making such request during the publication period, December 15, 1948. This is the manner in which the Bureau of Land Management obtained its original jurisdiction, as the regulations prohibit ordinarily, the Bureau of Land Management from making field examinations on its own motion in the national forest. Therefore, the only question before you is the question of demurrers and motions as appealed.

After studying all of the above facts, I wish you would give me a ring and I would like to bring my friends and constituents, Messrs. Herbert and Charles McDonald, over there and talk this over with you. For your information, we have heard a lot about people locating some 3,600 square miles of alleged placer ground within about 20 miles of the property of Al Sarena Mines, Inc. It is the feeling of some of the western delegations that a precedent is being sought by the Forest Service in the denial of patent to a legitimate mining company on its property so that such precedent may be cited to illegitimate claimants to discourage such applications on the part of such illegitimate claimants.

My friends and constituents have been operating 16 long years and the property, itself, is of record in the production and development for 54 years.

I called the attention of the McDonald brothers to what the forestry people had to say, and they say they are not interested in timber and that they will be glad for the Interior Department or the Forestry Department to have the timber on the disputed land, with the exception of the timber needed for mining operations. This certainly shows that my folks are not trying to get timber, but that they are ready, able, and willing to go on and develop a real mining proposition that we need so badly. In addition, the defense picture has taken on an entirely new aspect in regard to this property. The matter of iron pyrite, which the property contains in large quantities, has previously been considered commercial only for the gold and silver chemically combined with the pyrite. However, the pyrite in the new scheme of critical materials has become a very valuable byproduct. In the plans relating to the production and development of this property, there is also a potential production of pyrite sufficient to yield 4,912,128 pounds of sulphuric acid in the leanest areas, and 49,121,280 pounds of sulphuric acid a month in the richer areas. This being the basic defense chemical and in view of the shortage impending in raw materials for its production, it is most worthy of consideration, both for the benefit of right and justice and for the benefit of the United States. The private capital necessary for the significant defense production already planned is available contingent upon actual ownership of the property, which of course, means a patent.

With this time and the fact that they have paid for their patent and having a receipt, it does seem, regardless of how you think it has been handled, to be to the Interior Department's interest to get this great piece of property developed. The Al Sarena Mines have built roads and spent hundreds of thousands of dollars on the development of their property. So, I do hope that you will take a close look at this again and see if we cannot issue this permanent patent and go on to work.

With kind personal regards and thanking you for anything you can do to help us out on this matter, I am

Sincerely your friend,

FRANK W. BOYKIN, M. C.

MARCH 19, 1951.

MR. W. O. MACMAHON,

408 First National Bank Building,  
Mobile, Ala.:

Talked at length to our friend Mastin White after my talk with you this morning. He had already asked Mr. Clawson to rush his decision all he could. He does not know how soon this will be, but will keep us fully posted. Warm regards.

FRANK W. BOYKIN, M. C.

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington, D. C. September 29, 1950.

HON. FRANK W. BOYKIN,  
*House of Representatives*

MY DEAR MR. BOYKIN: This is in response to your telephone request to me for the status of a mineral contest involving Al Sarena Mines, Inc. (Oregon 0665).

The Bureau of Land Management advises me that the manager of the district land office at Portland has not completed his action in the matter.

Sincerely yours,

HARRY M. EDELSTEIN, *Assistant Solicitor.*

DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington, D. C., October 25, 1950.

NOTE TO DIRECTOR CLAWSON, BUREAU OF LAND MANAGEMENT:

On October 24 I received a long-distance telephone call from Representative Boykin at Mobile, Ala. The purpose of his call was to request that the decision on the appeal of Al Sarena Mines, Inc., be expedited. I explained that the appeal is presently pending before you for a determination. Mr. Boykin thereupon asked that I pass his request on to you.

MASTIN G. WHITE, *Solicitor.*

A. W. WILLIAMS INSPECTION CO.,  
*Mobile, Ala., December 17, 1953.*

AL SARENA MINES, INC.,  
408 First National Bank Building,  
*Mobile, Ala.*

GENTLEMEN: Forwarded herewith are four reports covering the assay of samples Al Sarena 1 through 28 submitted by Mr. D. Ford McCormick.

We regret that it has been impossible to complete and report upon this work sooner. We have been seriously hampered here by the absence of key personnel from the office and by the pressure of unexpected emergency assignments.

We sincerely hope that the delay has not operated to inconvenience you.

Yours very truly,

A. W. WILLIAMS INSPECTION CO.  
MORRIS MILLER.

PORTLAND, OREG., September 28, 1950.

JAMES A. LANIGAN,  
*Assistant Chief Counsel:*

RETEL 28 mineral contest *Forest Service v. Al Sarena Mines, Inc.*, Oregon 0665. Claimants tracked Goldy to his California vacation. He referred them here. At conference here afternoon September 8 with me they said they had employed no counsel and volunteered assertion of willingness surrender all timber on claims to Forest Service. Located proper Forest Service personnel for them but they made no effort at contact.

Hearing commenced morning September 13. Clear indication MacMahon en route here at same time claimants were asserting they had no counsel. On opening hearing MacMahon and claimants appeared with boxes of exhibits and own wire recorder. MacMahon launched general attack on proceedings and orally advanced formalistic motions respecting propriety of proceedings and apparently questioning jurisdiction. These motions set forth in written answer filed by company responding to notice of contest. Manager overruled motions and MacMahon refused to proceed, stating that he had personal agreement with solicitor that (1) departmental rules of practice and procedure would not be applicable to this case, (2) that rules of civil procedure for district courts would apply, and (3) that if preliminary motions were overrule appeal would immediately be in order and further proceedings on merits

would be postponed until final determination of such appeal. He added that any testimony produced by other parties at proceeding on 13th would be violation of such agreement and he would attack as such.

MacMahon thereupon gathered exhibits, wire recorder, and departed with company representatives.

Forest Service proceeded to introduce testimony.

MacMahon returned following day; filed formal appeal from rulings on motions. Appeal states Al Sarena introduced no evidence because manager's obvious bias indicated results would be adverse regardless of testimony.

For lack of money proceedings transcribed by land-office stenographer. MacMahon's rapid speech, shouting, and boisterous conduct precluded accurate transcript while he was present. When appeal filed, Rice requested copy MacMahon's wire transcription. MacMahon refused.

Rice expects transcript to be completed, Forest Service brief to be filed, and recommended decision to be forwarded with record to Director in about 10 days.

In view claimants' conduct suggest utter caution talking with them or relying on any representations they make. MacMahon's personal conduct in hearing may raise question propriety his continued admission to practice before Department.

See Director's teletype August 9 (AD-FF), my teletype August 15, and Director's response.

LEONARD B. NETZORG.

---

UNITED STATES SENATE,  
COMMITTEE ON FINANCE,  
October 21, 1950.

Dr. MARION CLAWSON,  
Director, Bureau of Land Management,  
Department of the Interior, Washington, D. C.

DEAR DR. CLAWSON: Senator Millikin has had correspondence with Mr. Pierre M. Rice, Manager of the Land Office at Portland, Oreg., regarding mineral entry Oregon 0665, contest No. 38. In a letter just received from Mr. Rice he states that a hearing on the contest was held September 13, 1950, and on October 2, 1950, the record and recommendations were forwarded to your office for consideration.

The applicant is anxious to get final clearance of this patent. It will be appreciated if you will advise Senator Millikin whether it may be possible to expedite action by your office.

Very truly yours,

RHODA M. ARNOLD, *Secretary*

---

UNITED STATES SENATE,  
COMMITTEE ON FINANCE,  
November 8, 1950.

Mr. H. P. McDONALD,  
President, Al Sarena Mines, Inc.,  
Mobile, Ala.

DEAR MR. McDONALD: With reference to your letter to Senator Millikin of November 4, 1950 regarding Mineral Entry Oregon 0665, on which the Senator has had correspondence with Mr. McDonald of Empire, Colo.

I have talked again with officials at the Bureau of Land Management who stated that they had completed their review of the Portland manager's decision and had sent their recommendations to the legal division for further review before the case goes to the Secretary of the Interior.

The only information I could get from the Bureau was the statement that the regional manager had denied the mineral entry as to those claims which the Forest Service protested but had recommended patenting the other claims. They said that under an order of the Secretary they were not at liberty to report what the Bureau has recommended prior to clearance through the Secretary's office because of the chance that any recommendation of the Bureau might be reversed by the Department's lawyers or by the Secretary.

The Bureau officials mentioned that this case has some difficult aspects and that the questions involved are covered by a 7-page proposed decision which they have drawn up and turned over to the Department's lawyers. They have promised to follow it through these final steps and do what they can to expedite

the decision, but I was unable to get any commitment as to when it may be released. We will continue our follow-up on this and let you know when we get a further report.

I note from your letter you had the impression that a copy of the recommendations of Regional Manager Pierce M. Rice was furnished to this office. However, the copy to which Mr. Rice referred was a carbon copy of his letter of October 17, 1950, to Senator Millikin, the original of which I forwarded to you. The departments follow this practice of enclosing an extra copy of letters to Members of Congress so that one may be sent on to the constituent concerned.

Sincerely yours,

RHODA M. ARNOLD, *Secretary.*

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., April 15, 1953.

Mr. CLARENCE DAVIS,  
*Solicitor, Department of Interior,*  
*Washington 25, D. C.*

DEAR MR. DAVIS: This letter is being written pursuant to the agreement reached with you following the conference with Mr. Charles R. McDonald, Mr. Herbert McDonald, and Mr. Garber of my office relating to the patent application of the Al Sarena Mines, Inc., pending on appeal before the Department. The case is identified as Oregon Mineral Entry 0665.

As you suggested, the Messrs. McDonald on return to Mobile, Ala., made request to the United States District Court for an extension of 60 days from the date of April 6 on which the case had been set down for action. The court saw fit to grant only 30 days, which materially shortens the time during which a possible review on the merits might be made by you or some person of your selection. It is not impossible that the court might grant additional time on proper request by either the Government or the plaintiffs, and if such additional time is desired I am sure the plaintiffs in the case will be glad to cooperate in any way they possibly can.

Enclosed you will find papers which digest the substance of the rather extended file which the Department holds on this case. The following are enclosed:

1. A digest record of proceedings on the patent application.
2. The substance of testimony which would have been given by expert witnesses concerning the Al Sarena Mines, Inc. claims, plus an indication of the grounds for impeaching the testimony of the Forest Service.
3. Data on samples from the claims filed for record.
4. A record of proceedings in contest in Portland, Oreg.
5. A photostat copy with comments on the protest of the Forest Service, showing pages 1 and 4 of the protest.

The record in this case seems to indicate that the file might properly be reviewed in either of two manners: First, on the basis of the record as shown from the time of the filing of the patent application October 1, 1948 until April 6, 1949 when the final certificate of mineral entry was granted. The Forest Service was notified of the filing for patent at the time application was made and was officially notified later by the Department of Interior but took none of the actions required under regulation within the time specified in such regulations. Second, on the basis of the entire record including that mentioned previously; and beginning with the untimely protest filed by the Forest Service, the subsequent vacation of protest, and the events resulting from the further protest by the Forest Service including the hearing at Portland, Oreg. It would appear proper that the pending appeal might be granted for the patent issuance wherein the record indicates at any point the full compliance with the requirements of law on the part of the applicants.

The record will show that part of these claims dated from 1898 and that the last claims located were taken up in the year 1935. A gross expenditure of more than \$200,000 has been put into the development and the immediately family of the principal owners of the corporation personally put approximately 100 man-years into the developments of the claims. The mines were given a quota for the production of materials during World War II and met this obligation. The deposit is a low-grade deposit with a massive ore body which will require very substantial expenditure for equipment to make it a successful large-scale producer. The delays which have occurred have meant severe losses to the claim owners who have been ready, willing, and able to go ahead with a large-scale commercial operation.

If there are questions which arise in the course of the consideration of the appeal in this case, Mr. Charles McDonald is available on very short notice to come to Washington, D. C., to assist in any way possible to supplement the record if that will aid in reaching an early decision. From material already in my files, I may be able to give information on some questions and will be glad to cooperate otherwise in any way I can to facilitate early administrative action on the appeal.

Your attention is appreciated and I shall be grateful to be kept informed of any developments.

Sincerely yours,

HARRIS ELLSWORTH.

---

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., August 27, 1953.

Mr. CLARENCE DAVIS,  
*Solicitor, Department of Interior,*  
*Washington, D. C.*

DEAR MR. DAVIS: As you undoubtedly are informed by this time, the applicant in the Al Sarena Mines, Inc., case (Oregon 0665) is proceeding in accordance with arrangements discussed with Congressman Ellsworth on August 4, as a basis for possible settlement of the question at issue, namely, mineralization on the contested claims.

Inasmuch as this arrangement will require possibly a month of actual examining time, this will run beyond the period covered by the present continuance in connection with the pending case before the United States District Court at Mobile, Ala.

Since the last continuance was granted on request of the applicant, it is suggested that the Government request the continuance necessary to cover the required period to complete the present steps being taken at the suggestion of the Government and which can form the basis of a final settlement of the issues involved.

Your attention and cooperation in this matter are appreciated.

Sincerely yours,

H. S. GARBER, *Secretary.*

---

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington, D. C., January 14, 1954.

Hon. HARRIS ELLSWORTH,  
*House of Representatives.*  
(Attention: Mr. H. S. Garber.)

MY DEAR MR. ELLSWORTH: In view of the interest which you have shown in this case, I enclose two copies of the decision of this Department in the case of *United States v. Al Sarena Mines, Inc.*, A-26248.

Sincerely yours,

CLARENCE A. DAVIS, *Solicitor.*

Senator SCOTT. Thank you, Mr. Davis, and we appreciate your testimony this morning.

We wanted to turn this over to Mr. Coburn, the chief counsel, but in deference to Mr. Barrett, who has sickness in his family that I happen to know about myself, I will let him make an observation. Then I will go back to Mr. Coburn.

Senator BARRETT. Mr. Chairman, I appreciate that. I do not care to ask any questions, because I know that the counsel and the committee intend to do that, but I would like to make a very brief statement before I leave.

Mr. Chairman, at the outset let me commend the witness for that splendid documentation and presentation of the facts as well as the statement of the law applicable to this controversy.

Mr. Chairman, as you know, I practiced law in Wyoming for 37 years and a great deal of my practice involved mining law on the public domain of our State. I can say to you, sir, that in my humble opinion you have completely blown out of the water these so-called charges made against you. There has not been a scintilla of evidence presented in all these voluminous hearings which reflect in the slightest on your integrity or on your legal findings in the handling of this case.

As the chief legal officer of the Department you had no other recourse but to follow the law. No official of the Government, and certainly not the highest legal officer of a great department of our Government, should be criticized for following the law. That is the American way. That is government by law. We do not want a government by men here in America.

I was interested in your comment that these people deposited \$5 an acre when they filed their application for patent. Everybody is required to do that. That has been on the books for 50 years. If there is something wrong about that law Congress should change it, not any department of Government.

I think it is basic that when a mining claimant has complied with the provisions of the mining law the Interior Department and its Solicitor have no choice but to grant patents. You are bound to obey the law. As I see it, that is precisely what you did and in my book you are to be commended for following the law and not to be criticized.

If the high legal officers of our Government fail to observe the law themselves, then we are in a bad way in this country.

I noticed your statement, Mr. Secretary, about the fact that you had not been able to come to this committee for quite some time and that you wanted to testify, and I want to say something here now and I want to make it mighty plain that I am not critical of any member of this committee, certainly not the Senate members of this subcommittee, but I believe a lot of people are unhappy about the manner in which these so-called hearings have been conducted over the past 6 months.

I note in your statement, Mr. Secretary, that you said—and I quote :

I am glad at last to have the privilege of appearing before this committee.

You may have noticed some newspaper accounts of a meeting of our Interior Committee a few days ago. Since the press did get a garbled report of that hearing I want to say here and now that I am free to tell you that this Legislative Oversight Function Subcommittee of our Interior Committee and its actions were the subject matter of considerable discussion in our committee.

I think it is only fair to say that our Interior Committee decided that after this hearing is concluded and that after all of the facts are brought to the attention of the people of America, this Legislative Oversight Function Subcommittee will stand abolished and washed up.

And so, Mr. Secretary, if you are displeased with the manner in which this committee has held hearings all over this country weeks after weeks during the past 6 months without giving you the courtesy of a hearing, you can rest assured that there are many others that feel precisely as you did. So after all these charges are heard and completely disproved, as I think your statement does, I can say to you

that this subcommittee of the Interior Committee is as dead as a door nail.

Mr. Chairman, I certainly do not want my statements here to be misconstrued as being critical of anybody. I think I am just unhappy at the way the hearing has been held for a long period and I want to thank you again for the opportunity of saying a word or two at this time.

Thank you, Mr. Chairman.

Senator SCOTT. Mr. Coburn.

Senator MALONE. Mr. Chairman?

Senator SCOTT. Mr. Coburn will be next.

Senator MALONE. I am going to take issue with you there, Mr. Chairman, and if you want to overrule me you may.

I have to go to the Senate floor and I would like to question briefly the Solicitor. I have never heard before of a Senator being denied the questioning of a witness and having the witness turned over to an attorney that most of us do not even know.

Senator SCOTT. Just go ahead, then.

Senator MALONE. I will.

Mr. Solicitor, I have listened with a great deal of interest to your testimony and statement, and I would like to ask you a couple of questions, the first being: Is it your best judgment—and I take it from your statement that it is—that with the mineral surveyor's report and your own check of the work following your investigation of the mineral surveyor's work that under the law the patent is justified, the patent that you issued.

Mr. DAVIS. Yes; certainly, Senator.

Senator MALONE. Is it a fact that under the law in your judgment the Secretary of the Interior is responsible for the decision?

Mr. DAVIS. Yes, sir; the Secretary of the Interior is responsible for the decision in the sense that as the head of the executive department he is responsible for all the things under him.

Senator MALONE. Whenever there is any matter of judgment to be exercised, under the law the Secretary of the Interior is responsible for that judgment?

Mr. DAVIS. I think that is right, legally. I think I should point out that as a practical matter, of course, as you know, Senator, there are thousands of decisions made by these 50,000 people who work in the Interior that the Secretary never hears of, but if you are talking about legal responsibility, of course, the chain runs right up to the Cabinet officer.

Senator MALONE. I will ask you a further question in that regard: Whenever there is a question of the accuracy of a decision in what you termed a while ago a section of the Bureau, and it becomes controversial the Secretary generally does hear of it?

Mr. DAVIS. That is right frequently. I wouldn't say every time.

Senator MALONE. And the Secretary charges you as Solicitor for the interpretation of the law and questions of this kind?

Mr. DAVIS. That is right.

Senator MALONE. And it is your opinion that through the interpretation of the mining law, the patent law, the conditions as outlined by the mineral surveyor—a letter from this mineral surveyor is a part of the record, I believe.

Mr. DAVIS. That is right.

Senator MALONE. After you have studied his report and made a check of your own, which you have described, in the field, that the patent is justified?

Mr. DAVIS. That's right.

Senator MALONE. What is the law in regard to a profitable operation? Is it necessary in a matter of a patent to prove a profitable operation?

Mr. DAVIS. No, it is not in my opinion, Senator.

Senator MALONE. As a matter of fact, a profitable operation often depends on laws passed by Congress that affect a mine, is it not?

Mr. DAVIS. That is right, and a profitable operation can depend on world economics, the state of the market, and a hundred and one things.

Senator MALONE. This happens to be gold and silver with some lead and zinc. The gold and silver mining, as is well known, was stopped during World War II, was it not, through an Executive order?

Mr. DAVIS. I believe so.

Senator MALONE. What was that Executive order?

Mr. DAVIS. You would know much more than I about that, Senator. I am not in the mining business. I am a lawyer.

Senator MALONE. You may supply that for the record if you will. I will ask you that question and you can supply it for the record as to what was the number, well known at the time, that stopped gold mining on the theory that the gold miners would all go to work on other critical materials. This Executive order was issued—I remember full well as I was acting consultant to the Senate Military Affairs Committee during the war on critical materials—on the theory, and many of us disputed it at that time, that it would work out, that the gold miners would then proceed to lead and zinc, and tungsten mining and other critical materials.

Of course, most of us in the mining country knew that would not happen, but nevertheless it was issued, they said, with that thought in mind.

The second thing, then, that kept the mines closed down, practically all the gold mines in the country except that very profitable one in the Dakotas, and unless they had some other values, was inflation?

Mr. DAVIS. That is right.

Senator MALONE. Are you familiar with the general inflation that affected the feasibility of many operations in the last few years?

Mr. DAVIS. I certainly am. I am familiar with the fixation of the price of gold, the cost of living, and the price of everything. Of course, we are all, Senator.

Senator MALONE. And the cost of labor, and the cost of mining has gone up more than the increase in the price of gold in the last few years, is that not right?

Mr. DAVIS. Yes.

Senator MALONE. So that would again make a mining operation that might be considered profitable after the first raise in the price of gold; that is to say, after it was raised in 1934. Further in the 1934 Trade Agreement Act where the President was given the right to lower tariffs, import fees, or duties, whatever you call them, and then in 1947 transferred that right to the Geneva, where 35 nations at present—and we are only one—are sitting around a board and determining how low our tariffs and duties should go; that very act in itself

made infeasible many mining operations in this country in addition to gold and silver; that is, lead zinc, tungsten, manganese, and other metals. Are you familiar with that effect?

Mr. DAVIS. In general.

Senator MALONE. So then, if it were necessary to prove a profitable operation you would first have to take into consideration what Congress might do in this regard and, second, no two companies are the same in efficiency. You would have to examine efficiencies of the company and all. There are many failures in mining and the same property is taken up later and mined efficiently by other companies: is that not true?

Mr. DAVIS. I think so.

Senator MALONE. Then we have our laboratory work continually going on. There is a laboratory experiment now, that is to say the laboratory work has been successful on manganese, low-grade manganese mining, and many of us believe right now the large manganese deposits in Minnesota and in Maine are feasible of mining if the difference in the labor cost between this country and the chief competitive country is added to the domestic price.

Many of us remember when G. C. Jackling came up out of a laboratory with laboratory success that made it possible to mine one-half of 1 percent copper and up to that time it had to be 7 or 8 percent. You remember, in general, all these experiments.

As a result some of the largest copper pits in the world are in Nevada, Arizona, Utah, and Montana. They lay there 50 million years, I suppose, according to geologists, but suddenly this man, G. C. Jackling, came up with this experiment and made it profitable. You are familiar that with the larger mining machinery, as time goes on, and in road building it has made many mining operations feasible that heretofore were not feasible; is that not true?

Mr. DAVIS. That's right.

Senator MALONE. And it still goes on.

Does then, as a matter of fact—and this may be a repetition—the value of the claim for other purposes have anything to do with the issuance of patent for mining purposes?

Mr. DAVIS. Senator, certainly from the standpoint that you are talking now about having to prognosticate that somebody is going to develop a profitable mining venture, no man has ever been wise enough to do that. We know that.

Senator MALONE. Mr. Secretary, you must say for the record there—it fits it so very well—someone said that no one can talk quite so convincingly on the subject as someone entirely unhampered by the facts. When you take a man right out of school, either an engineer or anyone else, and he knows more about mining than he will ever know again; is that not about right?

Mr. DAVIS. It is true in the law business. I don't know how it is in the mining business.

Senator MALONE. It is true in the engineering business, I can testify. Also I can testify if the mining business were left to the bureaus and to the Government engineers we would have very little mining going on.

Mr. Secretary, are you generally familiar—and I know you must be by now, even though you are from the State of Nebraska where

very little mining goes on—with the location act for the location of mining claims?

Mr. DAVIS. Yes; in general.

Senator MALONE. And the fact that if a man has a discovery, or what he thinks is a discovery, and he puts up his stake and files with the county clerk of that county in that State his location within 30 days, or the specified time, and puts up his corners and every year does a hundred dollars' worth of work in that development he can hold that claim. Are you familiar with that law?

Mr. DAVIS. That's right.

Senator MALONE. Do you believe in that type of legislation to encourage a prospector to find minerals?

Mr. DAVIS. Senator, that is what has developed the mining industry in the United States. That is the best answer, I think.

Senator MALONE. It is the best answer.

Mr. DAVIS. Unless you continue to encourage exploration and discovery and not wait until somebody can draw you a blueprint with a surety bond guarantee that you are going to make a profit, you are not going to have any mines.

Senator MALONE. You have already answered the question and of course I have had a running fight with the SEC for years because they think that it must show a profitable operation before you can sell stock and that you are bilking the public if you sell stock before you have it.

As a matter of fact, in the best mining operations in the country, and probably 90 percent of the mines, stock was sold to develop mines from prospects; is that not about right?

Mr. DAVIS. I would think so.

Senator MALONE. And, of course, it is a gamble, as you said. Any time you go underground it is a gamble as to what you are going to find. Inexperienced engineers may think they know what they are going to find, but experienced engineers know that you do not know. What you do is to figure the gamble and tell your client that you believe that he is justified to spend \$500, or a thousand dollars, or \$50,000 to find out what he might find at 100 feet, or 500 feet, or to go into a certain geological formation; and that is how mining is conducted, is it not?

If the SEC could get complete charge and you had to show a profitable operation before you could sell stock, there would be very little mining under that method of operating, would there not?

Mr. DAVIS. There would, under mines where the capital is provided by a public offering of stock, surely.

Senator MALONE. Besides, after you have a profitable operation you probably would not need to sell stock.

Mr. DAVIS. That could be.

Senator MALONE. Do you believe, then, in this location method of locating mining claims that the patent method of gaining ownership to claims is a good one, to clear up the operation so there is no danger finally, if it has enough value, in losing the claims through, maybe, lack of location or for some reason like a Government order stopping gold mining, or inflation stops it, if it is necessary to hold the claims over a period of time and the work has been done with the necessary development? Do you believe in this patent law?

made infeasible many mining operations in this country in addition to gold and silver; that is, lead zinc, tungsten, manganese, and other metals. Are you familiar with that effect?

Mr. DAVIS. In general.

Senator MALONE. So then, if it were necessary to prove a profitable operation you would first have to take into consideration what Congress might do in this regard and, second, no two companies are the same in efficiency. You would have to examine efficiencies of the company and all. There are many failures in mining and the same property is taken up later and mined efficiently by other companies: is that not true?

Mr. DAVIS. I think so.

Senator MALONE. Then we have our laboratory work continually going on. There is a laboratory experiment now, that is to say the laboratory work has been successful on manganese, low-grade manganese mining, and many of us believe right now the large manganese deposits in Minnesota and in Maine are feasible of mining if the difference in the labor cost between this country and the chief competitive country is added to the domestic price.

Mr. DAVIS. I would think so.

Senator MALONE. And, of course, it is a gamble, as you said. Any time you go underground it is a gamble as to what you are going to find. Inexperienced engineers may think they know what they are going to find, but experienced engineers know that you do not know. What you do is to figure the gamble and tell your client that you believe that he is justified to spend \$500, or a thousand dollars, or \$50,000 to find out what he might find at 100 feet, or 500 feet, or to go into a certain geological formation; and that is how mining is conducted, is it not?

If the SEC could get complete charge and you had to show a profitable operation before you could sell stock, there would be very little mining under that method of operating, would there not?

Mr. DAVIS. There would, under mines where the capital is provided by a public offering of stock, surely.

Senator MALONE. Besides, after you have a profitable operation you probably would not need to sell stock.

Mr. DAVIS. That could be.

Senator MALONE. Do you believe, then, in this location method of locating mining claims that the patent method of gaining ownership to claims is a good one, to clear up the operation so there is no danger finally, if it has enough value, in losing the claims through, maybe, lack of location or for some reason like a Government order stopping gold mining, or inflation stops it, if it is necessary to hold the claims over a period of time and the work has been done with the necessary development? Do you believe in this patent law?

Mr. DAVIS. Yes; I believe in the patent law.

As I say, we have had it for 75 years at least and while I am certainly not a mining lawyer by long ways, as everybody knows, I also would know that you cannot borrow sound money and sound securities on anything less than ownership where you have simply a flexible claim that might, for any one of a dozen reasons, disappear beneath you.

Senator MALONE. There might be a claim, as there often is, with one location on top of another and an allegation that the work was not done properly and a lawsuit ensues which would stop selling securities?

Mr. DAVIS. Senator, in some of these situations, as you know a great deal better than I, there are overlapping claims sometimes 5 and 6 deep right on the same spot.

Senator MALONE. Mr. Secretary, I have gone into mining operations in mining areas, new mining areas, where very valuable deposits have been discovered, and men deliberately locate claims on top of another, as you say 5 or 6 or 8, or 10 deep, on the possibility that a fraction will be located that was not otherwise located, and sometimes some of the greatest mining lawsuits in the United States have been instituted on fractions where the original locator that located the mineral due to some method of setting his corners had overlooked some small fraction, maybe only a few feet in width or length, but he would have to proceed over this ground and he would either have to buy the man out or the fellow could cause him a lot of trouble.

So the patent law, then, is a very important adjunct to mining, you think?

Mr. DAVIS. Yes.

Senator MALONE. Mr. Secretary, I do not know just how much of this operation you have noticed over the 23 years—it will be 24 this year—but there have been continual claims and reports from Secretaries of the Interior—I hope this one does not make one—asking for a leasing act to supplant the Location Act and the patenting of mining claims.

Have you heard of that movement before?

Mr. DAVIS. In a general way is all. I haven't been close to it at all.

Senator MALONE. It has been very close to some of us from the mining country because once you supplant the location method and the leasing method, then these bureaus that you complained about would be in absolute charge and unless a prospector or a miner would dig where they tell him then he could cancel the lease.

That is the objective, to do the mining right from Washington, and I am on the alert and I think this hearing is to lay a foundation for a further amendment to the Mining Act.

Unfortunately your Department fell for the one last year. I am sorry you did, but somebody from there testified that it should be changed because somebody had abused it. However, many of us think that you have plenty of authority and had it then to stop abuse of the act, but now we look for another amendment to come out of this hearing proposed, perhaps not bold enough to first mention the Leasing Act, but if they get away with another amendment the following year or soon after, the Leasing Act will then appear as the plausible way to handle the public lands in the matter of mining.

Many of us know that large companies generally favor the Leasing Act because they get along pretty well. They have plenty of men to do their work and carry the leases. But a prospector is the kind of man I am interested in, because I think I understand, after 35 or 40 years in the mining country and watching it develop, that you have to have some method so that a man who believes in his work and his own method of locating a discovery can get possession, undisputed possession, of that land—as long as he works that is his—and then he can patent under a set of rules that is not oppressive and he owns the land and can develop it in his own way.

However, once you get a leasing act where the Department of Interior could make its own rules, or Agriculture or whatever bureau they put it in in Washington, the tendency has been—this is the 24th year—to move everything to Washington, so that you do not have to get off those soft cushions up there to do the mining, or the farming, or anything else; and we get a little deeper in the mire every year.

Mr. Secretary, I want to say something else to you, mostly for the record, but I know you are familiar with the talk about the prudent men. The prospectors that have this mining fever are not prudent men. If they were and would not dig except where an ordinary prudent man in the street would dig, about 98 percent of our mines would never have been located or never come about.

I think you are generally familiar with that situation, are you not?

Mr. DAVIS. I am.

Senator MALONE. So the attack on the mining law is the basic thing in my opinion through this hearing and it will come to the surface in a very comparatively short time. I think you are just an incident in this thing and in order to lay the foundation before the public, and to protect this great area of Government land, that this act must be changed, you just happen to be in the way. You happen to be occupying the position where the attack had to be directed and there had to be some method found to do it.

I will join my distinguished colleague, Senator Barrett, of Wyoming. I am a member of this committee. I am also a member of the Mining Subcommittee on Minerals, Materials and Fuels, Economic Subcommittee of the Interior and Insular Affairs which up to this time had handled all such questions, and we did have a very friendly discussion in the committee about whether this committee should be extended or not, and I think the decision was not to extend it.

It had never been called to the attention of the committee that we had plenty of subcommittees to handle public lands. We have the Public Lands Committee, a mining committee, and we have an Indian committee, and I think you will find, Mr. Secretary, that from now on it will be handled by those committees that have some experience in the field in which they cover.

Mr. Chairman, would you pay some attention? Is your name Coburn, doing the talking now?

Mr. COBURN. No, I am Coburn.

Senator MALONE. Who is this fellow here? I would like to talk to the chairman, if it is all right with you.

Mr. Chairman, I appreciate the opportunity to examine this witness and due to work on the floor and other committee work—on the Senate Finance Committee we have been very busy on sugar legislation, and now on social security—it is impossible for us to attend all the hear-

ings, but I do want to attend if there are going to be any more bureau officials called in. Will the Secretary, himself, be called?

Senator SCOTT. That was the decision the other day.

Senator MALONE. I would like to be notified when the Secretary is called so that I might be here, and I thank you very kindly.

Senator SCOTT. We will declare a 5-minute recess, and then we will come right back.

Senator Neuberger is next.

I would like to make this observation: That in the Interior Committee, yesterday, we were censored a little bit for not moving along and getting this job done. I want to hear Senator Neuberger next and then we will go back to Mr. Coburn, the chief counsel. I want to adjourn certainly by 12:30 and meet again at 2 o'clock.

We will declare a 5-minute recess at the moment.

(Whereupon, there was a brief recess.)

Senator SCOTT. The meeting will please come to order.

We will recess at 12:30 and then come back promptly at 2 o'clock.

Senator Neuberger?

Senator NEUBERGER. Mr. Chairman, I would just like to say for the record it is obvious there is only about 10 minutes until we recess for lunch, and the Senator from Wyoming and the Senator from Nevada took approximately 45 minutes so I would like the courtesy of being able to open again when we take up after lunch, which will be what time?

Senator SCOTT. Two o'clock.

Senator NEUBERGER. Thank you very much.

Mr. Davis, it is obvious there will be very little time for questioning before lunch, which is only about 10 minutes. I would just like to ask several questions. In your testimony, Mr. Secretary, you mentioned several times that your role was equivalent to that of a judge in the proceeding. I think you mentioned the term "appellate judge," if I am not mistaken.

On page 23 is a letter signed by you to the Director of the Bureau of Mines. In the letter appears this sentence:

I am aware of the peculiar nature of the area that they say is mineralized and want to approve patent for them if the assays afford us the well-established legal basis therefor.

In view of the fact, Mr. Secretary, that you compared your role to that of an appellate judge, would you not consider it rather strange if an appellate judge hearing a case wrote a letter in which he said he wanted to reach a certain verdict?

Mr. DAVIS. No, I wouldn't consider it strange. Obviously, when you get to reviewing that directive to the Bureau of Mines, I realized long before you did that that sentence stood out and that I would have it thrown at me. I am delighted you throw it at me as the first question.

I want to call to your attention the fact that what I actually sent to the Bureau of Mines was a copy of this letter to Al Sarena and a copy of the letter to Mr. McCormick. I sent a copy of everybody's instructions to everybody else.

I would like to call your attention to the fact that the last sentence in the directive says:

My principal concern is to have a qualified Government representative present to see that the assay samples are fairly taken from each claim and then delivered to a competent assayer.

I think if you read all three of those letters you will very materially deemphasize the particular sentence that you have chosen to read.

Senator NEUBERGER. If the Chief of the Forest Service had written the letter in which he said he wanted to deny patent under certain circumstances, would you consider that an indication of prejudice?

Mr. DAVIS. I would not, Senator, any more than I do consider this one. I think in all fairness you have to read the three documents by which this thing was submitted to the Forest Service. I think if you will read the three of them the repeated emphasis was on getting assays taken out there on the ground about which there could be no question and having them assayed by a competent assayer.

Despite the fact that the wording of it, I realize, is being seized upon, will be seized upon, there is no significance to the sentence. As a matter of fact, the original record here will show that I didn't even write the memorandum.

Senator NEUBERGER. You signed it.

Mr. DAVIS. I signed the memo. That is right. I am not dodging responsibility. I am just pointing out that the actual choice of words is not my own.

Senator NEUBERGER. Inasmuch as you say that this would be seized upon, it is something that you signed, Mr. Secretary, and in your own testimony you have, in substantiation of the course which you followed, jotted just hearsay comments by people who came in and out of your offices about sustaining the boys in the field, so you certainly cannot object if you are asked a question about a letter which you signed.

Mr. DAVIS. I do not object at all. I just want to explain it.

Senator NEUBERGER. Thank you, Mr. Secretary. On pages 25 and 26 you speak very highly about the Bureau of Mines. Before I ask you about that I would like to ask one collateral question. At the top of page 26 you say:

I should also like to point out to you that personnel of this Bureau have not been in any manner changed by the present administration.

I am just asking a question now from memory. Did not the Secretary of the Interior appoint a new Director of Mine Safety and then withdraw the man's name because it was found that he was still on the payroll of a certain large mining company? Am I correct or incorrect about that?

Mr. DAVIS. I think there was some dispute about that nomination, but the man who was appointed, of course, John Forbes, has spent a lifetime with the Bureau of Mines. He retired the other day with very great credit and ceremonies for a magnificent piece of work.

Senator NEUBERGER. I am just informed that the man who was appointed by the Secretary and whose nomination was sent to the Congress was a man named Lyons. He spent a lifetime with the Bureau of Mines.

Mr. DAVIS. I don't know.

Senator NEUBERGER. You made the statement that the personnel of this Bureau has not been in any manner changed by the present administration. I am just asking about that nomination.

Mr. DAVIS. I think that is true.

Senator NEUBERGER. Did not the Secretary appoint him and then withdraw the appointment?

Mr. DAVIS. I think that he may have been nominated, but he was never active.

Senator NEUBERGER. Is it not somewhat misleading—

Mr. DAVIS. I don't think so.

Senator NEUBERGER. Inasmuch as an appointment to a very important position in the Bureau of Mines was withdrawn under fire? Would you then say that no attempt had been made to change the personnel?

Mr. DAVIS. The statement doesn't say that no attempt has been made. The statement says the personnel has not been changed, and I think that's right.

Senator NEUBERGER. Because an appointment made by your Department was withdrawn because of the criticism of the appointment and the facts brought out about the appointment?

Mr. DAVIS. Senator, we are talking here about some people who did some things up and down the line of the Bureau of Mines. Those people have not been changed. They have been there all the time. Whether there were 29 people suggested for 29 other jobs which they never filled, I don't know, and I don't think it's very material to the controversy.

Senator NEUBERGER. Except it's material to your testimony, and you put in the comment; I didn't. You say:

the personnel of this Bureau had not been in any manner changed by the present administration.

Mr. DAVIS. It hasn't been changed.

Senator NEUBERGER. It has not been changed because a very important appointment to a very important position was withdrawn after it had been made; is that not correct?

Mr. DAVIS. Frankly, I don't know that that is true. As I recall it in the newspapers, it may be.

Senator NEUBERGER. You had 3 or 4 paragraphs in which you spoke about the United States Bureau of Mines being a great technical organization, that you have complete confidence in the integrity of the Bureau of Mines, and that you resent the aspersions cast on its employees, and so on.

Mr. DAVIS. That is right.

Senator NEUBERGER. I think that your comments on the Bureau of Mines are very correct. I would like to ask this, Mr. Secretary: In view of your great confidence in the Bureau of Mines why did you not just have the Bureau of Mines conduct this assay? Why did you have Mr. McCormick, the hired employee of the Al Sarena Co., participate in it? Why did you specify that Al Sarena should have to reach agreement as to the firm that did the assaying? Why would you not let the Bureau of Mines just undertake the whole thing and conduct the assay if you have such confidence in them?

Mr. DAVIS. Which one of those 20 questions do you want me to answer first?

Senator NEUBERGER. I would like to ask this question: In view of your complete confidence in the Bureau of Mines why did you not let them undertake the assay?

Mr. DAVIS. I didn't let them undertake the assay for at least a couple of reasons that occur to me. One of them, and the primary one, was because here was a dispute between these people and the Bureau of Land Management.

Maybe I was too much of a lawyer, but my disposition has been through the years and always has been to try to get neutral people to settle controversies. For me to haul off and order the Bureau of Mines to handle this whole thing and make a report would have been a perfectly proper thing. I haven't any doubt of that. However, it also seemed to me that with all the controversy that was raging it was highly desirable that these other people also be given a medium of determining the controversy in which they also had confidence.

The way you do that is to say to these people: "You get together and pick some neutral party to perform this function."

Senator NEUBERGER. Was not the Bureau of Mines a neutral party?

Mr. DAVIS. Yes, I think the Bureau of Mines was a neutral party.

Senator NEUBERGER. Why did you not let them decide it, then?

Mr. DAVIS. Because it just seemed to me that the thing to do was to get some one in whom you had a precommitted expression of confidence in the result.

Senator NEUBERGER. You just said you have confidence in your testimony in the Bureau of Mines.

Mr. DAVIS. That is right; I have.

Senator NEUBERGER. Was not the Bureau of Mines a neutral party?

Mr. DAVIS. I think so, yes.

Senator NEUBERGER. Do you think the Bureau of Mines is any less a neutral party than an assayer in which the Al Sarena Co. had to concur?

Mr. DAVIS. No.

Senator NEUBERGER. You just said that you believed these things should be settled by a neutral party and you have said that you regard the Bureau of Mines as a neutral party, and I certainly would agree with you in that. Why, then, did you not let the neutral party, the Bureau of Mines, decide it instead of an assayer in which the Al Sarena Co. had to concur?

Mr. DAVIS. I did let them decide it in the sense that they had to concur. The assayer chosen had to be one that was acceptable to the Bureau of Mines.

Senator NEUBERGER. And to the Al Sarena Co.?

Mr. DAVIS. That is right.

Senator NEUBERGER. Do you regard that as more neutral than the Bureau of Mines?

Mr. DAVIS. I regard that as a very fair way of settling a controversy of this nature; yes.

Senator NEUBERGER. I still do not think you have explained why you did not let the Bureau of Mines do it. You have a whole section of your testimony praising the Bureau of Mines, which is fine, and yet you still do not explain why you did not let the Bureau of Mines decide whether or not there was mineralization on these mining claims.

Mr. DAVIS. I don't know what there is to explain. I have told you that it seemed to me with all of the accusations of prejudice that were

running through this record the only way in which you could settle that matter fairly to the satisfaction of everybody concerned was to use some assay house which the Bureau of Mines would approve and which these contestants would approve.

Senator NEUBERGER. Was there any allegation of prejudice against the Bureau of Mines?

Mr. DAVIS. No, not so far as I know at all.

Senator NEUBERGER. And yet you did not use the Bureau of Mines to make the assay?

Mr. DAVIS. That is right.

Senator NEUBERGER. And they had a laboratory in Albany, Oreg.

Mr. DAVIS. That is right. I know that now. I am not at all sure I knew that at the time. I just like to point out to you that this all happened within about the first 4 months after I came into Washington and that my knowledge of a lot of these bureaus was a lot less than it is now, and it is not too great yet.

Senator NEUBERGER. You did not know that the Bureau of Mines had a large laboratory, quite an extensive operation, at Albany, Oreg., perhaps 200 or 180 miles from the site of these claims?

Mr. DAVIS. Senator, I wouldn't say that I didn't know it. I just don't remember whether I knew it or not. As a matter of fact, the laboratory at Albany, as I recall, is set up for a lot of other purposes and the aspect of its being a well-known assay house, so to speak. I am not too sure I ever thought of it in that particular connection; but whether I did or not, these people of the Bureau of Mines were at perfect liberty to go about this thing any way they saw fit.

Senator NEUBERGER. They were free to select an assaying company which Al Sarena did not concur in?

Mr. DAVIS. No; obviously not.

Senator NEUBERGER. You said they were free to go about it in any way which they saw fit. Is that statement correct?

Mr. DAVIS. Subject to the terms of the instructions.

Senator NEUBERGER. Subject to your instructions. Is that not a lot different? Will you read Mr. Davis' answer about the Bureau of Mines, please, to answer my question? He said something about the people there being at liberty to go about this in any way they saw fit.

Mr. DAVIS. He doesn't need to read it.

Senator NEUBERGER. That answer was correct?

Mr. DAVIS. Within the confines of the delegation of authority it is correct.

Senator NEUBERGER. That is very different, is it not?

Mr. DAVIS. I suppose that is different; yes.

Senator NEUBERGER. Mr. Volin testified—I do not have it right here and would be glad to have anybody correct me—that if he had not been bound by your instructions he would have selected a different assaying firm. I do not recall the names exactly, but he would have selected some traditional assaying firm used by Federal agencies on the west coast, if I am not mistaken, if he had not been bound by your instructions. So the Bureau of Mines could not proceed as it saw fit unless it conformed to your instructions, is that not correct?

Mr. DAVIS. That is right.

Senator NEUBERGER. I see it is 12:20, and I do not want to go beyond the time you said.

Senator SCOTT. We will adjourn and meet again at 2 o'clock with Senator Neuberger in charge.

(Whereupon, at 12:20 p. m. the hearing was adjourned to reconvene at 2 p. m. the same day.)

## AFTER RECESS

Senator NEUBERGER. The committee will please come to order.

The chairman has asked if we would start in his absence and he will return as soon as some conflicting duties make that possible.

Representative HOFFMAN. Mr. Chairman, before you go into that, may I offer in evidence here three letters which have to do with the efforts of the McDonalds to get speedy action?

One of the issues that was in the case was that the Secretary or that the Solicitor acted too quickly. You will remember the testimony of Mr. Appling and others along that same line. Now this is along that line.

I would like to offer these three letters.

Senator NEUBERGER. May we just see the letters?

I have no objection to the letters being offered in the case.

Representative HOFFMAN. All they show is that the McDonalds were making every effort possible to expedite the matter, and of course that is what the Secretary and the assistant, I assume, were trying to do.

There are no reflections, Mr. Chairman, on anybody. They just show that the McDonalds were doing everything possible to have these patents issued.

Senator NEUBERGER. We will accept the letters as part of the record.

Representative HOFFMAN. Thank you.

(The letters referred to are as follows:)

UNITED STATES SENATE,  
COMMITTEE ON THE JUDICIARY,  
January 10, 1952.

Mr. CHARLES R. McDONALD,  
Project Engineer, Al Sarena Mines, Inc.,  
406 First National Bank Building,  
Mobile, Ala.

DEAR Mr. McDONALD: Thank you for your most complete letter. I am writing to keep you posted on any action with regard to your case. I appreciate your situation and I am keeping in close contact with Senator Sparkman, Senator Hill, and Congressman Boykin in this respect.

I shall keep your records in my file for my use and will make every attempt to secure action in your case.

It was good to talk to you in New Orleans and I hope we may have the opportunity to see one another again. Best wishes for the coming year.

Sincerely,

ESTES KEFAUVER.

UNITED STATES SENATE,  
COMMITTEE ON THE JUDICIARY,  
March 20, 1952.

Mr. CHARLES R. McDONALD,  
Al Sarena Mines, Inc.,  
Project Engineer, Trail, Oreg.

DEAR Mr. McDONALD: I have received your recent letter, and I surely appreciate your many kind comments.

I am in contact with the Department of the Interior with regard to your case, and they have informed me that it is pending termination of litigation.

This litigation has been in progress since February 12, 1952, and the United States Attorney will immediately contact that Department upon decision.

I am sorry that I have nothing more definite to report to you, but you may be assured that I am in touch with the situation, and I will do all possible to assist you.

My best personal regards.

Sincerely,

ESTES KEFAUVER

UNITED STATES SENATE,  
COMMITTEE ON THE JUDICIARY,  
April 17, 1952.

**Mr. CHARLES R. McDONALD,**  
*Project Engineer, Al Sarena Mines, Inc.,  
Trail, Oreg.*

DEAR MR. McDONALD: Your most recent letter has arrived, and since Senator Kefauver is out of the office, I am sorry that I cannot give you a more satisfactory reply.

Senator will probably have an opportunity to look over your file soon, and in that event, you can expect to hear from him at that time.

If you would care to give me any further facts on the situation, I will be happy to help you all I can.

Best regards.

Sincerely,

FRANK BRIZZI,  
*Legislative Assistant to Estes Kefauver, United States Senator.*

# **STATEMENT OF CLARENCE A. DAVIS, UNDER SECRETARY OF THE DEPARTMENT OF THE INTERIOR—Resumed**

Mr. DAVIS. Might I see them to know what they are?

Senator NEUBERGER. Yes.

Mr. Secretary, on page 7 of your testimony you refer to the fact that the timber on these claims was of negligible value in 1897 at the time the earlier claims were filed on, and that it was of negligible value in the 1930's?

Mr. DAVIS. That is right.

Senator NEUBERGER. Is it not correct that the timber was of quite substantial value in 1948 when the company first applied for patent?

Mr. DAVIS. Yes, Senator, it was of substantial value; no question about that, I would think.

Senator NEUBERGER. And that even before they applied for patent, as you brought out, they could do everything they wanted with that timber except sell it commercially; is that not correct?

Mr. DAVIS. Not everything. They could use it in their mining operation.

Senator NEUBERGER. They could not sell it commercially until patent was granted?

Mr. DAVIS. I believe that is correct.

Senator NEUBERGER. They did not apply for patent until the timber had greatly expanded in value?

Mr. DAVIS. I think that is true, yes; that is, timber prices were rising. I would expect, in 1948. I suspect you would come nearer knowing than I would.

Senator NEUBERGER. In your letter of instructions to the Bureau of Mines, Mr. Secretary, you said that the expense and the assaying cost will have to be borne by you, meaning the Al Sarena Co. Why did you include that?

Mr. DAVIS. Because they were the contestants and they were complaining about the entire record and they were the people who were insisting that if independent assays were taken that they would show an adequate mineralization, so it seemed to me the fair thing to do was to require them to pay for it.

Senator NEUBERGER. Was not the Forest Service a contestant, too, in this?

Mr. DAVIS. That is right.

Senator NEUBERGER. Was any of this record ever submitted to the Forest Service for their opinions after it was made? Did you ever submit it to the Forest Service inasmuch as they were a contestant too?

Mr. DAVIS. I do not think we did.

Senator NEUBERGER. Would not that have been the reasonable thing to do?

Mr. DAVIS. I do not think so necessarily. The Forest Service's testimony was in the record. They had already had a full hearing. They had had their lawyers down there and their witnesses down there and they had fixed the value of this timber at \$77,000 in the record.

The thing that we were doing was not continuing a contest between two parties. We were trying to get an independent answer to this question of mineralization.

Senator NEUBERGER. And yet you did not let the Bureau of Mines make the assay? You required that it had to be a firm to which the Al Sarena Co. would agree to?

Mr. DAVIS. That is right, and I think that was a sound decision. The more I think of it, the more I am convinced that it was a sound decision.

Here were these people complaining bitterly that their Government, the Bureau of Land Management and their Government, was not doing the right thing by them. To pick up this thing and hand it to another bureau of the Interior Department, all staffed at the top by the same Secretary, same department of the Government, and say, "Well, this is what we are going to do," it does not seem to me that is a thing which inspires confidence in a person dealing with the Government.

It seems to me it is much better to refer the thing to someone in whom they have some confidence and, therefore, have no further legitimate complaint if the assay turns out unsatisfactory.

Senator NEUBERGER. You were thinking only then of inspiring the confidence of the Al Sarena Co. What about the public?

Mr. DAVIS. I was thinking about inspiring confidence in everybody concerned in this thing, including myself.

Senator NEUBERGER. You have said in earlier testimony that you felt the Bureau of Mines was completely neutral and you have had a substantial portion of your testimony lauding the integrity of the Bureau of Mines, and yet you do not think it would inspire confidence in the Government to turn this matter over to the Bureau of Mines?

Mr. DAVIS. Not necessarily, not necessarily. I may have confidence in the Bureau of Mines, but somebody looking in from the outside who says that this is the Department of the Interior, all they did to me was move it from one bureau to another of their bureaus, does not inspire too much confidence.

Senator NEUBERGER. You referred to the case of the *United States v. Cameron* on page 24:

\* \* \* in the leading case of *United States v. Cameron*, involving mineral claims on the Bright Angel Trail in the Grand Canyon. In that case the Secretary referred the matter to the Geological Survey.

Mr. DAVIS. That is right.

Senator NEUBERGER (continuing):

\* \* \* and was affirmed by the Supreme Court of the United States.

You have cited this as a precedent. Why do you cite as precedent a case in which it was presumably turned over to the geological survey, and yet you say it would not have inspired confidence to have turned it over to the Bureau of Mines?

Mr. DAVIS. I say that because it is simply cited as an example of similar action of other Secretaries in calling upon independent advice from other agencies and other bureaus.

Senator NEUBERGER. But you did not; that is the point I am making. This does not follow that case.

You cited a case which you did not follow. The Bureau of Mines was not free to make the decision, as you say here, that the geological survey could do.

Mr. DAVIS. The Bureau of Mines were perfectly free to supervise the whole thing to their satisfaction, which they did, and they have so testified.

Senator NEUBERGER. I beg to disagree.

Mr. Volin testified that had he not been bound by your instructions, he would have sent these minerals to a far different assayer for testing. If I am not mistaken, Mr. Volin has so testified that the Bureau of Mines was not free as you say.

Representative JONAS. Will the Senator yield?

Senator NEUBERGER. Yes.

Representative JONAS. I do not recall that he testified quite that way. An effort was made to get him to testify to that. I asked him the specific question if he intended that any implications be drawn that he was compelled to abide by any decisions that the Al Sarena people made in making this selection, and he said "No."

He further testified that he did not insist on having these assays made by a house out in the Northwest, that he merely suggested 2 or 3 houses and a countersuggestion was made by the Al Sarena people; and he investigated the house suggested by the Al Sarena people, satisfied himself that it was reputable and qualified, and did not insist on using the Bureau's laboratory or any other assay house in the Northwest.

Senator NEUBERGER. We will check Mr. Volin's testimony.

It is my recollection that Mr. Volin testified that had there not been this instruction from the Under Secretary, then solicitor, that he would have sent it to Abbot Hanks or to the Ennis Laboratories.

We will check and see whether Mr. Volin said that.

Mr. Davis, is it not true that after this case was appealed to the present Secretary of the Interior, you ordered investigation without serving notice of any kind on the United States Forest Service, which was a contestant in the matter?

Mr. DAVIS. I did not order any investigation. What do you mean by that?

Senator NEUBERGER. Well, you ordered a further examination of this case; that was your instruction?

Mr. DAVIS. I made up my mind to make a further examination of it; yes.

Senator NEUBERGER. Did you serve any notice at all on the Forest Service?

Mr. DAVIS. No; I think not.

Senator NEUBERGER. Was not the Forest Service a contestant in this matter until your final granting of patent was handed down?

Mr. DAVIS. I think they might be called a contestant; at least they were in the record as having objected.

Senator NEUBERGER. Do you not think the Forest Service should have been notified inasmuch as they were a contestant?

Mr. DAVIS. I am not at all sure they should have. This is a matter of appointing an independent investigator to investigate and make a report of the facts. I did not feel and do not now that there was any necessity for notifying the Forest Service.

Senator NEUBERGER. Do you believe that an assay house in which one of the claimants had to concur was an independent investigator?

Mr. DAVIS. Yes; I would think so.

Senator NEUBERGER. In your opinion, that would qualify as an independent investigator?

Mr. DAVIS. I would think so. I would think that if you and I had a dispute and we could not settle it any other way and we agreed to let one of our colleagues settle it, which is very common; I do not think there is any more fair way of settling a dispute than that of having the parties agree that we will have so-and-so settle it for us.

Senator NEUBERGER. You think this was absolutely fair?

Mr. DAVIS. I think it was a reasonable procedure and I think it was fair, yes.

Senator NEUBERGER. Did the Forest Service agree? You said the parties agreed. I did not think the Forest Service agreed.

Mr. DAVIS. After all, this is a procedure in the Bureau of Land Management primarily.

Senator NEUBERGER. Was the Forest Service a contestant?

Mr. DAVIS. They were a contestant and produced testimony; however, the testimony they produced was almost entirely, except as to the values, by the employees of the Bureau of Land Management.

Senator NEUBERGER. Did not the Forest Service represent the United States Government? They were the agency that had jurisdiction over the land involved?

Mr. DAVIS. They have some jurisdiction over the land involved, yes, but so does the Bureau of Land Management.

Senator NEUBERGER. It was part of the national forest?

Mr. DAVIS. Also part of the public domain so far as mineral claims were concerned.

Senator NEUBERGER. Is this not a fact, that you have compared this to an appellate court proceeding several times, I think?

Mr. DAVIS. That is right.

Senator NEUBERGER. You know more about this than I do, perhaps I am wrong and if so I would appreciate being enlightened. When a record goes up to an appellate court, does an appellate court take further evidence or does it rely on the record or remand it back for further evidence from the same sources?

Senator NEUBERGER. You referred to the case of the *United States v. Cameron* on page 24:

\* \* \* in the leading case of *United States v. Cameron*, involving mining claims on the Bright Angel Trail in the Grand Canyon. In that case the Secretary referred the matter to the Geological Survey.

Mr. DAVIS. That is right.

Senator NEUBERGER (continuing):

\* \* \* and was affirmed by the Supreme Court of the United States.

You have cited this as a precedent. Why do you cite as precedent a case in which it was presumably turned over to the geological survey, and yet you say it would not have inspired confidence to have turned it over to the Bureau of Mines?

Mr. DAVIS. I say that because it is simply cited as an example of similar action of other Secretaries in calling upon independent advice from other agencies and other bureaus.

Senator NEUBERGER. But you did not; that is the point I am making. This does not follow that case.

You cited a case which you did not follow. The Bureau of Mines was not free to make the decision, as you say here, that the geological survey could do.

Mr. DAVIS. The Bureau of Mines were perfectly free to supervise the whole thing to their satisfaction, which they did, and they have so testified.

Senator NEUBERGER. I beg to disagree.

Mr. Volin testified that had he not been bound by your instructions, he would have sent these minerals to a far different assayer for testing. If I am not mistaken, Mr. Volin has so testified that the Bureau of Mines was not free as you say.

Representative JONAS. Will the Senator yield?

Senator NEUBERGER. Yes.

Representative JONAS. I do not recall that he testified quite that way. An effort was made to get him to testify to that. I asked him the specific question if he intended that any implications be drawn that he was compelled to abide by any decisions that the Al Sarena people made in making this selection, and he said "No."

He further testified that he did not insist on having these assays made by a house out in the Northwest, that he merely suggested 2 or 3 houses and a countersuggestion was made by the Al Sarena people; and he investigated the house suggested by the Al Sarena people, satisfied himself that it was reputable and qualified, and did not insist on using the Bureau's laboratory or any other assay house in the Northwest.

Senator NEUBERGER. We will check Mr. Volin's testimony.

It is my recollection that Mr. Volin testified that had there not been this instruction from the Under Secretary, then solicitor, that he would have sent it to Abbot Hanks or to the Ennis Laboratories.

We will check and see whether Mr. Volin said that.

Mr. Davis, is it not true that after this case was appealed to the present Secretary of the Interior, you ordered investigation without serving notice of any kind on the United States Forest Service, which was a contestant in the matter?

Mr. DAVIS. I did not order any investigation. What do you mean by that?

Senator NEUBERGER. Well, you ordered a further examination of this case; that was your instruction?

Mr. DAVIS. I made up my mind to make a further examination of it; yes.

Senator NEUBERGER. Did you serve any notice at all on the Forest Service?

Mr. DAVIS. No; I think not.

Senator NEUBERGER. Was not the Forest Service a contestant in this matter until your final granting of patent was handed down?

Mr. DAVIS. I think they might be called a contestant; at least they were in the record as having objected.

Senator NEUBERGER. Do you not think the Forest Service should have been notified inasmuch as they were a contestant?

Mr. DAVIS. I am not at all sure they should have. This is a matter of appointing an independent investigator to investigate and make a report of the facts. I did not feel and do not now that there was any necessity for notifying the Forest Service.

Senator NEUBERGER. Do you believe that an assay house in which one of the claimants had to concur was an independent investigator?

Mr. DAVIS. Yes; I would think so.

Senator NEUBERGER. In your opinion, that would qualify as an independent investigator?

Mr. DAVIS. I would think so. I would think that if you and I had a dispute and we could not settle it any other way and we agreed to let one of our colleagues settle it, which is very common; I do not think there is any more fair way of settling a dispute than that of having the parties agree that we will have so-and-so settle it for us.

Senator NEUBERGER. You think this was absolutely fair?

Mr. DAVIS. I think it was a reasonable procedure and I think it was fair, yes.

Senator NEUBERGER. Did the Forest Service agree? You said the parties agreed. I did not think the Forest Service agreed.

Mr. DAVIS. After all, this is a procedure in the Bureau of Land Management primarily.

Senator NEUBERGER. Was the Forest Service a contestant?

Mr. DAVIS. They were a contestant and produced testimony; however, the testimony they produced was almost entirely, except as to the values, by the employees of the Bureau of Land Management.

Senator NEUBERGER. Did not the Forest Service represent the United States Government? They were the agency that had jurisdiction over the land involved?

Mr. DAVIS. They have some jurisdiction over the land involved, yes, but so does the Bureau of Land Management.

Senator NEUBERGER. It was part of the national forest?

Mr. DAVIS. Also part of the public domain so far as mineral claims were concerned.

Senator NEUBERGER. Is this not a fact, that you have compared this to an appellate court proceeding several times, I think?

Mr. DAVIS. That is right.

Senator NEUBERGER. You know more about this than I do, perhaps I am wrong and if so I would appreciate being enlightened. When a record goes up to an appellate court, does an appellate court take further evidence or does it rely on the record or remand it back for further evidence from the same sources?

Mr. DAVIS. Ordinarily, in the judicial system, of course the appellate court does not take further evidence. In that respect, the administrative process differs from the judicial process, that is true. They are not identical, Senator.

I have not even pretended that they were but I think they are quite a similar proceeding.

Senator NEUBERGER. But you yourself have said in your testimony that you were, in effect, an appellate judge?

Mr. DAVIS. That is right, of an administrative proceeding.

Senator NEUBERGER. Yet, actually, this departed drastically and radically from normal appellate procedures?

Mr. DAVIS. Not from normal administrative appellate procedures.

Senator NEUBERGER. Just to return to the point made by the distinguished Congressman from North Carolina, page 470:

Mr. VOLIN. If I had not had the instructions which made it necessary to reach an agreement, I would have sent the samples to one of the west coast firms.

Senator NEUBERGER. If you had not had those instructions from the solicitor's office, you would have sent the samples to one of the west coast firms?

Mr. VOLIN. That is right.

Senator NEUBERGER. In other words, it was those instructions which resulted in the samples being sent to Mobile, Ala., for testing?

Mr. VOLIN. I believe that is a fair statement.

That certainly would indicate that the Bureau of Mines, which you have praised highly for its integrity and confidence and neutrality, was certainly not a free agent in the mind of the man who was in charge in the field?

Mr. DAVIS. Well, he did not have unlimited authority to take this and do as he pleased with it; no.

Senator NEUBERGER. In other words, the Bureau of Mines—

Mr. DAVIS. But he was a free agent within a very definite path; that is, of agreeing to collaborating with and approving a neutral agent. He was free within that general framework.

Senator NEUBERGER. He was free to follow your instructions. He was free within the framework of your instructions?

Mr. DAVIS. That is right.

Senator NEUBERGER. And the agency which you praised so highly for neutrality and integrity was not assigned by you to go ahead and make a wholly independent study and report to you?

Mr. DAVIS. That is right.

Senator NEUBERGER. Now, you brought up a number of times that the hearings in the field broke up in rather boisterous disagreement.

I think Mr. Rice, one of the BLM examiners, testified in Portland about the Al Sarena people walking out and so on. You mentioned that in your testimony; is that correct?

Mr. DAVIS. That is right; that is what the record shows. I was not there.

Senator NEUBERGER. In effect, are they not people who are being rewarded for walking out and not following through with the normal hearing before the mineral examiner in the field?

Mr. DAVIS. I do not think so. I have no idea what this thing was about. The record does not tell you very completely. At any rate, there was some pretty violent disagreement and bitter words exchanged and evidently some fast talk, because the reporter said he was not able to make up a record.

Senator NEUBERGER. They walked out and there was bitter disagreement?

Mr. DAVIS. That is right.

Senator NEUBERGER. Again I say, by being given this extraordinary treatment, are they not being rewarded in effect because of the many thousands of other mineral claimants, large and small, who have had perfectly orderly procedures before mineral examiners, have been denied patent and never received this treatment?

Mr. DAVIS. That may be. There may have been a full hearing and a complete record, but would you say that even though their counsel had made a mistake in walking out that they should pay the price of the loss of their whole controversy because of that sort of thing?

Senator NEUBERGER. Well, I would say this—you are asking me the question, Mr. Secretary. I certainly would say this, that the very most that should have been done for them was to have remanded this to the BLM and the mineral examiners.

Instead, after their having had this big blowup, you yourself said in your opinion where patent was granted:

• • • having had full opportunity to participate in the hearing, chose to withdraw therefrom without submitting its evidence.

Mr. DAVIS. That is right.

Senator NEUBERGER. Now, in effect, when the appellant stalked out without submitting evidence, instead of your remanding it to those agencies in the field which had jurisdiction, you have given them this extraordinary procedure. I would like to ask you this:

There are thousands of mining claimants in my State on national forest lands. Supposing at the next hearings by mineral examiners that they stalk out without submitting evidence. You have said you felt this procedure was fair. Are you going to allow them the same memorandum that you sent to the Bureau of Mines in the Al Sarena case?

Mr. DAVIS. So far as I am concerned, that would all depend on the record of the particular case before me. No, I would not say that I was going to do this in every case. I might do something else. I would adopt that administrative procedure which I thought was best adapted to getting at the truth of the situation, whatever that may be.

What I think you are saying is that these people should not be given a chance for another hearing because of error of their counsel in abandoning the hearing. I do not know whether he should have abandoned or not. I do not know what was said or done. I do know they abandoned the hearing. I do know, Senator, that this thing had dragged on for 5 years.

As I said in the statement, I did feel that to remand it back to the Bureau of Land Management with the controversy there was, and the mutual recriminations that were going on, that you just were not going to get anywhere.

Senator NEUBERGER. To begin with, it had been at the secretarial level only about 17 months; is that not correct by your own chronology?

Mr. DAVIS. About 20.

Senator NEUBERGER. I do not intend to get off on any sidetrack, but I want to say to you that I have many letters from prominent constituents from Oregon of your own party complaining about corre-

spondence with Secretary McKay. But when you cite the fact that this had gone so long, again I get back to this point:

Why did you not at the very most remand it for proceedings in the field when you, by your own statement, have said that they withdrew without submitting their evidence?

Representative HOFFMAN. I want to make a point of order.

You said you had many letters in your files complaining against Secretary McKay. That is all political propaganda. If you want to get that in the record for that purpose, that is all right, but why couple it with a question. Why preface all your questions with some slur at the Secretary or the Department?

Senator NEUBERGER. May I say this: That the Senator from Nevada for 70 minutes the other day and 45 minutes today constantly made statements questioning the acts of various Presidents of the United States, and you sat by here and said nothing.

Representative HOFFMAN. I did?

Senator NEUBERGER. Yes.

Representative HOFFMAN. I could not hear all he was saying and I am not responsible for what he said. If you are just trying to balance up the record on some political propaganda, I want you to have a fair deal.

Senator NEUBERGER. It is not a question of political propaganda.

Representative HOFFMAN. You said you had so many complaints from people about Secretary McKay. It does not solve any issue in this case.

Senator NEUBERGER. It merely goes to the heart of the matter because the matter had been up for 18 or 20 months that this extraordinary procedure was justified.

Mr. Secretary, to get back to whether some other mining company or some other prospector would be allowed this same procedure, do you not think what you did is an encouragement to others to stalk out of mineral examiners' hearings where they feel their evidence perhaps may be weak and to request the same special procedure which Al Sarena received?

Mr. DAVIS. No; I would not think so.

Senator NEUBERGER. Why would it not be?

Mr. DAVIS. Oh, Senator, this happens all the time in controversies. It does not establish precedents at all. Anybody who has been around the courts as much as I have knows that lots of times you get into a wrangle and things breakup and you have to do something to get the record straight and start over again, but it does mean that it will not go as orderly as it ought to go.

Senator NEUBERGER. This happens all the time?

Mr. DAVIS. I am not talking about the Interior Department. I say it happens in controversies all the time. No two of them have quite the same pattern, you know.

Senator NEUBERGER. It is true, is it not, that this sort of procedure has never been followed before to the knowledge of the career people who testified?

Mr. DAVIS. Well, I think that is true. If you want to be strict and literal about it, I think that is true. I think that the Cameron case, despite the fact that you do not agree with me, I think the Cameron case is a pretty good example of the kind of thing that has been done from time to time.

I think every Secretary, and I am not critical of him at all, I think every Secretary gets in situations over there where for one reason or another there is a controversy or he feels that a bureau is a little bit overenthusiastic for some program or doing something it ought not do, and calls on some of the other bureaus to give him a report of what they think about it, and frequently acts accordingly; that happens frequently.

Senator NEUBERGER. Did you not testify a short time ago that you did not think it would instill confidence in the Government if this were turned over to another bureau?

Mr. DAVIS. What is that?

Senator NEUBERGER. You have just now said that many times a secretary will turn something over to another bureau to decide. Have you not said that?

Mr. DAVIS. That is right.

Senator NEUBERGER. Yet a short time ago, maybe 10 or 15 minutes ago, you testified that you did not think this would inspire confidence in the Government to turn this over to another agency of the same department.

Mr. DAVIS. That is right, because of the circumstances here that there were definite accusations of bad faith on the part of the department. These other cases do not necessarily involve that. These other cases may not involve any questions of bad faith at all. They may be simply matters where you want additional information more than you have.

Senator NEUBERGER. You are talking about bad faith on the part of the department all the time——

Mr. DAVIS. I am not talking about bad faith, Senator; I am talking about accusations of bad faith. I do not know whether there was bad faith or not. I know that was the constant accusation.

Senator NEUBERGER. Did you ever attempt to determine whether or not these career employees of your Bureau of Land Management were in fact guilty of bad faith, Mr. Hattan and Mr. Rice?

Mr. DAVIS. I do not know how you would tell that. I only know what the records show. The records indicate, as I point out in the statement, that the Bureau of Land Management notified the Forest Service on the 7th of December, I believe it was, in 1949 or 1948 of the filing of these claims; that there is no actual protest of record by the Forest Service until sometime in May, I believe, or March, in which the Forest Service writes this letter and says this letter was written by Mr. Hattan and so "We want to protest."

Mr. Hattan was in a dual capacity in doing that.

Then I know there is a telegram which is also in the record, in which the Bureau of Land Management said that the Forest Service had filed a complaint on the 15th of December. Whether they did or not, I do not know. There is no record of it in the file.

Apparently the 15th of December, I have not checked this, Senator, I want you to know that, but apparently the 15th of December was the proper date within which the protest should have been filed. At any rate, the two dates do not seem to agree materially and one of the bases, as I understand it, if you can understand it from this record, one of the bases of this demurrer which was filed out there was the fact that the protest to the Forest Service was filed out of time, after the time that it should have been filed.

Frankly, I do not think there is any merit in that contention, never have, but it shows you the thing that was generating controversy.

Senator NEUBERGER. If in your opinion there was some doubt about the fairness and impartiality of the BLM minerals examiners, Mr. Hattan and Mr. Rice, did you ever give these men an opportunity to prove themselves?

Representative HOFFMAN. Wait a minute, Mr. Chairman; I object to that question.

In the first place, you tell him what is in his mind and then you ask him a question as to whether he ever gave him an opportunity to prove himself. That is not a fair way to examine a witness because if he goes ahead and answers, then by implication or by his silence or neglect in answering the first statement, you get him on the record as saying certain things which he has not said.

You may not be a lawyer but you are very adroit in getting the witness on the record or trying to get the witness on the record on something that he has not testified to, and I object to it. I say it is out of order—improper.

Senator NEUBERGER. The Secretary has said that the reason he did not return this to the BLM mineral examiners for further proceedings was because of the accusations of bad faith against the career employees of his department.

Representative HOFFMAN. That is right.

Now let the stenographer read the question you asked to see what is in it.

Senator NEUBERGER. You have said that that was the reason. I think it is a perfectly proper thing for me to ask whether or not you made any effort to find out if these accusations of bad faith were, in truth, well-founded.

Representative HOFFMAN. And I have no objection, Mr. Chairman, to that question, but you preface it by an assertion of your own as to what he thought about Hattan and Sanborn.

Senator NEUBERGER. I asked if there was any doubt in his mind as to their impartiality.

Have you made any effort to find out whether these accusations of bad faith against these men were, in fact, well-founded?

Mr. DAVIS. No, Senator, I made no effort outside of the record as it was before me. I do not know how you could anyhow.

Senator NEUBERGER. Did you accept the assertions of the McDonald Co. that these men were guilty of bad faith?

Mr. DAVIS. Oh, no.

Senator NEUBERGER. Well, if you did not, why did you not remand it?

Mr. DAVIS. Simply because I accepted their repeated assertions and the evidence which was in the record as evidence in my mind that we were never going to have any fair determination of this controversy by that method.

Senator NEUBERGER. By what method?

Mr. DAVIS. By referring it back to Land Management.

Senator NEUBERGER. And why were you sure in your own mind that you were not going to have a fair solution?

Mr. DAVIS. Senator, let me tell you.

When the accusation of unfairness and prejudice is made against a judge, for instance, it does not make any difference how fair he

may actually be, there is always the feeling that he should not have heard the controversy and that the decision is not what it ought to be; that is the type of thing here that was motivating me.

SENATOR NEUBERGER. Do you see any reason then, Mr. Secretary, why all the thousands of mineral claimants on national forests should not come in with similar accusations of bad faith against mineral examiners who have rejected their requests for patent?

MR. DAVIS. No, I do not see any reason why they could not, but the fact is they do not and they will not.

SENATOR NEUBERGER. Is not this case an encouragement to them to do so?

MR. DAVIS. I do not think so.

REPRESENTATIVE HOFFMAN. You will not find another case like this where the Department has pushed somebody around the way they have until 3 and 4 Senators and 3 Congressmen at least had to protest; that is, the Chapman administration I am talking about.

SENATOR NEUBERGER. I would just like to say for the record, so the record shows that the people on this side allowed the Senator from Nevada to question the Chief of the Forest Service for 70 minutes without interruption. We allowed the Senator from Nevada this morning to question the witness for nearly 45 minutes without interruption.

If you want to take over, I will be glad to let you take over and resume later on.

REPRESENTATIVE HOFFMAN. No, but if you want to continue the tactics and ask questions that are not fair to the witness, you will get a point of order every time.

SENATOR NEUBERGER. You can make a point of order for as long as you like.

REPRESENTATIVE HOFFMAN. I will continue if you continue doing the way you are. You are almost as bad as Chudoff and Scott.

SENATOR NEUBERGER. Mr. Secretary, did you believe the accusations of bad faith the McDonalds made about Hattan and Rice?

MR. DAVIS. I neither believed nor disbelieved. They were made. There are certain corroborative circumstances, 1 or 2 of which I have related to you.

SENATOR NEUBERGER. What will you do if and when others make accusations of bad faith against mineral examiners? Will you follow the same procedure you did in this case?

MR. DAVIS. Not necessarily.

SENATOR NEUBERGER. Do you think this company should receive a treatment that no other company ever has had in prospecting and locating claims on public land?

MR. DAVIS. Well, of course not. However, that is a bad way to state a question, if I may say so.

SENATOR NEUBERGER. Do you know of any precedent for what was done in this case?

MR. DAVIS. Yes, I know a lot of precedents for substantially what was done in this case. I do not have any case exactly like it because I do not think there have been any exactly like it.

SENATOR NEUBERGER. That was the testimony from many career people in many agencies, the Bureau of Land Management, Bureau of Mines, and the Forest Service, so you are in agreement with them on that.

You again brought up in your oral testimony as well as your written testimony *U. S. v. Cameron*. Actually, what you did was quite different from *U. S. v. Cameron*, is it not?

Mr. DAVIS. No, I do not think so in substance. You can quibble around about the form, yes, and you can make it appear as though it is slightly different, but the substance of both those cases is that the Secretary was in a dilemma and he did not know what the answer was.

In the one case he turned to the Geological Survey and said, "Tell me what the answer to this thing is. Are there any minerals on these claims?"

In this case the Geological Survey said no.

I turned to the Bureau of Land Management and said, "Set up a procedure that will give me the answer," and they happened to say yes. But, fundamentally, the procedures are quite identical.

Senator NEUBERGER. You turned to the Bureau of Mines but you also restricted the Bureau of Mines as Mr. Volin, the Bureau of Mines representative in the field, has testified; is that not correct?

Mr. DAVIS. Well, we have been over that at least half a dozen times. I do not think I restricted him any more than——

Representative JONAS. Would the Senator yield?

I meant to bring this up before.

Senator NEUBERGER. Go right ahead.

Representative JONAS. I would like to read into the record the questions I asked Mr. Volin and his responses bearing on that particular point, if the Senator will yield for that purpose, and he has.

On page 491 of the record I quote from the transcript:

Representative JONAS. What I am trying to get you to say is whatever it was the company representative said, whether it amounted to a categorical rejection of any assayer out there or if it was merely a countersuggestion which you took under consideration and, after investigation, agreed to it. Which was it?

Mr. VOLIN. At the time I took it as a countersuggestion because if I had, as a result of my inquiry, been dissatisfied with the A. W. Williams Co., I would have rejected it and we would have had to arbitrate farther on the thing.

Representative JONAS. Then you would have had to have a meeting of the minds about some other company?

Representative CHUDOFF. I did not hear your answer. Did you say if the applicant had insisted on the Williams Co., you would have insisted they give to somebody else?

Mr. VOLIN. No; I did not say that.

Representative CHUDOFF. What did you say? I did not hear it.

Mr. VOLIN. I said if as a result of my inquiry about the Williams Co. inspection I had been dissatisfied with the answer I received, I would have asked for further discussion, further negotiation to select an assaying firm.

Senator NEUBERGER. Mr. Secretary, the reason I have kept asking you about the Cameron case is that we have been trying to find out about the Cameron case.

Now, to begin with, we have brought out that you made certain instructions to the Bureau of Mines which did limit their activity but, and I have not read this but I have been talking to counsel for the Interior Committee, and we have been going over the Cameron case, and counsel informs me that he cannot find where the United States Geological Survey is introduced into the Cameron case.

Mr. DAVIS. That is right, Senator, it is not so said in the Supreme Court opinion.

Senator NEUBERGER. What about the Circuit Court opinion?

Mr. DAVIS. No; I do not know whether it is mentioned in the circuit court opinion, but that is what is done.

Senator NEUBERGER. Inasmuch as you brought this in—I never heard of the case before—it seems to me we ought to find out what you did bring in, in justification for the action you took. This has just come to me. This is the opinion of Mr. Justice Vandeventer and he refers to the fact that the Secretary of the Interior directed that the hearing be had in the local land office. The land office was the predecessor to BLM, is that not correct?

Mr. DAVIS. That is right.

Senator NEUBERGER. I do not find—of course it may be, this has just been given to me—in the Vandeventer decision where this procedure is described.

Mr. DAVIS. Well, Senator, the procedure is departmental procedure and is not mentioned in the Supreme Court opinion.

Senator KUCHEL. Would the gentleman yield?

Senator NEUBERGER. Yes.

Senator KUCHEL. Do I understand, generally speaking, the issue before the Supreme Court in the case, Mr. Secretary, to which you allude, was whether or not the Secretary had the discretionary authority to take the action that was questioned there?

Mr. DAVIS. Yes.

Senator KUCHEL. So that the administrative technique would not have been a part of any issue in the lawsuit before the Supreme Court, is that correct?

Mr. DAVIS. Pardon me, Senator?

Senator KUCHEL. The administrative techniques which were used by the Department of Interior were not in issue in the Supreme Court?

Mr. DAVIS. That is right.

Senator NEUBERGER. These opinions, Mr. Secretary, just do not seem to bear out what you have said in your testimony so far. We will have to go over these some more.

In the Supreme Court, and I guess this is the Circuit Court of Appeals for the Ninth Circuit, I think the decision which is questioned is not only the jurisdiction of the land department, but whether within its exclusive determination. The land department was the predecessor to BLM, and BLM was not allowed to reenter this case by you?

Mr. DAVIS. It is an exclusive determination of the Secretary of Interior in that case, and in this case, too, of course.

Senator NEUBERGER. The only thing I think is, this Cameron case then, quite from upholding what you did, would seem to refute it.

Mr. DAVIS. No, no, Senator; the reference in the Cameron case was by Mr. Ballinger, who was then Secretary of Interior in 1911. It is a departmental letter. Those files are, of course, old and so forth but, in any event, the letter was from Mr. Ballinger as Secretary of the Interior to the Director of the Geological Survey, and he tells the Geological Survey to make an investigation and report to him upon impartial and thorough field examination of each of the claims.

I have a copy here of that administrative letter of Secretary Ballinger, and I am perfectly willing to submit it to you. It is a copy out of the files of the Interior Department in connection with the Cameron case.

Senator NEUBERGER. Was it sustained by the Court?

Mr. DAVIS. Yes; that is, the Secretary stood on the record of the Geological Survey and was sustained by the Court, as I understand the case.

Senator NEUBERGER. Were there any limitations placed on the determination by the Geological Survey?

Mr. DAVIS. No.

Senator NEUBERGER. Such as there were?

Mr. DAVIS. No.

Senator NEUBERGER. There was nothing parallel with the letter you sent to the Bureau of Mines?

Mr. DAVIS. Nothing parallel with saying to them that your determination of this thing is to be filed, or nothing telling them to consult with Senator Cameron with reference to the techniques to be employed; no, that is true.

The case is cited to show that the Secretary of the Interior from time to time has found it desirable to make references to other agencies; that is the only purpose of it.

Senator NEUBERGER. But you yourself did say earlier today that it could cause a lack of confidence in the Government if, in a case of this sort, it was referred to another agency of the Interior Department; is that not correct?

Mr. DAVIS. I do not think I said it could cause a lack of confidence but I think I did say that it is not entirely the way to restore complete confidence when you have an agency such as the Interior Department under charges of unfair treatment to simply say, "We will have another agency of this same Department, subject to the same executives at the top, we will have them look at it and tell you what to do."

I had the strange notion that a citizen in connection with these matters is entitled to some kind of 50-50 run for his money. Maybe that is wrong.

Maybe the Government should say, "This is the way we are going to do it and this is it," but that does not conform to my idea of fair play and does not conform to my idea of giving the citizen the kind of reasonable opportunity that I think he is entitled to.

Senator NEUBERGER. Do you think the Forest Service was entitled to a 50-50 show and that it should have been called in?

Mr. DAVIS. I think so. I think the Forest Service were entitled to produce the evidence which they had, and they had already done that in the record.

Senator NEUBERGER. Do you think the Forest Service should have been consulted before you handed down this procedure?

Mr. DAVIS. No; I am not at all sure that they should.

Senator NEUBERGER. Is it not true at the time the Forest Service evidence was 5 years old?

Mr. DAVIS. Well, no, it is not true. As a matter of fact, the hearing was not until 1950. It was 3 years old.

Senator NEUBERGER. But you granted patent in early 1954 so that the Forest Service evidence was 4 years old?

Mr. DAVIS. Something like that.

Senator NEUBERGER. Do you not think perhaps that they should have been consulted before you handed down the final patent and been informed?

Mr. DAVIS. Well, Senator, I do not know any good purpose that would be served by it particularly. I recognize your point of view that if they had been consulted, they would have come in and testified that lumber had increased tremendously in value and all that sort of thing, but that just is not material to the allowance of this claim.

The question is: Are there minerals on this claim? If there are minerals on there, these people are entitled to a patent. The question is: Have they minerals? If you can believe anything in all this correspondence from Members of the Senate and House and other people, and from these McDonald statements and so forth, there have been literally hundreds of assays taken on these claims, some of which were good and some of which were not good.

Now, all the assays do not have to be good. Because you get some bad ones does not necessarily defeat the claim. The thing you have to show is that there are minerals in paying quantities on the claims.

Senator NEUBERGER. I regret that my attention was diverted and that I was asked if I wanted to take a long-distance call. I am sorry, Mr. Secretary.

Mr. DAVIS. Surely.

Senator NEUBERGER. In your letter of instructions where you talked about the expense of assaying, we have touched that very briefly. Do you think that was a very material thing that the company should bear the expense?

Mr. DAVIS. Well, I think it was important. In the first place, it seems to me that when people make complaints of that kind they should ordinarily pay the expense.

Representative HOFFMAN. Mr. Chairman, will you yield right there?

Senator NEUBERGER. Yes.

Representative HOFFMAN. This is from section 108.549, subsection (b), page 347 of the Code of Federal Regulations, and reads as follows:

A mineral claimant may employ any United States mineral surveyor qualified as indicated in paragraph (a) of this section to make a survey of his claim. All expenses of survey of mining claims and publication of the required notices of application for the patent ought to be borne by the mining claimant.

Senator NEUBERGER. In other words, I would like to check with counsel on that, is that the procedure that the claimant pays for the assays?

Representative HOFFMAN. You can read it here. It is printed in here.

Senator NEUBERGER. I just wanted to find out.

Mr. LANIGAN. The claimant pays for his own assays.

Senator NEUBERGER. However, the assays which are done by the Bureau of Land Management or the Forest Service are paid for by the agencies, is that not correct?

Mr. DAVIS. I do not know. I would suppose so but I do not know.

Senator NEUBERGER. Is it not correct if the Bureau of Land Management or the Forest Service makes an assay, they pay for it?

Mr. DAVIS. I suppose they do, Senator. I do not know.

Senator NEUBERGER. The point I am trying to get at is this:

The assays which the claimant pays for are his assays which he submits in evidence, is that not correct? He pays for his own assays which he submits in evidence?

Mr. DAVIS. I would suppose so, yes.

Senator NEUBERGER. And the Government pays for the assays which the Government submits in evidence?

Representative HOFFMAN. No, no; the claimant pays the whole story except, and if you will go along through there you will find where the Government pays, for instance, in this case they pay the expenses and salary of Mr. Appling, but the other expenses were paid by the claimant.

Senator NEUBERGER. In other words, then——

Representative HOFFMAN. If you do not believe me, ask any one of the four counsel.

Senator NEUBERGER. In other words, when the Forest Service and the BLM made the surveys on these claims, the claimant paid for the assays? The Government paid for these assays, is that not correct?

Representative HOFFMAN. What is that?

Senator NEUBERGER. The point I am trying to make with you so that we do not have incorrect matter in this record, when the Forest Service and the BLM made assays, the Government paid for the assays?

Representative HOFFMAN. You mean Appling and McCormick?

Senator NEUBERGER. Not Appling and McCormick.

When Mr. Sanborn and Mr. Hattan made these assays to determine whether there was mineralization on these claims, the Government paid for those assays?

Representative HOFFMAN. Certainly they did for those.

Senator NEUBERGER. That is right.

Representative HOFFMAN. The claimant was not fooling around there, that was the Government's own business.

Senator NEUBERGER. That is right.

Representative HOFFMAN. You want McDonald to pay for all these investigations Hattan started?

Senator NEUBERGER. The point I am making is that the Government pays for its assay and the claimant for his assay.

Representative HOFFMAN. For the joint assays made in this case by McCormick and Appling.

Senator NEUBERGER. In this instance, Mr. Secretary, you granted final patent on the basis of claimant's assays which he paid for?

Mr. DAVIS. No, I did not. I granted patent on the basis of a neutral assay taken by people who had agreed on the competency of the assay house.

Senator NEUBERGER. Who paid for that assay?

Mr. DAVIS. The claimant paid for it.

Senator NEUBERGER. That is the point I wanted to establish.

Mr. DAVIS. I do not know whether they did or not. Anyhow, I assume they did.

Senator NEUBERGER. Those were your instructions?

Mr. DAVIS. The Government did not anyhow. Let us put it that way.

Senator NEUBERGER. You granted patent on the basis of assay which you instructed the claimant should pay for?

Mr. DAVIS. On the basis of an assay by a house on which the Government and the claimants agreed with the claimants paying the cost, yes.

Senator NEUBERGER. Do you think that is a wise public policy?

Mr. DAVIS. I think that is a wise public policy.

Representative HOFFMAN. Will the Senator yield for a moment?

Senator GOLDWATER. I think there is some confusion entering here. I have never heard of a case of a claimant having the Bureau of Mines make their assay.

If I owned a mining claim that I wanted patent on, I do not believe that the Bureau of Mines has any right to make my assays at Government expense. I may be wrong, but I think that is the confusing point here, Senator; that this was a case where the owner of the claims disagreed and he paid for his own assays. He would have done that regardless.

If there was no contest in this case, he would have paid for his own assay. That is the usual way of doing it.

Senator NEUBERGER. The only thing is that I think the record should show, Senator, that the final patent was based on an assay which the claimant paid for.

Senator GOLDWATER. I do not know of any where they did not.

Senator NEUBERGER. They certainly did not pay for the assays made by the Bureau of Land Management and the Forest Service.

Senator GOLDWATER. They did not make them for patent. They are not asking to patent the lands but the McDonalds are.

Senator NEUBERGER. Exactly, and the point I am trying to make and the point you are trying to help me make is that the assays made by the BLM and the Forest Service when they examined the land for its mineralization was paid for by the Government.

Senator GOLDWATER. There is no argument on that.

Senator NEUBERGER. I am glad of that.

Senator GOLDWATER. But I do not believe the McDonalds could not have used that for patenting purpose. I will say this:

If they can, there are a lot of prospectors in the West that would like to know about it.

Senator NEUBERGER. The Government used it in originally denying patent, is that not correct?

Senator GOLDWATER. Yes, that is correct.

Senator NEUBERGER. So, ultimately, final patent was granted on the basis of an assay which the claimant paid for.

Senator GOLDWATER. What I am trying to bring out is that I do not know of any other way it could be done. If the Government is going to go out and make assays for the miners, it should be published because there are hundreds of thousands that would like to know that.

Senator NEUBERGER. The only point I am making is that when the prospector applies for patent, the Government determines whether his patent should be granted.

Senator GOLDWATER. If there is no argument.

Senator NEUBERGER. I presume the Government would examine it. The Government in this case made its assays by 2 agencies and the 2 agencies paid for them.

Senator GOLDWATER. No argument on that.

Senator NEUBERGER. And denied patent.

Senator GOLDWATER. They did not deny patent. They did not hand down a decision.

Senator NEUBERGER. The Forest Service and BLM—

Senator GOLDWATER. The Secretary of Interior grants patents.

Senator NEUBERGER. The Forest Service and BLM recommended that patent not be granted.

Senator GOLDWATER. But the Secretary of the Interior has final say.

What I wanted to bring out is that you might leave some false impression that the Bureau of Mines customarily makes assays for all.

Senator NEUBERGER. No.

Senator GOLDWATER. If you read the testimony you will get that, and I do not think you want that in there.

Senator NEUBERGER. I certainly do not because a number of people with Bureau of Mines testified that this situation was absolutely unique in their whole career and I think you were here during some of that testimony.

Representative HOFFMAN. For my own information, Senator, will you tell me, do you contend then that when McCormick and Appling took these samples and the assay was made at the request of the Al Sarena Co. that the Government should have paid for that?

Senator NEUBERGER. The point I am making is—

Representative HOFFMAN. Answer me that question if you will.

Senator NEUBERGER. I do not have to answer your question.

Representative HOFFMAN. That is your contention. You want the Government to pay for a survey and assay that was made for the benefit of the McDonalds.

Senator NEUBERGER. I think what the Government did in this instance, if you ask me, was entirely inappropriate, and I think the most this company should have received was that it should have been remanded to the Forest Service and the BLM, and the point I seek to make, and is on the record, is that the claimant paid for the assay which you had before you when final patent was granted.

Mr. DAVIS. And, Senator, that has been true of thousands of patents all over the country. I have little doubt of that.

Representative HOFFMAN. That is the regulation.

Mr. DAVIS. Because the claimant has to come in there and prove mineralization and of course he always pays for it. If there is no contest, then he gets his patent, but for you to pick this up and make a point of it, you are not in any different situation than you are in dozens of cases. Of course the claimant pays for the assays and of course he pays for assay on which the patent is granted, if it is granted. If it is not contested, he pays for the assays and proves his case.

I do not think it is quite a fair statement to try to highlight the point that there is something wrong with the assays because the claimant paid for them.

You can make that supposition about every assay ever submitted to the Bureau of Mines.

Senator NEUBERGER. This assay which the claimant paid for was superior in your mind to those which the BLM and Forest Service took?

Mr. DAVIS. I had more confidence in it because it was under the joint supervision of all the contesting parties.

Senator NEUBERGER. I thought the Forest Service was a contesting party.

Mr. DAVIS. The Forest Service was a contesting party.

It was taken under the direction of the Government of the United States. You can quibble all you please about which bureau and which this and that, but the fact is that it was taken in a contest between

these claimants on the one side and the United States Government on the other.

SENATOR NEUBERGER. You said all the contesting parties. Was not the Forest Service a contesting party?

MR. DAVIS. Yes, the Forest Service was a contesting party.

SENATOR NEUBERGER. And the Forest Service was actually not consulted at all in the procedure you handed down nor was the Forest Service consulted before you granted final patent. Is that correct or incorrect?

MR. DAVIS. I do not think they were because we moved it over to the Bureau of Mines as an agency to supervise the taking of an independent, and what I thought was dependable and still think was dependable, set of assays on this property.

SENATOR NEUBERGER. In one of your letters to the Director of the Bureau of Mines, you said:

All people concerned should therefore cooperate in obtaining samples and assays upon which no doubts will be harbored by anybody.

Do you think the Forest Service was concerned in this?

MR. DAVIS. I suppose they were, but you are directing here to an independent agency.

SENATOR NEUBERGER. I do not understand here your instructions. You say:

All people concerned should therefore cooperate in obtaining samples and assays upon which no doubts will be harbored by anybody.

Was not the Forest Service concerned by law as the custodian of this timber and land?

MR. DAVIS. I think they were somewhat.

SENATOR NEUBERGER. Then all people concerned were not participating in this, is that not true?

MR. DAVIS. The one side of this, the Forest Service side of this, was all complete in this record. They had testified at length, their evidence was in there at length.

SENATOR NEUBERGER. In other words, the Forest Service then did not participate in any way in taking these additional samples? You did not believe they were concerned?

MR. DAVIS. Well, now, which question?

SENATOR NEUBERGER. You did not believe the Forest Service was concerned?

MR. DAVIS. I do not think they were concerned in a record where they had made up their side of it complete, no.

SENATOR NEUBERGER. And you did not believe the Forest Service should be consulted?

MR. DAVIS. Well, their evidence was in the record, sir.

SENATOR NEUBERGER. And you believe then, in a matter of this sort where the Forest Service has the custody of the land, that you should have granted final patent without even giving them an opportunity to review or question this assay which came from Mobile, Ala.?

MR. DAVIS. I did not think so, and I think that when you refer the thing, as I did, to the Bureau of Mines with instructions which I gave them, I think you had a perfectly fair method of obtaining a fair and dependable answer to the question of whether there were minerals on those claims.

Senator NEUBERGER. Again I ask you a question which I think you did not answer before, at least not to my satisfaction. This is a perfectly fair method, you said that again. What about all the other thousands of claimants to land on national forests on the basis that it has minerals? What are you going to do about them?

Mr. DAVIS. We are going to go right ahead following the ordinary procedure unless circumstances develop similar to this, in which case we probably will adopt that agency which we consider competent and dependable to advise the Secretary on what to do.

Senator NEUBERGER. And if they should walk out of the hearing without presenting their evidence, will they have the benefit of this same procedure that you have set up for the Bureau of Mines in the Al Sarena case?

Mr. DAVIS. There is a good deal involved in this besides the mere walking out of the proceeding. You must remember that there were a good many of these records which were not submitted to the Solicitor's office, and which everybody concedes had been filed with the Bureau of Land Management, so it is not one of these things where you could say that if somebody walks out they get another special treatment of some type.

Senator NEUBERGER. There was no question of economy, governmental economy, at stake in your suggesting that the company pay for the assays; was there?

Mr. DAVIS. Not primarily economy, no, but I think it is the common thing to do, at least it is the procedure that I am very well accustomed to in lawsuits and things of that nature where somebody does something that requires you to back up and do it over again. The court always makes an order, "Well, you can't do it, but you will do it at your own expense"; that is a perfectly normal thing.

Senator NEUBERGER. I am concerned, of course, about this one thing, that if a claimant fails to introduce his evidence in the course of a regularly conducted hearing in the field that he might still win his case by claiming the record was incomplete, despite the fact that blame for the incompleteness of the record rested solely on his shoulders.

Are you not somewhat concerned about that?

Mr. DAVIS. I would be if I had let you state the facts the way you like to state them, but I am not concerned with the record in this case.

Senator NEUBERGER. Did you not say in your opinion that the claimant left without presenting his evidence, left the hearing? I mean you yourself used that language, I think.

Mr. DAVIS. That is right. That is right, he did.

Senator NEUBERGER. Well, I just asked if you are not concerned that further claimants can stalk out of hearings without presenting—

Mr. DAVIS. No, I am not concerned about that either, not at all. The fact is, if you will examine the record, Senator, you will find that this thing started out in a legal controversy immediately because these people claimed the right to file demurrers to test, among other things, the legality of the filings of the Forest Service—that is, whether it was filed within the specified legal time within which they might be filed. They wanted to argue that question.

Please remember I am quoting from a very incomplete record here, but that is what the summaries of the stenographer say, the substance. They argued that question and then they were told that the hearing examiner, the field man, was not going to pass on those legal questions.

They insisted that those legal questions should be passed on first before they got into the question of evidence.

Now, that is a unique situation that does not arise, as far as I know, has never arisen before and may never arise again.

They were asserting an agreement with the solicitor's office. I do not know whether they had that kind of agreement and I have no way of knowing that they had a right to a hearing on the legal aspects of this thing before they got into the evidence question.

As I said, Mr. White, my predecessor, denies that. I am not trying to choose between the two of them. So it is not at all a fair statement to say that anyone can walk out of a hearing and get special treatment.

Senator NEUBERGER. But you yourself, Mr. Secretary, in your opinion said:

The appellant, having had full opportunity to participate in the hearing, chose to withdraw therefrom without submitting its evidence.

Mr. DAVIS. That is right. I think they made a very unwise decision.

Senator NEUBERGER. And yet you yourself say here today that they made an unwise decision and yet, instead of remanding it for further proceedings to the agencies that they had walked out of, you set up this wholly new procedure for them?

Mr. DAVIS. That is right.

Senator NEUBERGER. Despite the fact that you say today they made an unwise decision?

Mr. DAVIS. That is right.

Senator NEUBERGER. What if other mining claimants make a similar unwise decision?

Mr. DAVIS. Does that bother you?

I do not think anything, whether in the courts or in the administrative process or what, ought to go through a final determination on a record where, admittedly, one side of the evidence is not in the record. That just is not fair play, that just is not cricket in my book.

Now, then, these people, right or wrong, their evidence was not in this record. The fact is that this thing had gone along for 5 years. The fact is that the record is full of violent protests from all kinds of people, their friends, Senators, Congressmen, these people themselves, their lawyers, all insisting, and again right or wrong, I do not know, but insisting that the fact that this thing was not settled was doing them serious financial damage.

Now, under those circumstance, would you send that back to the Bureau of Land Management to go through that bureau process again which, as a minimum, takes months and months and if somebody along the line wants to and leaves it lay on the desk for 6 months, which is not unheard of in Government, why there is no telling how long it takes to get it back up again.

As against that, I say that the reference of it to the Bureau of Mines to get somebody that they could agree on to take samples, get somebody they could agree on to take an assay, was a much more expeditious proceeding to be followed by a much more expeditious decision.

Senator NEUBERGER. Again, in making your statement you used the analogy of a court. Again I ask you, is it not correct that the court would not take new evidence in the way this was done?

Mr. DAVIS. That is right. In the judicial system you do not do that but you are dealing here with an administrative process which in many

ways is comparable to the courts and in many ways not. The reference is, of course, to the administrative process.

A trial court might very well adopt this procedure as I have outlined to you in the statement. It is pretty common in a trial court to make an independent reference on all kinds of technical questions.

Senator NEUBERGER. Do you feel that the Bureau of Land Management did not give these people a fair hearing?

Mr. DAVIS. I do not know whether they did or not. I do know that if I were these people, I am not here to make any defense of these people, do not misunderstand me, but I am telling you that looking at the record I can see why they felt grounds for complaint against the Bureau.

Here is a written record in which the Forest Service had not objected until the Land Management asked them to. Here is the same Land Management then hearing the evidence, taking the samples and being the judge which determines it.

Here is the same Land Management sending the record into Washington which has only one side of the evidence in it. Here is the same Bureau of Land Management having other evidence in its files which it did not originally send in.

Right or wrong, I am not condemning the Bureau of Land Management, I have no idea of these people, I have never seen them in my life at all, but I say to you that on the face of that record it is not a record to inspire confidence in a claimant.

Senator NEUBERGER. In your opinion granting the patent, you quoted with approval from the mineral examiners' findings on the eight uncontested claims, is that correct?

Mr. DAVIS. In my statement, you say?

Senator NEUBERGER. Not in the testimony today, Mr. Secretary, but in the ruling which you granted final patent, *United States v. Al Sarena*.

Mr. DAVIS. Read it to me, I do not have one before me.

Senator NEUBERGER. It is quite long, but you say:

Report of the mineral examiner of this Department made in 1949 contained this statement.

Then you quote at some length, in which the mineral examiner commented upon the value of the eight uncontested patents. Is that not correct?

Mr. DAVIS. I think so.

Senator NEUBERGER. Well this is what puzzles me—where this mineral examiner granted patent on the eight uncontested claims, you quote him with approval. Yet this same mineral examiner you seem to doubt with respect to his ruling on the 15 contested claims, the same mineral examiner?

Mr. DAVIS. That is right.

Senator NEUBERGER. I do not understand that.

In other words, the same man, where he approved patent on 8 claims which were not contested, you quote him favorably in your own opinion in support of your granting the 15 contested patents. You quote this man, yet you reject him as an arbiter to remand it back to him on the 15 contested claims.

If he was unfair, he certainly would be unfair all around. He is the same man.

Mr. DAVIS. Let us suppose that the eight claims were so clear that nobody could contest those. Let us suppose that we have here a man who is pretty obviously imbued with the idea that he should deny claims if he thinks the timber is worth more than the mine.

Let us suppose that we have a man here who is employed by BLM but who is hired by Forestry to do this.

Is it inconceivable to you that he would hold the claims which he allowed down to a minimum?

Senator NEUBERGER. Well, if he would so act, and you think he might so act, why would you quote him approvingly on any mineral findings?

Mr. DAVIS. Because I would say, as I frequently do, that when a witness concedes from a rather obviously hostile standpoint, concedes mineralization on eight of these claims, he has made a concession which has quite an effect upon my mind.

The very fact, Senator, that 8 of these claims were allowed uncontested, everybody conceded that 8 of them were mineralized, the fact that the others were around the fringe of the 8 which were allowed—that is a loose statement but more or less accurate—the fact that there is all kinds of testimony in the record that this was a great mineralized mass on this side of this mountain, led me to believe that nobody on either side of this controversy, for that matter, could sit down and draw a line around the mineralized area of these claims. I do not think it could be done.

Senator NEUBERGER. If they apply now for 15 more claims on the basis of that, would you give them patent?

Mr. DAVIS. They do not have 15 more.

Senator NEUBERGER. If they go ahead and expand it.

You say if a line is drawn; is there any limit to the area they will get?

Mr. DAVIS. Of course, there is a limit to the area they are going to get. But the size of this claim, the size of this land, Senator, as I understand this thing, and I am, of course, a Nebraskan, not a miner, but as I understand the thing, and as I understood it at the time, the actual area involved is not much greater, if any, than you would normally use if you went into mass production on these claims, being a mass operation.

We are not talking about veins of ore here of the kind we read about in story books where you can pick out nuggets. We are talking here about an area of a great lot of rock, soil, and gravel, and so forth, which has scattered all through it these little deposits of these various minerals.

As I understand it, to work that you need to turn a tremendous amount of dirt, a tremendous amount of rock, because the amount you get out of any one ton is necessarily pretty small. So that that cannot help but influence anyone who looks at the situation in feeling that since the area is not definable, everybody says that, including Mr. Hattan, he does not undertake to define the area, anyone cannot help but be impressed by the fact that if you are going into an operation, if it is a mining operation, that the amount of claims is not proper in relation to the amount allowed.

Sure, if you keep on filing claims down here 15 miles, obviously then you are going to have to start back to the very fundamental question of whether the mineralization will stand up on them and whether the

discoveries have been made, whether work has been done, all of those things you have to do all over again.

However, so far as I know, as a matter of law there is not any reason why people cannot go on filing additional claims. There is nothing to stop them. As long as they comply with the law, there is no crime being created in following the mining law.

Senator NEUBERGER. And you feel that the method in which this patent was taken was complying with the law?

Mr. DAVIS. Certainly I do. I would not have ruled the way I did.

Senator NEUBERGER. I would like to go back to an answer several answers before this one before we proceed.

If I am not mistaken, you said this examiner "obviously hostile." Did you not say that?

Mr. DAVIS. No, sir.

Senator NEUBERGER. But a few minutes earlier, you said you had not passed judgment on him. I asked you if you had—

Mr. DAVIS. You asked me if I had made up my mind as to whether he was a badly prejudiced fellow, and I said I had not called him in. But I do say, if you will read the record of that testimony, which I am sure the staff have done if you have not, I think you will come up with the conclusion that the gentleman was pretty thoroughly determined that these claims were not good and that he just did not think that they ought to be allowed because they had some timber on them.

I do not say that he is a bad fellow, I do not attack his character or anything of that kind, but I think he has that kind of definite slant.

Senator NEUBERGER. Again I want to get back to this because I think it is important.

You said earlier that you had not passed judgment on him?

Mr. DAVIS. That is right.

Senator NEUBERGER. Yet just now you said he was obviously hostile?

Mr. DAVIS. That is right.

Senator NEUBERGER. Have you not passed judgment on him without giving him a chance for a hearing before you?

Mr. DAVIS. I think we are quibbling over words as to what passing judgment is.

Senator NEUBERGER. You say this man was obviously hostile?

Mr. DAVIS. That is right.

Senator NEUBERGER. That was your phrase, not mine.

Mr. DAVIS. That is right.

Senator NEUBERGER. Yet you said that you had not studied into his case or looked into it, and yet you passed on him on the basis of no study or giving him a hearing?

Mr. DAVIS. I have passed judgment on what I think the record shows about him, that is all.

Senator NEUBERGER. And you think the record shows that he is obviously hostile?

Mr. DAVIS. I think that the records indicate that he is in not permitting the allowance of these claims and these claims in particular.

Senator NEUBERGER. Do you think that he is any less prejudiced than the Williams Assaying Co. 3,000 miles from the claim?

Representative HOFFMAN. I made a point of order against that one. No witness is required to evaluate the testimony of another witness or to pass upon the interest of any witness.

You are asking him to compare witnesses and their interest in a case.

Senator NEUBERGER. They are not witnesses. The witness, the Secretary, used the Williams assay report to grant patent to this timberland.

I certainly think I have the right to ask him his opinion of it. He used their assay. You just sit here and object to things one after another, but I submit—

Representative HOFFMAN. Not to half as many as I should.

Senator NEUBERGER. I submit that it is a perfectly proper question to ask the Under Secretary of Interior, who used an assay made by the company to which the patent was granted.

Representative HOFFMAN. The answer cannot possibly be a statement of fact. All it can be anyway is at best his conclusion or opinion or a comparison.

Who is the biggest liar? This fellow or that one?

Senator NEUBERGER. I have asked the Secretary if the mineral examiner in his department was "obviously hostile"; whether he thought the Williams Assay Co. was any less prejudiced than that mineral examiner.

Mr. DAVIS. Well, Senator, I am not going to set myself up here as the judge of the comparative mental processes of a group of witnesses. I do not know the Williams Assay Co., I never heard of them in my life until they crossed my path in connection with this.

The Bureau of Mines inquired about them enough that they were convinced that they were dependable people.

When you ask me whether somebody was more or less prejudiced than they were, implicit in the question that you ask is an implication that they were prejudiced and I am not going to answer a question which has an implication casting aspersions upon any witness.

Senator NEUBERGER. You have cast aspersions on the mineral examiner of your own department.

Mr. DAVIS. That is because I have read the record, correspondence, that the gentleman has done. I have not done that about the Williams Co.

Senator NEUBERGER. You made no study at all of the Williams Co.?

Mr. DAVIS. That is right.

Senator NEUBERGER. In other words, you were concerned about prejudice on the part of your own mineral examiner.

I ask that in the form of a question. You were concerned with prejudice on the part of the mineral examiner?

Mr. DAVIS. I felt the record indicated that there was some little feeling, perhaps, yes.

Senator NEUBERGER. Did it ever occur to you that a company selected to make the assay in which the claimant had a role in the selection might not be wholly unprejudiced?

Mr. DAVIS. Well, I suppose you can attack the integrity of any professional man on that basis, if you care to do so.

Senator NEUBERGER. You have questioned the integrity of a career employee in your department.

Mr. DAVIS. On things on which I had some evidence, I thought. I have no evidence about these people at all, and therefore, I am not going to be a party to drawing conclusions about them.

Senator NEUBERGER. In other words, though you made a much closer judgment of the prejudice or hostility or integrity of the ex-

aminer in your own department who rejected the claims than of the Mobile firm who handed down the assay on which you based patent?

Senator KUCHEL. Let me interrupt, if I may.

It seems to me in the last question that my colleague, Senator Neuberger, asked, it is not correct to list the word "hostility" along with the word "integrity."

As I understand the law business, one who is testifying is described as a hostile witness if the burden of his testimony is against a position taken by the other party to the lawsuit or to the proceeding.

So that, when you describe from a legal standpoint a person as a hostile witness, you are not imputing to him any venom or any physical aspects of violence; you are merely describing a witness whose point of view and whose testimony is hostile or antagonistic or in opposition to that which the other party to the dispute takes.

So that I want to be sure, Mr. Secretary, that when you answer that question, you are fully aware of the fact that the Senator has, and in good faith, of course, coupled the word "integrity" with the word "hostile."

If I understand it, you were using that phrase originally as a lawyer to describe a witness whose testimony was at variance and against that of the applicant here.

I wanted to be helpful and that is the reason I am saying it.

Mr. DAVIS. Thank you, Senator. I think you are helpful with a very good explanation.

Senator NEUBERGER. The Senator from California is always helpful. The point I was making, and I think Senator Kuchel will concur in this, was that the Secretary felt that the mineral examiner of his own department was prejudiced in this case. Yet you felt that the assay made by the Williams Co. was not prejudiced?

Mr. DAVIS. That is right. I had never heard of the assay company and I was assured by the Bureau of Mines that they were a dependable assay house. I had no reason to consider their prejudice one way or the other.

Mr. COBURN. Mr. Davis, what was the narrow legal basis for your opinion of January 6, 1954? Do you have it there, Mr. Davis?

Mr. DAVIS. What do you mean by that?

Mr. COBURN. I notice that in the syllabus of the opinion you affirm the action taken by the Bureau of Land Management both as to the conduct of the hearing and on appeal, but at the end of the syllabus this appears:

It appearing from all of the evidence, including new assay reports of samples taken jointly by the appellant and the Bureau of Mines, that a sufficient mineralization of appellant's claims is established to justify a prudent man in the further development of the property, and the other requirements of the statute having been complied with, patent to the appellant should issue.

Is that not the only legal basis for your opinion?

Mr. DAVIS. That is the real legal basis of the opinion; yes.

Senator GOLDWATER. Is the Senator from Oregon finished with his interrogation?

Senator NEUBERGER. I am finished at the moment. The chairman is back.

Senator GOLDWATER. The Senator from Arizona has some other problems this afternoon. I did have one question that might take 5 minutes at the most that I wanted to get in the record.

Senator NEUBERGER. It is fine with me and Senator Scott. Go ahead, Senator Goldwater.

Senator GOLDWATER. Mr. Secretary, in this morning's paper, the Washington Post and Times Herald, under the byline of Drew Pearson appeared this statement, and I will read it to you:

Buried in the Senate Interior Committee files is an interesting letter, which was picked up when the Senate subpoenaed the records of Secretary McKay.

It's a letter from a friend of President Eisenhower's addressed to him, asking that the Al Sarena section of the Rogue River National Forest be released to the McDonald family.

Across the letter in his own handwriting President Eisenhower had scribbled "Dear Doug." Then followed a personal request from Ike to Doug to see what he could do about granting the Rogue River request.

That is the end of that quote, Mr. Secretary.

Have you any knowledge of this letter?

Mr. DAVIS. I have none, Senator.

Senator GOLDWATER. Mr. Chairman, I would like to ask, inasmuch as this reporter says, and I quote:

buried in the Senate Interior Committee files is an interesting letter—  
does the counsel have this letter?

Mr. COBURN. I do not have it.

Senator GOLDWATER. Does Mr. Redwine have this letter?

Mr. REDWINE. I do not.

Senator GOLDWATER. Do any of the counsel have this letter?

Mr. LANIGAN. Never have seen it.

Senator GOLDWATER. Have you ever seen this letter?

Mr. REDWINE. I haven't any comments on that, Senator.

Senator GOLDWATER. I think it is very important. The honesty of the President of the United States has been impugned by this person in writing his column this morning and I think it is necessary that we get this cleared up when he speaks with evidently some authority saying:

buried in the Senate Interior Committee files.

Have you seen this letter?

Mr. REDWINE. I have not seen the letter that is referred to there; no, sir.

Senator GOLDWATER. Had you ever seen a letter that the President of the United States penned a note to the Secretary of the Interior on in this particular case?

Mr. REDWINE. Yes, sir.

Senator GOLDWATER. Can you get that letter?

Mr. REDWINE. I think so.

Senator GOLDWATER. Where is it?

Mr. REDWINE. It is downstairs.

Senator GOLDWATER. In the files?

Mr. REDWINE. Yes, sir.

Senator GOLDWATER. I think, Mr. Chairman, it is necessary that we have that letter in these hearings.

Representative HOFFMAN. While he is waiting for it, Mr. Chairman, it seems to me that minority members of the committee should be permitted to have, say, one-tenth of the degree of access to the committee files that Drew Pearson has, especially in view of the fact that the reorganization act expressly provides that every Member of

the House, not limited to the members of the committee, shall have access to them.

I have tried to get from this committee certain records and they turned me down. I would just like to have a ruling by the Chair.

Senator NEUBERGER. Let me say for the record, as far as the gentleman from Michigan is concerned, I have never seen such a letter, anyway, whatsoever.

Representative HOFFMAN. I am not complaining on your account. I am complaining that I have a right to it. Yet the committee staff will not give me and did not give me even a copy of the typewritten transcript. Yet comes Drew Pearson and he can get it, and the counsel for the Interior Department after he offered to pay for a record could not get it. How come?

Is Mr. Redwine the handmaiden or however you might describe him, of Drew Pearson and is he using the committee authority to get this stuff and then hide it?

Mr. COBURN. Could I answer the gentleman as far as staff counsel is concerned? He referred to a transcript of the record and in that I assume he referred to the transcript of the whole Joint Timber Committee record. That transcript was kept for revision purposes on order of Congressman Chudoff. The staff had nothing to do with that.

Representative HOFFMAN. He tells me that is not true.

Mr. COBURN. Those are the instructions we got.

As far as the Al Sarena transcript is concerned, that was released.

Representative HOFFMAN. Tell us why—tell the committee chairman, if you will—why a member of the committee was not entitled to receive a transcript of the hearings held on the 25th of November at Portland? You withheld that and I could not get a copy of it for more than 7 days.

Mr. COBURN. Are you referring to the Al Sarena record?

Representative HOFFMAN. Yes; after it was printed.

Mr. COBURN. You mean after it was made up in transcript form?

Representative HOFFMAN. Yes. When I asked the stenographer he said it had been delivered to the Senate committee and when I called over here they said it was not available.

Mr. COBURN. We had no orders to keep the Al Sarena record.

Representative HOFFMAN. Why did you not let me have it?

Mr. COBURN. I was informed that your people over on the House side had additional copies that you were supposed to get.

Representative HOFFMAN. Maybe they did, but I could not get them. Why could not the Solicitor for the Department get the one that he paid for? It is a direct violation of the law to deprive a member of the committee or a Member of the House access to these records. Yet they do it right along.

Senator GOLDWATER. I do not want to delay the proceedings and when Mr. Redwine comes back with this letter may I have permission to proceed a minute or two after seeing it?

Why do you not go ahead with whatever questioning counsel might have?

Mr. COBURN. Mr. Davis, you will recall your last answer to my question. This was the sole legal basis for the order that patent should issue. Proceeding further over to page 4 of your decision, the first paragraph at the top of the page—I am not going to quote it; I will

just paraphrase it—you say there on appeal the Al Sarena Mines, Inc., made some 18 assignments of error and it boiled down, first, that its contention was it was entitled to a patent prior to the filing of the protest, and therefore your department had no authority to entertain that protest. How did you rule on that?

Mr. DAVIS. Well, we brushed that point aside, as you know.

Mr. COBURN. Did you not say the contention is untenable?

Mr. DAVIS. I don't know. You are reading and I don't know where you are reading from.

Yes, that is right.

Mr. COBURN. In other words, you overruled the first of the contentions of the Al Sarena Mines, Inc.; is that correct?

Mr. DAVIS. That's right.

Mr. COBURN. Second, there were certain irregularities in the protest and in the manner in which the hearing was conducted. How did you rule on that?

Mr. DAVIS. I think we ruled pretty well down the line that there was not merit in these various procedural objections.

Mr. COBURN. And by so doing you confirmed procedures of conduct of hearings in the field; is that correct?

Mr. DAVIS. If you can call it that. We said there wasn't enough in that alone to justify a reversal; yes.

Mr. COBURN. You said, I believe on page 9, that these contentions appear to be "immaterial and without substance." So that when we come right down to it what you based your decision on was an assay report—and I won't quibble about when it was delivered to you—an assay report from the A. W. Williams Co., and a telephone conversation that you had with Mr. Appling of the Bureau of Mines in Grants Pass, Oreg., on December 29; is that correct?

Mr. DAVIS. I think that is substantially correct.

Mr. COBURN. Haven't you also testified that you knew nothing about the A. W. Williams Co. yourself, but you had checked with the Bureau of Mines as to its competency?

Mr. DAVIS. That's right.

Mr. COBURN. With whom did you check?

Mr. DAVIS. We checked with Mr. Appling—

Mr. COBURN. Mr. Appling?

Mr. DAVIS. —who made the report to us and sent his report.

Mr. COBURN. He said that A. W. Williams Inspection Co. was okay.

Mr. DAVIS. You know what he said. It is in your record here already.

Mr. COBURN. I am asking you what he told you.

Mr. DAVIS. That they had called the Bureau of Mines in Nashville, I believe, that Nashville had called the State Geologist Office of Alabama, and they had checked it on the Department of Commerce list of approved assay houses.

Mr. COBURN. He related this information to you on the phone?

Mr. DAVIS. That's right.

Mr. COBURN. During the course of that conversation did he make any mention of having suggested other assay houses to the McDonalds?

Mr. DAVIS. I don't recall whether he did or not. He probably did because we talked this thing over, of course. I said what anyone would say "How come an assay house in Mobile, Ala.?" A perfectly natural question.

Mr. COBURN. This was the first you heard of it?

Mr. DAVIS. That was the first I heard they were going to Mobile. I quite naturally said "Why Mobile?"

Mr. COBURN. What did he say?

Mr. DAVIS. He said in substance that they had discussed the matter, that they had proposed 1 or 2 houses on the west coast, these people had suggested this Mobile house, the Mobile house being, of course, down where they had lived, that they themselves had done what they thought was necessary to assure them that it was a legitimate and dependable assay house, and therefore they had accepted it.

Mr. COBURN. I think we switched in there at one point. When you are speaking of "they" did Appling say that he had checked as to the competency of the A. W. Williams Inspection Co.?

Mr. DAVIS. I don't know whether he said that he had, or whether Mr. Volin had.

Mr. COBURN. He said somebody had.

Mr. DAVIS. Somebody connected with the Bureau of Mines had checked it; yes.

Mr. COBURN. And that his information was the company was competent to conduct the assay?

Mr. DAVIS. Yes.

Mr. COBURN. This is after he received the report of the assay?

Mr. DAVIS. That's right, that is, the conversation was after that.

Mr. COBURN. That is what I say.

Mr. DAVIS. The inquiry was before the samples were sent down as I understand it.

Mr. COBURN. The inquiry was made as to the competency of the A. W. Williams Co.?

Mr. DAVIS. Before the Bureau of Mines agreed to use them; yes.

Mr. COBURN. In your conversation with Mr. Appling when he mentioned these other assay houses did he tell you why the McDonalds refused to go along with this?

Mr. DAVIS. I don't recall whether he did or not.

One factor that I think was in the picture, and the fact has been referred to in this testimony, I believe, was the fact that this matter of payment for the assays which Senator Neuberger has been raising and that these people preferred the house down there on the matter of charges. I know nothing about this, you understand, but that's the story as I get it.

Mr. COBURN. In other words, he indicated to you that because they had to pay for the assays maybe you—not you personally, but I mean the Government—ought to go along with their selection of the assay house is that correct?

Mr. DAVIS. I think it was a factor in their consideration, but again I don't know, but as I recall the piece of testimony that was read here a few moments ago from Mr. Volin, it certainly wasn't a controlling thing at all because he testified if he hadn't approved them he wouldn't have let the assays go to Mobile.

Mr. COBURN. But in answer to Senator Neuberger's question of Mr. Volin which was read from the January 11 transcript, page 470.

he said that he felt bound by the instructions to go along with A. W. Williams Inspection Co.

Representative JONAS. Would Mr. Coburn yield to me at this point? There is one other thing I meant to read into the record when Senator Neuberger yielded to me right at that particular point, but I could not put my finger on the page of the transcript which contains the questions and answers.

They are on page 453. With your permission I would like to read about 3 or 4 questions and answers which I think should clear that up:

Representative JONAS. Did you receive any instructions, suggestions, or requests from anybody in the Department of the Interior or elsewhere to select the A. W. Williams Inspection Co. to do the assaying?

Mr. VOLIN. I did not.

Representative JONAS. Was it not your responsibility as the independent umpire or the representative of the Government to inspect this sampling and supervise it, to agree upon the assayer to do the work?

Mr. VOLIN. I believe it was; yes, sir.

Representative JONAS. And do you feel that you discharged that responsibility and that duty to your entire satisfaction by the procedures you followed in the selection of Williams?

Mr. VOLIN. I was satisfied at the time, sir.

Representative JONAS. If anybody made a mistake in the selection or agreeing to the use of the A. W. Williams Co. to make this assay, you would have to take the responsibility of that mistake, would you not?

Mr. VOLIN. I am afraid so, sir.

Representative JONAS. Because you did it yourself, thinking it was the thing to do and the proper thing to do and the reasonable thing to do under the circumstances, but without any suggestion from Secretary McKay or anybody in his department?

Mr. VOLIN. That is right.

Representative JONAS. What did you mean when you responded to the question asked by Mr. Lanigan that you did the best you could within the scope of instructions which were given to you? Did you not have instructions to use your best judgment in seeing that proper samples were taken and that a correct assay was made from them?

Mr. VOLIN. I have just read you my instructions.

Representative JONAS. You did not mean to imply your independence of movement was restricted at all by your instructions, did you?

Mr. VOLIN. I did not intend to imply that.

Mr. COBURN. I think we can stipulate that, and my question wasn't going particularly to that point, that the instructions issued by Mr. Davis said that the company had to be mutually acceptable. There is no question about that.

Here is the testimony of Mr. Volin in answer to Senator Neuberger:

Senator NEUBERGER. If you had not had those instructions from the Solicitor's office you would have sent the samples to one of the west coast firms?

Mr. VOLIN. That is right.

Senator NEUBERGER. In other words, it was those instructions which resulted in the samples being sent to Mobile, Ala., for testing?

Mr. VOLIN. I believe that is a fair statement.

Apparently when one person asked him a question he had one answer and for somebody else another, but my point is that in my question to Mr. Davis I am trying to find out this: Mr. Davis has testified that he issued this decision on the basis, legal basis, of a finding of mineralization which in turn was based on reports from the A. W. Williams Inspection Co. and Mr. Appling of the Bureau of Mines; is that correct, Mr. Davis?

Mr. DAVIS. That's right.

Mr. COBURN. Therefore, I want to find out what Mr. Appling or anyone else in the course of the proceeding did with respect to determining the competency of the A. W. Williams Co. to take mineral samples and assays and therefore I asked you to relate that telephone conversation that you had with Mr. Appling.

Mr. DAVIS. I have already related it.

Mr. COBURN. Yes, I am just reviewing for the record what I was leading up to.

Mr. DAVIS. Excuse me.

Mr. COBURN. After that conversation with Mr. Appling, as I recall your testimony, Mr. Davis, you then called in Mr. Armstrong to go over the assay reports that you had already received from the A. W. Williams Co.

Mr. DAVIS. Mr. Armstrong was on the telephone conversation with me.

Mr. COBURN. After the telephone conversation?

Mr. DAVIS. This was a three-party conversation.

Mr. COBURN. Did you have the assay reports from the A. W. Williams Co. at that time?

Mr. DAVIS. Yes.

Mr. COBURN. And you received them from whom?

Mr. DAVIS. I received them through the Williams people and through Congressman Ellsworth's office.

Mr. COBURN. You received one copy from the Williams people and one from Mr. Ellsworth?

Mr. DAVIS. No; I didn't receive anything direct from the Williams people.

Mr. COBURN. Not direct?

Mr. DAVIS. Not direct from the Williams people.

Mr. COBURN. These all came through Congressman Ellsworth's office?

Mr. DAVIS. Yes.

Mr. COBURN. Were they certified copies?

Mr. DAVIS. They are in evidence. You can see what they are.

Mr. COBURN. Are they in that stack that you had there?

Mr. DAVIS. Yes, and the photostats are attached to my statement of the morning here. They appear to be duplicate originals.

Mr. COBURN. Did you have any conversation with Congressman Ellsworth as to the nature of these assay reports, or did he just send them up to you?

Mr. DAVIS. No, I didn't have any conversation, as I recall, with Mr. Ellsworth. I don't believe I did. I am quite sure that I did with Mr. Garber, his administrative assistant.

Mr. COBURN. Mr. Garber is his administrative assistant?

Mr. DAVIS. To Mr. Ellsworth; that's right.

Mr. COBURN. Did he notify you that the reports were in Congressman Ellsworth's office and would shortly be sent to you?

Mr. DAVIS. That is right and my best recollection is he brought them down in person. Our telephone records indicate he called on the 22d of December. I was out of town, I believe, at least the next day, and as the statement says they were brought down the next morning, the 24th of December.

Mr. COBURN. Did you make any effort independently to determine whether or not these assay reports were the same as the ones sub-

mitted by the A. W. Williams Co. to Mr. Appling and Mr. McCormick in the field?

Mr. DAVIS. No; no independent one. We checked them over the telephone, the totals and all that.

Mr. COBURN. You checked with Mr. Appling?

Mr. DAVIS. Yes; my recollection is the same about that as Mr. Appling has testified. I don't think anybody after a lapse of a couple of years can start to repeat a telephone conversation, but in substance we checked the columns, or the numbers, and the answers that were in the last column, and so forth and so on, enough that there wasn't any question in my mind about the authenticity of the copies that we both had and that they were duplicates of each other.

Mr. COBURN. Didn't your instructions state that these reports should be sent promptly to you? I think paragraph 6, as I recall, of your instructions.

Mr. DAVIS. To me?

Mr. COBURN. Yes.

Mr. DAVIS. I don't recall whether they were sent to me or the Bureau of Mines.

Mr. COBURN. Paragraph 6 of your instructions dated September 3, 1953, Al Sarena Mines, Inc., Trail, Oreg., says:

The assay report should be labeled so that they are easily identified to the claims from which they are procured and the reports sent to me promptly.

Instead of coming directly to you promptly they went to Congressman Ellsworth first; is that correct?

Mr. DAVIS. They came through his office; yes.

Mr. COBURN. Before you had seen them?

Mr. DAVIS. That's right.

Mr. COBURN. Did you think this was unusual, Mr. Davis?

Mr. DAVIS. I didn't think it was particularly unusual at the time; no.

Mr. COBURN. Congressman Ellsworth had indicated considerable interest in this case, did he?

Mr. DAVIS. Very considerable, no doubt about it.

Mr. COBURN. And Mr. Garber?

Mr. DAVIS. That is right.

Senator GOLDWATER. Mr. Redwine is back. I wonder if we might see the letter that he brought with him.

Mr. REDWINE. Mr. Chairman, Senator Goldwater asked me a while ago about a letter with respect to what was in the column this morning. I said that I had not seen that letter. That is correct, I believe, Senator. You asked me then if I had seen any letter regarding the President of the United States in respect to the Al Sarena case. I said that I had.

Senator GOLDWATER. I think I included in my question, although I might not have, a letter that contained a personal note to Mr. McKay. Might we see that letter?

Mr. REDWINE. This letter, Senator, that I have here is addressed—I will hand it to you in just a minute—to a Mr. Powell. It is signed by Secretary McKay. The first paragraph reads:

Your letter to President Eisenhower relating to the Rogue River National Forest mining claim allowance has been referred to me for reply.

Mr. McKay then replies to it.

This letter of reply by Mr. McKay to Mr. Powell is dated January 5, 1955, after this decision was over.

Senator GOLDWATER. Who is Mr. Powell?

Mr. REDWINE. I don't know, sir.

Senator GOLDWATER. Is there scribbled on that in the President's handwriting anything that says "Dear Doug"?

Mr. REDWINE. No, sir.

Representative JONAS. Do you know whether there is in the committee files any such letter as that?

Mr. REDWINE. Not so far as I know.

Representative JONAS. Can you tell us whether you or any staff member took out of the Department of the Interior file any such letter as was referred to by Mr. Pearson in his column?

Mr. REDWINE. Not so far as I know, sir.

Representative JONAS. The inference is certainly clearly to be drawn from the column in the paper that there exists at present in the files of this committee such a letter which committee staff members obtained when they went through the file in the Department of the Interior, but you have no knowledge of any such letter or any such communication?

Mr. REDWINE. No, sir.

Senator GOLDWATER. Mr. Jones, I might comment that this letter, from the contents of it, seems to be in opposition to the granting of these patents. The answer to Mr. Powell would lead me to believe that Mr. Powell wrote criticizing the President.

Mr. REDWINE. I didn't evaluate the letter at all, Senator.

Senator KUCHEL. It is irrelevant to your question.

Senator GOLDWATER. It is irrelevant to my question. It is astounding to me that a member of the press of this country would constantly refer to these lies and if there are leaks in the committee staff I think, Mr. Chairman, we should investigate it.

How would Drew Pearson know of the existence of any letter unless somebody in this committee staff were telling him these things and how can he justify his statement that was contained in his column this morning that goes to some 600 newspapers in this country, if I am not incorrectly informed, that the President of the United States had personally interceded in this case?

I made a speech on the floor the other day on this subject in which I agreed with Senator Neuberger on the need for freedom of the press. This man is destroying the freedom of the press.

That is all I have to comment.

Representative HOFFMAN. Mr. Chairman, inasmuch as this morning's statement by Mr. Pearson seems to be to the effect that the President gave support, by a notation on a letter, to the charge that the Secretary of the Interior had participated in a steal of timber, it seems to me that Mr. Pearson should be brought before the committee and we should understand or be given an opportunity to learn where he gets his information.

I make that statement for one reason because I happen to be on a House committee where Mr. Moss is subcommittee chairman, and doing a very fine job, and the press appears there and the press claims to be the people, or 1 or 2 of them do, anyway, and they have the right to know. I do go along with that except on matters which must be kept secret because of national security, but I also tried to get the committee to take some action or make some inquiry as to whether or not, as the press had the right to know, an obligation did not rest upon the press to accurately report.

Do you see what I am getting at, Mr. Chairman? I am in favor of the press having all the information, televising it and getting a recording if they want it, but I think there should be the reciprocal obligation, then, to at least make an effort to report accurately.

In this situation to which the Senator has called attention this morning—there it is right before us and there are those charges—should we not try to learn whether or not the President did as charged by Mr. Pearson; endorse this steal? I ask that Mr. Pearson be called, put under oath, and that the Senator or the members of the committee have an opportunity to examine him as to where he got his information.

Senator NEUBERGER. I would just like to suggest, Mr. Chairman, we go ahead with the hearing. I want to say this as far as the press is concerned. I think this ought to be put on the record.

I have never seen any such letter as that that has been discussed here. I am behind everybody, because I have not read the column in the Washington Post and Times Herald of this morning that has been discussed, but there is a great tendency to use the press when you want and berate it when you want.

There was put into the record of this hearing a voluminous set of newspaper articles which praised and defended the role of the Interior Department in the Al Sarena case. Those articles were placed in the record of the hearings by the gentleman from Michigan. They were placed in the Congressional Record by the distinguished Senator from Arizona, which, of course, is quite their right and no objection was made to including those articles.

It just seems to me we ought to go ahead and hold the hearing and not argue about the press. The press prints some things that the gentleman from Michigan and the gentleman from Arizona like. They print some thing probably that I like, and there are all kinds of statements in the press and all kinds of comments.

I do not know who had access to the files. I never have had. I do know that there are newspapermen who have written stories that are not wholly unfavorable to the Department's role in this who have gone through the files in the Department and had access to them and studied them in connection with this case. They may even have gone and interviewed the distinguished gentleman on the stand now and others in the Interior Department.

I just think this bringing in of the press and berating it when you do not like it and filling up the record with articles when you do like it is a side issue.

If we want to get into this, as far as the press is concerned we could run out of newsprint putting things in here.

Senator GOLDWATER. I can agree with much the Senator from Oregon says, but in a column that is read by millions of American people is a statement that says that the President of the United States intervened. I feel sure that had such a letter existed it would have long ago been put in these records. I think that I am perfectly within my rights in asking whether or not such a letter existed and if my comments on what I feel to be the responsibility of all reporters and the press to report accurately do not coincide with the thoughts of the Senator from Oregon, I am sorry.

I happen to be a layman, I am not a newspaperman; but I am like Will Rogers, all I know is what I read in the newspapers, and I

want to feel when I read it in the papers that it is correct. I am glad we had this opportunity to clear it up because we will further clear it up on the floor of the Senate.

Representative HOFFMAN. I make a motion that Mr. Pearson be called, Mr. Chairman, and I ask that the chairman rule that he be called by the committee as a witness. I want to know who sanctioned and approved his course in charging the President of the United States of participating or giving support to a steal, alleged to be a steal, by the Secretary of the Interior.

Senator NEUBERGER. I am just going to say that I am not going to put the motion.

Representative HOFFMAN. You are not the chairman.

Senator NEUBERGER. Senator Scott appointed me as acting chairman when he left and on his return asked if I would continue to preside.

Representative HOFFMAN. Has the salary been turned over, together with the gavel? That may be irrelevant.

Senator SCOTT. He gets the same.

Representative HOFFMAN. You won't put the motion?

Senator NEUBERGER. Will you let me finish?

Representative HOFFMAN. Yes.

Senator NEUBERGER. You haven't.

Representative HOFFMAN. I don't care if you want to cover up for him.

Senator NEUBERGER. I am not covering up for him. I just want to say that Congressman Chudoff isn't here. Furthermore, I want to say this for the record: I truly believe in freedom of the press in our society. I believe if any newspaper, or journalist, or radio commentator makes a misstatement that it is within the province of those about whom the misstatement was made to correct it in a public forum. When I ran for the Senate, over 80 percent of the newspapers in my State opposed me very vigorously, extremely vigorously at times. I might add. That was their right. Naturally, I think they were mistaken, but that was their right and I have never suggested or hinted that because of the things they said about me, many of which were unkind, and a good many of which were grossly untrue, they ought to be hauled before any committee. I think so far as I am concerned, we have already had too much hauling of members of the press before committees, and you don't happen to like a certain newspaperman, so you want to haul him up.

It may be that those of us on the other side don't like another newspaperman of different political persuasion and we might be tempted, unwisely, I think, into calling him up and subpoenaing him. As a former journalist and as a person who is devoted to freedom of the press, I think that any suggestion that we turn this investigation and study of natural resources into an inquisition of newspapermen or journalists or commentators is out of order.

Representative HOFFMAN. All right, Mr. Chairman. I am not complaining about the printing of anything especially but this committee is supposed to be investigating this particular case where the charge is that this land—and this article this morning charged it—was given away here, although I notice he came down from \$600,000 in value of the timber to \$200,000, which is quite a shrinkage within a week, but where the charge is, and the charge has been in the previous articles all the way through, that the Secretary of the Interior participated in a

timber steal—that is the way it has been characterized time and time again—if the committee is interested, and it has called many witnesses in trying to determine whether or not it was a timber steal, why logically shouldn't we call a man who professes to have evidence that it was and that they had gone to the highest level of authority to put it over?

If you want the facts, Pearson has the facts, allegedly, so why not call him?

Senator NEUBERGER. I would just like to say this, and I think we ought to have this on the record and then proceed:

There are other newspapermen who have said it was a perfectly orderly and fine thing for the Interior Department to do. We might suggest that they be subpoenaed and interrogated. I am opposed to inquiring into newspapermen who say things we agree with or things we don't agree with. I think it is totally out of order and I don't think it has anything to do with congressional study.

Senator GOLDWATER. I don't think we are in disagreement with you on that at all, Mr. Chairman. I support your views on freedom of the press and I always will, but I don't think it falls within the rights of any writer to use a deliberate lie. I don't know if we would prove anything by bringing him up here. We might discourage him from doing it in the future. I don't think that we should call people up here just because we disagree with them, or agree with them, but here is a case, a rather flagrant abuse of what you and I call the freedom of the press. The responsibility of a writer or of a newspaperman is to represent the truth. Just as you have related, I have had most of my newspapers against me, because I happen to be a Republican from a Democratic State, but I don't charge them with dishonesty unless they are dishonest and I don't care what they write about me as long as they write the truth. I don't like to see a man in this position say that in the files of this committee there is a letter from the President of the United States and I don't think the Senator from Oregon feels very happy about it, either.

Senator NEUBERGER. I think we ought to go on ahead and I don't think we ought to go off in any pursuit of the press.

Representative HOFFMAN. Mr. Chairman, just once more, if I may. I am not criticizing the press. I have nothing against freedom of the press or freedom of speech. I use it so certainly I couldn't be against it, but in this article the charge is that the President himself, by the note on a letter, influenced the action of the Secretary of the Interior. Are you not interested? The whole hearing, if I understand correctly, on this Al Sarena, ever since the 25th day of November, has been to attempt to learn why the Secretary granted these patents. We have had some testimony of both sides on that now. I notice counsel shakes his head. We have. Here is a man who professes to know that the President himself asked McKay to do it. Do you want to know whether the higher level did or didn't, or do you want to forget it?

Senator GOLDWATER. Let me pursue one other thought on this. I mentioned this earlier. Ever since I have come to Congress I have been very concerned with the leaks that go on in this building. I don't believe that any reporter would just sit down at a typewriter and dream something like this up. Possibly, Mr. Hoffman, we ought to suggest that we investigate our own staff to see who is leaking these

things, to see who called Mr. Pearson and said "Look, we have a letter down here that the President of the United States scribbled a note on."

Maybe we are talking, as the Senator from Oregon suggests, about the wrong side of this thing. Maybe we ought to look into our own staff and find out who is giving this information out that was completely erroneous.

Representative HOFFMAN. That was not my point. I don't care what the staff does. My point was that the chairman of the committee, Senator Scott, the distinguished chairman here from North Carolina, in a statement put out, said that the higher level overruled these gentlemen in the Department. We got into the highest level. We have gotten up to the top. We have gotten up to the President of the United States, and here is a newspaperman, who undoubtedly has some knowledge of what he is talking about, who says that the President in his own handwriting wrote across this letter telling the Secretary of the Interior to do that. Aren't we as a matter of fact, as a matter of proof, interested in that?

Senator GOLDWATER. We should at the same time be interested in who is putting this information out. This isn't the first instance.

Representative HOFFMAN. That is all right, but here is an issue that is squarely before this committee: Who caused this patent to be granted? Here is a man who says in this release published all over the country that he knows that a certain gentleman in the White House advised the Secretary to do it. Do you want to know who determined this thin for the Secretary, or don't you? There is a witness. There is a witness if you want him. Of course you have the authority. You have the gavel over there.

Senator NEUBERGER. We have the testimony this morning that the Secretary absolutely knew nothing about it and had nothing to do with it, is that not correct?

Mr. DAVIS. Yes, sir.

Representative HOFFMAN. Pardon me, but you have Mr. Pearson, who says that he knows that the other fellow——

Senator NEUBERGER. You people are so accustomed to having every single thing that appears in the press pleasing to you that what you want to do is call up anybody who prints something that you don't like. Will you let me finish?

Representative HOFFMAN. I am sorry.

Senator NEUBERGER. You put a vast mass of material in the record from newspapers defending what was done. Should we ask the authors of those articles?

Representative HOFFMAN. If you want to. I don't care.

Senator NEUBERGER. I don't believe we should enter into an inquisition or study of the press, period, whether they write something that you like or whether they write something that somebody else likes.

Mr. DAVIS. Mr. Chairman, I would like the grace of a minute or two. This statement was prepared before I ever saw the Pearson column. It is the truth. I want to say to you, Mr. Chairman, that when in a column of that kind there can appear scurrilous attacks upon the President of the United States, and especially a man of the high character of President Eisenhower, and it can go unchallenged that be interfered by some method or other with this thing we are talking about, we have arrived at a serious point in these United States.

Now, I said here that Secretary McKay didn't even know about this thing except very extremely casually. I know nothing about any letter from the President of the United States. So far as I know, no such letter ever was written and I have no recollection of it, no communications with the President, not anything of the kind. This is my decision. I will stand on it as having been my best judgment at the time. It was not interfered with by any one except as I have told you by the letters here of Congressmen of both political parties pleading about it and that sort of thing, no other interference of any kind that I know of. I want to say that I do resent, sir, and I resent keenly, the implication that I was subjected to any pressure from the President of the United States or anyone else in connection with the opinion which was rendered in this case.

I can hardly conceive that a committee would not make an effort to inquire about a statement that their own staff had leaked a letter impugning the integrity of the President of the United States and then bypass it on the ground of freedom of the press.

Thank you, sir.

Senator NEUBERGER. I just say this to you, Mr. Davis: That I regret an unfair attack upon anybody, whether an average citizen or a President of the United States. I have known nothing about any such letter. I have never seen any such letter. If there was any criticism made of the President that was unjustified, I regret it. I think it is too bad. I want to say to you that two Presidents whom I supported were bitterly criticized and attacked all throughout their careers in the presidency: President Roosevelt and President Truman. There were shabby things said about them and their families in columns, and over the radio, and in the press, and I do not know when it was suggested that the people who said these unfavorable and very shattering attacks upon President Roosevelt or President Truman, and their families, should be haled up before a congressional committee. I do not know—I am very new in the United States Senate—from my own reading experience when it was ever suggested, because there was unfair and often scurrilous criticism of President Roosevelt or President Truman, that the newspaper people who did that should be haled up before congressional committees.

Unfortunately, Presidents through history have been bitterly attacked and criticized, often unfairly. I think the first President of your party was one of the most bitterly attacked men who ever served in the White House, and I do not know when it was ever suggested that the men attacking him and criticizing him be called up before a congressional committee.

Mr. DAVIS. This is alleged to come from members of your own committee.

Senator KUCHEL. Mr. Chairman, may I break in for just a moment. Let's see if we can take this down a little bit.

Mr. Redwine, do you have charge of the files which were subpoenaed from the Department of the Interior concerning this Al Sarena matter?

Mr. REDWINE. Senator, my answer on that will have to be yes and no. At certain times I have had. Other times I have not.

Senator KUCHEL. Where are they located now?

Mr. REDWINE. Some of them in 224 and some in 2-A.

Senator KUCHEL. Have you gone over personally the files which were subpoenaed from the Department?

Mr. REDWINE. Senator, there was actually no files subpoenaed from the Department. I did not go over them when they first came to the committee. I will have to ask Mr. Coburn if I am right on this.

Mr. COBURN. That is right.

Senator KUCHEL. Let me ask Mr. Redwine now and then I will ask you, Mr. Coburn. Mr. Redwine, is it your answer that you have not gone over the files on the Al Sarena case which you obtained from the Department of the Interior?

Mr. REDWINE. Yes, sir; I have gone over them.

Senator KUCHEL. You have gone over all of them?

Mr. REDWINE. Yes, sir.

Senator KUCHEL. Have you found—I guess this will be the second time you have been asked this question—any letter which indicates any message of any kind or character from the President with respect to this matter?

Mr. REDWINE. No, sir. I have answered that before.

Senator KUCHEL. Mr. Coburn, let me ask you, have you gone over the records of this case as they have come to you from the Department of the Interior?

Mr. COBURN. In a rather cursory way. If you let me make a statement, I will explain it.

Senator KUCHEL. All right.

Mr. COBURN. At the request of the chairman of the committee, made in writing to the Secretary of the Interior, these files were sent up to the committee via special messenger, I believe—I believe a lawyer from the Solicitor's Department—and made available to the staff of the committee.

At that time Mr. Chambers, Ed Chambers, was on the staff and he and I looked them over cursorily and subsequently I turned them over to him. This is in the main committee office.

Senator KUCHEL. Is Mr. Chambers still a member of our staff?

Mr. COBURN. I don't know. Yes, he is.

Senator KUCHEL. Were the files delivered by a messenger from the Department of the Interior?

Mr. COBURN. That is correct, and he remained in the room all the time. He stayed with the files.

Senator KUCHEL. Then when he left did we retain the files?

Mr. COBURN. We retained certain photostatic copies, things that we wanted.

Senator KUCHEL. Did you see at any time any letter which indicated any kind of interest by the President with respect to this matter?

Mr. COBURN. The only one that I recall was the one that Mr. Redwine introduced.

Senator KUCHEL. You referred, Mr. Coburn, to this photostatic copy of the letter of the Secretary of the Interior to a man named Powell?

Mr. COBURN. I haven't seen it for a long time. I assume that is it.

Senator KUCHEL. This is the only one?

Mr. COBURN. Yes.

Senator KUCHEL. I want this letter to be placed in the record rather than try to interpret it. I think it might well be read, since it is the statement of our two counsel here that this constitutes the only time

that the President's name is mentioned. This is from the Secretary of the Interior dated January 5, 1955, and it reads as follows:

**MY DEAR MR. POWELL:** Your letter to President Eisenhower relating to the Rogue River National Forest mining claim allowance, has been referred to me for reply.

I share your concern for the preservation of the scenic grandeurs of the national parks and forests.

The enclosed photostat from a newspaper which investigated this case, and which supported Adlai Stevenson, should clarify this matter for you.

The decision granting this allowance to the Al Sarena Mining Co. was entirely within the laws, which have been unchanged since 1876. The Secretary of Interior is permitted no discretionary action under these laws.

The 1876 statute provides that when minerals are discovered in paying quantities on mining claims, the miner is entitled to a patent on the land, including the surface rights; and that once such minerals have been discovered, the Secretary has no discretion in the matter.

Before the Al Sarena case was decided upon, the legal staff of the Department made a painstaking and honest appraisal of all the facts. The decision was fully publicized several months ago through the press associations and in the major newspapers in the Pacific Northwest.

In this Department's administration of the laws we are determined to comply with the law.

This Department must adhere to the laws as they are written. If the laws need modernization and in this case there appears to be that necessity, the legislative branch has the responsibility to revise them.

I am glad to have had this opportunity to discuss this matter with you and trust that I have reassured you that I am fully aware of my responsibility to all the citizens of this Nation.

Sincerely yours,

**DOUGLAS MCKAY,**  
*Secretary of the Interior.*

With certain initia of copies sent to other people.

I ask that that be made a part of the record.

(The letter referred to follows:)

**THE SECRETARY OF THE INTERIOR,**  
*Washington, January 5, 1955.*

**Mr. C. W. POWELL,**  
*Overland, Mo.*

**MY DEAR MR. POWELL:** Your letter to President Eisenhower relating to the Rogue River National Forest mining claim allowance, has been referred to me for reply.

I share your concern for the preservation of the scenic grandeurs of the national parks and forests.

The enclosed photostat from a newspaper which investigated this case, and which supported Adlai Stevenson, should clarify this matter for you.

The decision granting this allowance to the Al Serena Mining Co. was entirely within the laws, which have been unchanged since 1876. The Secretary of Interior is permitted no discretionary action under these laws.

The 1876 statute provides that when minerals are discovered in paying quantities on mining claims, the miner is entitled to a patent on the land, including the surface rights; and that once such minerals have been discovered, the Secretary has no discretion in the matter.

Before the Al Serena case was decided upon, the legal staff of the Department made a painstaking and honest appraisal of all the facts. The decision was fully publicized several months ago through the press associations and in the major newspapers in the Pacific Northwest.

In this Department's administration of the laws we are determined to comply with the law.

This Department must adhere to the laws as they are written. If the laws need modernization and, in this case, there appears to be that necessity, the legislative branch has the responsibility to revise them.

I am glad to have had this opportunity to discuss this matter with you and trust that I have reassured you that I am fully aware of my responsibility to all the citizens of this Nation.

Sincerely yours,

DOUGLAS MCKAY,  
*Secretary of the Interior.*

Senator KUCHEL. I think it is fair to say for the two attorneys of law who are members of this staff, and who have had the primary custody of the data which has come from the Department of the Interior, that the statement in this morning's newspaper is incorrect.

Senator GOLDWATER. I would like to pursue this one little bit further. I have before me a copy of an excerpt of Mr. Pearson's broadcast on January 21, 1956, in the course of which he spels out the name of the Oregon Democrat who wrote the letter. There must be a little bit more to this than we know. I can't imagine that any man on the air would care to quote—

the amazing thing is that this letter was written by an Oregon Democrat, Lou Wallace.

This is an interesting excerpt. I think it should be made a part of the record. I will be glad to read it. I quote:

CAPITOL HILL (exclusive).—The Senate Interior Committee has been nursing one of the hottest letters in Washington. They're trying to figure out what to do with it. It pertains to the famous sale of part of the Rogue River National Forest to the McDonald family of Mobile, Ala., and why Secretary McKay went out of his way to make this amazing sale when other Secretaries of the Interior had consistently refused. The letter is from an Oregon insurance man to Eisenhower, asking that the Rogue River National Forest be sold to the McDonalds.

Across the top of this letter, Eisenhower wrote in his own handwriting: "Dear Doug, please see what you can do about this." "Dear Doug," of course, referred to his Secretary of Interior, Douglas McKay. The Senators now figure they have the answer as to why McKay acted. The amazing thing is that this letter was written by an Oregon Democrat, Lou Wallace.

I think we ought to see if there is such a letter some place. It would have a terrific bearing on this case.

Senator NEUBERGER. You mean a letter from a Democrat?

Senator GOLDWATER. No, no; the letter from the President saying "Dear Doug" or letters to that effect.

Mr. PERLMAN. Mr. Chairman, may I make a statement on behalf of the Public Works and Resources Subcommittee?

Mr. Chairman, on behalf of the Public Works and Resources Subcommittee, of which I have the honor to be the staff director, I want to state that as far as the letter in question is concerned, I have never seen any such letter. I want to further state that all the files, all the letters, all the correspondence, in connection with the Al Serena case have been in the possession of the Senate Interior and Insular Affairs Committee and none of the correspondence or none of the files has ever been in the possession of the chairman or the rest of the staff of the Public Works and Resources Subcommittee.

Senator GOLDWATER. I would like to suggest, Mr. Chairman, that Mr. Lou Wallace be asked if he did write such a letter.

As I say, this could have a tremendous bearing on this case.

Representative HOFFMAN. I had a couple of questions I wanted to ask Mr. Redwine, Mr. Chairman, if I may. They are very brief.

Senator NEUBERGER. We are going to adjourn at 4:30 today.

Representative HOFFMAN. Mr. Redwine, who other than yourself and Mr. Coburn, and you said Mr. O'Brien——

Mr. REDWINE. Mr. Chambers.

Representative HOFFMAN. Who other than the three had access to these files?

Mr. REDWINE. So far as when they are in my office, only the two secretaries.

Representative HOFFMAN. Who are the secretaries?

Mr. REDWINE. Miss Hoban and Miss O'Connor.

Representative HOFFMAN. And no one else?

Mr. REDWINE. That is right.

Representative HOFFMAN. Do you know whether they have any business relations with Mr. Pearson?

Mr. REDWINE. Not so far as I know. I have never seen any indication of it.

Representative HOFFMAN. What do you say, Mr. Coburn?

Mr. COBURN. Do you want me to answer your specific question?

Representative HOFFMAN. Yes.

Mr. COBURN. My office is wide open. It isn't even locked. It is just part of a room, except for a locked file drawer where I kept the Al Sarena files when I had them. I had a key to it. Mr. Mapes had a key to it. Mr. Mapes is staff member. I don't think Mr. Chambers had a key to it, and I believe my secretary had a key to it.

Representative HOFFMAN. Do you know whether any of these people, to ask the same question I put to Mr. Redwine, that you have known, or have you inquired to ascertain whether they gave any such information to Mr. Pearson?

Mr. COBURN. I have no reason to believe that they would give any information.

Representative HOFFMAN. I assume they won't, but he gets so much that is exclusive.

Mr. COBURN. May I make a statement on that point? We were never under any inhibition from the Department to keep these files secret. As a matter of fact, newspapermen have gone down to the Department and looked through the whole file.

Representative HOFFMAN. Do you mean that the newspapermen have gone through your office or that of Mr. Redwine and gone to these files and gone through them?

Mr. COBURN. I say in the Department of the Interior.

Representative HOFFMAN. I understand the Department of the Interior gives them everything.

Mr. COBURN. The same file as there was in my office. It is the same file.

Representative HOFFMAN. But you gentlemen do not know anything about it, either one of you?

Mr. REDWINE. No.

Senator NEUBERGER. Senator Scott, what are your wishes about tomorrow?

Representative HOFFMAN. You mean is Mr. Pearson coming tomorrow?

Senator NEUBERGER. I am informed, Mr. Davis, that the committee will meet again next Tuesday morning at 10 o'clock, at which time we would like to have you return, if that is convenient with you.

Mr. DAVIS. What day is that, Senator?

I am glad to have had this opportunity to discuss this matter with you and trust that I have reassured you that I am fully aware of my responsibility to all the citizens of this Nation.

Sincerely yours,

DOUGLAS MCKAY,  
*Secretary of the Interior.*

Senator KUCHEL. I think it is fair to say for the two attorneys of law who are members of this staff, and who have had the primary custody of the data which has come from the Department of the Interior, that the statement in this morning's newspaper is incorrect.

Senator GOLDWATER. I would like to pursue this one little bit further. Mr. COBURN. I say in the Department of the Interior.

Representative HOFFMAN. I understand the Department of the Interior gives them everything.

Mr. COBURN. The same file as there was in my office. It is the same file.

Representative HOFFMAN. But you gentlemen do not know anything about it, either one of you?

Mr. REDWINE. No.

Senator NEUBERGER. Senator Scott, what are your wishes about tomorrow?

Representative HOFFMAN. You mean is Mr. Pearson coming tomorrow?

Senator NEUBERGER. I am informed, Mr. Davis, that the committee will meet again next Tuesday morning at 10 o'clock, at which time we would like to have you return, if that is convenient with you.

Mr. DAVIS. What day is that, Senator?

Senator NEUBERGER. I understand it is the 31st of January, Mr. Secretary.

Mr. DAVIS. Let me ask another question: How long do you anticipate these examinations will last, Mr. Coburn?

Mr. COBURN. I would say, Mr. Davis, that my examination would probably consume, without interruption, an hour or an hour and a half.

Senator NEUBERGER. In fairness to the Secretary, who has other duties, do you think we can tell him that the committee would be through with him next Tuesday? He has other responsibilities.

Mr. DAVIS. I would like an understanding on that because I have a lot of speaking engagements and things of that kind. I would like to know that one day will terminate it. I don't want to be in the position of asking to run away from the committee.

Senator NEUBERGER. We understand.

Mr. DAVIS. On the other hand, I can't always walk away from these other people.

Senator NEUBERGER. You do know that we did in convenience to you postpone your time to today.

Mr. DAVIS. I realize that.

Senator NEUBERGER. Otherwise we would have had several days this week.

Mr. DAVIS. I am aware of that and I did appreciate it.

Senator NEUBERGER. We will try to finish next Tuesday, the 31st.

Mr. DAVIS. All right.

(Whereupon, at 4:30 p. m. the committee was recessed, to reconvene at 10 a. m. Tuesday, January 31, 1956.)

## THE AL SARENA CASE

TUESDAY, JANUARY 31, 1956

UNITED STATES SENATE,  
SUBCOMMITTEE ON LEGISLATIVE OVERSIGHT FUNCTION  
OF THE SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS,  
HOUSE OF REPRESENTATIVES,  
SUBCOMMITTEE ON PUBLIC WORKS AND RESOURCES,  
OF THE HOUSE COMMITTEE ON GOVERNMENT OPERATIONS,  
*Washington, D. C.*

The subcommittees met at 10 a. m., in the Caucus Room, Senate Office Building, Washington, D. C., Hon. W. Kerr Scott (chairman of the Senate subcommittee) presiding.

Present: Senators W. Kerr Scott (North Carolina), and Richard L. Neuberger (Oregon).

Also present: Senators Henry C. Dworshak (Idaho), Thomas H. Kuchel (California), and Barry Goldwater (Arizona).

Present: Representatives Earl Chudoff (Pennsylvania) (chairman of the House Subcommittee); Clare E. Hoffman (Michigan) and Charles Raper Jonas (North Carolina).

Senator Scott. The meeting will please come to order.

In order to move along as fast as possible I would like to again ask the members of the subcommittee to withhold any questions or statements until counsel has finished questioning Secretary Davis. The Secretary has already been on the witness chair for a full day. His time is very valuable and I am sure it is of utmost importance that we finish with him as soon as possible so he can get back to his regular duties and the subcommittee can move along with its work.

Secretary Davis, we are glad to have you back again this morning.

Mr. Coburn, will you take over?

### STATEMENT OF CLARENCE A. DAVIS, UNDER SECRETARY OF THE DEPARTMENT OF THE INTERIOR—Resumed

Mr. DAVIS. Thank you, Mr. Chairman.

There is one very minor matter that I ought to call to your attention if you will look at page 2 of my statement, Mr. Coburn.

Mr. COBURN (Chief Counsel, Senate subcommittee). Of your statement, or your transcript record?

Mr. DAVIS. No; the statement. The second full paragraph there says "March 8."

Mr. COBURN. Yes.

Mr. DAVIS. That just simply says it is a record of a telephone call in which we did not talk. We discovered in checking this back pretty carefully that actually it was April 8 instead of March 8.

Mr. COBURN. What about the next date, then?

Mr. DAVIS. The next date is right.

Mr. COBURN. This conversation took place after March 20 then?

Mr. DAVIS. It wasn't a conversation. It is just a call that we did not answer.

Mr. COBURN. It is not in sequence, in other words?

Mr. DAVIS. Just out of sequence. It is very, very minor. I don't know that it is material.

Mr. COBURN. Mr. Davis, you testified that when you were briefed by your staff on cases pending before the Solicitor there were some 278 land appeals cases then pending; is that substantially correct?

Mr. DAVIS. That's right.

Mr. COBURN. You said that several of these pending cases were considered troublesome and characterized as "headaches" and that the Al Sarena case was in that category.

Mr. DAVIS. That's right.

Mr. COBURN. How many of these so-called troublesome cases involved applications for mining claims on national forest lands?

Mr. DAVIS. I don't think any of them did; as I recall.

Mr. COBURN. None of them was identical to the Al Sarena?

Mr. DAVIS. No, no.

Mr. COBURN. This was the only one involving national forest land?

Mr. DAVIS. So far as I remember; yes.

Mr. COBURN. What action did you take on these other troublesome cases at that time?

Mr. DAVIS. They went along. They were settled and decided one way or another.

Mr. COBURN. You decided them yourself on the basis of the record before you at that time?

Mr. DAVIS. That's right.

Mr. COBURN. And you did not attempt to invoke the aid of any other agency of the Department, though, to help you in the settlement of those cases?

Mr. DAVIS. No; I don't think so, Mr. Coburn. Of course, no two cases are alike.

Mr. COBURN. That is true. Were these just as troublesome and difficult, however, as the Al Sarena case?

Mr. DAVIS. Oh, I think so. Lots of them involved matters of law and all that sort of thing.

Mr. COBURN. I didn't catch that last word.

Mr. DAVIS. I say they involved all kinds of problems, both factual and legal, but, of course, the difficulty with this one, as I have said repeatedly, was that the record in the case was not complete and admittedly not complete.

Mr. COBURN. That was according to the allegations of the McDonalds?

Mr. DAVIS. That's right, but I think that was generally recognized in the Department.

Mr. COBURN. Let me recapitulate, then. In these other troublesome cases there was no independent investigation ordered by you?

Mr. DAVIS. That's right.

Mr. COBURN. You settled them on the basis of the record before you at that time?

Mr. DAVIS. I think that is right.

Mr. COBURN. And those records were complete in your opinion?

Mr. DAVIS. At least there was no complaint about them as there was here.

Mr. COBURN. There was no complaint from anyone about them?

Mr. DAVIS. I think that is right.

Mr. COBURN. And more specifically not from any Member of Congress, at least?

Mr. DAVIS. I think that is right, although, Mr. Coburn, you must realize that when there are various matters pending down there they may not be cases like this at all, but naturally an administrative office like that has a constant line of telephone calls from up here on the Hill about all kinds of things.

Mr. COBURN. But in this Al Sarena case you met with the McDonalds at the request of Congressman Ellsworth on March 30; is that correct?

Mr. DAVIS. I believe it is.

Mr. COBURN. And this meeting was set up for the McDonalds with you by Congressman Ellsworth?

Mr. DAVIS. That's right.

Mr. COBURN. You spent about an hour with the brothers McDonald on that date?

Mr. DAVIS. That's right.

Mr. COBURN. Was anyone else present?

Mr. DAVIS. I don't believe so.

Mr. COBURN. Was Mr. Garber present?

Mr. DAVIS. I think Mr. Garber may have been there.

Mr. COBURN. Representing the Congressman?

Mr. DAVIS. That's right.

Mr. COBURN. In reciting to the committee what the McDonalds told you during this hour's conference, I noticed that they told you that there was invested about \$200,000 in the development of this mining property. Does that statement necessarily mean that the McDonalds themselves had invested \$200,000 of their own money in this property?

Mr. DAVIS. No, I think not.

Mr. COBURN. This is the accumulative investment from 1897 to that time?

Mr. DAVIS. I think that's right, yes.

Mr. COBURN. The statement says: "That they had well over a mile of tunnels in the mountain." Does that necessarily mean that they, themselves, constructed those tunnels?

Mr. DAVIS. They hadn't constructed them, Mr. Coburn. As you know, this was an old mine on which work had been done for 50 years or better.

Mr. COBURN. But the inference here is that they had constructed these tunnels and I wanted to clear that up for the record.

Mr. DAVIS. You are perfectly right about it.

Mr. COBURN. There is no question about the fact that they did construct this pilot mill, this 100-ton-a-day pilot mill; is that correct?

Mr. DAVIS. I think that is right, yes.

Mr. COBURN. But as to bunkhouses, and messhalls, toolsheds, and so forth, including access roads, as I understand it, a number of these so-called improvements were in place when the McDonalds acquired the property; is that correct?

Mr. DAVIS. Well, I don't know, but I think they were, yes. I don't even know the exact date on which the McDonalds acquired this property, but those improvements were there.

Mr. COBURN. As I understand from the previous testimony taken in this case and the record of the administrative hearing, Mr. Hattan testified that a number of these so-called improvements were in place prior to the time the McDonalds took over the property and that they were in a deteriorated condition. I think he put a value of something like a thousand dollars on the improvements, that is, the messhall, toolsheds, and things like that?

As to these access roads that are referred to here in your statement, had they not been in large part at least constructed by the Forest Service?

Mr. DAVIS. Frankly, I have never seen this place, of course, and I don't know.

Mr. COBURN. You are relating what they told you?

Mr. DAVIS. My impression—

Representative HOFFMAN. Let him answer.

Mr. DAVIS. My impression from reading the record is that a part of the road getting up there, which is, as I understand about forty-some miles north of Medford—of course, a lot of that I assume is public highway and then when you leave the public highway I think part of it is Forest Service road, but I think they also have some access roads on their own property.

Mr. COBURN. I do not want to belabor the point, but my attention has been called to page 152 of our record of November 25, in Portland. Mr. Redwine is questioning Mr. Wood, of the Forest Service, supervisor of the Rogue River National Forest, and says Mr. Redwine:

This property is served with access roads; is it not?

Mr. WOOD. Yes.

Mr. REDWINE. There are two roads on it; are there?

Mr. WOOD. Yes, sir.

Mr. REDWINE. How long have those roads been there?

Mr. WOOD. A long time, probably 30 years.

Mr. REDWINE. They are Forest Service roads; are they not?

Mr. WOOD. Yes.

As I say, I do not want to belabor it, but it seems to me the implication of this statement that you relate in your prepared statement is that this is a hardship case, these people have spent all this money in improvements and in various roads, and so on, so that you felt impelled to help them by reason of what they told you.

Representative HOFFMAN. Before he leaves that, Mr. Chairman, you do not claim that the Forest Service ever built any roads on this property or any other property from the main road up to the mine: do you?

Mr. COBURN. I am relating strictly the testimony of the Forest Service.

Representative HOFFMAN. I know, but there is an implication in your questions. I think it is a fact admitted by the Forest Service that they never built a road from a main road up to the mine. You call it an access road.

Mr. COBURN. I think if you read the testimony of the administrative hearing you will find that Mr. Hattan, in testifying under oath—

Representative HOFFMAN. I do not care what Mr. Hattan testified. He is the bird who is behind the whole contest, in my judgment.

Mr. COBURN. I do not know about that, but he testified under oath that these are Forest Service roads. Mr. Wood also so testified.

Representative HOFFMAN. I think you will find that the Forest Service never built any roads from the main highway up.

Mr. COBURN. I cannot find those words, Congressman.

Mr. Davis, in any event, regardless of who built what and how much money was invested by the McDonalds in this property, that would be no legal ground for your issuing a patent to these claims: would it?

Mr. DAVIS. Not in the absence of mineralization; no.

Mr. COBURN. It is not the main ground on which you based your decision. In fact, you felt there was sufficient mineralization.

Mr. DAVIS. That is right.

Mr. COBURN. And it would not make any difference how much money or how much of a hardship these people had undergone?

Mr. DAVIS. Yes; I think that is true. The amount of the improvements, of course, enter into this common improvement doctrine which you get into, of course.

Mr. COBURN. Isn't that considering where the improvements are?

Mr. DAVIS. Not necessarily, but as to just the mere fact that there is a large investment there, that is certainly not conclusive of the claim.

On the other hand, the fact that the claims had been worked for 50 years and that there were and had been very substantial amounts of money spent developing at least goes to the fundamental fact that it was an actual mining venture for many, many years. I think there is no question of that. The Geological Survey report way back in 1930 deemed the mine of enough importance to devote a page or two to what had been done, and so forth, but you are perfectly right in your statement that regardless of how much money they spent, if there were no minerals on the claim they weren't entitled to patent.

Mr. COBURN. Is it not also true that the record discloses that there has not been any mining since 1943?

Mr. DAVIS. I think perhaps that is true also, but, of course, that again is not necessarily the test.

Mr. COBURN. And is it not also true that the \$30,000 or \$40,000 in gold that was alleged to have been mined from the property was produced in a period from 1897 to 1943?

Mr. DAVIS. Oh, I think that is true; yes.

Mr. COBURN. And the McDonalds did not apply for patent until 1948.

Mr. DAVIS. That is right.

Mr. COBURN. As to this long recital that was made to you by the McDonalds of their difficulties and their hardships, and so on, was anything required from the McDonalds here that would not have been required of any other applicant for a mining patent?

Mr. DAVIS. I don't think so. I don't know what you are driving toward.

Mr. COBURN. For example, I am relating this to statements made by the McDonalds to you in which they said taxes were accumulating on the property, they had been the victims of bureaucratic delays, they had paid their filing fee, they had done this and done that, and I am

just wondering if there was anything there that was required of them that had not been required of any other applicant for a patent?

Mr. DAVIS. I don't think there is anything required of them; no. The requirements are perfectly clear. And there was no more in this than there was in any other case except the fact that, of course, there had been a rather extended 5-year delay in the matter during which, of course, as a claimant they were quite obviously unhappy, as I suppose anybody would be, because they were getting accumulated taxes and getting their plans. He had plans to finance and go ahead. He was getting those continuously delayed. So far as the paying of the filing fee and this statement about \$5 an acre, that's all perfectly standard and is applicable to all mining claims.

Mr. COBURN. That is right. They would not have been liable for the payment of taxes unless patent had been granted; is that not correct?

Mr. DAVIS. I don't know. I assume perhaps not, but, frankly, I am not familiar with the laws of the States as to what happens to those taxes.

Mr. COBURN. If the patent had not been granted wouldn't the lands revert to their former status?

Mr. DAVIS. It would revert back to Government land, I assume, of course. In fact, they wouldn't revert back; they just never would have passed.

Mr. COBURN. So this would remain as Federal Government land and not subject to State taxation; isn't that correct?

Mr. DAVIS. I think so.

Mr. COBURN. Speaking of this length of time that it took to decide this case, have you any knowledge or figures of the average time it takes for applicants to finally get a patent on national forest lands from the time they file their application to the time of the decision?

Mr. DAVIS. No, I don't, Mr. Coburn.

Mr. COBURN. Could someone furnish that from the Department for our record? I should not think it would be too difficult.

Mr. DAVIS. I will be glad to furnish it. I'm not too sure how difficult it may be, because those records would not necessarily be available here, you see, and his thing would arise, if there was no contest, out in the various land offices out over the country. That's the reason that I don't have the figures.

Mr. COBURN. I understand. I didn't expect you to have them, but I thought we could probably get for the record some data on how long it usually takes in a contested claim of this kind for a final decision to be reached, which I think would bear on the question of whether or not these people were unnecessarily or unreasonably delayed.

Mr. DAVIS. That's right, it would.

(The information referred to follows:)

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington, D. C., April 25, 1956.

HON. W. KERR SCOTT,

*Chairman, Subcommittee on Legislative*

*Oversight Function, Committee on Interior and Insular Affairs,  
United States Senate, Washington 25, D. C.*

My DEAR SENATOR SCOTT: On January 31, 1956, Mr. Coburn of the committee staff, orally requested Under Secretary Davis to estimate the average time elapsed between the filing of a patent application and the rendering of a final departmental decision in contested mining claim cases on national forest lands.

We understand that a similar inquiry was directed to the United States Forest Service and that on February 16, 1956, Mr. Edward C. Crafts, Acting Chief of the Forest Service, directed a reply to you in which the average elapsed time in such cases was estimated.

We have done considerable inspection of departmental files. However, in the interest of time and having read a copy of Mr. Craft's letter, we offer no better estimate.

Sincerely yours,

EDWARD WOOLEY, *Director.*

Mr. COBURN. Is it not also true, Mr. Davis, that if your decision had been not to grant these patents, there was nothing in the previous decision of the Assistant Director of the Bureau of Land Management or, as a matter of fact, in the decision ultimately made by Mr. Rice, the Bureau of Land Management hearing officer, that would have prevented the McDonalds from continuing mining these claims, sell the ore, and continue to prospect for a valid discovery?

Mr. DAVIS. Well, I think there wasn't in the opinion. Of course, one thing that was not proper, that is, the Forest Service and the Bureau of Land Management in their complaints made a mistake, was a prior asking for the absolute cancellation of the claims. Of course, they were in error in that, and it was ultimately corrected. I mean, they changed their position and said, "We don't mean that we want to cancel the claim. We just mean we don't think patent should be issued." However, that was one of the things which was cited constantly as being unfair to them. Of course, it had been corrected so it had worked out all right. It wasn't unfair to them except it was unfortunate and it didn't improve relations between them when the application asked for a cancellation of claims.

Mr. COBURN. That amendment was made by the Forest Service counsel in the administrative hearing?

Mr. DAVIS. I think it was made in the administrative hearing; yes, sir.

Mr. COBURN. After Mr. MacMahon, representing Al Sarena, and his clients, left the hearing?

Mr. DAVIS. I think that is right.

Mr. COBURN. The record so discloses.

Mr. DAVIS. I think that is right.

Mr. COBURN. I also would like to quote from the decision of April 27, 1951, of the Assistant Director of the Bureau of Land Management:

The decision of the manager—

meaning Mr. Rice in the field—

Is affirmed and mineral entry Oregon 0665 is held for cancellation as to—  
and then he lists the 15 contested claims.

This ruling does not invalidate the mining claims and the mineral claimants may retain possession thereof and continue prospecting work looking to the discovery of valuable minerals which will warrant the filing of an application for patent of the claims.

Another thing, Mr. Davis, that you relate in your statement is that the McDonalds charged, bitterly as I recall the language, that they had an unfair hearing before the Bureau of Land Management hearing officer, that is, Mr. Pierce M. Rice, in Portland, Oreg., on September 13, 1950. I notice in your opinion, however, your decision on the case, you do point to the fact that the manager, that is, the hearing officer, was entirely within his rights and was entirely correct in the

way he handled the contention of counsel for Al Sarena that he should be given the right to demur and have the case decided not on the merits at that time, but on the demurrer, so that I was wondering how much weight you gave to the statement by the McDonalds that this had been an unfair hearing.

Mr. DAVIS. Well, your record, of course, is not at all complete as to what happened out there. Apparently these people, as you can gather from the stenographic summary or statement of what went on, went into the hearing and had some considerable wrangle about the way they were going to make up the record and a good deal of colloquy ensued between the hearing officer and their counsel. The hearing officer had a right to run the hearing as long as he conducted it more or less according to due process of law. There is no doubt about that. That was the conclusion that we finally arrived at, but that had nothing to do with the complaints which were made to me by them in the beginning, because they were very consistent at all times that the whole Land Management or Forest Service were just determined to defeat these claims, right or wrong.

I don't say that is true, understand. I am just telling you the statement that they had made.

Mr. COBURN. Then you gave considerable weight to the charge made by the McDonalds to you that they had been unfairly treated by the representatives of the Bureau of Land Management and the Forest Service?

Mr. DAVIS. Well, I gave some weight to it, yes.

Mr. COBURN. How much weight did you give to the statement that the record was incomplete?

Mr. DAVIS. Well, I gave a good deal of weight to that because it was incomplete. It is yet as far as that goes.

Mr. COBURN. Has there been any supplemental information filed to make the record complete?

Mr. DAVIS. Mr. Coburn, I don't think so. It's not here now, at any rate.

Mr. COBURN. What do you think is missing, Mr. Davis?

Mr. DAVIS. Well, in the first place, of course, many of these assays which had been filed there with the Bureau, some of them, as I understand it, filed even prior to the hearing, are not in the record. Yet everybody concedes that there has been a tremendous number of various assays taken on this property, and again if you could believe what these people say a good many of those had been filed prior to that date. Then they filed a suitable set of assays in December, I guess it was, after the hearing was over, anyhow, and after Mr. Hattan's report had been completed and gone in, and those assays were not in the file.

After we had written some of those assays were sent in. Others I have never seen to this day. The whole assay situation was not very clear in the record.

Mr. COBURN. Are you finished, Mr. Davis?

Mr. DAVIS. Yes.

Mr. COBURN. On this matter of submission of additional assays, I assume now that you are referring to the allegations made by the McDonalds that they had assays which they tried to get in the record and could not get into the record; is that correct?

Mr. DAVIS. That's right.

Mr. COBURN. Is it not true, Mr. Davis, that a mineral examiner working for the United States Government in a case of this kind is under absolutely no duty or any obligation to accept assay reports submitted to him by the claimant?

Mr. DAVIS. No, I wouldn't agree with that at all. He is certainly not bound to accept as accurate assay reports submitted by the claimant, but I think he is entitled and should receive them into the record for whatever they may be worth or whatever credibility anybody may care to give to them. They should be in the record.

Mr. COBURN. You say he should do this, but my question went to whether or not legally he has to accept assay reports prepared by the claimant.

Mr. DAVIS. What do you mean "accept"?

Mr. COBURN. Accept for the record.

Mr. DAVIS. Yes, I think he ought to accept them for the record.

Mr. COBURN. He ought to, or has to?

Mr. DAVIS. I should say that his duty as a hearing examiner certainly—

Mr. COBURN. I am not talking about a hearing examiner, sir; I am talking about the mineral examiner who goes on the claims, takes samples, submits them to an assay house, and then makes his report based on those samples.

Mr. DAVIS. That's right.

Mr. COBURN. Now, is he legally obligated to accept assay reports handed to him or presented to him by the claimant?

Mr. DAVIS. Well, he is not legally bound to follow them, Mr. Coburn, but I would think he was bound to take a look at them if he is trying to do a fair job.

Mr. COBURN. Yes, he perhaps ought to morally and ethically and in fairness, but he does not have to, does he, under the law?

Mr. DAVIS. Well, I don't know that there is any fixed law on that.

Mr. COBURN. Isn't his primary and legal duty within the scope of his employment to go on to that claim and perhaps have the claimant point out spots, discovery places, and so on, and take samples for the Government, have those samples assayed, receive the reports, and then check back, as Mr. Hattan did in this case 3 times, to make sure that they were valid, and he submits that evidence to a hearing officer who is supposed to be a judge—at least he acts in a quasi-judicial capacity—and up until the time of the hearing the minerals examiner certainly is under no legal obligation to accept assay reports from the claimant; is that not correct?

Mr. DAVIS. Well, his business, Mr. Coburn, as a mineral examiner, is to make a report stating his views as to whether or not these claims are mineralized. That is his job. Now, if he wants to ignore assays that are handed him by the claimant he can do that. If he wants to believe that the claimant's assays are more dependable than the ones he took himself he can do that. He's got a definite judgment, opinion function to perform and he can rest that opinion on what he thinks is the best evidence that is available.

Mr. COBURN. But he cannot rest it on the opinion of what someone else says as to minerals?

Mr. DAVIS. If he wanted to.

Mr. COBURN. In the final analysis it is his judgment?

Mr. DAVIS. That's right.

Mr. COBURN. Is it not also true that according to proper procedure the place for the claimant to submit his assay reports and his evidence of whatever kind he may be able to procure is at the hearing before the hearing officer?

Mr. DAVIS. That's right.

Mr. COBURN. And in this case the McDonalds did not submit that evidence, did they?

Mr. DAVIS. That's right.

Mr. COBURN. And that is why the record is incomplete?

Mr. DAVIS. That's right. That's part of the reason.

Mr. COBURN. What is the other reason?

Mr. DAVIS. The other reason is that there were some of these assays that had been tendered before, as I understand the statements of everybody.

Mr. COBURN. Tendered by whom?

Mr. DAVIS. By the McDonalds to the Bureau of Land Management there.

Mr. COBURN. Let us be specific. To whom in the Bureau of Land Management? It is important because they could present them to the hearing officer at the hearing, but, as we have decided, if Mr. Hattan refused to accept them, still it would be a legal procedure. It might not be—strike that.

Senator GOLDWATER. That was rather an important remark you started to make.

Mr. COBURN. To whom did the McDonalds tell you they tried to submit their original assay report?

Mr. DAVIS. I don't even remember, Mr. Coburn. I wasn't drawing it that fine at that time. I was just listening to a story.

Mr. COBURN. Has the allegation ever been made by the McDonalds that they attempted to give these assay reports to Mr. Hattan, the minerals examiner?

Mr. DAVIS. Prior to the hearing I wouldn't say that they had.

Mr. COBURN. Prior to the field hearing, or the hearing before you?

Mr. DAVIS. No; prior to the field hearing.

Mr. COBURN. I think that the record of that hearing would indicate that at least at the time of the hearing no attempt was made by counsel or by the McDonalds to submit this evidence; isn't that correct?

**Mr. DAVIS.** I think there was no evidence offered by them at the hearing.

**Mr. COBURN.** No evidence offered. However, you don't know whether prior to that time the person in the Bureau of Land Management to whom the McDonalds attempted to submit assay reports was or was not Mr. Hattan?

**Mr. DAVIS.** No, I don't.

**Mr. COBURN.** You have testified, have you not, Mr. Davis, that when you decided to undertake this supplemental investigation through the Bureau of Mines the Forest Service was not notified?

**Mr. DAVIS.** That's right.

**Mr. COBURN.** And after the investigation had been completed and the file was before you, at that time did you or did you not advise the Forest Service of the receipt of the assay reports and Mr. Appling's report to you?

**Mr. DAVIS.** No; I did not.

**Mr. COBURN.** And you issued your decision on January 6, 1954?

**Mr. DAVIS.** That's right.

**Mr. COBURN.** You also testified, did you not, that on December 24 the assay report from the Williams Inspection Co. was submitted to you by hand by Mr. Garber?

**Mr. DAVIS.** That's right.

**Mr. COBURN.** Of Congressman Ellsworth's office?

**Mr. DAVIS.** Yes.

**Mr. COBURN.** I am just recapitulating so we will get this in the record.

At that time you examined those reports yourself or had them examined?

**Mr. DAVIS.** I looked them over; yes.

**Mr. COBURN.** Do you recall whether or not there were some penciled notations to the right of the figures listed, showing the values of the minerals?

**Mr. DAVIS.** Those figures on there are the figures, so I am informed, of Mr. Armstrong, who checked them over.

**Mr. COBURN.** I am referring to the identification of the values with the claims. I believe you will find in your exhibit that this A. W. Williams inspection report shows an addition to the values. I think it is to the right of the right-hand column. I will wait until we find it.

**Mr. DAVIS.** Do you have the exhibit number?

I guess I have it here.

Mr. COBURN. This one is not numbered. It is this one [indicating]

A. W. WILLIAMS INSPECTION COMPANY  
MOBILE, ALABAMA

REPORT OF Assays of Gold Ores

For Al Sarena Mines, Inc.  
408 1st National Bank Building  
Mobile, Alabama

Mobile, Ala.

A. W. WILLIAMS INSPECTION CO.

By

*Wm. H. Williams*

Mr. DAVIS. Yes; that's right.

Mr. COBURN. To the right of the column entitled "Total Value Per Ton" there is a column of designations which would appear to relate the value to a particular claim. For instance, at the top there is \$1.89 and \$1.94, and then a little bracket followed by "Rainbow." Who wrote those in there?

Mr. DAVIS. Mr. Armstrong.

Mr. COBURN. I don't know whether this is a fair question or not, but do you know how he correlated these two? From what source?

Mr. DAVIS. No, I don't. No, I don't. They are correlated obviously from the sample numbers and the location of the sample numbers with relation to the claims on which they were taken.

Mr. COBURN. At that time did he have before him the assay map prepared by Mr. Appling?

Mr. DAVIS. I don't know whether he did or not.

Mr. COBURN. He couldn't have, could he, if this took place on December 24 prior to the receipt of the Appling report?

Mr. DAVIS. No.

Mr. COBURN. What?

Mr. DAVIS. I suppose not, Mr. Coburn, but these were identified and they are identified and they are correct.

Mr. COBURN. They have been checked, have they?

Mr. DAVIS. I think that is right. What identification method was used to check them I frankly don't know.

Mr. COBURN. What I frankly was trying to find out is whether these notations that are on the assay report were on it when it came to you from Congressman Ellsworth's office.

Mr. DAVIS. Oh, no.

Mr. COBURN. They were not?

Mr. DAVIS. I am sure they were not. They are Mr. Armstrong's notations on there.

Mr. COBURN. He may have had some material in this huge file which would permit him to relate these topics?

Mr. DAVIS. I would assume so. As I say, they appear to be correct. So far as I know nobody has questioned the applicability of the samples to the claims.

Mr. COBURN. You said that at one time, Mr. Davis, you considered a remand of this case for a further hearing in the field before a hearing officer of the Bureau of Land Management.

Mr. DAVIS. Yes.

Mr. COBURN. And you felt in view of the charges made by the claimant, that is, Al Sarena, this would be a vain act?

Mr. DAVIS. That's right; I said that.

Mr. COBURN. Did you base that opinion on what the McDonalds had told you about their treatment?

Mr. DAVIS. No, I didn't by that time, Mr. Coburn. Naturally, when complaints of this character have been made you watch for whatever straws there are in the wind that would point to a direction as to the likelihood or possibility that the accusations are true, but by that time, of course, this foot and a half thick file was available and pretty carefully gone through.

Mr. COBURN. Was that file complete at that time?

Mr. DAVIS. Well, I think substantially so; yes. I don't know what may have gone in there since that time, but it was about like that.

Mr. COBURN. What I am getting at is this, Mr. Davis: I think you said in your statement—not in your statement, but in your opinion in your decision in this case—that the missing assay reports eventually were received by your Department, by you. At the time that you were considering a remand was that file complete as to the missing assay reports?

Mr. DAVIS. I don't know, Mr. Coburn. I don't think it was.

Mr. COBURN. If it had been complete at that time, could you not have rendered your decision then without going through this other procedure, that is, the Bureau of Mines procedure?

Mr. DAVIS. No, I don't think you could.

Mr. COBURN. Why not?

Mr. DAVIS. Because the old record of the assays of this thing is far from satisfactory at any stage of the game. I don't like to get myself here in the position of being too much of a critic of this thing, but you must remember that, just speaking generally, the first sampling that was made by Mr. Hattan on May 13, 1949, was sent over to an assay house in Grants Pass, Oreg., the Annes Engineering Co. He took samples from all of these old 23 claims at that time and sent them over to Annes. On the Annes report, as I recall, every single claim, including these which were admittedly good, which he ultimately allowed, the whole 23 simply showed trace, trace, trace, all the way down the page, as you know.

Then he went back there in July and he took a bunch more samples in connection with Mr. Sanborn of the Forest Service. You understand, I don't know any of this; I am just relating what Mr. Hattan says and what is developed in your own record because none of it is to my personal knowledge, but the record indicates he and Mr. Sanborn went over in the middle of July and they took a bunch more samples.

Mr. COBURN. That was in 1949?

Mr. DAVIS. In 1949. Those samples were sent to Abbit Hanks, but by a sort of informal route. They were sacked up and, as I believe Mr. Sanborn says, they rode around in his car for a week and then he delivered them to somebody in the Forest Service down in California, and they ultimately sent them over to have them assayed.

I think that is about the story. But, at any rate, they were not samples taken from all of the claims at that time.

Then in addition to that—my sequence of dates may not be entirely accurate, but it is approximately so—at that time Mr. Hattan took some old pulps out of the shack which was over there on the mine which the McDonalds had had prepared—I don't know how long ago, but a substantial period of time—and sent those over to Abbit Hanks, and they showed a reasonably valuable gold deposit—I have forgotten what it was—some \$3, \$4, \$5 a ton that they showed, and yet those were not taken from all even of the 8 claims which Mr. Hattan was preparing to allow; so that then he went back up there after his report was prepared apparently, and just before the hearing took some more samples, but only seven, so that didn't cover anywhere near all the claims, sent those over to the Bureau of Mines, got back that report, incidentally, by telephone, and testified to that at the hearing; and of course there again you have just this same trace, trace, trace business that you got in the first bunch, so that I think it is not an unfair statement that as a result of all of those assays you

still didn't have assays on all other claims which agreed with each other or in which you necessarily could put too much credibility.

Mr. COBURN. Mr. Davis, you have read this record of the hearing before the BLM hearing officer, Mr. Rice, have you not?

Mr. DAVIS. Yes; I have skimmed through it.

Mr. COBURN. If you look at it in detail you will find that Mr. Hattan testified under oath in answer to an examination by the Forest Service and the BLM manager that he took samples from each of these claims at one time or another.

Mr. DAVIS. Yes; and I noticed that very thing, that it was at one time or another.

Mr. COBURN. Well, it is a pretty consecutive record. I do not want to read the whole thing, but he identifies each claim. He tells where he went, when he took the sample, at whose direction he took the sample, namely, at the direction of either the caretaker, the Al Sarena people, or the McDonalds, and is it not also true, Mr. Davis, that in referring to the samples that you say he took from the seven claims and submitted to the Bureau of Mines, that was done because the McDonalds had written him a letter offering additional assay reports from those seven claims, and that he therefore went back to check as to the validity of the report submitted to him by the McDonalds?

Mr. DAVIS. I don't remember that.

Mr. COBURN. I am sure that that is in the record.

So that I got the impression—and I don't know whether you did or not—that Mr. Hattan was endeavoring to check himself all the way through this thing.

Representative HOFFMAN. May I have that last? Mr. Hattan was endeavoring to do what?

Mr. COBURN. To check himself on the accuracy of his own samples.

Representative HOFFMAN. He is trying to prove that his first conclusion was right.

Mr. COBURN. You can read that inference if you want to.

Senator NEUBERGER. Mr. Chairman, I wonder if I may make a brief statement about Mr. Hattan.

Mr. Hattan is my constituent. Earlier this morning the gentleman from Michigan said of Mr. Hattan:

He's the bird that is behind this whole thing.

Last week the Under Secretary accused Mr. Hattan of being obviously hostile and of being prejudiced. As a Senator from Oregon I feel I should make a brief statement about Mr. Hattan, inasmuch as twice this morning already these charges have been entered against Mr. Hattan.

I have endeavored to find out in the past week something about Mr. Hattan. I find out from as many authorities as I can check at this distance that Mr. Elton M. Hattan is a respected resident of my State. He is a career employee of the Bureau of Land Management. I do not know what his political affiliation is. That makes no difference.

Mr. Hattan has had a great deal more experience with the Bureau of Land Management than Mr. Appling, who was allowed to be virtually the determining person, has had with the Bureau of Mines. The Under Secretary last week testified that he had not investigated Mr. Hattan and that he had not given Mr. Hattan any hearing as to

prejudice or as to being hostile. I do feel in all truth and candor that if these attacks are to be constantly made upon this career employee of the Bureau of Land Management, who is very obviously being made a goat in this thing, some evidence should be presented to indict Mr. Hattan, and I very much resent it as a Senator from Oregon who the gentleman from Michigan says of Mr. Hattan:

He's the bird who is behind this whole thing.

In my opinion Mr. Hattan has tried to do his duty as he saw it and according to his professional qualifications, and I think these attacks upon Mr. Elton M. Hattan are indeed most unfair.

Representative HOFFMAN. Now, Mr. Chairman, in answer to my colleague, let me ask, What do you gentlemen say about McCormick and the rest of the fellows you have been after? However, the fact that you gentlemen have been attacking this, that, and the other fellow does not justify any attack that I made.

Mr. Chairman, I want to apologize and, if I am permitted, withdraw the word "bird" and substitute the word "gentleman," and that the rest of the charge I want to stand. I want to repeat that apparently Mr. Hattan, and at the suggestion in my opinion of Mr. Neuzorg, is the gentleman who instigated these charges. I will concede that perhaps he was motivated by his desire to protect the Forest Service, but when they put a mine down there in that particular locality he took the attitude of a mother of a child; anything that was going to affect that child adversely was wrong; it does not make any difference whether it is right or not, the mother defends her child. That is what he was doing, and he is the gentleman, and the record shows, Mr. Senator, that Mr. Hattan is the gentleman who instigated these charges in the beginning. He has been back of them all through and has attempted to show something which I think he was not able to substantiate, that is, that there was not sufficient mineralization there.

Apparently he entertains the idea that to justify the granting of patent on a mining claim the claimant must show that the minerals are of more value than anything else that is on the claim; for example, the timber.

He has gone off on that legal theory, apparently, and that is not the law.

Senator NEUBERGER. In further fairness to Mr. Hattan I think it should be pointed out that he has examined hundreds and perhaps thousands of mining claims in the Northwest. I can find no other instance when charges such as this have been made against Mr. Hattan's competence, ability, or fairness. Only in this instance have such charges been made against Mr. Hattan in all his long experience with the Bureau of Land Management.

Representative HOFFMAN. Perhaps he has never before been encouraged by politicians. If you will look at pages 62 and 84 of the record you will find that Mr. Hattan testified that he had not been back on these claims and he also testified—I can put that page into the record at this point—that he never had met the McDonalds before a certain date, and yet I think the record will show that he was well acquainted with them, or at least had met them.

Representative CHUDOFF. Mr. Chairman, I would just like to comment. I listened to Mr. Hattan's testimony very carefully and it

were sitting as a juror in this case I would say that his testimony is the testimony that should really be believed because he is perhaps the most disinterested person in this entire hearing. He had nothing to gain and nothing to lose in the decision that he made, and certainly it was a fair decision as far as his opinion was concerned. I do not think he had an ax to grind.

Senator GOLDWATER. Mr. Chairman, I think comment on Mr. Hattan might be proper from this end of the table.

I do not know Mr. Hattan. I do not know his professional qualifications, but a study of the report on mineralization that was submitted by Mr. Hattan puts some questions in my mind and I think the questions exist in the Secretary's mind. For instance, on the 8 claims that he allowed only 2 showed any mineralization. Six showed nothing, and on the six that showed nothing under his report we find the vast amount of money that is supposed to have been taken out of this property; I think in the neighborhood of \$40,000. That would be enough to just put a little question in my mind, and I think it is something that we might properly pursue.

I do not think it is wrong to question the accuracy of a person. I think, as the Senator suggests, we are wrong in questioning his gentlemanliness and his intentions otherwise, but I do think it is proper that we question his ability, inasmuch as he allowed patents to be granted on claims that showed nothing, by his own assays.

Mr. COBURN. Just for the record, Mr. Chairman, could we have some identification of that? Is it from his report of December 22, 1949, or what?

Senator GOLDWATER. The report reviewing three instances of sample taking. It would cover all of his sample taking.

Mr. COBURN. I was just asking the Senator for purposes of identification to tell the committee from what report he is reading.

Senator GOLDWATER. This is out of the Annes report that was submitted in this testimony.

Mr. COBURN. The Annes Engineering Co.?

Senator GOLDWATER. Yes; and from the Abbot Hanks Co.? This is a compilation. Counsel may see it.

Senator KUCHEL. Mr. Chairman, I am going to ask for the regular order, if the chairman will apply such a rule in this committee. We have here the second ranking official of the Department of the Interior, and I suggest that the interrogation of him be completed so that he may return to his duties and let this kind of colloquy proceed after the Secretary is excused. I renew my request, Mr. Chairman, for the regular order, if the chairman will apply it.

Senator SCOTT. Senator Kuchel, I may repeat this again to you: In order to move along as fast as possible I would like to again ask the members of the subcommittee to withhold any questions or statements until counsel has finished questioning Secretary Davis. The Secretary has already been in the witness chair for a full day. His time is very valuable and I am sure it is of utmost importance that we finish with him as soon as possible so he can get back to his regular duties and the subcommittee can move along with its work.

Senator KUCHEL. I congratulate the chairman and I suggest that that rule be enforced and that we proceed to the culmination of the interrogation of the Under Secretary.

prejudice or as to being hostile. I do feel in all truth and candor that if these attacks are to be constantly made upon this career employee of the Bureau of Land Management, who is very obviously being made a goat in this thing, some evidence should be presented to indict Mr. Hattan, and I very much resent it as a Senator from Oregon when the gentleman from Michigan says of Mr. Hattan:

I think, as the Senator suggests, we are wrong in questioning his gentlemanliness and his intentions otherwise, but I do think it is proper that we question his ability, inasmuch as he allowed patents to be granted on claims that showed nothing, by his own assays.

Mr. COBURN. Just for the record, Mr. Chairman, could we have some identification of that? Is it from his report of December 22, 1949, or what?

Senator GOLDWATER. The report reviewing three instances of sample taking. It would cover all of his sample taking.

Mr. COBURN. I was just asking the Senator for purposes of identification to tell the committee from what report he is reading.

Senator GOLDWATER. This is out of the Annes report that was submitted in this testimony.

Mr. COBURN. The Annes Engineering Co.?

Senator GOLDWATER. Yes; and from the Abbot Hanks Co.? This is a compilation. Counsel may see it.

Senator KUCHEL. Mr. Chairman, I am going to ask for the regular order, if the chairman will apply such a rule in this committee. We have here the second ranking official of the Department of the Interior, and I suggest that the interrogation of him be completed so that he may return to his duties and let this kind of colloquy proceed after the Secretary is excused. I renew my request, Mr. Chairman, for the regular order, if the chairman will apply it.

Senator SCOTT. Senator Kuchel, I may repeat this again to you: In order to move along as fast as possible I would like to again ask the members of the subcommittee to withhold any questions or statements until counsel has finished questioning Secretary Davis. The Secretary has already been in the witness chair for a full day. His time is very valuable and I am sure it is of utmost importance that we finish with him as soon as possible so he can get back to his regular duties and the subcommittee can move along with its work.

Senator KUCHEL. I congratulate the chairman and I suggest that that rule be enforced and that we proceed to the culmination of the interrogation of the Under Secretary.

Senator SCOTT. Mr. Coburn, go ahead.

Representative HOFFMAN. In answer to what the Senator from California says, I did not start the ball rolling, but when somebody starts it I am going to be in on it. Moreover, the Senator from Oregon examined this witness at length the other day and then counsel takes him up, and if you had been around at some of the previous hearings you would have observed some of these practices and noticed that the minority has never been given an opportunity to know what was going on. After the hearings have been held some Senators who were not present and who know nothing about what happened, come in and sit for a short time and become critical.

Senator KUCHEL. All I do is repeat my request that the interrogation of the Secretary proceed.

Representative CHUDOFF. I just want to say in answer to Mr. Hoffman, if you count the words in the record you will find Mr. Hoffman has elucidated more words than all of us put together.

Representative HOFFMAN. That is about as accurate as the rest of your statements and it is not accurate at all.

Mr. COBURN. We were talking about the subject of remanding this case for a further hearing.

Mr. DAVIS. That is right.

Mr. COBURN. I think in answer to some questions put to you by Senator Neuberger you stated that you felt that Mr. Hattan, the minerals examiner, was hostile or prejudiced, or at least had been charged with being prejudiced; is that correct?

Mr. DAVIS. Yes. I think at that point I should like to interpolate just a word on this subject.

I don't think the other day, and if I did I didn't mean to imply that there was any prejudice here by Mr. Hattan in the broad sense of the word that he had any great ax to grind or anything of that nature. I didn't mean to imply that, and I don't now. I do say in reading his report in which he talks about the value of the timber, as contrasted with the benefits of the mine and—

Mr. COBURN. Excuse me. I cannot find that in his report. Could you show me where that is in his report?

Mr. DAVIS. Yes. Look on page 19, Mr. Coburn, under the heading of "Pertinent data."

Do you want me to read it to you?

Mr. COBURN. If you choose to do so.

Mr. DAVIS. It is just one of the numerous little things that are all through these reports and the correspondence, and it is not conclusive of anything and I don't pretend that it is, but I think it does show a very considerable zeal for consideration of the overall things that are concerned here. This is just a little bit of it:

The land embraced by this group of mining claims is timber land and highly suitable for the propagation of timber crops. The land also has an inestimable value as a watershed. The timber with its undercover is the protector of the watershed.

That type of thing I think shews probably a very commendable zeal as far as that goes, but I do think that it shows that his mind is definitely concerned with several problems which haven't anything to do with the allowance of mining claims. They may be perfectly meritorious, but they just haven't anything to do with mining claims.

Mr. COBURN. Where does he say anything about the value of the timber compared to the value of the minerals?

Mr. DAVIS. I am like you, Mr. Coburn. Out of a twenty-some page document I can't sit here on the witness stand and put my finger on it, but I think that runs through the general tenor of the report.

Mr. COBURN. I studied this report very carefully, Mr. Davis, and I regret to find myself in disagreement with you as to the report. I cannot find in the Hattan report any reference made to the comparative value of the timber, vis-a-vis the value of the mineral.

Mr. DAVIS. I don't think there is, Mr. Coburn.

Mr. COBURN. I don't think there is, either.

Mr. DAVIS. No. There is no attempt by him to set up any dollar standard of comparison between the timber and the minerals.

Representative JONAS. Mr. Chairman, I apologize for interrupting, but I wonder if we could get copies of that report. I have never seen this Hattan report.

Would it be proper to ask the Secretary if he could furnish us with some extra copies?

Mr. DAVIS. We can get you some photostatic copies. I have one here which is one of these new processes which is very hard to read. I will try to get you some better ones.

Mr. COBURN. Congressman, you may have that one.

Representative JONAS. I would like to read it. I never have.

Mr. COBURN. The charge apparently was made to you that Mr. Hattan was prejudiced, but it is not a fact when it comes down to a decision, Mr. Davis, Mr. Hattan has nothing to do with the decision itself?

Mr. DAVIS. That's right.

Mr. COBURN. Mr. Pierce M. Rice, the hearing officer, is the one who made the decision; is that not correct?

Mr. DAVIS. Oh, I think that's true, but, of course, Mr. Coburn, you have the old, old problem of administrative law here staring us right in the face that I have wrestled with through the American Bar Association for 20 years. You have people who are all employed by the same agency. They are all friends. They have been together, and a matter is pending before the administrative official and his own department has taken a position and is arguing right before the same official that theoretically is neutral and all that sort of thing, and there is nothing unique about this situation except it is a thing which I am sure you, as a lawyer, and all of us, recognize as one of the vices of the whole administrative law process, one which the Administrative Procedure Act tries to get away from, and which all of us try to get away from, to get independence in the hearing examiner. I don't want to apply that to this case except to point out it is only one of hundreds of cases in Government where the Agency is the protestant or, as we say, to make it vivid, the prosecutor. They are not that, but the prosecutor, and is the judge and the jury, everything else, all in one package.

Mr. COBURN. We have to stick to this case, don't we, Mr. Davis, because, after all, one of the bases for——

Mr. DAVIS. Yes, we have to stick to the case, but I am just pointing that out, that that is one of the things that can't help but influence you when you start going through a record which is not as clear as it ought to be.

Mr. COBURN. Are you saying in effect now that at the time you decided not to remand there was some doubt in your mind as to the impartiality and fairness of Mr. Pierce M. Rice of the Bureau of Land Management, Mr. Elton M. Hattan, and the Forest Service officials who had participated?

Mr. DAVIS. No, I am not saying that.

Mr. COBURN. Then I do not understand your statement. Didn't you indicate at least that because of there being, let's say, facetiously, one big happy family the claimant in this case could not have had a fair hearing on remand?

Mr. DAVIS. I don't say he couldn't have had.

Mr. COBURN. But you doubt it?

Mr. DAVIS. I just say that I think the procedure of transferring the thing to someone where that situation does not exist is a fair and proper procedure.

Mr. COBURN. Apparently you don't feel the same way about the Bureau of Mines as you do about the Bureau of Land Management, from your testimony.

Mr. DAVIS. Well, I didn't know at the time—after all, I had only been down here about 6 months at this time—anything about either one of them to any great detail, beyond what was apparent from this record, but I do think that the Bureau of Mines, having no connection with it and not having held the hearing or not having any of their people previously mixed up, employed in it, or having anything to do with it, it just seemed to me at that time a more neutral agency.

Mr. COBURN. More neutral?

Mr. DAVIS. That's right.

Mr. COBURN. Of course, the record shows that Mr. Hattan when he took those last samples at the request of the McDonalds submitted them to the Bureau of Mines assay office at Albany and that those results were still insufficient in mineral quality.

Mr. DAVIS. Yes, that's right.

Mr. COBURN. That appeared in your record; did it not?

Mr. DAVIS. That's right, Mr. Coburn, but you must also remember that so far as I have examined these records, did examine them, so far as I know them now, if you want to get right down to putting this thing on purely an assay basis, even the claims which are admittedly mineralized by everybody, these eight which were allowed without contest, do not have in here clear evidence of mineralization.

I accepted the fact that the Forest Service agreed, seemed to agree, that there was no doubt they were mineralized, and Mr. Hattan seemed to agree with it, so I accept that, but when you get down to actual assays on those particular claims, there are several of them that were not even submitted to the assay house.

Mr. COBURN. But in your decision, which is based on sufficient mineralization, you allowed the 8 claims as well as the 15 claims?

Mr. DAVIS. That's right.

Mr. COBURN. Yet now you question them.

Mr. DAVIS. No, I am not questioning at all, I am not questioning them at all. I am simply saying to you that as to the 8 claims on which the Forest Service said, "We withdraw objection because admittedly these are mineralized claims," even as to those the process of taking a mineral sample under Government supervision and having it assayed was not carried out completely. As a matter of fact, as I

examined this record, Mr. Coburn, these assays that were made, that were taken by the Bureau of Mines and were sent to the Williams assay house, are just about the only really complete set of assays, all identified and numbered claim by claim and all that sort of thing, that there is in this record except the first ones which were sent to the Annes Laboratories by Mr. Hattan and which he himself frankly said he didn't regard as dependable.

Mr. COBURN. Who said that?

Mr. DAVIS. I think Mr. Hattan said that somewhere in your record.

Mr. COBURN. He didn't say that precisely.

Mr. DAVIS. He didn't say it. I am just summarizing what he said.

Mr. COBURN. I think precisely what he said was that he wanted to check the accuracy of those samples.

Mr. DAVIS. That may be.

Mr. COBURN. And that is entirely different from saying they were not dependable.

Mr. DAVIS. Well, the fact, Mr. Coburn, that those assays showed only traces on these 8 claims where other assays had shown \$3, and \$4, and \$5, and \$6 a ton in itself must have caused Mr. Hattan to wonder.

I don't blame him at all for wondering. I think that's as far as you should go in any fairness to him, is to say that he wasn't very sure of them.

Mr. COBURN. The point is, is it not also true, that following the check that he made on Annes with Abbit Hanks, an assay company in San Francisco, I believe, the results of the Abbit Hanks Laboratory checked out with those of the Annes Laboratory?

Mr. DAVIS. Yes, on the 2, or 3, or 4, whatever small number were sent over there, they did. They were not all sent, you know.

Mr. COBURN. The only ones that were not sent were those which were taken from those claims that were clear-listed for patent, so that what he was checking—

Mr. DAVIS. I'm not so sure of that.

Mr. COBURN. What he was checking in effect was the accuracy of the Annes Engineering Co. reports.

Mr. DAVIS. Yes.

Mr. COBURN. And it checked out.

Mr. DAVIS. That's right.

Mr. COBURN. As a matter of fact, so did the Bureau of Mines assay reports check out, did they not, as to the amount, as to the seven claims?

Mr. DAVIS. They checked out. They also showed just trace, trace down the line, that's right.

Mr. COBURN. When you come right down to it, Mr. Davis, is it not true that the only assay reports that showed sufficient mineralization in your opinion were those submitted to you from the A. W. Williams Co., via Congressman Ellsworth?

Mr. DAVIS. No, no; there are several others in there.

Mr. COBURN. As to the contested claims?

Mr. DAVIS. There are several others which Mr. Hattan had sent which I think show mineralization, but they are spotted. This is the kind of a thing where really it is pretty difficult to sit here and generalize because we are talking about 23 claims and the samples sent

Mr. COBURN. Are you saying in effect now that at the time you decided not to remand there was some doubt in your mind as to the impartiality and fairness of Mr. Pierce M. Rice of the Bureau of Land Management, Mr. Elton M. Hattan, and the Forest Service officials who had participated?

Mr. DAVIS. No, I am not saying that.

Mr. COBURN. Then I do not understand your statement. Didn't you indicate at least that because of there being, let's say, facetiously, one big happy family the claimant in this case could not have had a fair hearing on remand?

Mr. DAVIS. I don't say he couldn't have had.

Mr. COBURN. But you doubt it?

Mr. DAVIS. I just say that I think the procedure of transferring the thing to someone where that situation does not exist is a fair and proper procedure.

Mr. COBURN. Apparently you don't feel the same way about the Bureau of Mines as you do about the Bureau of Land Management, from your testimony.

Mr. DAVIS. Well, I didn't know at the time—after all, I had only been down here about 6 months at this time—anything about either one of them to any great detail, beyond what was apparent from this record, but I do think that the Bureau of Mines, having no connection with it and not having held the hearing or not having any of their people previously mixed up, employed in it, or having anything to do with it, it just seemed to me at that time a more neutral agency.

Mr. COBURN. More neutral?

Mr. DAVIS. That's right.

Mr. COBURN. Of course, the record shows that Mr. Hattan when he took those last samples at the request of the McDonalds submitted them to the Bureau of Mines assay office at Albany and that those results were still insufficient in mineral quality.

Mr. DAVIS. Yes, that's right.

Mr. COBURN. That appeared in your record; did it not?

Mr. DAVIS. That's right, Mr. Coburn, but you must also remember that so far as I have examined these records, did examine them, so far as I know them now, if you want to get right down to putting this thing on purely an assay basis, even the claims which are admittedly mineralized by everybody, these eight which were allowed without contest, do not have in here clear evidence of mineralization.

I accepted the fact that the Forest Service agreed, seemed to agree, that there was no doubt they were mineralized, and Mr. Hattan seemed to agree with it, so I accept that, but when you get down to actual assays on those particular claims, there are several of them that were not even submitted to the assay house.

Mr. COBURN. But in your decision, which is based on sufficient mineralization, you allowed the 8 claims as well as the 15 claims?

Mr. DAVIS. That's right.

Mr. COBURN. Yet now you question them.

Mr. DAVIS. No, I am not questioning at all, I am not questioning them at all. As a matter of fact, as I

examined this record, Mr. Coburn, these assays that were made, that were taken by the Bureau of Mines and were sent to the Williams assay house, are just about the only really complete set of assays, all identified and numbered claim by claim and all that sort of thing, that there is in this record except the first ones which were sent to the Annes Laboratories by Mr. Hattan and which he himself frankly said he didn't regard as dependable.

Mr. COBURN. Who said that?

Mr. DAVIS. I think Mr. Hattan said that somewhere in your record.

Mr. COBURN. He didn't say that precisely.

Mr. DAVIS. He didn't say it. I am just summarizing what he said.

Mr. COBURN. I think precisely what he said was that he wanted to check the accuracy of those samples.

Mr. DAVIS. That may be.

Mr. COBURN. And that is entirely different from saying they were not dependable.

Mr. DAVIS. Well, the fact, Mr. Coburn, that those assays showed only traces on these 8 claims where other assays had shown \$3, and \$4, and \$5, and \$6 a ton in itself must have caused Mr. Hattan to wonder.

I don't blame him at all for wondering. I think that's as far as you should go in any fairness to him, is to say that he wasn't very sure of them.

Mr. COBURN. The point is, is it not also true, that following the check that he made on Annes with Abbit Hanks, an assay company in San Francisco, I believe, the results of the Abbit Hanks Laboratory checked out with those of the Annes Laboratory?

Mr. DAVIS. Yes, on the 2, or 3, or 4, whatever small number were sent over there, they did. They were not all sent, you know.

Mr. COBURN. The only ones that were not sent were those which were taken from those claims that were clear-listed for patent, so that what he was checking—

Mr. DAVIS. I'm not so sure of that.

Mr. COBURN. What he was checking in effect was the accuracy of the Annes Engineering Co. reports.

Mr. DAVIS. Yes.

Mr. COBURN. And it checked out.

Mr. DAVIS. That's right.

Mr. COBURN. As a matter of fact, so did the Bureau of Mines assay reports check out, did they not, as to the amount, as to the seven claims?

Mr. DAVIS. They checked out. They also showed just trace, trace down the line, that's right.

Mr. COBURN. When you come right down to it, Mr. Davis, is it not true that the only assay reports that showed sufficient mineralization in your opinion were those submitted to you from the A. W. Williams Co., via Congressman Ellsworth?

Mr. DAVIS. No, no; there are several others in there.

Mr. COBURN. As to the contested claims?

Mr. DAVIS. There are several others which Mr. Hattan had sent which I think show mineralization, but they are spotted. This is the kind of a thing where really it is pretty difficult to sit here and generalize because we are talking about 23 claims and the samples sent

around have to be checked back into the record about each claim and all that sort of thing.

Mr. COBURN. On this question of remand again, were you aware of the action taken by your predecessor, Mr. White, in offering to remand this case?

Mr. DAVIS. Yes. That appears in his letter.

Mr. COBURN. Mr. Chairman, I would like to read from a letter from Mastin G. White, Solicitor of the Department of the Interior, to the Al Sarena Mines, Inc., dated August 3, 1951, on this question of remand. It is to the Al Sarena Mines, Inc., 408 1st National Bank Building, Mobile 13, Ala.

GENTLEMEN. It appears, upon the basis of your letter dated June 23, 1951, as supplemented by information received from the manager of the land office to the effect that the reporter failed to obtain a complete transcript of the earlier portion of the proceedings at the hearing on September 13, 1950, that if you desire a further opportunity to submit evidence bearing on the question whether valuable mineral deposits have been discovered on the claims involved in your appeal (A-26248), it would be appropriate to remand the case for a supplemental hearing with respect to that issue.

It will be appreciated if you will inform me promptly whether you desire that the same be remanded for the purpose mentioned in the preceding paragraph.

That is signed "Mastin G. White." I did not read the last paragraph. I would like to have the letter placed in the record.

Senator SCOTT. Without objection, it will be admitted.

(The letter referred to follows:)

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington, D. C., August 3, 1951.

AL SARENA MINES, INC.,  
Mobile, Ala.

GENTLEMEN: It appears, upon the basis of your letter dated June 23, 1951, as supplemented by information received from the manager of the land office to the effect that the reporter failed to obtain a complete transcript of the earlier portion of the proceedings at the hearing on September 13, 1950, that if you desire a further opportunity to submit evidence bearing on the question whether valuable mineral deposits have been discovered on the claims involved in your appeal (A-26248), it would be appropriate to remand the case for a supplemental hearing with respect to that issue.

It will be appreciated if you will inform me promptly whether you desire that the case be remanded for the purpose mentioned in the preceding paragraph.

In the event of a further hearing in this case, the supplemental hearing and all subsequent proceedings will be conducted in accordance with the applicable regulations of this Department.

Very truly yours,

MASTIN G. WHITE, *Solicitor*.

Mr. COBURN. This letter was available to you at the time you were making your decision?

Mr. DAVIS. Oh, yes; there had been some serious thought given to remanding this thing.

Mr. COBURN. Do you know what response Mr. White got to this letter of August 3, 1951? Is that in your record?

Mr. DAVIS. I don't recall. At any rate, it wasn't done. They didn't accept his proposal.

Mr. COBURN. They did not accept his proposal?

Mr. WHITE. That's right.

Mr. COBURN. Mr. Chairman, I would like to offer for the record—and if the witness cares to identify it, it is all right with me—correspondence involving this matter of the remand. There is a memorandum

dum in the file here dated August 9, 1950 which I don't believe has been put in. It is from Mastin G. White concerning contest over the application of Al Sarena Mines, Inc. That is dated August 9, 1950. There is a memorandum from Mr. Marion Clawson, who was the Director of the Bureau of Land Management at that time, dated August 17, 1950, to Mr. White, in which he says:

I should like to suggest that to the greatest possible extent we avoid making commitments to Congressmen about earlier handling of cases than would normally occur. As you know, one of the problems which the land office faced for many years was the large volume of requests from Congressmen for making cases special. The volume of requests was so large that oftentimes cases received no attention unless they were special. This in turn led to applicants contacting their Congressmen for special treatment of their bad cases. Those who did not have political connections or did not realize that they were essential often got very poor service indeed. We have done our best to correct this situation by the giving of as prompt service as possible to take up all cases in reasonable order irrespective of the political connections of the applicant. \* \* \*

Apparently Mr. Clawson was somewhat disturbed about—  
Representative Jonas. What was the date?

Mr. COBURN. That was August 17, 1950.

I would like to have those placed in the record, Mr. Chairman.

Senator SCOTT. Without objection, they will be admitted.

(The memoranda referred to follow:)

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
*Washington 25, D. C., August 9, 1950.*

MEMORANDUM FOR THE FILE

Memorandum for the file

Subject: Contest over application of Al Sarena Mines, Inc., for mineral patent (Oregon 0635).

At the request of Congressman Boykin, of Alabama, I conferred this morning with W. O. MacMahon, of 26 Country Club Drive, Spring Hill, Ala., H. P. McDonald, Jr., of 408 First National Bank Building, Mobile 13, Ala., and Charles McDonald, of the same Mobile address, concerning the contest that is pending with respect to the application of Al Sarena Mines, Inc., for a mineral patent (Oregon 0665).

The visitors related in some detail the story of the applicant's difficulties and delays in the matter of obtaining a mineral patent to the land involved in the contest, and they stated that, as a result, the company had undergone great financial hardship. It was indicated that the company **faces financial ruin** unless it can obtain favorable action upon its application for a patent at an early date.

The visitors first requested that a short-cut procedure be adopted in this case, and that the initial, and likewise final, decision be rendered in the office of the secretary, so that the applicant might know at an early date whether it has a legal right under the mining laws to the land involved in the contest. I endeavored to explain to them the reasons why the departmental procedure governing cases of this sort provides for a record to be made in the field and an initial decision to be rendered "on the ground" by a field official, with the office of the secretary exercising only the function of appellate review.

The visitors then asked whether the Department would cooperate in obtaining an early hearing on the contest in the field. In particular, it was stressed that a hearing before the last week in September would be highly desirable, because H. P. McDonald, Jr., who seems to be taking the leading part for the stockholders in this matter, must return to school in Chicago not later than the last week in September. I stated that the Department would communicate with the field office and endeavor to have the hearing scheduled for an early date.

I passed this information on to Frederick Fishman, of the Bureau of Land Management, who has been working on this case. He stated that a teletype would be sent to the manager of the land office at Portland on the subject of fixing an early date for the hearing in this proceeding.

MASTIN G. WHITE, *Solicitor*.

Memorandum to: Mr. MASTIN G. WHITE, *Solicitor*.

From: Director, Bureau of Land Management.

Subject: Contest of Al Sarena Mines, Inc., for Mineral Patent, Oregon 0665.

I have read the copy of your memorandum of August 9 for the files and the note you placed on the teletype of August 15 which we received from the region. I am instructing the region to proceed with the hearing prior to September 23.

I should like to suggest that to the greatest possible extent we avoid making commitments to Congressmen about earlier handling of cases than would normally occur. As you know, one of the problems which the land office faced for many years was the large volume of requests from Congressmen for making cases special. The volume of requests was so large that oftentimes cases received no attention unless they were special. This in turn led to applicants contacting their Congressman for special treatment of their bad cases. Those who did not have political connections or did not realize that they were essential often got very poor service indeed. We have done our best to correct this situation by the giving of as prompt service as possible to all applicants and by trying so far as possible to take up all cases in reasonable order irrespective of the political connections of the applicant. I recognize that there are limitations as to how far one can go with such a policy and we have tried to be realistic about it. I am sure that we can count on your cooperation on the same policy.

MARION CLAWSON, *Director*.

Representative HOFFMAN. I would like to have the staff if we are entitled to it, and if we are not entitled to it as a matter of right, as a matter of graciousness, let us see some of those documents that he has been offering.

May I beg of you to let us take a look at them?

Senator SCOTT. Proceed.

Mr. COBURN. I also have a letter dated November 16, 1950, from Mr. White to Mr. W. O. MacMahon, Esq., 408 First National Bank Building, Mobile 13, Ala., in which he denies and repudiates any agreement that Mr. MacMahon allegedly had with Mr. White as to how the proceeding would be conducted in Portland, Oreg.

Senator SCOTT. Without objection, it will be admitted.

(The letter referred to follows:)

UNITED STATES DEPARTMENT OF THE INTERIOR.

OFFICE OF THE SOLICITOR.

Washington 25, D. C., November 16, 1950.

W. O. MACMAHON, Esq.,

Mobile 13, Ala.

MY DEAR MR. MACMAHON: I feel that I should comment for the record upon one statement appearing in your letter of October 30, relative to a proceeding which is now pending in the Bureau of Land Management and which involves Al Sarena Mines, Inc.

You refer in your letter to " \* \* \* our agreement had with you and that the hearing and all matters pertaining thereto should be conducted, and conducted only, in accordance with the rules of evidence and the rules of practice as obtain in Federal and State courts."

The only sort of commitment that I have ever made with regard to this proceeding was to the effect that I would endeavor to arrange for an early hearing in the field for the reception of evidence bearing on the issues involved in the case. I agreed to do this because of representations respecting the hardship which would be caused to Mr. H. P. McDonald, Jr., if his return to Chicago were delayed beyond the last week in September.

I would not, in any case, make an agreement of the sort mentioned in your letter of October 30. Administrative proceedings in this Department are less formal than judicial proceedings, and the Department does not feel required to

adhere strictly to the rules of evidence or to the procedural requirements which obtain in the courts. The Department endeavors, however, to accord fair treatment to persons who participate in its proceedings. Any such person who feels aggrieved by a decision rendered in his case by a bureau may take an appeal to the head of the Department.

Sincerely yours,

MASTIN G. WHITE, *Solicitor*.

Representative HOFFMAN. As a matter of procedure, I think it is only fair to the minority, only decent, to let us know where you have those documents and let us take a look at them.

Mr. COBURN. Mr. Chairman, could I answer that question? These are official documents from the file that is available to you, Congressman. They are departmental files.

Representative HOFFMAN. What of it? If the counsel is to offer them we are entitled to look at them.

Representative CHUDOFF. So there is no misunderstanding, I just want you to know that I have never seen them either. Nobody in the House, either the staff, counsel, or any member of the House committee, has seen any of these letters, although I am perfectly willing to have them admitted in the record. I think they are a part of the Interior Department's business. I think that we ought to get copies of them when you offer them for the record.

Representative HOFFMAN. It is standard practice. It is a matter of common decency.

Senator SCOTT. Let us have order.

Representative HOFFMAN. You will get order and you are getting. It is a matter of common decency, of fairness, I repeat, to let the members of the minority see a document about to be put into evidence before it is offered and before it is read. Everybody knows that.

Senator SCOTT. Go ahead, Mr. Coburn.

Mr. COBURN. Mr. Davis, this line of questioning goes to something I mentioned to you the other day about the file of letters that is available in your files from Congressman Ellsworth.

Mr. DAVIS. Yes.

Mr. COBURN. Now, as I understand, your first communication from Congress was from Congressman Ellsworth, a letter to you dated April 15, 1953, and marked "Personal"; is that correct?

Mr. DAVIS. I don't know whether you are reading from my statement.

Mr. COBURN. Well, I am not, at the moment. We made that correction as to the March 3 date on page 2 of your statement.

Then on March 20, Mr. Garber got an appointment with you for the McDonalds, and you met with them on March 30, 1953; is that correct? That is on page 2.

Mr. DAVIS. That is correct.

Mr. COBURN. You have also submitted as an exhibit a letter from Congressman Ellsworth dated April 15, 1953?

Mr. DAVIS. I think that is right, but I don't seem to put my finger on it.

Mr. COBURN. It was submitted later, as a matter of fact, in a supplemental communication to you, this April 15, 1953, letter?

Representative HOFFMAN. Mr. Chairman, unless I am mistaken, all of those letters were offered and received in the hearing at Portland

in that photostat that I put in evidence. It rehashed the whole situation.

Mr. DAVIS. Mr. Coburn, I don't find it in this copy, but I am not disposed to dispute with you a particle about it. I meant to have all of those in here.

Mr. COBURN. I think you submitted this later.

Mr. DAVIS. Oh, did I?

Mr. COBURN. Yes. You may keep that before you, if you like.

Mr. DAVIS. All right.

Senator SCOTT. Just a moment, Mr. Coburn. The House Members will have to adjourn at 12 o'clock to be over for their meeting. We will adjourn at 12 o'clock and then come back at 2 o'clock.

Mr. COBURN. Mr. Davis, in that letter before you there is some reference made to an agreement which Mr. Ellsworth states that you have with Mr. Charles R. McDonald and Mr. Herbert McDonald and Mr. Garber, relating to the patent application of the Al Sarena people. Could you give us the substance of that agreement to which he refers at that time?

Mr. DAVIS. Well, "understanding" would be a little better word than "agreement." I simply told them that we would take a look at this thing.

Mr. COBURN. You would take a look at the file?

Mr. DAVIS. That is right. This was very early in April.

Mr. COBURN. Yes. Then on April 23 you replied to Congressman Ellsworth, in which reply, among other things, you said that you were expecting some new personnel to come in to the Department. I believe you were referring to Mr. Armstrong?

Mr. DAVIS. That is right.

Mr. COBURN. And that when the personnel had arrived, you would have him look over the record?

Mr. DAVIS. That is right.

Mr. COBURN. Now, there is some reference made to this lawsuit which has been in and out of the record, which was filed by Al Sarena against the Government in Alabama. In your last paragraph, you say:

I am sorry if this conflicts with the necessities of the lawsuit pending in Alabama. However, a preliminary look at that lawsuit would indicate that it probably cannot be sustained on jurisdictional grounds, at any rate.

Was a request ever made to you to join in having this suit continued.

Mr. DAVIS. Yes, I think there was.

Mr. COBURN. What was your reaction to that?

Mr. DAVIS. I didn't care. I frankly thought the suit was subject to dismissal on grounds of lack of jurisdiction, and I didn't see it was of any consequence whatever. These people were insisting they had a good lawsuit, and the simple thing seemed to be to let it drag.

Mr. COBURN. There is not much to the statement that the Department was using the lawsuit as the reason for delaying the decision?

Mr. DAVIS. I am sure in my case, but not my predecessors, in view of the note of "Let's keep this on ice."

Mr. COBURN. That is undated and unsigned.

Mr. DAVIS. That is right.

Mr. COBURN. Is it not true that the plaintiff can move to dismiss it at any time without prejudice to his rights?

Mr. DAVIS. The plaintiff, certainly.

Mr. COBURN. The plaintiffs continued to keep that suit on, did they not?

Mr. DAVIS. That is right; they thought they had a lawsuit.

Mr. COBURN. I will offer this for the record.

(Letter referred to follows:)

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
*Washington 25, D. C., April 23, 1953.*

Re: Al Sarena Mines, Inc.

HON. HARRIS ELLSWORTH,  
*House of Representatives, Washington 25, D. C.*

DEAR MR. ELLSWORTH: Following our telephone conversation yesterday, I have personally gone through the sequence of events as set up by Mr. McDonald.

According to our understanding, I will have a complete review made of this file by one of the new men who is joining this Department and who is completely unfamiliar with it. This is substantially what I promised the Messrs. McDonald several weeks ago but, unfortunately, the new personnel has not arrived and will not be available for another 2 weeks. This will necessitate some lapse of time but will also ensure a completely independent investigation of this record.

I am sorry if this conflicts with the necessities of the lawsuit pending in Alabama. However, a preliminary look at that lawsuit would indicate that is probably cannot be sustained on jurisdictional grounds at any rate.

Sincerely,

CLARENCE A. DAVIS, *Solicitor.*

Mr. COBURN. Again on April 24, and if you do not have this before you, I will be glad to give it to you, Congressman Ellsworth wrote you again calling attention to the tax liability the company was undergoing at the moment, and asking you to take expeditious action. In fact, his request is:

In view of these additional circumstances, it appears urgent that the record be completely investigated and reviewed as agreed as soon as you have new personnel to accomplish this.

Now, in that letter which you have before you, Mr. Davis, and in response to the request made by Congressman Ellsworth, had Mr. Armstrong already begun to review the file at that time?

Mr. DAVIS. I don't know, but I don't think so. I don't think he came in until a little after this date.

Mr. COBURN. So that the Department at that time, at least, had taken no action?

Mr. DAVIS. That is right.

Mr. COBURN. On the case. Did you do anything with reference to the tax situation that Congressman Ellsworth points to in that letter? Is there anything you could have done?

Mr. DAVIS. Did we do anything?

Mr. COBURN. Yes.

Mr. DAVIS. No; I don't know what we could have done.

Mr. COBURN. Again, on April 30, 1954, Congressman Ellsworth sent you a telegram in care of the Paxton Hotel in Omaha, Nebr. This is short, and I would like to quote it, if I may, Mr. Chairman.

Senator SCOTT. All right. [Reading:]

Long distance call today regarding Al Sarena Mines case requesting contact with you as to possibility of your requesting district attorney, Mobile, Ala., to secure delay of case scheduled for May 6 or join with plaintiffs by letter or memorandum to them agreeing to 30 to 60 days extension pending administrative consideration of appeal. Uncertain if you had opportunity to see my letter—

I think he is referring to this letter there—

advising of action by Jackson County, Oreg., officials preparing for delinquent tax sale of mining claims involved. Status of land records of county on property gives county legal power to levy for taxes under State law. Lands have been on county tax duplicate 3 years without any payment of taxes because patents not issued entrymen. Unlikely any party would purchase lands at tax sale as long as case is pending in court. Appreciate having reply concerning request to district court by wire or on return to Department Monday.

That is signed "HARRIS ELLSWORTH, *Member of Congress.*"

In view of this telegram, was any action taken by the Department?

Mr. DAVIS. I don't recall any, Mr. Coburn. I don't even recall that telegram until you read it to me.

Mr. COBURN. May I offer this for the record, having read it?

Senator SCOTT. Yes.

(The telegram referred to follows:)

WASHINGTON, D. C., April 30, 1951.

HON. CLARENCE DAVIS,  
*Solicitor, Department of the Interior,*  
*Paxton Hotel, Omaha, Nebr.:*

Long-distance call today regarding Al Senena mines case requesting contact with you as to possibility of your requesting district attorney Mobile, Ala., to secure delay in hearings of case scheduled for May 6 or join with plaint ff by letter or memorandum to them agreeing to 30 to 60 days extension pending administrative consideration of appeal. Uncertain if you had opportunity to see my letter advising of action by Jackson County, Oreg., officials preparing for delinquent-tax sale of mining claims involved. Status of land records of county on property gives county legal power to levy for taxes under State law. Lands have been on county tax duplicate 3 years without any payment of taxes because patents not issued to entrymen. Unlikely any party would purchase lands at tax sale as long as case is pending in court. Appreciate having reply concerning request to district court by wire or on return to Department Monday.

HARRIS ELLSWORTH.

Mr. COBURN. Again on June 1, 1953, Congressman Ellsworth wrote you a 6-page, single-spaced letter, setting forth in considerable detail the facts, the law, and the issues in the Al Serena case as they appeared to the Congressman. Have you that before you?

Mr. DAVIS. I have that before me; yes.

Representative HOFFMAN. Mr. Chairman, if I may, I want to call counsel's attention to the fact that that letter is already in the record.

Mr. COBURN. Where?

Senator SCOTT. I want to make the observation that there is a whole lot of things in the record 3 or 4 times. Let counsel move along here and we can get some of it put together.

Representative HOFFMAN. The difficulty with that is that counsel on that side keeps putting it in. If you will go back to where I offered it on November 25 at Portland, that very letter was put in the record. I have a copy of it here.

Mr. COBURN. Isn't it a newspaper article?

Representative HOFFMAN. Yes; it is a photostat.

Mr. COBURN. I am trying to examine the witness on the basis of photostatic copies of letters, not on the basis of newspaper articles.

Representative HOFFMAN. The Senator advises me that this is not a photostat. I come from a country town and do not know about those things, but this material, all of it, is in the record.

Mr. COBURN. May I proceed, Mr. Chairman?

Senator SCOTT. Go ahead.

Mr. COBURN. On the basis of that letter of June 1, 1953, Mr. Davis, and it is a rather involved and lengthy communication, I note that on page 4 a charge of fraud is made. I was wondering what action either you or Mr. Armstrong took on the basis of that allegation? It is about the third paragraph down.

Mr. DAVIS. On page 4.

Representative JONAS. Pardon me, sir. Would it be proper to read the allegation into the record?

Mr. COBURN. I was waiting for the witness to identify the letter.

Mr. DAVIS. I guess I have it located. Go ahead and read it.

Mr. COBURN. You would have to read the preceding paragraph, too:

It is a matter of conjecture whether the decision at any point, regardless of collateral testimony of witnesses and experts, would have been accepted as sufficient in the absence of the applicant's evidence of mineralization as against the Government's assay reports, all of which are in the file. If not in substance, at least in effect, the result accomplished was essentially in the nature of accepting the evidence of the contestant and suppressing the evidence of the contestee.

Such action, wilfully done, would constitute fraud and vitiate every action and decision predicated upon the incomplete file.

Did you give that any weight?

Mr. DAVIS. Not in particular. That is just making an argument, calling things by names. It doesn't mean anything one way or the other.

Mr. COBURN. Thank you, Mr. Davis.

Now, attached to that I have a memorandum for the files dated June 4, 1953, in which you mention this June 1, 1953, letter.

Memorandum for the files.

Subject: Al Sarena Mines.

On June 1, 1953, the attached letter was personally delivered by Congressman Ellsworth and we had a 2 hour discussion over this claim both as to whether the record on the appeal is complete—

and so on.

The Congressman is in complete agreement that we must have firm proof of the value of the mineral deposit before granting this patent and he has agreed to get for us through his acquaintances in the Pacific northwest, some independent reports of disinterested mining people.

I understand that ultimately he got 4 letters into the record?

Mr. DAVIS. Yes, and those are attached to my statement.

Mr. COBURN. Now, Mr. Davis, would those letters in themselves constitute evidence?

Mr. DAVIS. I think not. They simply constitute background material.

You see, I was at that time strange to this whole thing and here were a lot of charges and counter-charges running around through the aid, and I just felt that if you had some letters here from some responsible mining engineers it gave you a little bit of a floor to at least be, what I call, background material, in connection with any controversy.

Mr. COBURN. Did you—not personally—but did the Department at any time endeavor to ascertain whether or not these mining engineers had ever been retained by the Al Sarena Mines or had been employed by them in one capacity or another.

Mr. DAVIS. Well, of course, the letters themselves show that they have, or else Congressman Ellsworth's transmission letter shows that they have. One of them, of course, was Mr. McCormick, who obviously was employed, and the other one was Taylor, who was the mineral surveyor who had spend 3 months up there on the claim. I am not sure about Morrison's connection, but Kiscock, being a consulting firm in New York, were obviously employed, or they would not have been there looking them over.

Mr. COBURN. It was the man from Kiscock, I think, who had set up this pilot mill, as I recall; is that correct?

Mr. DAVIS. I don't know that.

Mr. COBURN. In any event, you gave this no more weight than you would other opinion?

Mr. DAVIS. Not any more than I would give any reputable professional man who writes me a letter giving his ideas about a situation.

Mr. COBURN. On June 4, 1953, I think you will recall that you got in touch by memorandum with Assistant Secretary Wormser?

Mr. DAVIS. That is right.

Mr. COBURN. And you ask him to talk to you about it, and there is a notation down here that "F. E. W."—and I suppose that reference is to Felix E. Wormser?

Mr. DAVIS. That is right.

Mr. COBURN (reading):

says he has reported to Mr. Davis the name of Don Davidson of F. J. Longyear Co. Mr. Davis will get in touch with F. E. W. when action is taken.

what happened to Mr. Davidson? Did he take some interest in that?

Mr. DAVIS. No, it was dropped at that point, as I recall. I never contacted the man.

Mr. COBURN. Did Mr. Wormser submit the names of anyone else.

Mr. DAVIS. No; I don't think he did. At least, if he did, he wasn't definite enough that I bothered to make a note of it.

Mr. COBURN. Had you made up your mind then to employ the Bureau of Mines?

Mr. DAVIS. No; I don't think I had. I was definitely fumbling, to determine what I should do about the thing.

Mr. COBURN. This is on June 4, 1953.

Mr. DAVIS. That is right. My conversation with Mr. Wormser was a little along the lines of my conversation with Mr. Ellsworth. Wormser was an old mining man of long experience in the West. I said to him, "What do you know about this mine? What can you find out about this? Is this a legitimate thing or isn't it?", that sort of question.

He came up with the suggestion, "Why don't you call so-and-so of this Longyear Co.?"

Mr. COBURN. Did you call him?

Mr. DAVIS. I don't think we did. I have no recollection.

Mr. COBURN. The only expert opinion that you had up to that time was what the McDonalds had told you and what Mr. Ellsworth had told you?

Mr. DAVIS. And these various engineers.

Mr. COBURN. Their reports had not been received as yet?

Mr. DAVIS. That is right. On June 1, that is right.

Mr. COBURN. Then on June 9, Congressman Ellsworth wrote to you again, and he says:

This is the letter referred to in my letter of June 1 in the last paragraph of page 2. I did not have photostats available at the time the above mentioned letter was written, but thought such copy should be transmitted in the event any question was raised to the existence of such correspondence—

and he encloses a copy of the letter from Mr. Hattan, the mineral examiner, to Mr. McDonald, regarding those 7 claims that we discussed earlier.

Mr. DAVIS. I don't recall that letter at all.

Mr. COBURN. You do not recall that? The gist of this letter is, Mr. Davis, that the assay reports that were alleged to be missing he was unable to locate through the Forest Service or the BLM.

Mr. DAVIS. Yes, I am familiar with this, or I have read it since this came up. I have reread this letter of Mr. Hattan, dated January 4, 1950, as the result of this, attached to this letter.

Mr. COBURN. As a result of this, did you have the Bureau of Land Management—since, of course, you have no jurisdiction over the Forest Service—make a search of its files both in the field and in Washington for what he calls "this assay report"?

Mr. DAVIS. Well, it was about that time—and these records, which you have been through more than I have, I suspect—show that somebody in Land Management in the Washington office asked the Portland office to submit all of the additional papers and documents they had regarding the matter.

Mr. COBURN. Those reports apparently are the samples that Hattan took at the request of the McDonalds, and then submitted to the Bureau of Mines laboratory?

Mr. DAVIS. I think, Mr. Coburn, this thing is not completely clear, but, from reading this letter of Mr. Hattan, which is attached, he had received from them another set of samples, and assays, and shortly after the hearing had been closed, and he complains in this letter that he can't identify the spots from which they were taken, and consequently he can't identify which claims they are applicable to.

Mr. COBURN. That is right.

Mr. DAVIS. Then, as they follow that along, they wrote him another letter and attempted to point out the spots from which the samples had been taken.

Mr. COBURN. Yes, and as a result, they went back and took some samples.

Mr. DAVIS. I don't think so. This was after the sampling was done. This was in January 1950.

Mr. COBURN. It seems to me that he testified, or that I have a letter somewhere to the effect that after he had requested this information he went back and checked. However, it is immaterial. I just want to make sure that that is in the record.

In other words, the file up to this point is still incomplete, in your opinion?

Mr. DAVIS. Yes. I think this letter itself is no reflection on anybody, but the letter itself shows that there were a bunch of assays here that were inadequately identified for some reason or another.

Mr. COBURN. I think you will find that there were seven assays in all.

Mr. DAVIS. Something like that.

Mr. COBURN. Yes.

Now again, on June 24, 1953, Congressman Ellsworth wrote to you about this case and transmitted at that time these opinions from engineers whom he had contacted and who were familiar with the property. I think, though, that this has been put into the record.

Mr. DAVIS. These are all attached to my statement, as a matter of fact.

Mr. COBURN. That is right. You have already testified as to that, so I will not pursue that any further.

Now, on July 16, Congressman Ellsworth again wrote to you, July 16, 1953, with which letter he supplied the letter from the mining engineer, J. E. Morrison, which had been missing from his original transmittal. You discussed that. We will not go into that.

Now, there is one thing that I do not think has been put into the record, which in view of Congressman Hoffman's statement, I will offer for the record.

Representative HOFFMAN. Pardon me, Mr. Chairman, did counsel get in that letter from Congressman Boykin?

Representative CHUDOFF. They are attached to Mr. Davis' statement.

Mr. DAVIS. That is right.

Representative HOFFMAN. Pardon me. I do not want to delay anything, Mr. Examiner.

Senator SCOTT. We gave it to you because you asked to see everything.

Mr. COBURN. Mr. Davis, this is a memorandum dated October 1, 1954, to the Secretary from the Acting Solicitor, Mr. J. Reuel Armstrong, subject: Al Sarena Mines. I will offer it for the record.

(The letter referred to follows:)

UNITED STATES DEPARTMENT OF THE INTERIOR,

OFFICE OF THE SOLICITOR,

Washington 25, D. C., October 1, 1954.

Memorandum to: Secretary.

From: Acting Solicitor.

Subject: Al Sarena Mines.

On September 3, 1953, Solicitor Davis wrote to D. Ford McCormick, a geologist from Eagle Point, Oreg., who represented the applicants for a patent to the Al Sarena location and a similar letter to the Director, Bureau of Mines, in which he requested that samples of the ore from the locations be obtained for assaying purposes. The Bureau of Mines was asked to represent the Government for the reason that they had not participated in any of the previous assaying. Four men from the Bureau of Mines stationed on the west coast and Mr. McCormick were instructed to take the assays as promptly as possible and to record each sample as it was taken. They were given the names of the claims from which the samples were to be taken. They were instructed to retain the samples in their possession until they were shipped to a qualified assayer acceptable to Mr. McCormick and the Bureau of Mines team.

Mr. R. M. Appling, mining engineer in charge of the Grants Pass, Oreg., Bureau of Mines, together with three of his assistants, Jerry Briggs, Ed. Pattee, and Ben Lettcken, comprised the team which assisted the Solicitor in making the independent assay. They sent the samples to A. W. Williams Inspection Co., Mobile, Ala., on November 17, 1953. The A. W. Williams Inspection Co. was checked for competence and reliability by Bureau of Mines officials in Washington and found to enjoy a good reputation. The assays were returned by report dated November 25, 1953.

J. REUEL ARMSTRONG,  
Acting Solicitor

Mr. CORNUM. I will not read it all, but there is just one part of it that is puzzling to me. It is the final paragraph. I will quote it.

Mr. R. M. Appling, mining engineer in charge of the Grants Pass, Oreg., Bureau of Mines, together with three of his assistants, Jerry Briggs, Edton Patten, and Ben Lettcken, comprised the team which assisted the solicitor in making the independent assay.

They sent the samples to A. W. Williams Inspection Co., Mobile, Ala., on November 17, 1953. The A. W. Williams inspection was checked for competence and reliability by Bureau of Mines officials in Washington and found to enjoy a good reputation. The assays were returned by report dated November 25, 1953.

Does that final sentence mean that the report from A. W. Williams Inspection Co. reached someone who is unidentified, on November 25, 1953?

Mr. DAVIS. No.

Mr. CORNUM. What does it mean?

Mr. DAVIS. Well, I don't know. I didn't write it, but I suppose what it means is that when these things were delivered they were put in the binder, as you know, along with the report which McCormick had made to the McDonalds.

I am talking purely from memory, but I think you will find that that probably is a misstatement of the date.

Mr. CORNUM. In other words, it should be what, December 24?

Mr. DAVIS. It should be December 17.

Mr. CORNUM. I see.

Mr. DAVIS. That is the date they are dated, as I remember.

Mr. CORNUM. That is correct.

Mr. DAVIS. I think it is a misstatement.

Mr. CORNUM. Is he referring to the reports of the assays or to the assays themselves. Apparently he is referring to the report.

Mr. DAVIS. I think the report.

Mr. CORNUM. Now, these reports, let us say, dated December 17, reached you on the 21th of December; is that correct?

Mr. DAVIS. That is right.

Mr. CORNUM. And in whose possession were they up to that point, do you know?

Mr. DAVIS. No, I don't know.

Mr. CORNUM. Copies of these reports were also sent to Mr. McCormick.

Mr. DAVIS. They were sent to the West and were, of course, delivered to the McDonalds in Mobile, and the intervening thing I don't know.

Mr. CORNUM. But you satisfied yourself as to their being originals, not having been altered in any way?

Mr. DAVIS. That is right.

Mr. CORNUM. Apparently up until this date, October 1, 1954, the Secretary knew nothing about this matter; is that correct?

Mr. DAVIS. I don't think he knew anything about it after that.

Mr. CORNUM. I was wondering what the purpose of the memorandum was. It is none of my business, precisely, but you have testified that he knew nothing about this case and I wondered if this would in some way establish when he did find out about it.

Mr. DAVIS. I don't think that actually Secretary McKay knew anything about this until probably February, after the opinion had been rendered.

Mr. DAVIS. Well, of course, the letters themselves show that they have, or else Congressman Ellsworth's transmission letter shows that they have. One of them, of course, was Mr. McCormick, who obviously was employed, and the other one was Taylor, who was the mineral surveyor who had spend 3 months up there on the claim. I am not sure about Morrison's connection, but Kisson, being a consulting firm in New York, were obviously employed, or they would not have been there looking them over.

Mr. COBURN. It was the man from Kisson, I think, who had set up this pilot mill, as I recall; is that correct?

Mr. DAVIS. I don't know that.

Mr. COBURN. In any event, you gave this no more weight than you would other opinion?

Mr. DAVIS. Not any more than I would give any reputable professional man who writes me a letter giving his ideas about a situation.

Mr. COBURN. On June 4, 1953, I think you will recall that you got in touch by memorandum with Assistant Secretary Wormser?

Mr. DAVIS. That is right.

Mr. COBURN. And you ask him to talk to you about it, and there is a notation down here that "F. E. W."—and I suppose that reference is to Felix E. Wormser?

Mr. DAVIS. That is right.

Mr. COBURN (reading):

says he has reported to Mr. Davis the name of Don Davidson of F. J. Longyear Co. Mr. Davis will get in touch with F. E. W. when action is taken.

what happened to Mr. Davidson? Did he take some interest in that?

Mr. DAVIS. No, it was dropped at that point, as I recall. I never contacted the man.

Mr. COBURN. Did Mr. Wormser submit the names of anyone else.

Mr. DAVIS. No; I don't think he did. At least, if he did, he wasn't definite enough that I bothered to make a note of it.

Mr. COBURN. Had you made up your mind then to employ the Bureau of Mines?

Mr. DAVIS. No; I don't think I had. I was definitely fumbling, to determine what I should do about the thing.

Mr. COBURN. This is on June 4, 1953.

Mr. DAVIS. That is right. My conversation with Mr. Wormser was a little along the lines of my conversation with Mr. Ellsworth. Wormser was an old mining man of long experience in the West. I said to him, "What do you know about this mine? What can you find out about this? Is this a legitimate thing or isn't it?", that sort of question.

He came up with the suggestion, "Why don't you call so-and-so of this Longyear Co.?"

Mr. COBURN. Did you call him?

Mr. DAVIS. I don't think we did. I have no recollection.

Mr. COBURN. The only expert opinion that you had up to that time was what the McDonalds had told you and what Mr. Ellsworth had told you?

Mr. DAVIS. And these various engineers.

Mr. COBURN. Their reports had not been received as yet?

Mr. DAVIS. That is right. On June 1, that is right.

Mr. COBURN. Then on June 9, Congressman Ellsworth wrote to you again, and he says:

This is the letter referred to in my letter of June 1 in the last paragraph of page 2. I did not have photostats available at the time the above-mentioned letter was written, but thought such copy should be transmitted in the event any question was raised to the existence of such correspondence—

and he encloses a copy of the letter from Mr. Hattan, the mineral examiner, to Mr. McDonald, regarding those 7 claims that we discussed earlier.

Mr. DAVIS. I don't recall that letter at all.

Mr. COBURN. You do not recall that? The gist of this letter is, Mr. Davis, that the assay reports that were alleged to be missing he was unable to locate through the Forest Service or the BLM.

Mr. DAVIS. Yes, I am familiar with this, or I have read it since this came up. I have reread this letter of Mr. Hattan, dated January 4, 1950, as the result of this, attached to this letter.

Mr. COBURN. As a result of this, did you have the Bureau of Land Management—since, of course, you have no jurisdiction over the Forest Service—make a search of its files both in the field and in Washington for what he calls "this assay report"?

Mr. DAVIS. Well, it was about that time—and these records, which you have been through more than I have, I suspect—show that somebody in Land Management in the Washington office asked the Portland office to submit all of the additional papers and documents they had regarding the matter.

Mr. COBURN. Those reports apparently are the samples that Hattan took at the request of the McDonalds, and then submitted to the Bureau of Mines laboratory?

Mr. DAVIS. I think, Mr. Coburn, this thing is not completely clear, but, from reading this letter of Mr. Hattan, which is attached, he had received from them another set of samples, and assays, and shortly after the hearing had been closed, and he complains in this letter that he can't identify the spots from which they were taken, and consequently he can't identify which claims they are applicable to.

Mr. COBURN. That is right.

Mr. DAVIS. Then, as they follow that along, they wrote him another letter and attempted to point out the spots from which the samples had been taken.

Mr. COBURN. Yes, and as a result, they went back and took some samples.

Mr. DAVIS. I don't think so. This was after the sampling was done. This was in January 1950.

Mr. COBURN. It seems to me that he testified, or that I have a letter somewhere to the effect that after he had requested this information he went back and checked. However, it is immaterial. I just want to make sure that that is in the record.

In other words, the file up to this point is still incomplete, in your opinion?

Mr. DAVIS. Yes. I think this letter itself is no reflection on anybody, but the letter itself shows that there were a bunch of assays here that were inadequately identified for some reason or another.

Mr. COBURN. I think you will find that there were seven assays in all.

Mr. DAVIS. Something like that.

Mr. COBURN. Yes.

Now again, on June 24, 1953, Congressman Ellsworth wrote to you about this case and transmitted at that time these opinions from engineers whom he had contacted and who were familiar with the property. I think, though, that this has been put into the record.

Mr. DAVIS. These are all attached to my statement, as a matter of fact.

Mr. COBURN. That is right. You have already testified as to that, so I will not pursue that any further.

Now, on July 16, Congressman Ellsworth again wrote to you, July 16, 1953, with which letter he supplied the letter from the mining engineer, J. E. Morrison, which had been missing from his original transmittal. You discussed that. We will not go into that.

Now, there is one thing that I do not think has been put into the record, which in view of Congressman Hoffman's statement, I will offer for the record.

Representative HOFFMAN. Pardon me, Mr. Chairman, did counsel get in that letter from Congressman Boykin?

Representative CHUDOFF. They are attached to Mr. Davis' statement.

Mr. DAVIS. That is right.

Representative HOFFMAN. Pardon me. I do not want to delay anything, Mr. Examiner.

Senator SCOTT. We gave it to you because you asked to see everything.

Mr. COBURN. Mr. Davis, this is a memorandum dated October 1, 1954, to the Secretary from the Acting Solicitor, Mr. J. Reuel Armstrong, subject: Al Sarena Mines. I will offer it for the record.

(The letter referred to follows:)

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington 25, D. C., October 1, 1954.

Memorandum to: Secretary.  
From: Acting Solicitor.  
Subject: Al Sarena Mines.

On September 3, 1953, Solicitor Davis wrote to D. Ford McCormick, a geologist from Eagle Point, Oreg., who represented the applicants for a patent to the Al Sarena location and a similar letter to the Director, Bureau of Mines, in which he requested that samples of the ore from the locations be obtained for assaying purposes. The Bureau of Mines was asked to represent the Government for the reason that they had not participated in any of the previous assaying. Four men from the Bureau of Mines stationed on the west coast and Mr. McCormick were instructed to take the assays as promptly as possible and to record each sample as it was taken. They were given the names of the claims from which the samples were to be taken. They were instructed to retain the samples in their possession until they were shipped to a qualified assayer acceptable to Mr. McCormick and the Bureau of Mines team.

Mr. R. M. Appling, mining engineer in charge of the Grants Pass, Oreg., Bureau of Mines, together with three of his assistants, Jerry Briggs, Elmer Pattee, and Ben Letteken, comprised the team which assisted the Solicitor in making the independent assay. They sent the samples to A. W. Williams Inspection Co., Mobile, Ala., on November 17, 1953. The A. W. Williams Inspection Co. was checked for competence and reliability by Bureau of Mines officials in Washington and found to enjoy a good reputation. The assays were returned by report dated November 25, 1953.

J. REUEL ARMSTRONG,  
Acting Solicitor.

Mr. COBURN. I will not read it all, but there is just one part of it that is puzzling to me. It is the final paragraph. I will quote it.

Mr. R. M. Appling, mining engineer in charge of the Grants Pass, Oreg., Bureau of Mines, together with three of his assistants, Jerry Briggs, Elton Patten, and Ben Letteken, comprised the team which assisted the solicitor in making the independent assay.

They sent the samples to A. W. Williams Inspection Co., Mobile, Ala., on November 17, 1953. The A. W. Williams inspection was checked for competence and reliability by Bureau of Mines officials in Washington and found to enjoy a good reputation. The assays were returned by report dated November 25, 1953.

Does that final sentence mean that the report from A. W. Williams Inspection Co. reached someone who is unidentified, on November 25, 1953?

Mr. DAVIS. No.

Mr. COBURN. What does it mean?

Mr. DAVIS. Well, I don't know. I didn't write it, but I suppose what it means is that when these things were delivered they were put in the binder, as you know, along with the report which McCormick had made to the McDonalds.

I am talking purely from memory, but I think you will find that that probably is a misstatement of the date.

Mr. COBURN. In other words, it should be what, December 24?

Mr. DAVIS. It should be December 17.

Mr. COBURN. I see.

Mr. DAVIS. That is the date they are dated, as I remember.

Mr. COBURN. That is correct.

Mr. DAVIS. I think it is a misstatement.

Mr. COBURN. Is he referring to the reports of the assays or to the assays themselves. Apparently he is referring to the report.

Mr. DAVIS. I think the report.

Mr. COBURN. Now, these reports, let us say, dated December 17, reached you on the 24th of December; is that correct?

Mr. DAVIS. That is right.

Mr. COBURN. And in whose possession were they up to that point, do you know?

Mr. DAVIS. No, I don't know.

Mr. COBURN. Copies of these reports were also sent to Mr. McCormick.

Mr. DAVIS. They were sent to the West and were, of course, delivered to the McDonalds in Mobile, and the intervening thing I don't know.

Mr. COBURN. But you satisfied yourself as to their being originals, not having been altered in any way?

Mr. DAVIS. That is right.

Mr. COBURN. Apparently up until this date, October 1, 1954, the Secretary knew nothing about this matter; is that correct?

Mr. DAVIS. I don't think he knew anything about it after that.

Mr. COBURN. I was wondering what the purpose of the memorandum was. It is none of my business, precisely, but you have testified that he knew nothing about this case and I wondered if this would in some way establish when he did find out about it.

Mr. DAVIS. I don't think that actually Secretary McKay knew anything about this until probably February, after the opinion had been rendered.

Mr. COBURN. This is some months later that the memorandum went out.

Mr. DAVIS. I don't recall ever talking to him about it. It doesn't fall within his domain, the way the Interior Department is organized. I don't think he ever knew a thing about it.

Mr. COBURN. In other words, in this interim period from December 17 until December 24, you would not know whether these assay reports were in the hands of the McDonalds, Mr. Gabriel of the company, Mr. Ellsworth, or with whom they were deposited?

Mr. DAVIS. That is right.

Mr. COBURN. Now, again, on August 27, 1953, you received a letter from Mr. H. S. Garber, secretary to Congressman Ellsworth, in which he states:

As you undoubtedly are informed by this time, the applicant in the Al Sarena Mines, Inc. case (Oregon 0655) is proceeding in accordance with arrangements discussed with Congressman Ellsworth on August 4, as a basis for possible settlement of the question at issue, namely, mineralization on the contested claims.

Now, at that time, August 27, 1953, is it true that you had entered into an agreement or arrangement with Congressman Ellsworth to follow out this procedure that was later developed?

Mr. DAVIS. I don't think I ever had any agreements. I think at that time I probably made up my mind about what I was going to do and I may have told him so.

Mr. COBURN. But he did know that you were thinking of doing this?

Mr. DAVIS. I assume so from the tone of that letter.

Mr. COBURN. He discussed this matter with you on August 4th, according to this letter?

Mr. DAVIS. Well, I discussed it with him several times, the whole problem, but he was making, of course, the typical congressional argument on behalf of the constituent; so naturally the discussion was "What can you do about it?" Of course, as you can see by these letters, the urging was that these people were not going to get a fair shake out there, and all that sort of thing, and I was casting about for some method that would come up with what I thought was a dependable answer, and at the same time, would stop this complaint that was being made that Land Management was not giving them a fair shake.

Mr. COBURN. In other words, you felt that the fair way to do it—and you so told him, Ellsworth—was to follow this Bureau of Mines procedure?

Mr. DAVIS. Was to get some neutral agency. I don't know that I even made up my mind on the Bureau of Mines. As a matter of fact, I might have well picked the Geological Survey.

Mr. COBURN. In his discussion with you, Mr. Davis, on August 4, did the Congressman suggest utilization of the Bureau of Mines?

Mr. DAVIS. I wouldn't say that. I don't know. I don't think so.

Mr. COBURN. Did he suggest that any agency of the Department of the Interior undertake an independent investigation?

Mr. DAVIS. No; I don't think so.

Mr. COBURN. This Bureau of Mines then was—

Mr. DAVIS. I think this conception of using the Bureau of Mines as an independent agency, a neutral agency, was our own decision.

Mr. COBURN. What other methods did he suggest, if any, to you?

Mr. DAVIS. I don't think he suggested any.

Mr. COBURN. He did not? He just discussed the problem as a need for haste or urgency?

Mr. DAVIS. Yes; that is right. He was urging haste as, of course, everybody had for 5 years, that these people were being unduly delayed and all that sort of thing; and then all this mineralization business that we have been through here, that it was not satisfactory, and wasn't very clear, and for heaven's sake get this thing settled somehow, get some dependable assays that you can depend on and get this settled and get these people a decision.

I will say this—and I think I should, in fairness to the Congressman—that there never was any time in connection with this thing when he was urging anything more than that we get a dependable assay and what he thought was a fair decision of this controversy.

Mr. COBURN. Did he not in one of his letters suggest the possibility of fraud?

Mr. DAVIS. Oh, yes—of course he did, but that was an accusation against the very Bureau of Land Management that we are talking about, and I don't think that that made any great impression on me.

As you know as a lawyer, Mr. Coburn, everybody arguing their side of a controversy overstates their case.

Mr. COBURN. Certainly I will agree that Congressman Ellsworth was in the position of a lawyer as an advocate for these people in the case. There is no doubt about it, no question about it.

Representative HOFFMAN. Wait a moment.

Mr. DAVIS. That is right.

Representative JONAS. I rather question whether counsel should be permitted to make a statement of that sort in the record. He is not the judge in this case.

Mr. COBURN. I did not mean anything disrespectful.

Representative JONAS. I think it ought to be stricken. Counsel's opinion has no bearing on it.

Mr. COBURN. I said I agreed with him.

Mr. DAVIS. May I be permitted to interject?

Representative JONAS. You went further and said that in your opinion the Congressman was acting as an advocate. There is no question about that. I raise the question as to whether counsel should be permitted to express his opinions as a part of the record.

Mr. DAVIS. May I interject for a moment?

Representative HOFFMAN. Before you ever get that in, I would like to have the statement of counsel read, so that we know what we are talking about.

May we have it, Mr. Chairman?

Senator SCOTT. All right.

(The record was read by the reporter.)

Representative JONAS. I just wonder if that is a proper statement for counsel to make.

Representative HOFFMAN. Of course, it is obviously false because a lawyer presumably is getting paid for what he does.

Representative CHUDOFF. Mr. Chairman.

Representative HOFFMAN. You wait until I get through, will you?

For a staff member to come in and accuse a Congressman of accepting the role of a lawyer in appearing before the Department is to charge him with a criminal offense, because no Congressman has the right to appear as a lawyer, but every Congressman is under the

duty and the obligation to represent his constituents here before any of the Departments, and we all do it.

Representative CHUDOFF. Mr. Chairman?

Representative HOFFMAN. If we are worth anything.

Representative CHUDOFF. I want to say that this is much ado about nothing. I think that the gentleman from Michigan and the gentleman from North Carolina and I have appeared on behalf of many constituents without getting a fee. There is nothing wrong unless a fee is accepted. I think that there is an article in the United States Code that says that the only time it is illegal for a Congressman to go before an agency of the Government is if he accepts a fee. I know that I have done it and I know that the Congressman from Michigan has, and perhaps the Senators have appeared, representing constituents.

If you say that the Congressman is acting as an advocate or lawyer, unless there is anything wrong, unless you say he accepts a fee, I do not think that anybody is accusing Congressman Ellsworth of anything about getting a fee.

Mr. DAVIS. Mr. Chairman, might I interject?

I think the best comment on this is the fact that the record speaks for itself. The correspondence is all in evidence and neither my comments or Mr. Coburn's comments, or anybody else's comments are going to change exactly what the record shows. I suggest that we stand on the record.

Mr. COBURN. Thank you.

Representative CHUDOFF. Mr. Chairman, I agree with Mr. Davis. I think that that is exactly the answer to the whole problem.

Mr. COBURN. I think that, in all fairness, I should certainly state that I had no intention of implying or accusing the Congressman of accepting a fee or anything like that. It was far, far from my mind.

Mr. Davis, in the second paragraph of this letter from Mr. Garber, it says:

Inasmuch as this arrangement will require possibly a month of actual examining time, this will run beyond the period covered by the present continuance in connection with the pending case before the United States District Court at Mobile, Ala.

Did Mr. Garber have any idea of what this arrangement that he refers to consisted of? He must have had.

Mr. DAVIS. Oh, he must have had, yes.

Mr. COBURN. But he did not know precisely—or did he know precisely, the method that you intended to employ?

Mr. DAVIS. I don't think he knew precisely the method because I doubt if I did, myself, although that is only 4 or 5 days before I wrote those memos of September 3, in which it was referred to the files.

Mr. COBURN. Yes; September 3.

Mr. DAVIS. I do not think he knew anything about the details, but I think at that time undoubtedly I had advised him and everybody concerned that I was going to refer the thing to one of the Interior Department agencies to take some new assays.

Mr. COBURN. It says:

Will require possibly a month of actual examining time.

And he must have had a fairly good idea of some arrangement, at least, to consume that much time.

You did discuss the proposal, did you not, of having some agency, not necessarily the Bureau of Mines, do this?

Mr. DAVIS. I think I undoubtedly told them that that was what I was thinking about doing; yes. I don't know where the "month" comes from.

Apparently, about 4 days is what they need on most of these sampling jobs.

Senator SCOTT. We will stand adjourned until 2 o'clock.

(Whereupon, at 12 o'clock noon the committee recessed, to reconvene at 2 p. m. of the same day.)

#### AFTER RECESS

Senator SCOTT. The meeting will please come to order.

Mr. Coburn informs me that he should be able to finish questioning Secretary Davis shortly, barring any interruptions.

I mean I would like to ask members of the subcommittee to refrain from interrupting until counsel has finished.

In order to save time, I would like to have an understanding with all members of the subcommittee as to procedure following the Secretary's questioning by counsel. If agreeable to everyone, I suggest that, when the counsel has finished, each side of the table have equal time to question the Secretary, with 45 minutes for the minority and 45 minutes for the majority.

Is there any objection to that?

Representative HOFFMAN. Whatever the Senator says.

Senator GOLDWATER. I am not a member of the subcommittee. I am just sitting in here.

Representative HOFFMAN. I understood that senatorial courtesy permitted you to sit.

Senator GOLDWATER. Anything that you gentlemen agree to is all right with me.

Senator SCOTT. Mr. Lanigan has said that, when Mr. Coburn finishes, he would like to ask one or two questions. I would ask Mr. Lanigan to keep those questions down, please.

#### STATEMENT OF CLARENCE A. DAVIS, UNDER SECRETARY OF THE DEPARTMENT OF THE INTERIOR—Resumed

Mr. COBURN. Shall I proceed, Mr. Chairman?

Senator SCOTT. Go ahead.

Mr. COBURN. I was referring, Mr. Davis, in my questions to you, to a letter written to you on August 27, 1953, by Mr. Garber.

In that letter he refers to the case and to its proceedings in accordance with the arrangements discussed with Congressman Ellsworth, and so forth.

In the second paragraph the letter says:

Inasmuch as this arrangement will require possibly a month of actual examining time, this will run beyond the period covered by the present continuance in connection with the pending case—

and as I recall your testimony—and correct me if I am wrong—you said that at that time, in referring to "arrangements," Mr. Garber did not know that you were going to refer this to the Bureau of Mines?

Mr. DAVIS. I did not mean to say quite that, and I don't think I said

quite that. I said I didn't think he knew any of the details of what I was going to do except that unquestionably, in the tone of the letter, he knew that I was going to refer it to an agency, and he may have known it was the Bureau of Mines.

Mr. COBURN. That arrangement was satisfactory to both Mr. Garber and Congressman Ellsworth, is that correct?

Mr. DAVIS. That is not the question. The question was whether it was satisfactory to me.

Mr. COBURN. But they did not disagree?

Mr. DAVIS. Oh, that is right.

Mr. COBURN. Now, going to the instructions that you issued on September 3, 1953, as I see it here, the original went to the Al Sarena Mines with copies to the Director, Bureau of Mines; Congressman Ellsworth; and Mr. D. Ford McCormick.

Mr. DAVIS. You can state it just as well the other way, Mr. Coburn. You can state it just as well that way, because there are three separate letters, as you know, right in the record, one to the Bureau of Mines, One to Al Sarena Mines, and one to Mr. McCormick.

Mr. COBURN. But the letter of September 3, 1952, to Al Sarena Mines, Inc., Trail, Oreg., lists copies to Director, Bureau of Mines; to Congressman Ellsworth; and to D. Ford McCormick?

Mr. DAVIS. All three were sent in a package, as I recall.

Mr. COBURN. It says "Pursuant to my conversation with Mr. Garber, the following *modus operandi* as acceptable to me in acquiring further evidence of a valid discovery on you contested claims"—and then you list your *modus operandi* and instructions.

From that language I gather that this proposal was made to you by someone. You say, "The following *modus operandi* is acceptable to me."

Is that correct or is that the wrong interpretation?

Mr. DAVIS. As I told you this morning, frankly, I do not think the proposal was made by Congressman Ellsworth or Mr. Garber, either one. I think it was evolved in the solicitor's office, but it was obviously discussed, as the other letter shows, and the letter from Garber to me from which you have been reading, and the last letter which you are reading is, of course, a confirmation of the fact that I had apparently discussed it with Mr. Garber.

Mr. COBURN. Had you discussed the *modus operandi* according to which the thing would be handled?

Mr. DAVIS. Oh, in a general way, yes. That is, that the thing would be referred, I was going to refer it to the Bureau of Mines, and with instructions to them to take their action.

Mr. COBURN. That is what the language means "pursuant to my conversation with Mr. Garber"? It follows, does it not, Mr. Davis, since you say "Pursuant to my conversation with Mr. Garber, the following *operandi* is acceptable to me," that infers, at least, that Mr. Garber had something to do with the *modus operandi*, does it not?

Mr. DAVIS. Well, I had discussed it with him, if that is what you mean, yes.

Mr. COBURN. All right.

Mr. DAVIS. But if you are trying to imply that the whole conception here was a suggestion of Mr. Ellsworth and Mr. Garber, and that I simply went along, then I think you are wrong. That isn't my recollection of it.

Mr. COBURN. I am merely trying to establish the record as to whether or not they either suggested to you this means, or you discussed it and they agreed to it, or just how it came about. That is all I want.

Here is another thing that bears on that same question. In your letter of September 3, 1953, to Mr. D. Ford McCormick, with a copy to the Director, Bureau of Mines, you say—

DEAR MR. MCCORMICK: As you know, the Al Sarena patent application has been appealed to the Secretary of the Interior. The application, to this point, has been rejected on the ground that the company has not produced satisfactory evidence of a valid discovery on certain of the claims.

In an effort to determine the matter fairly, I have agreed with Congressman Ellsworth, who has interceded on behalf of the company, to ask you and Mr. Volin of the Bureau of Mines, or his substitute, to procure personally, sufficient samples of the deposits on each claim to afford adequate assays on which the Secretary can base his decision on the validity of the discoveries.

Doesn't that also bear out the fact that either this *modus operandi* was suggested to you by Congressman Ellsworth, or that you discussed it with him and he did agree to this exact procedure?

Mr. DAVIS. He agreed or acquiesced in the procedure as being a fair method of getting at it, yes.

Mr. COBURN. And, in order to apprise all parties of the interest taken in this matter, you found it necessary in your instructions to refer to your conversation with Mr. Garber, is that correct?

Mr. DAVIS. I did not find it necessary to. I did.

Mr. COBURN. You did; yes. Now, this has nothing to do with the instructions. Mr. Davis, when you rendered your decision on January 6, 1954, did you have before you at that time the written report from Mr. Appling, the written report of the Bureau of Mines?

Mr. DAVIS. No; I have said that in the statement.

Mr. COBURN. You had no opportunity yourself, nor did your subordinates, have any opportunity to evaluate that written report; is that correct?

Mr. DAVIS. No; that isn't correct because, as I have testified a couple of times already, that report was pretty thoroughly discussed with Mr. Appling over the telephone.

Mr. COBURN. Yes, but neither Mr. Volin nor the Director of the Bureau of Mines, or anyone in your office or your Department had an opportunity to evaluate that written report prior to the time you rendered your decision. Is that not correct?

Mr. DAVIS. Well, I am afraid you are playing on words on me.

Mr. COBURN. I do not mean to. I am sorry if I gave that impression.

Here is what I am trying to get at: When you rendered your decision on January 6, 1954, is it not true that the written report of Mr. Appling, with the certificate of assays, accompanying the material, had not been evaluated for you?

Mr. DAVIS. All right.

Mr. COBURN. Had not been evaluated for you by any of your subordinates, except Mr. Appling, perhaps—who wrote the report.

Mr. DAVIS. No; I can't say that. If you want to say that they had not seen this report of Mr. Appling's, I will agree with you; but Mr. Armstrong had heard all the conversation, and knew what was in the report, just as I had, so when you say "none of your subordinates had evaluated," I can't agree with you.

Mr. COBURN. I said the written report.

Mr. DAVIS. Well, the answer is "Yes" to that because I told you the written report wasn't there.

Mr. COBURN. That is right. So no one did have an opportunity to evaluate for you the written report that was coming to you, that was en route at the time you rendered your decision; isn't that correct?

Mr. DAVIS. I guess that is correct.

Representative HOFFMAN. Can I make a point of order? I suppose I am permitted to make a point of order, even if I cannot ask a question, Mr. Chairman. Can I make a point of order or can I not?

Senator SCOTT. Go ahead.

Representative HOFFMAN. My point of order is that the line of questioning is wholly improper because what he is trying to do, and of course can successfully do, is to get the Assistant Secretary, then the Solicitor, to say that he made his decision without seeing or evaluating the written report, but leaving out of the record the fact that he had evaluated the contents of it, because they had been given to him. What they want to do is to get that statement into the record so that in the report they write they can say that the Secretary admitted that he made a decision before he had ever seen the report, and leave out the fact that he knew the contents of it.

It is just a lawyer's tricky way of getting a witness to say something that is technically correct but does not give the true situation.

If this is the way you want to do business, it is all right. It is not a fair method.

Senator SCOTT. The point of order is overruled. Not being a lawyer, I do not understand those tricky ways, so go ahead.

Representative HOFFMAN. I want to add that the ruling is a terrific shock to me, but I think I will get along, and further it is in keeping with the other rulings that have been made by the gentleman and by the chairman of the House Committee. You are consistent in all of those rulings, both of you, which all deny to the minority and to the witness, a fair opportunity to get our views on the record.

Senator SCOTT. Proceed.

Mr. COBURN. It is a matter of record, is it not, Mr. Davis, that you did call Mr. Appling on December 29, 1953, and that you asked him for 18 minutes all about the report that he was making; that you asked him as to his opinion of the value of the property? Is that not all correct? Is that not all in the record?

Mr. DAVIS. That is right.

Mr. COBURN. All my question goes to simply is this, and I think you have answered it but I am trying to answer the Congressman's statement: that no one in your Department except Mr. Armstrong, who was part of the conversation, had had an opportunity when you rendered your decision, to evaluate the written report that was coming in at that time?

Mr. DAVIS. That we hadn't seen it?

Mr. COBURN. Yes.

Mr. DAVIS. That is right.

Mr. COBURN. And you have also testified, I believe—and correct me if I am wrong—that the basis for your decisions were, (1) that the record at the time you received it was incomplete, and that, in order to obtain evidence, unquestioned evidence of mineralization, you

ordered this procedure; they came in with an assay report, and that was what you finally based your decision on, is that correct?

Mr. DAVIS. Yes, that is correct, with limitations. It is true that the opinion was based, the weight was cast in favor of the assay reports which were made. Of course, you must realize that there are a great many other things that cannot help but enter into the minds of anyone who is discussing the situation and trying to find out about it, as, for instance, in Mr. Hattan's report of this situation there in the first place is this language:

No intensive study of the geology was made, except to note the general trend of known veins and determine in general the rock types exposed on or near the surface of the individual claims. From an examination of the present underground development, and the various surface openings and rock outcrops—

Mr. COBURN. Mr. Davis, could I follow you on that, if you will tell me where it is.

Mr. DAVIS. It is on page 3 of the Hattan statement—

there appears to be a dome-shaped mass, roughly 4,000 feet in diameter, which consists of volcanic—

you pronounce those two words.

Mr. COBURN. I am not with you yet.

Mr. DAVIS. The next to the last paragraph on page 3.

Mr. COBURN. The title of that is "Mineral Deposits" in this report?

Mr. DAVIS. No, "General Geology."

Mr. COBURN. The page references are not the same, apparently.

Mr. DAVIS. It is page 2. I am sorry. I beg your pardon. This is a very dim copy. It is hard to read.

Mr. COBURN. Mr. Davis, I have the reference.

Mr. DAVIS. I was reading the next to the last paragraph on the page, in which he says that there is—

a dome-shaped central mass, roughly 4,000 feet in diameter, which consists of— naming a couple of types of stone which I cannot read here. It does not make any difference—can you pronounce them for me?

Mr. COBURN. I understand it is pronounced Breccias and Rhyolite.

Mr. DAVIS (reading):

Breccias and Rhyolite—

then if you will go to the next page—

the mine development indicates there is one main mineralized vein structure and a possibility of there being one or possibly two more parallel mineralized veins—

then, dropping down to the foot of the page:

Although the ground in either direction from the higher-grade zone is mineralized to an unknown distance, samples indicate its grade is low.

That is enough to illustrate my point that I think it appears from Mr. Hattan's report and from all of these others that, as I have said, in the statement, we have here a very large, unidentified mineralized mass, some of which has paying ore in it and some of which does not; and that it is impossible for anyone, until after exploration is completed, to lay out exact boundaries on this so-called mass of identical material.

Mr. COBURN. Is it not true that this report was not introduced in evidence?

Mr. DAVIS. I have no idea of what you have introduced in evidence.

Mr. COBURN. I do not mean at this hearing. I mean at the administrative hearing conducted by the Bureau of Land Management?

Mr. DAVIS. I don't think the report is, but it has been available all the time.

Mr. COBURN. So the report has been available. My point is that it was not part of the so-called record, or incomplete file, before you as evidence?

Mr. DAVIS. No. That is right. Mr. Hattan had, in substance, testified to a good many of the things that were in the report and he had not testified to all of them.

Mr. COBURN. I think that is correct. I believe that Mr. Rice testified in our hearings out there, in answer to a question, that he did not consider this as evidence, and therefore, would not permit it being put into the record of the case, at that time.

Have you finished, Mr. Davis? I did not mean to interrupt you.

Mr. DAVIS. Yes.

Mr. COBURN. In your opinion, the decision of January 6, on page 14, it says:

However, the reports of assays and samples of the various claims were not included in the file when it reached this office.

Now, there, are you referring to assay reports that either had been offered or had been taken by the McDonalds, the Al Sarena Co.?

Mr. DAVIS. Yes; I am referring to the fact that the file, when we first got it, was pretty much devoid of assays.

Mr. COBURN. Did it not contain the assay reports made by Hattan, the minerals examiner?

Mr. DAVIS. It contained his testimony of them.

Mr. COBURN. Did it not contain the report?

Mr. DAVIS. I guess it does contain the first two or three.

Mr. COBURN. Does it not contain any reports submitted by the Al Sarena Co.?

Mr. DAVIS. I don't believe so.

Mr. COBURN. So that the missing information, which was as you say later there—"and all those copies were later supplied"—were later supplied by the McDonalds; is that correct?

Mr. DAVIS. I think that is right.

Mr. COBURN. And they were supplied to your office here in Washington?

Mr. DAVIS. No; they had been supplied to Mr. Hattan.

Mr. COBURN. Did he send them in subsequently?

Mr. DAVIS. Not until they were later asked for, did they come in as I recall it.

Mr. COBURN. That was due to this inquiry as to where they were!

Mr. DAVIS. As to where they had been taken.

Mr. COBURN. They eventually got into your file here?

Mr. DAVIS. That is right.

Mr. COBURN. And you had the opportunity, then, did you not, to examine them, or have someone examine them for you?

Mr. DAVIS. Mr. Coburn, there are so many of those things in here that I am not too sure that we are talking about the same ones. That is one point of confusion about this thing.

Mr. COBURN. Then the point is, is it not, that despite the evidence on file of various assay reports, numerous assay reports—

Mr. DAVIS. Yes.

Mr. COBURN. You decided to start all over again?

Mr. DAVIS. That is right. That is a very fair statement. I am glad you made it because that is exactly my attitude on the thing.

There had been, as you will notice in these various letters and statements, presumably several hundred assays taken at various times, none of them available to us, you understand, but historically, a great lot of them had been taken. Apparently they had varied widely from time to time, and these still varied widely.

Mr. COBURN. But the single assay report upon which you based your final decision came from the A. W. Williams Co. It consisted of one assay report?

Mr. DAVIS. That is right, and that, I may say, if that assay is correct and dependable, is enough to show a discovery on the claims.

Mr. COBURN. But you were convinced that there was sufficient showing?

Mr. DAVIS. Yes, I was.

Mr. COBURN. Did you ask for the concurrence of the Bureau of Mines experts in that opinion? How did you arrive at the sufficiency for decision?

Mr. DAVIS. Well, because I think it was pretty obvious from the assays, that there were minerals there in paying quantities. That is outlined in Mr. Hattan's testimony and in the other testimony, as to about what was required.

Mr. COBURN. What I was trying to get at, Mr. Davis—any maybe it was a cloudy question—was, when you did get this assay report from the S. W. Williams Co., and it showed certain values, did you then become convinced in your own mind that that was enough showing to grant the patent, or did you talk to some expert about it, from the Bureau of Mines, or to some of your own people?

Mr. DAVIS. I don't think we talked to anybody about it. I don't know who Mr. Armstrong may have talked to about it. I do not think I talked to anybody besides him.

Mr. COBURN. Besides Mr. Armstrong?

Mr. DAVIS. That is right.

Mr. COBURN. And on the basis of what he said—

Mr. DAVIS. You must remember that the testimony in the record—nobody seemed to disagree at all about that—was that if the minerals were present there up to whatever the figure was, around one dollar, I believe, that the minerals were present in sufficient quantities to justify further exploration.

Mr. COBURN. When you say people testified to that, to what record are you referring—our record or your record?

Mr. DAVIS. No; I think that is in the transcription of the testimony of Mr. Hattan. Maybe it is in Mr. Hattan's report. It is one of those things that didn't seem to be any particular disagreement about in the record.

Mr. COBURN. Well, I recall from Mr. Hattan's report, that he did mention that the Juneau, Alaska, Mining Co.—and perhaps that is not correct—but some big mining company in Alaska had successfully milled and sold ores at something like 90 cents a ton. Are you referring to that?

Mr. DAVIS. Yes; and the statement that goes along with it there.

Mr. COBURN. Did you happen to hear the testimony, or have you had access to the testimony of Mr. Holderer of the staff of the committee, who testified that, in his opinion, after examining the record, you would have to have at least a showing of \$20 a ton to come out whole on this thing?

Mr. DAVIS. I am not familiar with it, and I have not read the record.

Mr. COBURN. The only reason I introduce that is this, Mr. Davis—and I think Senator Malone brought out this point very well; that mining engineers and mining experts certainly differ widely on what constitutes sufficient mineralization. Now, I was wondering where you got this figure of \$1 as sufficient mineralization?

Mr. DAVIS. Well, this is in the Hattan report and I don't know which one of these numerous pages it is in, for one thing, and then, of course, I think you have to remember, Mr. Coburn, that the test of these cases is not whether you can instantly start to operate a property of a mine. As Senator Malone pointed out the other day, the mining business has been historically an up and down business, depending on a lot of things: the price of the mineral or whatever it is that you are mining; frequently world conditions—which I suppose determine the price—the efficiency of your machinery, and all that sort of thing; and these mass operations, as I would understand it. That is no more knowledge than anyone would have, but we do know that, because of the tremendous improvement that has been made in this heavy duty machinery which handles these large volumes of rock very very cheaply, compared to what it used to be, that that picture changes almost completely from year to year.

So that, I do not think that you can lay down any fixed pattern of an exact price at which, at the moment, you will operate a mine for profit. I just do not think that that is your rule.

In other words, if that were your rule, then a patent might be allowable today but, if the price of the minerals dropped a cent a pound on the market, it might become unprofitable, so that you get no patents. I just don't think that is the rule.

Mr. COBURN. What I am trying to get at is this, Mr. Davis:

If you have to show sufficient mineralization to get a patent, sufficient so that it would warrant a reasonable and prudent man to invest his capital and labor in further development, where is the value judgment? How do you arrive at the value judgment, as to just what the assay reports have to show by way of value?

Mr. DAVIS. I suppose that is an opinion matter.

Mr. COBURN. Strictly an opinion matter.

Mr. DAVIS. That is right, in which you exercise your own best judgment. That is all.

Mr. COBURN. In some cases then, if I came in with a showing of \$1 a ton or 90 cents a ton, that might be grounds for granting me a patent, regardless of where the mining claim is located, is that correct?

Mr. DAVIS. Well, I would think that that could enter into your calculations.

Mr. COBURN. I mean as a basis for a decision.

Mr. DAVIS. Well, that is what I say—as a basis for a decision. I think perhaps those things can enter into the question of whether you are justified in further attempting to develop it.

Mr. COBURN. What are the other criteria that enter in?

Mr. DAVIS. Well, that is the primary one there.

Mr. COBURN. That is the primary one. So it is quite a simple matter to obtain a patent if you have any showing at all?

Mr. DAVIS. Oh, I wouldn't think so, no.

Mr. COBURN. You would not think so?

Mr. DAVIS. No; you know the test as well as I do.

Representative HOFFMAN. Let him answer.

Mr. COBURN. Excuse me.

Mr. DAVIS. Well, of course it is, stated as near as words can state it, whether there is a sufficient showing of mineralization to justify a reasonably prudent man—of course, as Senator Malone says, no prospector is a prudent man—in attempting a further development of the mine. That does not mean that he has got sufficient evidence to assure him he is going to have a profit out of that mine, because we know that historically about 7 out of 10, or maybe more than that, mining ventures, have not proven profitable; but is there enough there to justify encouraging him to believe that he can go ahead and do some more development with a reasonable chance of getting somewhere.

Mr. COBURN. What is the test of sufficiency? That is what I want to know. How do you determine whether or not there is sufficient mineralization? What is "sufficient"? Are there any dollar criteria?

Mr. DAVIS. I wouldn't suppose there were any firm dollar criteria; no.

Mr. COBURN. Then on what do you base your finding of sufficiency?

Mr. DAVIS. I think on your opinion of the whole situation. For instance, here is a statement in Mr. Hattan's report on this thing. It says that:

Concentrates made by the pilot mill which was operated from 1939 to March 1943, were shipped to the American Smelting & Refining Co.'s Selby smelter. From one of these shipments, which were concentrated 20:1, the metallurgist calculated the average value of the mill heads for that particular shipment.

He ended by saying that it ended up \$5.88 per ton.

Mr. COBURN. That was for lead and zinc concentrate?

Mr. DAVIS. Most of that was gold, but the point is, as we have to recognize, that here is, as everybody seems to agree, a large centralized mineralized mass of rock, impregnated with certain amounts of minerals. I don't think anybody will dispute that. That is widely diffused over a substantial area, which is fixed here in one place at 4,000 feet and in another at some lesser figure, as I recall, around 3,000; but a great mass of material.

If it is handled at all, it is going to be handled as a mass-production thing. You are not going in there with a pick and pry loose a nugget. You are going to engage in a mass production thing.

The question is: How much paying mineral does there have to be in a ton of this stuff to justify the labor and the machinery expense that you have to have to develop this? That is a judgment figure. I do not think that you can lay down any mathematical formula for it.

Mr. COBURN. You have quoted rather extensively from Mr. Hattan's report in substantiating that premise. Yet, according to the testimony in the record, there have been some doubts cast by certain statements, on the reliability of Mr. Hattan. So why would we use

part of his report to substantiate a finding of mineralization, and then use the rest of it for other purposes not useful?

Mr. DAVIS. That is a good question, Mr. Coburn, and, of course, I knew you would ask that.

I have never said that Mr. Hattan was completely unreliable or anything of that nature. I do say that I think, if you will go through his reports of these various things, that he is not greatly impressed with the allowance of mineral claims, especially in the forests, and especially when he is making a report for the Forest Service; and, therefore, on some of the conclusions, where those factors enter into it, I would rather have completely independent advice, but on a matter of this kind where he is simply stating observations that he has made on these claims, although he made them pretty hurriedly, I am willing to go along.

Of course, you have always to remember that the mineral surveyor here which is in this record spends 3 months on this property making this mineral survey and he also uses the phrase that there was a widely diffused mineralized mass on this mountain, and discussed it at some length. So, there are both of these people not disagreeing at all about the fundamental conception that I have tried to portray to you.

Mr. COBURN. Mr. Davis, I am sure you will agree that the duties of a mineral surveyor are not the same as those of the mineral examiner?

Mr. DAVIS. No, they are not quite the same.

Mr. COBURN. In fact, they are hardly analogous. The findings of a mineral surveyor were not introduced in evidence in this case, whereas, at least the testimony on the findings of Mr. Hattan was a part of the record.

Mr. DAVIS. Well, now—just a minute. The findings of a mineral surveyor and the certificate of a cadastral engineer are part of, shall we say, the pleadings in the case. They are part of the application itself.

I suppose you are always entitled to consider it.

Mr. COBURN. That is right. The mineral surveyor is employed by the claimants to go on the property and survey it, is that correct?

Mr. DAVIS. That is right, but he has to examine the property in other capacities, too.

Mr. COBURN. But you would not say that Mr. Hattan was employed by the company to go on and examine the property?

Mr. DAVIS. No.

Mr. COBURN. His function was to represent the Government, was it not?

Mr. DAVIS. That is right.

Mr. COBURN. I think that is all I have. Do you have some evidence that you want to present?

Mr. REDWINE. Mr. Chairman, here is some correspondence between Senator Murray and the American Smelting and Refining Co. as to just what the production of this company has been. I think that it should go in at this point.

Senator GOLDWATER. What company is that?

Mr. REDWINE. The Al Sarena Mines.

Mr. Chairman, this has just come in, and the secretarial staff has not had time to give the figure tabulations on it, to make up a copy of that.

All the correspondence is there, with that exception. I suggest that after everyone has seen these figures, they be turned over to the reporter.

(The document referred to follows:)

UNITED STATES SENATE,  
COMMITTEE ON INTERIOR AND INSULAR AFFAIRS,  
January 24, 1956.

Mr. J. D. MCKENZIE,  
Vice President, American Smelting and Refining Co.,  
New York, N. Y.

DEAR MR. MCKENZIE: Hearings on the affairs of the Al Sarena Mines, Inc., whose post-office address is Trail, Oreg., are presently being held jointly by the Subcommittee on Legislative Oversight Function of the Senate Committee on Interior and Insular Affairs and the Subcommittee on Public Works and Resources of the House Committee on Government Operations.

An assertion has been made that between 1939 and 1943 the Al Sarena Co. produced between \$30,000 and \$40,000 worth of lead and zinc concentrates, carrying small amounts of gold and silver, and that these concentrates were shipped to your company's Selby smelter. No records verifying this statement have been found. During World War II, the company did sell some concentrates to the American Smelting and Refining Co., but the only record available is the attached copy of the Metals Reserve report. The RFC records are stored with the Bureau of Mines at Mount Weather, Va., but these records are not complete, and some of them may have been destroyed.

The committee would appreciate your furnishing us with any available information as to what the Al Sarena Co. actually shipped to your company from the year 1937 to date if, in fact, any shipments were made.

Sincerely yours,

JAMES E. MURRAY, Chairman.

*Metals reserve, over quota production premium payments—Agent: American Smelting & Refining Co.*

Date	M	Excess production	Amount
October 21, 1942	L	178	\$4 90
February 22, 1943	L	630	17.33
November 11, 1944	L	86	2.37
Total			24.60

AMERICAN SMELTING & REFINING CO.,  
New York, N. Y., January 25, 1956.

Re: Al Sarena Mines, Inc., Trail, Oreg.

Senator JAMES E. MURRAY,  
Chairman, Committee on Interior and Insular Affairs,  
Senate Office Building, Washington, D. C.

DEAR SENATOR MURRAY: As requested by your letter of January 24, I have today telegraphed the manager of our Selby, Calif., plant, Mr. W. S. Reid, 405 Montgomery Street, San Francisco, to promptly gather and forward to you all available information regarding any shipments received from Al Sarena Mines, Inc., of Trail, Oreg., from the year 1937 to date.

With copy of this letter, I am sending copy of your letter of January 24 to Mr. Reid with the request that he telegraph the information to you or, if the same is too voluminous, that he send it to you by airmail. Probably the best method of transmitting this information would be for Mr. Reid to send you photostatic copies of any settlement sheets covering shipments from Al Sarena Mines, Inc.

Sincerely yours,

J. D. MACKENZIE, Vice President.

[Telegram]

SAN FRANCISCO, CALIF., January 26, 1956.

Senator JAMES E. MURRAY,  
*Chairman, Committee on Interior and Insular Affairs,*  
*Senate Office Building, Washington, D. C.:*

Reurtel Al Sarena Mine shipments providing you wish to know payments made against shipments, our procedure does not show actual payments against each metal but value per ton including payment for metals less treatment charges. will require a little time to develop payments, all shipments which involve numerous small lots.

W. S. REID,  
*American Smelting & Refining Co.*

[Telegram]

SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS,  
*January 26, 1956.*

Mr. W. S. REID,  
*American Smelting & Refining Co.,*  
*San Francisco, Calif.:*

Reurtel today Al Sarena Mine shipments. Please translate values of gold, silver, and lead separately into dollars.

JAMES E. MURRAY, *Chairman.*

[Telegram]

SAN FRANCISCO, CALIF., January 26, 1956.

Senator JAMES E. MURRAY,  
*Chairman, Committee on Interior and Insular Affairs,*  
*Senate Office Building, Washington, D. C.:*

In reply Mr. J. D. MacKenzie's wire January 25 re shipments Al Sarena Mines to Selby plant American Smelting and Refining Co. during years 1937 through 1942 and 1944 received 148 tons concentrates containing 382.6 troy ounces gold 1,926.9 troy ounces silver, and 21,402 pounds lead. Received 2 tons ore during 1938 containing 17.7 troy ounces gold, 46 troy ounces silver, and 314 pounds lead. Received 11 pounds precipitates 1939 containing 6.3 ounces gold and 10 ounces silver.

W. S. REID,  
*Manager, American Smelting & Refining Co.*

AMERICAN SMELTING & REFINING CO.,  
 SELBY SMELTING WORKS,  
*San Francisco, Calif., January 27, 1956.*

Re Al Sarena Mines., Inc., Trall, Oreg.

Hon. JAMES E. MURRAY,  
*Chairman, Committee on Interior and Insular Affairs,*  
*Senate Office Building, Washington, D. C.*

DEAR SIR: In further regard to our telegram of January 26, 1956, there is attached a statement showing shipments received at the Selby plant of the American Smelting and Refining Co. from the year 1937 to the present time.

The payment shown on this statement represents the amount paid to Al Sarena Mines, Inc., or for their account, for shipments received, and is based on the value of the various metals, less our treatment charges, under agreed upon terms of settlement. Settlement is based on gold, silver, and lead values only and no zinc concentrates were treated at Selby.

Should it be necessary that you have actual copies of our settlements or any of these lots it will be necessary that we go through our files, now in storage, to obtain original settlements and have photostatic copies made.

Yours very truly,

W. S. REID, *Manager*

Senator SCOTT. Mr. Lanigan?

Mr. LANIGAN. At the time you made your decision on January 6, 1954, were you aware of the fact that the A. W. Williams Co. had run a series of assays on samples from the Al Sarena claims in 1951 and again early in 1953, and that in both of these series they showed mineral values less than half of that which was contained in the set of assays submitted to you as the result of the Bureau of Mines' samples?

Mr. DAVIS. I don't know whether I was or not, and, Mr. Lanigan, if so, it hadn't made any impression on me. I didn't know any of these assay houses at the time. I am taking your word for the accuracy of the statement.

Mr. LANIGAN. I am just taking the testimony that was given to us at the hearing.

Now, if the Forest Service had had an opportunity to cross-examine on the question of the assays submitted to you by the A. W. Williams Co., do you think they would have had a chance to bring out the facts relating to the earlier assays?

Mr. DAVIS. Well, I would have no way of knowing what a cross-examination might have gone into.

Mr. LANIGAN. Now, on July 6 of last year, I believe it was, you testified before the Subcommittee on Public Works and Resources, and stated the following:

I was interested, and I still am, in this administrative process. In other words, I have insisted, long before I came into the Government that these administrative processes, these powers that are vested in the administrative officials, ought to be brought into conformity with the Administrative Procedure Act, that action ought not to be taken until after there has been an opportunity for hearing and some opportunity to build the record.

Do you think that your action in requesting the advice on December 28 of Mr. Appling as to his opinion on the mineral prospects in the claim and the accepting of evidence without an opportunity for the Forest Service to cross-examine, were consistent with the principles of the Administrative Procedure Act?

Mr. DAVIS. Well, let us put it this way: I think it was just as consistent as the making up of this whole record has been.

Mr. LANIGAN. You are aware that the act provides that no employee engaged in performing investigative or prosecuting functions shall participate or advise in the decision or agency review, except as witness or counsel in public proceedings. That is in section 5 of the act. Do you remember that section?

Mr. DAVIS. I have read it.

Mr. LANIGAN. And section 7 provides that every party shall have the right to present his case or defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts. I suppose you are aware of that section, too?

Mr. DAVIS. I know the section.

Representative HOFFMAN. Mr. Chairman, may I inquire, does counsel want to prosecute the Assistant Secretary for having violated some provision you are reading?

Mr. LANIGAN. No; I was asking about the consistency with the principles of the act, not with the specific provisions of the act.

Representative HOFFMAN. I know that since you have gotten out of the Department it has not done anything that you have approved, but I wondered whether there was any particular statute the violation of which you are trying to prosecute him for.

Senator SCOTT. Go ahead, Mr. Lanigan.

Mr. LANIGAN. Now, I believe you testified that \$30,000 or \$40,000 worth of minerals were removed from the Al Sarena claims. Do you know how much of that came from the 8 claims which were approved for patent, and how much from the 15 contested claims?

Mr. DAVIS. No, I do not.

Mr. LANIGAN. That is all that I have.

Senator SCOTT. I would ask the minority to take their 45 minutes if they care to.

Representative JONAS. All right, sir. I will ask a question or two.

Senator SCOTT. Congressman Jonas, it is 10 minutes to 3 at the present time.

Representative JONAS. Before I ask the Secretary any questions, may I ask counsel a question about this letter from Senator Murray to the American Smelting and Refining Co., and the file you have just offered for the record.

This letter, which was dated January 24, 1956, says this, and I quote:

An assertion has been made that between 1939 and 1943 the Al Sarena Co. produced between \$30,000 and \$40,000 worth of lead and zinc concentrates, carrying small amounts of gold and silver, and that these concentrates were shipped to your company's Selby smelter.

Now, where does this assertion appear in the record? I do not remember anybody asserting that they got \$30,000 or \$40,000 out of lead and zinc out of the mine. The only reference I have seen to that is in the Hattan report in which, on page 3, Mr. Hattan says, and I quote:

The application for patent indicates that ores to the value of \$30,000 to \$40,000 have been mined, milled, and sold, prior to April, 1943; when development work in the mine was discontinued.

Representative CHUDOFF. Mr. Chairman, I do not want to transgress on Mr. Jonas' time, but my recollection is that the gentleman who testified in Portland, I believe Mr. McCormick, said something about \$30,000 or \$40,000.

Representative JONAS. My only point is that this letter from Senator Murray ties that down only to a shipment of that amount of ores to one particular company. I do not think it would be fair to put this in the record, if that is the only effort the committee is going to make to establish whether \$30,000 or \$40,000 worth of gold and silver have been mined off of this property.

Representative CHUDOFF. We are trying to find whether or not that is in the record, Mr. Jonas, but I want to say to you that from what I can determine and from what my recollection of the testimony is to date, both in Oregon and here, there has been very little mining on any of these claims, the contested or uncontested claims, and you certainly cannot ship ore if you do not mine it.

Representative JONAS. I know that, but the way to find out where they shipped this ore, is to go to the records, and not just make inquiries of the American Smelting and Refining Co. Maybe they shipped to other refineries.

Representative CHUDOFF. Of course, the Hattan report says—

Representative JONAS. The Hattan report says that the application for patent indicates that \$30,000 or \$40,000 were mined, and I think that application certainly should be in the record, immediately following this.

Representative CHUDOFF. Of course, I want to go back to my original statement.

Representative HOFFMAN. May I call attention to the fact that they are using up your time. Do not let them get away with that.

Senator SCOTT. Let us come to order.

Representative CHUDOFF. I just want to answer the question.

Representative HOFFMAN. Do it on your own time. Do not hog our time.

Representative CHUDOFF. Mr. Jonas, I am sorry if I took some of your time. I will not say anything further.

Representative JONAS. I was trying to find out if you were going to leave the record in the position, so that it shows that we have a denial from just one company that it received \$30,000 or \$40,000 worth of ore from this mine. I do not think that that is the proper way

to establish whether \$30,000 or \$40,000 worth of ores have been removed.

Representative HOFFMAN. Of course it is not, but by this time you ought to be familiar with and used to their methods. I want 5 minutes, Mr. Chairman, of that 45 minutes, and I will take it when Mr. Jonas gets through.

Representative JONAS. May I ask committee counsel to call me in 15 minutes, and do not let me take but 15 of the 45 minutes.

Mr. DAVIS, did the fact that the representatives of the Forest Service and the representatives of the Bureau of Mines and all Government agencies that had anything to do with this application agreed that 8 of these claims had sufficient mineralization for patent, was that taken into consideration in your final decision with respect to the other 15 claims?

Mr. DAVIS. Yes, Mr. Jonas. Of course, it cannot help but be.

Representative JONAS. Is it not true that the assay report from Williams Co. showed the same amount of mineralization in the 15 claims that it showed in the right claims?

Mr. DAVIS. Substantially.

Representative JONAS. Would you say that the fact that the mineralization was comparable throughout the entire area, as disclosed in the Williams assay, was worthy of some consideration by you on the question of whether the area was sufficiently mineralized to be called a mine?

Mr. DAVIS. I think it is very important, as I stressed in my statement; the fact that, shall we say, in the heart of these claims, these eight were conceded by everybody to be adequately mineralized; the fact that the mass of material extends very extensively over the mountain, admittedly away beyond the confines of these eight claims.

Representative JONAS. Mr. Coburn asked you about your opportunity to have the written report of Appling evaluated. Tell the committee whether the written report from Mr. Appling when it came to the office, agreed with his oral report to you of what it contained, over the telephone?

Mr. DAVIS. I have already said that it did; yes.

Representative JONAS. It was in substantial agreement?

Mr. DAVIS. That is right.

Representative JONAS. You have testified that the record shows that the claimants, back in 1948 or 1949, paid the \$5 per acre deposit required, and that amounted to \$2,375?

Mr. DAVIS. That is right.

Representative JONAS. Was that money ever refunded by the Government to the claimant, during this 5-year period, when the argument extended?

Mr. DAVIS. No, it was not.

Representative JONAS. You mean the Government retained the money paid by the claimant, the fee required?

Mr. DAVIS. That is right, from February 17, 1949.

Representative JONAS. Did you also say that the records show that it was the Government, that is, the Bureau of Land Management, that took the affirmative action which resulted in transferring this property on the assessment rolls in Oregon to the name of this company?

Mr. DAVIS. That is my understanding.

**Representative JONAS.** Since which time the property has continued to be assessed in the name of the company, notwithstanding the contest which has continued during these years, over patent?

**Mr. DAVIS.** That is right.

**Representative JONAS.** Do you know and does the record show whether any representative of the Government, either the Bureau of Land Management, or any other agency in your Department, took any steps to have that property removed from the assessment rolls in Oregon from the name of the company back to the name of the Government?

**Mr. DAVIS.** The records don't so indicate.

**Representative JONAS.** I have a question to ask you, please, if you will refer to Mr. Hattan's report on page 3. We had some testimony here one day last week from Mr. George B. Holderer, to whom reference has been made by Mr. Coburn this afternoon, in which he stated that his examination of the veins in these claims indicated that they were only a foot or two in width.

Now, will you turn to the last paragraph on page 3 and tell me if the report of Mr. Hattan does not indicate that—

the main vein appears to be zone of enrichment which is from 3 feet to possibly 100 feet wide?

**Mr. DAVIS.** That language is in the report, yes.

I don't put my finger on it, but I remember it.

**Representative JONAS.** You do remember it, do you?

**Mr. DAVIS.** Yes; that is right.

**Representative JONAS.** I will ask you to turn to page 6 of the Hattan report.

**Mr. DAVIS.** I might add that I remember also—and I just finished quoting some more of the same talk to the effect that after describing this rather wide vein, the sentence appears:

Although the ground in either direction from the higher-grade zone is mineralized to an unknown distance—

which cannot help but strike you.

**Representative JONAS.** That is additional supporting evidence of the position you take in that the mass of evidence in this case indicates that the entire area is mineralized, and it is a question of how rich it is, and it is richer at some points than at others?

**Mr. DAVIS.** That is exactly right.

**Representative JONAS.** And the mineralization is not consistent throughout.

**Mr. DAVIS.** That is right.

**Representative JONAS.** Therefore, the mineralization shown in any sample would depend upon whether they actually took a sample at the rich spot or the poor spot?

**Mr. DAVIS.** I think that is right, and I think that accounts, in many cases, for the wide variation in these assays, depending on where they were taken, and how carefully they were taken.

**Representative JONAS.** Will you describe to the committee the procedures Mr. Appling said he used in taking the samples?

**Mr. DAVIS.** Well, in general, the procedure that was used—and I don't have his report here before me—was in general they went on these claims at points indicated by the claimant, which I guess you will agree was proper, and clearing off the surface of the ground and

inspecting it as to whether there had been any tampering with the surface, they then chipped away 2 or 3 or 4 inches of rock, so that they got down to good, clear, solid rock in place, and everything scaled away, everything that was on the surface, and scaled away part of the rock itself.

They then cut the sample from that rock.

Representative JONAS. And, after having done that, does not his report indicate that they pulverized the sample and panned it, and discovered with the naked eye evidences of mineralization?

Mr. DAVIS. That is right.

Representative JONAS. That was done, according to Appling's testimony, on each one of the claims?

Mr. DAVIS. That is right—on all 23 of the claims, and, as he says, I believe, in the presence of all of these people.

Representative JONAS. Is there any evidence that any of the Hattan samples were so handled, or so treated?

Mr. DAVIS. No; there is not.

Representative JONAS. Looking at this evidence as to the way the Hattan samples were taken and the Appling samples were taken, is it not fair to say that there is evidence that the Appling samples were more representative of what was actually in the area, rather than a haphazard sample taken the way Mr. Hattan described his samples?

Mr. DAVIS. Well, it seemed that way to me, Mr. Jonas, and with reference to all of these others, there has not been anything like the care exercised, both as to the taking of the sample, the cutting of it, the pulverizing, the shipment of it, and all that sort of thing. None of that process, so far as the record discloses, at least, was used with reference to any of the other samples.

Some of them were taken by the McDonalds alone. Some of them were taken by Mr. Hattan alone. Some of them were taken jointly, and were not submitted too carefully to the assay house.

Representative JONAS. Is it not true that you felt that the Appling samples, at least, were worthy of consideration because of the care with which they were taken, and the pulverization and the discovery from panning, and all of those other things?

Mr. DAVIS. That is right. I felt, and I still feel, that they were taken in the most dependable and accurate manner possible.

Representative JONAS. Will you turn to page 6 of the Hattan report?

Mr. DAVIS. Yes, sir.

Representative JONAS. Tell me: Did you read into the record earlier the third paragraph on that page, or is that one of those you read?

Mr. DAVIS. Well, I haven't yet.

Representative JONAS. May I ask you to read it to the committee, and read it into the microphone? I think that is a very important paragraph.

Mr. DAVIS. It is an important paragraph. As a matter of fact, it is quoted actually in the opinion that I rendered in the case.

Representative JONAS. I have not happened to have read that opinion yet.

Mr. DAVIS. Here is the paragraph:

The indications are that the central mass is all mineralized to some extent, and if the prospective parallel shear and mineralized zones should prove to be extensive in length and depth the possibilities are good that the whole mass could be developed, mined, and milled at a profit by low-cost large scale mining methods.

The topography is such that any 1 of 3 methods might be employed, i. e., glory-holing, shrinkage system, and open-pit mining.

Representative JONAS. Now, will you turn to page 8 of the Hattan report and to the last 2 paragraphs on that page, and tell me if I correctly interpret those paragraphs to state that Mr. Hattan found even more mineralization than was claimed by the applicant on his application for the patent in that 1 particular claim?

Mr. DAVIS. Yes; he says:

On June 12, 1949, a second sample was taken from the same cut—this is the Oro Alto claim—

11 on this occasion, the cut was extended and hole was dug in the face to get more depth. The sample was cut by Mr. Sanborn and taken by him to Abbot Hanks in San Francisco for assaying. The results were gold, \$3.32/ton; silver, \$0.05/ton. Total, \$3.37/ton.

The applicant's sample submitted with exhibit 1 of the application for patent indicates a value of \$1.75 per ton.

Representative JONAS. So, at least with respect to that claim, Mr. Hattan found greater mineralization, even, than the applicant claimed?

Mr. DAVIS. That is right.

Representative JONAS. Is that not true with respect to several other of the claims?

Mr. DAVIS. Mr. Jonas, I have said that, and repeat it again, that I think that that is true throughout the controversy. I have no doubt that there are spots here where you will get just a trace throughout some of these claims. I have no doubt that there are other spots—and these assays show it, and they are admitted—where they have run as high as 8 or 9 dollars a ton, depending on where those assays were taken.

Representative JONAS. Now, this morning you were questioned about some of the improvements on the claims. I suppose the purpose of that line of questioning was to indicate that the claimant did not actually put those improvements there. As a matter of fact, does it make any difference who put in the improvements, so long as the applicant purchased the claims? In other words, when you purchase a claim, do you not get all of the improvements that your assignor put on there?

Mr. DAVIS. Yes; I think there is no doubt about that. It doesn't make any difference whether all this work was done by predecessors in title or done by the applicants. They are perfectly assignable claims, so far as I know.

Representative JONAS. They do not contend, as I read the record and understand it, that they originally discovered all of these claims, or staked them out, but that they purchased 10 of them along about 1935 and later purchased some of the others. Actually—and correct me on this if I am wrong—do your records show that the claimant actually originated the claim on at least one of the uncontested claims that Mr. Hattan approved?

Mr. DAVIS. Two of them, I believe, were made by them as late as 1939—after they had apparently been passed up for years by these predecessors, and those two definitely showed enough mineralization that they were not even contested, which does nothing more than demonstrate what I have been trying to say all the time, that I

don't think anybody can unequivocally say that there is not mineralization on these claims.

Representative JONAS. When you called for the remainder of the record to be sent in from Portland, do you recall who sent it in? Was that from the Bureau of Land Management office?

Mr. DAVIS. It was from the Bureau of Land Management, Mr. Jonas.

Representative JONAS. I do not mean the individual. Did you call from your branch office in Portland?

Mr. DAVIS. That is right.

Representative JONAS. When the original record was made up, which did not contain some of this material you later obtained, can you tell us who made that record up? Was it Mr. Rice, the hearing examiner?

Mr. DAVIS. It was made up, I suppose, under Mr. Rice's direction. He was in charge.

Representative JONAS. Was he the manager of the office? Is that the way he came to be called the hearing examiner? Does the manager of the local office act as hearing examiner?

Mr. DAVIS. That is right. It is certified by Mr. Rice as manager of the land office, which was the title that he had at the moment, apparently.

Representative JONAS. I understand that my time is up and I would like to say, before I quit talking, that I have not had an opportunity to read the report.

Representative HOFFMAN. How much time remains?

Senator SCOTT. There is none remaining, if you want 5 minutes.

Representative HOFFMAN. If I want 5 minutes?

Representative JONAS. I have used only 15 minutes. We have 30 left, do we not?

Senator SCOTT. Do you want to save him 5 minutes, then?

Representative JONAS. I would like to say for the record that I have asked Mr. Davis some questions concerning some of the comments made by Mr. Hattan in his report. I would examine him further with respect to some other comments in the report, but I have never had an opportunity to read the report until here today and I, therefore, have not been able to prepare myself to ask questions. I think that each of those claims ought to be considered separately and some of the comments made by Mr. Hattan put in the record, but, since the report itself will go into the record, I do not think it is necessary for me to ask any other questions about it.

I will ask you one final question, Mr. Secretary:

Throughout your entire procedure in handling this claim, or this application, were you influenced or subjected to any pressure by any person, individual or group, concerning the decision you would make?

Mr. DAVIS. No; I was not. I certainly was not.

Representative JONAS. And you stated the other day that the decision you rendered was, according to your best judgment, the proper and wise decision to make, under all of the circumstances, and you accept full responsibility for having made it, without being influenced by anyone?

Mr. DAVIS. That is right, sir.

Representative JONAS. That is all.

Representative HOFFMAN. Senator Goldwater?

Senator GOLDWATER. Mr. Chairman, we have heard today reference to the testimony of Mr. Holderer that in his opinion it would require \$20 a ton assay to cause a prudent man to continue exploration for gold.

Now, I think Mr. Holderer should know better than that. If this were the case and we had nothing but \$20-a-ton assays in this country, we would not have anybody in the gold-mining business.

I tried the first day that I attended these hearings to put into the record a study called Rule as to What Constitutes a Valid Discovery on Minerals Sufficient to Support a Mining Location.

I was denied that. I understand that Mr. Bradshaw, who is the author of this rule, is here and that he possibly might be called on to testify.

In the event that he is not called, I would like to just read 1 or 2 brief things from this. He says:

One, there must be a vein or lode of quartz or other rock in place.

Two, the quartz or rock in place must carry gold or some other valuable mineral deposit.

Three, the two preceding elements, when taken together, must be such as to warrant a prudent man in the expenditure of his time and money in the effort to develop a valuable mine.

I want to read one other sentence from this rule that Mr. Bradshaw has drawn up.

Mr. Bradshaw is in the solicitor's department of the Department of the Interior, and, as I understand, they are expert on mining law.

I read this because it is indicative of the value of this whole report to these hearings. It says:

In 1905 the Supreme Court in *Chrisman v. Miller* said that the law imposed no conditions on the locator as to the value of the ore discovered.

That has been borne out here by testimony from others who have spoken on the general rules applying to the value of ore located.

Now, to try to get some concrete information as to what is going on in the gold mining States, I wired each of the States that produced gold.

I am sorry to say that the records are such, in these various States, that I was only able to get concrete information from two.

One is South Dakota and one is my own State of Arizona.

I cite these figures, and I will submit them for the record, to show the wide variance of value of gold per ton that we find in this country.

For instance, in South Dakota, which has some of the richest gold-producing mines in the country, we have one mine over a 5-year period which has averaged \$13.86 a ton.

We have one mine that has averaged \$5.22 a ton.

We get into Arizona and find over about a 4-year period an average of 9 cents a ton recovered per ton of ore treated in gold, and 9.1 cents recovered per ton of ore treated for silver.

I submit both of these for the record.

(The documents referred to follow:)

SOUTH DAKOTA NATURAL RESOURCES COMMISSION,  
Pierre, S. Dak., January 16, 1956.

HON. BARRY GOLDWATER,  
United States Senator,  
Senate Office Building,  
Washington, D. C.

DEAR SENATOR: Pursuant to telegram of today I am specifying yearly data on average value of gold recovery of the two producing mines in South Dakota.

Year	Homestake (average per ton)	Bald Mountain (average per ton)
1950.....	15.22	5.51
1951.....	14.80	5.23
1952.....	13.53	5.08
1953.....	13.34	4.90
1954.....	12.40	5.41
For 5-year period.....	13.86	5.23

As I suggested in telegram, the determination of the number of claims patented is difficult to compile except through county offices. However, the Bureau of Land Management in Washington should be able to furnish such information, also that pertaining to which are on forest land, most expeditiously. Their regional office at Billings, Mont., should have that information.

I might add with respect to the above figures that our State tax director had only data for the first 3 quarters of 1955. The average recovery, however, for that period is down.

May this information be of assistance to you.

Sincerely yours,

HUGO A. CARLSON,  
Executive Secretary.

Table showing number Arizona lode and placer mines, tons ore sold or treated, value of gold and silver recovered, and value recovered per ton ore treated

Year	Number lode mines	Number placer mines	Tons ore sold or treated	Gold—Lode and placer			Silver—Lode and placer		
				Fine ounces	Value recovered	Value recovered per ton treated	Fine ounces	Value recovered	Value recovered per ton treated
1952.....	187	7	15,385,327	112,355	\$3,932,425	\$0.065	4,701,390	\$4,254,941	\$0.279
1953.....	163	6	15,700,618	112,824	3,948,840	0.064	4,351,424	3,998,233	0.253
1954.....	(1)	(1)	11,760,000	114,800	4,018,315	0.062	4,278,811	3,800,641	0.251
1955 (estimated)	(1)	(1)	(1)	121,500	4,532,500		4,652,000	4,210,000	
Estimated average.....						.060			.061

<sup>1</sup> Not available.

Senator GOLDWATER. I use these figures, Mr. Chairman, to point out what I think is one of the basic points in this whole investigation and whole argument; namely, that the Department of the Interior, if it followed the law, had nothing else to do but to grant these patents.

You might get back to the argument that it did not show enough ore to cause a prudent man to invest. I can tell you that there are miners all over Arizona who are working with a burro or with a jeep. They have themselves to support, or they have a partner, and they do this with pick and shovel and with water, and they work at far less assays than we have been talking about today, and live. A man does not

need much to live out there, and whether or not he goes on with the exploration of a mine pretty much depends on whether he wants to live on \$1 a day or \$5 a day or 50 cents a day. It is up to him entirely.

I am hopeful, Mr. Chairman, that the committee will call Mr. Bradshaw, and allow him to testify as to the rule that has been used historically in the granting of patents across the country, because I think on that we will find a resolution of this case, and a better understanding of it by the people in the country.

That was not in the nature of a question, Mr. Secretary, and if a question was necessary, I apologize.

Mr. Davis. I am glad to have you make the statement, Senator, and I am sure the committee would profit later if they would call Mr. Bradshaw, who has been with the Department for, I forget whether it is 30, 35, or 40 years, who knows this legal field quite thoroughly, and I am sure would be very happy to inform the committee as to the law with reference to mining claims. I, too, would appreciate the committee's taking into consideration these legal rules which I have outlined, of course, in broad language in my own statement, but which have been passed on by the courts through the years and modified somewhat from time to time. They come down, I repeat, to the fundamental statement that I have made in my own original presentation; but I think the committee would profit and, I would say, perhaps enjoy, Mr. Bradshaw giving you a dissertation on the mining laws.

Thank you, Mr. Chairman. I don't mean to interrupt.

Representative HOFFMAN. How much time remains before we adjourn, Mr. Chairman?

Senator SCOTT. It depends on when you want to adjourn.

Representative HOFFMAN. You limited us to 45 minutes on this side, after the majority and these other gentlemen had questioned the witness for pretty nearly a day and a quarter.

Senator SCOTT. Your side has 19 minutes.

Representative HOFFMAN. Left now?

Senator SCOTT. It will be less.

Representative HOFFMAN. Still remaining now?

Senator SCOTT. About 17½ minutes now.

Representative HOFFMAN. I will talk another half minute. You may be happy then to realize that I only have 17.

Mr. Jonas, have you some more questions? Go ahead if you have. All I want is 5 minutes.

Are you going to adjourn then, or turn the hearing back to the other side?

Senator SCOTT. We will decide that later.

Representative CHUDOFF. I am going to ask some questions.

Mr. HOFFMAN. Some more inquisition then. I will keep my 15 minutes now, if I may, until the end.

Senator SCOTT. Right now.

Representative HOFFMAN. Right now? You mean you are going to force me to the suggestion made by the Senator from Oregon, to go ahead now and let them come on with rebuttal?

Senator SCOTT. That is what we decided a while ago.

Representative HOFFMAN. You did not say anything about there being another end to it.

You said Mr. Coburn was to finish and then we were to have 45 minutes on this side.

Now what you are doing is limiting us to 45 minutes on this side and then turning the witness back to the tender mercies of these 3 attorneys again. I say that is not cricket.

Senator SCOTT. We are not paying cricket today.

Representative HOFFMAN. No, nor fairly either.

Senator SCOTT. Go ahead.

Representative HOFFMAN. I am so shocked at such a ruling on your part it is very difficult for me to get started and the statement of the Secretary is so clear and so convincing that I do not know that anything more would be needed to convince the average individual that the decision that he made could not have been any other than what it was.

Counsel has suggested that the McDonalds hired a mineral surveyor. Under the regulations put out by the Department the Department qualifies a surveyor and the claimant cannot hire anyone else, can he?

Mr. DAVIS. That's right, that is my understanding.

Representative HOFFMAN. Surely; I would like to ask counsel what were you trying to get at in saying that the McDonalds hired him?

Mr. COBURN. They can hire any registered mine surveyor.

Representative HOFFMAN. Anybody that is qualified by the Department.

Mr. COBURN. That is registered.

Representative HOFFMAN. You have been squawking here all the time, and I use that word advisedly—the Senator used it the other day—about bringing in a surveyor who was approved by the Al Sarena people. Now, when the claimant wants a mineral surveyor he has to take the fellow approved by the Department. Why do you not be frank about it?

Mr. COBURN. There is a vast difference between a minerals examiner and a minerals surveyor.

Representative HOFFMAN. We are not talking about a minerals examiner until a minerals surveyor comes along and gives an O. K., the location is stymied. He cannot go anywhere.

Mr. COBURN. I do not think anybody has questioned the qualifications of the minerals surveyor.

Representative HOFFMAN. The point I was making is that you just raised Cain all the time because the McDonalds were entitled to name at least some fellow who might pass the examination. At the same time they were required to accept the Government's mineral surveyor. I do not wonder you smile when that inconsistency is pointed out to you.

You were asked, too, here about your decision Mr. Davis—and that was a tricky question—as to whether you did not rest it on the report of the assays obtained by the Al Sarena people. In addition to what they said, there was a lack of evidence to support the protest of the Forest Service, was there not, in the record?

Mr. DAVIS. I felt there was a lack of completely dependable assays from anybody. That was why I wanted to get a new one.

Representative JONAS. May I interrupt my colleague to ask him a question?

How much time do we have on this side? 13 minutes?

Senator NEUBERGER. Until 25 to 4.

Representative JONAS. It was suggested that if you did not care to use 13 minutes in asking Mr. Davis questions we might take part of

our time and ask Mr. Bradshaw some questions about mining law.

Representative HOFFMAN. If you can in some way get the consent of the chairman of the committee it is all right with me, but you had better get that first. Put Mr. Bradshaw on if he will let you and you wish. Ask the prosecutor first.

Representative JONAS. That will be all right, asking for some time to ask Mr. Bradshaw to come up. They say that will be all right.

Representative HOFFMAN. Put him on.

Representative JONAS. Come up, Mr. Bradshaw.

Senator SCOTT. Will you swear Mr. Bradshaw in, Congressman Chudoff?

Representative CHUDOFF. Will you raise your right hand?

Do you solemnly swear the testimony you are about to give before the subcommittee will be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. BRADSHAW. I do.

Senator GOLDWATER. Mr. Bradshaw, I want to ask you just two questions. Maybe it will develop others. What was the original intent of the mining law?

#### **TESTIMONY OF C. R. BRADSHAW, ACTING ASSISTANT SOLICITOR, DEPARTMENT OF THE INTERIOR**

Mr. BRADSHAW. The original intent, as I understand it, was to open all of the mineral deposits in the public land to the free use and disposition of miners. In other words, one of the first provisions of the mining law is that all mineral deposits in public lands are open to free disposal. That's the substance of it.

Senator GOLDWATER. I forgot to have you identify yourself. Would you tell the committee your title and so forth?

Mr. BRADSHAW. My name is C. R. Bradshaw. I am Acting Assistant Solicitor, Department of the Interior.

Senator GOLDWATER. How long have you been in that capacity?

Mr. BRADSHAW. Well, I have been with the Bureau of Land Management and its predecessor, the General Land Office, and the Department of the Interior for approximately 35 years.

Senator GOLDWATER. 35 years?

Mr. BRADSHAW. Yes, sir.

Senator GOLDWATER. Would you say that during your time in these various offices in the Bureau of Land Management and its predecessor that the Department has pretty well followed the rule that you have just outlined?

Mr. BRADSHAW. Yes, sir; it has. You mean the rule as to discovery?

Senator GOLDWATER. The general policy that you just outlined to open up the lands.

Mr. BRADSHAW. That is correct, sir.

Senator GOLDWATER. Would you tell me, are you a lawyer?

Mr. BRADSHAW. Yes, sir.

Senator GOLDWATER. Are you also an engineer?

Mr. BRADSHAW. No, I'm not an engineer.

Senator GOLDWATER. Just a lawyer. I do not say "just a lawyer" in a derogatory way.

Mr. Bradshaw, what is the rule as to profitability of a patent application?

Mr. BRADSHAW. Profitability?

Senator GOLDWATER. Yes.

Mr. BRADSHAW. There is no rule that I know of that the patent applicant must show that he has a profitable operation. The rule, first formulated, that is, first formalized in specific terms, as far as I know, was formulated or stated, rather, in 1894 in the case of *Castle v. Womble* by the Department. That rule was that when mineral is discovered of such quantity and of such quality as would justify a prudent man in the expenditure of his labor and means in an effort to develop a paying mine, he has made a discovery which should entitle him to a patent.

Senator GOLDWATER. Have you followed the Supreme Court decision of 1905 which I referred to, *Chrisman v. Miller*, which said that the law imposed no conditions on the locator as to the value of the ore discovered?

Mr. BRADSHAW. That is correct, sir.

Senator GOLDWATER. In other words, the value of the ore has no particular bearing on this, on the granting of a patent, does it?

Mr. BRADSHAW. Well, in the sense that a man must not have a profitable operation in order to get a patent, that is true. I think the value of the ore is an element.

In other words, you take the value of the ore discovered together with the geological facts and together with the information that may be obtained from adjoining mines and determine on the basis of all the facts whether a valid discovery has been made or not.

Senator GOLDWATER. However, there is no dollar-and-cent rule that has ever been followed?

Mr. BRADSHAW. No dollar-and-cent rule.

Senator GOLDWATER. That has ever been used to your knowledge in the history of the granting of mining patents?

Mr. BRADSHAW. That is true.

Senator GOLDWATER. Is it not true that before the corrections were made in the mining law hundreds, maybe thousands, of patents were granted on lands that contained nothing but gravel, or sand, or flagstone, or decomposed granite?

Mr. BRADSHAW. That I couldn't say. I couldn't say that that is true; no, sir. I would say this: That the patents have been granted to my knowledge at various times during the past 35 years on showings of five and ten-hundredths percent, or five and ten-hundredths percent of gold, silver, lead, or zinc.

Senator GOLDWATER. That low?

Mr. BRADSHAW. That low; yes, sir.

Senator GOLDWATER. Five and ten-hundredths?

Mr. BRADSHAW. That is right. That was the only showing the miner had.

Senator GOLDWATER. That is not five and ten-hundredths as one figure?

Mr. BRADSHAW. It is five one-hundredths of a percent; yes, sir. The reason for that was that other mines developed on the same deposit, and where shafts had been sunk on comparable surface showings, had developed some of the richest lead-zinc mines in the West.

Senator GOLDWATER. Mr. Bradshaw, I have one more question.

I have in my hand a document entitled: "Memorandum of Authorities on the Rule As To What Constitutes a Valid Discovery of Mineral Sufficient To Support a Mining Location."

Do you recognize that title?

Mr. BRADSHAW. Yes, sir.

Senator GOLDWATER. Are you the author of that paper?

Mr. BRADSHAW. Yes, sir.

Senator GOLDWATER. Mr. Chairman, I have a copy of that signed by Mr. C. R. Bradshaw. I would like to have it inserted in the record at this point.

Senator SCOTT. That is all right. That is all right if there is no objection to it.

(The memorandum referred to follows:)

MEMORANDUM OF AUTHORITIES ON THE RULE AS TO WHAT CONSTITUTES A VALID  
DISCOVERY OF MINERAL SUFFICIENT TO SUPPORT A MINING LOCATION

By C. R. Bradshaw, Acting Assistant Solicitor, Branch of Minerals, Division of  
Public Lands, Department of the Interior

The general rule is stated in *Castle v. Womble* (19 L. D. 455), to be where mineral is found in such quantity and of such quality as would warrant a prudent man in the expenditure of his labor and means in an effort to develop a paying mine. In *Jefferson-Montana Copper Mines Co.* (41 L. D. 320), the Department undertook to outline the elements necessary to establish a valid discovery, on a lode claim, as follows:

"1. There must be a vein or lode of quartz or other rock in place.

"2. The quartz or other rock in place must carry gold or some other valuable mineral deposit.

"3. The two preceding elements, when taken together, must be such as to warrant a prudent man in the expenditure of his time and money in the effort to develop a valuable mine."

The same rule has been applied by the courts. *Chrisman v. Miller* (107 U. S. 313, 323). In the Chrisman case, however, the Court also said that:

"It is true that when the controversy is between two mineral claimants the rule respecting the sufficiency of a discovery of mineral is more liberal than when it is between a mineral claimant and one seeking to make an agricultural entry, for the reason that where land is sought to be taken out of the category of agricultural lands the evidence of its mineral character should be reasonably clear, while in respect to mineral lands, in a controversy between claimants, the question is simply which is entitled to priority."

This statement of the Court is self-evident. From a date substantially prior to the date of admission of California into the Union in 1853, Congress had adopted the policy of disposing of mineral lands separately and apart from agricultural (or nonmineral) lands, *Mining Co. v. Consolidated Mining Co.* (102 U. S. 167). Later in 1866 and 1870, the lode and placer mining laws, respectively, provided for the free exploitation of minerals in public lands. It naturally follows that when the real question is whether or not land is mineral in character a higher type of evidence of the existence of minerals in the land is required than where the real issue is as to the right of possession between rival mineral claimants.

But with the exception of saline minerals and building stone the rule is that it is not necessary to show a discovery of a deposit known to be valuable and except for saline minerals and building stone it is never necessary to show that the discovery is of a deposit more valuable than the timber on the land or than the land may have for any nonmineral purpose. First, to dispose of the exceptions:

Saline lands: The act of January 31, 1901 (31 Stat. 745; 30 U. S. C., sec. 162), in terms require that the lands to be locatable must be chiefly valuable for salines.

Building stone: The act of August 4, 1892 (27 Stat. 348; 30 U. S. C., sec. 161), makes lands chiefly valuable for building stone subject to mining location.<sup>1</sup> With

<sup>1</sup> The act of February 11, 1897 (29 Stat. 526; 30 U. S. C., sec. 101), now superseded by the Mineral Leasing Act of February 25, 1920 (41 Stat. 437; 30 U. S. C., sec. 181) made lands chiefly valuable for petroleum subject to location under the placer mining laws.

respect to saline minerals and building stone lands more valuable for timber than for these minerals are not subject to location.

What constitutes a valid discovery of a mining claim necessarily came to the attention of the courts and the Interior Department after the enactment of the mining laws. However, as late as 1886, we find that the United States Circuit Court for Oregon concluded that it had not then been judicially determined. And that court in the same case, *United States v. Reed* (28 Fed. 482), concluded that nothing short of known mines capable of being worked at a profit, as compared with any gain or profit that may be derived therefrom when entered under the homestead law is sufficient to prevent such entry. However, within the succeeding 20 years the courts had frequent occasion to define discovery as related to the location of mining claims and in 1905 the Supreme Court in *Chrisman v. Miller*, supra, said that the law imposed no conditions on the locator as to the value of the ore discovered and as stated above adopted the rule in *Castle v. Womble*. Previous to 1905, several Federal courts had wrestled with the problem. In *Shoshone Mining Co. v. Butler* (Idaho 1898, 87 Fed. 806), it was said that it was not intended that the miner determine the precise extent and character of the mineral or continuity of the ore before he can make a valid location. *Migoon v. Montana Central Railroad Co.* (Mont. 1896, 77 Fed. 249, 253), holds that the flinding of rock in place containing mineral is a discovery, whether the rock assays high or low.

Since 1905, the courts have consistently followed *Chrisman v. Miller*, supra, and many of the pertinent cases are collected in 30 United States Code Annotated, section 23, note 141. *Cameron v. United States* (1920, 252 U. S. 450, 459), is especially pertinent. There the court approved the rule announced in *Castle v. Womble* and *Chrisman v. Miller*, which the Secretary of the Interior had followed with respect to claims within the Grand Canyon National Monument. The court had previously recognized that the Grand Canyon "is an object of unusual scientific attraction and annually draws to its borders thousands of visitors." The mining claims covered a tract which the court found embraces the head of the trail (the Bright Angel Trail) used to descent to and ascend from the bottom of the canyon. The rule was applied as late as 1942 in *United States v. Mobley* (45 F. Supp. 407). It has been applied to prevent withdrawal of the land by the United States. *United States v. Ohio Oil Co.* (D. C. Wyo. 1916, 240 Fed. 996), affirmed *United States v. Grass Creek Oil and Gas Co.* (C. C. A. 1916, 236 Fed. 481).

The Department of the Interior has followed the same rule. In *Cataract Gold Mining Co.* (1914, 43 L. D. 248), it said that if a claim contains mineral of such quantity and value as to warrant a prudent man in the expenditure of his time and money "in the reasonable expectation of success in developing a paying mine, such lands are disposable only under the mining law, notwithstanding the fact that they may possess a possible or probable greater value for agriculture or other purposes." This was consistent with many prior decisions involving conflicts between mining claims and other nonmineral entries and claims, e. g., *Aspen Consolidated Mining Co. v. Williams* (1896, 23 L. D. 34, 47) (*Mining Claim v. Pre-emption settlement*); *Walker v. Southern Pacific R. R. Co.* (1887, 24 L. D. 172) (*Mining Claim v. Railroad Selection*); *East Tintic Consolidated Mining Co.* (1914, 43 L. D. 79, 81) (mineral application); *Central Pacific Ry. Co.* (1914, 43 L. D. 545) (*Railroad Grant v. Mining Claim*); *United States v. Bunker Hill Mining and Concentrating Co.* (1922, 48 L. D. 598, 604) (mineral application). In *Helen v. Wells, et al.* (1933, 54 L. D. 306), it was said that while the existence of a valuable stand of timber on a claim supplies a reason for clear and convincing evidence, it "in no way qualifies the locator's rights under the mining law if he has a valid claim (see *United States v. Deary* 24 Fed. 2d 108)), \* \* \*." In *United States v. Langmade and Miskier* (1925, 52 L. D. 700), the Department after citing the *Cataract Gold Mining Co.* case, supra, said that whether the land in a national forest was more valuable for recreation than for a mill site located under the mining law was not a crucial test of its locatability but that it made it imperative that the claimant make a clear and unequivocal showing of compliance with the law. The *Castle v. Womble* rule was again applied in *United States v. Frank J. Miller* (1947, 50 L. D. 446), where mining claims in a national forest were involved and *Cataract Gold Mining Co.* was cited to support the proposition.

The case of *United States v. Dawson* (1944, 58 L. D. 670), contained language which has been frequently cited to support the proposition that mineral values must exceed surface values in order to meet the requirements necessary to prove a valid discovery. Actually, this was stated as an alternative rule only and

inssofar as I know, it has been applied only nonmetalliferous deposits. The decision also recited the normal laws of discovery and the pertinent language follows:

"In determining whether land is valuable for mineral it must be shown that the land is more valuable for the purpose of removing and marketing the substance than for any other purpose; that the removal and marketing will probably yield a profit; or that such substance exists in the land in such quantity as to justify a prudent man in expending labor and capital in the effort to obtain it. *Layman et al. v. Ellis* (52 L. D. 714, 720); *Pacific Coast Marble Co. v. Northern Pacific R. R. Co. et al.* (25 L. D. 233; *Lindley on Mines*, sec. 98); *United States v. D. L. Underwood* (unreported), decided by the Department on August 11, 1939, and as *Ickes v. Underwood*, by the United States Court of Appeals for the District of Columbia on March 20, 1944. For other cases see 30 U. S. C. A., sec. 21, notes 41, 42. And where mining claims are located on lands in a national forest and embrace desirable recreational areas the showing of mineral values should be clear and unequivocal. *United States v. Langmeade and Nistler* (52 L. D. 700); *United States v. Anna W. Strumquist* (C.A. 17380), 1933, unreported; *United States v. William S. Nestell et al.* (C.A. 20513), 1937, unreported). See also *United States v. Larsonson* (206 Fed. 755); *United States v. Lillibridge* (4 F. Supp. 204). Irrespective of other grounds of invalidity, it clearly appears that the locations in question are void for lack of a discovery of a valuable mineral deposit."

The thing that is said is that to determine whether the land is valuable for mineral "it must [either] be shown that the land is more valuable for the purpose of removing and marketing the substance than for any other purpose [or] that the removal and marketing will probably [not certainly] yield a profit, or that such substance exists in the land in such quantity as to justify a prudent man in expending labor and capital in the effort to obtain it." [Interpolations and emphasis added.]

Thus the case holds, inter alia, that if the evidence meets the standard test laid down in *Castle v. Womble*, *supra*, the claims would be valid. None of the departmental cases cited supports the proposition that the land must be more valuable for minerals than for other purposes and only *United States v. Reed*, *supra*, of the court decisions lends any support. As already stated the Reed case has not been followed, at least since *Castle v. Womble* and *Chrisman v. Miller*. Two of the cases cited in support involved sand and gravel, the third involved marble situated in the then sparsely settled West. The Dawson case involved pumicite. As to such minerals the rule is well settled as shown by the two cases involving sand and gravel that proof of the actual (rather than the potential) value of the particular deposit is necessary since without a convenient market the deposits could not be produced at a profit no matter had extensive they might be. This may explain the use of the first alternative basis for establishing the validity of the claim. The reference to *Lindley on Mines* fully support the holding if considered as above in the alternative but not otherwise since *Lindley* also states the rule in the alternative. There is no quarrel with the holding that the evidence in such a case must be clear and convincing.

There is no basis for saying that because a claim is in a national forest the rule as to discovery is different than it is elsewhere. The act of June 4, 1897 (30 Stat. 36; 16 U. S. C., sec. 478), governs such locations. It expressly provides for "prospecting, locating, and developing the mineral resources subject only to the condition that the 'rules and regulations covering such national forests' must be complied with."

After an exhaustive search no case has been found since the decision in *Castle v. Womble*, which holds that in order to locate a mining claim or to obtain a patent for such a claim any more need be established than that mineral in quantity and quality sufficient to justify a prudent man to expend his labor and means in the hope of developing a paying mine has been found. It is true that where other (nonmineral) rights are involved a higher degree of proof is required than where the controversy is between rival mining claimants. But the rule as to what must be established is the same in both cases. The reason that better evidence is required where the conflict is between mineral and non-mineral claimants is that the question of the mineral character of the land is the material issue while in a contest between rival mineral claimants it is merely collateral.

Any conclusion that there is one rule of discovery for mining locations for unclaimed, untimbered lands and another—and a stricter—rule for timber lands

or those claimed by nonmineral claimants would ignore the fact that the mining law makes no distinction and that, except for saline and building stone minerals, no other statute provides or authorizes a different rule.

C. R. BRADSHAW,  
Acting Assistant Solicitor,  
Branch of Minerals.

Senator GOLDWATER. Those are all the questions I have.

Thank you, Mr. Chairman.

Senator SCOTT. You have 5 minutes more.

Representative HOFFMAN. I do not care to ask Mr. Davis any more questions. The time is so limited I could not develop the subject.

Yes, I would like to ask Mr. Bradshaw a question.

The rule was first laid down by the Land Department, in you said, *Castle v. Womble*, and that is 19 Land Decisions 455 and 457, was it not?

Mr. BRADSHAW. That is right.

Representative HOFFMAN. Later on we came along with this other case. The Dawson case? That is 58 Interior Department 670; is that right? The first case was quoted in this case you referred to, *Chrisman v. Miller*. That is 197 U. S. 322.

Mr. BRADSHAW. Yes.

Representative HOFFMAN. As a matter of fact, there is not a single statutory provision or department regulation which requires the finding of any particular amount of mineral in order to make a valid discovery, is there?

Mr. BRADSHAW. No, sir.

Representative HOFFMAN. What happened was later on there were some Supreme Court decisions which laid down the rule that to justify a discovery, there must be sufficient mineral to justify an average, prudent man in investing his money?

Mr. BRADSHAW. Yes.

Representative HOFFMAN. However, someone in the Forest Service or some other department tried to lay down the rule that in order to validate a discovery there must be mineral sufficient to show a profit or that the mineral must exceed in value the timber on the land or its value as an agricultural venture? They tried to put that one over, did they not?

Mr. BRADSHAW. In the Dawson case the rule is stated in the alternative. Incidentally, I think it is also stated in the alternative in *Lindley on Mines*.

Representative HOFFMAN. Ricketts, too, and Costigan. However, the point I am trying to make is that somebody connected with forestry tried to lay down the rule that the claim would not be a valid discovery unless the mineral was of greater value than the timber.

Mr. BRADSHAW. Well the Dawson case in the first statement, in the first alternative, makes that statement, that the mineral must be more valuable than the land is valuable for other purposes.

Representative HOFFMAN. That is not the rule, though, is it?

Mr. BRADSHAW. That is not the rule.

Representative HOFFMAN. And never has been?

Mr. BRADSHAW. Never has been so far as I know.

Representative HOFFMAN. That is all.

Senator SCOTT. You have 2 minutes more.

Representative JONAS. We will waive those.

Representative **HOFFMAN**. In not using those 2 minutes, may I put in the record later my opinion of the way the hearings have been conducted?

Senator **SCOTT**. Yes. You have.

Representative **HOFFMAN**. I have not expressed it all. I could not do it. It is impossible. I think these hearings will stand as an example of what a congressional committee should not do and the way a witness should not be treated. As some editorials said of the hearings on power. They are a disgrace to the Congress. That is all. As far as I am concerned the benediction for today is on.

Senator **SCOTT**. Mr. Chudoff.

Representative **CHUDOFF**. Mr. Davis, I think that you will agree that the issue in the hearings for today is whether or not the people who have owned the Al Sarena mine were interested in the minerals or interested in the timber is that correct? On one side we have been trying to show they were interested in minerals, and on the other side they were interested in timber.

#### STATEMENT OF CLARENCE A. DAVIS, UNDER SECRETARY OF THE DEPARTMENT OF THE INTERIOR—Resumed

Mr. **DAVIS**. That is what you have been trying to show, Mr. Chudoff, but that hasn't anything to do with the decision of the case.

Representative **CHUDOFF**. However, that is the issue; is that not correct?

Mr. **DAVIS**. It is no issue with me. It seems to be with you.

Representative **CHUDOFF**. This question of granting these patents in a contested claim has been going on for some time prior? It had been going on for some time prior in the prior administration; is that not correct, Mr. Davis?

Mr. **DAVIS**. Yes. You heard me say the claims were pending for about 5 years.

Representative **CHUDOFF**. And you knew about that question having been pending for about 5 years?

Mr. **DAVIS**. That's right.

Representative **CHUDOFF**. In your capacity as a Department of the Interior official why were you in such a rush to grant this patent? Why was it necessary to grant it so fast? Why did you not wait for the Appling report?

Mr. **DAVIS**. Mr. Chudoff, I covered that in my statement. I can say it again for you.

In the first place, I don't recognize that it was undue haste or that it was particularly fast. This thing had been mulled over 4 or 5 years by the Department. It became more and more apparent as you got to the bottom of it that the only real issue involved here was whether there was mineralization on these claims. The minute you established that fact, that's the end of your controversy. There either is or there isn't.

Representative **CHUDOFF**. What do you mean by mineralization?

Mr. **DAVIS**. I mean adequate mineralization to justify the showing of a patent.

Representative **CHUDOFF**. Do you mean by that sufficient mineral content of gold and lead and silver to warrant issuing a patent?

Mr. **DAVIS**. That's right.

or those claimed by nonmineral claimants would ignore the fact that the mining law makes no distinction and that, except for saline and building stone minerals, no other statute provides or authorizes a different rule.

C. R. BRADSHAW,  
*Acting Assistant Solicitor,  
Branch of Minerals.*

Senator GOLDWATER. Those are all the questions I have.

Thank you, Mr. Chairman.

Senator SCOTT. You have 5 minutes more.

Representative HOFFMAN. I do not care to ask Mr. Davis any more questions. The time is so limited I could not develop the subject.

Yes, I would like to ask Mr. Bradshaw a question.

The rule was first laid down by the Land Department, in you said, *Castle v. Womble*, and that is 19 Land Decisions 455 and 457, was it not?

Mr. BRADSHAW. That is right.

Representative HOFFMAN. Later on we came along with this other case. The Dawson case? That is 58 Interior Department 670: is that right? The first case was quoted in this case you referred to, *Chrisman v. Miller*. That is 197 U. S. 322.

Mr. BRADSHAW. Yes.

Representative HOFFMAN. As a matter of fact, there is not a single statutory provision or department regulation which requires the finding of any particular amount of mineral in order to make a valid discovery, is there?

Mr. BRADSHAW. No, sir.

Representative HOFFMAN. What happened was later on there were some Supreme Court decisions which laid down the rule that to justify a discovery, there must be sufficient mineral to justify an average, prudent man in investing his money?

Mr. BRADSHAW. Yes.

Representative HOFFMAN. However, someone in the Forest Service or some other department tried to lay down the rule that in order to validate a discovery there must be mineral sufficient to show a profit or that the mineral must exceed in value the timber on the land or its value as an agricultural venture? They tried to put that one over, did they not?

Mr. BRADSHAW. In the Dawson case the rule is stated in the alternative. Incidentally, I think it is also stated in the alternative in *Lindley on Mines*.

Representative HOFFMAN. Ricketts, too, and Costigan. However, the point I am trying to make is that somebody connected with forestry tried to lay down the rule that the claim would not be a valid discovery unless the mineral was of greater value than the timber.

Mr. BRADSHAW. Well the Dawson case in the first statement, in the first alternative, makes that statement, that the mineral must be more valuable than the land is valuable for other purposes.

Representative HOFFMAN. That is not the rule, though, is it?

Mr. BRADSHAW. That is not the rule.

Representative HOFFMAN. And never has been?

Mr. BRADSHAW. Never has been so far as I know.

Representative HOFFMAN. That is all.

Senator SCOTT. You have 2 minutes more.

Representative JONAS. We will waive those.

Representative HOFFMAN. In not using those 2 minutes, may I put in the record later my opinion of the way the hearings have been conducted?

Senator SCOTT. Yes. You have.

Representative HOFFMAN. I have not expressed it all. I could not do it. It is impossible. I think these hearings will stand as an example of what a congressional committee should not do and the way a witness should not be treated. As some editorials said of the hearings on power. They are a disgrace to the Congress. That is all. As far as I am concerned the benediction for today is on.

Senator SCOTT. Mr. Chudoff.

Representative CHUDOFF. Mr. Davis, I think that you will agree that the issue in the hearings for today is whether or not the people who have owned the Al Sarena mine were interested in the minerals or interested in the timber is that correct? On one side we have been trying to show they were interested in minerals, and on the other side they were interested in timber.

#### STATEMENT OF CLARENCE A. DAVIS, UNDER SECRETARY OF THE DEPARTMENT OF THE INTERIOR—Resumed

Mr. Davis. That is what you have been trying to show, Mr. Chudoff, but that hasn't anything to do with the decision of the case.

Representative CHUDOFF. However, that is the issue; is that not correct?

Mr. Davis. It is no issue with me. It seems to be with you.

Representative CHUDOFF. This question of granting these patents in a contested claim has been going on for some time prior? It had been going on for some time prior in the prior administration; is that not correct, Mr. Davis?

Mr. Davis. Yes. You heard me say the claims were pending for about 5 years.

Representative CHUDOFF. And you knew about that question having been pending for about 5 years?

Mr. Davis. That's right.

Representative CHUDOFF. In your capacity as a Department of the Interior official why were you in such a rush to grant this patent? Why was it necessary to grant it so fast? Why did you not wait for the Appling report?

Mr. Davis. Mr. Chudoff, I covered that in my statement. I can say it again for you.

In the first place, I don't recognize that it was undue haste or that it was particularly fast. This thing had been mulled over 4 or 5 years by the Department. It became more and more apparent as you got to the bottom of it that the only real issue involved here was whether there was mineralization on these claims. The minute you established that fact, that's the end of your controversy. There either is or there isn't.

Representative CHUDOFF. What do you mean by mineralization?

Mr. Davis. I mean adequate mineralization to justify the showing of a patent.

Representative CHUDOFF. Do you mean by that sufficient mineral content of gold and lead and silver to warrant issuing a patent?

Mr. Davis. That's right.

**Representative CHUDOFF.** When you finally received the Appling report it was after you had issued a patent; is that not right?

**Mr. DAVIS.** That's when we received the typed copy, yes. We had the rest of it before that.

**Representative CHUDOFF.** Did you read the Appling report?

**Mr. DAVIS.** Oh, yes.

**Representative CHUDOFF.** Did you read those paragraphs under "Geology" where Mr. Appling said, on January 2, 1954:

The rocks underlying the claim area are principally rhyolite flows, with minor amounts of andesite in the north and northwest claim area. Volcanic agglomerate is common on many of the claims. Alteration is extensive in places in the eastern claim area. No outstanding fault or flexure was noted.

Pyrite is visible in minor quantities in most of the rhyolite exposures and galena was observed in some places. Panned concentrates made from discarded sample splits showed pyrite and a larger amount of magnetite. Apparently the gold is associated with the pyrite. No free gold was noted megascopically.

Is not pyrite known as fool's gold in the mining parlance?

**Mr. DAVIS.** I don't know.

**Representative CHUDOFF.** Is it not true that pyrite has only a very small amount of gold content, not sufficient to warrant mining an ore at that particular point?

**Mr. DAVIS.** I don't know anything about pyrite. I can't tell you, sir.

**Representative CHUDOFF.** If you had read the Appling report would it have had any influence upon your decision to grant patent, if you had received it before you granted patent?

**Mr. DAVIS.** No.

**Representative CHUDOFF.** You have been doing a lot of talking about mineralization, Mr. Davis. You must have felt that there was sufficient gold or silver in the mineralization to warrant a patent, did you not?

**Mr. DAVIS.** I did, yes.

**Representative CHUDOFF.** And did you consult anybody about that?

**Mr. DAVIS.** Well, it's all through the documents here. It gives you a pretty good idea as to what there ought to be there.

**Representative CHUDOFF.** The answer is you did not consult anybody?

**Mr. DAVIS.** Well, I consulted the record.

**Representative CHUDOFF.** Only the record?

**Mr. DAVIS.** You mean did I sit down and talk to some mining people about the mineralization? No.

**Representative CHUDOFF.** Did you talk to Mr. Bradshaw, the mining expert of your Department?

**Mr. DAVIS.** No, I don't think I did.

**Representative CHUDOFF.** Do you not think that since there was a controversy such as existed at that time that you should have discussed it with your counsel who is an expert on mining laws?

**Mr. DAVIS.** Well, I don't think there is any controversy about the law, Mr. Chudoff, at all. I think the question is a purely factual question of what content of gold there is at these discovery points, and that is a matter for the assayer. You might be interested to know, incidentally, that there have been hundreds and hundreds of these mining claims allowed without any assays at all just because somebody made up their mind, long before my day, but somebody made up

their mind as a matter of judgment that there were probably paying minerals on the claim because they made some kind of a strike or other so the mining claim was allowed.

Representative CHUDOFF. And you felt that under the circumstances you were competent to determine in your own mind and render an opinion that there was sufficient gold and silver in these minerals to warrant granting of a patent?

Mr. DAVIS. That's what I thought.

Representative CHUDOFF. You said that you had received, I believe, numerous inquiries concerning this matter personally from the Congressman from Oregon. Did you receive any inquiries personally from any other Congressman?

Mr. DAVIS. Oh, I don't know that I did. I have read into the record already all of the correspondence, I believe, from Members of either House of the Congress that had accumulated through the years about this thing.

Representative CHUDOFF. I am talking about whether you received anything personally, not from some other member who wrote the previous administration.

Mr. DAVIS. No, I don't recall any.

Representative CHUDOFF. There was also some testimony about the question of how much ore had been sent to the American Smelting & Refining Co. for refinement, and the question was also raised that it might have been sent to other companies.

Mr. DAVIS. Mr. Appling testified that he was in the neighborhood of the mine at least from 1950 to 1955 when he was transferred to Spokane, Wash., and he said that there was no mining at all either on contested or uncontested claims. I believe that there are other facts in the record to show that there was not any mining at all on either of those contested or uncontested claims by the Al Sarena Mining Co. or its predecessors in title after 1943.

Mr. DAVIS. 1943, that's right.

Representative CHUDOFF. If there was the mineralization, and the gold and silver and lead in these minerals that you felt was sufficient to allow you in your opinion to grant a patent, why would you think that the property had not been mined since 1943?

Mr. DAVIS. That might not be mined for any one of a hundred reasons. Among others, of course, there was a clamp down on gold in 1943, but in addition to that, as we have been through 2 or 3 times, marketing conditions may be such, capital requirements for investments in machinery may be such, personnel may be such—as a matter of fact, the statement is made repeatedly through here that the actual reason this mine was closed down was because there was not any labor left up in Oregon to operate it. I don't know whether it is true or not.

Representative CHUDOFF. It might be said that there was more profit in cutting the timber off the land than mining the minerals?

Mr. DAVIS. It wasn't in 1943 apparently.

Representative CHUDOFF. However, your patent was given in 1954 when it was quite profitable.

Mr. DAVIS. That's right.

Representative CHUDOFF. Do you not think, Mr. Davis, if the cutting of the timber off that land was not so profitable you would not have had so much pressure on you to grant this patent?

Mr. DAVIS. I have no way of knowing that. I only say to you, as I have said repeatedly to the committee, that the amount of timber on that mining claim is not a material factor in the decision of whether a patent should be issued. It just isn't.

Representative CHUDOFF. You stick to that conclusion even though—

Mr. DAVIS. I stick to that—

Representative CHUDOFF. Let me finish. Even though you know there has not been any mining in the Al Sarena mine since 1943?

Mr. DAVIS. Certainly I do. I have not changed the law. It has not been changed at all. It is still just where it was.

Representative CHUDOFF. Of course, you could not have any ore smelted unless you send it to a refinery; is that not right?

Mr. DAVIS. I expect that's right.

Representative CHUDOFF. And there has not been any mining since 1943, so there could not have been any ore sent to a refinery.

Mr. DAVIS. I expect that's true.

Representative CHUDOFF. That is all.

Senator NEUBERGER. Mr. Chairman.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. Mr. Secretary, you mentioned the Cameron case. I would like to include for the record an analysis of the Cameron case, prepared by Mr. Stewart French, the Chief Counsel of the Senate Interior Committee. I will not read the entire thing because it is quite long, but I think several things in there will serve to indicate that the Cameron case is not on all fours in any way with the situation here. I will not go into detail, but I think it is significant to call your attention to two things.

In the first place, you have said that one of the reasons you handed down this decision so quickly was the fact that this had gone on so long. Yet the Cameron case, which you yourself introduced in your testimony, went on for about 9 or 10 years.

Mr. DAVIS. I shouldn't be surprised. Many of these go on a long time.

Senator NEUBERGER. However, you were the one who brought up the Cameron case. So far as I am concerned I had never heard of it.

Let me read you the conclusion of Mr. French on the Cameron case:

In summary, it can be observed that in neither of the reported Cameron cases nor in the reported decisions of the Interior Department relating to the case does there appear any basis for a statement that the case is authority for the referral of land patent applications to bureaus in the Department of the Interior other than the Land Office, which is the predecessor of the Bureau of Land Management. In neither of the reported court cases, nor in reported decisions of the Interior Department relating to public lands bearing upon the case, is there any evidence or even any suggestion that any evidence was taken before any officer of the Department of the Interior other than the "Land Department." Nor is there evidence or suggestion that the Secretary considered any evidence other than that adduced at the hearing at which both sides were present and permitted to participate.

That is signed "Stewart French, Committee Counsel" of the Senate Interior Committee.

In other words, you introduced the Cameron case as support for what you did. Yet Mr. French who has analyzed the case concludes that actually it is quite to the contrary.

I will submit Mr. French's entire brief for the record, if I may, Mr. Chairman.

Senator SCOTT. Yes.

(The brief referred to follows:)

UNITED STATES SENATE,  
COMMITTEE ON INTERIOR AND INSULAR AFFAIRS,  
January 30, 1956.

Memorandum to: Senator Richard L. Neuberger,  
From: Stewart French, Committee Counsel.  
Subject: The Cameron case,

In discussing his withdrawal of the Al Sarena case from the Bureau of Land Management and its referral to the Bureau of Mines, Under Secretary Davis stated:

"I am informed of one instance in which this very question of the amount of mineralization on mining claims was referred to the Geological Survey, in the leading case of *United States v. Cameron*, involving mining claims on the Bright Angel Trail in the Grand Canyon. In that case the Secretary referred the matter to the Geological Survey, and, I am informed, determined to follow the report of that agency, and was affirmed by the Supreme Court of the United States." (Pp. 24, 25, prepared statement.)

Careful reading of the Opinions of both the Supreme Court and the Circuit Court of Appeals for the 9th Circuit (found in 250 Fed. Reporter 943) fails to reveal any mention whatever by either tribunal of hearing before or findings or rulings by the Geological Survey. In fact, the authority of the "Land Department" is not only stressed, but referred to as "exclusive." The ruling of the Circuit Court, which was upheld by the Supreme Court, states:

"But on the hearing of Cameron's application much testimony on the part of the claimant, as well as on the part of the Government, appears to have been given before the officers of the Land Department respecting the character of the land applied for, and its location, some of it of a conflicting nature, *the decision of which questions was not only within the jurisdiction of the Land Department, but within its exclusive determination.*" (250 Fed. Reporter 946.) [Emphasis supplied.]

The decision of the District Court for the District of Arizona, which also held for the Federal Government's position, apparently is not reported. But in a voluminous statement of the facts made by the presiding judge of the circuit court in the headnote to the Circuit Court's Opinion, there is no mention whatever made of any agency of the Government other than the Secretary of the Interior and "the General Land Office."

In discussing his withdrawal of the Al Sarena case from the Bureau of Land Management and its referral to the Bureau of Mines, Under Secretary Davis stated:

"In its statement of facts, the circuit court reported: ' \* \* \* after due and proper notice to said Cameron a hearing was had, at which he appeared and introduced evidence in support of his alleged claim and his application for a patent thereto, and that thereafter, and on February 11, 1909, the Secretary of the Interior, *after full consideration of the evidence taken at such hearing* held that no discovery of minerals had been made within the boundaries of the said alleged Cape Horn lode mining claim, and that the land embraced therein is not mineral in character \* \* \*.' (250 Fed. Reporter 944.)" [Emphasis supplied.]

The facts of the case, stated briefly, appear from the two reported Opinions and the reported Departmental Decisions, to be:

One Cameron and others were claimants to a mining location on the rim of the Grand Canyon, then a part of the national forest. Subsequent to the date of their asserted location of the mining claims, the lands were withdrawn as a national monument also. Cameron and his associates refused to vacate the land and continued to operate a livery stable on it. The Federal Government brought suit to enjoin further occupation and use.

The statement of facts by the circuit court discloses that Cameron filed an application for patent on his claim; that "after due and proper notice" a hearing was held by Land Office officials in the field; and that "after full consideration of the evidence taken at such hearing," the Secretary of the Interior sustained the findings of the Land Office ruling that there had been no mineral discovery and that the lands embraced within the claim for which patent application had

been made were not mineral in character. The patent application was therefore denied.

(In view of the charges of excessive delay in the Al Sarena case, the chronology of the Cameron case may be of interest. The patent was applied for on May 17, 1905. The Secretary of the Interior denied the application on February 11, 1909. On April 3, 1912, the General Land Office declared the decision of the Secretary of the Interior, namely, that of February 11, 1909, to be final, and annulled the location of the mining claim. On July 28, 1914, Cameron filed a second application for a patent. On August 4, 1915, the Secretary denied the second application, holding that the claim had no legal existence.)

In its Opinion, the Supreme Court cited as one of the grounds for appeal the appellants' contention that "although the Secretary had ample authority to determine whether Cameron was entitled to a patent, he was without authority to determine the character of the land or the question of discovery, or pronounce the claim invalid." In ruling against this contention, the Supreme Court said:

"Of course, the Land Department has no power to strike down any claim arbitrarily, but so long as the legal title remains in the Government, it does have power after proper notice and upon adequate hearing, to determine whether the claim is valid and, if found to be invalid, to declare it null and void."

The Court goes on to say that "due process in such cases implies notice and hearing." The Court quotes with approval the case of *Cosmos Exploration Co. v. Gray Eagle Oil Co.* (190 U. S. 301, 308) in which it was held "there can be, as we think, no doubt that the general administration of the Forest Reserve Act, and also the determination of various questions which may arise thereunder before the issuing of any patent for the selected lands are vested in the Land Department."

#### CONCLUSION

In summary, it can be observed that in neither of the reported Cameron cases nor in the reported decisions of the Interior Department relating to the case does there appear any basis for a statement that the case is authority for the referral of land patent applications to bureaus in the Department of the Interior other than the Land Office, which is the predecessor of the Bureau of Land Management. In neither of the reported court cases, nor in reported decisions of the Interior Department relating to public lands bearing upon the case, is there any evidence or even any suggestion that any evidence was taken before any officer of the Department of the Interior other than the "Land Department." Nor is there evidence or suggestion that the Secretary considered any evidence other than that adduced at the hearing at which both sides were present and permitted to participate.

STEWART FRENCH, *Committee Counsel*

Mr. DAVIS. May I have the privilege of commenting on that?

Representative HOFFMAN. Before he goes into that may I have the usual overruled objection that it is hearsay, Mr. Chairman?

Senator SCOTT. Go ahead.

Representative HOFFMAN. Thank you.

Mr. DAVIS. Senator, in the first place I have never said that the Cameron case was on all fours with the case that we are talking about.

I said that in the Cameron case, because of difficulties—I know not what—Mr. Ballinger, who was the Secretary of the Interior, called upon the Geological Survey to make him a report on the mineralization of the claims in the Cameron case and that they did so, and that he stood on the report of the Geological Survey in the decision which was rendered. That is all I said, and that, I think, is true.

However, since you have raised it again I think you will be interested in the letter which Mr. Ballinger wrote to the Director of the Geological Survey on January 9, 1911. Here it is:

#### THE DIRECTOR OF THE GEOLOGICAL SURVEY.

SIR: Four mining claims located on or near the Bright Angel Trail in the Grand Canyon of the Colorado River and embraced in mineral applications 714, 715, and 716, filed by Ralph H. Cameron in the Phoenix, Ariz., land district, and

known as the Magician, Wizzard, Golden Eagle, and Cape Horn lode mining claims have been made the subject of hearing and of several decisions by the General Land Office and this Department and the case is now pending before me upon motion for review, filed on behalf of the mineral applicant. The evidence submitted at the hearings had in this case is conflicting with respect to the mineral or nonmineral character of the several locations involved and is meager in geological and mineralogical details. In the further consideration of the case, I would like to have for my information and on behalf of the Government, which is always an interested party in cases involving the character of public lands, the findings of a competent and experienced geologist based upon an impartial and thorough field investigation of each of the claims.

I have, therefore, to request that you select a thoroughly competent mineral expert and direct him to make a careful and exhaustive field examination of each of the claims involved and submit to me, through you, a full report as to the said claims involved, taking into consideration any discoveries or disclosures made upon the claims in workings constructed by applicant or others, surface croppings, or indications, if any there be, geological formation and any and all facts bearing upon or evidencing the mineral or nonmineral character of the claims.

For the use of the party designated by you in making the examination, I enclose herewith the official plats of survey of the four claims mentioned, also a blueprint showing the location of the claims with respect to the Bright Angel Trail and the station grounds of the Grand Canyon Railway Co.

Very respectfully,

(Signed) R. A. BALLINGER, *Secretary*.

Senator NEUBERGER. That will be submitted for the committee, I hope.

Mr. DAVIS. I would like to submit it right now.

Representative HOFFMAN. May I put on the record my objection to the submission of this memorandum by Mr. French, which is a comment by one witness on the testimony of another, which is improper, and also that in any matter of this kind the witness should be required, that is, Stewart French, committee counsel, to appear before the committee so that we may test his ability, his recollection, and also examine him as to other cases.

Senator NEUBERGER. I would like to object to this intrusion on our time.

Representative HOFFMAN. Squawk. You get more in the record and more time than anybody else.

Senator SCOTT. Senator Neuberger.

Senator NEUBERGER. I would like to ask why you did not follow that procedure. Why did you not have a reputable man from the Bureau of Mines do just what the previous Secretary did, have the Geological Survey do it?

Mr. DAVIS. I think that's what we did.

Senator NEUBERGER. You did have them do that?

Mr. DAVIS. I think they did substantially the same thing; yes.

Senator NEUBERGER. You think there is no difference?

Mr. DAVIS. I don't think there is very much, Senator, no.

Senator NEUBERGER. And the claimants had to agree to the assay laboratory and so on?

Mr. DAVIS. I don't think that affects the integrity of the Bureau of Mines. The fact that they agreed with the claimant on the assay house, I just don't think—I'm not willing to admit at least—it affects the integrity of the Bureau of Mines.

Senator NEUBERGER. You have complete faith in the integrity of the Bureau of Mines?

Mr. DAVIS. I think so.

Senator NEUBERGER. You so testified the other day.

Mr. DAVIS. I so testified.

Senator NEUBERGER. Did you know that the Williams Co. assay was contrary to an assay made by the Bureau of Mines at Albany, Oreg.?

Mr. DAVIS. I wouldn't say that. I think you are overstating it. I would say that you had seven assays—we are talking here about 15 or 20 claims—from the Bureau of Mines taken by Mr. Hattan, all by himself as I recall, and delivered by him by automobile to the Bureau of Mines, all of which showed exactly the same traces that were shown in the original Annes assays which he had made and which he himself apparently distrusted because he probably had some others made. I will say that.

Senator NEUBERGER. Again I am asking you the question, the Williams Co. assay did not agree, is that not true, with the Bureau of Mines assay at Albany?

Mr. DAVIS. That is true, and no two sets of these assays agree with each other.

Senator NEUBERGER. In other words, you stated many times your faith in the integrity of the Bureau of Mines, but you allowed this one assay from Alabama to overrule Abbit Hanks, Annes Laboratories, and the Bureau of Mines laboratories?

Mr. DAVIS. I don't think that's a fair statement because you have some assays in there from Abbit Hanks that run \$6, \$8, \$9 a ton that Mr. Hattan himself reports.

Senator NEUBERGER. Were those not on the noncontested claims?

Mr. DAVIS. I don't know, and I don't think he did.

Senator NEUBERGER. That is the indication we have. Let me ask a further question if I may. You have said several times, and I have written it down as you said it, that you are totally strange to this whole thing. You said substantially that twice. When you have been asked technical questions on mining and on ores you have said, "I don't know. I shouldn't be expected to know."

Mr. DAVIS. That's right.

Senator NEUBERGER. Now, then, do you think you were qualified to decide that the Appling samples are, according to you, more representative and more dependable than the Hattan samples?

Mr. DAVIS. Because, Senator, I have just a little more faith in the way in which they were taken, a little more feeling of security in the way in which they were taken. The ones were taken rather informally, most of them by one man alone. The others were taken in conjunction with parties of both the Bureau of Mines and the claimants, and according to the testimony and according to what I was informed they were carefully pulverized and they were carefully shipped to the assay house. There was a great deal more care taken with those than of any other sets of assays, no matter whose they were.

Senator NEUBERGER. Despite your lack of familiarity with these technical questions you think you are qualified to say that the Appling samples are more dependable and more representative than the Hattan samples?

Mr. DAVIS. I think I am qualified to say that.

Senator NEUBERGER. Is it not true that the Hattan samples were taken at one time in the presence of the caretaker at the mines and in another instance in the presence of the McDonalds?

Mr. DAVIS. Yes; I think that's true.

Senator NEUBERGER. Then you said that he took them by himself. Mr. Hattan testified under oath—

Mr. DAVIS. Just a minute. I don't know who the caretaker of the mine is. I don't know whether he knows anything about mining or not. So far as any technical knowledge is concerned, I would say they were taken by Mr. Hattan on his own. His caretaker may have been with him and may have helped him—I don't know what your record shows—but I assume the caretaker is not a mining engineer.

Senator NEUBERGER. Mr. Hattan testified in Portland—he was referring to whom was with him—as follows:

Mr. W. C. Sanborn, from San Francisco, came to assist me in this second examination.

That is the Forest Service maybe.

Then both Charles and H. P. McDonald were present.

Mr. REDWINE. They belonged to the owner group of McDonalds?

Mr. HATTAN. Yes, sir; they were the agents for the applicant. They went along with us in making our second series of samples. That was the first series for Mr. Sanborn, but the second for me.

Mr. COMBS. You say they were the agents of the corporation. Were they not also officers of the company?

Mr. HATTAN. I believe they were, but they were representing the company so far as we were concerned. They pointed out the places where the discoveries were supposed to be and we took samples in every case at places pointed out.

Representative HOFFMAN. And for 10 days, between the 16th day of July and the 26th, they lay around in the back of the car under nobody's custody.

Senator SCOTT. Go ahead, Senator.

Senator NEUBERGER. Mr. DAVIS, does not that indicate to you that Mr. Hattan took the samples in the presence of representatives of the claimant, indeed the claimants themselves?

Mr. DAVIS. That's what he says, so I suppose that is true, surely.

Senator NEUBERGER. You mean you do not believe what Mr. Hattan said?

Mr. DAVIS. I didn't say that. I said that is what he testified to and I assume it is the truth.

Senator NEUBERGER. Then how can you cast a lack of credit to his samples, as you have done?

Mr. DAVIS. Your record, Senator, indicates what Congressman Hoffman has just finished saying, for one thing, although you must recognize that I didn't know that at the time, but these samples, as I understand it, were kicked around pretty loosely. They took a ride in the car and they stayed there for several days and they were delivered to somebody who, so far as this record shows, is still unidentified, in California—I believe the gentleman's name was Gray; I believe we know that unofficially, but officially I do not think it is even in the record—and were delivered by him over to Abbit Hanks, and I just don't think, Senator, that there is anything like the extreme care used in that process that was used in the samples that were taken under the supervision of the Bureau of Mines.

I am not casting aspersions on them or on anybody. I am just saying I just don't think they were as carefully taken, as carefully guarded, as were the others.

Senator NEUBERGER. Inasmuch as you seem to lack faith in the way in which Mr. Hattan handled the samples, why did you quote favor-

Senator NEUBERGER. You so testified the other day.

Mr. DAVIS. I so testified.

Senator NEUBERGER. Did you know that the Williams Co. assay was contrary to an assay made by the Bureau of Mines at Albany, Oreg.?

Mr. DAVIS. I wouldn't say that. I think you are overstating it. I would say that you had seven assays—we are talking here about 15 or 20 claims—from the Bureau of Mines taken by Mr. Hattan, all by himself as I recall, and delivered by him by automobile to the Bureau of Mines, all of which showed exactly the same traces that were shown in the original Annes assays which he had made and which he himself apparently distrusted because he probably had some others made. I will say that.

Senator NEUBERGER. Again I am asking you the question, the Williams Co. assay did not agree, is that not true, with the Bureau of Mines assay at Albany?

Mr. DAVIS. That is true, and no two sets of these assays agree with each other.

Senator NEUBERGER. In other words, you stated many times your faith in the integrity of the Bureau of Mines, but you allowed this one assay from Alabama to overrule Abbit Hanks, Annes Laboratories, and the Bureau of Mines laboratories?

Mr. DAVIS. I don't think that's a fair statement because you have some assays in there from Abbit Hanks that run \$6, \$8, \$9 a ton that Mr. Hattan himself reports.

Senator NEUBERGER. Were those not on the noncontested claims?

Mr. DAVIS. I don't know, and I don't think he did.

Senator NEUBERGER. That is the indication we have. Let me ask a further question if I may. You have said several times, and I have written it down as you said it, that you are totally strange to this whole thing. You said substantially that twice. When you have been asked technical questions on mining and on ores you have said, "I don't know. I shouldn't be expected to know."

Mr. DAVIS. That's right.

Senator NEUBERGER. Now, then, do you think you were qualified to decide that the Appling samples are, according to you, more representative and more dependable than the Hattan samples?

Mr. DAVIS. Because, Senator, I have just a little more faith in the way in which they were taken, a little more feeling of security in the way in which they were taken. The ones were taken rather informally, most of them by one man alone. The others were taken in conjunction with parties of both the Bureau of Mines and the claimants, and according to the testimony and according to what I was informed they were carefully pulverized and they were carefully shipped to the assay house. There was a great deal more care taken with those than of any other sets of assays, no matter whose they were.

Senator NEUBERGER. Despite your lack of familiarity with these technical questions you think you are qualified to say that the Appling samples are more dependable and more representative than the Hattan samples?

Mr. DAVIS. I think I am qualified to say that.

Senator NEUBERGER. Is it not true that the Hattan samples were taken at one time in the presence of the caretaker at the mines and in another instance in the presence of the McDonalds?

Mr. DAVIS. Yes; I think that's true.

Senator NEUBERGER. Then you said that he took them by himself. Mr. Hattan testified under oath—

Mr. DAVIS. Just a minute. I don't know who the caretaker of the mine is. I don't know whether he knows anything about mining or not. So far as any technical knowledge is concerned, I would say they were taken by Mr. Hattan on his own. His caretaker may have been with him and may have helped him—I don't know what your record shows—but I assume the caretaker is not a mining engineer.

Senator NEUBERGER. Mr. Hattan testified in Portland—he was referring to whom was with him—as follows:

Mr. W. C. Sanborn, from San Francisco, came to assist me in this second examination.

That is the Forest Service maybe.

Then both Charles and H. P. McDonald were present.

Mr. REDWINE. They belonged to the owner group of McDonalds?

Mr. HATTAN. Yes, sir; they were the agents for the applicant. They went along with us in making our second series of samples. That was the first series for Mr. Sanborn, but the second for me.

Mr. COBURN. You say they were the agents of the corporation. Were they not also officers of the company?

Mr. HATTAN. I believe they were, but they were representing the company so far as we were concerned. They pointed out the places where the discoveries were supposed to be and we took samples in every case at places pointed out.

Representative HOFFMAN. And for 10 days, between the 16th day of July and the 26th, they lay around in the back of the car under nobody's custody.

Senator SCOTT. Go ahead, Senator.

Senator NEUBERGER. Mr. Davis, does not that indicate to you that Mr. Hattan took the samples in the presence of representatives of the claimant, indeed the claimants themselves?

Mr. DAVIS. That's what he says, so I suppose that is true, surely.

Senator NEUBERGER. You mean you do not believe what Mr. Hattan said?

Mr. DAVIS. I didn't say that. I said that is what he testified to and I assume it is the truth.

Senator NEUBERGER. Then how can you cast a lack of credit to his samples, as you have done?

Mr. DAVIS. Your record, Senator, indicates what Congressman Hoffman has just finished saying, for one thing, although you must recognize that I didn't know that at the time, but these samples, as I understand it, were kicked around pretty loosely. They took a ride in the car and they stayed there for several days and they were delivered to somebody who, so far as this record shows, is still unidentified, in California—I believe the gentleman's name was Gray; I believe we know that unofficially, but officially I do not think it is even in the record—and were delivered by him over to Abbit Hanks, and I just don't think, Senator, that there is anything like the extreme care used in that process that was used in the samples that were taken under the supervision of the Bureau of Mines.

I am not casting aspersions on them or on anybody. I am just saying I just don't think they were as carefully taken, as carefully guarded, as were the others.

Senator NEUBERGER. Inasmuch as you seem to lack faith in the way in which Mr. Hattan handled the samples, why did you quote favor-

ably in your opinion his judgment as to the eight uncontested claims? Would not this poor handling prevail with those samples too?

Mr. DAVIS. Not necessarily. As a matter of fact, as I have already pointed out, when you get right down to it there are still, while there is a general conceding by everybody, including the Forest Service, that these original eight claims are heavy enough mineralized to justify patent, when you get right down to it they are still not affirmative assays, labeled to each one of these particular claims, with anything like the particularity that the last set of samples were taken by the Bureau of Mines.

Senator NEUBERGER. Are you aware of the fact that Mr. Appling, whose samples you have such faith in, has had about 5 years' experience, by his own testimony, and Mr. Hattan has had approximately 30 years' experience.

Mr. DAVIS. Yes, I know that.

Senator NEUBERGER. Do you still doubt or question the judgment you made as between their two sets of samples?

Mr. DAVIS. I know an awful lot of old lawyers that aren't as good as the young ones, if you want to put it on that kind of a basis.

Senator NEUBERGER. Are you at all disturbed, Mr. Secretary, that since you granted final patent there has been no mining on these claims, but a substantial amount of commercial lumber operations?

Mr. DAVIS. Am I disturbed about that?

Senator NEUBERGER. Yes, sir.

Mr. DAVIS. No; I am not particularly disturbed by that. I think that it is a rather normal thing, so to speak. As a matter of fact, in the present state of the criticism, and of this investigation, and all that, I question whether anybody would go in there and undertake to develop a mine.

Senator NEUBERGER. In view of the criticism, Mr. Secretary, would they not be more likely to develop the mine than to cut timber?

Mr. DAVIS. Well, I don't know. You are talking about what motivates people and I can't always tell you about that.

Senator NEUBERGER. I cannot either, but you introduced that, as to what they might be likely to do in view of criticism, and I asked you if, in view of the criticism of this, the normal thing for them to do then would not be to operate a mine rather than to log the trees?

Representative HOFFMAN. If you would leave them money enough to do either it would be helpful.

Mr. DAVIS. I am not sure I know what the normal thing to do is.

Representative HOFFMAN. May I interrupt once more?

Senator NEUBERGER. No, you may not.

Representative HOFFMAN. I just suggest you call Mr. Redwine and have him tell you what he told Gabriel, about if they got possession of the mine they could bankrupt the McDonalds.

Senator NEUBERGER. You said the other day in your testimony that you took complete responsibility for this decision.

Mr. DAVIS. That is right.

Senator NEUBERGER. You and you alone made it and you accept that responsibility. I think you said that in effect. In addition to Mr. Ellsworth, did any other Member of the Congress of either House ever contact you personally by letter, interview you in person, or by telephone concerning these claims?

**Mr. DAVIS.** I don't remember anyone else, Senator.

**Senator NEUBERGER.** Only Congressman Ellsworth.

I want to ask you again about Mr. Hattan. Do you think it somewhat curious that only in this particular case has Mr. Hattan's, let us say, judgment and fairness been questioned?

**Mr. DAVIS.** I don't know whether that's true or not. I don't know how many times his judgment has been questioned.

**Senator NEUBERGER.** Inasmuch as you said that you had reached the conclusion that he was obviously hostile, did you not make an effort to check his professional record with a bureau of your own Department?

**Mr. DAVIS.** We went over this the other day. I was allowing this record in large part to speak for itself, and that is what I have done. I want to repeat again that I do not think Mr. Hattan was improper, was prejudiced in the bad sense of that word. I have some doubt whether I was the one who originally used the words "obviously prejudiced," but whether I was or not all I want to point out here is that in his own report the fact that he brings out the watershed point, the resources point, the thinking of that memorandum is along the line of these cases in the Interior Department which undertook to, I think, rewrite the law and determine for the Department what was the best use of the land. I think that general thinking is a little bit apparent in all of these things. You can call that prejudice. You can call it a predilection for a certain viewpoint. You can call it a political or economic philosophy. You can call it any of those things, but I have a feeling it is visible, and then when you couple with that the record that was before me, that it was Mr. Hattan who had called the attention of the Forest Service to the fact that they hadn't filed a protest, to the fact that he was in a dual capacity, representing Land Management, but also being hired by the Forest Service to make this, again I say those are just the sort of things that do not establish complete confidence.

**Senator NEUBERGER.** In other words, you feel that some of the things which he introduced into his reports were not germane?

**Mr. DAVIS.** I think that is so.

**Senator NEUBERGER.** Did you think that the material introduced into Mr. Appling's report about improvements which were not even on the contested claims was germane?

**Mr. DAVIS.** Well, that takes you up to the common improvement question.

**Representative HOFFMAN.** Mr. Chairman, point of order.

What about that 19 minutes that remained? It has been exhausted.

**Senator SCOTT.** Give him time and he will get in what he has to do.

**Senator NEUBERGER.** I beg to differ with you.

**Representative HOFFMAN.** Go ahead. I do not care personally.

**Senator NEUBERGER.** We started at 3:35 by the clock.

**Representative HOFFMAN.** I will withdraw it. Go ahead. Go ahead. I love to hear you talk.

**Senator SCOTT.** Fifteen minutes more.

**Representative HOFFMAN.** Seven minutes over.

**Senator NEUBERGER.** Mr. Jonas made the point that whoever put the improvements on the claims, whether present owners or past owners, that had no bearing; is that not correct?

**Mr. DAVIS.** I think that's right.

Senator NEUBERGER. Is it not true that you yourself in your testimony the other day, however, introduced the matter of improvements where you said, "It seems to be generally considered that there is somewhere from \$150,000 to \$250,000 of improvements on these various McDonald claims"? Is it not a fact that you brought that up? Was it not you who introduced that in the matter?

Mr. DAVIS. That's right.

Senator NEUBERGER. And you agree that that has no bearing either on whether you grant patent. That has no bearing on whether there is timber.

Mr. DAVIS. Just a minute. That isn't quite an accurate statement either. The improvements on mining claims, just to state the rule, and not get into an argument about these, but the improvements on mining claims may very well be a centralized improvement looking toward the development of other claims than the ones on which the improvement is necessarily located, so it is germane.

Senator NEUBERGER. Mr. Hattan spoke in his report, and Mr. Jonas quoted it, about the centralized mass which he found.

Do you think he was reliable in commenting on that?

Mr. DAVIS. As a general statement I would think so.

Senator NEUBERGER. In other words, is it not true that whenever Mr. Hattan says something that might be favorable to the claimants you take him as reliable; when he says something that is not favorable to the claimants you find that he is obviously hostile?

Mr. DAVIS. Well, I think that's a pretty unfair statement, Senator, but I'll pass it.

Senator NEUBERGER. I think the judgments that have been passed on Mr. Hattan today and on previous days are grievously unfair. You have admitted that you have not even consulted his record and his personal file in your Department. Yet you have overruled this veteran career employee and you have certainly cast a doubt on his fairness and professional competence, so if the question of unfairness is going to be brought up I think that should be stated for the record.

Representative HOFFMAN. Is that by way of a lecture, or one of the questions?

Senator NEUBERGER. I am about through, Mr. Chairman. I just wanted to ask one further question and the gentleman is yours.

I think one thing should be very, very clear for the record, Mr. Secretary, and that is this: Do you think you would have been better advised to have turned this all over to the Bureau of Mines to take samples and make an assay at the laboratory they chose rather than to designate the very limiting procedure which you specified?

Mr. DAVIS. I don't think you should have had any different answer, Senator, and of course you get in there the very limiting procedure which I specified, and I still insist that that is not a very limiting procedure. It's simply to hear, I don't know how, but I suppose a hundred assay houses in the United States, and everybody with a perfect freedom to pick one on which they could agree as to its competency and its fairness.

Senator NEUBERGER. You do not think you would have had a different answer?

Mr. DAVIS. You shouldn't have had.

Senator NEUBERGER. Do you agree that earlier samples assayed by the Bureau of Mines laboratory at Albany did show a different answer?

Mr. DAVIS. Well, there are seven of them here that do; yes, whatever that means.

Senator NEUBERGER. So there was a different answer at the Bureau of Mines laboratory?

Mr. DAVIS. There was a different answer on different sets of samples; yes, that's right.

Senator NEUBERGER. At the Bureau of Mines laboratory in Albany?

Mr. DAVIS. That's right.

Senator NEUBERGER. That is all, Mr. Chairman.

Senator SCOTT. Mr. Redwine.

Mr. REDWINE. Mr. Chairman, examination of the record shows that the Hattan report is not in and I suggest that it should go in at this time with the letters of transmittal.

Senator SCOTT. Without objection, they will be put in the record. Anybody who wants to look at them may do so.

(The letters and report referred to follow.)

#### DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT,  
REGION I, SWAN ISLAND STATION,  
Portland, Oreg., December 22, 1949.

Memorandum to: Director.

From: Regional administrator.

Subject: Mineral application, Oregon 0665, Oregon mineral survey, No. 879, Al Sarena Mines, Inc.

Attached hereto is one copy of a report prepared by Elton M. Hattan on the mineral application, and one copy of letter transmitting two copies of the report to the regional forester.

The land embraced within the application is all within the boundaries of the Rogue River National Forest.

JAMES L. DOYLE,  
Acting Regional Administrator.

DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
SWAN ISLAND STATION,  
Portland, Oreg., December 19, 1949.

Re Adjustments-Rogue River; Mining Claims; Mineral Survey No. 879; Mineral Application Oregon 0665.

Mr. N. J. ANDREWS,  
Regional Forester, United States Forest Service,  
Portland, Oreg.

DEAR SIR: Herewith attached is an original and one copy of a report prepared by Mr. E. M. Hattan, mineral examiner, about the field examinations and investigation of a mineral application for patent to a group of 23 lode mining claims filed by the Al Sarena Mines, Inc., H. P. McDonald, Jr., secretary-treasurer.

Also attached are papers pertinent to the application which were loaned from your files to assist in the investigation.

Sincerely,

JAMES L. DOYLE,  
Acting Regional Administrator.

DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
SWAN ISLAND STATION,  
Portland 18, Oreg., December 19, 1949.

**Re Adjustments—Rogue River; Mining Claims; Mineral Survey No. 879; Mineral Application Oregon 0665.**

Approved:

JAMES F. DOYLE,  
*Acting Regional Administrator.*

Mr. H. J. ANDREWS,  
*Regional Forester, United States Forest Service,  
Portland, Oreg.*

**SIR:** Your letter of December 15, 1948, requested our assistance in examining and making report on 23 mining claims embraced in Mineral Application Oregon 0665, Mineral Survey No. 879, in accordance with the system which has worked so successfully for you during the past 2 or 3 years. It was also requested that the examination be deferred until 1949 because weather conditions in the area made it impracticable to make such an examination during December.

A field examination was made of the group of claims during May 20-24, 1949, in company with Fred H. Altman, watchman at the mine, and samples were taken from each of the claims. The assays returned from the samples showed there was either no appreciable mineralization present, the assayer was in error, or the samples were not taken from the correct discovery places.

In order to forestall any possibility of error, Mr. H. P. McDonald, Jr., secretary-treasurer of the Al Sarena Mines, was contacted and arrangements were made for a reexamination of the claims beginning July 12, 1949. Mr. Wolfe of your office was also consulted and arrangements were made so that Mr. William C. Sanborn, mineral examiner from Forest Service Region No. 5, could also be present to assist in the examination.

The second examination of the claims was made July 12-15, inclusive, in company with Mr. Sanborn, Mr. McDonald, Jr., and his brother, Charles.

#### LAND STATUS

The claims are all situated within the Rogue River National Forest.

#### DESCRIPTION

The land embraced in the mineral application is known as the Al Sarena Mine, and is situated in northeastern Jackson County, sections 20, 21, 28, and 29 of township 31 south, range 2 east, west meridian. It is about 46 miles from Medford, 48 miles from Gold Hill, and 20 miles from the Crater Lake Highway at the mouth of Elk Creek. The first 15 miles of the road is semi-improved and along the water grade of Elk Creek. The last 5 miles is a steep, meandering forest road which was in very good condition.

The mine is situated on the slopes of a heavily timbered ridge and within the Rogue River watershed. The trend of the ridge is generally S. 15° west; its greatest elevation being about 4,200 feet above sea level at the north edge of the property and decreasing to about 3,900 feet at the south edge of the property. A tributary of Elk Creek, shown on the mineral survey plat as East Fork, is situated on the east toe of the ridge. It is approximately 700 feet in elevation below the ridge. Swanson Creek, another tributary of Elk Creek, is situated on the west side of the ridge. Its elevation is approximately 300 feet below the ridge. Both of these creeks flow southward.

The history and facts leading up to the present ownership of the mine are set forth in the application for patent and need not be repeated here. There is also a short description of the mine under the subtitle Buzzard Mine on page 131, United States Geological Survey Bulletin No. 893.

#### GENERAL GEOLOGY

A short description of the geology of the area may be found in the above-cited Bulletin No. 893, and also in a publication by the Oregon Department of Geology and Mineral Industries, Oregon Metal Mines Handbook Bulletin No. 14 C, volume II, section 2, page 195.

No intensive study of the geology was made except to note the general trend of known veins and determine in general the rock types exposed on or over the

surface of the individual claims. From an examination of the present underground development, and the various surface openings and rock outcrops, there appears to be a dome-shaped central mass, roughly 4,000 feet in diameter, which consists of volcanic breccias and rhyolite. Much of this mass of rocks is altered and bleached, and pyritized. Some of it, especially in the vicinity of the main vein, contains lead and zinc sulphide mineralization. These sulphides seem to be the carrier minerals for the gold and silver which are the principal values.

Outside of the central mass rhyolite, volcanic breccias, andesite, and other rocks—possibly phenolite andesite and/or dacite—are found outcropping. The geology of the outcrops indicates they consist of flows, dikes, and possibly sills and stocks. There is no known mineralization of value contained in the dacite or andesite rocks found on the surface, but some pyritization was noted in the volcanic breccias and some of the rhyolite.

There was no evidence of any great movement, folding or tilting, however, no bedding occurs in the rocks and this may not be entirely true.

#### MINERAL DEPOSITS

The mine development indicates there is one main mineralized vein structure and a possibility of there being 1 or possibly 2 more parallel mineralized veins. The main vein structure is in the central mass. It has a strike north  $41^{\circ}$  west, and its dip is vertical to  $85^{\circ}$  northeast. The country rock in the vicinity of the vein, consisting of volcanic breccias and rhyolite, is generally altered, bleached and pyritized. Some of the rock appears to be fresh, but generally, it is altered and intersected by many small seams, all of which contain disseminated pyrite.

The main vein has been explored and developed by two main levels, tunnel No. 1 at about elevation 3,675 and tunnel No. 2 at about elevation 3,450. Tunnel No. 1 is driven into the ridge from the Swanson Creek side and tunnel No. 2 from the Elk Creek East Fork side. They have been connected by step raises and stopes in the vein which average, according to reports, about  $2\frac{1}{2}$  feet wide. The application for patent indicates that ores to the value of \$30,000 to \$40,000 have been mined, milled, and sold, prior to April 1943; when development work in the mine was discontinued.

The main vein has also been explored in tunnel No. 5 on the Elk Creek East Fork side of the ridge and tunnel No. 6 on the Swanson Creek side, both at elevation 3,800, more or less. There are various cuts and trenches on the surface which indicate the surface trace of the vein.

Tunnel No. 3 in the southwest corner of the Telluride claim and tunnel No. 4 on the lode line of the H. McKenzie claim appear to be mineralized zones more or less parallel to the main vein. Little work has been done along these zones and they may be nothing more than local mineralizations. It was reported that a pocket of dendritic gold was found in tunnel No. 3. The main vein appears to be a zone of enrichment which is from 3 feet to possibly 100 feet wide. Mining by stoping between the two levels, tunnels Nos. 1 and 2, from 1939 to April 1943, was confined to a narrow width. About tunnel No. 1, where mining was carried on many years ago, the apparent higher grade portion of the vein is defined by definite walls which are caused by narrow parallel gouge seams. The distance between the walls of this old stoped area was estimated to be  $2\frac{1}{2}$  feet. Although the ground in either direction from the higher grade zone is mineralized to an unknown distance, samples indicate its grade is low. Apparently the mining in years past, as well as pilot milling tests carried on from 1939 to March 1945, was confined to the narrow width, because the grade was not sufficiently high to warrant mining and milling the material in small scale operations.

The main vein is intersected by a north-south fault-vein, which cuts the vein and offsets it. The offset was reported to be about 30 feet. This fault-vein, discussed as the North Drift in the application for patent, and reported in Oregon Metal Mines Handbook, Bulletin No. 14-c, "is composed of rhyolite breccia, from 3 to  $3\frac{1}{2}$  feet wide, together with a persistent narrow gouge seam. Walls of the vein are not as clearly defined as those of the main vein and the accompanying gouge does not contain such a large amount of sulphides. This vein is apparently a fault fissure and contains circulating water." Samples were taken by the applicant company and assayed and the vein was found to carry appreciable amounts of gold and silver.

The drift on this fault-vein is plotted incorrectly on the mineral survey plat. It is shown on the plat as having a direction approximately north  $45^{\circ}$  east. Its direction is about north  $4^{\circ}$  west, as determined from a map supplied by the

applicant. The fault-vein is also intersected by a southwest crosscut driven in the Mark Applegate claim. This crosscut was driven from tunnel No. 2 for a distance of 160 feet. It intersects the Mark Applegate northeast end line about 135 feet from its corner No. 3. It intersected the fault-vein at a distance of 110 feet from its initial point.

Mr. D. Ford McCormick, mention of whom was made in the application for patent, stated in a report to the applicant company, that, "Practically the entire mass of so-called rhyolite is mineralized. Pyrite and pyrrhotite with some galena and sphalerite can be detected with a lease occurring as crystals or small grains, sometimes thickly grouped, then again scattered. Where the stringers occur the values rise. Shattered zones and banded structure also show higher values." McCormick, in quoting Otto Ellerman's findings, says that where fine grained galena is present the values are highest. McCormick also reported in a report dated July 15, 1937, to the company, that samples from outcrops, from numerous places, over the claims showed mineralization without exception. Small crystals of pyrite, pyrrhotite, galena and sphalerite are present, scattered more or less through the rock. At some locations narrow stringers occur with kaolin gouge containing a higher proportion of small grains of galena, and where this occurs high grade gold and silver samples are found. Where the stringers and fissures are numerous, the enrichment makes milling ore.

He went on to say that insufficient developments have been done to prove a large body of milling ore; several blocks of \$4 to \$5 ore are indicated, and some higher values are present; but aside from one possible zone (roughly 400 feet long by 400 feet high, with varying widths from 3 feet to 50 feet or more) only partially developed, practically no other work has been done to more than expose small areas with promising assays.

McCormick went on to say that the property has additional advantages of promising a large volume of low-grade ore, if sufficient enriched zones, similar to the one the present work has been done in, can be established. And says, if the samples assayed and listed as handed to me and shown on the attached sheets and blueprints are correct, there are several excellent showings that should be investigated without delay. He suggested investigating the region around tunnel No. 3; the cliff and banded structure south of tunnel No. 5, both at the crest and below where excellent samples are shown; the region near the portal of No. 1 tunnel; and shafts, channels, and tunnels on the west side and north of tunnel No. 1. He stated that if these locations show good assays, there would be little doubt but that important mining operators would show a decided interest in the development of the Al Sarena Mine. Then goes on to say that there is not sufficient exposure of milling ore at present to warrant the consideration of a mill other than a pilot mill, and from a study of the assay map, it does not appear as though there is any hope of operating profitably a 50- to 75-ton mill continuously from ore to be mined from the available stopes at the present time.

As far as could be determined the suggestions about investigating the certain areas named above were never carried out, and no other highly mineralized areas or veins were investigated other than those already known, when McCormick's report was written. The ore which was put through the pilot mill came from stopes on the main vein, some material taken from the southwest crosscut in the Mark Applegate claim driven from No. 2 tunnel, and from the north drift which was advanced about 230 feet from the No. 2 tunnel, on the strike of the above-mentioned fault vein.

Concentrates made by the pilot mill which was operated from 1939 to March 1943 were shipped to the American Smelting & Refining Co.'s Selby smelter. From one of these shipments which were concentrated 20:1, the metallurgist calculated the average value of the mill heads for that particular shipment. The per-ton mineral content of the mill heads, which would be the mine run, was calculated to be: lead, 0.58 percent; zinc, 1.23 percent; gold, 0.032 ounces; and silver, 0.79 ounces. The value of this material in dollars and cents, based on present prices: gold, \$35; silver, 71 cents; lead, 15 cents; and zinc, 10 cents, is \$5.88 per ton.

#### PILOT MILL TESTS

A pilot mill was constructed by the company and tests for a metallurgical flow sheet were conducted from construction until about April 1943, when the mill was closed down because of inability to secure needed materials and labor. It was reported that the tests showed the feasibility of concentrating the ore on a 20 to 1 ratio with good recovery and separation of the minerals into four products, i. e., lead, zinc, and iron sulfide concentrates, and tails.

The lead and the zinc concentrates contain the greater portion of the gold and silver, but a small amount of these precious metals comes down with the iron sulfide concentrate. The iron sulfide, when separated from the lead and zinc sulfides by gravity concentration, can be cyanided and any values in gold which it does contain can be recovered. It was found, however, that this is a fairly expensive process because of a tendency of the concentrates to slime.

The pilot mill was constructed to determine if the ores could be concentrated, but no information was available which would show the minimum grade of material which could be mined, concentrated, and sold at a profit. Whether an operation is large or small there is obviously a low point in grade of material which can be handled through any mill at a profit.

The indications are that the central mass is all mineralized to some extent, and if the prospective parallel shear and mineralized zones should prove to be extensive in length and depth, the possibilities are good that the whole mass could be developed, mined, and milled at a profit by low-cost, large-scale mining methods. The topography is such that any 1 of 3 methods might be employed, i. e., glory holing, shrinkage system, and open-pit mining.

#### MINERAL DISCOVERY CLAIMS

The applicant company supplied one copy of its available assay maps. These maps show that a large number of samples were taken and assayed prior to 1937, and as well, numerous other samples were taken and assayed up to the time operations ceased. The old pulps were still on hand and two such pulps were taken and assays made of them for a check on the results shown on the maps. Samples were also taken to check the sampling. The results of the check samples and assays show that in general, the assays shown on the maps may be assumed to be correct. The stopes from which ore was mined for the pilot mill are all within the boundaries of the H. McKenzie claim. The fault vein described above, is situated in both the H. McKenzie and the Mark Applegate claims.

Mr. McDonald, Jr., stated that he had complete confidence in the assaying ability of Abbot A. Hanks, Inc., of San Francisco, Calif., as an assayer. The questionable results reported by Annes Engineering Co., Grants Pass, Oreg., on samples left there for assaying, were checked by sending two pulps of sample rejects to Abbot A. Hanks for a confirmatory assay. The results obtained were the same in each case.

#### H. M'KENZIE CLAIM

The calculated value of the ore in the stopes on this claim is from \$3 to \$20 per ton. The calculated value of mill heads made from one shipment of concentrates, which was described above, was \$5.88 per ton.

#### MARK APPLEGATE CLAIM

The southwest crosscut from No. 2 tunnel is extended into this claim and therein intersected the north-south fault vein. The average value of 2 sets of samples taken from this crosscut and shown on the applicant's assay map was \$1.74 for 18 assays in 1 group and \$2.85 per ton for 19 assays in another group. The assays range from \$0.57 to \$14.14 value in gold and silver per ton. Two groups of samples taken in the fault vein, but within the boundaries of the H. McKenzie, average \$4 for 9 samples and \$1.68 for 11 samples. The indications are that commensurate values may be found within the fault vein in Mark Applegate's ground.

#### A. W. DAHLBERG CLAIM

No. 2 tunnel portal is on this claim and the tunnel intersects several hundred feet of the ground. The assay maps show that two samples were taken in the main tunnel at the crosscut which is about 40 feet from the portal. The average value shown is \$9.47 per ton in gold and silver. A group of 5 samples are shown to have been taken at the turn in the tunnel which is about 450 feet from the portal; the average value of those 5 samples was calculated to be \$5.83 per ton in gold and silver.

#### PETER APPLEGATE CLAIM

The assay map shows that a group of 4 samples was taken near the portal of No. 1 tunnel; the average of these 4 assays is \$3.95 per ton in gold and silver. They range in value from \$0.34 to \$7.92 per ton. The rock is considerably sheared

in this vicinity. Also on the map is shown a single assay of \$3.19 per ton. The sample was taken from a point in the tunnel which is 420 feet from the portal and in a vertical shear zone.

#### ORO REAL CLAIM

The No. 8 tunnel shown on the survey plat was evidently driven to try and intersect the main vein on its northwest course. The rock is light gray altered rhyolite containing disseminated pyrite. Applicant's samples Nos. 834 through 837 have an average assay value of \$1.07 per ton.

A sample was cut from the side of the wall in the tunnel at a distance 5 feet from the portal. This sample was assayed by the Annes Engineering Co., Grants Pass, Oreg. The result was gold, trace; silver, trace. A trace in gold means the value is less than 17 cents per ton, and a trace in silver means the value of that metal contained in the sample is less than 7 cents per ton.

Heretofore in this report when Annes Engineering Co. is referred to, it will be shown as AEC.

#### ORO RICO CLAIM

The improvements on this claim all situated within 250 feet of the southeast end line. The most extensive work was found in the improvement marked "tunnel" on the survey plat. On the applicant's maps this tunnel is designated "tunnel No. 9." A crosscut to the left inside the tunnel portal, intersected and followed a vein structure which has a strike N. 42° W., and dips 74° toward the northeast. The vein structure was about 28 inches wide and shows movement and gouge on the footwall. The wall rock, as well as the vein and gouge, contains disseminated pyrite and pyrrhotite. A sample was cut across 28 inches in the vein structure and taken by Mr. Sanborn to Abbot A. Hanks, Inc., 624 Sacramento Street, San Francisco, Calif., for assaying. The assay report shows the sample contained \$0.70 in gold and \$0.34 in silver, total \$1.04 per ton. Geologically, the vein may be on the extension of the main vein.

The contact between andesite and rhyolite is a short distance up the slope from the tunnel. This contact is probably the northwest limit of the above-described central mass of volcanic breccia and rhyolite.

#### ORO ALTO CLAIM

The whole surface of this claim, northwest of the road which crosses it, is andesite. The discovery shaft is in nonmineralized andesite. Down the steep slope from the road in the southeast corner of the claim, three of the improvements listed in "Improvements" were found. Highly altered rhyolite and andesite were found in these cuts. They are apparently on or near the contact of the central mass and an andesite flow.

On May 20, 1949, a sample was cut from a freshened surface at the end of the largest cut. It was taken to AEC for assay and the results were gold, trace; silver, trace.

On July 12, 1949, a second sample was taken from the same cut. On this occasion, the cut was extended and a hole was dug in the face to get more depth. The sample was cut by Mr. Sanborn and taken by him to Abbot Hanks in San Francisco for assaying. The results were gold, \$3.32 per ton; silver, \$0.05 per ton; total, \$3.37 per ton.

The applicant's sample submitted with exhibit I of the application for patent indicates a value of \$1.75 per ton.

#### COUGAR CLAIM

The improvements along the centerline of the claim disclose highly oxidized, leached, and broken rhyolite. On May 20 a sample was cut from the material exposed in the discovery shaft and taken to AEC for assay. The results reported were gold, trace; silver, trace. A solid outcrop of rhyolite was found exposed at a place about 150 feet north from the discovery shaft. A sample was picked from the outcrop and taken to AEC for assay. It also assayed gold, trace and silver, trace.

On July 13, the second visit to the property, a sample was cut from an outcrop of rhyolite exposed in a road cut which is 75 feet north from the centerline of the claim. This sample was taken by Mr. Sanborn to Abbot Hanks for assay and the results were: gold, \$0.17 per ton; silver, none. A second sample was taken by a representative of the applicant from the wall of a small tunnel, shown on the survey plat to be situated on the south side of the

the claim. This sample was also taken by Sanborn to Abbot Hanks. The reported assay results were: gold, trace; silver, none.

Abbot Hanks reports that a reported trace in gold is less than \$0.17 per ton and trace in silver is less than \$0.01 per ton.

#### J. W. MERRITT CLAIM

All of the improvements in the centerline of this claim are below the forest road and all exposed fragmental rocks, volcanic breccia or rhyolite. These rocks are all highly oxidized and there was little visual evidence of any mineralization.

On May 20 a sample was shipped from the face of the discovery cut. The material was very hard and brecciated but showed some iron staining. This sample was taken to AEC for assay and the returns showed: gold, trace; silver, trace.

On July 12 a second sample was taken in the face of the same cut by Mr. Sanborn. He took the sample to Abbot Hanks for assay and the returns were: gold, \$0.35 per ton; silver, none. An outcrop of banded rhyolite was found in a road cut which is situated 85 feet southerly from the northeast end line of the claim. A sample of the rock which showed pyrite mineralization was cut and taken by Mr. Sanborn to Abbot Hanks for assaying. The returns were: gold, trace; silver, none.

#### HENRY APPLIGATE CLAIM

The discovery shaft situated at the extreme northeast end of the claim is on the west slope of a very steep ridge. The material exposed is leached, highly oxidized material, probably rhyolite. In May 1949, a sample was cut from the material exposed in the shaft and taken to AEC for assay. The results reported were: gold, trace; silver, trace. At a point 75 feet west from the discovery shaft an outcrop of fairly fresh rhyolite containing some pyrite was found. This was also sampled and the sample taken to AEC for assaying with the same results as just described.

During the July visit to the property, Mr. Sanborn cut a sample from an outcrop of highly siliceous, light-gray feldsite which was found on the slope of the mountain. The outcrop is situated 200 feet in a S. 30° W. direction from No. 2 corner of the claim. The sample was taken to Abbot Hanks for assaying and the results reported were: gold, trace; silver, trace.

#### DELIA M'KINNON CLAIM

The rock exposed in the discovery cut and along the road near cut No. 5, described in the statement of improvements, is a volcanic agglomerate or breccia, which is very compact and hard. There is also some rhyolite exposed in the road cuts in the southwest portion of the claim.

During the May visit to the property a sample was taken from face of the discovery cut. It was assayed by AEO and the results reported were: gold, trace; silver, trace.

During the July visit Mr. Sanborn, along with representatives of the applicant company, cut a sample from the same kind of rock which is exposed in cut No. 5 which is listed in the statement of improvements. This sample was assayed by Abbot Hanks and the results reported were: gold, trace; silver, none.

Subsequent to the second visit, Mr. McDonald stated in a letter that he went back to the discovery cut and cut another sample which he took to Abbot Hanks for assaying. The assay results reported by Abbot Hanks under laboratory sample No. 9846, dated August 3, 1949, were: gold, \$4.20; silver, trace.

#### RAYNBOE CLAIM

This claim overlies a ridge which intersects the claim in a diagonal direction from near corner No. 4 to a point about 175 feet northeast from corner No. 2. The rock found along the ridge is dark colored and contains phenocrysts of feldspar. When oxidized, it is granular and contains very little quartz. The rock exposed in the discovery cut which is on the east slope of the ridge resembles andesite breccia or agglomerate. It is brecciated, hard, contains phenocrysts of feldspar, some sanadine, andesite, and possibly some rhyolite which may be the cementing material.

During the May visit a sample was cut from the rock exposed on the ridge at a point about 200 feet N. 5° W. from corner No. 2. The sample, when assayed by AEC, was reported to contain: gold, trace; silver, trace. The discovery cut did not show evidence of mineralization and a sample was not taken at that place.

Upon the July visit a hole was dug about 30 feet south of the last described sample, through some weathered surface material to expose the underlying rock and a sample was cut from the rock by Mr. Sanborn. The assay results, reported by Abbot Hanks, were: gold, trace; silver, none. The face of the discovery cut was also cleaned off by the applicant's representatives and Mr. Sanborn cut a sample of this material. The assay results, reported by Abbot Hanks, were: gold, trace; silver, none.

Subsequent to the second visit, Mr. McDonald stated in a letter that he had taken two samples from the vicinity of the most westerly corner of the claim. The laboratory number of the samples taken to Abbot Hanks for assaying were Nos. 9843 and 9844. The results reported on a copy of the assay certificate were: For 9843; gold-\$2.45/ton, silver-\$0.11/ton, and for 9844; gold-\$0.70/ton, silver-trace. From the description accompanying a letter dated August 19, 1949, from Mr. McDonald, sample No. 9843 was taken from a rock outcrop situated approximately 175 feet south of the most northerly claim corner (presumably corner No. 4); sample No. 9844 was taken from an outcrop situated approximately 75 feet south of the same corner.

There has been no opportunity to check these samples. The agents for the applicant company were called upon for all information on the date of examination which would indicate the mineral character of the land. Since the above outcrops were not known at that date, it appears that the claim was a location without discovery when patent was applied for, and even on the date of examination.

#### TELLURINE CLAIM

The rock found outcropping on this claim is practically all rhyolite except for an area of about 1 acre in the southeast, near corner No. 2, which is andesite.

The discovery cut exposes the rock formation which is considerably oxidized. Mr. Altman, a representative of the company, advised that a better and more representative sample could be had from the No. 4 tunnel, the major improvement within the limits of this claim. The material on the tunnel dump contained visible pyrite and pyrrhotite, and the walls of the tunnel showed disseminated iron sulphides. A sample was cut by Mr. Altman from the east wall of the tunnel, right at the turn, which is approximately 42 feet from the portal. The assay results reported by AEC were: gold-trace, silver-trace.

It was alleged by the applicant's agents, McDonald Brothers, that two samples had been taken from this tunnel. The results of assays of these samples are contained in D. Ford McCormick's report on the property made in 1937. The samples are listed as number 78 which was taken from the end of the tunnel, and number 79 which was taken at the turn in the tunnel. The assay returns reported for sample 78 were: Gold-0.30 oz/ton and silver-1.0 oz/ton. The returns for sample 79 were: Gold-0.10 oz/ton and silver-2.0 oz/ton. The results in dollars and cents would amount to: Sample 78: Gold-\$10.50, silver-\$0.90, total-\$11.40/ton; sample 79: Gold-\$3.50, silver-\$1.80, total-\$5.30/ton. The indications would be that the extension of the main vein is intersected at the end of the tunnel.

#### SULFIDE CLAIM

Rhyolite or volcanic breccia is exposed over most of the area of this claim which lies north of the East Fork Elk Creek, shown on the plat, but the area south of the creek is all andesite.

All of the improvements listed in the statement of improvements made by the mineral surveyor were found and all, except cut No. 9, which is in fresh andesite rocks, were excavated in loose oxidized rhyolite material. The improvements are all along the foot of the steep mountain slope and, consequently, the material overlying the bedrock is considerable.

The improvement shown as shaft No. 2 is actually a cut which exposes clay like material and loose rhyolite rock fragments. After digging a hole about 24 feet deep in the bottom at the face of the cut, rhyolite rock in place was encountered.

During the May visit the bottom of No. 6 improvement shaft was cleaned out and a sample was taken of the material. The material was compact laterite

and solid rock in place was not found. The results or the assays reported by AEC were: gold—trace, silver—trace.

During the July visit to the property, a sample was cut from the rock in place uncovered in the hole described above in the No. 2 improvement. The sample was assayed by Abbot Hanks and the results reported were: gold—none, silver—trace. At a point about N. 75° E. a distance of 350 feet from corner No. 3, an outcrop of rhyolite is exposed in a cut on the water ditch which conveys water to the mill. This sample contained some iron sulphides and was taken to Abbot Hanks for assaying. The results reported were: gold—trace, silver—none.

Subsequent to the reexamination of the property in July, the MacDonald brothers took one additional sample on this claim. The sample was taken from the side of the mill water ditch at a place which is N. 65° E. a distance of 30 feet from corner No. 3. The sample was taken by them to Abbot Hanks in San Francisco for assay. The results, under laboratory No. 9845, as shown on a copy of the assay certificate, dated August 3, 1949, were: gold—\$1.05/ton, silver—trace.

The location of this alleged sample has not been checked. On the date of examination it was not known, consequently, the location was without a valid discovery upon the date of application for patent.

#### MANGANESE CLAIM

The rock exposed in and around the area of the discovery cut appears to be dacite or a rock type closely related. The only area covered by rhyolite which could be identified as such, lies west of the creek channel.

In May a sample was cut from a fresh face of rhyolite found in a 12-foot high bank on the west side of the creek and at a distance of about 250 feet from the southwest end line of the claim. The results of the assay by AEC were: gold—trace, silver—0.12/ton.

During the July visit a second sample was cut from this same location by Mr. Sanborn and taken to Abbot Hanks for assay. The results reported were: gold—trace, silver—none.

#### ORO ESCONDIDO CLAIM

With the exception of a small area of rock given the field name andesite porphyry and situated in the southwest corner of the claim, the remainder of the claim is covered with a dense, dark-gray andesite. The discovery cut exposes nonmineral andesite.

In May a sample was taken from a cut shown on the survey plat at a point about 35-feet northeast of corner No. 3. The sample was assayed by AEC and the results reported were: gold—trace, silver—trace.

During the July visit to the property, a second sample was cut from the same location by Mr. Sanborn who took it to Abbot Hanks for assaying. The results reported were: gold—trace, silver—none.

#### J. L. GRUBB CLAIM

An area of about 300 feet in diameter surrounding the discovery cut is apparently volcanic breccias and platy rhyolite. There is a small area of rhyolite exposed at the west end of the claim. Andesite rock covers the remainder of the claim.

During the May examination a sample was taken of the material exposed in the bottom of the cut which is shown on the survey plot to be N. 4° W., a distance of 260 feet from corner No. 2. The sample was taken to AEC for assay and the results reported were: gold trace, silver trace. A second sample was taken at this time of leached and highly oxidized volcanic breccia exposed in the discovery cut. The reported results on this sample were also: gold trace, silver trace.

On the occasion of the July visit, the discovery cut was deepened in an attempt to secure fresher rock. The rock exposed was fine grained rhyolite, like felsite, and the sample was taken of the material which was hard and tough. The assay results, reported by Abbot Hanks, were: gold trace, silver none.

#### W. C. LEEVER CLAIM

The rock formations found on this claim appeared to be intermingled sills, flows or dikes of rhyolite, andesite and related rocks.

During the May examination a sample was taken at the discovery cut which appeared to be oxidized rhyolite. Within 20 feet of this cut the rock is andesite. A second sample was taken of a surface cropping of rhyolite which was found on a ridge about 500 feet southwest of the northeast end corner. These samples were assayed by AEC and the results were the same, i. e., gold trace, silver trace.

During July, with the assistance of the McDonald brothers, an outcrop of rhyolite rock was found at a place about 800 feet distant in a N. 50° E. direction from corner No. 1. This sample was assayed by Abbot Banks and the results reported were: gold trace, silver none.

#### J. D. M'KINNON CLAIM

In the vicinity of the discovery shaft there is a small area of rhyolite or related rocks exposed. The remainder of the claim is covered with andesite rock.

During the May examination a sample was cut from the material found in the bottom of the shaft. It was highly weathered rhyolite. The assay results reported by AEC were: gold trace, silver trace.

On the occasion of the July visit, the bottom of the shaft was cleaned out and a channel sample was cut by Mr. Sanborn across the bottom of the shaft. The material uncovered was fine grained rhyolite which shows flow structure and was highly oxidized. The assay results, reported by Abbot Hanks, were: gold trace, silver none.

#### ALABAMA CLAIM

Practically the whole area of this claim is andesite. There is, however, a very small area of rhyolite exposed in an outcrop which is situated on the southwest end line, and northwest 125 feet from the discovery cut.

During the May visit to the property, a sample was cut from this outcrop. It was taken to AEC and the assay results reported were: gold—trace, silver—trace.

During the second visit in July, Mr. Sanborn with the assistance of McDonald brothers, cut another sample from the outcrop. This sample was assayed by Abbot Hanks and the reported results were: gold—trace, silver—none.

Subsequent to the second visit to the property, the McDonald brothers have reported that they cut another sample from the same outcrop. This sample was taken by them to Smith-Emery Co., assayers and metallurgical engineers at Los Angeles, Calif., for assaying. An original assay certificate has been submitted which shows the assay results to be: gold—\$2.10/ton, silver—nil.

The outcrop is probably very near the contact of the central mass with the outlying andesites and other rock types. And, therefore, any ground east of the contact would be of little value for mining purposes even though the values were considerably higher than \$2 per ton. In this case, there is some doubt as to whether the outcrop will actually run \$2.10/ton in gold. The previous two assays are in agreement and show the value in gold to be a trace which would be less than \$0.17 per ton.

The material exposed by the discovery cut is oxidized, crumbly andesite. The cut is situated on the southeast end line of the claim. Rhyolite rock outcrops on the slope about 40 feet southeast of the discovery shaft which is Telluride ground.

#### STAPLES CLAIM

The rock found outcropping and in the various cuts on this claim is andesite. No indications of any mineralization were found in the claim. Exhibit 1, accompanying the application for patent, indicates that a sample was taken on the East Branch of East Fork Elk Creek, 40 feet from the southwest corner No. 3.

In May, this place was visited and examined. There is no rock in place on the surface within 40 feet of the corner. Upstream from the corner a distance of about 150 feet there is a bank of andesite agglomerate or breccia. A sample was cut from this material and taken to AEC for assay. The results reported were: gold—trace, silver—trace.

On the occasion of the second visit, the representatives of the applicant company had no further suggestions to offer as to a possible mineral discovery.

## LA JOLLA CLAIM

A creek in a small ravine enters this claim at the northeast end center. It traverses southwest past the two cuts shown on the survey plat, thence bears slightly more westerly and joins East Fork Elk Creek at a point about 450 feet upstream from the No. 3 corner Staples claim. Another creek in a small ravine enters the Arroyo Verde claim at a point 200 feet easterly from its corner No. 3; thence traverses northwesterly a distance of about 800 feet where it courses northwesterly across the La Jolla claim and empties into East Fork Elk Creek slightly downstream from the first-described creek.

The rock in the bottom of the creek on the La Jolla claim and near the discovery cut is probably andesite porphyry or a related rock. It contained iron sulfides and was light grey in color. The ridge between the two creeks appeared to be andesite porphyry or related rocks. The remainder of the claim area is unquestionably hard, fine grained andesite.

In May the discovery cut was found to be caved. A sample was cut of rock found in the bottom of the creek about 20 feet from the discovery cut. The rock exposed in the discovery cut appeared to be andesite while that in the creek bottom appeared to be rhyolite or a related rock and also showed some iron sulfides. The sample was taken to AEC for assay. The results reported were: gold—trace, silver—trace.

On the occasion of the second visit to the property, the McDonald brothers selected a place near the northeast end line on the south bank of the creek where there was an outcrop of andesite carrying much visible pyrite. This sample was cut by Mr. Sanborn, with the assistance of the McDonald brothers, and was taken by him to Abbot Hanks for assaying. The results reported were: gold—trace, silver—trace.

## ARROYO GRANDE CLAIM

The rock exposed at the discovery cut appears to be rhyolite or related rock. Due to the heavy forest cover of second-growth brush and timber and also apparent heavy overburden, no determination could be made of the nature of the principal rock underlying.

In May a sample was taken of the rock exposed in the discovery cut. It was taken to AEC for assaying and the results reported were: gold—trace, silver—trace.

On the occasion of the second visit, a second sample was taken of the rock exposed in the cut after excavating a small hole to a greater depth in the bottom of the cut. This sample, taken by Mr. Sanborn, was assayed by Abbot Hanks and the results reports were: gold—\$0.17, silver—none.

## EXPENDITURE OF \$500

Expenditures for improvements listed in the statement of expenditures accompanying the application shows expenditures, exclusive of a share in any common improvements, for each of the claims to be as follows:

Date of location	Claim name	Expenditure	Date of	Claim name	Expenditure
1939.....	Oro Alto.....	\$325	1897.....	Henry Applegate.....	375
1939.....	Oro Rico.....	1,675	1897.....	A. W. Dahlberg.....	500
1936.....	Cougar.....	820	1932.....	Telluride.....	1,040
1936.....	Oro Real.....	2,375	1934.....	Alabama.....	175
1897.....	J. W. Merritt.....	260	1933.....	Rainbow.....	490
1897.....	Peter Applegate.....	355	1897.....	D. McKinnon.....	525
1936.....	Oro Escondido.....	250	1934.....	Sulphide.....	630
1897.....	W. C. Leever.....	345	1934.....	Staples.....	275
1897.....	Mark Applegate.....	3,600	1932.....	Manganese.....	210
1897.....	H. McKenzie.....	875	1936.....	La Jolla.....	240
1897.....	J. L. Crubb.....	625	1936.....	Arroyo Verde.....	150
1897.....	J. D. McKinnon.....	300			

The Common Improvement No. 1 is a tunnel known as No. 2. Its elevation, according to maps supplied by the applicant, is a few feet greater than 3,400 feet above sea level. This tunnel with its laterals, crosscuts, drifts, stopes, and raises, was driven for the primary purpose of developing, exploring, and extracting ores from a vein which is almost exclusively within the boundaries of the H. McKenzie claim. Any information gained, such as intersecting unknown

mineralized seems or learning something about the geology of the ground and doing work which benefited any of the other claims in the original group of 10 claims, was purely incidental. The tunnel is at an elevation such that future exploration work might logically and feasibly be done from it. It is even conceivable that this improvement is of benefit to all the claims situated north of East Fork Elk Creek which is shown on the survey plat. For instance, a haulage tunnel driven from this development, even through the W. C. Leever claim, might be an economical project, if ore were found there.

On sheet 2 of the mineral survey plat, a copy of which is attached hereto, an approximate trace of the 3,400-foot contour has been made. It may be readily noted that it would not be good sense or good practice to drive an exploration tunnel from Improvement No. 1 into, for instance, the Alabama claim. If such an exploration was planned it would be done by a tunnel from the vicinity of Corner No. 3 of the claim, which is approximately the same elevation and thus save 1,800 feet of expensive tunnel work to accomplish the same object. It is inconceivable that this improvement could in any way benefit the exploration, development, or extraction of any ores which might at some future time be discovered within the boundaries of the Manganese, Sulphide, Alabama, Staples, La Jolla, or Arroyo Grande claims. In order to reach these claims at elevation 3,400 from tunnel No. 2, it would be necessary to construct a bridge.

Common Improvement No. 2, known as tunnel No. 1, would be of benefit to 8 of the 10 original claims located in 1897. The J. W. Merritt and D. McKinnon could not in any way be benefited because they are both lower in elevation than this tunnel level.

Common Improvement No. 3, known as tunnel No. 6, benefits only 2 of the 10 claims for the reason that the tunnel is at such elevation that it is above the surface of the other claims. Even though Common Improvements Nos. 2 and 3 are not applicable to all the claims, there appears to have been sufficient development work done in the No. 2 tunnel, the value of which, when added to the work credited on the individual claims, would exceed the amount of \$500 for all of them except the Manganese, Sulphide, Alabama, Staples, La Jolla, and Arroyo Grande. There appears to be no valid basis for apportioning any of the common improvement expenditures for the benefit of these claims.

Upon the copy of the mineral survey plat, sheet 2, which is attached, the approximate position of contour 3,400 has been traced, and as well, various places mentioned in the application for patent have been identified by like names. The north drift has been identified in solid red and the extension of the fault-vein has been dotted in red along its known south extension. The probable limits of the central mass has also been outlined in blue.

#### BONA FIDES

The Al Sarena Mining Co. is an Oregon corporation. Its officers are: H. P. McDonald, Sr., president; W. G. McDonald, vice president; H. P. McDonald, Jr., secretary-treasurer, all are residents of Mobile, Ala. The lode claims for which patent is sought were acquired by purchase or location by the applicant company. The company, in 1939, constructed a pilot mill and conducted tests of the material extracted from crosscuts, drifts, and stopes on or in the proximity of a vein containing gold, silver, lead, and zinc minerals. The pilot mill was closed down about March 1943 because of the difficulty in securing adequate personnel to operate the mine.

During the investigation no information was found which would indicate that the claims were being exploited for any use other than for mining purposes.

While the Forest Service had no accurate cruise of the timber embraced within the area of all the claims, the Oregon Metal Mines Handbook, page 197, states that "approximately 12 million board-feet of timber is estimated to be available on the mining claims." If the mine is developed and mined as contemplated, a large amount of timber will be necessary. In fact, it might well be to the advantage of the company to set up a sawmill on the property and produce the timbers which will be needed in such a large-scale operation. There is, of course, nothing to prevent the company, after patenting the claims, from mining the timber rather than the minerals.

#### PERTINENT DATA

The land embraced by this group of mining claims is timber land and highly suitable for the propagation of timber crops. The land also has an inestimable value as a watershed. The timber with its undercover, is the protector of the

watershed. When minerals are found on land of this kind and patent is sought, it is believed the mineral showings and prospective chances for successfully operating a mine should be thoroughly scrutinized.

Of the mining methods mentioned above, the central mass, being a low-grade proposition with suitable topography, could probably best be mined by the block-caving method. In any event, this method is the cheapest yet devised for large-scale mining of low-grade deposits. It is roughly estimated that the cost of mining with this method under average conditions would be about \$0.70 per ton at the mill. Thereafter, the material must bear the cost of milling, transportation, and smelting. The cost of milling is estimated at \$0.40 per ton.

The Alaska-Juneau Gold Mining Co. was, between 1934-37, one of the low-cost producers in large-scale mining of low-grade gold ores. The mining methods used in this mine were a combination of caving and shrinking. The cost of mining and milling over 12 million tons during these 4 years was: Mining, \$0.44 per ton; milling, \$0.29 per ton; other operating, \$0.07 per ton. Total cost, \$0.80 per ton. Present costs would necessarily be higher since cost of materials and labor is greater. By using as a basis these low actual costs for mining and milling Alaska-Juneau ores, it may readily be seen that in a disseminated ore body, any values less than \$0.80 per ton could not be successfully treated at present. Any future values which might be attached to such low-grade deposits would be purely speculative. If a value of \$0.80 per ton were found in a quartz ledge, for instance, there might be a possibility of finding greater values by advancing along the vein and a valid discovery would be indicated. In a disseminated body of low-grade minerals, if the average grade is not sufficient to justify the spending of time and money in its development, the land should necessarily be classed nonmineral in character. If this is not so, then ordinary rock containing the barest trace of precious or semiprecious minerals should be classed mineral in character and a patent granted. These things have been taken into consideration in the conclusions and recommendations which follow.

#### CONCLUSIONS AND RECOMMENDATIONS

The field examinations and investigations indicate that a valid discovery of minerals, such as to qualify under the statutes, has been made on the following lode claims:

Oro Alto	Oro Rico
Peter Applegate	Oro Real
H. McKenzie	Mark Applegate
A. W. Dahlberg	Telluride

It appears also that an expenditure of \$500 in improvements has been made on or for the benefit of each of the claims. It is therefore recommended that all of them be allowed to proceed to patent.

The field examinations and investigations indicated that the following named claims are invalid locations because of no discovery:

Henry Applegate	Cougar
J. W. Merritt	Oro Escondido
Rainboe	W. C. Leever
Sulphide	J. L. Grubb
Della McKinnon	J. D. McKinnon

It is, therefore, recommended that proceedings be directed against the claims on the following charges:

1. That the land embraced within the claims is nonmineral in character:

2. That minerals have not been found within the limits of each of the claims in sufficient quantities to constitute a valid discovery.

The field examinations and investigations indicated also that the following-named claims are invalid locations because of no discovery and because the expenditure for improvements on or for the benefit of each of the claims is less than \$500:

Manganese

Alabama

Staples

La Jolla

Arroyo Verde

It is, therefore, recommended that proceedings be directed against these claims on the following charges:

1. That the land embraced within the limits of the claims is nonmineral in character;

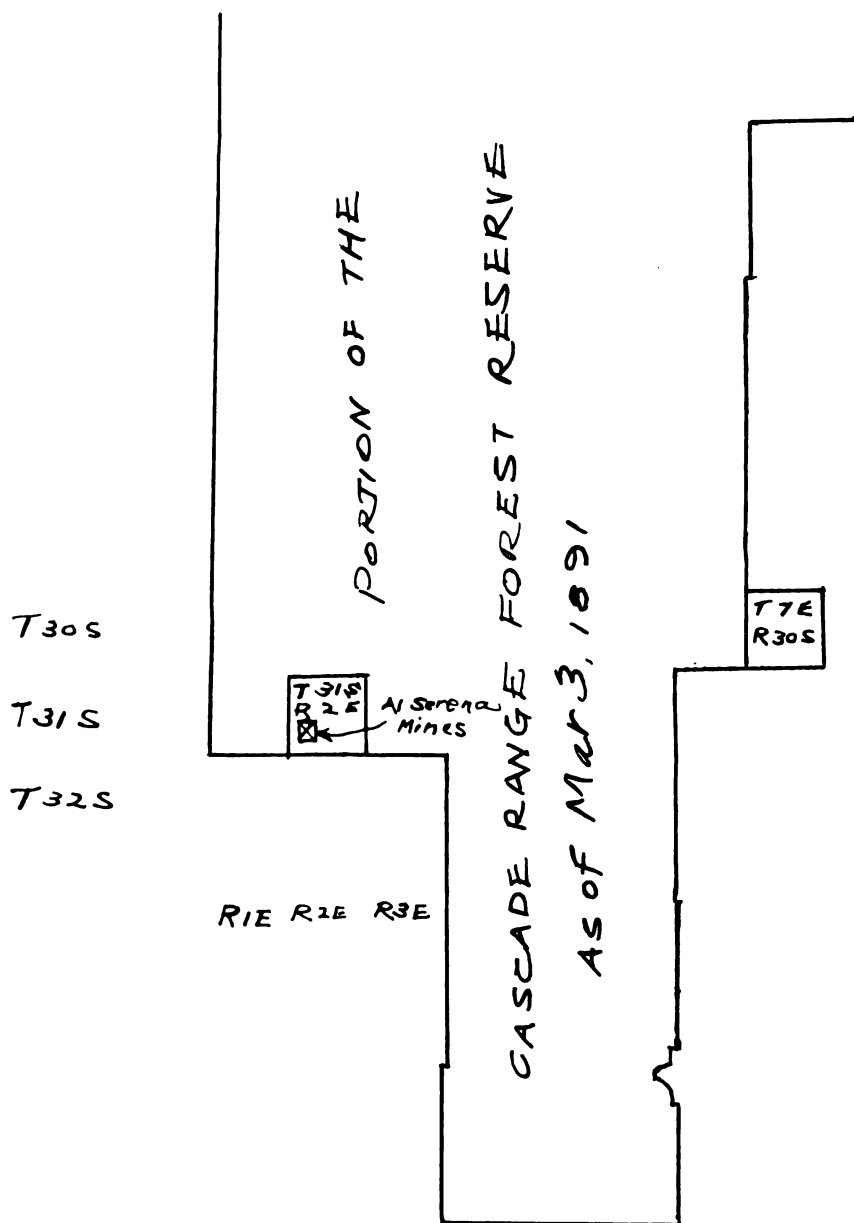

2. That minerals have not been found within the limits of the claims in sufficient quantities to constitute a valid discovery;

3. That an expenditure of \$500 for improvements has not been made on or for the benefit of each of the claims.

The information supplied by Mr. McDonald, subsequent to the second examination indicates a valid discovery may have been made subsequent to the patent application on the Sulphide, Delia McKinnon, and Rainboe claims. In view of this, and a probability the applicant will request additional time in which to perfect a discovery on the J. W. Merritt, Cougar, Henry Applegate, Sulphide, Delia McKinnon, and Rainboe claims, it is suggested that proceedings be directed against all claims as outlined above. In the event of a request for additional time in which to perfect a discovery; all claims can be reexamined at the same time.

Respectfully submitted.

ELTON M. HATTAN, *Mineral Examiner.*

Scale 1 inch = 12 miles

Representative JONAS. How about the surveyor's report? Are you going to put that in?

Mr. REDWINE. I believe that is in, Congressman. If it is not, we will see that it does go in.

Representative JONAS. Maybe it ought to go right after the Hattan report. They deal with the same subject.

Mr. REDWINE. That is a part of the application for patent. That is attached to it. I believe it is all in. If it is not and if the chairman does not object we will have the reporter put it in at that point.

Senator SCOTT. We will have no meeting of the committee tomorrow but we will try to have a meeting on next Tuesday at 10:30 in this same room.

(The Hattan report appears at p. 697.)

Representative HOFFMAN. Mr. Chairman, while they are looking for that I want to put on the record another objection. When we were at Idaho Falls, the Senate chairman was not there. The House committee chairman objected because I was reading papers. Now he is doing the same thing, reading newspapers. I want to either have him withdraw his objection to my doing it or I want to make an objection to his doing it.

Representative CHUDOFF. I want to say to the gentleman from Michigan that I am not reading the sports page as he was reading, but I am reading an article.

Representative HOFFMAN. It might be better if you would read the sports page.

Representative CHUDOFF. Sunday morning, January 29, Nashville, Tenn.

Senator SCOTT. Let us have order.

Representative CHUDOFF. Which article accuses the Head of the REA of trying to blackjack the cooperatives at their national convention from making certain resolutions which would be against the interests of the REA and said that, if they do no stop passing these resolutions he is going to cut off all help. That is what I am reading about, and I think it is important to this committee.

Representative HOFFMAN. I am glad you have recovered from your illness.

Senator SCOTT. I want to thank you, Mr. Secretary, for your time and patience, and your cooperation.

During your testimony, I have tried to refrain from interrupting you in the interest of time.

There are, however, several observations I would like to make in connection with your testimony.

I think all members of the subcommittees will agree with me that you have been a superb witness. Your record as a lawyer is above reproach, and your long years of public service are a tribute to your legal ability and the respect you command in the legal profession.

You stated in your testimony that the problems involved in the Al Sarena case are legal and not political.

I think you will agree that any legal act also includes attitude, point of view, philosophy, or whatever you want to call it. Legal acts cannot be separated from human nature.

Basically, then, this whole thing hinges on the attitude and philosophy that control legal acts.

I think you have every right to defend and promote your attitude and philosophy that led you to the decisions you made in this case.

But more important, regardless of how much you may justify in your own mind the course of action in this case, it is a matter of fact that your attitudes and philosophy are not standard procedure for everyone else. This is as it must be in democratic government.

As for myself, I am disturbed about the course you followed in accepting decisive information and data—upon which you based your final decision—from a Member of Congress.

I think this sort of practice is very unhealthy. I myself write many letters and make many visits to Government agencies concerning problems of my constituents. But, to me at least, it is a dangerous situation when Members of Congress become the chief source of facts and data upon which the executive branch of Government bases its administrative decisions. It is, in short, a shabby and shoddy way for Government to operate.

But again, it is a matter of attitude and philosophy, and I am certain that you consider it proper and correct, or you would not have followed the course you did.

I am also disturbed by the fact that you found it necessary to discredit and suspect career Government employees in order to defend your course of action. To say the least, such practices discourage efficiency and good morale among career Government employees. After both you and I have gone on, career Government employees will still make the day-to-day wheels of Government turn. These men, according to your testimony, never have had a hearing before you.

All in all, this whole case boils down to what practices and procedures are wise in managing our natural resources.

I am very grateful to you for giving us some insight into the procedures you used in this case and some understanding of your attitudes and philosophy in general.

It has been very helpful. We have learned a lot, and I want to thank you.

Representative HOFFMAN. Mr. Chairman, I have attended every one of these hearings ever since the 14th day of November last, except the one at Spokane where only the House chairman was present.

I want to know, in view of the fact that every member of the committee, and the staff, and the press received a copy of this statement, why I cannot have one. What is the idea?

Senator NEUBERGER. Here is one.

Representative HOFFMAN. I just do not like that kind of discrimination.

Senator SCOTT. I would like to say if you just stay in one pasture at one time we could get you these records.

Representative HOFFMAN. That does not make any difference. I have been around here long enough and you claim I have made noise enough so that I ought to be able to be identified by a member of the staff. It is just a part of the discrimination you gentlemen have practiced from the very beginning. You do not want me to know anything about it. You are afraid I might ask you some embarrassing questions.

Senator GOLDWATER. Mr. Chairman, just for the record, I want to be on record as not concurring with the erroneous statements just made by the chairman.

Representative HOFFMAN. And I want to concur in the statement made by the Senator.

Senator SCOTT. There seems to be agreement on that, that we do not agree.

Representative HOFFMAN. That is right.

Representative JONAS. I am trying to suggest that we call Mr. McCormick.

Representative HOFFMAN. They will call the witnesses they want.

Senator SCOTT. It is all right if you will call Mr. McCormick.

I certainly thank you again.

Mr. DAVIS. Mr. Chairman, I want to thank you for the kind preliminary words in the statement which you made. Of course I cannot subscribe to the conclusions which you draw. If I thought it were appropriate I would love nothing more than to take 5 minutes to adequately reply, but I do not think it is appropriate, so if you will excuse me I will leave.

Senator SCOTT. Mr. McCormick.

Mr. Hoffman, will you swear him in?

Mr. REDWINE. I believe you have already been sworn.

#### **FURTHER TESTIMONY OF D. FORD McCORMICK, MINING ENGINEER, EAGLE POINT, OREG.**

Mr. McCORMICK. That is correct.

Representative HOFFMAN. Mr. Chairman, I suggest the witness be permitted to make a statement if he has one.

Mr. McCORMICK. I have the following statement which I wish to read into the record.

Senator SCOTT. I will ask Senator Neuberger if he will take over, please.

Senator NEUBERGER (presiding). Please go ahead.

Mr. McCORMICK. Since the hearing held in Portland, Oreg., I have been trying to recall the sequence of events as they happened to me insofar as Al Sarena Mines is concerned. I would like to make a slight correction in my testimony when answering Senator Neuberger. It may not be of any importance, but there is one point not too clear in my recollection.

When asked by Senator Neuberger when I had first become acquainted with the Al Sarena Mine I replied that I thought it was about 1937. That is correct. It was known as the Buzzard Mine at that time. The roads and trails directing one to the mine were so marked.

To the next question, in effect, "Did you take a look at it?" I replied, "Yes, I did. I looked it over." That too was correct, but to the next question, "And were you paid by them?" I replied, as I remember it, "No, this was just a visit."

This statement could be in error. The year 1937 is a long time back and when thinking the matter over since the Portland hearing I seemed to recall that Dr. McDonald, Sr., not the boys who are carrying the load now, asked me to write him a letter or report on my observations.

I knew that it was after this visit in 1937, but possibly not until after I was employed by Mr. Haden, and possibly for him that I wrote an opinion. However, if I had written Dr. McDonald an opinion I certainly would have charged him a fee, since I was not under salary

to him then or any time afterward. The fee would not have been for more than \$100 or \$150 at that time.

I tried to verify the incident by looking into my old files and records, but we have moved several times since 1937 and each time have destroyed much of the surplus baggage and I could not find anything in any records.

I recalled that I either stated to Dr. McDonald verbally or had written him that much of the area, rhyolitic in nature, seemed to be mineralized and had a potential value, if sufficient mineralization could be established, to warrant an out-and-out drilling program to prove its worth.

It was not until Thursday, January 19, 1956, after listening to Mr. Holderer's testimony that I learned that a copy of my report to Dr. McDonald, dated July 15, 1937, could be found here in the files of the Interior and Insular Affairs; room 224, I believe. I was privileged to make a copy of my report.

Now, referring to that report, wherein I made statements regarding my opinion as to the future possibilities of Al Sarena Mines, and to substantiate this belief and conclusion on my part gathered from my own observation and facts laid before me at that time, I wish to read into this record some information given out by two members of the United States Geological Survey upon the occasion of their visit to the Buzzard Mine in 1930 and 1931, years before my first visit in 1937.

They reported in the bulletin of the United States Geological Survey, No. 893, under the heading, "Metalliferous Mineral Deposits of the Cascade Range in Oregon," and I quote from Bulletin No. 14-C, volume II, section 2, Jackson County, and entitled "Oregon Metal Mines Handbook" published by the State of Oregon Department of Geological and Mineral Industries, under date of 1943. It refers to the Al Sarena Mine, Buzzard Mine, owner, Al Sarena Mining Co.:

History: The following is quoted from Callaghan & Buddington based on field work performed in 1930-31:

"The Buzzard mine is in northeastern Jackson County, and the 10 claims constituting the property are in sections 19, 20, 29, township 31 south, range 2 east. It is about 47 miles from Medford and 20 miles from the Crater Lake Highway at the mouth of Elk Creek. The first 11 miles of the Elk Creek Road, which serves the Buzzard area is surfaced, but the remainder, is unimproved, and the last 5 miles is very steep;

"The mine is on a heavily timbered ridge trending nearly north in rugged country near the divide between the drainage systems of the Rogue and Umpqua Rivers on the headwaters of Elk Creek. The ridge is 4,000 feet in altitude, according to aneroid measurement, and slopes toward the south; the ravine on the east side is about 700 feet below the summit, and that on the west side is about 300 feet below the summit.

"The rocks exposed in the mine workings are volcanic breccias and dikes of rhyolite and andesite, all altered and bleached. The vein appears to be near the center of a large area of altered rocks. Fragmental rocks appear to be dominant both in the vicinity of the mine and along the road to the south, though flows of rhyolite, andesite, and labradorite andesite occur. No dioretic intrusive rocks were found.

"No evidence of folding or tilting was seen in the mine, as no bedding was revealed. Upcrops in the valley of Elk Creek suggest that the region has been only slightly deformed. The strike of the vein on which almost all the work has been done is north 40 degrees west, and the dip is vertical to 85 degrees east. Most of the dikes trend to the northwest.

"Gold was discovered in Elk Creek below the mine, and the claims were located in 1897 by Peter and Mark Applegate, according to the latter. Pearl Mining Co. was incorporated in 1898, but the first ore was not shipped until 1900.

W. L. Freres, under an option, shipped ore in 1912 and 1913, and the Pearl Mining Co. was active in 1914 and 1915. The mine was leased in 1916 to Paul Wright, who drove tunnel 4 on the east side of the ridge and shipped considerable ore. The total production, 1909-18, was nearly \$24,000 chiefly in gold, but it included some silver and lead.

"According to the owners, the mine workings consist of 3,334 feet of drifts and crosscuts, 1,000 feet of raises and winzes, and 75 feet of open cuts and trenches. \* \* \*

"Apparently the veins shown in plate 22 are the only ones found up to the present time, though it seems possible that so large an area of altered rock might contain similar veins."

They go on to state development and more geology, and finally they say:

The outcrop of the ore body is considerably altered. The rhyolite is soft and may be cut easily with a knife. Pyrite has been altered to hematite. On the lower levels the fault zones show alteration but the rhyolite wall rock is relatively unaltered.

So we see that these gentlemen, employees of the United States Government, as far back as 1930 and 1931 believed there could be a large mineralized area in and around the Buzzard or Al Sarena Mine, 6 or 7 years before my first contact with the Al Sarena, 3 years before I moved to Oregon, and 27 or 28 years before the McDonalds made application for patent. The McDonalds made application for patent after determining the line of contact, as nearly as they could, between the rhyolite and the andesite, two different rock formations, in order to outline the rhyolite body which is the host for the mineralization.

They traced this contact in order to delineate the rhyolite in order to stake their mining claims and to try to include the entire, the whole rhyolite body, and to protect their discovery.

Ever since that time obstacle after obstacle has been placed in their way to attempt to deprive them of their findings.

Mr. Hattan during the time of his investigation in 1949 visited me at my home and asked me my opinion of the Al Sarena as a large, low-grade deposit. It was nothing new to me nor to Mr. Hattan, I believe, that the property had possibilities as a large, low-grade mine.

He testified in Portland that he doubted his own sampling and was surprised at the assay reports which showed a trace.

Right here let me clear up Mr. Hattan's statement that he thought that he had taken his examination for his certificate to practice as a professional engineer in Oregon when I was a member of the board of examining engineers in 1920. I was in Cuba in 1920, did not move to Oregon until 1933, and did not join the board of examiners until the late 1940's, so he was mistaken in this assumption.

Furthermore, I am not surprised that Mr. Redwine could go down to Alabama and dig up assay reports of samples sent in by Al Sarena that would show traces. He could also have gone to Abbot Hanks, or to Smith-Emery, the two laboratories so much discussed in these hearings, or checked the assay records of the mine laboratory itself and found hundreds of assays that assayed over \$2 per ton. Nor am I surprised that Messrs. Hattan and Sanborn could have found and sampled places within the 300 acres of even on each of the disputed claims that would show barren spots. Even the McDonalds could do this, I am sure.

But some of the certificates of assays that Mr. Redwine dug out of the files of the Williams testing laboratory that were introduced here and certified to by Mr. McDaniel as being reports on samples received

from and assayed for the Al Sarena mean nothing in this case unless further certified to as to where the samples were taken or what they represent.

Mr. McDaniel could not do this. He does not know where the samples were taken.

These samples, or some of them, might have been samples to test old dumps. They might have been samples to test the overburden, or just blanks to test the accuracy of the Williams testing laboratory. They might have been samples of concrete or samples to check for future roadways over barren ground, or even samples to check barren areas, areas clear off of the claims. Maybe they were samples taken in another district or another State, say Tennessee, or from Mexico. They could all have come off of one of the disputed claims; maybe off of one of the undisputed claims. Who knows where the samples did come from?

We were not told by Mr. Redwine the exact location from whence they come nor what they represented, at least not for any of all the certificates he had McDaniel identify, except for one sheet. That was assay certificate No. 431869, which reported on 28 samples taken by Messrs. Appling and McCormick.

This assay certificate is significant because it reports the results of samples taken on the 15 disputed claims, and the exact location by survey of the area by Mr. Appling's crew, all Government employees, plotted on maps prepared by them and by photographs taken by Mr. Appling.

Mr. Appling and his crew were most careful and conscientious in performing their duty as per instructions, and in the presence of McCormick.

This one certificate is important. All the rest can be thrown out of the window insofar as this case is concerned. This one assay certificate, No. 431869, represents the results of samples taken in areas pointed out on each disputed claim by the McDonalds who guided us to the several claims and showed us areas of 50 by 150 feet, or of an acre or more of outcropping rhyolite formations, formations not covered by overburden, or bulldozer cuts 100 feet or more long and up to 15 feet deep, or creek banks showing exposures of the mineralized rhyolite, or discovery cuts or shafts where mineralization showed.

Mr. Appling and I chose the spots within these areas where we took the samples. On some claims we took 2 or 3 samples, just to doublecheck our own sampling and to determine if the assays would check each other when samples were taken 50 or 60 feet apart on some of these outcrops.

These assays shown on certificate No. 431869, and submitted by Mr. Redwine, by Appling in his report, and by McCormick along with the photostatic copy of his report, requested by Mr. Redwine in Portland, were not blanks or traces, and they all show mineralization in every instance.

This sampling was to test the claims and to show mineralization on each of the 15 claims if it did exist.

It has been stated in these hearings that the average of the 28 samples indicated a value of \$2.06. It is common knowledge and published information that the famous Homestake Gold Mine in South Dakota, now many years old, has operated continuously for

many years, and is one of the few gold mines operating today on the low gold price of \$35 per ounce. It has processed thousands and thousands of tons of ore, much of which did not assay as high as \$2 per ton and on which profits have been made.

Another famous, very famous, gold mine, the Alaska Juneau in Alaska, operated for years on ore lower in value than \$1 per ton and paid handsomely in dividends from profits until the mine was shut down by the War Order L-208.

Dredges are operating in California around Yuba City and Marysville making a profit on 6 cents per cubic yard of gold-bearing material, material that weighs 3,000 pounds per cubic yard, which means only 4 cents per ton of 2,000 pounds.

All this talk of values has little bearing on whether or not the Al Sarena will or will not become a profitable venture. That remains to be proven. Actually, 10,000 tons mined and processed per day at 40 cents per ton profit equals \$4,000 per day or \$120,000 per month profit.

The values of the timber on Al Sarena would soon be erased at this rate, and it is a possibility.

Congressman Chudoff's claim of Al Sarena mining timber instead of mining ore, and that the McDonalds never intended to mine gold, really would be a joke.

As to using all the timber on the claims for mining purposes, yes, if the square set mining method was necessary to win the ore, as in the case of the famous International Nickel mine at Sudbury, Canada, where 12,000 tons of low-grade ore per day is being processed daily, it would not be many weeks before Al Sarena would be buying mine timbers. International uses at times 800 square sets a day, or about 8 million feet of mine timbers per month.

There are many sawmills in the West that cut from 100,000 to 500,000 feet of timber per day. Ten or twelve million feet does not last long at this rate.

If persecuted further, as they have been in the past, Al Sarena will be forced to market more timber to pay the bills and then just have to buy timber for mining purposes later when needed; 10, or 12, or 20 million feet will not last them long once they get underground.

With reference to the insinuations that there was something improper regarding my handwritten postscript to my letter to the Williams testing laboratories and which postscript was so stressed in the opening moments of the hearing taken here in Washington when Mr. Redwine first put Mr. McDaniel on the stand, I wish to explain just why this postscript was added.

When taking samples one never knows what the gross weight of the sample will be. It might amount to 10 pounds or only 5 pounds, 7 pounds, or  $3\frac{1}{2}$  pounds, or have any weight, depending on the circumstances. If we cut a 10-pound sample to start with and make 1 split, then we would have two 5-pound samples identical to each other, 1 a reject and the other to be split again, and this repeated until one ends with a pulp-size sample from the last split. If one had started with a 5-pound sample as the original gross sample he would be starting with the same weight as the first split from a 10-pound sample, and naturally a 5-pound sample split several times to get a pulp sample would not end up with the same weight as if he had started a  $3\frac{1}{2}$ -pound gross sample. The splitting is a standard pro-

cedure to reduce the bulky original sample to a pulp from which the assayer takes his weight for the assay charge. In this instance the pulp would be 1 of the 2 halves resulting from the last split, one-half to be shipped to the assay laboratory and the other half would ordinarily just be discarded.

From Mr. Sanborn's testimony it is quite evident that he and Mr. Hattan sent the whole of the bulk samples, or else in several instances split their original sample to reduce the bulk for shipment to the assayer. They kept no splits or umpires.

In Mr. Appling's and my case we did not ship bulk samples, but prepared the samples and reduced them all to a size suitable for the laboratory so that, instead of shipping some 250 pounds of samples, we reduced the weight of the 28 samples to about 21 pounds. This is also standard practice.

In our case Mr. Appling and I elected to preserve one-half of the last split instead of discarding all the splits as Messrs. Hattan, Sanborn did, as Mr. Sanborn testified. They kept no duplicates, no splits, just threw away all their discards from any splits they made. We kept all of our discards and, except for the last or duplicate split, used them to pan for any evidence of mineralization.

In the panning operation all of the host rock is discarded, washed away, and only the metallics are saved. Examination of these metallics with a high-powered magnifying lens disclosed in this case pyrite, magnetite, sphalerite or galena present in every sample taken. The pyrite indicated the presence of gold and silver; the sphalerite, zinc; and the galena, lead.

This was good evidence of mineralization and an indicator in each case that values were present in the samples, which the assays would prove.

We had decided to preserve one-half of the last split as a duplicate or replacement in case the shipment was lost in transit or an accident occurred in the laboratory that would spoil the assay of any sample submitted, such as a broken crucible or beaker, a spill of the pulp, or a lost bead. It was just a precaution or a safety measure on our part. We had no desire to trudge back into those hills on snowshoes to resample one or more or all those claims.

When the safe arrival of the samples was assured, which was when we each had received our copy of the certificate of assay No. 431,869, there was no longer any use for the duplicates we had kept. So they were destroyed.

All this hullabaloo about how they were destroyed has no bearing in the case except that we happened to throw the samples into the river instead of into a wastebasket or onto a garbage heap. It has been dramatized to shock the public of the United States, when all that happened was simply this: After Appling and I got the samples back from the Department of Geology and Mineral Industries Office, where we had left them for safekeeping, we were driving toward Appling's office and talking about fishing.

I live right on the Rogue River and had invited Appling to come down and try his luck at fishing in front of my home. Just about that time, when about 2 blocks from his office, we could see the Caveman's Bridge over the Rogue River in Grants Pass about 2 blocks straight ahead.

I asked Appling if he ever fished the hole in front of the park across the bridge. He replied, "No."

I suggested that he drive down there and I would show him a spot I had noticed years before. He drove there and while talking we remembered the samples and jokingly it was suggested: "Let's feed the fish some gold and silver instead of cluttering up your office with the samples."

So, while talking fishing, we tossed the discards one by one out into the fishing hole.

Was there anything wrong with that? It was as good a way as any to destroy them, and we weren't cluttering up anyone's office.

Out of this little incident, born on the spur of the moment without a second thought, grows this fantastic story of a premeditated plan to swindle Uncle Sam out of a forest; and, oddly enough, neither one of us would benefit 1 cent out of the act. Nor did the McDonalds even know we were destroying the samples; nor did anyone else.

All this spending of our United States taxpayers' money to unravel such a mighty mystery is utterly ridiculous, I would say. There was never any intention of preserving the samples as umpires for check assaying. There were no instructions to do so; nothing irregular in not doing so.

As stated before, Hattan and Sanborn never even kept their splits or any duplicate samples.

As to umpires, this word has been used so loosely during this hearing that it has lost its significance when referring to assay samples, as generally referred to in "smelter parlance," to quote Mr. Hattan. I'm surprised that no mention has been made of a baseball umpire. If it had everyone would probably have known what was being talked about.

At one time Mr. Redwine actually referred to me as an umpire. Let me explain what is meant when an assay goes to umpire. It simply means that when a buyer and a seller of ores, bullion, alloys, matte, concentrates, or what-have-you, make a trade, usually each has his own assayer who is sent his portion of the pulp for assay, and an umpire pulp is preserved in case the two assayers do not check within certain limits as agreed upon, or according to standard practice and established custom.

If the assays agree and settlement is made, the umpire pulp is usually destroyed or maybe kept for a specified limited time and then destroyed.

We kept our replacement samples until they had served their purpose and were no longer needed, and then destroyed them. They were not preserved as an umpire in smelter parlance, just an extra precaution we ourselves took, and may I repeat that Hattan and Sanborn did not keep any portion of the samples they took at Al Sarena.

While on the subject of samples, there was some discussion regarding whether bags or envelopes were used as containers when we shipped the samples. Let me clarify this point. When the samples are taken in the field they are usually put into canvas sacks, regular sample sacks, for convenience in handling and labeling. When the field samples are reduced to a pulp they are usually put into a paper envelope container of the type I hold up [demonstrating]. That is this one. We followed this standard practice.

When we reduced the samples at the mine Appling had only paper bags of the type I am now holding up, this type [demonstrating].

When we prepared the samples in his office in Grants Pass the next day we transferred the pulps into envelopes. Why? Because the envelopes are stronger, tougher, and less liable to breakage and spillage. They look better and are easier for the assayer to handle.

That's all, except for one thing: In several cases the envelopes were too small to hold all of the pulp representing one sample, so we had to put these oversize pulps into 2 envelopes instead of only 1 envelope, and to fasten the 2 envelopes together to contain 1 sample.

The postscript that was so emphasized at the beginning of the hearings, the one I wrote at the end of my letter to Williams Testing Laboratories advising them that I had shipped them a batch of samples, was only to caution the assayer of the fact that some sample were contained in 2 envelopes fastened together, and instructed him to use all of the pulp contained in 2 envelopes and treat it as 1 sample, not to weigh his assay charge out of 1 envelope only, but to use all of the pulp.

Senator NEUBERGER. Do you have much more, Mr. McCormick? I have to go over on the floor.

Representative HOFFMAN. We might as well have it. It is a fine job counsel has done as to somebody stealing something. I think the witness made it very clear that neither he nor Mr. Appling could profit, anyway. I only wish I had been along on that Rogue River when you stopped to fish.

Senator NEUBERGER. You may proceed.

Mr. McCORMICK. This note or postscript has been twisted around to sound as if there could have been something very mysterious about the instruction; in other words, as instructions to use up all the sample, to destroy it, leave no evidence, et cetera. Sometimes I wonder how stupid some people can get. It so happens that Mr. McDaniel, the assayer, explained on the stand what he thought the message conveyed, and so did Mr. Volin interpret the postscript as it was meant to be; and that is that, nothing so very fantastic as Mr. Redwine would have the newsmen and the public believe.

One reads in the newspapers under large headlines misstatements of facts, like for instance, where the forestry experts and other Government employees who actually cruised the timber on Al Sarena estimated the total value of marketable timber at the time the application for patent was made in 1948 at \$77,000, and possibly as much as \$126,000 or thereabouts in 1950 when reviewed. Senator Neuberger is quoted by the Medford Mail Tribune, date February 19, 1954, when he was campaigning in Oregon, as saying, and I quote:

I believe the public should know about what appears to be the latest giveaway of natural resources by Secretary of the Interior McKay. To do this he has set aside the judgment of forest rangers, mineral examiners, timber cruisers, and other experts in the field of conservation. The Al Sarena mines, a corporation which I understand is owned largely in Alabama, asked for patents of 23 mining claims in the Rogue River National Forest. Once patent is granted to a claimant the mining firm then can cut the timber growing on the land and convert these profits to its own use.

He goes on to say:

Secretary McKay, acting through the Solicitor of his Department, then overruled the Forest Service and the Bureau of Land Management. He granted the 15 controversial patents, and from this ruling there is no appeal.

It is final. The Al Sarena mines come into possession of approximately \$185,000 worth of timber in the Rogue River National Forest, timber which trained mineral examiners believe should still belong to the American public.

It is my understanding that the Government has received from the company only about \$5 an acre for 450 acres of land. It is significant that the Forest Service never desired to remove the Al Sarena Mining Co. from 15 disputed claims. It is noteworthy that all three echelons of investigation, the Forest Service, the Northwest office of the Bureau of Land Management, and the national headquarters of the Bureau of Land Management, were overruled by Mr. McKay.

What are examiners and rangers in the field actually for if not to determine these essential facts?

He forgot to mention the \$77,000. Senator Neuberger is quoted by the Medford Mail Tribune a little later. He blew this thing up to \$250,000. I have it right here.

Representative HOFFMAN. \$600,000.

Mr. McCORMICK. No, a little later. Medford Mail Tribune, December 2, 1955:

A private assay conducted in far-off Mobile, Ala., was made the basis for grant to the Al Sarena Co. of 15 mining claims in which timber is worth in the neighborhood of \$250,000, perhaps more. This assay was used by the Solicitor of the Interior Department, acting for Secretary McKay, to set aside the ruling of experienced mineral examiners.

Then soon after this \$185,000 figure and this \$250,000, the other day in the Washington Post of January 10, the quarter million dollar figure was doubled to \$500,000, and I quote—

Representative HOFFMAN. Get it up to \$600,000.

Mr. McCORMICK. Then I say here that Senator Kerr Scott stretched this \$500,000 figure to \$600,000 here on the floor. How do they get that way?

If they insist on quoting the mineral examiners and using their statements and figures, why not stick with the Forest Service and continue to quote their figure of \$77,000, instead of using \$500,000 or \$600,000; or, on the other hand, why don't they blow up the \$2.06 average assay to the same proportion of seven or eight times to get \$16 ore to talk about? It would be almost in reach of Mr. Holderer's \$20 figure and there might be some economics to be considered and one might stretch his imagination a little.

If one group of Government experts who testified in Portland could be wrong, could not the other group? If the forestry department was wrong, couldn't Messrs. Hattan and Sanborn also have been wrong? Or should we discount all of the following which I quote from Mr. Hattan's report of December 1949, the report that he turned in and in which he recommended that the 15 claims be disallowed?

This is what Mr. Hattan says in his report to the regional director of the Forest Service on Al Sarena, Inc., dated December 19, 1949, and I am quoting under his general heading, "General Geology," which has already been stated this afternoon:

No intensive study of the geology was made except to note the general trend of known veins and determine in general the rock types exposed on or near the surface of the individual claims. From an examination of the present underground development, and the various surface openings and rock outcrops, there appears to be a dome-shaped central mass, roughly 4,000 feet in diameter, which consists of volcanic breccias and rhyolite. Much of this mass of rocks is altered and bleached and pyritized. Some of it, especially in the vicinity of the main vein, contains lead and zinc sulphide mineralization. These sulphides seem to be the carrier minerals for the gold and silver which are the principal values.

Outside of the central mass rhyolite, volcanic breccias, andesite, and other rocks—possibly phenolite-andesite and/or dacite are found outcropping. The geology of the outcrops indicate they consist of flows, dikes, and possibly sills and stocks. There is no known mineralization of value contained in the dacite or andesite rocks found on the surface, but some pyritization was noted in the volcanic breccias and some of the rhyolite.

I comment here that—

Hattan says there is no mineralization in the dacite and andesite, but there is mineralization in the rhyolite and the volcanic breccias which make up the dome-shaped central mass 4,000 feet in diameter. This approximates the area of the 23 claims.

Mr. Hattan goes on, and he says:

Above tunnel No. 1, where mining was carried on many years ago, the apparent higher grade portion of the vein is defined by definite walls which are caused by narrow parallel gouge seams. The distance between walls of this old stoped area was estimated to be 2½ feet. Although the ground in either direction from the higher grade zone is mineralized to an unknown distance, samples indicate that its grade is low.

I comment:

Hattan says that the ground in either direction from the higher grade is mineralized to an unknown distance and that it is low grade.

Senator NEUBERGER. Mr. McCormick, let me ask you one thing, because, as I said, I am supposed to be over on the floor fairly soon. About how much longer do you think your testimony will take?

Mr. McCORMICK. I still have about 3, 4, 5, pages to read.

Representative HOFFMAN. Senator, I am willing that Mr. Redwine should act as chairman. I do not care.

Senator NEUBERGER. Would you be willing to have this put into the record, or would you rather read it?

Mr. McCORMICK. I would just as soon have it put in the record, only it is handwritten. I would have it typed so they can read it.

Senator NEUBERGER. You go ahead and read it.

Mr. McCORMICK (reading):

Mr. D. Ford McCormick, mention of whom was made in the application for patent, states in a report to the applicant company that "Practically the entire mass of so-called rhyolite is mineralized. Pyrite and pyrrhotite with some galena and sphalerite can be detected with a lens occurring as crystals or small grains, sometimes thickly grouped, then again scattered. Where the stringers occur the values rise. Shattered zones and banded structure also show higher values."

"McCormick also reported in a report dated July 15, 1937, to the company, that samples from outcrops from numerous places over the claims showed mineralization without exception. Small crystals of pyrite, pyrrhotite, galena, and sphalerite are present, scattered more or less through the rock. At some locations narrow stringers occur with kaolin gouge containing a higher proportion of small grains of galena, and where this occurs high grade gold and silver samples are found. Where the stringers and fissures are numerous, the enrichment makes milling ore." He went on to say that insufficient developments have been done to prove a large body of milling ore; several blocks of 4 are present; but aside from 1 possible zone (roughly 600 feet long by 400 feet high) with widths varying from 3 to 40 feet or more) only partially developed, practically no other work has been done in, can be established, and says, if the samples assayed and listed as handed to me on the attached sheets and blueprints are correct, there are several excellent showings that should be investigated without delay.

I included that list, and he goes on to say:

He (McCormick) stated that if these locations show good assays, there would be little doubt that important mining operators would show decided interest in the development of the Al Sarena mine. Then goes on to say that there is not suffi-

cient exposure of milling ore present to warrant a mill other than a pilot mill and from a study of the assay map, it does not appear as though there is any hope of operating profitably a 50 or 75 ton mill continuously from ore to be mined at the available stopes at the present time.

This was in 1937.

Hattan says:

The pilot mill was constructed to determine if the ores could be concentrated but no information was available which would show the minimum grade of material which could be mined, concentrated, and sold at a profit. Whether an operation is large or small there is obviously a low point in grade of material which can be handled through any mill at a profit.

My comment is this:

There is nothing in the mining law which requires that, as a basis for patent, the applicant must prove a minimum grade of ore or must prove that he can mine at a profit.

Hattan goes on:

The indications are that the central mass is all mineralized to some extent. If the prospective parallel shear and mineralized zones should prove to be extensive in length and depth, the possibilities are good that the whole mass could be developed, mined, and milled at a profit by low-cost, large-scale methods. \* \* \*

He goes on to describe that and I say:

On page 2 of the report Hattan refers to the "dome-shaped central mass, roughly 4,000 feet in diameter." Above he stated that the central mass is indicated "all mineralized to some extent and that the possibilities are good that the whole mass could be mined, and milled at a profit by large-scale, low-cost methods." He designates three methods for such operation.

Then under "Pertinent data" Mr. Hattan says:

Of the mining methods mentioned above, the central mass, being a low-grade proposition with suitable topography, could probably best be mined by the best open-pit or caving method. In any event, this method is the cheapest yet devised for large-scale, low-grade deposits.

Then he goes on to about the Alaska mine. There is no use repeating that. He says:

Any future values which might be attached to such low-grade deposits would be purely speculative. If a value of \$0.80 per ton were found in a quartz lens, for instance, there might be a possibility of finding greater values by advancing along the vein and a valid discovery would be indicated. In a disseminated body of low-grade minerals, if the average grade is not sufficient to justify the expense of time and money in its development, the land should necessarily be classed nonmineral in character. If this is not so, then ordinary rock containing the barest trace of precious or semiprecious minerals should be classed mineral in character and a patent granted. \* \* \*

I comment:

Many values shown at the Al Sarena mine are substantially above those shown at the Alaska-Juneau mine. Present (1949) methods do not measure future methods and improvements. Many prudent men speculate on and strive to work to bring about improved methods in mining, milling, transportation, and so on, the development of new uses for the mineral contents of ores not even suggested at the time of discovery or patent.

For example, the Engineering and Mining Journal for December 1955, reports that for the first time a new gold-extraction process is being used in South Africa at a southern Rhodesia mine. It involves passing the gold-cyanide through a mesh made of synthetic resin. It is claimed that a greater extraction of percent gold is achieved.

Low-grade properties and marginal properties will certainly profit in this operation.

Only 50 miles from the Al Sarena mine, the only nickel mine in the United States is being operated. This low-grade deposit was known for many years. Attempts were made to operate, but were unsuccessful. A smelter was built on the property, but it failed. Large and powerful mining groups examined the property and turned it down. Three years ago the Hanna Co. became interested. In excess of \$30 million was invested for a low-grade large-scale operation. The mine is now producing nickel on a large scale and at a profit.

This illustrates the difference of opinion by groups of men—several turning down a mining opportunity, then one speculating and taking it up—and succeeding with what appeared to be too low grade to others. Improved methods, ample financing, changed conditions, changed markets, new uses, and many other factors contribute to what establishes the minimum grade but these facts do not establish the fact as to whether mineralization existed in the first place.

Mr. Hattan says that the mineralization exists throughout the rhyolitic and volcanic breccia, not only in "the dome-shaped central mass (roughly 4,000 feet in diameter)" but that "the possibilities are good that the whole mass could be developed, mined, and milled at a profit by large-scale low-cost mining method."

It also explodes Mr. Holderer's thought that not by the wildest stretch of the imagination could a production of 100 tons per day ever be reached.

Mr. Hattan seemed to get matters all confused. His assays, for instance, 28 in the group, were sent to Annes May 1949. All but one showed a trace; that one only 12 cents. Nine of these samples he took on the noncontested claims and they were all blanks.

A resampling of the 17 claims in July 1949 showed two of these uncontested claims assayed over a dollar. They were the only two uncontested claims resampled. One uncontested claim was never sampled at all.

He concluded that 6 of the 8 he would allow on the basis of Al Sarena assays taken off of the maps, 2 pulps taken from Al Sarena assays that he had sent to Abbot Hanks to check. One went \$13.37, just twice what the Al Sarena assay was, and one went \$7.03, just \$2.21 under the Al Sarena assay. There was nothing consistent in his reasoning.

To further substantiate my beliefs and conclusions regarding mineralization of the Al Sarena rhyolite body I quote from Mr. Sopp's report dated May 19, 1939:

**Geology:** The 2 rocks described above (1 not identified and 1 a rhyolite) covers a roughly circular area about three-quarters of a mile in diameter and are completely surrounded by andesite.

**Widespread mineralization:** The gold and silver in the main vein is known to be associated within a galena, sphalerite, pyrite, and quartz. These minerals, however, are not confined to any one rock or fracture zone. Galena, sphalerite, pyrite, and vein quartz are found abundantly in the rhyolite and the white flow rock.

This widespread mineralization suggests the theory that during the final stage of one period of extrusion, solutions ascended from a deep-seated magma reservoir to permeate and deposit minerals in every type of rock present except the andesite.

Now, in conclusion, the two United States Geological Survey men, Callaghan and Buddington, Mr. George Sopp, Mr. Hattan, the letters that were read by Mr. Davis quoting Mr. Kissok of New York and Capt. Jewell Morrison of Denver, both mining engineers, and myself all have been on the property and have reported as has been quoted above regarding the mineralization of the whole rhyolite body. Yet Mr. Holderer, who has never seen the property, bases his conclusions

cient exposure of milling ore present to warrant a mill other than a pilot mill, and from a study of the assay map, it does not appear as though there is any hope of operating profitably a 50 or 75 ton mill continuously from ore to be mined from the available stopes at the present time.

This was in 1937.

Hattan says:

The pilot mill was constructed to determine if the ores could be concentrated, but no information was available which would show the minimum grade of material which could be mined, concentrated, and sold at a profit. Whether an operation is large or small there is obviously a low point in grade of material which can be handled through any mill at a profit.

My comment is this:

There is nothing in the mining law which requires that, as a basis for patent, the applicant must prove a minimum grade of ore or must prove that he can make a profit.

Hattan goes on:

The indications are that the central mass is all mineralized to some extent, and if the prospective parallel shear and mineralized zones should prove to be extensive in length and depth, the possibilities are good that the whole mass could be developed, mined, and milled at a profit by low-cost, large-scale mining methods. \* \* \*

He goes on to describe that and I say:

On page 2 of the report Hattan refers to the "dome-shaped central mass, roughly 4,000 feet in diameter." Above he stated that the central mass is indicated as "all mineralized to some extent and that the possibilities are good that the whole mass could be mined, and milled at a profit by large-scale, low-cost mining methods." He designates three methods for such operation.

Then under "Pertinent data" Mr. Hattan says:

Of the mining methods mentioned above, the central mass, being a low-grade proposition with suitable topography, could probably best be mined by the block-caving method. In any event, this method is the cheapest yet devised for large-scale, low-grade deposits.

Then he goes on to about the Alaska mine. There is no use repeating that. He says:

Any future values which might be attached to such low-grade deposits would be purely speculative. If a value of \$0.80 per ton were found in a quartz ledge, for instance, there might be a possibility of finding greater values by advancing along the vein and a valid discovery would be indicated. In a disseminated body of low-grade minerals, if the average grade is not sufficient to justify the expenditure of time and money in its development, the land should necessarily be classed nonmineral in character. If this is not so, then ordinary rock containing the barest trace of precious or semiprecious minerals should be classed mineral in character and a patent granted. \* \* \*

I comment:

Many values shown at the Al Sarena mine are substantially above those shown at the Alaska-Juneau mine. Present (1949) methods do not measure future methods and improvements. Many prudent men speculate on and strive to work to bring about improved methods in mining, milling, transportation, and even the development of new uses for the mineral contents of ores not even suggested at the time of discovery or patent.

For example, the Engineering and Mining Journal for December 1955, reports that for the first time a new gold-extraction process is being used in South Africa at a southern Rhodesia mine. It involves passing the gold-cyanide through a mesh made of synthetic resin. It is claimed that a greater extraction of pure gold is achieved.

Low-grade properties and marginal properties will certainly profit in this operation.

Only 50 miles from the Al Sarena mine, the only nickel mine in the United States is being operated. This low grade deposit was known for many years. Attempts were made to operate, but were unsuccessful. A smelter was built on the property, but it failed. Large and powerful mining groups examined the property and turned it down. Three years ago the Hanna Co. became interested. In excess of \$20 million was invested for a low grade large scale operation. The mine is now producing nickel on a large scale and at a profit.

This illustrates the difference of opinion by groups of men - several turning down a mining opportunity, then one speculating and taking it up - and succeeding with what appeared to be too low grade to others. Improved methods, ample financing, changed conditions, changed markets, new uses, and many other factors contribute to what establishes the minimum grade but these facts do not establish the fact as to whether mineralization existed in the first place.

Mr. Hattan says that the mineralization exists throughout the rhyolite and volcanic breccia, not only in "the dome-shaped central mass (roughly 1,000 feet in diameter)" but that "the possibilities are good that the whole mass could be developed, mined, and milled at a profit by large-scale low cost mining method."

It also explodes Mr. Holderer's thought that not by the wildest stretch of the imagination could a production of 100 tons per day ever be reached.

Mr. Hattan seemed to get matters all confused. His assays, for instance, 28 in the group, were sent to Annes May 1949. All but one showed a trace; that one only 12 cents. Nine of these samples he took on the noncontested claims and they were all blanks.

A resampling of the 17 claims in July 1949 showed two of these uncontested claims assayed over a dollar. They were the only two uncontested claims resampled. One uncontested claim was never sampled at all.

He concluded that 6 of the 8 he would allow on the basis of Al Sarena assays taken off of the maps, 2 pulps taken from Al Sarena assays that he had sent to Abbot Hanks to check. To further substantiate my beliefs and conclusions regarding mineralization of the Al Sarena rhyolite body I quote from Mr. Sopp's report dated May 19, 1939:

**Geology:** The 2 rocks described above (1 not identified and 1 a rhyolite) covers a roughly circular area about three-quarters of a mile in diameter and are completely surrounded by andesite.

**Widespread mineralization:** The gold and silver in the main vein is known to be associated within a galena, sphalerite, pyrite, and quartz. These minerals, however, are not confined to any one rock or fracture zone. Galena, sphalerite, pyrite, and vein quartz are found abundantly in the rhyolite and the white flow rock.

This widespread mineralization suggests the theory that during the final stage of one period of extrusion, solutions ascended from a deep-seated magma reservoir to percolate and deposit minerals in every type of rock present except the andesite.

Now, in conclusion, the two United States Geological Survey men, Callaghan and Buddington, Mr. George Sopp, Mr. Hattan, the letters that were read by Mr. Davis quoting Mr. Kissok of New York and Capt. Jewell Morrison of Denver, both mining engineers, and myself all have been on the property and have reported as has been quoted above regarding the mineralization of the whole rhyolite body. Yet Mr. Holderer, who has never seen the property, bases his conclusions

on assay samples when he has no idea from whence they came, and says, "Rarely have I seen as poor a batch of assays as that," and later, I might add, that after having summarized these assays, "I made no further attempt to discuss the economics of the mine because there are none."

When asked by Mr. Redwine, "There are no economics there?" Holderer replied, "The economics are zero."

Holderer had previously testified that miners' pay was around \$13 per day in the Coeur d'Alene, some eight or nine hundred miles away, the nearest large mine, and that the man shift average was 2 tons per man. Maybe he doesn't know that at the Riddle Nickel mine, only about 85 miles distant, or only one-tenth as far from Al Sarena, one man handles a 30-ton carryall that scrapes up 30 tons in 1 scoop, and fills and discharges this sized load many times an hour; that this low-grade ore is transported by an automatic tramway operated by 2 men. I have been told, who deliver over 2,000 tons per shift, a distance of over a mile to the smelter stockpile.

Has he not seen one man on a bulldozer push hundreds of tons around in a single shift?

I quote from the New York Times of January 27, 1956, just the other day:

#### PAUL BUNYAN'S BIG "CAT"

##### MAKES DIRT FLY IN MICHIGAN BUILDING NEW HIGHWAYS

LANSING, MICH.—It takes huge equipment to make modern highways and the "Paul Bunyan" of them all is a 35-ton caterpillar.

Manufacturers of the big "cat" say it can move up to 10 yards of earth at a time. It is 12 feet wide and 2 feet 6 inches high.

One man operates this.

Does he think that an area nearly a mile across could not be made to yield over 100 tons per 24 hours?

I quote from the testimony:

MR. JONAS. Is your statement to us that this would not be economic, even if it goes \$2 per ton, based on the amount they propose to mine? What if they stepped up the amount?

MR. HOLDERER. They would never get up to 100 tons, to say nothing of the several thousand tons per day. It would be a physical impossibility.

I say that Mr. Holderer seems to be still living in the pick-and-shovel days. What was good enough for grandpappy is still good enough for him.

Mr. Redwine had Mr. McDaniel answer that there are no operating gold mines in Alabama today. Just where in all of the 48 States are there any gold mines operating today, as such? Only the Homestake in South Dakota and probably a few scattered small high-grade mines in Colorado and California. The gold and silver produced in the United States today comes from the copper, lead, and zinc mines as a byproduct from a few dredges which are very low-cost producers.

An interesting fact is that one can step over to the Smithsonian Institution and among the minerals and gems exhibits find some beautiful specimens of gold mines in Alabama, North Carolina, and South Carolina, and right next to Alabama are the once famous Dahlonega gold mines. One of the first, if not the first, gold mines ever built in the United States was built in the town of Dahlonega, and all of the gold that was minted for Uncle Sam was produced in Alabama, the

Carolinas, and Georgia. Dahlonga has been investigated recently as a possible large, low-grade producer when economic conditions warrant such a procedure.

It seems to me that the bottom has dropped out from under every accusation and insinuation that the committee has tried to make.

I might add that I do not like the manner in which my name has been dragged into this whole matter. I call it mud and filth. I do not like what the newspapers have printed as a result of it, for instance, in Drew Pearson's column of December 14, 1955, and in the Nevada State Journal in Reno; again just here the other day, January 10, 1956, in the Washington Post; and prior to these dates, these insinuations, half-truths, and untruths created out of thin air, and never once any attempt or any effort made by the committee or the press to interview me. To say the least, this is very distasteful to me, talking as a red-blooded United States citizen.

The whole matter seems childish and I hope that the truth will prevail and that the whole thing boomerangs and bursts right in the scandalmongers' faces. Let the chips fall where they may, as Senator Kerr Scott said.

I thank you for allowing me to testify even if I have had to wait over 3 weeks, and I am over 3,000 miles away from home.

Mr. REDWINE. Mr. Chairman.

Senator NEUBERGER. Yes, sir, Mr. Redwine.

Mr. REDWINE. In view of part of the statement read by this witness I would like to read from the record at page 251. This is at the very opening of the examination of Mr. McDaniel, assayer for the Williams Co. I said:

Mr. Chairman, in the examination of this witness certain documents will be submitted to him for examination and explanation. They are from the files of the A. W. Williams Inspection Co.

Further down I said:

These documents that will be submitted to the witness for identification and explanation are from the files of the A. W. Williams Inspection Co., for whom he works.

I think it is only fair that the record should show that they are in the possession of the committee through subpoena.

The Williams Co. has not turned anything over to the committee that has not been subpoenaed, in fairness to its clients. It is a professional matter with them.

I further have here, Mr. Chairman, which I think should go in the record, a letter signed by Chairman Murray, addressed to the United States Marshal in Mobile, Ala., attaching thereto a subpoena for the records of the A. W. Williams Inspection Co., the pertinent part which reads:

You are hereby commanded to furnish the Committee on Interior and Insular Affairs all reports of assays and all correspondence now in your possession relating to any and all ore samples submitted to the A. W. Williams Inspection Co. by or on behalf of Al Sarena Mining, Inc., of Trail, Oreg., for and during the period January 1, 1949, up to and including January 1, 1955.

Senator NEUBERGER. That will go in the record.  
(The material referred to follows:)

UNITED STATES MARSHAL,  
*Federal Building, Mobile, Ala.*

JUNE 20, 1955.

DEAR SIR: I will appreciate it if you will serve the enclosed subpoena upon Mr. A. W. Williams, president, A. W. Williams Inspection Co., of Mobile, Ala., so that

this committee may be furnished with certain documents and other material now in the possession of Mr. Williams.

Thank you for your cooperation.

Sincerely yours,

JAMES E. MURRAY, *Chairman.*

UNITED STATES OF AMERICA

CONGRESS OF THE UNITED STATES

*To A. W. Williams, president, A. W. Williams Inspection Company, Mobile, Alabama, Greetings:*

Pursuant to lawful authority, you are hereby commanded to furnish the Committee on Interior and Insular Affairs all reports of assays and all correspondence now in your possession relating to any and all ore samples submitted to the A. W. Williams Inspection Company, by or on behalf of Al Sarena Mining, Inc., of Trail, Oreg., for and during the period January 1, 1949, up to and including January 1, 1955.

Hereof fail not, as you will answer your default under the pains and penalties in such cases made and provided.

To United States Marshal, Federal Building, Mobile, Alabama, to serve and return.

Given under my hand, by order of the Committee, this 20th day of June, in the year of our Lord one thousand nine hundred and fifty-five.

*Chairman, Committee on Interior and Insular Affairs.*

Mr. McCORMICK. May I say that is absolutely and probably true, but did you find out where those samples came from, where they were taken? No. Where do you say they were taken, excepting that one group? They are specifically located. These others could have been concrete. They could have been taken in Mexico or sent down by the Al Sarena Mining Co. That doesn't say where they came from.

Representative HOFFMAN. Is that all, Mr. Chairman, at this time?

Senator NEUBERGER. Yes, sir.

I just wanted to ask one question of Mr. McCormick, if I may.

Are you now in the employ of the Al Sarena Mines or the McDonalds?

Mr. McCORMICK. I am not and have not been since I reported to you and testified in Portland.

Senator NEUBERGER. You have not been since you testified in Portland?

Mr. McCORMICK. No.

Senator NEUBERGER. I thank you very much, Mr. McCormick, for coming here. Your statement, of course, will appear in full in the record.

The committee will stand in recess until, as under the previous order I believe, next Tuesday at 10:30 a. m.

Representative HOFFMAN. Let the record show, if you will, please, that the only members of the committee present are the Senator from Oregon, the Congressman from North Carolina, Mr. Jonas, and the Representative from Michigan and the committee staff.

Senator NEUBERGER. And the committee staff also is present.

Representative HOFFMAN. Yes. Mr. Redwine, Mr. Coburn, Mr. Lanigan, and Mr. Perlman.

Senator NEUBERGER. And as the second acting chairman let me say I appreciate the attendance of the distinguished gentleman from Michigan and the gentleman from North Carolina.

Representative HOFFMAN. We are glad to be here.

(Whereupon, at 5:15 p. m. the hearing was adjourned.)

## APPENDIX

---

### MATERIAL SUBMITTED FOR INCLUSION IN THE RECORD AFTER TERMINATION OF TESTIMONY

#### MATERIAL SUBMITTED BY UNITED STATES FOREST SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
Washington 25, D. C., February 16, 1956.

Re Adjustments, R-6, Rogue River, Al Sarena Mines, Inc.

HON. W. KERR SCOTT,  
*Acting Chairman, Legislative Oversight Subcommittee,  
Committee on Interior and Insular Affairs,  
United States Senate.*

DEAR SENATOR SCOTT: This is in reply to your letter of February 8 concerning mining claim appeal cases involving national forest land.

We have searched our files for the period 1948 through 1955 and find that there have been three cases involving patent application, in which the Forest Service was the contestant, which were appealed to the Secretary of the Interior. For these cases, the average elapsed time between the filing of application for patent and the final decision of the Department of the Interior was 3 years, 11½ months.

Sincerely yours,

EDWARD C. CRAFTS,  
*Assistant Chief.*

FEBRUARY 13, 1956.

---

#### STATEMENT

Omitted from page 10 of Under Secretary Davis' testimony is reference to the letter of December 15, 1948 from the assistant regional forester at Portland to the regional administrator of the Bureau of Land Management. A copy of this letter, which requests the services of a qualified mineral examiner, is attached. This is the letter Mr. Leonard B. Netzorg referred to in his letter of April 14, 1949 to the claimants (mentioned on p. 11 of Davis' testimony). Davis' testimony makes it appear that Netzorg's letter of April 14, 1949 to the claimants contained the wrong date when referring to the Forest Service request of BLM for a field examination and report. The date used by Netzorg is correct.

The statement on page 10 of Davis' testimony "that the Forest Service had been notified 3 months before of the filing of these claims and apparently had done nothing about it" does not agree with the record. The first action of the Forest Service was on December 2, 1948 when the forest supervisor wrote the regional forester (copy attached) calling attention to the "notice for publication." On December 7, the regional forester's office requested by phone a copy of the application from BLM and by memorandum of December 9 (copy attached) transmitted a copy to the forest supervisor and made inquiry as to when claims should be examined. The Forest Service had no knowledge of the filing of the patent application until December 2, 1948, and thereafter promptly initiated first steps in arrangements for having the claims examined. Because of snow it was not feasible to examine the claims until the following spring. Hattan's reminder, referred to in the regional forester's letter of March 17, 1949, to the district manager of the Bureau of Land Management, related only to a technicality and did not influence Forest Service decision to examine the claims.

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
December 15, 1948

Re adjustments, Rogue River mining claims.

Mr. W. H. HORNING,  
Regional Administrator, Bureau of Land Management,  
Portland, Oreg.

DEAR MR. HORNING: We have recently received a copy of the notice for publication and the application for patent filed by the Al Sarena Mines, Inc., for patent to the following claims in the Rogue River National Forest:

Oro Alto (2)	Mark Applegate (10)	Rainboe (18)
Oro Rico (3)	H. McKenzie (11)	Della McKinnon (19)
Cougar (4)	J. L. Grubb (12)	Sulphide (20)
Oro Real (5)	J. D. McKinnon (13)	Staples (21)
J. W. Merritt (6)	Henry Applegate (14)	Manganese (22)
Peter Applegate (7)	A. W. Dahlberg (15)	La Jolla (23)
Oro Escondido (8)	Telluride (16)	Arroyo Verde (24)
W. C. Leever (9)	Alabama (17)	

Since we do not have a qualified mineral examiner we will appreciate your assistance in examining these claims in accordance with the system which has worked so successfully for us during the past 2 or 3 years.

Word from Supervisor Janouch of the Rogue River indicates that this examination should be deferred until next spring. Recent snows, plus winter conditions, make field work in this area impracticable at this time.

We have only one copy of the notice for publication and application for patent. These can be made available for your use at any time they are needed. In the meantime, however, we will hold them in our files until you request otherwise.

Very truly yours,

FRANK B. FOLSON,  
Assistant Regional Forester  
By K. WOLFE, Acting.

DECEMBER 9, 1948

To: Forest Supervisor, Rogue River.  
From: Recreation and Lands, K. Wolfe, Acting.  
Subject: U-adjustments, Rogue River mining claims.

Reference is made to our memorandum of December 7, and to related correspondence.

Attached are our only copies of the notice for publication and application for patent in this case. Under separate cover we are sending you 2 copies of each of the 3 sheets comprising mineral survey No. 879.

It is presumed that you will want these claims examined by a mineral examiner before recommending whether a protest should be entered by the Forest Service against the patenting of any or all of them. Probably we can secure the assistance of Mr. Hutton, who is somewhat familiar with these claims. If we can, what are the ground conditions at present? Is the area covered with snow? Do you think now is a satisfactory time to make the examination or should we figure on delaying it until early spring? Please let us have your recommendations. With them please return the notice for publication and application for patent. If you feel that copies of these instruments are essential, we will try to have them made as and when opportunity presents.

K. WOLFE

DECEMBER 2, 1948

To: Regional forester.  
From: Forest supervisor, Rogue River.  
Subject: U-adjustment, mining claims.

Attached are (1) clipping from the Medford paper containing a summons and notice for publication and (2) map showing approximately the location of the tract.

Before patent proceedings go too far we wonder if the Forest Service should protest the patent until our mineral examiner determines the validity of the claim.

KARL L. JANOUCH.

---

UNITED STATES FOREST SERVICE,  
*Washington 25, D. C., February 1, 1956.*

For the record.

By John Sicker, Chief, Division of Recreation and Land Uses.

Subject: U-Adjustments, R-6, Rogue River, Al Sarena Mines, Inc.

In answer to the question I asked by phone of William Sanborn today "Did the McDonalds request that you split the samples taken at the time you and Hatten made your examination of the claims so that they would have a sample to have assayed," Sanborn stated that to the best of his recollection no such request was made. He further advised that had such a request been made he is certain he would have recollected it and that he would have agreed to splitting the samples providing the crushing and splitting was done under his and Mr. Hattan's supervision. Sanborn further advised that in all his years of mineral claim work he has never been requested by a claimant to split a sample so that the claimant could have the sample assayed as well as the Government.

JOHN SIEKER.

---

DECEMBER 7, 1948.

To: Forest supervisor, Rogue River.

From: Recreation and Lands, Frank B. Folsom.

Subject: U-Adjustments, Rogue River, mining claims.

Reference is made to your memorandum of December 2.

On receipt of this memorandum we got in touch with the local land office by telephone, and found that they had overlooked sending us a copy of this application for patent. They will now send the usual notice and we will ask for your report and recommendations as in other applications for mining patent. Thanks for bringing this matter to our attention.

FRANK B. FOLSOM.

---

DEPARTMENT OF THE INTERIOR, BUREAU OF LAND  
MANAGEMENT, OREGON DISTRICT LAND OFFICE,  
*Portland, Oreg., December 7, 1948.*

REGIONAL FORESTER,

*Portland, Oreg.*

(Attention: Mr. Wolfe.)

DEAR SIR: As was advised in our telephone conversation today, I am enclosing a copy of the notice for publication, together with a copy of the application for patent, filed by the Al Sarena Mines, Inc., in connection with mineral application 0665.

We trust this will give you the information desired and regret the forwarding of these papers to you was overlooked.

Very truly yours,

CARL F. SPAULDING, *Assistant Manager.*

---

DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE, NORTH PACIFIC REGION,  
*Portland, Oreg., March 17, 1949.*

Re: Adjustments, Rogue River mining claims.

Mr. CHARLES LEE,

*Manager, Oregon District Land Office,*

*Bureau of Land Management, Portland, Oreg.*

DEAR MR. LEE: Reference is made to Mr. Spaulding's letter of December 7, transmitting a copy of the notice for publication and a copy of the application for patent filed by the Al Sarena Mines, Inc., in connection with mineral application 0665.

Thanks to Mr. Hattan, my attention has been called to the fact that I neglected to ask you to withhold action on this application until the Forest Service had had an opportunity to have these mining claims examined. Mr. Hattan is planning to examine these claims for us as soon as weather conditions will permit. Until his report is received we will appreciate it if action can be withheld in accordance with the provisions of regulation 44LD360.

Very truly yours,

H. J. ANDREWS, *Regional Forester.*  
By FRANK B. FOLSOM, *Acting.*

WASHINGTON, D. C., August 5, 1915.

To: The Commissioner, Chief of Field Service, chiefs of field divisions, registers and receivers, General Land Office, Department of the Interior; the forester, district foresters, Forest Service, the Solicitor, the district assistants to the Solicitor, Department of Agriculture.

GENTLEMEN: Better to effectuate cooperation in protecting the interests of the Government and settlers and other claimants to lands within national forests, the following order is made, effective on and after October 1, 1915, superseding order of November 25, 1910 (39 L. D., 374) :

1. Hereafter when a person files application to make an entry, or to amend an existing entry, embracing lands within a national forest, basing the right of entry, or amendment, on settlement prior to the establishment of the forest, the register and receiver will require such person to file with his application a statement under oath, in duplicate, containing his name and address, description and character of the land involved, the date he established residence on the land, his absence from the land, kind and character of improvements placed thereon, and the amount of land cleared and cultivated, accompanied by the affidavit, in duplicate, of at least one disinterested person, corroborating the statement. The register and receiver will immediately forward the duplicate of such statement and affidavit to the supervisor of the national forest in which the lands are embraced, with information as to the date of filing the application, the date of filing the township plat of survey covering the land, and any other facts of record affecting the application, and will suspend action on the application for 60 days, or upon the request of the forest supervisor, where climatic or other conditions require, for such time, not to exceed 6 months, as will enable him to make an examination of the claim, unless in the meantime they shall receive notice of no protest, as hereinafter provided.

2. The register and receiver in providing notice of intention to make final proof upon claims, either mineral or nonmineral, within a national forest shall immediately furnish a copy thereof to the supervisor in charge of such forest, and other than to publish such notice and receive final proof will, except in mineral cases as hereinafter prescribed, suspend action on the final proof for 60 days from date thereof, or upon the request of the forest supervisor, where climatic or other conditions require, for such time, not to exceed 6 months, as will enable him to make an examination of the claim, unless in the meantime they shall receive notice of no protest as hereinafter provided. In each case, however, where the register and receiver, upon examination of the final proof at any time after its submission, find it to be incurably defective, the same will be rejected and the Forest Service so advised, notwithstanding the time within which a protest may be filed hereunder has not expired.

3. The forest supervisor upon receipt of the statement mentioned in paragraph 1, or the notice mentioned in paragraph 2, will at once make investigation of the claim, and will submit to the district forester a report thereon, unless immediate investigation is impossible because of climatic or other conditions, when an extension of time will be requested as provided in paragraphs 1 and 2 hereof, and the investigation will be made and the report submitted as soon as possible within the period of extension. The district forester will promptly consider the report and if of opinion that no protest should be filed will so advise the register and receiver. If the district forester is of opinion that a protest should be made, he will transmit the papers to the district assistant to the Solicitor, who will prepare for his signature a protest, not under oath or corroborated, in which shall be plainly and briefly stated the grounds upon which the protest is based. The protest shall be filed in triplicate with the register and receiver of the proper local land office.

4. Upon receipt of the protest, the register and receiver shall immediately forward a copy thereof to the Commissioner of the General Land Office, in accordance with rule 4 of the Rules of Practice, and in every case immediately issue the notice required by rule 5 thereof, accompanied by a copy of the protest, stating that unless the adverse party appears and answers the allegations of said notice within 30 days after service thereof, the allegations of the protest shall be taken as confessed. Upon the filing of the answer, the register and receiver shall set a date for a hearing, after consultation with the district assistant to the Solicitor, and notify parties as provided in the Rules of Practice. Upon failure of the claimant to appear at the hearing the allegations of the protest will be taken as confessed. Hearings shall be conducted in accordance with the Rules of Practice. In other than mineral cases, action upon the application and upon the final proof, which may be offered in the usual manner, shall be suspended pending the final determination of the protest, except as provided in paragraph 2 hereof for the disposition of incurably defective proof. In mineral applications for patent the proof shall be considered on its merits, and, if found regular, certificate issued, but the claimant should be advised in such case that patent will be withheld by the General Land Office pending determination of the protest.

5. If no protest be filed within the time limit as provided in paragraphs 1 and 2 hereof, the register and receiver shall take appropriate action upon the application or the final proof. But in no case, in the absence of the filing of a protest or a no-protest notice as hereinabove provided, shall patent issue until the Commissioner of the General Land Office is notified by, or ascertains from, the forester that the claim will not be protested, as provided in paragraph 6 hereof.

6. A protest may be initiated against any claim, mineral or nonmineral, embracing lands within national forests at any time prior to patent, by the solicitor or the district assistant to the Solicitor of the Department of Agriculture filing in the local land office, in triplicate, a complaint signed by the forester or the district forester, not under oath or corroborated, setting forth clearly and briefly the grounds of the protest. Upon receipt of such complaint the register and receiver shall forward a copy thereof to the Commissioner of the General Land Office; issue the notice required by rule 5 of the Rules of Practice, accompanied by a copy of the complaint; and arrange for a hearing, if applied for, as provided in paragraph 4 hereof.

7. In all hearings affecting lands or claims within a national forest the district assistant to the Solicitor will be entered of record as appearing in behalf of the Government, and will conduct the Government's side of the case.

8. Forest-lieu and school-selection cases will be handled by the chiefs of field division of the General Land Office in like manner as heretofore. The forest officers will, upon request of the chiefs of field division, render any assistance possible in the making of investigations, and the district assistants to the Solicitor of the Department of Agriculture will cooperate with the chiefs of field division in the conduct of hearings in such cases, and thereafter will take action in like manner as heretofore, including the taking of appeals to the Secretary of the Interior.

9. In all Government cases before registers and receivers involving lands or claims within a national forest, the district assistant to the Solicitor shall be served with copies of all answers, appeals, motions, orders, and decisions required to be noted under the rules in cases of private contests. The proper law officers of the Department of Agriculture shall also have a right of appeal from any decision by the Commissioner of the General Land Office and to file motion for rehearing in the Department of the Interior, or take other like action in the same manner as a private contestant, and shall receive like notices of proceedings and decisions: Provided, however, that the Department of Agriculture shall not be required to take formal appeals from decisions of registers and receivers.

10. Chiefs of field division and special agents will not hereafter take action in regard to any claims within a national forest, except as provided in paragraph 8 hereof, unless specifically directed by the Commissioner of the General Land Office or the Secretary of the Interior: Provided, that the chiefs of field division may, on request of a district forester, assign mineral examiners to assist in the investigation of cases involving mining claims.

11. Costs of hearings will be paid from the appropriation for expenses of hearings in land entries as now provided for other Government contests. Prior to June 1 of each year the district assistant to the Solicitor will mail to the chief of field division in whose division the lands involved lie an estimate of the funds necessary to cover the hearings during the first quarter of the ensuing fiscal year. Like action will be taken on the first day of each month which imme-

W. L. Freres, under an option, shipped ore in 1912 and 1913, and the Pearl Mining Co. was active in 1914 and 1915. The mine was leased in 1916 to Paul Wright, who drove tunnel 4 on the east side of the ridge and shipped considerable ore. The total production, 1909-18, was nearly \$24,000 chiefly in gold, but it included some silver and lead.

"According to the owners, the mine workings consist of 3,334 feet of drifts and crosscuts, 1,000 feet of raises and winzes, and 75 feet of open cuts and trenches. \* \* \*

"Apparently the veins shown in plate 22 are the only ones found up to the present time, though it seems possible that so large an area of altered rock might contain similar veins."

They go on to state development and more geology, and finally they say:

The outcrop of the ore body is considerably altered. The rhyolite is soft and may be cut easily with a knife. Pyrite has been altered to hematite. On the lower levels the fault zones show alteration but the rhyolite wall rock is relatively unaltered.

So we see that these gentlemen, employees of the United States Government, as far back as 1930 and 1931 believed there could be a large mineralized area in and around the Buzzard or Al Sarena Mine, 6 or 7 years before my first contact with the Al Sarena, 3 years before I moved to Oregon, and 27 or 28 years before the McDonalds made application for patent. The McDonalds made application for patent after determining the line of contact, as nearly as they could, between the rhyolite and the andesite, two different rock formations, in order to outline the rhyolite body which is the host for the mineralization.

They traced this contact in order to delineate the rhyolite in order to stake their mining claims and to try to include the entire, the whole rhyolite body, and to protect their discovery.

Ever since that time obstacle after obstacle has been placed in their way to attempt to deprive them of their findings.

Mr. Hattan during the time of his investigation in 1949 visited me at my home and asked me my opinion of the Al Sarena as a large, low-grade deposit. It was nothing new to me nor to Mr. Hattan, I believe, that the property had possibilities as a large, low-grade mine.

He testified in Portland that he doubted his own sampling and was surprised at the assay reports which showed a trace.

Right here let me clear up Mr. Hattan's statement that he thought that he had taken his examination for his certificate to practice as a professional engineer in Oregon when I was a member of the board of examining engineers in 1920. I was in Cuba in 1920, did not move to Oregon until 1933, and did not join the board of examiners until the late 1940's, so he was mistaken in this assumption.

Furthermore, I am not surprised that Mr. Redwine could go down to Alabama and dig up assay reports of samples sent in by Al Sarena that would show traces. He could also have gone to Abbot Hanks, or to Smith-Emery, the two laboratories so much discussed in these hearings, or checked the assay records of the mine laboratory itself and found hundreds of assays that assayed over \$2 per ton. Nor am I surprised that Messrs. Hattan and Sanborn could have found and sampled places within the 300 acres of even on each of the disputed claims that would show barren spots. Even the McDonalds could do this, I am sure.

But some of the certificates of assays that Mr. Redwine dug out of the files of the Williams testing laboratory that were introduced here and certified to by Mr. McDaniel as being reports on samples received

from and assayed for the Al Sarena mean nothing in this case unless further certified to us to where the samples were taken or what they represent.

Mr. McDaniel could not do this. He does not know where the samples were taken.

These samples, or some of them, might have been samples to test old dumps. They might have been samples to test the overburden, or just blanks to test the accuracy of the Williams testing laboratory. They might have been samples of concrete or samples to check for future roadways over barren ground, or even samples to check barren areas, areas clear off of the claims. Maybe they were samples taken in another district or another State, say Tennessee, or from Mexico. They could all have come off of one of the disputed claims; maybe off of one of the undisputed claims. Who knows where the samples did come from?

We were not told by Mr. Redwine the exact location from whence they come nor what they represented, at least not for any of all the certificates he had McDaniel identify, except for one sheet. That was assay certificate No. 431869, which reported on 28 samples taken by Messrs. Appling and McCormick.

This assay certificate is significant because it reports the results of samples taken on the 15 disputed claims, and the exact location by survey of the area by Mr. Appling's crew, all Government employees, plotted on maps prepared by them and by photographs taken by Mr. Appling.

Mr. Appling and his crew were most careful and conscientious in performing their duty as per instructions, and in the presence of McCormick.

This one certificate is important. All the rest can be thrown out of the window insofar as this case is concerned. This one assay certificate, No. 431869, represents the results of samples taken in areas pointed out on each disputed claim by the McDonalds who guided us to the several claims and showed us areas of 50 by 150 feet, or of an acre or more of outcropping rhyolite formations, formations not covered by overburden, or bulldozer cuts 100 feet or more long and up to 15 feet deep, or creek banks showing exposures of the mineralized rhyolite, or discovery cuts or shafts where mineralization showed.

Mr. Appling and I chose the spots within these areas where we took the samples. On some claims we took 2 or 3 samples, just to doublecheck our own sampling and to determine if the assays would check each other when samples were taken 50 or 60 feet apart on some of these outcrops.

These assays shown on certificate No. 431869, and submitted by Mr. Redwine, by Appling in his report, and by McCormick along with the photostatic copy of his report, requested by Mr. Redwine in Portland, were not blanks or traces, and they all show mineralization in every instance.

This sampling was to test the claims and to show mineralization on each of the 15 claims if it did exist.

It has been stated in these hearings that the average of the 28 samples indicated a value of \$2.06. It is common knowledge and published information that the famous Homestake Gold Mine in South Dakota, now many years old, has operated continuously for

many years, and is one of the few gold mines operating today on the low gold price of \$35 per ounce. It has processed thousands and thousands of tons of ore, much of which did not assay as high as \$2 per ton and on which profits have been made.

Another famous, very famous, gold mine, the Alaska Juneau in Alaska, operated for years on ore lower in value than \$1 per ton and paid handsomely in dividends from profits until the mine was shut down by the War Order L-208.

Dredges are operating in California around Yuba City and Marysville making a profit on 6 cents per cubic yard of gold-bearing material, material that weighs 3,000 pounds per cubic yard, which means only 4 cents per ton of 2,000 pounds.

All this talk of values has little bearing on whether or not the Al Sarena will or will not become a profitable venture. That remains to be proven. Actually, 10,000 tons mined and processed per day at 40 cents per ton profit equals \$4,000 per day or \$120,000 per month profit.

The values of the timber on Al Sarena would soon be erased at this rate, and it is a possibility.

Congressman Chudoff's claim of Al Sarena mining timber instead of mining ore, and that the McDonalds never intended to mine gold, really would be a joke.

As to using all the timber on the claims for mining purposes, yes, if the square set mining method was necessary to win the ore, as in the case of the famous International Nickel mine at Sudbury, Canada, where 12,000 tons of low-grade ore per day is being processed daily, it would not be many weeks before Al Sarena would be buying mature timbers. International uses at times 800 square sets a day, or about 8 million feet of mine timbers per month.

There are many sawmills in the West that cut from 100,000 to 500,000 feet of timber per day. Ten or twelve million feet does not last long at this rate.

If persecuted further, as they have been in the past, Al Sarena will be forced to market more timber to pay the bills and then just have to buy timber for mining purposes later when needed: 10, or 12, or 20 million feet will not last them long once they get underground.

With reference to the insinuations that there was something improper regarding my handwritten postscript to my letter to the Williams testing laboratories and which postscript was so stressed in the opening moments of the hearing taken here in Washington when Mr. Redwine first put Mr. McDaniel on the stand, I wish to explain just why this postscript was added.

When taking samples one never knows what the gross weight of the sample will be. It might amount to 10 pounds or only 5 pounds, 7 pounds, or  $3\frac{1}{2}$  pounds, or have any weight, depending on the circumstances. If we cut a 10-pound sample to start with and make a split, then we would have two 5-pound samples identical to each other, 1 a reject and the other to be split again, and this repeated until one ends with a pulp-size sample from the last split. If one started with a 5-pound sample as the original gross sample he would be starting with the same weight as the first split from a 10-pound sample, and naturally a 5-pound sample split several times to get a pulp sample would not end up with the same weight as if he started a  $3\frac{1}{2}$ -pound gross sample. The splitting is a standard pro-

cedure to reduce the bulky original sample to a pulp from which the assayer takes his weight for the assay charge. In this instance the pulp would be 1 of the 2 halves resulting from the last split, one-half to be shipped to the assay laboratory and the other half would ordinarily just be discarded.

From Mr. Sanborn's testimony it is quite evident that he and Mr. Hattan sent the whole of the bulk samples, or else in several instances split their original sample to reduce the bulk for shipment to the assayer. They kept no splits or umpires.

In Mr. Appling's and my case we did not ship bulk samples, but prepared the samples and reduced them all to a size suitable for the laboratory so that, instead of shipping some 250 pounds of samples, we reduced the weight of the 28 samples to about 21 pounds. This is also standard practice.

In our case Mr. Appling and I elected to preserve one half of the last split instead of discarding all the splits as Messrs. Hattan, Sanborn did, as Mr. Sanborn testified. They kept no duplicates, no splits, just threw away all their discards from any splits they made. We kept all of our discards and, except for the last or duplicate split, used them to pan for any evidence of mineralization.

In the panning operation all of the host rock is discarded, washed away, and only the metallics are saved. Examination of these metallics with a high powered magnifying lens disclosed in this case pyrite, magnetite, sphalerite or galena present in every sample taken. The pyrite indicated the presence of gold and silver; the sphalerite, zinc; and the galena, lead.

This was good evidence of mineralization and an indicator in each case that values were present in the samples, which the assays would prove.

We had decided to preserve one half of the last split as a duplicate or replacement in case the shipment was lost in transit or an accident occurred in the laboratory that would spoil the assay of any sample submitted, such as a broken crucible or beaker, a spill of the pulp, or a lost bead. It was just a precaution or a safety measure on our part. We had no desire to trudge back into those hills on snowshoes to resample one or more or all those claims.

When the safe arrival of the samples was assured, which was when we each had received our copy of the certificate of assay No. 431,869, there was no longer any use for the duplicates we had kept. So they were destroyed.

All this hullabaloo about how they were destroyed has no bearing in the case except that we happened to throw the samples into the river instead of into a wastebasket or onto a garbage heap. It has been dramatized to shock the public of the United States, when all that happened was simply this: After Appling and I got the samples back from the Department of Geology and Mineral Industries Office, where we had left them for safekeeping, we were driving toward Appling's office and talking about fishing.

I live right on the Rogue River and had invited Appling to come down and try his luck at fishing in front of my home. Just about that time, when about 2 blocks from his office, we could see the Caveman's Bridge over the Rogue River in Grants Pass about 2 blocks straight ahead.

I asked Appling if he ever fished the hole in front of the park across the bridge. He replied, "No."

I suggested that he drive down there and I would show him a spot I had noticed years before. He drove there and while talking we remembered the samples and jokingly it was suggested: "Let's feed the fish some gold and silver instead of cluttering up your office with the samples."

So, while talking fishing, we tossed the discards one by one out into the fishing hole.

Was there anything wrong with that? It was as good a way as any to destroy them, and we weren't cluttering up anyone's office.

Out of this little incident, born on the spur of the moment without a second thought, grows this fantastic story of a premeditated plan to swindle Uncle Sam out of a forest; and, oddly enough, neither one of us would benefit 1 cent out of the act. Nor did the McDonalds even know we were destroying the samples; nor did anyone else.

All this spending of our United States taxpayers' money to unravel such a mighty mystery is utterly ridiculous, I would say. There was never any intention of preserving the samples as umpires for check assaying. There were no instructions to do so; nothing irregular in not doing so.

As stated before, Hattan and Sanborn never even kept their splits or any duplicate samples.

As to umpires, this word has been used so loosely during this hearing that it has lost its significance when referring to assay samples, as generally referred to in "smelter parlance," to quote Mr. Hattan. I'm surprised that no mention has been made of a baseball umpire. If it had everyone would probably have known what was being talked about.

At one time Mr. Redwine actually referred to me as an umpire. Let me explain what is meant when an assay goes to umpire. It simply means that when a buyer and a seller of ores, bullion, alloys, matte, concentrates, or what-have-you, make a trade, usually each has his own assayer who is sent his portion of the pulp for assay, and an umpire pulp is preserved in case the two assayers do not check within certain limits as agreed upon, or according to standard practice and established custom.

If the assays agree and settlement is made, the umpire pulp is usually destroyed or maybe kept for a specified limited time and then destroyed.

We kept our replacement samples until they had served their purpose and were no longer needed, and then destroyed them. They were not preserved as an umpire in smelter parlance, just an extra precaution we ourselves took, and may I repeat that Hattan and Sanborn did not keep any portion of the samples they took at Al Sarena.

While on the subject of samples, there was some discussion regarding whether bags or envelopes were used as containers when we shipped the samples. Let me clarify this point. When the samples are taken in the field they are usually put into canvas sacks, regular sample sacks, for convenience in handling and labeling. When the field samples are reduced to a pulp they are usually put into a paper envelope container of the type I hold up [demonstrating]. That is this one. We followed this standard practice.

When we reduced the samples at the mine Appling had only paper bags of the type I am now holding up, this type [demonstrating].

When we prepared the samples in his office in Grants Pass the next day we transferred the pulps into envelopes. Why? Because the envelopes are stronger, tougher, and less liable to breakage and spillage. They look better and are easier for the assayer to handle.

That's all, except for one thing: In several cases the envelopes were too small to hold all of the pulp representing one sample, so we had to put these oversize pulps into 2 envelopes instead of only 1 envelope, and to fasten the 2 envelopes together to contain 1 sample.

The postscript that was so emphasized at the beginning of the hearings, the one I wrote at the end of my letter to Williams Testing Laboratories advising them that I had shipped them a batch of samples, was only to caution the assayer of the fact that some sample were contained in 2 envelopes fastened together, and instructed him to use all of the pulp contained in 2 envelopes and treat it as 1 sample, not to weigh his assay charge out of 1 envelope only, but to use all of the pulp.

Senator NEUBERGER. Do you have much more, Mr. McCormick? I have to go over on the floor.

Representative HOFFMAN. We might as well have it. It is a fine job counsel has done as to somebody stealing something. I think the witness made it very clear that neither he nor Mr. Appling could profit, anyway. I only wish I had been along on that Rogue River when you stopped to fish.

Senator NEUBERGER. You may proceed.

Mr. McCormick. This note or postscript has been twisted around to sound as if there could have been something very mysterious about the instruction; in other words, as instructions to use up all the sample, to destroy it, leave no evidence, et cetera. Sometimes I wonder how stupid some people can get. It so happens that Mr. McDaniel, the assayer, explained on the stand what he thought the message conveyed, and so did Mr. Volin interpret the postscript as it was meant to be; and that is that, nothing so very fantastic as Mr. Redwine would have the newsmen and the public believe.

One reads in the newspapers under large headlines misstatements of facts, like for instance, where the forestry experts and other Government employees who actually cruised the timber on Al Sarena estimated the total value of marketable timber at the time the application for patent was made in 1948 at \$77,000, and possibly as much as \$126,000 or thereabouts in 1950 when reviewed. Senator Neuberger is quoted by the Medford Mail Tribune, date February 19, 1954, when he was campaigning in Oregon, as saying, and I quote:

I believe the public should know about what appears to be the latest giveaway of natural resources by Secretary of the Interior McKay. To do this he has set aside the judgment of forest rangers, mineral examiners, timber cruisers, and other experts in the field of conservation. The Al Sarena mines, a corporation which I understand is owned largely in Alabama, asked for patents of 23 mining claims in the Rogue River National Forest. Once patent is granted to a claimant the mining firm then can cut the timber growing on the land and convert these profits to its own use.

He goes on to say:

Secretary McKay, acting through the Solicitor of his Department, then overruled the Forest Service and the Bureau of Land Management. He granted the 15 controversial patents, and from this ruling there is no appeal.

It is final. The Al Sarena mines come into possession of approximately \$185,000 worth of timber in the Rogue River National Forest, timber which trained mineral examiners believe should still belong to the American public.

It is my understanding that the Government has received from the company only about \$5 an acre for 450 acres of land. It is significant that the Forest Service never desired to remove the Al Sarena Mining Co. from 15 disputed claims. It is noteworthy that all three echelons of investigation, the Forest Service, the Northwest office of the Bureau of Land Management, and the national headquarters of the Bureau of Land Management, were overruled by Mr. McKay.

What are examiners and rangers in the field actually for if not to determine these essential facts?

He forgot to mention the \$77,000. Senator Neuberger is quoted by the Medford Mail Tribune a little later. He blew this thing up to \$250,000. I have it right here.

Representative HOFFMAN. \$600,000.

Mr. McCORMICK. No, a little later. Medford Mail Tribune, December 2, 1955:

A private assay conducted in far-off Mobile, Ala., was made the basis for grant to the Al Sarena Co. of 15 mining claims in which timber is worth in the neighborhood of \$250,000, perhaps more. This assay was used by the Solicitor of the Interior Department, acting for Secretary McKay, to set aside the ruling of experienced mineral examiners.

Then soon after this \$185,000 figure and this \$250,000, the other day in the Washington Post of January 10, the quarter million dollar figure was doubled to \$500,000, and I quote—

Representative HOFFMAN. Get it up to \$600,000.

Mr. McCORMICK. Then I say here that Senator Kerr Scott stretched this \$500,000 figure to \$600,000 here on the floor. How do they get that way?

If they insist on quoting the mineral examiners and using their statements and figures, why not stick with the Forest Service and continue to quote their figure of \$77,000, instead of using \$500,000 or \$600,000; or, on the other hand, why don't they blow up the \$2.06 average assay to the same proportion of seven or eight times to get \$16 ore to talk about? It would be almost in reach of Mr. Holderer's \$20 figure and there might be some economics to be considered and one might stretch his imagination a little.

If one group of Government experts who testified in Portland could be wrong, could not the other group? If the forestry department was wrong, couldn't Messrs. Hattan and Sanborn also have been wrong? Or should we discount all of the following which I quote from Mr. Hattan's report of December 1949, the report that he turned in and in which he recommended that the 15 claims be disallowed?

This is what Mr. Hattan says in his report to the regional director of the Forest Service on Al Sarena, Inc., dated December 19, 1949, and I am quoting under his general heading, "General Geology," which has already been stated this afternoon:

No intensive study of the geology was made except to note the general trend of known veins and determine in general the rock types exposed on or near the surface of the individual claims. From an examination of the present underground development, and the various surface openings and rock outcrops, there appears to be a dome-shaped central mass, roughly 4,000 feet in diameter, which consists of volcanic breccias and rhyolite. Much of this mass of rocks is altered and bleached and pyritized. Some of it, especially in the vicinity of the main vein, contains lead and zinc sulphide mineralization. These sulphides seem to be the carrier minerals for the gold and silver which are the principal values.

Outside of the central mass rhyolite, volcanic breccias, andesite, and other rocks, possibly phenolite andesite and/or dacite are found outcropping. The geology of the outcrops indicate they consist of flows, dikes, and possibly sills and stocks. There is no known mineralization of value contained in the dacite or andesite rocks found on the surface, but some pyritization was noted in the volcanic breccias and some of the rhyolite.

I comment here that —

Hattan says there is no mineralization in the dacite and andesite, but there is mineralization in the rhyolite and the volcanic breccias which make up the dome-shaped central mass 4,000 feet in diameter. This approximates the area of the 23 claims.

Mr. Hattan goes on, and he says:

Above tunnel No. 1, where mining was carried on many years ago, the apparent higher grade portion of the vein is defined by definite walls which are caused by narrow parallel gouge seams. The distance between walls of this old stoped area was estimated to be 2½ feet. Although the ground in either direction from the higher grade zone is mineralized to an unknown distance, samples indicate that its grade is low.

I comment:

Hattan says that the ground in either direction from the higher grade is mineralized to an unknown distance and that it is low grade.

Senator NEUMERER. Mr. McCormick, let me ask you one thing, because, as I said, I am supposed to be over on the floor fairly soon. About how much longer do you think your testimony will take?

Mr. McCormick. I still have about 3, 4, 5, pages to read.

Representative HODGMAN. Senator, I am willing that Mr. Redwine should act as chairman. I do not care.

Senator NEUMERER. Would you be willing to have this put into the record, or would you rather read it?

Mr. McCormick. I would just as soon have it put in the record, only it is handwritten. I would have it typed so they can read it.

Senator NEUMERER. You go ahead and read it.

Mr. McCormick (reading):

Mr. D. Ford McCormick, mention of whom was made in the application for patent, states in a report to the applicant company that "Practically the entire mass of so-called rhyolite is mineralized. Pyrite and pyrrhotite with some galena and sphalerite can be detected with a lens occurring as crystals or small grains, sometimes thickly grouped, then again scattered. Where the stringers occur the values rise. Shattered zones and banded structure also show higher values."

"McCormick also reported in a report dated July 15, 1937, to the company, that samples from outcrops from numerous places over the claims showed mineralization without exception. Small crystals of pyrite, pyrrhotite, galena, and sphalerite are present, scattered more or less throughout the rock. At some locations narrow stringers occur with kaolin gouge containing a higher proportion of small grains of galena, and where this occurs high grade gold and silver samples are found. Where the stringers and fissures are numerous, the enrichment makes milling ore." He went on to say that insufficient developments have been done to prove a large body of milling ore; several blocks of 4 are present; but aside from 1 possible zone (roughly 600 feet long by 400 feet high) with widths varying from 3 to 40 feet or more) only partially developed, practically no other work has been done in, can be established, and says, if the samples assayed and listed as handed to me on the attached sheets and blueprints are correct, there are several excellent showings that should be investigated without delay.

I included that list, and he goes on to say:

He (McCormick) stated that if these locations show good assays, there would be little doubt that important mining operators would show decided interest in the development of the Al Sarena mine. Then goes on to say that there is not suffi-

cient exposure of milling ore present to warrant a mill other than a pilot mill, and from a study of the assay map, it does not appear as though there is any hope of operating profitably a 50 or 75 ton mill continuously from ore to be mined from the available stopes at the present time.

This was in 1937.

Hattan says:

The pilot mill was constructed to determine if the ores could be concentrated, but no information was available which would show the minimum grade of material which could be mined, concentrated, and sold at a profit. Whether an operation is large or small there is obviously a low point in grade of material which can be handled through any mill at a profit.

My comment is this:

There is nothing in the mining law which requires that, as a basis for patent the applicant must prove a minimum grade of ore or must prove that he can make a profit.

Hattan goes on:

The indications are that the central mass is all mineralized to some extent, and if the prospective parallel shear and mineralized zones should prove to be extensive in length and depth, the possibilities are good that the whole mass could be developed, mined, and milled at a profit by low-cost, large-scale mining methods. \* \* \*

He goes on to describe that and I say:

On page 2 of the report Hattan refers to the "dome-shaped central mass, roughly 4,000 feet in diameter." Above he stated that the central mass is indicated as "all mineralized to some extent and that the possibilities are good that the whole mass could be mined, and milled at a profit by large-scale, low-cost mining methods." He designates three methods for such operation.

Then under "Pertinent data" Mr. Hattan says:

Of the mining methods mentioned above, the central mass, being a low grade proposition with suitable topography, could probably best be mined by the block caving method. In any event, this method is the cheapest yet devised for large-scale, low-grade deposits.

Then he goes on to about the Alaska mine. There is no use repeating that. He says:

Any future values which might be attached to such low-grade deposits would be purely speculative. If a value of \$0.80 per ton were found in a quartz vein, for instance, there might be a possibility of finding greater values by advancing along the vein and a valid discovery would be indicated. In a disseminated body of low-grade minerals, if the average grade is not sufficient to justify the expenditure of time and money in its development, the land should necessarily be classed nonmineral in character. If this is not so, then ordinary rock containing the barest trace of precious or semiprecious minerals should be classed mineral in character and a patent granted. \* \* \*

I comment:

Many values shown at the Al Sarena mine are substantially above those shown at the Alaska-Juneau mine. Present (1949) methods do not measure future methods and improvements. Many prudent men speculate on and strive to work to bring about improved methods in mining, milling, transportation, and so on, the development of new uses for the mineral contents of ores not even suspected at the time of discovery or patent.

For example, the Engineering and Mining Journal for December 1955, reports that for the first time a new gold-extraction process is being used in South Africa at a southern Rhodesia mine. It involves passing the gold-cyanide through a mesh made of synthetic resin. It is claimed that a greater extraction of pure gold is achieved.

Low-grade properties and marginal properties will certainly profit in this operation.

Only 50 miles from the Al Sarena mine, the only nickel mine in the United States is being operated. This low grade deposit was known for many years. Attempts were made to operate, but were unsuccessful. A smelter was built on the property, but it failed. Large and powerful mining groups examined the property and turned it down. Three years ago the Hanna Co. became interested. In excess of \$20 million was invested for a low grade large scale operation. The mine is now producing nickel on a large scale and at a profit.

This illustrates the difference of opinion by groups of men—several turning down a mining opportunity, then one speculating and taking it up—and succeeding with what appeared to be too low grade to others. Improved methods, ample financing, changed conditions, changed markets, new uses, and many other factors contribute to what establishes the minimum grade but these facts do not establish the fact as to whether mineralization existed in the first place.

Mr. Hattan says that the mineralization exists throughout the rhyolitic and volcanic breccia, not only in "the dome-shaped central mass (roughly 1,000 feet in diameter)" but that "the possibilities are good that the whole mass could be developed, mined, and milled at a profit by large-scale low-cost mining method."

It also explodes Mr. Holderer's thought that not by the wildest stretch of the imagination could a production of 100 tons per day ever be reached.

Mr. Hattan seemed to get matters all confused. His assays, for instance, 28 in the group, were sent to Annes May 1949. All but one showed a trace; that one only 12 cents. Nine of these samples he took on the noncontested claims and they were all blanks.

A resampling of the 17 claims in July 1949 showed two of these uncontested claims assayed over a dollar. They were the only two uncontested claims resampled. One uncontested claim was never sampled at all.

He concluded that 6 of the 8 he would allow on the basis of Al Sarena assays taken off of the maps, 2 pulps taken from Al Sarena assays that he had sent to Abbot Hanks to check. One went \$13.37, just twice what the Al Sarena assay was, and one went \$7.93, just \$2.21 under the Al Sarena assay. There was nothing consistent in his reasoning.

To further substantiate my beliefs and conclusions regarding mineralization of the Al Sarena rhyolite body I quote from Mr. Sopp's report dated May 19, 1939:

**Geology:** The 2 rocks described above (1 not identified and 1 a rhyolite) covers a roughly circular area about three-quarters of a mile in diameter and are completely surrounded by andesite.

**Widespread mineralization:** The gold and silver in the main vein is known to be associated within a galena, sphalerite, pyrite, and quartz. These minerals, however, are not confined to any one rock or fracture zone. Galena, sphalerite, pyrite, and vein quartz are found abundantly in the rhyolite and the white flow rock.

This widespread mineralization suggests the theory that during the final stage of one period of extrusion, solutions ascended from a deep-seated magma reservoir to percolate and deposit minerals in every type of rock present except the andesite.

Now, in conclusion, the two United States Geological Survey men, Callaghan and Buddington, Mr. George Sopp, Mr. Hattan, the letters that were read by Mr. Davis quoting Mr. Kissok of New York and Capt. Jewell Morrison of Denver, both mining engineers, and myself all have been on the property and have reported as has been quoted above regarding the mineralization of the whole rhyolite body. Yet Mr. Holderer, who has never seen the property, bases his conclusions

cient exposure of milling ore present to warrant a mill other than a pilot mill, and from a study of the assay map, it does not appear as though there is any hope of operating profitably a 50 or 75 ton mill continuously from ore to be mined from the available stopes at the present time.

This was in 1937.

Hattan says:

The pilot mill was constructed to determine if the ores could be concentrated, but no information was available which would show the minimum grade of material which could be mined, concentrated, and sold at a profit. Whether an operation is large or small there is obviously a low point in grade of material which can be handled through any mill at a profit.

My comment is this:

There is nothing in the mining law which requires that, as a basis for patent, the applicant must prove a minimum grade of ore or must prove that he can make a profit.

Hattan goes on:

The indications are that the central mass is all mineralized to some extent, and if the prospective parallel shear and mineralized zones should prove to be extensive in length and depth, the possibilities are good that the whole mass could be developed, mined, and milled at a profit by low-cost, large-scale mining methods. \* \* \*

He goes on to describe that and I say:

On page 2 of the report Hattan refers to the "dome-shaped central mass, roughly 4,000 feet in diameter." Above he stated that the central mass is indicated as "all mineralized to some extent and that the possibilities are good that the whole mass could be mined, and milled at a profit by large-scale, low-cost mining methods." He designates three methods for such operation.

Then under "Pertinent data" Mr. Hattan says:

Of the mining methods mentioned above, the central mass, being a low-grade proposition with suitable topography, could probably best be mined by the block caving method. In any event, this method is the cheapest yet devised for large-scale, low-grade deposits.

Then he goes on to about the Alaska mine. There is no use repeating that. He says:

Any future values which might be attached to such low-grade deposits would be purely speculative. If a value of \$0.80 per ton were found in a quartz body, for instance, there might be a possibility of finding greater values by advancing along the vein and a valid discovery would be indicated. In a disseminated body of low-grade minerals, if the average grade is not sufficient to justify the expenditure of time and money in its development, the land should necessarily be classed nonmineral in character. If this is not so, then ordinary rock containing the barest trace of precious or semiprecious minerals should be classed mineral in character and a patent granted. \* \* \*

I comment:

Many values shown at the Al Sarena mine are substantially above those shown at the Alaska-Juneau mine. Present (1949) methods do not measure future methods and improvements. Many prudent men speculate on and strive to work to bring about improved methods in mining, milling, transportation, and even the development of new uses for the mineral contents of ores not even suspected at the time of discovery or patent.

He concluded that 6 of the 8 he would allow on the basis of Al Sarena assays taken off of the maps, 2 pulps taken from Al Sarena assays that he had sent to Abbot Hanks to check. One went \$13.37, just twice what the Al Sarena assay was, and one went \$7.03, just \$2.21 under the Al Sarena assay. There was nothing consistent in his reasoning.

To further substantiate my beliefs and conclusions regarding mineralization of the Al Sarena rhyolite body I quote from Mr. Sopp's report dated May 19, 1939:

**Geology:** The 2 rocks described above (1 not identified and 1 a rhyolite) covers a roughly circular area about three quarters of a mile in diameter and are completely surrounded by andesite.

**Widespread mineralization:** The gold and silver in the main vein is known to be associated within a galena, sphalerite, pyrite, and quartz. These minerals, however, are not confined to any one rock or fracture zone. Galena, sphalerite, pyrite, and vein quartz are found abundantly in the rhyolite and the white flow rock.

This widespread mineralization suggests the theory that during the final stage of one period of extrusion, solutions ascended from a deep-seated magma reservoir to percolate and deposit minerals in every type of rock present except the andesite.

Now, in conclusion, the two United States Geological Survey men, Callaghan and Buddington, Mr. George Sopp, Mr. Hattan, the letters that were read by Mr. Davis quoting Mr. Kissok of New York and Capt. Jewell Morrison of Denver, both mining engineers, and myself all have been on the property and have reported as has been quoted above regarding the mineralization of the whole rhyolite body. Yet Mr. Holderer, who has never seen the property, bases his conclusions

on assay samples when he has no idea from whence they came, and says, "Rarely have I seen as poor a batch of assays as that," and later, I might add, that after having summarized these assays, "I made no further attempt to discuss the economics of the mine because there are none."

When asked by Mr. Redwine, "There are no economics there?" Holderer replied, "The economics are zero."

Holderer had previously testified that miners' pay was around \$13 per day in the Coeur d'Alene, some eight or nine hundred miles away, the nearest large mine, and that the man shift average was 2 tons per man. Maybe he doesn't know that at the Riddle Nickel mine, only about 85 miles distant, or only one-tenth as far from Al Sarena, one man handles a 30-ton carryall that scrapes up 30 tons in 1 scoop, and fills and discharges this sized load many times an hour; that this low-grade ore is transported by an automatic tramway operated by 2 men. I have been told, who deliver over 2,000 tons per shift, a distance of over a mile to the smelter stockpile.

Has he not seen one man on a bulldozer push hundreds of tons around in a single shift?

I quote from the New York Times of January 27, 1956, just the other day:

#### PAUL BUNYAN'S BIG "CAT"

##### MAKES DIRT FLY IN MICHIGAN BUILDING NEW HIGHWAYS

LANSING, MICH.—It takes huge equipment to make modern highways and the "Paul Bunyan" of them all is a 35-ton caterpillar.

Manufacturers of the big "cat" say it can move up to 10 yards of earth at a time. It is 12 feet wide and 2 feet 6 inches high.

One man operates this.

Does he think that an area nearly a mile across could not be made to yield over 100 tons per 24 hours?

I quote from the testimony:

MR. JONAS. Is your statement to us that this would not be economic, even if it goes \$2 per ton, based on the amount they propose to mine? What if they stepped up the amount?

MR. HOLDERER. They would never get up to 100 tons, to say nothing of the several thousand tons per day. It would be a physical impossibility.

I say that Mr. Holderer seems to be still living in the pick-and-shovel days. What was good enough for grandpappy is still good enough for him.

Mr. Redwine had Mr. McDaniel answer that there are no operating gold mines in Alabama today. Just where in all of the 48 States are there any gold mines operating today, as such? Only the Homestake in South Dakota and probably a few scattered small high-grade mines in Colorado and California. The gold and silver produced in the United States today comes from the copper, lead, and zinc mines as a byproduct from a few dredges which are very low-cost producers.

An interesting fact is that one can step over to the Smithsonian Institution and among the minerals and gems exhibits find some beautiful specimens of gold mines in Alabama, North Carolina, and South Carolina, and right next to Alabama are the once famous Dahlonega gold mines. One of the first, if not the first, gold mines ever built in the United States was built in the town of Dahlonega, and all of the gold that was minted for Uncle Sam was produced in Alabama.

Carolinias, and Georgia. Dahlenega has been investigated recently as a possible large, low grade producer when economic conditions warrant such a procedure.

It seems to me that the bottom has dropped out from under every accusation and insinuation that the committee has tried to make.

I might add that I do not like the manner in which my name has been dragged into this whole matter. I call it mud and filth. I do not like what the newspapers have printed as a result of it, for instance, in Drew Pearson's column of December 14, 1955, and in the Nevada State Journal in Reno; again just here the other day, January 10, 1956, in the Washington Post; and prior to these dates, these insinuations, half truths, and untruths created out of thin air, and never once any attempt or any effort made by the committee or the press to interview me. To say the least, this is very distasteful to me, talking as a red-blooded United States citizen.

The whole matter seems childish and I hope that the truth will prevail and that the whole thing boomerangs and bursts right in the scandalmongers' faces. Let the chips fall where they may, as Senator Kerr Scott said.

I thank you for allowing me to testify even if I have had to wait over 3 weeks, and I am over 3,000 miles away from home.

Mr. REDWINE. Mr. Chairman.

Senator NEUBERGER. Yes, sir, Mr. Redwine.

Mr. REDWINE. In view of part of the statement read by this witness I would like to read from the record at page 251. This is at the very opening of the examination of Mr. McDaniel, assayer for the Williams Co. I said:

Mr. Chairman, in the examination of this witness certain documents will be submitted to him for examination and explanation. They are from the files of the A. W. Williams Inspection Co.

Further down I said:

These documents that will be submitted to the witness for identification and explanation are from the files of the A. W. Williams Inspection Co., for whom he works.

I think it is only fair that the record should show that they are in the possession of the committee through subpoena.

The Williams Co. has not turned anything over to the committee that has not been subpoenaed, in fairness to its clients. It is a professional matter with them.

I further have here, Mr. Chairman, which I think should go in the record, a letter signed by Chairman Murray, addressed to the United States Marshal in Mobile, Ala., attaching thereto a subpoena for the records of the A. W. Williams Inspection Co., the pertinent part which reads:

You are hereby commanded to furnish the Committee on Interior and Insular Affairs all reports of assays and all correspondence now in your possession relating to any and all ore samples submitted to the A. W. Williams Inspection Co. by or on behalf of Al Sarena Mining, Inc., of Trail, Oreg., for and during the period January 1, 1949, up to and including January 1, 1955.

Senator NEUBERGER. That will go in the record.

(The material referred to follows:)

JUNE 20, 1955.

UNITED STATES MARSHAL,

*Federal Building, Mobile, Ala.*

DEAR SIR: I will appreciate it if you will serve the enclosed subpoena upon Mr. A. W. Williams, president, A. W. Williams Inspection Co., of Mobile, Ala., so that

on assay samples when he has no idea from whence they came, and says, "Rarely have I seen as poor a batch of assays as that," and later, I might add, that after having summarized these assays, "I made no further attempt to discuss the economics of the mine because there are none."

When asked by Mr. Redwine, "There are no economics there?" Holderer replied, "The economics are zero."

Holderer had previously testified that miners' pay was around \$13 per day in the Coeur d'Alene, some eight or nine hundred miles away, the nearest large mine, and that the man shift average was 2 tons per man. Maybe he doesn't know that at the Riddle Nickel mine, only about 85 miles distant, or only one-tenth as far from Al Sarena, one man handles a 30-ton carryall that scrapes up 30 tons in 1 scoop, and fills and discharges this sized load many times an hour; that this low-grade ore is transported by an automatic tramway operated by 2 men. I have been told, who deliver over 2,000 tons per shift, a distance of over a mile to the smelter stockpile.

Has he not seen one man on a bulldozer push hundreds of tons around in a single shift?

I quote from the New York Times of January 27, 1956, just the other day:

PAUL BUNYAN'S BIG "Cat"

MAKES DIRT FLY IN MICHIGAN BUILDING NEW HIGHWAYS

LANSING, MICH.—It takes huge equipment to make modern highways and the "Paul Bunyan" of them all is a 35-ton caterpillar.

Manufacturers of the big "cat" say it can move up to 10 yards of earth at a time. It is 12 feet wide and 2 feet 6 inches high.

One man operates this.

Does he think that an area nearly a mile across could not be made to yield over 100 tons per 24 hours?

I quote from the testimony:

MR. JONAS. Is your statement to us that this would not be economic, even if it goes \$2 per ton, based on the amount they propose to mine? What if they stepped up the amount?

MR. HOLDERER. They would never get up to 100 tons, to say nothing of the several thousand tons per day. It would be a physical impossibility.

I say that Mr. Holderer seems to be still living in the pick-and-shovel days. What was good enough for grandpappy is still good enough for him.

Mr. Redwine had Mr. McDaniel answer that there are no operating gold mines in Alabama today. Just where in all of the 48 States are there any gold mines operating today, as such? Only the Homestake in South Dakota and probably a few scattered small high-grade mines in Colorado and California. The gold and silver produced in the United States today comes from the copper, lead, and zinc mines as a byproduct from a few dredges which are very low-cost producers.

An interesting fact is that one can step over to the Smithsonian Institution and among the minerals and gems exhibits find some beautiful specimens of gold mines in Alabama, North Carolina, and South Carolina, and right next to Alabama are the once famous Dahlonega gold mines. I think it is only fair that the record should show that they are in the possession of the committee through subpoena.

The Williams Co. has not turned anything over to the committee that has not been subpoenaed, in fairness to its clients. It is a professional matter with them.

I further have here, Mr. Chairman, which I think should go in the record, a letter signed by Chairman Murray, addressed to the United States Marshal in Mobile, Ala., attaching thereto a subpoena for the records of the A. W. Williams Inspection Co., the pertinent part which reads:

You are hereby commanded to furnish the Committee on Interior and Insular Affairs all reports of assays and all correspondence now in your possession relating to any and all ore samples submitted to the A. W. Williams Inspection Co. by or on behalf of Al Sarena Mining, Inc., of Trail, Oreg., for and during the period January 1, 1949, up to and including January 1, 1955.

Senator NEUBERGER. That will go in the record.

(The material referred to follows:)

JUNE 20, 1955.

UNITED STATES MARSHAL,  
Federal Building, Mobile, Ala.

DEAR SIR: I will appreciate it if you will serve the enclosed subpoena upon Mr. A. W. Williams, president, A. W. Williams Inspection Co., of Mobile, Ala., so that

this committee may be furnished with certain documents and other material now in the possession of Mr. Williams.

Thank you for your cooperation.

Sincerely yours,

JAMES E. MURRAY, *Chairman.*

UNITED STATES OF AMERICA

CONGRESS OF THE UNITED STATES

To A. W. Williams, president, A. W. Williams Inspection Company, Mobile, Alabama, Greetings:

Pursuant to lawful authority, you are hereby commanded to furnish the Committee on Interior and Insular Affairs all reports of assays and all correspondence now in your possession relating to any and all ore samples submitted to the A. W. Williams Inspection Company, by or on behalf of Al Sarena Mining, Inc., of Trail, Oreg., for and during the period January 1, 1949, up to and including January 1, 1955.

Hereof fail not, as you will answer your default under the pains and penalties in such cases made and provided.

To United States Marshal, Federal Building, Mobile, Alabama, to serve and return.

Given under my hand, by order of the Committee, this 20th day of June, in the year of our Lord one thousand nine hundred and fifty-five.

*Chairman, Committee on Interior and Insular Affairs.*

Mr. McCORMICK. May I say that is absolutely and probably true, but did you find out where those samples came from, where they were taken? No. Where do you say they were taken, excepting that one group? They are specifically located. These others could have been concrete. They could have been taken in Mexico or sent down by the Al Sarena Mining Co. That doesn't say where they came from.

Representative HOFFMAN. Is that all, Mr. Chairman, at this time?

Senator NEUBERGER. Yes, sir.

I just wanted to ask one question of Mr. McCormick, if I may.

Are you now in the employ of the Al Sarena Mines or the McDonalds?

Mr. McCORMICK. I am not and have not been since I reported to you and testified in Portland.

Senator NEUBERGER. You have not been since you testified in Portland?

Mr. McCORMICK. No.

Senator NEUBERGER. I thank you very much, Mr. McCormick, for coming here. Your statement, of course, will appear in full in the record.

The committee will stand in recess until, as under the previous order I believe, next Tuesday at 10:30 a. m.

Representative HOFFMAN. Let the record show, if you will, please, that the only members of the committee present are the Senator from Oregon, the Congressman from North Carolina, Mr. Jonas, and the Representative from Michigan and the committee staff.

Senator NEUBERGER. And the committee staff also is present.

Representative HOFFMAN. Yes. Mr. Redwine, Mr. Coburn, Mr. Lanigan, and Mr. Perlman.

Senator NEUBERGER. And as the second acting chairman let me say I appreciate the attendance of the distinguished gentleman from Michigan and the gentleman from North Carolina.

Representative HOFFMAN. We are glad to be here.

(Whereupon, at 5:15 p. m. the hearing was adjourned.)

## APPENDIX

---

### MATERIAL SUBMITTED FOR INCLUSION IN THE RECORD AFTER TERMINATION OF TESTIMONY

#### MATERIAL SUBMITTED BY UNITED STATES FOREST SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,

Washington 25, D. C., February 16, 1956.

Re Adjustments, R 6, Rogue River, Al Sarena Mines, Inc.

Hon. W. KERR SCOTT,

Acting Chairman, Legislative Oversight Subcommittee,  
Committee on Interior and Insular Affairs,  
United States Senate.

DEAR SENATOR SCOTT: This is in reply to your letter of February 8 concerning mining claim appeal cases involving national forest land.

We have searched our files for the period 1948 through 1955 and find that there have been three cases involving patent application, in which the Forest Service was the contestant, which were appealed to the Secretary of the Interior. For these cases, the average elapsed time between the filing of application for patent and the final decision of the Department of the Interior was 3 years, 11½ months.

Sincerely yours,

EDWARD C. CRAFTS,  
Assistant Chief.

FEBRUARY 13, 1956.

---

#### STATEMENT

Omitted from page 10 of Under Secretary Davis' testimony is reference to a letter of December 15, 1948 from the assistant regional forester at Portland to the regional administrator of the Bureau of Land Management. A copy of this letter, which requests the services of a qualified mineral examiner, is attached. This is the letter Mr. Leonard B. Netzorg referred to in his letter of April 14, 1949 to the claimants (mentioned on p. 11 of Davis' testimony). Davis' testimony makes it appear that Netzorg's letter of April 14, 1949 to the claimants contained the wrong date when referring to the Forest Service request of BLM for a field examination and report. The date used by Netzorg is correct.

The statement on page 10 of Davis' testimony "that the Forest Service had been notified 3 months before of the filing of these claims and apparently had done nothing about it" does not agree with the record. The first action of the Forest Service was on December 2, 1948 when the forest supervisor wrote the regional forester (copy attached) calling attention to the "notice for publication." On December 7, the regional forester's office requested by phone a copy of the application from BLM and by memorandum of December 9 (copy attached) transmitted a copy to the forest supervisor and made inquiry as to when claims could be examined. The Forest Service had no knowledge of the filing of the patent application until December 2, 1948, and thereafter promptly initiated first steps in arrangements for having the claims examined. Because of snow it was not feasible to examine the claims until the following spring. Hattan's reminder, referred to in the regional forester's letter of March 17, 1949, to the district manager of the Bureau of Land Management, related only to a technicality and did not influence Forest Service decision to examine the claims.

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
December 15, 1948

Re adjustments, Rogue River mining claims.

Mr. W. H. HORNING,  
Regional Administrator, Bureau of Land Management,  
Portland, Oreg.

DEAR MR. HORNING: We have recently received a copy of the notice for publication and the application for patent filed by the Al Sarena Mines, Inc., for patent to the following claims in the Rogue River National Forest:

Oro Alto (2)	Mark Applegate (10)	Rainboe (18)
Oro Rico (3)	H. McKenzie (11)	Della McKinnon (19)
Cougar (4)	J. L. Grubb (12)	Sulphide (20)
Oro Real (5)	J. D. McKinnon (13)	Staples (21)
J. W. Merritt (6)	Henry Applegate (14)	Manganese (22)
Peter Applegate (7)	A. W. Dahlberg (15)	La Jolla (23)
Oro Escondido (8)	Telluride (16)	Arroyo Verde (24)
W. C. Leever (9)	Alabama (17)	

Since we do not have a qualified mineral examiner we will appreciate your assistance in examining these claims in accordance with the system which has worked so successfully for us during the past 2 or 3 years.

Word from Supervisor Janouch of the Rogue River indicates that this fall examination should be deferred until next spring. Recent snows, plus usual winter conditions, make field work in this area impracticable at this time.

We have only one copy of the notice for publication and application for patent. These can be made available for your use at any time they are needed. In the meantime, however, we will hold them in our files until you request otherwise.

Very truly yours,

FRANK B. FOISOM,  
Assistant Regional Forester.  
By K. WOLFE, Acting.

DECEMBER 9, 1948

To: Forest Supervisor, Rogue River.  
From: Recreation and Lands, K. Wolfe, Acting.  
Subject: U-adjustments, Rogue River mining claims.

Reference is made to our memorandum of December 7, and to related correspondence.

Attached are our only copies of the notice for publication and application for patent in this case. Under separate cover we are sending you 2 copies of each of the 3 sheets comprising mineral survey No. 879.

It is presumed that you will want these claims examined by a mineral examiner before recommending whether a protest should be entered by the Forest Service against the patenting of any or all of them. Probably we can secure the assistance of Mr. Hattan, who is somewhat familiar with these claims. If we can, what are the ground conditions at present? Is the area covered with snow? Do you think now is a satisfactory time to make the examination, or should we figure on delaying it until early spring? Please let us have your recommendations. With them please return the notice for publication and application for patent. If you feel that copies of these instruments are essential, we will try to have them made as and when opportunity presents.

K. WOLFE.

DECEMBER 2, 1948

To: Regional forester.  
From: Forest supervisor, Rogue River.  
Subject: U-adjustment, mining claims.

Attached are (1) clipping from the Medford paper containing a summons and notice for publication and (2) map showing approximately the location of the tract.

Before patent proceedings go too far we wonder if the Forest Service should protest the patent until our mineral examiner determines the validity of the claim.

KARL L. JANOUCH.

UNITED STATES FOREST SERVICE,  
Washington 25, D. C., February 1, 1936.

For the record

By John Sicker, Chief, Division of Recreation and Land Uses.

Subject: U Adjustments, R 6, Rogue River, Al Sarena Mines, Inc.

In answer to the question I asked by phone of William Sanborn today "Did the McDonalds request that you spit the samples taken at the time you and Hatten made your examination of the claims so that they would have a sample to have assayed?" Sanborn stated that to the best of his recollection no such request was made. He further advised that had such a request been made he is certain he would have requested it and that he would have agreed to splitting the samples providing the crushing and spitting was done under his and Mr. Hatten's supervision. Sanborn further advised that in all his years of mineral claim work he has never been requested by a claimant to spit a sample so that the claimant could have the sample assayed as well as the Government.

JOHN SICKER.

DECEMBER 7, 1948.

To: Forest supervisor, Rogue River.

From: Recreation and Lands, Frank B. Folsom.

Subject: U Adjustments, Rogue River, mining claims.

Reference is made to your memorandum of December 2.

On receipt of this memorandum we got in touch with the local land office by telephone, and found that they had overlooked sending us a copy of this application for patent. They will now send the usual notice and we will ask for your report and recommendations as in other applications for mining patent. Thanks for bringing this matter to our attention.

FRANK B. FOLSON.

DEPARTMENT OF THE INTERIOR, BUREAU OF LAND  
MANAGEMENT, OREGON DISTRICT LAND OFFICE,  
Portland, Oreg., December 7, 1948.

REGIONAL FORESTER,

Portland, Oreg.

(Attention: Mr. Wolfe.)

DEAR SIR: As was advised in our telephone conversation today, I am enclosing a copy of the notice for publication, together with a copy of the application for patent, filed by the Al Sarena Mines, Inc., in connection with mineral application 0025.

We trust this will give you the information desired and regret the forwarding of these papers to you was overlooked.

Very truly yours,

CARL F. SPAULDING, Assistant Manager.

DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE, NORTH PACIFIC REGION,  
Portland, Oreg., March 17, 1949.

Re: Adjustments, Rogue River mining claims.

Mr. CHARLES LEE,

Manager, Oregon District Land Office,

Bureau of Land Management, Portland, Oreg.

DEAR MR. LEE: Reference is made to Mr. Spaulding's letter of December 7, transmitting a copy of the notice for publication and a copy of the application for patent filed by the Al Sarena Mines, Inc., in connection with mineral application 0025.

Thanks to Mr. Hattan, my attention has been called to the fact that I neglected to ask you to withhold action on this application until the Forest Service had had an opportunity to have these mining claims examined. Mr. Hattan is planning to examine these claims for us as soon as weather conditions will permit. Until his report is received we will appreciate it if action can be withheld in accordance with the provisions of regulation 44LD360.

Very truly yours,

H. J. ANDREWS, *Regional Forester.*  
By FRANK B. FOLSOM, *Acting.*

WASHINGTON, D. C., August 5, 1915.

To: The Commissioner, Chief of Field Service, chiefs of field divisions, registers and receivers, General Land Office, Department of the Interior; the forester, district foresters, Forest Service, the Solicitor, the district assistants to the Solicitor, Department of Agriculture.

GENTLEMEN: Better to effectuate cooperation in protecting the interests of the Government and settlers and other claimants to lands within national forests, the following order is made, effective on and after October 1, 1915, superseding order of November 25, 1910 (39 L. D., 374):

1. Hereafter when a person files application to make an entry, or to amend an existing entry, embracing lands within a national forest, basing the right of entry, or amendment, on settlement prior to the establishment of the forest, the register and receiver will require such person to file with his application a statement under oath, in duplicate, containing his name and address, description and character of the land involved, the date he established residence on the land, his absence from the land, kind and character of improvements placed thereon, and the amount of land cleared and cultivated, accompanied by the affidavit, in duplicate, of at least one disinterested person, corroborating the statement. The register and receiver will immediately forward the duplicate of such statement and affidavit to the supervisor of the national forest in which the lands are embraced, with information as to the date of filing the application, the date of filing the township plat of survey covering the land, and any other facts of record affecting the application, and will suspend action on the application for 60 days, or upon the request of the forest supervisor, where climatic or other conditions require, for such time, not to exceed 6 months, as will enable him to make an examination of the claim, unless in the meantime they shall receive notice of no protest, as hereinafter provided.

2. The register and receiver in issuing notice of intention to make final proof upon claims, either mineral or nonmineral, within a national forest shall immediately furnish a copy thereof to the supervisor in charge of such forest, and other than to publish such notice and receive final proof will, except in mineral cases as hereinafter prescribed, suspend action on the final proof for 60 days from date thereof, or upon the request of the forest supervisor, where climatic or other conditions require, for such time, not to exceed 6 months, as will enable him to make an examination of the claim, unless in the meantime they shall receive notice of no protest as hereinafter provided. In each case, however, where the register and receiver, upon examination of the final proof at any time after its submission, find it to be incurably defective, the same will be rejected and the Forest Service so advised, notwithstanding the time within which a protest may be filed hereunder has not expired.

3. The forest supervisor upon receipt of the statement mentioned in paragraph 1, or the notice mentioned in paragraph 2, will at once make investigation of the claim, and will submit to the district forester a report thereon, unless immediately investigation is impossible because of climatic or other conditions, when an extension of time will be requested as provided in paragraphs 1 and 2 hereof, and the investigation will be made and the report submitted as soon as possible within the period of extension. The district forester will promptly consider the report and if of opinion that no protest should be filed will so advise the register and receiver. If the district forester is of opinion that a protest should be made he will transmit the papers to the district assistant to the Solicitor, who will prepare for his signature a protest, not under oath or corroborated, in which shall be plainly and briefly stated the grounds upon which the protest is based. The protest shall be filed in triplicate with the register and receiver of the proper local land office.

4. Upon receipt of the protest, the register and receiver shall immediately forward a copy thereof to the Commissioner of the General Land Office, in accordance with rule 4 of the Rules of Practice, and in every case immediately issue the notice required by rule 5 thereof accompanied by a copy of the protest, stating that unless the adverse party appears and answers the allegations of said notice within 30 days after service thereof, the allegations of the protest shall be taken as confessed. Upon the filing of the answer, the register and receiver shall set a date for a hearing, after consultation with the district assistant to the Solicitor, and notify parties as provided in the Rules of Practice. Upon failure of the claimant to appear at the hearing the allegations of the protest will be taken as confessed. Hearings shall be conducted in accordance with the Rules of Practice. In other than mineral cases, action upon the application and upon the final proof, which may be offered in the usual manner, shall be suspended pending the final determination of the protest, except as provided in paragraph 2 hereof for the disposition of incurably defective proof. In mineral applications for patent the proof shall be considered on its merits, and, if found regular, certificate issued, but the claimant should be advised in such case that patent will be withheld by the General Land Office pending determination of the protest.

5. If no protest be filed within the time limit as provided in paragraphs 1 and 2 hereof, the register and receiver shall take appropriate action upon the application or the final proof. But in no case, in the absence of the filing of a protest or a no protest notice as heretofore provided, shall patent issue until the Commissioner of the General Land Office is notified by, or ascertains from, the forester that the claim will not be protested, as provided in paragraph 6 hereof.

6. A protest may be initiated against any claim, mineral or nonmineral, embracing lands within national forests at any time prior to patent, by the solicitor or the district assistant to the Solicitor of the Department of Agriculture filing in the local land office, in triplicate, a complaint signed by the forester or the district forester, not under oath or corroborated, setting forth clearly and briefly the grounds of the protest. Upon receipt of such complaint the register and receiver shall forward a copy thereof to the Commissioner of the General Land Office, issue the notice required by rule 5 of the Rules of Practice, accompanied by a copy of the complaint, and arrange for a hearing, if applied for, as provided in paragraph 4 hereof.

7. In all hearings affecting lands or claims within a national forest the district assistant to the Solicitor will be entered of record as appearing in behalf of the Government, and will conduct the Government's side of the case.

8. Forest lien and school selection cases will be handled by the chiefs of field division of the General Land Office in like manner as heretofore. The forest officers will, upon request of the chiefs of field division, render any assistance possible in the making of investigations, and the district assistants to the Solicitor of the Department of Agriculture will cooperate with the chiefs of field division in the conduct of hearings in such cases, and thereafter will take action in like manner as heretofore, including the taking of appeals to the Secretary of the Interior.

9. In all Government cases before registers and receivers involving lands or claims within a national forest, the district assistant to the Solicitor shall be served with copies of all answers, appeals, motions, orders, and decisions required to be noted under the rules in cases of private contests. The proper law officers of the Department of Agriculture shall also have a right of appeal from any decision by the Commissioner of the General Land Office and to file motion for rehearing in the Department of the Interior, or take other like action in the same manner as a private contestant, and shall receive like notices of proceedings and decisions: Provided, however, that the Department of Agriculture shall not be required to take formal appeals from decisions of registers and receivers.

10. Chiefs of field division and special agents will not hereafter take action in regard to any claims within a national forest, except as provided in paragraph 8 hereof, unless specifically directed by the Commissioner of the General Land Office or the Secretary of the Interior: Provided, that the chiefs of field division may, on request of a district forester, assign mineral examiners to assist in the investigation of cases involving mining claims.

11. Costs of hearings will be paid from the appropriation for expenses of hearings in land entries as now provided for other Government contests. Prior to June 1 of each year the district assistant to the Solicitor will mail to the chief of field division in whose division the lands involved an estimate of the funds necessary to cover the hearings during the first quarter of the ensuing fiscal year. Like action will be taken on the first day of each month which imme-

diately precedes the other quarters of the fiscal year. Such estimates should be accompanied by a list of cases to be heard, which should include the names of claimants, local land office, and serial number of entry or application, and character of entries or filings. The chief of field division will transmit the lists and estimates received from the district assistant to the Solicitor to the Commissioner of the General Land Office at the same time he submits his estimates for hearings involving lands in his district outside of national forests. When these lists and estimates are received in the General Land Office the appropriation will be allotted for the quarter, and each chief of field division will be advised of the amount which will be allowed for forest cases, and he will advise the district assistant to the Solicitor thereof. Payment for the expenses of hearings from the appropriation so allotted will be made by special disbursing agents upon proper vouchers, as is now provided for Government contests in cases outside of national forests, but such vouchers must be approved by the district assistant to the Solicitor and by the chief of field division before payment is made.

Respectfully,

FRANKLIN K. LANE,  
*Secretary of the Interior.*  
 D. F. HOUSTON,  
*Secretary of Agriculture.*

DECEMBER 15, 1955.

To: For record.

By: W. E. Sanborn, Mining Engineer.

Subject: U-ADJUSTMENTS, R-6, Rogue River, M. A. 0065 Oregon: M. S. 579;  
 Contest No. 38, Al Sarena Mines, Inc.

In memo dated June 14, 1949 (U-ADJUSTMENTS-Mt. Baker, Jumbo Copper Mining Co., M. A. 019916 Spokane) the regional forester of region 6 headquartered in Portland, Oreg., by Frank B. Folsom informed the regional forester of region 5 at San Francisco, Calif., that Mr. Hattan, evaluation engineer for the Bureau of Land Management, had made an examination of 23 claims in the Rogue River National Forest for which the Al Sarena Mines, Inc., had pending a mineral patent application and of Mr. Hattan's proposal for the undertaking of a re-examination beginning July 12 and possible continuing for a 3-day period. The memo asked that Mr. Sanborn, mining engineer for region 5 be present and join in the examination if it was at all possible. Subsequent to receipt of said communication, Regional Forester Andrews was advised that Mr. Sanborn would be available to participate in the further examination and would meet Mr. Hattan in the forest supervisor's office at Medford the morning of July 12.

The writer met Mr. Hattan in Medford, Oreg., about 8:30 the morning of July 12 and continued to Rogue-Elk in the Government vehicle in Mr. Hattan's possession where arrangement for several days lodging was made. We then drove to the Al Sarena mine where Charles and H. P. McDonald, Jr., and a Mr. Aitland were met. Thereafter, in the presence of and in consultation with the two McDonalds, we proceeded with the examination including the work of cutting samples at places designated by them. This work extended over the 3 succeeding days, namely, July 13, 14, and 15.

The samples taken being 18 or so in number were cut either by Mr. Hattan or myself in the presence of one or both of the McDonalds with the numbering and descriptive record kept by Mr. Hattan. Concurrent with the number designation and recording of details as to each sample, a corresponding identification number was placed on a slip of paper and put into a cloth bag along with material comprising the sample and securely tied. The samples were thereafter carried in our possession until they could be conveniently locked in the Government sedan.

Before leaving the property and for the purpose of checking values depicted on the assay map of the main underground workings, three pulp samples were picked at random from a large number of pulps retained in individual paper sacks in storage in the mine assay office.

These pulps were from samples taken during work carried on in past mining operations and carried identifying numbers identical to those appearing on the assay map.

Throughout the entire examination our dealings and discussions with the McDonalds were carried on in an amicable atmosphere of mutual respect, and every consideration was afforded them. They likewise evidenced complete cooperativeness.

We left our Rogue-Elk lodging point the morning of July 16 driving to Medford. There the samples taken during examination were transferred from Mr. Hattan's Bureau of Land Management's sedan to the trunk of the Forest Service open rental sedan which I had picked up at the Redding Equipment Depot upon arrival from San Francisco via train July 7, and in which I had driven to Medford July 12.

Thereafter I drove to Chico, Calif., headquarters of the Magalia ranger district, and spent the following 6 succeeding days on the Lassen National Forest. On July 23 I drove to Quincy, Calif., wherein the headquarters of the Plumas National Forest is situated, and spent July 24, 25, 26, and 27 in and out of there. I arrived at Redding, Calif., at about 6:15 the evening of the 27th in time to catch the Shasta Daylight for San Francisco arriving there about 11:20 p. m.

To the best of my recollection and belief refreshed from review and analysis of my diary entries following my return to San Francisco after appearance before Interior and Insular Affairs joint subcommittee at Portland, November 25, 1955, the samples taken from the Al Sarena property were kept locked in the trunk of the sedan used by me as is my practice until left with the warehouseman, John Gray, at the forest supervisor's headquarters at Quincy, July 26, 1949, with instructions they be boxed and shipped to the regional forester in San Francisco.

In the meantime, Mr. Hattan on July 20, mailed me two pulp samples comprising the remaining fractions of 2 of the samples taken on the occasion of his first examination of the property and which along with 22 additional samples had been submitted to the Annes Engineering Co. of Grants Pass, Oreg. for assay. The 2 pulp samples received in the mail and the samples taken during our July 12 to 15 examination including the 3 pulps previously mentioned were delivered to Abbot A. Hawks, Inc., assayers, engineers and chemists, at 624 Sacramento Street, San Francisco, Calif., by me about August 7, 1949, with a covering Bureau of Land Management purchase order. The assay certificates setting forth the findings of work specified were mailed by Abbot Hawks directly to Mr. Hattan upon completion of their determinations.

Sometime thereafter, either through correspondence or by direct consultation, Mr. Hattan and I reached general agreement as to which claims might reasonably be considered as eligible for patent and which were not. Mr. Hattan thereafter proceeded in the preparation of report covering his initial examination and the joint one made in July, the completion date of which was December 19, 1949.

The original and 1 copy of said report were likewise mailed that same date to the regional forester in Portland who in turn under date of January 16, 1950, mailed 1 copy to the regional forester in San Francisco for my consideration, concurrence and/or comments. Thereafter on February 7, 1950, the said copy was returned to Regional Forester Andrews with advice that I had approved of it and concurred in the recommendations set forth therein. The case file was referred to the attorney in charge of the Portland office of the Solicitor of the Department of Agriculture March 16, 1950, by the Regional Forester's office at Portland with the request that a proper instrument be prepared for the usual signature of the regional forester. The instrument drafted consistent with the recommendations made in the report and pursuant to the request was transmitted to the regional forester by the attorney-in-charge, March 31, 1950, who in turn directed said protest to the manager of the United States Oregon Land Office, Bureau of Land Management, Swan Island Station, Portland 18, Oreg., attached to letter dated April 11, 1950. The letter advised that no objection would be made to issuance of patent to 8 specified claims involved in the entry and further alleged the requirements for patent had not been met as to the remaining 15 claims on the grounds set forth in the attached protest instrument.

The land office mailed notice of charges to the Al Sarena Mines, Inc., Mobile, Ala., April 25, 1950, which company in turn filed an answer May 22, 1950.

On August 21, 1950, the manager of the land office issued a notice of hearing to be held at 10 a. m., September 13, 1950, in room 121, Building I, Swan Island, Portland 18, Oreg., in the matter of Contest No. 38, *United States Forest Service contestant v. Al Sarena Mines, Inc., contestee*.

I was advised of said hearing and in company of Mr. Farr proceeded to Portland where I appeared as a witness in the contest proceedings. The record of such proceedings sets forth my testimony which boiled down was to the effect that as to the claims in question no discovery of mineral had been made within the purview of the mining law and that I concurred with Mr. Hattan's testimony covering the matter of the charge that not sufficient expenditure in development had been made on or for the benefit of 5 of the claims as charged.

Thereafter the particulars of the case with respect to the decisions of the manager of the land office and the Director of the Bureau of Land Management and appeals in connection therewith were not specifically known to me until I received a copy of Solicitor Davis' January 6, 1954, decision attached to a letter Mr. Hattan wrote to me January 28, 1954.

As a result of a telephone conversation between region 6 and region 5, November 21, 1955, I learned that a subcommittee of the Senate Interior and Insular Affairs were holding hearings in Portland and had asked that I be available for questioning relative to my participation in the Al Sarena case. I left the afternoon of the same day arriving in Portland at 9 a. m., November 22, 1955.

I was in attendance at the hearing the afternoon of November 22 and all day 23 and 25. On the latter date at approximately 7:30 p. m. I was called and under oath questioned by the committee. The questions put to me by the committee were in relation to my routine actions that had taken place many years previous. I replied to all questions to the best of my recollection and honest belief.

W. E. SANBORN.

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE, NORTH PACIFIC REGION,  
*Portland, Oreg., April 11, 1956.*

Re adjustments, Rogue River mineral claims, Al Sarena Mines, Inc.

MANAGER, OREGON LAND OFFICE,  
*Bureau of Land Management, Portland, Oreg.*

DEAR SIR: Reference is made to your letter of December 7, 1948, advising us of the application of the Al Sarena Mines, Inc., for patent to 23 mining claims located in the Rogue River National Forest (mineral application 00057).

These claims have been examined by qualified mineral examiners and on the basis of their findings it seems evident that the following claims meet the requirements of the mining laws and the Forest Service will, therefore, have no objection to their proceeding to patent: Oro Alto, Peter Applegate, H. McKenzie, A. W. Dahlberg, Oro Rico, Oro Real, Mark Applegate, and Telluride. The patents to the Oro Alto, Oro Rico, A. W. Dahlberg, and Telluride claims should reserve the rights-of-way for existing Forest Service roads which now cross parts of these claims.

The remaining 15 claims do not meet the requirements for patenting and I am, therefore, enclosing the original and 2 copies of a protest to the issuance of patents for these claims.

Very sincerely yours,

H. J. ANDREWS, *Regional Forester*

[Handwritten note: 2/9/54—Mr. Sieker advises field office states by long distance phone rights-of-way referred to was after locations, and do not go to patent. LHD N.]

AFFIDAVIT OF MINERALS EXAMINER ELTON M. HATTAN

DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
*Washington, D. C., March 28, 1956.*

HON. JAMES E. MURRAY,  
*Chairman, Committee on Interior and Insular Affairs,  
United States Senate, Washington, D. C.  
(Attention: Mr. Robert Redwine.)*

MY DEAR SENATOR MURRAY: Attached is the affidavit of Elton M. Hattan, dated February 17, 1956, which was requested by Mr. Robert Redwine of the committee staff.

Sincerely yours,

EDWARD WOOLFEY, *Director*

COUNTY OF MULTNOMAH,  
*State of Oregon, ss:*

I, Elton M. Hattan, having first been sworn, depose and say that the United States Senate Committee on Interior and Insular Affairs has transmitted to me a copy of a report, Geophysical Examination, property of Al Sarena Mines, Inc., Trail, Oreg., prepared by Mr. Charles R. McDonald.

The committee, through a member of its professional staff, Mr. Robert W. Redwine, under date of February 6, has called my attention to the last paragraph beginning on page 2 following the table of geophysical readings, which carries over to page 3 and down to a purported assay report. I have been asked to study this paragraph and give the committee my comments on the same. I have also been invited to give my comments on the entire document under oath.

The following are my comments and a statement of pertinent facts as I know and believe them to be true:

Mr. McDonald did not qualify himself as an expert in the use of a Fischer Mescope. Such a machine in the hands of an amateur might lead to very unreliable conclusions. I have never used such an instrument and therefore am not qualified to say anything about it.

Reference is made to the last paragraph on page 2 of the report. I have marked the various sentences with numbers. The sentence read as follows:

(1) "In addition to the foregoing findings, a group of samples was taken and assayed from these claims, later contested, at the direction of Mr. Hattau.

(2) "Specific procedure and requirements were outlined for this sampling and assaying and were fully complied with.

(3) "All samples were assayed and reported upon by reputable commercial laboratories who are recognized and patronized by the United States Government.

(4) "Mr. Hattau directed that this sampling and assaying be done at the expense of Al Sarena Mines, Inc., and that the results thereof be reported to him in his own specific form, admitting at that time the inconclusive nature of his own examination.

(5) "He further agreed that the results reported to him would be used as evidence in determining the outcome of the patent application filed by Al Sarena Mines, Inc.

(6) "Results reported to Mr. Hattau, omitting results reported on uncontested claims, are as follows:"

In reply to (1), I will say that I have never at any time or any place directed any mineral claimant to take a sample and to submit the results to me. In this case I believe that I stated in the presence of Mr. Sanborn and the others of the party during or after the examination of the claims in July 1949, that if the mineral claimants desired to take further samples and submit the assay results to me, I would consider them. In this instance the samples that were submitted prior to the submission of my report to the Forest Service on December 19, 1949, were considered. The samples listed in Mr. McDonald's report beginning AWW2 down to and through AWW26 were all on the assay certificate which was mailed to me and received by me December 30, 1949. This was after I had submitted my report to the Forest Service. May I at this point state that Mr. McDonald's report is incomplete as to one assay which is shown on the assay certificate dated November 18, 1949. This is numbered 23E Oro Alto (dupl. Hattau), and shows the following results:

Ounces gold per ton 0.025, value gold-----	\$0. 870
Ounces silver per ton 0.025, value silver-----	.023
Total-----	.900

Because of the values shown for the samples taken by the claimants' representatives, I considered making a reexamination of the places described. The descriptions given, stating the place from which samples were taken, were inadequate and incomplete and I could not determine exactly where all the samples had been taken. Thereafter, I wrote two letters to the McDonalds and asked them to clear up certain points. The letters of reply arrived January 9 and February 16, 1950. The information given was still not clear as to where all of these samples were taken.

By this time it was known that the Forest Service expected to bring adverse proceedings against 15 of the claims. It was therefore decided to delay any reexamination, a regular procedure, until some convenient date prior to setting of a hearing. Because of demands of the claimants and other persons who interceded for them, a hearing date was scheduled for September 13, 1950. The notice setting the hearing was dated August 21, 1950.

On August 21, 1950, a telegram was sent to me at the Skykomish Ranger Station, Skykomish, Wash., where I was doing fieldwork on a group of mining claims. The telegram stated, "Necessary you appear at hearings on Al Sarena claims at Portland, September 13. Please arrange field schedule accordingly." After that

date I completed my commitments, returned to Portland on the afternoon of August 27, made arrangements to return to the Al Sarena property, traveled by rail to Medford, picked up an automobile there and went on the property on the afternoon of September 5 and again on September 6. I took the minimum number of samples which I considered necessary to show whether the assays shown on the certificates submitted to me subsequent to July 1949 were material or immaterial. I took all of the samples that I could under the circumstances. Because of the very short interval of time, I did not notify the applicants' agents that I was returning to the property to take additional samples since it was understood they were residing in Alabama. I did, however, return and did take seven more samples in the presence of Mr. Fred H. Altland, an employee, who was still on the property and taking care of it for the applicant company. Mr. Altland pointed out the places where the McDonald samples had been taken and which the McDonalds assured me he knew about in their letter of August 19, 1949, quote, "Mr. Altland knows the exact spots from which the samples were taken. The outcrops are distinct and the locations of the samples can be easily seen."

(2) I believe Mr. McDonald is in error in making this assertion. I believe that I outlined to him how I would sample the claims and what I would do with the samples. I don't know how he finally did take his samples.

It has always been my impression that it is up to the applicant for patent to determine how he wants to take his samples. After all, it appears that it is his responsibility to show they were taken in such a way they could be admitted in evidence by his attorney at a hearing.

(3) This statement may be true. Personally I have never sent any samples to the A. W. Williams Inspection Co. for assay and report. I know nothing about the use of this company's services by other Government agencies. I do know that I have sent samples to Abbott A. Hanks, Inc., laboratory from time to time for many years.

(4) As to this statement, I believe Mr. McDonald is mistaken. As stated above, I cannot direct a claimant to do anything. It is the business of the mineral claimant to take samples wherever and whenever he may see fit to do so and likewise he has a free choice of assay laboratories. I may have told the Messrs. McDonald that if they desired to submit additional assays of samples which they took from the claims, the expense would have to be borne by the Al Sarena Mines, Inc., certainly the Government would not foot their assay bill.

Mr. McDonald is also mistaken as to my specifying a particular form on which or how the assay results should be reported. At this time I do not remember clearly the substance of discussions concerning conclusive or inconclusive sampling and assaying. I do know that when I took samples from the claims in May and again in July 1949, there were elements concerning mineral character of the various claims that were inconclusive. However, when all the assay results were brought together and it was shown by check assays that Annes Engineering Co.'s assays were reliable, the samples and results in my mind became quite conclusive. These results I did not have in July 1949.

(5) I have already stated under (1) above that I did consider the assay results shown on those assay certificates sent to me prior to submission of my report on December 19, 1949, and I also commented about the list of assays, (1) above, which appeared on a certificate received after submission of the report to the regional forester, United States Forest Service.

When I returned to the property on September 5 and 6, 1950, I took 7 samples from 7 places that were described in the list of assay results on Mr. McDonald's report. Mr. Altland accompanied me and pointed out the exact places from which he assured me the samples had been previously taken by contestee's agents. These samples were check samples and were taken for the specific purpose of checking the reliability of assay results of samples taken by contestee's agents, that were submitted to me subsequent to July 1949. The assay results of these check samples, assayed by the Bureau of Mines, Albany Branch, conclusively determined my opinion and testimony which I gave at the hearing on September 13, 1950.

If Mr. McDonald is talking about submission of the assay certificates for my information in preparing my report to the Forest Service, I did consider all of them that were received prior to submission of the report. The assay certificates received subsequent to submission of my report was also considered in cooperation with the Forest Service. It was concluded that an amended report would be unnecessary since it is the regular procedure for the mineral examiner to return to a property immediately prior to a hearing and make a reexamination.

take more samples if necessary, and if the facts warrant it, recommend withdrawal of charges. If Mr. McDonald is talking about submitting the assay certificates to me for evidence at a hearing, I must state definitely that I never promised him I would introduce such certificates in evidence. I would not have any right or authority to do such a thing under any circumstances.

I have apparently been criticized because I did not introduce the assay certificates into the hearing that were submitted to me by the McDonalds. I had no foundation of fact concerning those certificates. I was not present when the samples were taken. I had no factual knowledge whatsoever about them and therefore was not qualified to even mention them.

I wish to state that I was in the position of being a witness for the Government. As such, I merely testify before a hearings officer or manager of the land office concerning my examinations of claims in mineral applications how I took my samples and where I had them assayed. The attorneys for the Government and applicant for patent have the responsibility for introducing assay certificates for evidence at a hearing.

I might state that I have not been back on the property since my final examination on September 5 and 6, 1950. Between September 1950 and December 1953, when the Bureau of Mines and the Al Sarena's representatives went to the property and took samples which were assayed by A. W. Williams Inspection Co., the Al Sarena Mines, Inc., could have made any number of improvements on the claims by trenches, sinking shafts, and exposing cliffs wherein there may now be exposed valid discoveries of minerals on each of the claims contested. I have heretofore testified to only those things which I found on the claims up to the date of September 6, 1950. If anything has happened or has been done on the claims since that time, I know nothing about it.

As far as I have been able to determine from articles in the papers, very little has been said about work being done on the claims since September 1950. However, the testimony of Mr. D. Ford McCormick in Washington, D. C., indicates to me that bulldozer work was done on the claims. I have never had opportunity to examine the Bureau of Mines' report by Mr. Appling, consequently, I do not know where the sampling was done. The samples may have been taken from the places designated by the McDonald Bros. when Mr. Sanborn and I were on the property in July 1950, or they may have been taken at other places. If taken at other places, which were not specified during the dates of my examination in May and our examination in July 1949, I would conclude that a discovery was not known on the locations at that date and that the locations were invalid at that time for want of a discovery.

On page 4 of the report Mr. McDonald indicates there are enormous quantities of iron pyrite present. From my inspection of the property, I would be inclined to say that the available iron sulfide on this property, probably not in excess of 3 percent, is very small as compared to many other properties throughout the West. I doubt very much if payment would be made by any smelter for the sulfur which was shipped as a sulfide in a concentrate. It is possible, however, that a small credit would be given because of the iron content of such concentrates.

Mr. Charles R. McDonald has signed the report as a registered professional engineer, Alabama certificate 1693. There is nothing in the report to show that he is a mining engineer, a geologist, a public land surveyor, or a civil engineer. The information given in the report from the last paragraph on page 2 through to "Conclusions and recommendations," seems to be a criticism of myself rather than being support for mineral showings on the various claims.

The matters beginning on page 4 under "Conclusions and recommendations" are things that it seems to me Mr. McDonald should take under advisement and do, since it is reported that he is a member of the corporation and an officer in it.

In the last paragraph on page 5, Mr. McDonald seems to be under the impression that I have condemned the property. I was not employed by the Al Sarena Mines, Inc., and consequently did not express an opinion as to how to develop the property or exploit it—that was not the purpose of my examination. As everyone knows, eight of the claims were recommended for clear listing and the Forest Service did not bring adverse proceedings against these claims. My report submitted to the Forest Service was not a professional report recommending certain kinds of work or how work should be performed. It had an altogether different purpose. Its purpose was to inform the Forest Service, the administrative agency, about the conditions found on the claims embraced in the mineral application for patent and whether compliance had been met with the

United States mining laws relative to patenting a mining claim. The Forest Service did not condemn the property, it caused charges to be brought against 15 of the 23 lode claims on the allegation of noncompliance with the United States mining laws. Thereafter, it was the right and privilege of the mineral claimant, contestee, to refute and disprove the charges in a hearing before an officer prescribed by regulations.

ELTON M. HATTAN.

STATE OF OREGON,

*County of Multnomah, ss:*

Subscribed and sworn before me this 17th day of February 1956.

[SEAL]

GRAYDON E. HOLT,

*Notary for Oregon.*

My commission expires December 7, 1957.

MATERIAL SUBMITTED BY HON. WAYNE MORSE, UNITED STATES SENATOR FROM THE STATE OF OREGON

UNITED STATES SENATE,  
COMMITTEE ON FOREIGN RELATIONS.

*March 27, 1956.*

HON. JAMES E. MURRAY,

*Chairman, Joint Committee on Federal Timber,  
Senate Office Building, Washington, D. C.*

DEAR SENATOR MURRAY: Thank you for your note of February 18 enclosing a copy of a letter from the Secretary of the Interior to Clare Hoffman on the questions I asked on the Al Sarena matter.

It was most kind of Congressman Hoffman to secure a statement from the Department.

I am glad we agree that this letter alone is hardly adequate for me to rely upon as an answer to the questions raised on January 9, 1956, in my letter to you.

I shall await the completion of the deliberation of your committee on this matter for your reply to my questions.

Accordingly, as you request, I am returning the correspondence.

Sincerely,

WAYNE MORSE.

HOUSE OF REPRESENTATIVES,  
COMMITTEE ON GOVERNMENT OPERATIONS.

*Washington, D. C. February 17, 1956.*

HON. JAMES E. MURRAY.

*Chairman, Joint Committee on Federal Timber,  
Senate Office Building, Washington, D. C.*

MY DEAR SENATOR MURRAY: At the executive session of the Joint Committee, held on February 7, it was agreed that the Department of the Interior should furnish answers, for inclusion in the printed record of the Al Sarena hearings, to the some 13 questions propounded during the course of the hearings to the committee by Senator Morse, and read into the record.

Accordingly, enclosed herewith please find the answers of the Department of the Interior to those questions, embodied in a letter dated February 17, 1956, addressed to me and signed by Mr. Edmund T. Fritz, Acting Solicitor of the Department.

Sincerely yours,

CLARE E. HOFFMAN.

DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR.

*Washington, D. C., February 17, 1956.*

HON. CLARE HOFFMAN,

*House of Representatives, Washington, D. C.*

MY DEAR MR. HOFFMAN: Pursuant to your oral request, we submit answers to certain questions propounded by Senator Wayne Morse in his letter to Senator James Murray dated January 9, 1956, with regard to the Al Sarena Mines, Inc. hearings. The questions and our answers follow:

1. In what ways do the procedures used in this case differ from other mining appeal cases in the Department of the Interior?

The procedures used in this case differ from those used in other cases in several instances:

(a) In 1949, the Bureau of Land Management, the adjudicating agency, conducted the mineral examination for the contestant, the Forest Service. The Forest Service has its own mineral examiners and it was able to furnish one to accompany B. L. M. Examiner Hattan after he had reason to distrust his first set of samples.

(b) Assays submitted by the mining claimant in 1949 as a supplement to its patent application were not placed in the case record by the mineral examiner. Normally such documents are placed in the record to be considered along with all other documents and reports submitted by the mineral examiner and the applicants.

(c) In 1950 the Solicitor of the Department requested that a field hearing be expedited over the objection of the Acting Regional Administrator of the Bureau of Land Management and the Director of the Bureau of Land Management, who later acceded to Solicitor White's request. This is not normal procedure.

(d) In the 1950 hearings, the mining claimant, by its attorney, claimed that the Solicitor had agreed to waive the rules of practice of the Department and that the hearing should be conducted according to the rules of procedure used in the Federal courts. This, of course, was denied by Solicitor White and insofar as we know, it is the only case wherein such a claim has been made.

(e) The applicant filed a motion to dismiss which it referred to as a demurrer and which was denied by the hearing examiner along with other motions. The attorney for the applicant elected to stand on the motion without submitting evidence and to appeal to the Bureau of Land Management in Washington. He stated as his reason the purported agreement with Solicitor White. Within the recollection of the experienced career personnel of the Department, this is the only instance in which a mining claimant appeared for a hearing, elected to stand on procedural motions, and appealed to the Department without putting on evidence at the hearing.

(f) On October 2, 1950, the hearing examiner sent the record to the Bureau of Land Management in Washington with a request that the decision be made in Washington. He felt that as the record stood he was in no personal position to make the decision. The case was then reviewed in the Bureau of Land Management. During this period there were more outside requests that the decision be expedited. The case was referred back to the Land Office Manager for his decision on November 24, 1950, with the direction to allow the right of appeal to the applicants when his decision was rendered. This was unusual, particularly in view of the fact that the Bureau of Land Management in Washington, which had already reviewed the case, was to be the next appellate step for the applicants.

The matter was decided against the applicants on December 14, 1950, and appealed to the Bureau of Land Management in Washington shortly afterwards. A decision was rendered by the Washington office on April 27, 1951. This was unusually expeditious handling but it probably can be attributed to the fact that the case had been considered in Washington before the field decision was rendered.

(g) Appeal was made from the April 27 1951, decision and the matter then rested in the Office of the Solicitor for 18 months. The pleadings of the Forest Service were filed and it rested its case. In 1953 the Solicitor reviewed the file and decided that three alternatives were possible to terminate the proceedings. They were:

The first and most obvious alternative would be to remand the case to the Land Office manager for the making of supplementary record and the acceptance of evidence offered by the applicants. However, after very serious consideration of this method, the Solicitor decided that in view of the case history of unusual procedure, accusations and counter-accusations, the strong distrust of the forum entertained by the claimants, and the fact that the forum had felt the need for personal disqualification in the first place, this solution would be infeasible and would unnecessarily prolong any decision, favorable or unfavorable, which would eventually be made.

The second alternative would be to decide the case adversely so that it would be appealed to the courts. This would call for a finding of fact by the Solicitor and such a finding of fact would be conclusive on the courts. This would obviously not be a fair remedy because the claimants had not yet submitted evidence. The Department has long recognized the principle of fair treatment. *Dawkins v. Hedlin*, 44 L. D. 371.

The third alternative and that chosen by the Solicitor was to determine the key issue of mineralization by calling for an independent sampling of the contested claims under the general delegated supervisory powers of the Secretary. The Solicitor selected this as the fairest and most expeditious means of terminating the controversy one way or the other. The selection of an independent examining body outside of the rules of practice is not unique. In the record of the hearings there appears a copy of a letter dated January 9, 1911, wherein Secretary Harlinger asked that a Geological Survey team conduct an independent investigation of certain mining claims on the Bright Angel Trail of the Grand Canyon. The examination resulted in an adverse report on which the Secretary decided that no reconsideration should be allowed. The decision in the case was eventually sustained by the Supreme Court of the United States, *Cameron v. United States*, 252 U. S. 450. This investigation was prompted by conflicting evidence in the record with respect to the mineral or nonmineral character of the mining locations. Although the case is an old one it dealt with conflicting evidence as to mineralization of mining claims and the Secretary requested an independent survey. Since the survey resulted in a decision against the mining claims no one seems to have questioned its propriety.

More recently, 1952, the Department had before it a right-of-way controversy involving certain Alaska coal lands on which leases were held by the Usibelli Mines, Inc., and the Cripple Creek Coal Co. This, too, was a highly controversial record of long standing. The Cripple Creek Co. had made application for a right-of-way across the Usibelli lease. The Usibelli Co. protested the application and appealed to the Secretary from a decision of the Bureau of Land Management granting the right-of-way. The Assistant Secretary directed a special investigation of the controversy to be conducted by the Bureau of Mines. The report on the special investigation was submitted to the Secretary on June 25, 1952. The matter remained pending until November 5, 1954, at which time the Usibelli Co. withdrew its protest and the Secretary granted the right-of-way. In 1955 the right-of-way controversy was renewed when the Cripple Creek Co. applied for an amended access right-of-way across the Usibelli lease. Again in view of the conflicting claims of the parties the Secretary appointed an engineer advisory group representing the Bureau of Mines, Geological Survey, the Alaska Road Commission, and the Bureau of Land Management to go to Alaska and make an on-the-ground investigation of the controversy. The report of the advisory group was submitted to the Secretary on September 27, 1955. A new right-of-way has been granted and an appeal is presently pending before the Secretary.

These matters are only partial illustrations of independent examinations ordered by the Secretary or his delegates. They are offered only as illustrations of other instances in which the Secretary has felt that the record demanded a departure from ordinary procedures in order to obtain a fresh look at the facts. The record here discloses that when the Solicitor exercised his authority to depart from the rules of practice, he designated the Bureau of Mines to go upon the property with a representative of the mining claimant in order to take samples, the integrity of which could not be questioned, and to submit them to a mutually acceptable assayer. Those, in essence were the instructions of the Solicitor. The Bureau of Mines executed the instructions using its technical knowledge, on which the Solicitor relied. The technical knowledge of that Bureau has been made available in other independent surveys and investigations and in this instance it was made available for mineral sampling of a mining claim.

2. Is the Government usually the contestant in mining patent appeal cases? In such cases, how is the public interest protected by the Department of the Interior and were adequate steps taken in this case to protect it?

In the event the examination of the claims by a Bureau of Land Management mineral examiner indicates that, in his opinion, the requirements of the mining laws have not been met, the Bureau may initiate a contest against the mineral entry under 43 Code of Federal Regulations, part 222. Specific charges against the entry are made and served on the claimant. In all these types of cases the Government is the contestant. In cases involving national forests the Forest Service ordinarily initiates a protest against the claims and that protest is used by the Department as the basis of its adverse charges. The charges are then served on the parties and a hearing is ordered (Circular 435, September 4, 1915; 44 L. D. 360). The majority of mining contests are filed by the Government.

In these mining cases the public interest is protected by the Department by—

(a) Certifying the mineral surveyors who prepare the mineral survey.

(b) Providing for an on-the-ground examination of each claim by Government mineral examiners in the event a contest is indicated (in forest cases, the examination is conducted by Forest Service mineral examiners).

(c) By bringing adverse charges against mineral entries which it believes to be invalid.

(d) In forest cases, by having attorneys for the Forest Service represent the Government at the hearing (Circular 435, supra).

In the Al Sarena case all of these steps were taken but for the reasons stated in answer to the first question it was considered necessary to obtain further evidence. This further evidence was taken by the United States Bureau of Mines which exercised the technical judgment required in carrying out the request for independent sampling and analysis.

3 and 4. By years, how many dollars' worth of minerals were removed from the contested claims as distinguished from the uncontested claims? Also please segregate by periods before and since the patent was issued. What are the periods when active mining operations were conducted on these claims and particularly the periods since issuance of patent?

Prior to 1935 the mining property in question was held in diverse ownership. Records are unavailable to show the value of mineral produced from the various claims. With the formation of Al Sarena Mines, Inc., in 1935, the claims were consolidated under a single management. The contested and noncontested claims have never been separated in the available production records. The categories of "contested" and "noncontested" were not attached until 1950. We can assume that some of the ores processed through the pilot mill were from contested claims; however, we cannot tell how much. Since there are no underground workings on the contested claims, the amount involved would be very small.

The United States Geological Survey Bulletin 893, published in 1938, shows that production in the mine, then known as the Buzzard mine, as of that date had been \$24,000, from 4,400 feet of drifts, crosscuts, raises, and winzes. Mineral Examiner Hattan reported in 1949 that \$30,000 to \$40,000 had been produced on the premises and at that time the drifts, crosscuts, raises, and winzes amounted to 6,281.81 feet, according to the totals computed by the Bureau of Mines from the report of the mineral surveyor. These figures are not broken down into particular claims. We do not have production figures since the granting of patent and we believe that there has been no commercial production since about 1945.

The owners state that no major development can be undertaken without proper financing and that the constant publicity attack on the property since the granting of patent has prevented the acquisition of such financing.

In reporting these production figures, it should also be mentioned that it is a matter of general knowledge to lawyers familiar with the mining law that commercial production is by no means a prerequisite to the issuance of a mining patent. Many mining patents have been issued on claims on which there was no record of commercial production. This accords with the rule announced by the United States Supreme Court in *Chrisman v. Miller* (197 U. S. 313), which has never been overruled and which is followed to this day by both Federal and State courts. That rule is that if a miner can show such evidence of mineralization that would justify him in spending further time, money, and effort in the hope of developing a paying mine, he has met the discovery requirement for patent.

The Department has held that the evidence of mineralization on the contested Al Sarena claims met the legal standard announced by the Supreme Court. The matter of commercial production is, as a matter of law, immaterial in measuring compliance with this standard. It would, therefore, be inaccurate and misleading to cite the lack of commercial production on the contested claims as in any way affecting the compliance with the discovery or development requirements of the law or the bona fides of the applicants.

5. What was the extent of actual mining or discovery work at the time application for patent was filed?

The extent of actual mining and discovery work on the date of patent application appears in the certified and approved report of the mineral surveyor, who, with his crew, spent 3 months on the property in the preparation of the report,

a copy of which is in the possession of the committee. The Bureau of Mines has totaled the survey figures, and they are attached hereto as exhibit 1.

6. If mining is now in progress, are the contested claims under active operation?

We are informed that no mining is presently in progress on the premises and that snows have made any kind of commercial access to the property infeasible.

7. What are the theoretical advantages of securing a patent over mining without a patent? Which of these theoretical advantages have actually been exercised by the patentee in this case since issuance of the patent?

The advantages of securing a patent to a mining claim over mining it without a patent are more than theoretical.

The advantages are:

(a) A patentee is the fee simple owner of the entire claim from the center to the core of the earth, whereas the owner of an unpatented claim can use only so much of the surface and its products as is required to his mining operation and the surface resources can at any time be removed by the Government.

(b) There is no question that the possession of full title increases the value of the claim and facilitates the raising of money for development purposes. Lenders do not want to take as security a title which could bear the possibility of defeat by claim jumpers, adverse proceedings, or contest proceedings. The fee simple provides the necessary security of title required by investors.

(c) Assessment work is necessary to hold an unpatented claim. No assessment work is required after patent. A patent also precludes claim of conflicting locators, either prior or subsequent.

The patentee in the Al Sarena case no longer needs to perform assessment work and in ordinary circumstances it would have a sufficient title for financing. In its exercise of complete ownership it has conducted limited logging operations mostly on noncontested claims and following Forest Service cutting practices.

8. Is it true that the contestant was allowed to select the assay firm?

The United States [the contestant] through the Department, having initiated the examination of the claims by the Bureau of Mines for its own information, selected an assay firm satisfactory both to the Bureau of Mines and the claimant. The applicant and the Bureau each could refuse the suggestions of the other; however, the Bureau of Mines checked on the qualifications of the assayer suggested by the applicant and thereafter accepted it as being mutually satisfactory.

9. If so, why was not the protestant, the Forest Service, allowed to participate in the selection of an assay firm or send portions of the samples to a Government laborer or other assayer?

The Bureau of Mines is a specialist organization in the field of minerals. Because of the character of the work it does and its experience it is well qualified to determine the capability of assaying firms. The Solicitor, in requesting the assistance of the Bureau of Mines to investigate the claims and to have samples of the ore assayed, wanted to obtain expert, independent information on the claims. Since the dispute was between the United States and the claimant, and the claimant had continually contested assays made by companies selected by the Government without the consent or knowledge of the claimant, sound judgment indicated that the claimant should be given a voice in the selection of a competent assaying house. The Bureau of Mines, as a technical organization, accepted as qualified the assayer suggested by the claimant.

The Forest Service assays on their samples were already in the record. The fact that the claimants were not consulted in the selection of the assayers used in procuring the Forest Service reports is no more important than the omission of the Forest Service in the selection of the final assayer. This was an omission made by the Solicitor with an eye to achieving a just and impartial result.

10. Were the results of two western-performed assays earlier submitted by the Forest Service ignored in the final decision? Was there any basis for believing these two assays were inaccurate as compared to the one performed in Alabama?

The results of the two western-performed assays earlier submitted by the Forest Service were not ignored at the time of the final decision. At the time

that the final decision was made the Solicitor had before him varying and conflicting evidence which he carefully weighed in considering the whole record. He followed the evidence, which, in his judgment, had the greater weight and probative value.

There could be some question as to the accuracy or probative value of the two original assays submitted by the Forest Service. The Solicitor also realized that assays taken from the same claim often vary depending upon where the samples are taken and the assaying procedures used (and while values cannot be added in assaying, the amount of value which is shown depends on the accuracy of the assay).

The first sampling made by Mr. Hattan was submitted to the Annes Engineering Co. and reported by that company on May 31, 1949. Those samples, Nos. 1911 through 1934, showed traces only on all samples except for 14 cents in silver on the Manganese claim, a contested claim, and blanks on silver on Mark Applegate and Sulphide. Mark Applegate is a noncontested claim.

In this first sampling the following noncontested claims showed no values other than traces: Oro Alto, Oro Real, Oro Rico, Peter Applegate (2 samples), Mark Applegate (2 samples), Dahlberg, and Telluride. The H. McKenzie claim was not sampled. Mark Applegate and Sulphide were reanalyzed by Abbott Hanks when Mr. Hattan submitted the Annes reject pulps to Abbott Hanks for check sampling. These assays checked, showing trace and zero in each case, rather than trace and trace as shown by Annes.

The first group of samples was the one which Mr. Hattan stated he distrusted.

The second sampling was done by Mr. Hattan and Mr. Sanborn in July of 1949, and submitted to the Abbott A. Hanks Co. of San Francisco, Calif. It was reported by that company on August 10, 1949. Of the noncontested claims no samples were taken on Oro Rico, Mark Applegate, Dahlberg, Telluride, and McKenzie. Two of the noncontested claims, Oro Alto and Oro Rico, showed values of \$3.37 and \$1.04, respectively. Of the contested claims J. W. Merritt showed 35-cent value and Cougar showed 18-cent value, as did Arroyo Verde.

On August 10, 1949, Hanks also reported on 3 old sample pulps, Nos. 679, 695, and 699, the values of which appear on the Al Sarena sampling map. These pulps were taken from the assay office on the Al Sarena property by Mr. Hattan; 699 and 679 showed values of \$6.92 and \$9.34, respectively; 695 showed 70 cents. These sample pulps were evidently taken from underground in the mine and, therefore, on noncontested claims.

The samplings actually taken by Messrs. Hattan and Sanborn were all surface samplings. In all of their sampling only two claims, Oro Alto and Oro Rico, showed values. They accepted 6 additional claims on the basis of the 3 underground samplings taken years before and selected by them at random. While these claims showed nothing to them on the surface other than the traces common to all of the claims, they showed considerable values underground. This showed some faith in the undefined ore body; wherever there were underground workings, mineral values were accepted. The exact extent of the mineral mass had not been determined, but it had been demonstrated by Hattan and Sanborn that wherever there were traces on the surface and a tunnel beneath, the values were good. The Hattan and Sanborn samples, therefore, neither proved nor disproved the mineralization of any of the claims; the accuracy of their "trace" assays or their sampling, however, appears to be open to question.

The Hattan-Sanborn group taken in July of 1949, was one on which there was an apparent lapse in the chain of evidence. Mr. Sanborn's memory was not clear on the shipment of the samples in 1950. This was pointed up on pages 172, 173, and 176 of the record of the congressional hearings, wherein Mr. Sanborn stated that he did not know with whom he left the samples for shipment or what that person did with them. We understand that he later decided that the samples were left with a warehouseman in California.

Incidentally, it has never been made clear whether or not split samples of all of the Hattan-Sanborn samples were or are in existence. Mr. Hattan testified that he kept splits from his first sampling "for years" (p. 55, record of hearings, November 25, 1955), but he does not say where they are now. If he did keep them for years, however, he would probably have kept them well into the period of controversy in the case; but they do not appear to be in existence today.

As you know, the record of the hearings and the record of the Department shows that the claimants submitted favorable assays to the mineral examiner, but he did not consider them or put them into the case record. These would have

been helpful because in such a diffused deposit it is possible to get different results from samples taken only a few feet apart.

The Bureau of Mines samples were taken in a meticulous fashion; 28 samples were taken from 15 claims; Government engineers surveyed, identified, and photographed each sample spot. The crusher was cleaned out after each sample was pulped. The samples were mechanically split. Part of each sample was panned on the spot. Mineralization was shown and witnessed in each sample. Splits from the samples were put into sealed bags and shipped by express. These procedures were described to the Solicitor before his decision, along with the O. K. report as to the assayer and a verification of the assay results. The record does not disclose the use of these precautionary measures with respect to the Hattan and Sanborn samples.

When these values were shown on the Bureau of Mines samples and considered with the rest of the evidence, particularly the values shown wherever there was underground work, the Solicitor was justified in finding that the discovery rule in *Chrisman v. Miller*, supra, and *Castle v. Womble* (19 L. D. 455), was complied with.

11. The Forest Service and the Secretary of Agriculture have long tried to protect our forests from questionable mining claims. Is it true that they were not consulted as to the final action being taken on this matter?

I would first like to comment on the statement made prior to the question. The Forest Service and the Department of Agriculture and, I might add, the Department of the Interior have long sought to protect our forests and our public domain from the location and patenting of questionable mining claims. The two Departments cooperated to submit and support a bill which was the first major amendment of the mining laws since 1872 and which was aimed specifically at the location of mining claims for other than mining purposes. The bill passed and became Public Law 167 of the 84th Congress. This law provides the deterrent to those who would locate bad-faith claims by ending the possibility of holding the surface and minerals in an endless "location" status merely by doing the required \$100 per year of assessment work. The law recognized that the incentives of the mining laws should remain and that a legitimate miner should receive the historical fee simple patent once his claim meets the requirements of the mining law.

The patent requirements of the mining laws remained. As we have mentioned, the standard for patenting a mining claim is that a miner should be justified in the further expenditure of time, money, and effort in the hope of developing a paying mine. No commercial production is required and the presence or absence of timber is immaterial. When a national forest is created the area remains open to mineral prospecting and location and the same standards of the mining laws, including discovery, apply as are applicable to the open public domain. Congress made its intent clear in this respect in the National Forests Act of 1897 (30 Stat. 36, 16 U. S. C. 487), which expressly provides that nothing in the act shall prohibit the prospecting and locating of mining claims. It is our belief that our protection of the forests and the public domain should conform to the intent of Congress and the decisions of the Supreme Court.

In answer to the question: At the time the now Solicitor assumed office in 1953, the Forest Service, acting as an advocate for the United States, the sole and only party plaintiff, had submitted its evidence, filed its briefs, and rested its case. The record was before the Solicitor for his consideration and decision. It became apparent to him that the record was incomplete and that it should be made complete. It was completed without notice to the Forest Service, which had completed its record. The Solicitor, acting in this behalf as agent of the United States, the plaintiff in the case, to protect its interest and to do justice to the claimants, requested the Bureau of Mines, an impartial agency, to investigate and to report to him on the question of mineralization. As is customary in mineral sampling, the claimants were to be contacted to point out their discovery locations. The Bureau of Mines was instructed to select an assayer known to it to be competent and who was acceptable to the claimants. This was a matter within the delegated authority and power of the Solicitor and he could have done it without notice either to the Forest Service or to the claimants. "The rules prescribed are designed to facilitate the Department in the dispatch of business, not to defeat the supervision of the Secretary" (*Public of San Francisco*, 5 L. D. 483, 494; quoted with approval; *Knight v. U. S. Land Association*, 142 U. S. 161, 179).

12. What are the species volume and value (at bid rates for the area at the time of application) of the timber on the contested claim? For the uncontested claims? What are the values on the same basis at the time when the various appeals were filed? What are today's values?

The information called for in this question is peculiarly within the province of the Forest Service. We understand that all of this information has been submitted to the committee by the Department of Agriculture. The only figure for the valuation of the timber which was before this Department at the time the decision was rendered was the testimony of Mr. Leavengood of September 13, 1950. In his testimony at that time Mr. Leavengood stated that by his ocular estimate there was an average of 25,000 net merchantable board feet per acre on the premises, consisting largely of second growth and understory of Douglas fir with about 10 to 15 percent of sugar pine. He stated that, according to Forest Service cutting practice, the timber on the contested claims was then worth \$77,000 to the Government. As I have stated, that was the only valuation before the Solicitor at the time of his decision.

In this respect it should be urged that present-day timber valuations or valuations arrived at in the heat of the present controversy should not be used to infer what the values were at the time the patents were applied for or at the time the claims were located. The purchase price of Manhattan Island should be considered in relation to real-estate prices of that day. One of the political statements of value was a generous \$600,000, which would give the timber an increment of 800 percent within 5 years.

Most of the claims in question were purchased in 1935 at considerable expense. The last two claims were located in 1939. It should be remembered that during this same period timberlands in Oregon were being sold for delinquent taxes at prices below \$5 per acre. A person who was interested in acquiring cheap timberlands could do so without purchasing mining properties and improvements, performing annual assessment work, and conducting expensive exploration operations (with the eventual requirement of still paying \$5 per acre and getting a patent before he could touch the timber). When the majority of these claims were located, timberlands were being cleared for farming, and that idea persisted well into the 20th century.

13. Has timber been cut from the claims since patent was issued? If so, from which claims (contested or uncontested) and in what amounts from each?

We understand that timber has been cut from some of the claims since patent has issued, but we are not informed as to the amounts for each of the claims. We have asked the owners to submit copies of their Oregon severance tax returns, copies of which are attached hereto as exhibit 2. These returns show that in 1954, 2,008,260 board feet were removed from the premises, almost entirely from noncontested claims.

We thank you for this opportunity to answer Senator Morse's questions. We share his concern over smear attacks and we feel that this case has been a classical example of such an attack. The intentional repetition of inaccuracies has been misleading to the public. Among the most often repeated are—

(a) That the claims were located for the purpose of getting the timber. The fact is that the timber values were negligible between 1897 and 1939, when the claims were located.

(b) That Secretary Chapman or one of his assistants decided the case adversely and that it was closed, only to be reopened by Solicitor Davis. This was repeated only this past week by a former Assistant Secretary. The fact is that the case was open and pending before Secretary Chapman and his Solicitor, and it had not been decided when they left office. It was in that status when it was brought to Solicitor Davis' attention.

(c) That commercial production is required to meet the patent requirements of the mining law or to show good faith under the mining laws. The law is clear that commercial production is not required to meet the patent standards or good-faith standards of the mining law. Repetition of this misstatement is a deliberate play on the lack of information of the general public as to the terms of the mining law and the necessary and time-honored economics of the mining industry.

(d) That Secretary McKay somehow negotiated a purchase price of \$5 per acre with the mining claimants. The fact is that the price was paid, final certificates were issued, and the land went on the tax rolls during Sec-

retary Chapman's administration of the Interior Department. However, the price was never negotiated, because it is the standard regulatory price which must be paid when final certificate is issued.

(e) That mining claims should not be patented in national forests. The fact is that the National Forest Act itself is specific in stating that mining claims are to be allowed in national forests.

(f) That the Solicitor acted without authority or precedent in calling for an independent examination of the property. The fact is that his authority to do this was clear and that it has been done by Secretaries and their delegates over the years in several different types of cases.

Other misstatements have been made which are too numerous to mention here. I hope that this letter fully answers your inquiry.

Sincerely yours,

EDMUND T. FRITZ, *Acting Solicitor.*

MATERIAL SUBMITTED FOR RECORD BY HON. CLARE HOFFMAN OF MICHIGAN ON BEHALF OF MINORITY

HOUSE OF REPRESENTATIVES,  
COMMITTEE ON GOVERNMENT OPERATIONS,  
Washington, D. C., February 17, 1956

Hon. JAMES E. MURRAY,

*Chairman, Joint Committee on Federal Timber,  
Senate Office Building, Washington, D. C.*

MY DEAR SENATOR MURRAY: In behalf of the minority, in accordance with the statements made at the executive session of the joint committee on February 7 where it was agreed that certain documents would be included in the record herewith please find the following documents which we are requesting be included in—and which it was agreed would be put in—the printed record of the so-called Al Sarena matter:

(1) Certified copy of—

Teletype dated August 18, 1950, to Director, BLM, from manager, BLM Portland.

Telegram dated October 13, 1950, to manager, Land Office, Portland, from J. A. DeLany, Acting Chief, Branch of Minerals.

Letter dated September 25, 1950, to Mr. Marion Clawson, Director, BLM from Kenneth W. Miller, Bureau of Reclamation.

Letter dated April 27, 1951, to Hon. Frank W. Boykin, from Zimmerman, Assistant Director, BLM.

Teletype, dated August 9, 1950, to manager, Land Office, Portland, from Marion Clawson, Director, BLM.

Wire, dated August 15, 1950, to Director "Personal Attention" BLM, W.C. from Leonard B. Netzorg, acting regional administrator, Portland, Oregon and bearing handwritten notation at bottom, signed with initials "MGW"

Letter dated August 3, 1951, to Al Sarena Mines, Inc., from Mastin G. White, Solicitor, Department of Interior.

(2) Document entitled "Assignment of Error—*United States v. Al Sarena Mines, Inc.*—Mineral, Contest No. 38, Rogue River National Forest (75 pages)—duly certified as true copy.

(3) Application for patent by Al Sarena Mines, Inc.—duly certified as true copy (20 pages).

(4) Certified copy of "Field Notes of the Survey of the Mining Claim of Al Sarena Mines, Inc., known as the Al Sarena Group," of the Bureau of Land Management, Department of the Interior, Mineral Survey No. 879, 40 pages).

(5) Covering letter from Richard E. McArdle, Chief, United States Forest Service, dated February 15, 1956, forwarding memoranda, and the memoranda, viz:

(a) Copy of memo from Frank B. Folsom, dated June 3, 1955, to Division of Timber Management.

(b) Copy of memo from George W. Kansky, district ranger, Union Creek, dated July 14, 1955, to forest supervisor.

(6) Statement entitled "Two Timber Sales Adjacent to Al Sarena Mines," etc., and accompanying maps, viz:

(a) Map of Township 31 S., Range 2 E. W. M., Douglas and Jackson Counties, Oreg., with information relative to timber sales printed thereon.

(b) Topographic map of Geological Survey, Department of the Interior, of the subject area—including the reverse side thereof as indicated. (Topographic map could not be reproduced.)

(7) Statement entitled "Twin Cheria Sale."

(8) Bulletin of the American Council of Independent Laboratories, Inc., entitled "ACIL Bulletin," August 1955, all pages of which it is desired be included (see p. 233).

(9) Affidavit of Phillip Gabriel, sworn to on February 9, 1956.

(10) Letter dated February 7, 1956, to Congressman Clare E. Hoffman, from A. W. Williams Inspection Co., signed by Morris Miller (3 pages), with accompanying documents as follows:

(a) Document entitled "Statements of Morris Miller, Laboratory Manager, A. W. Williams Inspection Co., Mobile, Ala." (16 pages).

(b) Photostat of letter dated February 1, 1952, to A. W. Williams Inspection Co., from W. W. Binford, manager, Hurricane Creek Operations, Reynolds Metals Co., Bauxite, Ark.

(c) Photostat of letter dated January 18, 1952, to A. W. Williams Inspection Co., signed by B. A. Jarrett, plant accountant, Reynolds Metals Co. (Hurricane Creek plant, Bauxite, Ark.).

(d) Statement entitled "Chromite," signed by Morris Miller, laboratory manager, A. W. Williams Inspection Co. (6 pp.).

(e) Photostat of letter dated August 16, 1950, to Hon. Frank W. Boykin and signed by Clifton E. Mack, Commissioner, Federal Supply Service, General Services Administration.

(f) Photostat of letter dated May 11, 1951, to A. W. Williams Inspection Co., signed by O. W. Teckemeyer, Chief, Inspection Branch, Federal Supply Service, General Services Administration.

(g) Photostat of letter dated February 10, 1954, to Mr. A. W. Williams, A. W. Williams Inspection Co., signed by H. M. Neale, Assistant Chief, Inspection Branch, Federal Supply Service, General Services Administration.

(11) Original affidavit signed by Charles R. McDonald and Herbert P. McDonald, Jr., sworn to on February 14, 1956 (4 paragraphs).

(12) Original affidavit signed by Charles R. McDonald, sworn to on February 14, 1956 (6 paragraphs).

(13) Original affidavit signed by Charles R. McDonald and Herbert P. McDonald, Jr., sworn to on February 14, 1956 (6 paragraphs).

It is our understanding that the Department of the Interior has previously furnished to the committee staff photostatic or carbon copies of certain other documents, and it is the request of the minority that, if they are not already in the record, the following listed documents be printed as part of the record, viz: (the numbers given correspond to the exhibit numbers assigned the documents at the time the copies were furnished).

No. 35: Letter from Mastin G. White to W. O. McMahon dated November 16, 1950—in which White advises that the agreement for the rules of civil procedure to apply was not so (see pp. 642-643);

No. 47: Letter dated June 6, 1950, to "Oscar" from Boykin;

No. 49: Letter dated March 14, 1950, to Manager of the Land Office from Bell, Regional Administrator, BLM, instructing Manager to withdraw

adverse proceedings filed on February 10, 1950, because procedure was improper;

No. 51: Letter dated March 17, 1949, from Folsom, Acting Regional Forester to Charles Lee, Manager, Land Office, stating that Hattan had reminded him of necessity for mineral examination (see pp. 731-732);

No. 52: Letter dated November 24, 1950, from Bradshaw, Acting Director, BLM, returning records to Rice and instructing him to make decision, giving right of appeal;

No. 56: Affidavit of January 1949, of H. P. McDonald, Jr., relative to publication and expenditures;

No. 71: Letter of February 8, 1949, from Spaulding, BLM, to McDonald, stating price of \$2,375 for 474.119 acres;

No. 84: Letter dated November 2, 1950, from Zimmerman, BLM, to Boykin, advising that Solicitor White had requested decision be expedited;

No. 85: Letter of June 23, 1951, from McDonald to White—stating their conference with him on June 15, 1951, was not the oral argument they had requested;

No. 89: A geophysics and assay report by McDonald to Mastin White, dated June 21, 1951;

No. 95: Telegram dated March 19, 1951, from Boykin to McMahon, reference to talk had with Mastin White;

No. 96: Default demand on Clawson, dated March 10, 1951;

No. 99: Note from White to Clawson relative to Representative Boykin's call from Mobile, Ala., asking that the Al Sarena decision be expedited;

No. 104: Clawson's letter to White, advising him that the matter set for hearing; do not like idea of making it special for Boykin (see p. 642).

It is the understanding of the minority that the following listed documents have already been included in the record, but, if not, it is our request that they be printed as part thereof, viz:

A. Views of Pierce M. Rice, Manager, BLM office at Portland, dated October 2, 1950;

B. Decision of Portland office, BLM, of December 14, 1950;

C. Decision of William Zimmerman, Assistant Director, BLM, of April 27, 1951;

D. Decision of Solicitor Clarence Davis of January 6, 1954. See p. 10.

Sincerely yours,

CLARE E. HOFFMAN.

4-207 (May 1954)

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington, D. C. February 16, 1956.

I hereby certify that the annexed photostatic copies of papers, from File No. 0665, Oregon, are true and literal exemplifications of the records on file in this office.

In testimony whereof, I have hereunto subscribed my name and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL]

OSCAR E. COLLINS,  
Certifying Officer.

CONFIRMATION

[PBA teletype]

BUREAU OF LAND MANAGEMENT,  
Portland, Oreg., August 18, 1959.

The DIRECTOR, BUREAU OF LAND MAGEMENT,  
Department of the Interior, Washington, D. C.

R—— 9th and 17th contest No. 38 U. S. versus Al Sarena Mines, Inc., Mineral application Oregon 0665. Forest Service and company contacted. Hearing set September 13th before Land Office. Forest Service and company will be notified Monday. Please return record for use at hearing.

\_\_\_\_\_  
Manager.

(This is a message telephoned to E. S. on 10/13/50 at 3:32 p. m. General Services Administration, Public Buildings Service. Message telephoned by Lo.)

WASHINGTON, 10-13-50.

To: Manager Land Office.

Subject: Calling for missing papers.

In the matter of mineral contest number 38 Forest Service versus Al Sarena Mines, Incorporated, Oregon 0665 transmit copies of answer, demurrer and motions filed in defendants behalf in this case and any other papers in your files that may be of assistance in rendering a decision in the matter.

J. A. DELANY,  
*Acting Chief Branch of Minerals.*

---

BUREAU OF RECLAMATION,  
*Salem, Oreg., September 25, 1950.*

MR. MARION CLAWSON,  
*Director, Bureau of Land Management,*  
*Washington, D. C.*

DEAR MARION: We heard you were to be in Burns, Oreg., a couple of weeks ago but could not find an excuse to be in that part of the State at that time. Hope you had an enjoyable trip to the west coast.

If I had anticipated what has developed since you were in Oregon, I would probably have arranged some way to see you and save myself the task of writing about something that could be better handled orally.

For several years I have observed the events concerning the application for patent of property of Al Sarena Mines, Inc., of Trail, Oreg. It now appears that questions pertaining to patenting of this property are being appealed to you. What started out to be the best of relationship between owners of the mines and the Bureau of Land Management has degenerated to the point where good faith and fairness are being questioned.

After being informed by H. P. and C. R. McDonald that this case is being forwarded for your decision, I assured them that you would give a just and fair decision. The McDonald boys have been friends of mine since 1945 when I left Berkeley to work for the Bureau of Reclamation in Oregon. They are honest, understanding gentlemen, and are coming to you with faith in your judgment. It is hoped that in regard to your meetings in Washington I have assisted in overcoming a feeling of distrust that the boys had developed out here because of a series of unfortunate events.

Sincerely,

KENNETH W. MILLER.

---

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
*Washington 25, D. C., April 27, 1951.*

HON. FRANK W. BOYKIN,  
*House of Representatives,*  
*Washington 25, D. C.*

MY DEAR MR. BOYKIN: Further reply is made to your letter and our reply thereto dated June 20 regarding the proceedings instituted against mineral entry Oregon 0665 made by the Al Sarena Mines, Inc.

There is enclosed a copy of our decision of even date which is self-explanatory and will advise you of the action taken in the matter.

Sincerely yours,

WILLIAM ZIMMERMAN, Jr.,  
*Assistant Director.*

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,

August 9, 1950.

Appro.: 1411109 Adj.

MANAGER, LAND OFFICE,

Portland, Oreg.:

Please set early date prior to September 23 for hearing re charges of Forest Service on mineral application, Oregon 0665, of Al Sarena Mines, Inc. Kindly notify me of date set. (AD: FF)

MARION CLAWSON,  
Director.

Authorized: Confirmation copy.

PORTLAND, OREG., August 15, 1950.

DIRECTOR (Personal attention):

Retel 9th AD-FF hearing date charges of Forest Service on mineral application, Oregon 0665. Hattan, our only mineral examiner, apparently necessary witness for Forest Service. Hattan's time completely committed until end of October to field examinations on backlog pending cases, principally mineral patent applications. Scheduling hearing as suggested your teletype will disrupt his schedule and violate numerous commitments already made to other agencies and private persons for field examinations during current field season. In absence of compelling reason seriously urge hearing Oregon 0665 be postponed until conclusion field season. Teletype reply.

LEONARD B. NETZORG,  
Acting Regional Administrator.

[Handwritten note: I believe we ought to set the hearing before the end of September. I told Representative Boykin that the Department would make every effort to obtain an early initial decision. M. G. W., AUGUST 17, 1950.]

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,

Washington 25, D. C., August 3, 1951.

AL SARENA MINES, INC.,  
Mobile, Ala.

GENTLEMEN: It appears, upon the basis of your letter dated June 23, 1951, as supplemented by information received from the manager of the land office to the effect that the reporter failed to obtain a complete transcript of the earlier portion of the proceedings at the hearing on September 13, 1950, that if you desire a further opportunity to submit evidence bearing on the question whether valuable mineral deposits have been discovered on the claims involved in your appeal (A-26248), it would be appropriate to remand the case for a supplemental hearing with respect to that issue.

It will be appreciated if you will inform me promptly whether you desire that the case be remanded for the purpose mentioned in the preceding paragraph.

In the event of a further hearing in this case, the supplemental hearing and all subsequent proceedings will be conducted in accordance with the applicable regulations of this Department.

Very truly yours,

MASTIN G. WHITE,  
Solicitor.

4-207  
(May 1954)

DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington, D. C., February 16, 1956.

I hereby certify that the annexed copy of document entitled "Assignment of Error" filed in case No. 0665, Oregon, is a true and literal exemplification of the record on file in this office.

In testimony whereof, I have hereunto subscribed my name and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL]

OSCAR E. COLLINS, *Certifying Officer.*

### ASSIGNMENT OF ERROR

UNITED STATES V. AL SARENA MINES, INC.

MINERAL CONTEST NO. 38, ROGUE RIVER NATIONAL FOREST

Comes now the Contestee, Al Sarena Mines, Inc., and files this, its Assignment of Error, Answer, Brief and Argument in answer to the decision of the Bureau of Land Management, Mineral Contest No. 38, Rogue River National Forest, Oregon 0065, made under date of April 27, 1951 and signed by William Zimmerman, Jr., as Assistant Director of the Bureau of Land Management, and on appeal from said decision to the Secretary of the Interior, Attention: Mr. Mastin G. White, Solicitor and Acting Assistant Secretary of the Interior. In refuting the contentions of the Bureau of Land Management in its decision, or in refuting any findings or rulings contained therein, Contestee specifically waives no rights, right of action or other procedure and submits this assignment of error, answer, brief and argument without prejudice to any rights of the Contestee. In every assignment of error, Contestee specifically challenges the sufficiency, credibility, legality, constitutionality or admissibility of the evidence, whether specifically attacked therein or not; in every assignment of error Contestee specifically demurs to the discrimination and/or discriminatory enforcement present, whether cited or specifically attacked or not, giving as its authority the decision of the United States Supreme Court in the case of *Yick Wo v. Hopkins* (118 U. S. 356), whether said decision is cited or not. References to the vesting of equitable title in the purchaser or to his rights after having made final proofs and paid the purchase price in full have as their authority the decision in the case of *Benson Mining Company v. Alta Mining Company* (145 U. S. 428, 431) whether specifically cited or not, said precedent being set out in the brief and argument portion hereof under the showing in support of the first demurrer, being quoted on pages 7 and 21 hereof. All references to the procedural agreement of August 9, 1950, or to any agreement with Mr. White refer to an agreement between the United States Government, made on its behalf by Hon. Mastin G. White, Solicitor and Acting Assistant Secretary of the Interior and W. O. MacMahon as Special Counsel for Al Sarena Mines, Inc. made in the presence of H. P. McDonald, Jr. and C. R. McDonald and confirmed by Mr. White to Hon. Frank W. Boykin, M. C., reciting said agreement. The agreement is and shall be construed to mean: "The rules of evidence and the rules of practice and procedure as obtain in Federal and State Courts are the rules, and the only rules, agreed upon for the handling of this matter, including the hearing thereof in Portland, Oregon, the date of which hearing had not at that time been set, and all proceedings in connection with said hearing or any and all appeals involved." All statements herein, whether expressed or implied, to the effect that Al Sarena Mines, Inc. had and/or has a legal right to obtain a patent have as their authority the decision of the United States Supreme Court in the case of *Noyes v. Mantle* (127 U. S. 348), the specific ruling whereof is set out on pages 7 and 21 hereof. The withholding of said patent is specifically challenged in each and every assignment of error, whether so stated or not. In filing this Assignment of Error, Answer, Brief and Argument, Contestee herewith notes, assigns, answers, and argues each and every error, whether specifically noted and argued or not, waiving nothing, and refutes all statements, evidence and other corroborative material in support thereof, including the patent application, final certificate, etc., answer, arguments, appeals, legal demands and other communications heretofore filed by Contestee.

In regard to the Decision of the Bureau of Land Management, Mineral Contest No. 38, Rogue River National Forest, under date of April 27, 1951, containing the file memorandum Oregon 0065 ADM: ANC:

The Bureau of Land Management erred in that:

1. It failed or refused, after demanding and receiving the final proofs and purchase money in full, for the claims for patent to issue the patent as prayed for, the final proofs having been filed by Al Sarena Mines, Inc., on January 13, 1949, and the payment of the purchase money demanded being evidenced by a

Final Receipt (Bill No. 324, dated February 17, 1949) issued by the Oregon District Land Office.

2. It gave credence to an alleged protest of the Forest Service against a nonexistent mining company and not against Al Sarena Mines, Inc.

3. It cited and compelled Al Sarena Mines, Inc., to appear as a contestee at an illegal hearing, under duress, by threats of discriminatory confiscatory default judgment.

4. At the illegal hearing held at Portland, Oregon, on September 13, 1950, the Manager insisted upon holding said hearing in accordance with the Code of Federal Regulations, when in truth and in fact, under an agreement with Hon. Mastin G. White, his superior, made August 9, 1950, it had been agreed with contestee that the rules of evidence and the rules of practice and procedure as obtain in Federal and State courts should be the procedure and the only procedure in this cause.

5. The hearing was conducted in an illegal manner, prejudicial to the rights of the contestee, and that after the hearing was legally closed under the rules agreed upon with Mr. White, his superior, the Manager proceeded illegally to take inadmissible and illegal "testimony" from Messrs. Hattan, Sanborn and Leavengood, whose credibility is herewith attacked.

6. The Manager of its Oregon District Land Office sent an appeal to Washington, D. C., a so-called "record" of the hearing, which "record" said Manager admitted in the presence of witnesses was not "worthy of the name" at its office at 11:45 A. M. on September 14, 1950.

7. When legal demand was made for a copy of the "record" upon Manager Pierce M. Rice, of the Oregon District Land Office, and upon other officials of the Bureau of Land Management, contestee was invariably advised that a copy of said "record" would be furnished contestee only upon receipt of \$5.00 or \$1.00 per page therefor, which charge violates 43 CFR: 216.18; 216.19; 216.23 is not in accordance with the recognized charges reported by the Administrator of the Judicial Conference of the United States, September 25 and 26, 1950 (U. S. Gov't. Printing Office), and is a violation of Titles 18 and 43 of the United States Code, regardless of the alleged authority cited by Mr. Rice.

8. While the matter was still on appeal, the Bureau of Land Management willfully, knowingly, and without notice to contestee, returned the "record" to the court of original jurisdiction with orders to render a "decision" based upon the illegal and inadmissible "testimony" adduced after the hearing had been legally closed, and based upon a "record" admittedly not "worthy of the name."

9. The Bureau of Land Management or those in authority in the Department of the Interior caused or appear to have caused, on November 16, 1950, the recantation by Solicitor Mastin G. White of his agreement of August 9, 1950, with contestee as to the rules of evidence, practice, and procedure agreed upon with the contestee in this cause.

10. It attempted to capitalize upon the recantation, rendered worthless for that it was apparently obtained by coercion and duress.

11. The Manager willfully and knowingly rendered a decision, which apparently was dictated by his superior, upon a fragmentary and practically non-existent record, which has been heretofore attacked, and is herewith attacked, which decision predicated upon illegal and inadmissible testimony taken after the hearing was legally closed, in violation of the rules of evidence and rules of practice and procedure as agreed upon with Mr. White on August 9, 1950.

12. Being fully aware of the nature of the record, of the illegal and inadmissible testimony upon which it was based, and after having failed or refused to hear an unbiased mechanical recording of the exact truth, it deliberately, willfully, arbitrarily, and prejudicially overruled and denied the demurrers and motions of contestee and upheld the Manager's findings in his decision.

13. It confirmed, upheld, and advised contestee of the illegal and oppressive charge for the record made by Manager Rice for his record.

14. It persisted and persists in using the highly discriminatory, oppressive, illegal, and unconstitutional Joint Regulations of the Departments of the Interior and Agriculture, contained in the Code of Federal Regulations as a basis of the justice it dispenses.

15. It made and/or upheld any and all rulings, findings, judgments, etc., against contestee by the Manager or anyone else, in violation of statute law, decisions, and the Constitutional Rights of the Contestee.

16. It accepted and gave credibility to the alleged testimony of Messrs. Hattan, Sanborn, and Leavengood, such testimony being illegal and inadmissible.

17. It based its conclusions in this cause upon inapplicable decisions of the Department of the Interior.

18. It based its entire alleged cause of action on the unconstitutional, invalid, and illegal provisions of the Joint Regulations of the Departments of the Interior and Agriculture, contained in 43 CFR 205.5 and 205.6, attempting, after the Forest Service had defaulted three times, and almost a year after its third default on the deadlines provided by 43 CFR 205.1; 205.2; 205.3, to authorize the illegal and unconstitutional withholding of the patent and the filing of an illegal protest.

#### ANSWER, BRIEF, AND ARGUMENT

(Numbers correspond to like numbered assignments of error)

1. The United States Supreme Court has ruled:

A. "The certificate of purchase issued by a receiver after submission of final proof and payment of the purchase price entitles the applicant to a patent, the United States holding the title in trust for the holder of the certificate." *Doffe-back v. Hawke* (115 U. S. 392).

B. "In a case involving applicant's rights, he must be treated as though the patent had been issued and delivered, and any delay in the administration of affairs in the land department does not diminish the rights flowing from such purchase, nor cast any additional burdens on the purchaser or expose him to the assaults of third parties." *Benson Mining Co. v. Alta Mining Co.* (145 U. S. 428, 431).

C. "Where full price has been paid, or all conditions of entry performed the mining claimant can obtain at any time at patent upon proof." *Noyes v. Mantle* (127 U. S. 348); *El Paso Brick Co. v. McKnight* (233 U. S. 250, 257).

D. "Even though a final receipt for mineral land issued upon an application for patent was obtained by fraud, it would be valid until avoided; the fraud only rendering it voidable." *McKnight v. El Paso Brick Co.* (233 U. S. 250).

E. "By the purchase and entry of a mining claim, the equitable title vests in the purchaser, high right to a patent is thereby established and duty to perform assessment work ceases." *Benson Mining Co. v. Alta Mining Co.* (145 U. S. 428).

In view of the foregoing decisions of the United States Court, it is quite obvious from the ruling of that Court set out above as C, which states that an applicant may secure a any time a patent upon proof that he has paid his purchase money or has complied with all conditions of entry, and since final proofs were made January 13, 1949, and since Al Sarena Mines, Inc. paid the purchase money in full on February 14, 1949. Contestee rightfully contends that the right to a patent was at that time clearly established and that it made every effort to obtain said patent, writing letter after letter to the Oregon District Land Office requesting that the papers be transmitted to Washington for the issuance of the patent, but found it impossible even to get replies from said land office to official correspondence, and almost invariably had to resort to long-distance telephone calls to get any communication with that office whatsoever, none of which was to any particular avail, presenting prima facie evidence of bad faith and laches on the part of the Portland Office. When final proofs were made, when the Forest Service had already had its 60 days' Notice as of September 27 to November 26, 1948 and had defaulted, as Al Sarena Mines, Inc. was advised by Mr. Carl F. Spaulding of the Portland Land Office, by said Forest Service having failed either to protest the patent or to request any longer time in which to make an examination, as required if any additional time be needed, and when Al Sarena Mines, Inc. made full payment of its purchase money on February 14, 1949, the transaction was complete, and the failure of the Bureau of Land Management to issue the patent after all conditions had been met by the applicant must of necessity lead only to the conclusion either of laches in the handling of the matter or of possible bad faith, and collusion involving officials of the Portland Land Office.

The fact that the applicant had the right clearly established to a patent and could not obtain it because its correspondence was ignored by the Land Office, and because the Portland Land Office failed to send the completed papers to Washington at the proper time can in no wise diminished the rights (chiefly the right to a patent then and there as described in Supreme Court ruling O hereinabove set forth) flowing from the purchase which the applicant had made. This is borne out by the following ruling of the United States Supreme Court:

"In a case involving applicant's rights, he must be treated as though the patent had been issued and delivered, and any delay in the administration of affairs in

the Land Department does not diminish the rights flowing from such purchase, nor cast any additional burdens on the purchaser or expose him to the assaults of third persons." *Menson Mining Co. vs. Alta Mining Co.* (145 U. S. 428, 431).

It is conclusive from a detailed study of the provisions of 43 CFR 205.1; 2; 3 that those regulations provide definite deadlines for the Forest Service in which to make its examinations and to file its protests. Moreover, if there were no intent to impose any time limit upon the filing of protests, there would be no reason for imposing time limits upon the examinations upon which said protests are predicated. It is quite evident that none of the prescribed time limits were observed in this case, the last possible deadline being six months after the making of final proofs, which made any protest due in the land office by July 13, 1949. The obvious fact is that instead of filing a protest within the 60 days after the Forest Service was notified on or about September 27, or by special request, six months later, it filed its illegal protest approximately one year and seven months later, and exactly one year and three months after the making of final proofs. Mr. Hattan admitted in a letter to contestee that he did not submit his report until December, 1949, thereby violating 43 CFR 205.3. This subject is treated fully in this brief under the subject of demurrers, corresponding to the third topic in the Assignment of Error.

Regardless of the foregoing paragraph, and of its implications, the fact remains as hereinabove set out, the right to a patent has been clearly established, that failure to issue said patent is chargeable to laches in the Bureau of Land Management, that after that right has been established, such laches can do nothing to diminish said rights of the applicant, which rights consist of full equitable title to the property, as has been ruled many times by the Supreme Court, and that laches in the Forest Service permitted by the Bureau of Land Management to interfere with those rights already accrued to the applicant are not only laches of the Interior Department as well, but also constitute discrimination and/or discriminatory enforcement, and is in effect encouraging an attack by a third party.

The Supreme Court has ruled in certain extreme cases that a contest may be initiated by the Government to destroy an owner's title by canceling his entry, and its policy is quite clearly defined in its doctrine that such action may be deemed justifiable in cases of fraud or the encroachment of an applicant upon other citizens having a greater equitable interest in fact than the entryman, his behavior toward said citizens being tantamount to fraud, or in cases of mistake, where the same land is sold twice, etc. *McKnight v. El Paso Brick Co.* (233 U. S. 250, 257); *Doffback v. Hauke* (115 U. S. 404); *Crisman v. Miller* (197 U. S. 313).

The aforesaid doctrine is shown clearly in the Supreme Court's policy that a patent, once having been issued, should and can only be attacked in cases of fraud or mistake, as aforesaid, where such an element is present as would make it necessary to ask the Attorney General to institute annulment proceedings for such fraud or mistake, which is the only reason for cancellation of a fully proven and paid entry. *Grillim v. Donnellan* (115 U. S. 45, 49, 29); *Orchard v. Alexander* (157 U. S. 372); *Benson Mining Co. v. Alta Mining Co.* (145 U. S. 428, 431).

There is obviously neither fraud nor mistake present in this case. The claims involved are an integral part of a large intrusive mass, all mineralized and lying within clearly defined boundaries of the neighboring rock, which is not mineralized, making this ore body what is defined as a broad lode or broad zone. The claims are clearly mineral in character, as they have sufficient promise to warrant recommendations for large expenditures in development work for the mass of low-grade ore lying within their boundaries by well-known professional mining engineers and geologists who have studied them carefully and are willing to back their recommendations with their professional reputations. Moreover, Contestee has had negotiations in process for large sums of money for this purpose and for the construction of facilities for handling such ore at low cost per ton, and the negotiations are still in process. However, it is extremely difficult to secure heavy capital without full legal title to the property. Needless to say, further withholding of said patent would only delay the completion of necessary negotiations, which negotiations will also make possible the production of lead and zinc in significant quantities, needed for the defense of the United States. Contestee and its legal grantors have already expended approximately a quarter-million dollars in improvements, and Contestee rightfully avers that all claims have valid discoveries and requisite expenditures on or for their benefit, properly evaluated and apportioned in accordance with Bureau of Land Management requirements and in accordance with its own specific instructions by Mr. G. Cleveland Taylor, E. M., a mining

engineer of some 40 years' experience and a U. S. Mineral Surveyor, a highly competent and impartial public official detailed to the property for some 3 or 4 months by the Bureau of Land Management to make a survey and appraisal of the true facts. His findings are in the record of this application and cause under his bond to the Government and under oath. Findings of many other recognized authorities are quoted verbatim and used in corroboration of the statements made under oath in the application, which was refiled in this cause for the record. What impartial and honorable judge would set aside this wealth of prima facie evidence of bona fides to consider only a few samples, the identity of which samples cannot be proven, left in the unsupervised custody of the Forest Service, which agency had the vast majority of the samples assayed, and which samples were obtained by two apparently hostile men, who threatened an officer of this corporation with summary confiscation and attempted to intimidate him, "Advising" him to withdraw the patent application, already perfected by a final certificate and fully paid for, warning of certain defeat and automatic confiscation of land, buildings, and equipment if Al Sarena Mines, Inc., dared go into open hearing and attempt to defend itself in the event of a contest, which contest they averred could under no circumstances be won by a contestee? This would appear to place considerable additional burden of proof upon the owners, who have already proven their right to a patent on recognized mineral claims of merit and of record now for fourteen to fifty-four years. The Federal Court has ruled that it should take "evidence so clear and persuasive as to satisfy the mind that the discovery was in fact false" to dispute any claim or to attack the validity of any claim of long standing; and the Supreme Court has ruled that no additional burdens should be placed on the purchaser after he has made his final proofs and paid his purchase money to the Government; as was done here. *Cheesman v. Shreve* (40 F. 787, 791); *Benson Mining Co. v. Alta Mining Co.* (145 U. S. 428, 431).

In regard to the merits of the property, new and additional merit is now showing in the form of hitherto unconsidered value of sulphur from the vast quantities of iron pyrite present. It is common knowledge that the rich sulphur deposits of Texas and Louisiana are being depleted by the serious strain on the nation's sulphur resources, and that attention of those seeking to develop new sources of sulphur are turning to a search for plentiful supplies of iron pyrite, which the property contains in quantities, but which was formerly not considered in any sense commercially feasible, except for the gold and silver held in association with the pyrite.

Inasmuch as the property and the applicant have been adequately shown to have the bona fides necessary for patenting, regardless of allegations to the contrary by the Forest Service, which agency would apparently be willing to see a concern with already about a quarter million dollar investment and a 190,000,000-ton low-grade potential fail in its attempt to expand and produce the minerals needed in the Nation's current effort, simply to lay an adverse claim to the land, a paltry and insignificant acreage of well-known mineral ground, admittedly for an alleged \$77,000 worth of timber, which is quite obviously but a mere bagatelle, it is established that this cause falls within the category subject to the Supreme Court rulings cited on page 7 hereof. The ruling designated as D., on page 7 shows conclusively that public policy and the Supreme Court are in favor of patenting and of private ownership by industry having even a small fraction of the bona fides obviously present in both the applicant and the property involved in this cause.

An analysis of the matter herein involved shows that the entire alleged cause of action is predicated upon the theory that law, justice, and public policy and the Constitution are not violated or in any wise undermined by an interdepartmental policy between an accuser and a judge or potential accuser and potential judge, which policy can be used to deny forever the legal title to a property owner's land after he has bought and paid for that land. Said theory makes it appear proper to allow a third party, the Forest Service, to intervene in a transaction between the owner and the Land office which has long since been completed, where full equitable title has passed, to attack an innocent landowner long after the expiration of the deadlines for raising questions as to the owner's rights, and not only attempt to deny the owner his legal title but also to strike down and destroy and confiscate from him, even the equitable title which has already passed, which he has bought in all good faith, which was sold to him, and which the Supreme Court has ruled entitles him to his full legal title "at any time."

the Land Department does not diminish the rights flowing from such purchase, nor cast any additional burdens on the purchaser or expose him to the assaults of third persons." *Menson Mining Co. vs. Alta Mining Co.* (145 U. S. 428, 431).

It is conclusive from a detailed study of the provisions of 43 CFR 205.1; 2; 3 that those regulations provide definite deadlines for the Forest Service in which to make its examinations and to file its protests. Moreover, if there were no intent to impose any time limit upon the filing of protests, there would be no reason for imposing time limits upon the examinations upon which said protests are predicated. It is quite evident that none of the prescribed time limits were observed in this case, the last possible deadline being six months after the making of final proofs, which made any protest due in the land office by July 13, 1949. The obvious fact is that instead of filing a protest within the 60 days after the Forest Service was notified on or about September 27, or by special request, six months later, it filed its illegal protest approximately one year and seven months later, and exactly one year and three months after the making of final proofs. Mr. Hattan admitted in a letter to contestee that he did not submit his report until December, 1949, thereby violating 43 CFR 205.3. This subject is treated fully in this brief under the subject of demurrers, corresponding to the third topic in the Assignment of Error.

Regardless of the foregoing paragraph, and of its implications, the fact remains as hereinabove set out, the right to a patent has been clearly established, that failure to issue said patent is chargeable to laches in the Bureau of Land Management, that after that right has been established, such laches can do nothing to diminish said rights of the applicant, which rights consist of full equitable title to the property, as has been ruled many times by the Supreme Court, and that laches in the Forest Service permitted by the Bureau of Land Management to interfere with those rights already accrued to the applicant are not only laches of the Interior Department as well, but also constitute discrimination and/or discriminatory enforcement, and is in effect encouraging an attack by a third party.

The Supreme Court has ruled in certain extreme cases that a contest may be initiated by the Government to destroy an owner's title by canceling his entry, and its policy is quite clearly defined in its doctrine that such action may be deemed justifiable in cases of fraud or the encroachment of an applicant upon other citizens having a greater equitable interest in fact than the entryman, his behavior toward said citizens being tantamount to fraud, or in cases of mistake where the same land is sold twice, etc. *McKnight v. El Paso Brick Co.* (223 U. S. 250, 257); *Doffeback v. Hawke* (115 U. S. 404); *Crisman v. Miller* (197 U. S. 313).

The aforesaid doctrine is shown clearly in the Supreme Court's policy that a patent, once having been issued, should and can only be attacked in cases of fraud or mistake, as aforesaid, where such an element is present as would make it necessary to ask the Attorney General to institute annulment proceedings for such fraud or mistake, which is the only reason for cancellation of a fully proven and paid entry. *Girillim v. Donnellin* (115 U. S. 45, 49, 50); *Orchard v. Alexander* (157 U. S. 372); *Benson Mining Co. v. Alta Mining Co.* (145 U. S. 428, 431).

There is obviously neither fraud nor mistake present in this case. The claims involved are an integral part of a large intrusive mass, all mineralized and lying within clearly defined boundaries of the neighboring rock, which is not mineralized, making this ore body what is defined as a broad lode or broad zone. The claims are clearly mineral in character, as they have sufficient promise to warrant recommendations for large expenditures in development work for the mass of low-grade ore lying within their boundaries by well-known professional mining engineers and geologists who have studied them carefully and are willing to back their recommendations with their professional reputations. Moreover, Contestee has had negotiations in process for large sums of money for this purpose and for the construction of facilities for handling such ore at low cost per ton, and the negotiations are still in process. However, it is extremely difficult to secure heavy capital without full legal title to the property. Needless to say, further withholding of said patent would only delay the completion of necessary negotiations, which negotiations would also make possible the production of lead and zinc in significant quantities needed for the defense of the United States. Contestee and its legal grantors have already expended approximately a quarter-million dollars in improvements, and Contestee rightfully avers that all claims have valid discoveries and requisite expenditures on or for their benefit, properly evaluated and apportioned in accordance with Bureau of Land Management requirements and in accordance with its own specific instructions by Mr. G. Cleveland Taylor, E. M., a mining

engineer of some 40 years' experience and a U. S. Mineral Surveyor, a highly competent and impartial public official detailed to the property for some 3 or 4 months by the Bureau of Land Management to make a survey and appraisal of the true facts. His findings are in the record of this application and cause under his hand to the Government and under oath. Findings of many other recognized authorities are quoted verbatim and used in corroboration of the statements made under oath in the application, which was relied in this cause for the record. What impartial and honorable judge would set aside this wealth of prima facie evidence of bona fides to consider only a few samples, the identity of which samples cannot be proven, left in the unsupervised custody of the Forest Service, which agency had the vast majority of the samples assayed, and which samples were obtained by two apparently hostile men, who threatened an officer of this corporation with summary confiscation and attempted to intimidate him, "Advising him to withdraw the patent application, already perfected by a final certificate and fully paid for, warning of certain defeat and automatic confiscation of land, buildings, and equipment if Al Sarena Mines, Inc., dared go into open hearing and attempt to defend itself in the event of a contest, which contest they averred could under no circumstances be won by a contest?" This would appear to place considerable additional burden of proof upon the owners, who have already proven their right to a patent on recognized mineral claims of merit and of record now for fourteen to fifty-four years. The Federal Court has ruled that it should take "evidence so clear and persuasive as to satisfy the mind that the discovery was in fact false" to dispute any claim or to attack the validity of any claim of long standing, and the Supreme Court has ruled that no additional burdens should be placed on the purchaser after he has made his final proofs and paid his purchase money to the Government, as was done here. (*Chesman v. Shreve* (40 F. 787, 791); *Bowson Mining Co. v. Alta Mining Co.* (145 U. S. 428, 431).

In regard to the merits of the property, new and additional merit is now showing in the form of hitherto unconsidered value of sulphur from the vast quantities of iron pyrite present. It is common knowledge that the rich sulphur deposits of Texas and Louisiana are being depleted by the serious strain on the nation's sulphur resources, and that attention of those seeking to develop new sources of sulphur are turning to a search for plentiful supplies of iron pyrite, which the property contains in quantities, but which was formerly not considered in any sense commercially feasible, except for the gold and silver held in association with the pyrite.

Inasmuch as the property and the applicant have been adequately shown to have the bona fides necessary for patenting, regardless of allegations to the contrary by the Forest Service, which agency would apparently be willing to see a concern with already about a quarter million dollar investment and a ~~thirteen-million~~ low-grade potential fail in its attempt to expand and produce the minerals needed in the Nation's current effort, simply to buy an adverse claim to the land, a paltry and insignificant acreage of well known mineral ground, admittedly for an alleged \$77,000 worth of timber, which is quite obviously but a mere hazatelle, it is established that this cause falls within the category subject to the Supreme Court rulings cited on page 7 hereof. The ruling designated as D, on page 7 shows conclusively that public policy and the Supreme Court are in favor of patenting and of private ownership by industry having even a small fraction of the bona fides obviously present in both the applicant and the property involved in this cause.

An analysis of the matter herein involved shows that the entire alleged cause of action is predicated upon the theory that law, justice, and public policy and the Constitution are not violated or in any wise undermined by an interdepartmental policy between an accuser and a judge or potential accuser and potential judge, which policy can be used to deny forever the legal title to a property owner's land after he has bought and paid for that land. Said theory makes it appear proper to allow a third party, the Forest Service, to intervene in a transaction between the owner and the Land office which has long since been completed, where full equitable title has passed, to attack an innocent landowner long after the expiration of the deadlines for raising questions as to the owner's rights, and not only attempt to deny the owner his legal title but also to strike down and destroy and confiscate from him, even the equitable title which has already passed, which he has bought in all good faith, which was sold to him, and which the Supreme Court has ruled entitles him to his full legal title "at any time."

Thus the code of Federal Regulations as applied in this cause would set at naught Federal Statutes, the decisions of the Supreme Court as to the law and public policy, and the Constitutional rights of the contestee.

It is therefore respectfully submitted that Contestee has clearly established its rights to a patent, that it has been illegally attacked and has had its rights once placed in jeopardy illegally, that the alleged charges preferred were preferred illegally so as to have no force or effect, that there has been no sufficient testimony to disprove the validity of contestee's right to a patent, to which it was and is entitled "at any time," that the alleged charges would have been impossible except for laches on the part of the Departments of the Interior and/or Agriculture (See Supreme Court ruling B, page 7 hereof), that even when there were neither charges nor official questions of any description said patent was not issued though repeatedly demanded by applicant who was entitled to it "at any time," and that the patent should issue forthwith, nullifying and reversing the adverse decision of the Bureau of Land Management. (Also see answers and arguments set out in the argument of demurrers, corresponding to the assignment of error No. 3, pages 16-50.)

2. The Forest Service is forbidden by the Act of February 1, 1905, from acting in the execution of the mining laws. This is fully treated on pages 27-29; 51.

3. To prevent repetition, this is fully treated on pages 16 through 50.

3. The answer, brief, and argument section corresponding to assignment of error No. 3 is given in the following showing in support of the demurrers and motions in the original answer of Al Sarena Mines, Inc., which demurrers and motions were reproduced and set forth in pages 2, 3, and 4 of the decision of the Bureau of Land Management, dated April 27, 1951:

1. This demurrer was to any alleged right to the Forest Service to file a protest, under the circumstances, against the issuance of a patent to mining claims of record and in process before they were included in a national forest, covering the following claims: Henry Applegate, J. W. Merritt, Delia McKinnon, W. C. Leever, J. L. Grubb, and J. D. McKinnon.

Even the regulations of the Interior and Agriculture Departments (43 CFR 205.1) provide for no action to contest such claims located and in process before inclusion in a national forest unless the regional forester complies with the following procedure within 60 days from the filing of an application for patent:

a. Has a field examination made, secures the report back in his office, and files a protest, if any, or

b. Makes official request of the land office manager for a longer time than 60 days, but not to exceed 6 months, within which he must have the examination made and make any protest he intends to make.

The Regional Forester was therefore guilty of laches, and of violating his own 43 CFR 205.1, in that:

a. He failed either to have an examination made during the 60 days following application for patent, which period ended on or about November 27, 1948, or during the publication period, which ended January 7, 1949.

b. He failed to request an extension of time during the periods set forth above, the "record" showing that said request was not filed until March 18, 1949. Even if said request had been made, the six-month period following that application for patent expired March 27, 1949, or thereabouts, at which time it was mandatory that the report be in the hands of the Regional Forester (sec. 205.3) and the protest filed. Sec. 205.5 states clearly that if no protest be filed within the time limit prescribed in sec. 205.1, 2, the manager shall take appropriate action on the final proofs, meaning, of course, to forward the papers to the Bureau of Land Management, collect the purchase money, transmitting purchase receipt and duplicate final certificate to the purchaser and sending the original final certificate to Washington as authority for the Director of the Bureau of Land Management to execute the patent certificate.

c. Even if the Manager of the Portland land office and the Bureau of Land Management had been relying upon the provisions of sec. 205.2, the deadlines set thereby expired without the filing of a protest, or even of a report, as required by sec. 205.3, which Mr. Hattan admitted in a letter to contestee that he failed to file until December 1949.

d. The obvious purpose of setting a deadline is that it limits the time in which to do certain acts or things without losing any rights or privileges, if any there are. The facts are that if the Forest Service had intended

to protest this matter, the affairs were handled in such manner as to render them ineffective within the eyes of the law and of all justice. Moreover, it was known definitely to the Portland office of the Forest Service that the application was in fact filed for that Mr. Wolfe, of the office of the Regional Forester, was notified personally by the applicant at his office in the Post Office Building on the day of filing the patent application.

e. The Forest Service having repeatedly defaulted in the requirements of the time limits set out in its own 43 CFR 205.2, 205.3, 205.1, is entitled to no consideration. Furthermore, negotiations between the office of the Regional Forester and the Portland land office should have come to an end, as required, when the final proofs were executed and filed on January 13, 1949. Section 205.5 states clearly that the matter of whether the claims will be protested after the Forest Service has defaulted is a matter between the Director of the Bureau of Land Management and the Chief, Forest Service, Washington, D. C. The Forest Service having nothing upon which to base a protest, and having failed within the deadlines provided to obtain any such evidence, should have been compelled by the Director of the Bureau of Land Management to file a statement of no protest, as there was ample evidence in the application for patent, which was and is refilled in evidence in this cause, to prove beyond reasonable doubt to any man the mineral character, valid discoveries and requisite expenditures necessary to patent each and every claim.

f. The provision of sec. 205.5 prohibiting action on a patent application after the Forest Service has repeatedly defaulted is no defense for the Bureau of Land Management, for that in this case with obvious and ample proof of the satisfaction of all requirements, setting forth the best professional opinions of foremost authorities in corroboration of the statements made by the applicant, the Director of the Bureau of Land Management has authority to cause the issuance of patents, regardless of 43 CFR 205.5, the Forest Service being excepted and prohibited from exercising administrative powers in mining law by the Act of February 1, 1905 (16 U. S. C. 472), and being already in default.

g. In enforcing 43 CFR 205.5 and 205.6 simultaneously, as has been done here, the Forest Service has assumed unconstitutional and dictatorial powers not within the scope of authority, rights or powers granted to any person, Governmental Department, the President of the United States, the Congress, or the Supreme Court. Simultaneous application of these two regulations would intend to empower the Forest Service to deny landowners with full equitable title the right to its full and perfected legal title forever and without cause, simply by declining to state, even when repeatedly in default itself, whether it would or would not protest a perfectly legitimate mineral entry, which entry is a right of the citizen under the Constitution and under the United States Code. Moreover, it would appear that these regulations purport to give the Forest Service the "right" to remain impervious to the consequences of its own default and would allow it to retain the "right", as long as it remained noncommittal, to hail innocent landowners into hearings, placing upon them the additional burden of defending themselves against unwarranted attacks upon them, made irresponsibly by said Forest Service in "charges" without foundation in fact and so precarious that its joint regulations prohibit their being under oath; but those "charges" must be answered under oath by the landowner, who as already bought, paid for, and owns the land, who had thought himself secure in his ownership and equity but who suddenly finds himself faced with a jail sentence if he should answer the "charges" in the same irresponsible manner in which they were preferred.

*These are the literal powers which the Forest Service has already assumed and been upheld in by the Bureau of Land Management.*

In regard to the laches hereinbefore mentioned, both on the part of the Department of the Interior and on the part of the Department of Agriculture, the regulations have been sorely abused in attempting to justify laches which intend to deny property rights to the citizens. If those regulations must be invariably obeyed by the Departments, then those regulations must fall from their oppressive and tyrannical level. The laches of which the Department of the Interior was guilty, either within itself or by reason of its improper administration of affairs with the Forest Service in having failed to issue the patent on this application is well dealt with by the following decisions of the United States Supreme Court:

"In a case involving applicant's rights, he must be treated as though no patent had been issued and delivered, and any delay in the administration of affairs in the land department does not diminish the rights flowing from sale, purchase, nor cast additional burdens on the purchaser or expose him to the assaults of third persons."

*Benson Mining etc. Co. v. Alta Mining Co.* (145 U. S. 428, 431).

"Where full price has been paid, or all conditions of entry performed by mining claimant can obtain at any time a patent, upon proof." *Noyes v. Har* (127 U. S. 348).

"If no adverse claim is filed with the register *within 60 days from the filing of the application*, the law assumes that the applicant is entitled to a patent." *Grillman v. Donnellan* (115 U. S. 45, 49).

In connection with the foregoing decisions of the United States Supreme Court, it is respectfully submitted that Al Sarena Mines, Inc., was not counter-acted by any adverse claim or protest whatsoever during the 60-day period following the date of application for patent, that the full purchase price had been paid or that all conditions of entry had been performed, that the applicant submitted his final proofs, which were accepted and approved, and that the applicant could, under the law, obtain a patent "at any time." It is further respectfully submitted that, in the eyes of the law, since the applicant was entitled to a patent "at any time," and since the Forest Service and/or the Bureau of Land Management were guilty of laches, involving jeopardy of full equitable title already vested in the applicant, the action of the Bureau of Land Management in upholding the laches of the Forest Service after said Forest Service had lost or forfeited all its rights to protest, if any it had, is in itself laches in the land department, the land department only making such laches possible, thereby adversely affecting the interests of the applicant. It is further submitted that any delays in the administration of affairs in the land department did not diminish the rights of the applicant flowing from the purchase already made, and that the right to a patent still exists. It is further submitted that the basis for the act of withholding patent from the applicant was a regulation stating that the United States may contest an application or entry at any time prior to patent, that the precedent cases cited by the Bureau of Land Management and the Forest Service do not apply in this cause, and that any legal or moral right to invoke said regulation is predicated only upon extreme cases such as were cited, wherein an applicant had been sold land of mistaken identity, attempts to eject inhabitants in previous possession of a town because of his mining claim, obtained an entry on mineral lands without equitable interest where other mineral developers had expended substantial time and money, attempting to appropriate the land and developments to his own use, thereby adversely affecting the interests of the bona fide mineral developers, or where the applicant attempted to patent "mineral claims" for the purpose of operating a livery stable and controlling the trail leading from the rim to the bottom of the Grand Canyon. Contestee rightfully contends that the citing of such cases with the implication of any parallelism whatsoever was not only a grave and gross miscarriage of justice, but was also an insulting affront, indignity, and abuse, which no self-respecting citizen would submit from a fellow man and to which he need not submit from constituted Governmental authority. Contestee reiterates that it is a legitimate mining corporation, equipped as the second largest producer in the State of Oregon, and that it intends, as set forth in the patent application, to institute an expansion program for the production of gold, silver, and the metals sorely needed for the defense of the United States on a scale larger than has heretofore been seen in the Pacific Northwest, processing ore for each and every claim. Contestee respectfully submits that the attempt to invoke such a measure arbitrarily, as was done here, after the right to a patent had been clearly established, on a known producing property of over a half-century production and development record was but a means of attack of the Forest Service after it had slept on its rights, if any it had, to attempt to strike down arbitrarily a private industry within its "domain," attempting to confiscate its property, both real and personal, that it might lay claim to the paltry and insignificant acreage of well-known mineral ground to control and dispose of a mere amount of \$77,000 worth of timber. For this purpose, the Forest Service would appear willing to doom a private investment already made by the claimant and its co-grantors of approximately three times the alleged value of the aforesaid property computed at the highest and most inflated prices in history. Thus, in attempting to invoke the drastic measure provided by 43 CFR 205.5; 205.6 for the purpose

just outlined, the Forest Service, without equitable title or interest, which equitable title and interest are the property of the entryman, *has placed itself in the exact position of the offender which that regulation was designed to apprehend*, as in the case of *Chrisman v. Miller* (197 U. S. 313). In that case, the Supreme Court invoked the doctrine of absolute authority against a man who attempted to use the rights conferred upon him by his receipt for the purpose of adversely affecting the interests of others with greater equitable interest and for the purpose of appropriating their assets to his own use. (See also *Doffeback v. Hawke* (115 U. S. 404).)

The abuse by Government of the law and regulations, as aforesaid, in invoking a drastic measure attempting to authorize the Forest Service to contest after its own default, is clearly demonstrated by the following Supreme Court decision covering the contention of contestee that this attack upon contestee was attempted only on conjectural technicalities, highly opinionated, highly prejudiced, and without any sufficient evidence whatsoever:

"Even though a final receipt for mineral lands issued upon an application was obtained by fraud, it would be valid until avoided; *the fraud only making it voidable.*" *El Paso Brick Co. v. McKnight* (233 U. S. 250).

It is quite obvious from the record that there was and is no fraud on the part of the applicant for patent, that its application was predicated upon sound mining and business principles, well corroborated, and that the evidence submitted by the applicant is good and sufficient in any court in the United States.

In making its attack, the Forest Service disregarded completely the intent and purpose of the law in its inference that the patent applicant was applying for patent to substantially worthless mineral lands merely to obtain the timber thereon for commercial disposition. The facts are that the land has previously and for a number of years been established as mineral in character by a number of qualified experts, and is generally recognized as such; that the claims are perfected by valid discoveries and requisite expenditures many times over during a period of fifteen years to fifty-four years; that the applicant had and has a perfect legal right to sell every piece of timber on the property since the issuance of the final receipt and submission of final proofs, and that the applicant has not only failed to sell said timber, but that it has repeatedly gone on record as having refused to sell the same. The attack by the Forest Service, even if it had been timely, which it was not, was completely unwarranted, being backed by no sufficient evidence and being made in the very face of prima facie evidence of bona fides, both of the claims and of the patent applicant. The Federal Court has ruled adequately in regard to such attacks on valid mineral claims of many years' standing in the case of *Cheesman v. Shrecre* (40 F. 787, 791). Conversely, the prosecution of such an action as was brought in this cause, in the eyes of the law, wilfully and knowingly bringing such an action with full knowledge of the facts and the law, as aforesaid, would appear prima facie evidence of selfishness to the extent of attempted justifiable maliciousness, which is never justifiable, and of general bad faith on the part of the Forest Service. Such a preposterous attack should never have been entertained by the Bureau of Land Management from the Forest Service or from anyone else. The obvious fact that the Forest Service was allowed by the Bureau of Land Management to bring an action of this kind in open violation of Rules 2 and 3 of the Interior Department Rules of Practice, while enforcing said rules strictly on other parties bringing actions on similar charges is prima facie evidence and constitutes an admission of gross discrimination and/or discriminatory enforcement to the detriment of a contestee and to the detriment of a contestant required to obey the aforesaid Rules of Practice, but for the benefit of the Forest Service. The aforesaid Rules of Practice are likewise enforced in such manner as to be to the detriment of a contestant claiming an equitable interest but for the benefit of the Forest Service, which by law and as decided by the Supreme Court as herein set out, has neither equitable title nor interest and is therefore without even a cause of action although in other respects the Forest Service is in like circumstances with other contestants. Furthermore, the attempt by the Bureau of Land Management to enforce its so-called Rules of Practice upon a party called upon to defend such an action while refusing to enforce said Rules of Practice against or upon the party bringing said action, using said Rules of Practice as a means for taking the equivalent of a default judgment against the defendant is prima facie an admission of discrimination and/or discriminatory enforcement and an attempt to take property rights from citizens without due process of law. The Fourteenth Amendment to the Constitution secures equal protection of the law as administered. See *Yick Wo v. Hopkins* (118 U. S. 356).

In special regard to the principle that the Forest Service had no right, under the circumstances, to attack claims which were located and in process prior to their inclusion in a national forest, wherein reference was made to *ex post facto* laws, etc., meaning retroactivity involving a citizen's rights, including civil, criminal, administrative, enforcement, and miscellaneous matters, the principle of retroactivity in basic law is well settled. The Congress recognized this principle in passing the Acts of June 4, 1897 (30 Stat. 36), and February 1, 1905 (16 U. S. C. 472). The former law states that the rules and regulations applying to such claims before said inclusion in a national forest shall continue to apply, notwithstanding the forest reservation. The Joint Regulations of the Departments of the Interior and Agriculture, however, impose additional regulations at the direction of the Secretary of Agriculture, which regulations are illegal for that under the administration of the Forest Service and its joint regulations, these same claims are allegedly not under the same set of rules and regulations, thus constituting a direct violation of said former law and of the Constitution, which that law upheld, and an admission both by the Departments of the Interior and Agriculture of their own violations thereof. Moreover, said joint regulations are a direct violation of the Act of February 1, 1905 (16 U. S. C. 472), in that they provide specific executive and administrative procedures to be executed by the Secretary of Agriculture or his officials, representatives, agents, employees and/or servants in the administration of the mining laws, which he is specifically forbidden and excepted from by said Act of February 1, 1905 and/or by the Constitution, which that law recognized. These statements are further substantiated in the ruling of the United States Supreme Court in the case of *U. S. v. Dart* (132 U. S. 334), which states: "Regulations cannot have retroactive effect." In addition to the retroactivity demurred to, while the retroactive effect is nevertheless present in such instance, the joint regulations impose or attempt to impose additional restrictions, not provided by law or by its corresponding regulations upon claims located and placed in process before their inclusion in a national forest without imposing like restrictions upon claims located and placed in process under the same laws and regulations on the same date, but which latter claims were never included in a national forest. The Joint Regulations, therefore, have attempted to extend the law and corresponding regulations so that it would appear that there are two classes of claims, located under the same laws and regulations on the same date, but to which the law applies differently to the two classes of claims, the enforcement of the law also being different and unequal so as to make unjust discriminations between persons in similar circumstances, material to their rights. Said Joint Regulations are therefore illegal and unconstitutional for that they violate the two aforesaid Acts of Congress of 1897 and 1905 and by reason of discrimination and/or unconstitutional discriminatory enforcement, attempted class legislation, attempted legislation by regulation, and retroactivity. The Supreme Court has ruled in the case of *Williamson v. U. S.* (207 U. S. 425): "Regulations must be consistent with law; they may not be extended so as to alter, amend, or defeat a law already passed by Congress."

Further in support of the demurrer is the fact that even the Forest Service obviously admits, by its adoption of 43 CFR 205.1, a distinct difference between claims located prior to any inclusion in a national forest by binding itself to its 60-day procedure, as in the case of all other adverse claimants. The regulation itself, while applicable to the aforesaid six claims as in the case of an agricultural entry (*Tyce Consol. Min. Co. v. Langstedt*, 136 F. 124) is in illegal and unconstitutional way, it fails for that its provision granting additional time to the Forest Service for a field examination while not granting a like additional time to a private citizen wishing to contest the entry or application on the same ground is discriminatory and attempts to justify forcibly the discriminatory enforcement of the law, thereby denying its equal protection as administered, in violation of the Fourteenth Amendment to the Constitution.

Inasmuch as contestee has shown herein that the first demurrer reproduced on page 2 of the Bureau of Land Management decision has great legal and Constitutional merit, and inasmuch as Contestee has proven beyond reasonable doubt that no possible grounds can be or could possibly have been given legally or Constitutionally either for overruling said demurrer or for the affirmation of its overruling, contestee avers that said demurrer was in truth and in fact a charge preferred by contestee, legally and under oath, against the Department of the Interior and/or the Department of Agriculture and against the validity of the proceeding, challenging the right of either the Forest Service or the Bureau of Land Management to cite or to have cited Al Sarena Mines, Inc. as contestee and that failure of the Manager of the Al

land Land Office, or his refusal, to rule upon said demurrer or to make suitable arrangements for its argument, as is customary when a demurrer is filed, constituted an admission of the truth and validity of said demurrer by the Bureau of Land Management and/or the Forest Service. Contestee therefore avers that the manager had defaulted in his own duty and that contestee had rightfully assumed the demurrer to have been taken as confessed, as it was in truth and in fact confessed in accordance with the established 30 day procedure. Contestee further avers that both Manager Rice's ruling and Mr. Zimmerman's affirmation thereof were in error after contestee had in effect pleaded *res adjudicata* in favor of contestee by reason of default or by the Bureau of Land Management and/or the Forest Service, and/or by reason of the obvious merit of the demurrer.

Contestee further avers that the right to demur to any complaint whatsoever (regardless of statements to the contrary by the Forest Service and/or the Bureau of Land Management in subsequent conference and correspondence), is an inherent Constitutional Right of a defendant to demand specific knowledge of the charges preferred against him in complete detail, and to demand strict proof and evidence of any alleged right to bring him to trial. Said defendant is bound to no duty to be tried because of alleged constituted authority alone, as was attempted in this cause, whether the action involving his rights be civil, criminal, administrative, or otherwise.

Contestee therefore respectfully submits that the foregoing showing constitutes a valid support of the subject demurrer, and that it is likewise applicable to all of the demurrers filed by demurrers filed by contestee in this cause to the full extent that said showing applies also to claims located and placed in process after the establishment of a national forest around them, and that the ruling of Manager Rice and the affirmation thereof by the Bureau of Land Management should be reversed in favor of contestee, thereby sustaining said demurrer.

2. The second demurrer was to the form and the manner and the lack of notice of the illegal protest on the separate and several grounds, to-wit:

a. First, the protest (Contest No. 38) stamped "Received April 13, 1950" is not properly dated by Mr. Andrews and appears but the conclusion of the pleader.

In regard to demurrer 2a, it is always customary to date all legal papers, especially when the rights and interests of a citizen are involved, just as it is always customary to sign all such legal papers. If contestee can allegedly be compelled to appear at a hearing to defend from unwarranted attack the property rights which it has earned, bought and paid for, which property rights under the Constitution are sacred, the owner of those rights has a perfect right to demand, did demand, and does demand the strictest adherence to each and every formality and other requirement of due process before allowing those property rights to be tampered with by any judicial or administrative tribunal assuming authority or jurisdiction over said rights. Contestee further has the right to demand the foregoing and also the right to refuse to be bound by any adverse decision of said tribunal, which tribunal alleges that it is exercising due process, unless the strictest conformity with each and every detail of due process is invariably kept, and Contestee did refuse and does refuse to be bound by the adverse decisions and actions taken against it in this cause.

Regardless of the requirements of 43 CFR 205.3, which states that the grounds upon which the illegal protest was allegedly based must be stated briefly and clearly, the contestee is entitled to more than the mere conclusion of the pleader, for that sufficient evidence is a prerequisite to the issuance of any process. Contestee demurred to the sufficiency of the evidence, demanding also a bill of particulars, to which it was and is obviously and admittedly entitled. Although counsel and other representatives of contestee made a diligent effort to obtain said bill of particulars, they were unsuccessful in their effort, as aforesaid. Instead of furnishing the required bill of particulars, the Bureau of Land Management advised contestee officially that contestee had received all of the particulars it was going to receive, and that the aforesaid conclusion of the pleader, backed by no facts, evidence, oath, or corroboration was sufficient information to be given a contestee in regard to the charges allegedly preferred against it or its interests. This, again, is a flagrant violation of the Constitutional Rights of the contestee and in itself is sufficient to render the entire proceeding utterly arbitrary and therefore judicially void,

and to cause its dismissal for that after contestee had demurred and gives the Bureau of Land Management and/or the Forest Service every opportunity to comply with a reasonable and Constitutionally mandatory request, it willfully, knowingly, and prejudicially brought the defendant to trial with no specific knowledge of the charges which had been allegedly preferred against it. In the absence of the required bill of particulars, contestee made a diligent attempt to ascertain from the Bureau of Land Management the results of the alleged sampling of the "field examination" before going to trial, but from the actions and attitude of the officials of said Bureau, it was obvious that said results were considered material of a privileged or confidential nature and were not to be divulged to those whose interests said results affected. *Those assay results were public records, made at the taxpayers' expense, and as such should be subject to the inspection of any citizen.* However, it appears that the Bureau of Land Management, which refers to itself as "fair and impartial," found it necessary to treat as classified matter that information which the Constitution says belongs to any defendant. While on the subject of assay results as referred to here, it is interesting to note that Mr. Hattan reported mere traces of mineral and/or values in the samples reported upon, and that contestee checked Mr. Hattan's sampling before hand, before the alleged charges were preferred, by obtaining identical samples from Mr. Hattan's own channel cuts which he left and determined, for instance, that an identical sample from the Alabama Claim ran instead of the mere trace reported by Mr. Hattan in his "testimony," a value of \$2.10, as reported by Smith-Emery Company, of Los Angeles, California. Facts such as this, which contestee is prepared to prove, offer a possible explanation for the secrecy as to the bill of particulars, as well as for the extreme reluctance and refusal of any of the officials to go under oath, which together would have rendered the "charges" legal evidence, but which would have placed the same burden upon the accuser-judge as was placed upon the contestee in regard to the oath and its implications. It is also obvious from such procedure that the intent is not to place the burden of proof upon the party making the charges, but rather such procedure clearly attempts in effect to compel the defendant to prove that the charges brought against it are in fact false, thereby placing the burden of proof in effect where it does not belong, besides the obvious discrimination and unconstitutional discriminatory enforcement present.

It is therefore respectfully submitted that demurrer 2a has both legal and Constitutional merit for that the illegal protest does not meet the legal and technical requirements for due process, which contestee had and has a right to demand and which contestee did and does demand; that the absence of the required bill of particulars and the subsequent refusal to furnish the same to contestee, though demanded, were flagrant violations of the Constitutional right of the contestee to be advised of the detailed specifications and/or particulars, that Manager Rice defaulted in his rulings under the established 30-day period for procedure and that all of the demurrers should therefore have been taken as confessed, and that his subsequent overruling of this demurrer and the affirmation of said overruling should be reversed in favor of the contestee and that the demurrer should be sustained.

b. (See text of demurrer 2b, reproduced on page 2 of the Bureau of Land Management decision dated April 27, 1951.)

It is obvious from the face of the illegal protest itself that the "charges," though not made legally and properly, were preferred against the nonexistent Al Sarena Mining Company, and from the face of the contest citation that the party cited is not the same party against whom the "charges" of noncompliance with the mining laws were preferred. Furthermore, neither the illegal protest nor the contest citation was a proceeding in rem, for that a proceeding in rem must be so styled. It is obvious from the foregoing that Al Sarena Mines, Inc., was illegally cited without a protest against it. In order to conform to the requirements, it is well settled that no public officer has a right to cite a citizen or to hear his case in the absence of previously preferred legal charges against the citizen cited or having his case heard. Since the face of the illegal protest itself is prima facie an admission that the "charges" were improperly and illegally preferred against a nonexistent company and not against a mineral entry, and since there is no protest of record against Al Sarena Mines, Inc. or against its mineral entry, the face of the illegal protest itself is prima facie an admission that the contest citation was in fact issued without authority

or right, as was the notice of hearing, which in addition falsely cited said illegal protest as being "a sufficient contest affidavit," said "sufficient contest affidavit" being also cited as authority for ordering the aforesaid hearing. Thus, the illegal protest or "sufficient contest affidavit," drawn neither against Al Sarena Mines, Inc., nor against the entry itself, which clearly, distinctly, and illegally preferred charges of noncompliance with the mining law against a nonexistent company, was willfully, knowingly, and illegally used as a basis for ordering a "hearing" of this cause. Furthermore, said illegal protest contained a prayer for confiscatory action, which confiscatory action technically would have involved not only the land, but also all improvements thereon, including buildings and equipment, which buildings and equipment alone have an estimated replacement value far greater than the entire purchase price of all of the land in question. This is a demurrer which objected to having the capital investment of contestee in the form of land, buildings, equipment, and other improvements made subject to summary confiscation on the basis of an illegal document which did not meet the legal and technical requirements of due process. *The Honorable Pierce M. Rice overruled this demurrer on the ground that such an illegal and confiscatory protest did not adversely affect the interests of the contestee.* Later, at the close of the hearing and only after Mr. Rice had made the fantastically absurd ruling just cited, and after contestee's property rights had been placed in full and complete confiscatory jeopardy, Mr. Jesse R. Farr, counsel for the Forest Service, apparently aware that such a ruling could never survive an impartial appellate adjudication in the face of his confiscatory prayer, requested that he be allowed to withdraw said confiscatory prayer, attempting to deny the original intent of the Forest Service. Contestee assented to said withdrawal in order to protect its interests from further full confiscatory jeopardy, but rightly avers that the intent of the Forest Service was very clearly defined by said confiscatory prayer, which confiscatory prayer was an exact execution of the confiscatory threats made against an officer of Al Sarena Mines, Inc., if he dared prosecute the subject patent application and entry toward completion or to defend the interests of said corporation in this cause. The aforesaid confiscatory threats were made in the presence and hearing of a competent witness by Mr. Elton M. Hattan, of the Bureau of Land Management, and Mr. William C. Sanborn, of the United States Forest Service.

A further erroneous point stated by the Forest Service and/or the Bureau of Land Management was an allegation to the effect that the fact that the illegal protest was illegally and improperly drawn, preferring "charges" against a nonexistent company, etc., was immaterial with respect to who was cited thereby or thereupon, so long as the party to whom the contest citation was addressed received said contest citation and responded thereto. This is obviously a fallacy, as hereinbefore stated, for that no contest citation can be legally issued without a legal protest of record against the party cited. The illegal protest being the legal equivalent of no protest at all, the reasoning employed by Mr. Farr, Mr. Rice, and the entire Bureau of Land Management would infer that the Land Office is at liberty to issue contest citations indiscriminately to all patent applicants in national forests on its own initiative without any protests whatsoever. It is further illegal and without justification to impose the aforesaid erroneous principle, as was done, for that it attempts to impose the consequences of an admission and answer upon Al Sarena Mines, Inc., when in fact Al Sarena Mines, Inc., responded only to prevent its suffering a confiscatory default judgment, making this point the subject of a demurrer, clearly set out in its answer. Again contestee avers that regulations or usage mean nothing unless they are consistent with the Constitution and laws of the United States. The multitude of illegal and unconstitutional features which have been pointed out by contestee is certainly sufficient to prove that the illegal protest and a contest citation without basis and therefore illegal itself do not meet the legal and technical requirements of due process; also that the contestee had a right to refuse, did refuse and does hereby refuse to be bound thereby, pleading its Constitutional Rights against an illegal instrument designed to confiscate without due process and against a citation illegally issued to enforce said confiscatory and illegal instrument against a party other than the party against whom the illegal and confiscatory protest was drawn. There are therefore two Constitutional violations here: (1) The illegal protest made by the Forest Service was an attempt to confiscate without due process, (1a) The issuance of an unsupported contest citation constituted the citation of an innocent citizen without cause, in violation of the citizen's Constitutional Rights, (1b) The issuance of a contest citation against a citizen other than the one against whom the illegal and confiscatory protest

was drawn, willfully and knowingly, for the purpose of enforcing said illegal and confiscatory protest renders the Bureau of Land Management a party to and an accomplice in the aforesaid Constitutional violations, and (2) The Bureau of Land Management, acting as an allegedly impartial judge between the Forest Service and the aforesaid Corporation, knowingly and unconstitutionally discriminated by the aforesaid acts for the benefit of the former and to the detriment of the latter, also violating the specifically applicable statute(s).

It is therefore respectfully submitted that regardless of usage and regardless of regulations which require violations of the Constitution and laws of the United States, a citizen need not be bound by said usage and/or regulations involuntarily. In this connection, the following court decision is respectfully submitted: "Usage cannot extend the power of the head of a department. An illegal practice prevailing among officers of the Government, no matter how long continued or extensive, can never ripen into a binding usage." *Pierce vs. U. S.* (1 Ct. Cl. 270).

In regard to the state of facts set out in support of demurrer No. 2, including both parts (a) and (b), the following irregularities, illegalities, and unconstitutionality are present in the proceeding to warrant the filing and sustaining said demurrer:

1. An attempt to cite Al Sarena Mines, Inc., irregularly, illegally, and unconstitutionally without a legal protest of record, without right or authority, and consequently without cause.

2. The illegal protest was an irregular, illegal, and unconstitutional attempt to confiscate without due process.

3. The issuance of a contest citation by the Manager of the Land Office after having read the illegal, irregular, and unconstitutional protest, though the aforesaid protest was illegal and ineffective, was an attempt by the Manager of the Land Office to enforce a Constitutional violation, also rendering him a party to said violation.

4. The continued attempt to enforce said Constitutional violations and to make illegal attempted justifications therefor and the failure or refusal to take legal means for their correction between the filing of the demurrers pointing out said violations and the hearing, and the failure or refusal to correct said violations at all render all officials involved apparently guilty of knowingly and willfully attempting to enforce a Constitutional violation.

5. The attempt to bring citizens of the United States to trial of a matter involving their rights, or of any matter, without a specification or bill of particulars is a Constitutional violation.

6. The willful and deliberate bringing of citizens of the United States to trial without specification or bill of particulars, having refused the same to the defendants or their counsel, though demanded, is a willful, deliberate and flagrant violation of the Constitution and of the Constitutional Rights of the defendants.

7. The ordering of a hearing involving property rights of U. S. Citizens, placing the same in jeopardy without a legal protest of record, and the attempt to prosecute an action designed to confiscate without due process is a willful and deliberate Constitutional violation.

8. The ordering of a hearing as set forth in 7, just recited, citing as authority a "sufficient contest affidavit" when in fact the original, which is in the possession of the contestee, is neither sufficient nor in any wise an affidavit, constitutes the use of false and/or misleading statements for the purpose of committing a willful Constitutional violation.

9. The instruments and/or documents of the Forest Service and/or the Bureau of Land Management do not meet the legal and technical requirements for due process.

Ample opportunity was afforded for amendment or correction of the foregoing abuses is compliance with demurrers filed by contestee. The officials of the Forest Service and the Bureau of Land Management, rather than employ legal means for correcting the aforesaid illegalities, irregularities, and unconstitutionality demurred to, arbitrarily, willfully, and knowingly committed the remainder of the violations just enumerated. Said officials committed the latter of the aforementioned acts after having failed or refused to correct such irregularities, illegalities, and unconstitutionality, all of which violated the Constitutional rights of the contestee and at the same time adversely affected its interests. The fact that the officials involved may have been acting under the regulations of their departments in committing the aforesaid acts and/or deeds is no defense.

for said officials, for that they have taken an oath to uphold the Constitution of the United States as a prerequisite to their appointment, regardless of regulations to the contrary. The failure of said officials to show regard and respect for the Constitution can hardly be deemed ignorance and appears therefore but a deliberate disregard of its requirements. Said officials cannot continue to abuse the citizens, who are their employers, and must therefore bear the consequences of their own acts. The following opinion of the Court is particularly applicable in this connection:

"We have no officer in this Government from the President down to the most subordinate agent, who does not hold office under the law, with prescribed duties and limited authority. And while some of these, as the President, the Legislature and the Judiciary exercise powers in some sense left to the more general definitions necessarily incident to the fundamental law found in the Constitution, the larger part are the creation of statutory law, with duties and powers prescribed and limited by that law (*Pierce vs. U. S.*, 1 Ct. Cl. 270).

It is therefore respectfully submitted that the Constitutional Rights of the contestee and/or the applicable statutes have been violated by reason of the irregularities, illegalities and unconstitutionality heretofore referred to, thereby adversely affecting the interests of the contestee, and that the overruling of Demurrer No. 2 by Manager Rice and the affirmation of said overruling by the Bureau of Land Management should be reversed in favor of contestee and the demurrer sustained.

3. Demurrer No. 3 was to the illegality, unconstitutionality and irregularity of the practice of attempting to cite Al Sarena Mines, Inc., as contestee, demanding an answer under oath when neither the contest citation nor the illegal protest, upon which it was based, was executed under oath.

The points at issue here are (1) The illegal protest and/or the contest citation did not meet the technical and legal requirements for due process, (2) In the absence of charges and bill of particulars under oath there is not only an insufficiency of evidence but also an absence of evidence which would warrant the citation of a citizen of the United States on this or any other charge, and (3) The demanding of the oath from contestee, under pain of perjury punishment, when the citation of a contestee is predicated upon a notice and a protest, though illegal and without force or effect, neither of which is under oath, constitutes discrimination and/or discriminatory enforcement of the law in that said practice denies contestee equal protection of the law as administered. See *Yick Wo vs. Hopkins* (118 U. S. 356).

(1) It is well settled in basic law that the property rights conferred by the full equitable title in the property are sacred under the Constitution, under which the owner of full equitable title has the right to demand, and contestee did and does demand, that each and every legal and technical requirement of due process by strictly adhered to in accordance with the Constitution and laws of the United States and all rules and customs of the courts, including their rules of evidence practice and procedure, and in accordance with their accepted form, manner and notice of legal processes, before allowing said property rights to be tampered with by any judicial or administrative body claiming jurisdiction over said rights in accordance with due process. No official holding office under the laws and Constitution of the United States has any right or authority to refuse the equal protection of the law as administered, to deny said protection, or to withdraw said protection from a citizen, regardless of conflicting regulations, which are themselves unconstitutional and require any official obeying those regulations to breach his Oath of Office. Any denial, refusal or withdrawal of protection of the law to one property owner or class of property owners equal to the protection of the law afforded other property owners with corresponding equitable title purchased under the Federal and State Court jurisdiction rather than under the alleged jurisdiction of the executive branch of the Government is an obvious violation of the Fourteenth Amendment to the Constitution. See *Yick Wo vs. Hopkins* (118 U. S. 356).

(2) The contention herein set out is that due to insufficiency of evidence and/or bill of particulars there is an absence of charges, and since an utter absence of charges exists, there is nothing upon which to predicate any citation or cause of action.

(3) This point, in its very recitation, has been adequately established and supported. It is basic that under the Constitution, a defendant required to answer under oath has the right to demand that those citing him or having him cited also be under oath.

4. The fourth demurrer, which is not numbered, is reproduced in the Bureau of Land Management decision, beginning with the second paragraph originating on p. 3 of said decision, beginning with the phrase "Contestee further demurs \* \* \*", and ending near the top of page 4 of said decision with the phrase " \* \* \* within the time required by law."

This demurrer is to the highly irregular and illegal manner in which the affairs surrounding the matter were handled by the Government officials from the filing of the patent application to the issuance of the final certificate of entry which handling is material to the alleged cause of action, reciting repeated evidence of bad faith, gross negligence of which the Portland Land Office was apparently guilty at that time, and calling special attention to the inconsistency of the allegations made by the officials involved. For the reason that the Department of the Interior is charged with the duty of the administration of such matters, any laches of which the Forest Service may be guilty is directly chargeable to the Land Office and/or the Bureau of Land Management for tolerating such laches. The Supreme Court has ruled, as set out in section (g) page 21 hereof that submission of final proofs and/or payment of the purchase price entitles a mining claimant to a patent "at any time", that if an adverse claim is filed within 60 days from the filing of a patent application, the law assumes that the mining claimant is entitled to a patent, and that any delay in the administration of affairs in the land department does not diminish the rights flowing from the claimant's purchase, nor cast additional burdens upon him or expose him to the attacks of third parties, but rather that the applicant must be treated in every respect as though the patent had been issued and delivered. In making such a decision, it is quite clear that the Supreme Court was establishing a precedent designed to protect citizens from jeopardy of their property rights brought about by delays of whatsoever nature in the land department, whether said delays were caused by negligence, by acceptance of bribes against the applicant from outside the land office from any source whatsoever from corrupt motives, adverse claims or otherwise, and the aforesaid last decision leaves no doubt when it states that an applicant, though he has not yet received his patent, must be treated as though his patent had been issued. In this case, the Forest Service is admittedly seeking the striking down of an already established title to the land in the applicant, which the law and the Supreme Court have held is a sufficient title to enable the applicant to demand a patent "at any time", which applicant demanded on February 14, 1949, and which patent has been consistently demanded since that time, but to no avail. This arbitrary, illegal, and unconstitutional behavior on the part of the Bureau of Land Management and/or the Forest Service is utterly indefensible for that the applicant filed its final proofs, as aforesaid, on January 13, 1949, and made payment in full February 14, 1949, in response to a letter demanding payment of such letter being dated February 8, 1949. It is common knowledge that the Forest Service was notified immediately upon the filing of the patent application on or about September 27, 1948, as such notification was mandatory in the case of the claims established before the establishment of the National Forest or the inclusion therein of the subject claims (43 CFR 205.1). Since all of the claims were included in a single application, it is conclusive that said Forest Service had due notice concerning all of the claims, which would make the proceeding outlined under 43 CFR 205.2 superfluous, the Forest Service having already had its 60 days' notice in which to file a protest or an official request for a longer time limit, but not to exceed 6 months, which 6 months would have expired on or about March 27, and constituted an absolute default and loss of any right to protest, if any there was, on the part of said Forest Service in regard to any of the claims established before their inclusion in a national forest, and in truth and in fact should have constituted a like default on the other claims. Even so, the Forest Service having once defaulted was apparently given a second chance, to the detriment of the applicant, when the final proofs were filed January 13, 1949, giving the Forest Service another 60-day period in which to protest or request an extension to six months, upon which second chance said Forest Service also defaulted in that said agency failed to do either of these acts which were specifically required of it before March 13, 1949. It was alleged that the Portland Land Office accepted a request to withhold action on the application March 18, 1949, five days after the second default, which definitely had no right to accept under such dilatory circumstances, which circumstances were also prejudicial to the rights of the applicant, which applicant the Supreme Court ruled was already entitled to a patent and whose rights could

not at that time be diminished by such delays. However, even though the Portland Land Office allegedly accepted said notice or request from the Forest Service on March 18, 1949, said agency was limited to six months after the date of making and filing final proofs, which deadline for the field examination report and protest was thereby fixed at July 13, 1949. To reduce the entire matter to the absurdity which it really in truth and in fact is, if it were assumed that a six-month deadline had been set for examination and protest as of the issuance of the final certificate, said six-month deadline would have expired October 6, 1949. It is obvious that the Forest Service defaulted on its third possible deadline, which was July 13, 1949, and in fact it defaulted on its examination report (43 CFR 205.3) even on the hypothetical case of a fourth deadline under that section for that Mr. Hattan advised Al Sarena Mines, Inc., in a letter January 4, 1950, that he admittedly did not file his report until December 1949. The obvious fact which may be ascertained from perusing 43 CFR 205.1; 205.2; 205.3 is that in each case any protest filed must be based upon a valid report. The intent is quite clear that the protest must be filed within 60 days or, by special permission granted within the aforesaid period, six months. A deadline having been imposed upon the filing of reports upon which to base protests constitutes the forfeiture of the basis for a protest if a default be made in the filing of said report, which, according to the regulations, would make such a belated report void and of no consequence. The issuance of a protest, then, based upon a report which was illegally accepted contrary to regulations, constitutes an ultra-vires and illegal act within itself.

The default admitted in Mr. Hattan's letter by implication is not only an admission that the so-called "protest" was in itself an illegal and ultra-vires act, but there is also present an admission of unconstitutional discrimination and/or discriminatory enforcement due to the manner in which the Land Office enforced its deadline upon the Forest Service and/or Mr. Hattan, who according to the Joint Regulations of the Department of the Interior and the Department of Agriculture, was in this case responsible to the Department of Agriculture, which latter department was also guilty of an illegal and ultra-vires act in accepting the aforesaid report from Mr. Hattan after his default and in filing its illegal protest based upon such a default. Therefore, both the Department of Agriculture and the Department of the Interior were guilty of laches. As aforesaid, the Department of the Interior being charged with the duty of administering the law and having tolerated such laches to the detriment of a patent applicant, must assume the responsibility for the laches of both departments. As aforesaid, the discriminatory, and therefore unconstitutional, enforcement of deadlines is evidence on the part of the Bureau of Land Management by a comparison of the foregoing gross negligence and laches described in this showing in support of Demurrer No. 4 (not numbered but the fourth demurrer) and the following statement of decline enforcement policy as applied not to the Forest Service but to the patent applicant: said quotation being extracted from official Bureau of Land Management Publication No. 11,343: "Applications must be completed within a reasonable time and failure to do so will result in their rejection." There is the admission—its own indictment of itself—that the Bureau of Land Management enforces deadlines rigidly upon the citizen who buys and pays for his land, but allows a third party, the Forest Service to intervene in a completed transaction, setting aside all deadlines provided for the protection of citizens of the United States, and aids and abets attacks made against those same citizens who have bought their land from the Bureau of Land Management in all good faith, but who cannot, in spite of all law and justice on their side, induce said Bureau of Land Management to issue the proper conveyance which the law has guaranteed to the citizen. Contestee reiterates herewith what has been heretofore stated, that a private citizen who behaves in such manner as has been demonstrated by said Bureau must answer charges for obtaining money under false pretenses. All of the above has been sanctioned by said bureau after three defaults.

However the other circumstances may be, the fact remains that no legal protest of record has been filed against either Al Sarena Mines, Inc., or against Mineral Entry Oregon 0665, and the contest citation issued thereupon is therefore void and of no force or effect. Although the illegal addenda inserted upon the final certificate was placed there by an illegal and ultra vires act and although said illegal addenda is an unconstitutional attempt to take and/or withhold property rights without due process, thereby rendering such illegal addenda worthless and of no force and/or effect, it is further technically illegal and void for that it is not over the signature of the official inserting it.

The conclusive showing of bad faith by the Portland Land Office and/or the Forest Service officials herein set forth and shown to have been committed by said officials by the showing in support of the fourth demurrer and by that on demurrer No. 1 in its entirety, the explanations of which elsewhere in this brief are made a part of this demurrer and/or the showing in support thereof the same as if set out herein. The showing of discriminatory enforcement made in the brief and argument of demurrer No. 4 is also applicable to the showing in support of demurrer No. 1, and is hereby made a part thereof the same as if set out therein.

It is therefore submitted that demurrer No. 4 has great legal, equitable and Constitutional merit, and that its overruling by Manager Rice and the affirmation of said overruling by the Bureau of Land Management should be reversed in favor of the contestee and the demurrer sustained.

The following motion was denied by Manager Rice and said denial affirmed by the Bureau of Land Management:

"Wherefore, the above premises considered, the contestee moves the court, commission, or other representative of Government acting as a court or sitting in judgment of this cause, that the contest be dismissed and the patent certificate issue forthwith as in all truth and verity it should."

It is respectfully submitted that the obvious merit of all four of the foregoing demurrers, as shown heretofore and herein, have great legal and constitutional merit and that the foregoing motion is appropriate to the premises, as aforesaid. It is therefore respectfully submitted that the affirmation of Manager Rice's denial of said motion and Manager Rice's denial thereof be found for naught and the motion allowed.

4. At the time of said agreement with Mr. White, Contestee challenged the legality and right of the Bureau of Land Management to hold such a hearing using the Code of Federal Regulations, or to hear the case at all. Contestee offered Mr. White's two alternatives; to settle the aforesaid matter: (1) Contestee would go immediately into the Federal Court and have the legality of such a hearing judicially determined, or (2) Contestee would assent to having the matter handled by the Department of the Interior on the condition that the matter, including any hearing, would be conducted only under the rules of evidence and the rules of practice and procedure as obtained in Federal and State courts. Mr. White agreed to the latter alternative.

It is therefore respectfully submitted that this matter should be adjudicated in accordance with the aforesaid rules of evidence and rules of practice as obtain in Federal and State Courts and as agreed with Solicitor White on August 9, 1950.

5. The Manager's attitude was openly hostile, as is evidenced by a tape recording made by contestee, which recording is an impartial mechanical reproduction of the exact facts, evidencing the exact truth, all voices being recognizable, together with the exact language used. This mechanical record has been offered to the Department for its hearing, but contestee has yet to find anyone in authority in the Bureau of Land Management who is interested in the truth. At the hearing, Manager Rice openly signified to the stenographer to omit recording pertinent facts for the record and he admitted in the presence of competent witnesses that he had no record "worthy of the name," and that without contestee's tape recording, his "record" was so fragmentary as to be valueless. As was stated in the foregoing answer and brief (No. 4, which relates the circumstances under which the procedural agreement of August 9, 1950, with Mr. White was made) contestee reiterates that the determination of the legality or validity of the proceeding was of prime importance before going into the alleged "merits" of the case. Manager Rice refused to admit his own default on the demurrers and motions which had theretofore been filed for some four months, the established period for procedure before default being 30 days. He further evaded and attempted to refuse to consider the legality of the proceeding, but counsel for contestee declined to proceed further until the Manager assented to consider this question, which was set out in the demurrers and motions to dismiss which had been filed in contestee's original answer. Counsel for contestee then proceeded to read the first demurrer into the record. The Manager then, instead of allowing the customary argument of said demurrer, allowed opposing counsel to attack said demurrer and immediately ruled without allowing argument, attempting to make one blanket ruling at that time to cover all of the demurrers and both motions. Contestee's counsel then demanded that Manager Rice not proceed on the merits of the case as Manager Rice had ordered, but that separate rulings be given

with grounds therefor, on each demurrer and motion. Manager Rice repeated the procedure over and over as was described in the case of his ruling on the first demurrer, each time ruling adversely—regardless, without sufficient argument of the demurrers and completely at a loss for grounds for the rulings which he had already made, stammering and pausing for an estimated full 30 seconds, and finally giving such absurd grounds, as he did in one instance, that the interests of the contestee were not adversely affected by such a confiscatory proceeding, and by giving as his grounds for overruling a demurrer containing a Constitutional objection the utterly irrelevant and immaterial reason that the patenting laws have not been decentralized by the Secretary of the Interior. From such a performance of obvious hostility and prejudice, there was no alternative for contestee but to appeal in open hearing from the rulings on the demurrers and motions under the terms of contestee's agreement, thereby legally closing the hearing, which hearing was plainly not legitimate, but which hearing appeared to be only a means of claiming later that contestee's property had been confiscated only after "due process," which some would infer means "notice" and a "hearing." Counsel for contestee, accordingly, then and there appealed after the ruling on the last demurrer and the denial of the latter motion, which Manager Rice acknowledged and accepted, announced the hearing legally closed pending appellate adjudication of the demurrers and motions, and notified the court that under the terms of the aforesaid agreement of August 9, 1950, with Mr. White, both the contestee and the contestant were barred from introducing further evidence or testimony at that time. Counsel for contestant acknowledged the appeal and admitted that under the rules agreed upon counsel for contestee was correct but asked Manager Rice to allow the taking of testimony regardless, to which violation of the agreed practice and procedure counsel for contestee rightfully declined to be a party, being forbidden under the agreed rules to proceed further. In making his admission, counsel for contestant explained that his request was merely a convenience measure and made a statement to the effect that he did not agree that the position taken by contestee to protect its property rights would warrant the expense to the Government of conducting another hearing in the event that the appellate authorities should decide that the proceeding was valid and should be heard on its "merits" at a later date. This statement was regardless of the fact that contestee would be put to considerably greater expense in such event. Counsel for contestant then read rule 53, regarding the costs of taking testimony. Counsel for contestee explained that the hearing had already been legally closed, that contestee had therefore incurred no costs, having taken no new testimony and having cross-examined no Forest Service witnesses, but agreed to pay the usual and customary charge for its carbon copy of the "record." No attempt was made by Manager Rice to collect charges or costs in advance by deposit as provided by Rule 60. At the close of the hearing, as contestee's witnesses and counsel were preparing to depart, counsel for contestant, realizing that the grounds given by Manager Rice for his rulings would be fatal to contestant's cause in an impartial appellate adjudication of the appeal on demurrers and motions only, as the appeal was taken, requested that he be allowed to withdraw the confiscatory prayer in the illegal protest. Although counsel for contestant attempted to deny the intent of the aforesaid confiscatory prayer, the fact remains that contestee was in complete confiscatory jeopardy during the entire hearing and the fact also remains that said prayer was an exact confirmation of the verbal threats, in the presence of a competent witness, made during the so-called field examination by Mr. Elton M. Hattan and Mr. William O. Sanborn. As soon as it became apparent that the intent of the Forest Service and the Portland Land Office had failed and that the matter was out of the hands of the Portland Office and in the hands of the Washington officials, Mr. Sanborn and Mr. Rice became quite obviously frightened and the remainder of the Forest Service and Bureau of Land Management officials appeared highly uncomfortable. Mr. Sanborn, who together with Mr. Elton M. Hattan, had made the confiscatory threats previously, which threats were confirmed by the aforesaid confiscatory prayer, followed contestee's Secretary-Treasurer and witnesses from the building as they departed, obviously severely frightened, voluntarily apologizing and attempting to deny any knowledge of the aforesaid confiscatory prayer, confirming his threats. Written notice of appeal, together with a formal written legal demand for a copy of Mr. Rice's "record" were served upon Mr. Rice as soon as they could be typed and served upon him, being served at 11:45 A. M. on September 14, 1950, with carbon copies and the usual confirmation to Washington immediately. To date, after several legal demands for a copy of the "record" of the hearing, and after having offered to pay the usual charge therefor, commensurate with charges for similar

official records in the courts, contestee still does not have a copy of the "record," and Manager Rice has been completely backed by others in the Washington office of the Bureau of Land Management, who fixed an outrageous charge for the illegal "record" by which contestee has consistently refused to be bound, apparently in order that (a) contestee would not be willing to pay the exorbitant charge for a worthless and illegal "record," (b) contestee would have no way of knowing what was said in the illegal and inadmissible "testimony," and (c) contestee would not have both the tape recording and the "record" to compare for officials who might be interested in ascertaining that citizens of the United States had not had a fair trial. The subject of the "record" is treated in error Nos. 6 and 7 hereof, and sets forth further in the corresponding numbers in the answer, brief, and argument.

The "testimony," which is entirely illegal and inadmissible, was taken after the hearing had been legally closed and was taken without the right of cross-examination for the "convenience" of the Government, but has been subsequently used by the Bureau of Land Management as "Vox Dei," setting aside or attempting to set aside all of the bona fide evidence upon which the certificate of entry was based, all of which was refiled, restated and resubmitted in evidence for the record of this cause in the original answer of contestee. The applicable statute (30 U. S. C. 29) states: "If no adverse claim shall have been filed with the manager of the proper land office at the expiration of the 60 days of publication it shall be assumed that the applicant is entitled to a patent \* \* \* and thereafter no objection from third parties to the issuance of a patent shall be allowed, except it be shown that the applicant has failed to comply with the terms of this chapter." The Supreme Court has ruled many times as follows: "If no adverse claim is filed with the register within 60 days from the filing of the application, the law assumes that the applicant is entitled to a patent." (*Guillim v. Donnellan*, 115 U. S. 45, 49, 29). The Forest Service has been elsewhere herein shown to be a third party, whether represented by Government agents or by other agents, that it has attempted, without any showing, to intervene in a completed transaction between the Land Office and Al Sarena Mines, Inc., after all of its deadlines had passed, which in truth and in fact is the deadline for the filing of adverse claims, which its claim is, for that the Forest Service has no apparent reason for wanting this patent denied except to take by intimidation, by confiscation, or by any other means at its disposal, by fair means or foul, the land belonging to Al Sarena Mines, Inc., which is that corporation's means of existence, regardless of the investment and mineral potential of private industry, for the admitted purpose that the Forest Service desires the alleged mere \$77,000 worth of timber, as was evidenced by Mr. Leavengood's "testimony." There is no difference between this principle and that of a rival mining claimant who wants the same ground for the mineral; they are both attempting to take what the patent applicant has. Since the Forest Service is forbidden by the Act of February 1, 1905 (16 U. S. C. 472) to exercise authority in the administration or execution of the mining laws, reducing the status of its representatives to the status of private citizens in the eyes of the law, the Forest Service is in the position of a rival claimant with an alleged timber claim on the same ground as that covered by the mineral claims, but is without a cause of action for that, as previously and hereinafter stated, it has no equitable interest, the full equitable title having passed from the Government. An adverse claim filed by a claimant for agricultural purposes involves no rights different from the rights of another mineral claimant (*Type Consol. Min. Co. v. Langstedt*, 136 F. 124). In view of its indefensible position in the eyes of the law, it is obvious that this subterfuge of an illegal and unwarranted "contest," predicated upon allegations without foundation in fact, without evidence in any wise sufficient to refute the evidence established by the entryman or, in fact, with no evidence whatsoever, and whose allegations are immaterial to the facts and the law, appeared the only means whereby the Forest Service could destroy the owner's property rights, which it was determined to do, and which rights the owner was and is determined that the Forest Service shall not destroy.

As aforesaid, the Government had detailed Mr. G. Cleveland Taylor, E. M., a registered professional mining engineer of some 40 years' experience, qualified as a United States mineral surveyor, an impartial and highly competent licensed public official and expert, to the property for some three to four months for the purpose of making a survey and appraisal of the true facts affecting patentability of the property. The Supreme Court has ruled in the case of *Wabcock v. Hammer* (233 U. S. 85) that such work as was done by Mr. Taylor is the work of the Government; said Supreme Court has also ruled in the same case that

a United States mineral surveyor alone has the opportunity to observe the situation and character, the extent and nature of the work done, and the improvements made upon the land. The report of the aforesaid work of the Government is of record, is further evidenced in this cause by the refile of the findings of Mr. Taylor, and consequently of the Government, for the record of this cause by contestee in its original answer. That is evidence, under oath, and is part of the Government's record. The attempt by the Forest Service, by the means employed in this cause, to refute the aforesaid evidence, which is legal and prima facie evidence belonging to the Government, and which evidence is in the record of this cause; the denial or setting aside, the attempted refutation, or the failure or refusal to consider said evidence and/or its overpowering validity or sufficiency relative to the illegal, inadmissible and apparently untrue "testimony," places the government in the impossible position of impeaching its own witness, the Bureau of Land Management's own impartial expert, which every lawyer knows, under the rules of evidence, that it has no right to do. As aforesaid, and as is reiterated here, the evidence of the bona fides in favor of the contestee is unrefuted and the error of the Bureau of Land Management is therefore its failure to recognize unrefuted evidence when presented.

In regard to the illegal, inadmissible and apparently untrue "testimony," introduced after the hearing had been legally closed and without the right of cross-examination or of introducing further opposing evidence or testimony, covering the so-called field examination, allegedly made by Elton M. Hattan and William C. Sanborn, said "testimony" was based upon assay reports from samples admittedly left in the unsupervised custody of the Forest Service, which agency allegedly and admittedly had said samples assayed, and whose interests would be served by substitution. Furthermore, on or about August 11, 1949, at San Francisco, California, the aforesaid Mr. Sanborn admitted in the presence of a competent witness that said samples were out of the dominion and custody of both Mr. Hattan and Mr. Sanborn for some three weeks prior to their assay. From the foregoing, it is obvious that neither Mr. Hattan nor Mr. Sanborn can possibly warrant, as they apparently attempted to do, that the samples reported upon in the illegal and inadmissible "testimony" were in truth and in fact the same samples taken from the property. As a matter of fact, after the threats and coercion imposed by these two men upon an officer of Al Sarena Mines, Inc., said corporation obtained immediately thereafter a number of samples from the identical channel cuts left by said two men in their sampling and had them assayed in commercial laboratories recognized and patronized by the United States Government. The "testimony" reported mere traces of value, according to the decision of the Bureau of Land Management, but the samples obtained by contestee showed, for example, that the samples cut by Mr. Hattan and Mr. Sanborn assayed \$2.10 on the Alabama claim, \$0.90 on the Manganese claim, etc., which fact contestee is prepared to prove by competent evidence. Mr. Hattan admitted to contestee in the presence of witnesses that his sampling was inadequate. At that time Mr. Hattan specified procedures and requirements to be used by contestee to obtain samples to be obtained in accordance therewith, and reported to him over the signature of an official of a recognized commercial laboratory assaying the same, and advising said Al Sarena Mines, Inc., that the samples so obtained were to be made a part of the evidence in his official report, and consequently in this cause. A large number of samples were therefore obtained in good faith, assayed and reported to Mr. Hattan as he had directed. Samples from the poorest of the contested claims so reported to Mr. Hattan assayed \$0.92, and one of the claims, an 1897 claim named Delia McKinnon, produced a sample which Abbot A. Hanks, Inc., of San Francisco, reported was worth \$4.20 per ton, all values reported being in addition to any lead and/or zinc which the samples might contain. For the reason that the Forest Service was allowed the unsupervised custody of the samples used against contestee, contestee must insist and demand that equal credibility and weight be assigned to all samples reported by contestee for the report and record of this cause, which has obviously not been done, and which has also prejudiced the rights of one party to the proceeding, to the point of attempted confiscation, for the benefit of the other party to said proceeding by willfully and knowingly discriminating against contestee and by willfully and knowingly withholding pertinent facts of record from consideration in the adjudication of this cause. In the absence of the "record," which has been refused contestee repeatedly, apparently in violation of the terms of the applicable statute, contestee is not in a position to know whether Mr. Hattan withheld

this important data from his "testimony," or whether the obviously prejudiced and hostile officials who have thus far adjudicated the matter have ignored the aforementioned facts. If Mr. Hattan failed to report said samples cut by contestee for the report and record, or if he discounted the credibility of said samples without also discounting the samples of the Forest Service, he is also highly prejudiced for the benefit of the Forest Service and to the detriment of the contestee, and it would appear that he was using his qualification as an expert witness as a means to introduce highly prejudiced and hostile opinion under the guise of professional interpretation of existing facts. In any event, it is obvious that neither Mr. Hattan nor Mr. Sanborn, after having attempted by coercion to compel Al Sarena Mines, Inc. to withdraw an already valid mineral entry fully proven and paid for, under threats of utter confiscation, after having attempted to enforce those threats just mentioned, and after having either distorted or withheld impartial facts, material to contestee's rights, apparently by the abuse of their privileges as expert witnesses, their testimony, even if it had not been illegal and inadmissible under the agreed rules of practice and procedure, as agreed with Mr. White appears utterly without foundation in fact. It is therefore respectfully submitted that their "testimony," apparently prejudiced, should be stricken from the "record," and not considered in the adjudication of this cause.

In regard to the "testimony" of Mr. Leavengood, it is first of all illegal and inadmissible under the terms of the procedural agreement of August 9, 1950, as aforesaid. Mr. Leavengood is also an employee of the Forest Service, and cannot therefore be considered completely unprejudiced. In addition to the above, if Mr. Leavengood were on the property at all on the days alleged, he was there without the knowledge or consent of the owner of the property and was technically a trespasser. Furthermore, if he were there at all on the days of his alleged presence, as he was never in evidence or seen by any of the contestees' personnel, who were on and all over the property on the aforesaid days, he could hardly have been there for a sufficient time to make any intelligent estimate of the alleged value of standing timber without his presence being known.

It is therefore respectfully submitted that Mr. Leavengood's "testimony" deserves no credibility, that it should be stricken from the "records," and not considered in this cause.

6. Since he had no "record worthy of the name," and since was never allowed to have contestee's tape recording for reference, the inescapable inference is that his "record" was largely manufactured, and therefore worthless. The continued allegation, though obviously false, that contestee failed "to participate in the hearing," appears to be a vain and worthless effort to justify the transmission of an erroneous and incomplete "record," obviously manufactured, to the appellate authorities with no certification known to contestee as to its correctness. There is also a high degree of correlation between this fact just mentioned and a letter dated September 27, 1950, from Mr. Jesse R. Farr, Regional Attorney, U. S. D. A., to Manager Rice, appearing in the "record," presumably, containing allegations to the effect that contestee did not appear at the hearing, that contestee did not answer, and that contestee did not appear and offer evidence. Contestee has a tape recording which proves every one of these allegations false, and respectfully submits that the real purpose of such a fantastically absurd letter appears but an attempt to assist Manager Rice in protecting himself from the consequences of his own acts. It is further noted that Mr. Farr, after having acknowledged contestee's appeal and right to appeal under the terms of the procedural agreement of August 9, 1950, from rulings on demurrers and motions only, and after having made a statement to the effect that he wished to take testimony merely as a measure of convenience and economy to the Government, and after contestee departed from the hearing which had been legally closed, Mr. Farr then and there without apparent verification of the validity or invalidity of said agreement moved the Manager to take the "charges" against contestee as confessed. These facts are evidenced partially by the tape recording and partially by the letter of September 26, 1950, from Mr. Farr to Mr. Rice, which letter recites that it is a showing in support of the motion made by Mr. Farr as outlined in the foregoing sentence, further evidencing the apparent intent and purpose of Mr. Farr, as hereinabove stated.

7. Interior Department Rule of Practice No. 53 was read by Mr. Farr at the hearing "so that there will be no misunderstanding" as to costs, which reading of said Rule 53 was outlined in Mr. Zimmerman's decision as having been made of record. That rule provides that each party will pay the costs of examining its

own witnesses, of cross-examination of opposing witnesses, and of noting motions, objections and exceptions made on its behalf. Having incurred no such costs, contestee is in no wise obligated to pay any part of the cost of taking the illegal, inadmissible "testimony" against it, which alleged obligation Mr. Zimmerman used in his decision as a reason for failure or refusal to supply contestee with a copy of the "record" of its own proceedings, for which copy contestee had agreed at the hearing and thereafter to pay the usual and customary reasonable charge, which charge is quoted by 43 CFR 221.18 at \$0.05 per page for a carbon copy. Having made formal, written legal demand for a copy of said "record" before the same was typed, contestee was eligible to have such a carbon copy, as demanded and at the rate heretofore cited. Mr. Zimmerman should have heeded said rule, read for the "record" as aforesaid, and Mr. Zimmerman, as well as Mr. Rice, should also have heeded the applicable statute and his own regulations in his review and apparent confirmation of said illegal charge and basis for charge made by Mr. Rice. It would appear that his statement in this connection is designed to render immaterial the illegal and prejudicial acts surrounding the making, employment and withholding of the "record" against the interests of contestee and apparently further designed to make immaterial his obvious inferences in his decision, which inferences are in fact admissions of policy that the burden of proof in this cause is definitely cast upon the purchaser, which purchaser is the defendant, and whose final proofs were accepted and of record, both in the Land Office and in the record of this cause, all such material having been relied and resubmitted in evidence in the original answer of contestee, and whose purchase money had been demanded and accepted by the Government in confirmation of said final proofs one year and seven months earlier. The obvious inferences and admissions of said illegal and inapplicable policy are evidenced clearly by the language used by Mr. Zimmerman in his decision in lines 16-20 on page 9 and in lines 1-4 on page 8 thereof, which is direct violation of the law as interpreted by the United States Supreme Court in the case of *Benson Mining Co. v. Alta Mining Co.* (145 U. S. 428, 431), which ruling is set out as B. on page 7 hereof and accompanied four other Supreme Court rulings to the same general effect, all of which make Mr. Zimmerman's position in admitting that said additional burden of proof was and/or is on contestee utterly indefensible, as are his attempts to justify such position, such as his position in attempting to uphold said "record" and the manner in which it has been handled, as aforesaid. As has been heretofore stated, contestee incurred no costs in the taking of testimony, objections, exceptions or motions but did agree to pay the usual charge for its copy as aforesaid. It is mandatory upon all officials and employees concerned, under 43 CFR 221.18, to charge for original transcripts only on the basis of words actually counted. It is provided in 43 CFR 216.19 for a charge of \$0.10 per 100 words for original transcripts (43 U. S. C. 82, 83). At the illegal rate and upon the illegal basis of the charges demanded by Manager Rice and other officials of the Bureau of Land Management, which rate and basis Mr. Zimmerman's decision confirmed, there must be exactly 1,000 words on each and every page to justify such charge. That is obviously impossible and apparently lays the party or parties making such excess charge subject to summary dismissal and other punitive action as provided in Title 18 of the United States Code, as is clearly set forth in Title 43, Section 221.28 of the Code of Federal Regulations. It is also noted that Manager Rice gave as his authority for such charge an alleged pricelist published by the Associate Director of the Bureau of Land Management, allegedly pursuant to Public Law 644, 81st Congress, 2d Session, which law amends only the Act of August 24, 1912 (37 Stat. 497), (5 U. S. C. 488), which Act of 1912 corresponds to the fees and charges set out in Title 43, Section 2.4 of the Code of Federal Regulations. The last-mentioned section in turn clearly states that said section does not apply to fees and charges specifically stipulated by law. Said Public Law 644, therefore, has no apparent effect upon the fees and charges set by law for reducing testimony to writing and for transcripts and copies of such reductions, which are clearly stated in Sections 82 and 83, Title 43, of the United States Code, and in sections 216.18 and 216.19, Title 43, of the Code of Federal Regulations, all of which laws and regulations appear at this time to be in full force and/or effect.

It is therefore respectfully submitted that apparently the contestee was charged, but refused to pay, an illegal charge or fee for a copy of the "record," that contestee was misled by the statements of the officials of the Bureau of Land Management regarding the legal charges or fees for such copy of the "record," that contestee was illegally denied thereby a copy of said "record" in

an apparent attempt to prejudice the interests and rights of the contestee, and that apparently Mr. Rice and other officials of the Bureau of Land Management have violated Title 43 and are subject to the punishment provided by Title 43 of the United States Code.

8. To save repetition, this is fully answered on pages 51-64, 65-66 of this brief.

9. Mr. White, having made the agreement, as aforesaid, with contestee September 9, 1950, in the presence of two competent witnesses, recited and confirmed it to a third. This makes a total of four competent witnesses ready, able, and willing to testify in a court of record that the Hon. Mastin G. White agreed with contestee, and assented to said agreement by his silence from August 9, 1950. November 16, 1950, that the rules of evidence and the rules of practice and procedure in this cause would be the rules of evidence and the rules of practice and procedure as obtain in Federal and State Courts, and only those rules. Knowing Mr. White as we do and considering him an honorable and truthful man, as well as an astute attorney, we cannot conceive of Mr. White's voluntary recantation for the record, of the aforesaid agreement. He, therefore, must have been subjected to extreme pressure, coercion, and duress beyond his ability to bear, and his aforesaid recantation is therefore worthless.

10. This was obviously done in order to take the equivalent of a default judgment against the contestee. The illegal procedure denied forever the right of the contestee to examine into the "testimony" comprising the so-called "record" or any cross-examination of those purportedly making it. It is, therefore, respectfully submitted that the contestee, while having been placed in jeopardy, has not had accorded its those rights and privileges to which it is entitled under the law, but rather had a judgment rendered against it predicated upon procedure denying its rights and worthy only of the "People's Courts" of Europe.

11. This perversion of justice by the Bureau of Land Management violated the procedural agreement of August 9, 1950, had with Hon. Mastin G. White, and was done evidently upon the basis that the end justifies the means. An upright law enforcing official could in good conscience deny the demurrers and motions as made. This despicable trick—substituting its own rules for the old procedure agreed upon, making such substitution in the middle of the proceeding—was resorted to and evidences the lengths to which some officials will go to gain their own ends.

12. Since the Bureau of Land Management upheld the Manager, as is recited in the assignment of error, it evidences that, beyond question, the Bureau of Land Management is the one responsible for the illegal, prejudicial, and otherwise discriminatory procedure to abuse its authority and to take unfair advantage of a contestee brought before it.

13. It confirmed, upheld, and advised contestee of the illegal and oppressive charge for the "record" made by Manager Rice. It appears that the officials of the Bureau of Land Management who upheld Manager Rice in his excessive charge for the "record" are either heedless or unaware that 43 CFR 221.2, heretofore named herein, is all inclusive in its terms and that they themselves are subject to summary dismissal and to other punishment under their own "blessed" Code of Federal Regulations.

14. Contestee has evidenced many times in its former correspondence, communications, and briefs heretofore submitted, and reiterates them all the same as if set out herein, that as to the Joint Regulations of the Departments of the Interior and Agriculture, contestee refuses to be bound by said joint regulations of its accuser and its judge, made for their joint benefit and definitely to the detriment of any contestee brought before them. For the reason that they obviously attempt to nullify the intent of the law and to defeat its purpose violating it flagrantly, and for the reason that they have been enforced and constitute an agreement between two or more persons for the purpose of denying citizens their rights and confiscating their property, the aforesaid set of regulations is hereby designated and proven by definition to be an enforced conspiracy.

15. Contestee herewith specifically answers and denies each and every finding, judgment, ruling, holding or other evidence of adverse action taken against it by the Manager, the Bureau of Land Management, or anyone else in the Department of the Interior and/or Agriculture and herewith replies specifically the same as if set out herein, every answer, protest, argument, demurrer, motion, or other communication heretofore filed by it and specifically states at this point in agreeing at the close of the hearing after contestee had already appealed from the rulings on its demurrers and motions to Washington that the Forest Service be allowed to withdraw its confiscatory prayer. To this, contestee

assented in order to prevent further confiscatory jeopardy in the degree which had formerly existed, but maintains that the interest and purpose of the Forest Service was not altered thereby.

16. See the showing in regard to credibility of witnesses Hattan, Sanborn, and Leavengood, pages 58 through 63, which treats both credibility and admissibility. Also see pp. 32-33; 53-56; 12-13.

17. The Supreme Court has ruled in the case of *Smith v. U. S.* (170 U. S. 372, 380) that a decision of a Department in a particular case is in no sense a valid regulation and is therefore not binding. In addition to the foregoing Supreme Court ruling, the decisions cited are not predicated upon the facts and circumstances in and/or applicable to this cause and said decisions therefore cannot apply or obtain therein. The attempt to bind contestee to precedents in alleged unreported cases is not worthy of comment, but demonstrates only that degree of contempt for law and justice which has previously been shown to exist in the Bureau of Land Management. The continued reiteration of the case *U. S. v. Dawson* (58 L. D. 670) is likewise but a reiteration of its discriminatory policies, for that even though the allegations of the Forest Service are utterly false, the fact remains that the Bureau of Land Management has granted a patent on an extremely large property, the plat of which it would not furnish Al Sarena Mines, Inc., to introduce in evidence, at Round Mountain, Nevada, with an overall ore showing on most of the claims of some 10¢ per ton. Al Sarena Mines, Inc., has proven a meritorious and extensive potential as a large low-grade ore producer with excellent commercial possibilities, but has been adversely ruled against twice, simply because there happens to be a small amount of timber on the property. It is further respectfully submitted that the appellate authorities should consider whether a relatively worthless property without timber is eligible under the mining law for patent when a meritorious property with timber is not eligible for such patent. If, as the Supreme Court has ruled in the case of *Smith v. U. S.* (170 U. S. 372, 380), a decision is not binding, then all regulations which have been used against contestee, obviously inconsistent with the law but consistent only with isolated decisions upon which said regulations are based, are therefore not binding and are not valid regulations. It is obvious that decisions are not consistent with each other; therefore it is obvious that there are as many contradictory regulations as there are consistent ones. It is time to change policy now and to obey and uphold the law and the Constitution, consequently repealing or ignoring all such conflicting regulations and decisions. As in the case of contestee's property versus the aforementioned property at Round Mountain, Nevada, the discrimination is clear and the discriminatory enforcement of the law is an accomplished fact by the Bureau of Land Management. The law is impartial on its face, but it is not enforced on *all* the mining companies alike; it is enforced in such manner as to permit unjust discrimination to persons in similar circumstances (the two mining companies), material to their rights (the right to own the means of their existence), and the equal protection of the law *as administered* has been flagrantly denied, thereby violating the 14th Amendment to the Constitution. The entire set of Joint Regulations also comes into the same category. See *Yick Wo v. Hopkins* (118 U. S. 356).

18. In addition to the obvious unconstitutional discrimination and/or discriminatory enforcement present, those provisions of 43 CFR 205.5 and 205.6 referred to in the Assignment of Error are obviously not predicated upon the law as written, but upon opinions and decisions, which were but opinions of the law as it applied to particular cases or sets of circumstances. The Supreme Court has held in the case of *Smith v. U. S.* (170 U. S. 372, 380) to the effect that such opinions cannot be binding as valid regulations. The Supreme Court has also ruled that regulations must be consistent with law and that they may not be extended so as to alter, amend or defeat a law already passed by Congress (*Williamson v. U. S.* 207 U. S. 425). From the foregoing citations in point, it is obvious that the regulations are not consistent with law and that they alter, amend, and/or defeat the law as passed by Congress, besides being definitely against Public Policy. The aforesaid regulations are so obviously illegal and unconstitutional that they are not worthy of consideration and constitute no basis for any cause of action.

From the showings made and submitted in the foregoing 71 pages, it is obvious that the issuance of the patent prayed for is a mere ministerial duty of the Secretary of the Interior and/or the Director of the Bureau of Land Management, and demand is again herewith made for the issuance of said patent, as demanded in Mineral Application Oregon #0665.

The following motion was denied by Manager Rice and his denial thereof was affirmed by the Bureau of Land Management:

"Wherefore, the premises considered, the contestee moves the commission or other representative of Government acting as a court or sitting in judgment of this cause, that this contest be dismissed forthwith, the contestee so advised, and that the patent certificate issue immediately, as in all truth and verity it should."

It is respectfully submitted that the foregoing motion was appropriate to the premises of the original answer, that said motion is appropriate to the showings made and submitted in the foregoing 71 pages hereof, and that Manager Rice's denial of said motion and the affirmation of said denial by the Bureau of Land Management should be found for naught and that the aforesaid motion should be allowed.

Wherefore, the premises considered, contestee prays that the Secretary of the Interior (Attention: Hon. Mastin G. White, Solicitor), Appellate Authority, will reverse and nullify all adverse findings and decisions against contestee heretofore had or made by any officer, member, agent, employee, or servant of the Department of the Interior and/or the Department of Agriculture and find for contestee, upholding contestee's contentions and, in accordance with Public Policy and private necessity (Rule 69), take summary action to cause the issuance forthwith of the patent for these claims specifically denied by the decision herein appealed from, and to do all other acts and things necessary to accomplish the aforesaid ends.

Respectfully submitted.

AL SARENA MINES, INC.,  
H. P. McDONALD,  
*President.*  
W. O. MACMAHON,  
*Special Counsel.*

MOBILE, ALABAMA, May 25, 1951.

Wherefore, the premises considered, contestee moves the Secretary of the Interior (Attention: Hon. Mastin G. White, Solicitor), Appellate Authority, that if any reasonable doubt should perchance exist that contestee's prayer should be granted, that counsel for contestee be allowed oral argument of this cause, preferably without time limit, and that contestee be allowed to play into the record the true facts, as outlined herein and as are contained on the tape recording of the hearing had on September 13, 1950, at Portland, Oregon.

W. O. MACMAHON, *Special Counsel*

MOBILE, ALABAMA, May 25, 1951.

I hereby certify that I have this date sent and served a true and correct copy of the foregoing document by mail upon the opposing counsel.

W. O. MACMAHON, *Special Counsel*

[SEAL]

4-207  
(May 1954)

DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington 25, D. C., February 16, 1956.

I hereby certify that the annexed copy of application for patent filed in case No. 0665, Oregon, is a true and literal exemplification of the record on file in this office.

In testimony whereof, I have hereunto subscribed my name and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL]

OSCAR E. COLLINS,  
*Certifying Officer.*

## EXHIBIT B

## APPLICATION FOR PATENT

Application is hereby made for U. S. Mineral Patents covering the following claims, embraced in Mineral Survey No. 879:

Oro Alto (2)	Mark Applegate (10)	Rainboe (18)
Oro Rico (3)	H. McKenzie (11)	Della McKinnon (19)
Cougar (4)	J. L. Grubb (12)	Sulphide (20)
Oro Real (5)	J. D. McKinnon (13)	Staples (21)
J. W. Merritt (6)	Henry Applegate (14)	Manganese (22)
Peter Applegate (7)	A. W. Dahlberg (15)	La Jolla (23)
Oro Escondido (8)	Telluride (16)	Arroyo Verde (24)
W. C. Lasver (9)	Alabama (17)	

This application is supported by the following documents, which are attached hereto and made a part hereof:

- Exhibit A Copy of Field Notes and Plat of Survey
- Exhibit B Proof of Posting Plat and Notice on Claims
- Exhibit C Proof of Possessory Right
- Exhibit D Proof of Citizenship (Certified copy of Articles of Incorporation)
- Exhibit E Payment of Filing Fee (Check for \$10.00 marked "Exhibit E")
- Exhibit F Publisher's Agreement
- Exhibit G Notice for Publication
- Exhibit H Notice for Posting in District Land Office
- Exhibit I Assays from low grade intrusive showing dissemination of values

Possessory right is based upon purchase of the following claims from the Pearl Mining Company:

J. W. Merritt, Peter Applegate, W. C. Lasver, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, and Della McKinnon.

Said purchase of the above ten claims is by virtue of purchase contract dated May 11, 1935 as amended December 11, 1945, which contract is in full force and effect, Al Sarena Mines, Inc., has been in continuous possession since 1935.

The Oro Rico and Oro Alto claims were located by the corporation in 1939 and have been in continuous possession of the corporation since that time.

The other eleven claims were purchased by the corporation from their individual owners and have been in possession of the corporation continuously for a period of over nine years.

The basis of right to patent is compliance with the requirements outlined and the total expenditure in improvements of at least ten times that required by statute for patenting. We have further complied with all local laws, rules, regulations, and customs of the State and Mining district as apply to mining claims.

Due to the widespread mineralization prevalent in this deposit, the ore is not confined to any one vein, fault fissure, or zone, but is exposed in numerous places both above and underground.

The ore may be observed underground in tunnels on the following claims: Peter Applegate, Tunnel No. 1; Cougar, Tunnel No. 7; Mark Applegate, Tunnels Nos. 1, 2, 5, and 6; H. McKenzie, Tunnels Nos. 1, 2, 3, and 6; A. W. Dahlberg, Tunnel No. 2; Telluride, Tunnel No. 4; Oro Sics, Tunnel No. 9; Oro Real, Tunnel No. 8. In addition to those shafts and cuts on these and all other claims designated in Survey No. 879 as discoveries, the exact locations of which, with respect to the public surveys, are given in the Plat and Field Notes thereof, the intrusive may be observed in an infinite number of outcrops, ledges, cliffs, and surface workings. Since the property has been intensively prospected for over fifty years, the entire area is spotted with surface pits.

In addition to the improvements evaluated in Mineral Survey 879, we have also installed on the property a flotation, gravity concentration, and cyanidation mill of 100 tons daily capacity. A timber shop, blacksmith shop, and change and shower room has been erected at the portal of No. 2 Tunnel. A snow shed leads over the tracks from the portal of that tunnel to the coarse ore bin. A modern laboratory and assay office is located near the mill building. Complete camp facilities are also provided for a full complement. Two flumes from Elk Creek supply the camp and mill with adequate water. Also, a building for the drying and storage of concentrates and ore has been erected on the property. Two

Fairbanks-Morse Diesel engines supply power, electricity, and air for mine, mill, and camp.

The mineral character of the ground is one of a large hydrothermally altered rhyolite intrusion containing essentially uniformly disseminated values throughout, showing enriched areas along the numerous faults, fissures, veins, and slips. It is our intention to develop this entire low-grade orebody through a systematic program of geophysical and exploratory work with core drills and such additional tunnels, adits, shafts, winzes, and other openings as may be deemed appropriate and in accordance with further recommendations by eminent mining authorities. Thus far, ore and concentrates of higher value have been shipped from one series of enriched areas, originally discovered by Mark and Peter Applegate during the 1890's. Although the records do not state how much ore was extracted and shipped from each claim in the group, there have been smelter shipments in amount of some \$30,000.00 to \$40,000.00, chiefly from stopes in the blocked areas on the A. W. Dahlberg, Mark Applegate, Peter Applegate, and H. McKenzie claims.

Our objective is and has been primarily one of developing the large low-grade balloon-shaped mass of mineralized rhyolite within the intrusion, the chief values of which are carried primarily in the pyrite, apatite, and gelsina disseminated in the mass in varying quantities, but notably present in the hundreds of samples taken in various localities on the property. Accordingly, prior to 1935 we began a program of exploratory work toward the development of the low-grade orebody. As a result of this work, and of conferences with various mining engineers and geologists, including Milnor Roberts, Dean of the College of Mines, University of Washington, we reached the conclusion that claims held at the time and those adjoining group of claims held by the Pearl Mining Company.

Immediately thereafter we built a pilot mill and began carrying on exploratory operations aimed to give us some idea of the probable size and content of the ore body, and to learn the most profitable methods of extraction and treatment. By the summer of 1937 we had advanced to the point where we felt justified in calling in outside authorities to check our findings and to advise what further steps to take. Besides the laboratory tests made by Dean Roberts, we had similar tests made<sup>1</sup> by two other specialists. While each expressed different views concerning the treatment phase of the ore, all three agreed that it was easy to treat and lent itself to several methods of recovery.

An interesting metallurgical observation of the mineral content is made by Mr. Henderson,<sup>2</sup> whose report states:

"The sulphides on the west side of the fault have a higher gold content than the sulphides on the east side. The ratio of silver to gold on the east side of the fault was approximately 17 ounces of silver to 1 ounce of gold, while that on the west side was 4.5 ounces of silver to 1 ounce of gold. \* \* \* An excellent separation of the sulphides into a galena, lead sulphide concentrate of high gold content, and a pyrite, iron sulphide concentrate of low-gold content, was made. \* \* \* The jig, located between the ball mill and classifier, gave excellent results. On a test run it produced a concentrate containing 55 ounces of gold per ton. \* \* \* Cyanidation of the ore as a whole has given excellent results in the laboratory, but the slimy nature of the ore would require very expensive equipment. \* \* \*

In addition to this, we sought the advice of D. Ford McCormick,<sup>3</sup> who advised that we continue our program. His report states:

"The indications are excellent that a large tonnage of low grade ore may exist within the mass which could be milled at a profit. \* \* \* The deposit has important potential value, because of its size, nature of mineralization, and favorable economical aspects. \* \* \* There exist shattered and fissured zones, altered rock and every indication on the lowest tunnel (No. 2) to point toward continued mineralization with depth. If ascending thermal waters contributed to its mineralization, then the zone explored by the present workings may be only one

<sup>1</sup> The Pan-American Engineering Corporation, Berkeley, California, reported by D. A. Vendensky, and the H. A. Perez Company, Los Angeles, California, reported by one Ellerman.

<sup>2</sup> Harry B. Henderson, member, American Institute of Mining & Metallurgical Engineers, B. S., University of California; M. S., in Metallurgical Engineering, Montana School of Mines. Mr. Henderson was resident Metallurgical Engineer at Al Sarena for several years and is recognized as an eminent authority on flotation.

<sup>3</sup> D. Ford McCormick, member, American Institute of Mining & Metallurgical Engineers, graduate of the University of Texas with C. E. degree, of the Colorado School of Mines with M. M. degree, and having a long experience in important mining activities, bearing full-charge responsibility of the development of the Metahombre mine in Cuba.

of several zones radiating out from a large central mass more uniformly mineralized. \* \* \* It is noted that most of the major problems connected with mining operations are found to be favorable at Al Sarena \* \* \* there is an excellent location for a mill site close to the south end of the contact, with ample room for tailings disposal \* \* \* sufficient water flows from Elk Creek throughout the year for milling on a large scale \* \* \* water rights are protected \* \* \* high tension line passes within less than five miles of the property and is capable of supplying power for a large operation \* \* \* mining labor is available and satisfactory due to the fact that mining has been followed in Southwest Oregon for many years. \* \* \* Mining by gravity is possible for a depth of approximately 200 feet below the present tunnel (No. 2) for delivery of ore to the mill site claims, which would give over 700 feet of vertical distance to the crest and allow the volume of ore to be mined without the necessity of pumping. \* \* \* The rock is loose and breaks easily."

The importance of the above may be easily realized when it is considered that an estimated 190,000,000 tons of possible milling ore lie above the millsite claims referred to by Mr. McCormick, which ore could be handled by gravity. This, plus the ease of breaking and grinding the ore, plus our minimum tailings costs, will contribute most substantially toward the low costs necessary for the successful low-grade, large scale mining operations. From our knowledge of the Alaska-Juneau,<sup>4</sup> a notable low-grade producer, we believe our costs will be considerably less than theirs, which have averaged \$0.635 per ton. It is interesting to note the scarcity of assays on our property which run less than the Alaska-Juneau average of \$0.872.

In following the recommendations, additional geological research was instituted, together with extensive sampling. The work revealed interesting observations with respect to extent and character, as shown in the report of George P. Sopp,<sup>5</sup> who conducted this work. In describing the mine, Mr. Sopp's report states:

"There is considerable H. W.-S. H. faulting in the Rhyolite. These faults are part of a sheer zone at least 800 feet wide and are all mineralized to some extent. To date the main vein has been the only productive fault fissure but other parallel faults have shown possibilities.

"One strong north-south fault has been noted which is later than and offsets the main vein. This fault, shown on the surface map as the 'North Drift Vein', is mineralized. 'Macroscopically the rock is aphanitic porphyrite. The Phonocrysts are quartz and saradine. Pyrite is found uniformly disseminated throughout the rock.

#### "LIGHT COLORED FLOW ROCK

"A microscopic study has not been made of this rock. Macroscopically it is aphanitic porphyritic. The phonocrysts are feldspar and in a very few specimens, scattered grains of quartz were noted.

"This rock commonly shows flow banding and on the hill top approximately 800 feet southwest of #5 Tunnel, bands of pure quartz about ¼" wire are found alternating with bands of the flow rock.

#### "VEINS AND MINERALIZATION

"Practically the total production of the Al Sarena Mine has been from one vein. The vein has a strike of N45° West and is practically vertical.

"The rock in the main vein is highly brocciated and there are usually one or two gouge layers in the vein. The gouge layers are generally found near one or both walls of the vein. They are from ½ inch to 1 inch or more in width and contain abundant sulfides and quartz.

"The average width of the vein is about 2½ feet, however, there is considerable variation of width. This variation is partially due to the rock cut by the vein.

"In Tunnel No. 6 the vein cuts an exceedingly hard, fine-grained white rock, which may be either a minor intrusion in rhyolite, a type of flow rock, or a

<sup>4</sup>The Alaska-Juneau ore, which is understood to be relatively hard compared to ours, reportedly was trammed and hand sorted. In addition to this cost, they had a tailings-disposal problem which necessitated the operation of marine equipment to carry at least a portion of the tailings out to sea. In spite of those disadvantages, which we do not have, Alaska-Juneau's operating costs over a 44-year period averaged only \$0.635 per ton and the value of the ore trammed for the same period averaged only \$0.872 per ton.

<sup>5</sup>George P. Sopp, Bachelor's and Master's Degrees in Mining Engineering and Geology, Colorado School of Mines and The University of Arizona. Formerly with the Department of Interior, United States Geological Survey, and later resident Geologist at Al Sarena Mine.

silicified zone in the rhyolite. Where the vein cuts this white rock it becomes very narrow and there is little or no brecciation. The vein becomes an extremely narrow seam of gouge containing abundant sulphides. (This rock may be later than the original fissure.)

"As previously stated, the vein is composed of brecciated rhyolite and one or more narrow gouge seams. No vein material was observed under the microscope, however, the following minerals were observed in the gouge: galena, sphalerite (variety-black-jack) quartz, and pyrite. All these minerals may be found in natural crystal form.

"Although production has largely been from the vein already described, there is another very prominent vein, best exposed in the north drift, which has been considered as a potential producer.

"The north drift vein has a strike of approximately N. 8° W. and appears to be practically vertical. Because this vein intersects and apparently offsets the productive vein, it seems fairly conclusive that it is a fault fissure.

"The north drift vein is composed of 3 to 3½ feet of brecciated rhyolite and a very consistent narrow gouge streak. Its walls are not as definite as the walls of the productive vein, and the gouge does not contain such an abundance of sulphides.

"The main vein is part of a wide shear zone with a northwest southeast trend. Within this zone there are numerous fractures, some of which probably have a small displacement and could be termed faults.

"Fissures in the shear zone are generally mineralized, and samples taken on these veins assayed sufficiently high to warrant further investigation.

#### "LARGE BRECCIA ZONES

"There is a zone of extensive brecciation in No. 5 Tunnel, starting about 75 feet from the portal and extending for 100 feet or more in a southeasterly direction; the west crosscut of No. 6 Tunnel is driven into this zone and its wall rock is brecciated throughout its length of 50 feet.

"Below this zone there is extensive brecciation in the No. 2 South crosscut.

#### "ALTERATION

"In the near surface working such as No. 6 and No. 5 Tunnels, the effects of alteration are very apparent. The pyrite is largely altered to hematite and the pyrolite (?) \* itself is soft and porous. Pieces of brecciated rhyolite from the main vein and from the No. 6 Tunnel breccia zone have become so altered that they may be easily carved with a knife—feldspar is apparently kaolinized.

"Alteration has affected the rock on the lower levels along the fault zones, but the rhyolite wall rock (in the hand specimen) is relatively unaltered.

#### "VOLCANIC SERIES

"A vesicular gray flow rock was found at the base of the andesite on the ridge about 1500' southwest of Tunnel No. 5. The same rock was found underlying the andesite about a mile north of the mine. The rock is extremely fine grained and has been termed a felsite by the writer. Some specimens are extremely vesicular and contain muscovite and pyrite.

#### "WIDESPREAD MINERALIZATION

"The gold and silver on the main vein is known to be associated with galena, sphalerite, pyrite, and quartz. These minerals, however, are not confined to any one rock or fracture zone.

"Galena, sphalerite, pyrite, and vein quartz are found abundantly in the Rhyolite and the white flow rock. Galena and pyrite have been observed sparingly in the felsite."

In conclusion, Mr. Sopp states:

"This widespread mineralization suggests the theory that during the final stage of one period of extrusion solutions ascended from a deep seated magma reservoir to permeate and deposit minerals in every type rock present except the Andesite."

Mr. Sopp's report further reveals blocked high-grade milling ore in one area of the mine alone to supply the mill for several years and having a gross value

\* At the time Mr. Sopp's report was written, he had not made microscopic determination of the rhyolite.

in excess of a quarter million dollars. All of the ore referred to is above the No. 2 level. Due to the nature of mineralization and the shape of the ore body it is believed that the same blocks projected downward will yield several times that tonnage and value. All of the authorities who have studied the property point to the probability of the development of similar enriched areas. This is in addition to the primary objective—the institution of a large-scale, low-cost, low-grade mining-and-milling operation in connection with the mineralized mass. The work done by Messrs. Sopp and Morrison<sup>7</sup> in evaluating the possibilities of large-scale, low-grade commercial mining was conducted in such manner as to exclude any enriched material from veins, seams, or fracture zones. Sulfides were panned from samples taken from each of the claims, and it is significant to note that of the hundreds of samples taken by the management and by the authorities mentioned above, no sample has failed to assay at least a trace of gold or silver. From a series of random samples taken from each of the claims, descriptions and values of which are shown in exhibit I attached hereto and made a part hereof, the existence of essentially uniformly disseminated mineral and values is obvious.

An interesting report on this deposit was made by Mr. P. J. Shenon, of the U. S. Geological Survey, who visited the mine in 1930 and is reported in the U. S. Department of the Interior Bulletin "Metalliferous Mineral Deposits of the Cascade Range in Oregon." This bulletin shows in Plate 3 an illustration of Dendritic gold, removed from Tunnel No. 3, which specimen is now on display in the Smithsonian Institute.

AL SARENA MINES, INC.,  
By H. P. McDONALD, Jr.,  
Secretary-Treasurer.

STATE OF OREGON,

County of Jackson, ss:

I, H. P. McDonald, Jr., being first duly sworn on oath, depose and say that I am the Secretary-Treasurer of Al Sarena Mines, Inc., an Oregon corporation; that I have read the foregoing application for patent, know the contents thereof, and that the same is true as I verily believe, and that I make this verification for and on behalf of said Al Sarena Mines, Inc.

Subscribed and sworn to before me this 25th day of September 1948.

Notary Public for Oregon.

My Commission Expires —.

### EXHIBIT I

Claim	Description	Value
Telluride	At turn E. wall #1 Tunnel	\$1.92
H. McKenzie	S. X cut No. 6 Tunnel, X cut 2 on Band. Rhy.	1.85
Oro Real	W. wall No. 8 Tunnel N. 2'	1.21
M. Applegate	S. X cut #2 Tunnel, 12' S. of Sta. 502.	3.31
P. Applegate	Tunnel #1, 150' E. of Sta. 203.	3.19
A. W. Dahlberg	15' W. of Sta. 20, Tun. #2.	3.38
Manganese	Creek Bluff near most westerly corner	2.42
M. Applegate	Banded rhyolite capping 150' S. W. of N. W. end line and 75' S. E. of N. W. side line (#21).	1.44
Oro Escondido	Cut near S. W. corner	3.50
J. L. Grubb	Cut 380 Ft. S. W. of N. E. Center end	2.80
Arroyo Verde	Cut 680 Ft. S. W. of N. E. Center End	1.75
Oro Rico	Tunnel #9, N. Wall 10' from face	2.80
Oro Alto	Cut near S. E. corner	1.75
J. D. McKinnon	Creek bank Approximately 500' N. of bridge	3.50
J. W. Merritt	Cut from bank along Bitterlick Road	1.75
Rainbow	Pit 280 Ft. above Sta. F. on centerline	2.80
Alabama	Outcrop approximately 200 Ft. S. E. of N. W. corner	3.50
Cougar	Large cut on trail between #1 & #8 Tunnels	1.75
Della McKinnon	Cut on main road 375' S. of Dahlberg S. E. Center End	2.80
Sulphide	Pit on Mill Road 190' to 200' N. E. of Assay Office	4.90
Stables	East branch of Elk Creek, 40 Ft. from S. W. Corner	1.75
La Jolla	Cut 130 Ft. S. W. of N. E. Center End	1.75
W. C. Leover	Outcrop on Elk Creek Approximately 500 Ft. south of N. E. Center End.	2.80

<sup>7</sup> Col. J. E. Morrison, Mining Geologist, graduate Colorado School of Mines, former Field Geologist, Oregon Department of Geology and Mineral Industries, later Resident Engineer at Al Sarena Mine.

## IMPROVEMENTS

No. 1 The discovery schaft of the Oro Alto lode, the center of which being the discovery point, is on the lode line 1,131.10 ft. from the center of line 1-2; 6 x 11 ft., 6 ft. deep, partly caved. Value \$100.00.

No. 2 A cut, the mouth of which bears S. 69° W., 120 ft. from Cor. No. 3 Oro Alto lode; 4 ft. wide, 5 ft. face, running N. 65° W., 13 ft. to face. Value \$50.00.

No. 3 A cut, the mouth of which bears S. 56° W., 100 ft. from Cor. No. 3 Oro Alto lode; 8 ft. wide, 10 ft. face, running N. 64° W., 20 ft. to face, partly caved. Value \$100.00.

No. 4 A cut, the mouth of which bears S. 70° W., 35 ft. from Cor. No. 3 Oro Alto lode; 8 ft. wide, 6 ft. face, running N. 10° W., 20 ft. to face, partly caved. Value \$75.00.

No. 1 The discovery shaft of the Oro Rico lode, the center of which being the discovery point, is on the lode line 1,265.10 ft. from center of line 1-2; 6 x 5 ft.; 10 ft. deep, partly caved. Value \$125.00.

No. 2 A tunnel, 6 x 7 ft. in size, the portal of which bears N. 33° 21' E. 321.08 ft. from Cor. No. 4 Oro Rico lode; running N. 31° W.; 30 ft. to pt. A, and 50 ft. to breast. At pt. A is a drift 5 x 7 ft. in size, running N. 60° W. 31 ft. to pt. B; thence N. 30° W., 6 ft. to breast. Value of tunnel and drift \$1,200.00.

No. 3 A shaft, the center of which bears N. 23° 30' W., 310 ft. from Cor. No. 4 Oro Rico lode; 6 x 20 ft., 10 ft. deep. Value \$150.00.

No. 4 A cut, the mouth of which bears N. 9° 30' W., 322 ft. from Cor. No. 4 Oro Rico lode; 8 ft. wide, 7 ft. face, running S. 82° W., 17 ft. to face. Value \$100.00.

No. 5 A cut, the mouth of which bears N. 50° 40' E., 260 ft. from Cor. No. 1 Oro Rico lode; 6 ft. wide, 6 ft. face, running N. 5° E. 25 ft. to face, partly caved. Value \$100.00.

No. 1 Discovery shaft of the Cougar lode, the center of which being the discovery point, is one the lode line 900 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 4 x 7 ft., 9 ft. deep, partly caved. Value \$100.00.

No. 2 A cut, the mouth of which is on the lode line of the Cougar lode 835 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 5 ft. wide, 4 ft. face, running W. 14 ft. to face. Value \$50.00.

No. 3 A cut, the mouth of which bears N. 63° 50' E., 855 ft. from Cor. No. 1 Cougar lode; 5 ft. wide, 4 ft. face, running N. 80° E., 10 ft. to face, partly caved. Value \$35.00.

No. 4 A cut, the mouth of which bears N. 60° 40' E., 922 ft. from Cor. No. 1, Cougar lode; 4 ft. wide, 4 ft. face, running N. 60° E., 10 ft. to face, partly caved. Value \$35.00.

No. 5 A cut, the mouth of which bears S. 32° 50' E., 295 ft. from Cor. No. 2 Cougar lode; 5 ft. wide, 6 ft. face, running N. 70° W., 13 ft. to face, partly caved. Value \$40.00.

No. 6 A cut, the mouth of which bears S. 35° 15' E., 275 ft. from Cor. No. 2 Cougar lode; 4 ft. wide, 6 ft. face, running N. 77° W. 10 ft. to face. Value \$35.00.

No. 7 A cut, the face of which is on the lode line of the Cougar lode 110 ft. from a point on line 2-3, 280.36 ft. from Cor. No. 2; 6 ft. wide, 6 ft. face, running N. 45° W., 16 ft. to face. Value \$100.00.

No. 8 A cut, the mouth of which bears N. 50° 15' W., 280 ft. from Cor. No. 3 Cougar lode; 5 ft. wide, 10 ft. face, running N. 65° W., 14 ft. to face, partly caved. Value \$75.00.

No. 9 A tunnel, 5x7 ft. in size, the portal of which bears N. 46° E., 400 ft. from Cor. No. 4 Cougar lode; running S. 80° W., 40 ft. to breast, partly caved. Value \$350.00.

No. 1 Discovery shaft of the Oro Real lode, the center of which being the discovery point, is on the lode line 976.59 ft. from a point on line 1-2, 280.36 ft. from Cor. No. 1; 6x12 ft., 8 ft. deep. Value \$100.00.

No. 2 A cut, the mouth of which bears N. 76° E., 500 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 8 ft. face, running N. 45° E., 20 ft. to face, partly caved. Value \$100.00.

No. 3 A tunnel, 6x7 ft. in size, and known as No. 8, the portal of which bears No. 17° 59' W.; 209.35 ft. from Cor. No. 3 Oro Real lode; running No. 52° E., 135 ft. to breast, partly caved. Value \$2,000.00.

No. 4 A cut, the mouth of which bears S. 57° 30' E., 265 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 10 ft. face, running S. 46° W. 10 ft. to face. Value \$125.00.

No. 5 A cut, the mouth of which bears S. 39°30' E. 110 ft. from Cor. No. 1 Oro Real lode; 6 ft. wide, 4 ft. face, running S. 5° W., 20 ft. to face. Value \$50.00.

No. 1 Discovery cut of the J. W. Merritt lode, the face of which being the discovery point, is on the lode line 290 ft. from a point on line 1-2, 293.02 from Cor. No. 1; 4 ft. wide, 8 ft. face, running N. 45° W. 12 ft. to face. Value \$100.00.

No. 2 A cut, the mouth of which is on the lode line of the J. W. Merritt lode 185 ft. from a point on line 1-2, 293.02 ft. from Cor. No. 1; 4 ft. wide, 7 ft. face running N. 40 14 ft. to face. Value \$75.00.

No. 3 A shaft, the center of which bears S. 27°15' E., 290 ft. from Cor. No. 1 J. W. Merritt lode; 4x5 ft., 4 ft. deep, partly caved. Value \$35.00.

No. 4 A shaft, the center of which is on the lode line of the J. W. Merritt lode 80 ft. from a point on line 1-2, 293.02 from Cor. No. 1; 4x6 ft., 5 ft deep. Value \$50.00.

No. 1 Discovery shaft of the Peter Applegate lode, the south side of which being the discovery point, is on the lode line 22 ft. from a point on line 4-1, 293.02 ft. from Cor. No. 1; 4x6 ft., 4 ft. deep. Value \$40.00.

No. 2 A shaft, the center of which bears S. 86°10' E., 380 ft. from Cor. No. 1 Peter Applegate lode; 4x6 ft., 4 ft. deep. Value \$35.00.

No. 3 A shaft, the center of which bears S. 51° 30' E., 270 ft. from Cor. No. 1 Peter Applegate lode; 4x5 ft., 4 ft. deep. Value \$35.00.

No. 4 A shaft, the center of which bears N. 54° 25' E., 1380 ft. from Cor. No. 1 Peter Applegate lode; 4x8 ft., 6 ft. deep. Value \$100.00.

No. 5 A cut, the face of which bears N. 86° E., 200 ft. from Cor. No. 1 Peter Applegate lode; 5 ft. wide, 6 ft. face, running N. 83° W., 15 ft. to face. Value \$70.00.

No. 6 A cut, the mouth of which bears N. 6° 10' W., 350 ft. from Cor. No. 4 Peter Applegate lode; 5 ft. wide, 4 ft. face, running N. 5° E., 16 ft. to face, partly caved. Value \$60.00.

No. 1 Discovery cut of the Oro Escondido lode, the center of which being the discovery point, is on the lode line, 1,258.41 ft. from a point on line 4-1, 293.02 ft. from Cor. No. 1; 12 ft. wide, 8 ft. face, running S. 70° E., 7 ft. to mouth and N. 70° W. 7 ft. to face. Value \$150.00.

No. 2 A cut, the mouth of which bears N. 38° E., 45 ft. from Cor. No. 4 Oro Escondido lode; 8 ft. wide, 5 ft. face, running N. 65° W., 12 ft. to face. Value \$100.00.

No. 1 Discovery cut of the W. C. Leever lode, the face of which being the discovery point, is on the lode line, 83 ft. from a point on line 1-2, 300 ft. from Cor. No. 1; 5 ft. wide, 6 ft. face, running W., 15 ft. to face. Value \$85.00.

No. 2 A cut, the mouth of which bears N. 42° W., 182 ft. from Cor. No. 1 W. C. Leever lode; 4 ft. wide, 6 ft. face, running N. 55° 30' E., 10 ft. to face. Value \$60.00.

No. 3 A cut, the face of which bears N. 28° W., 360 ft. from Cor. No. 1 W. C. Leever lode; 12 ft. wide, 8 ft. face, running S. 53° W., 15 ft. to face. Value \$200.00.

No. 1 Discovery tunnel of the Mark Applegate lode, the center of which being the discovery point is on the lode line, 1,499 ft. from the center of line 4-1; 6x7 ft. in size and known as No. 5, the portal of which bears N. 46° 36' W., 175.46 ft. from Cor. No. 3, Mark Applegate lode, running N. 41° 35' W., 51.25 ft. to Sta. 2; thence N. 40° 05' W., 49.7 ft. to Sta. 3, and N. 61° 30' E., 70.4 ft. to breast. At Sta. 3 a tunnel, 5x7 ft. in size, runs N. 41° 04' W., 49.15 ft. to Sta. 4 and S. 43° 32' W., 53.15 ft. to breast. At Sta. 4 the tunnel runs N. 3° 41' E. 21.45 ft. to breast, partly caved. Value \$3,500.00.

No. 2 A shaft, the center of which bears S. 11° 6' E., 291.68 ft. from Cor. No. 2, Mark Applegate lode; 4x6 ft., 10 ft. deep. Value \$100.00.

No. 1 Discovery shaft of the H. McKenzie lode, the center of which being the discovery point is on the lode line 1,481.59 ft. from the center of line 1-2; 4x6 ft., 6 ft. deep. Value \$75.00.

No. 2 A shaft, the center of which bears S. 62° 30' E., 280 ft. from Cor. No. 4, H. McKenzie lode; 4x10 ft., 8 ft. deep. Value \$100.00.

No. 3 A tunnel, 5 x 7 ft. in size, known as No. 3, the portal of which bears N. 9° 16' E., 321.81 from Cor. No. 3 H. McKenzie lode; running N. 43° W., 12 ft. to Sta. A; thence S. 44° W., 9 ft. to breast and N. 44° E., 10 ft. to breast. At Sta. A a winze with an inclination of 35° runs N. 40° W., 23 ft. to bottom. Value of tunnel and winze \$700.00.

No. 1 Discovery out of the J. L. Grubb lode, the center of which being the discovery point is on the lode line, 388 ft. from the center of line 4-1; 5 ft. wide, 10 ft. face, running S. 10 ft. to the mouth and N. 10 ft. to face. Value \$200.00.

No. 2 A shaft, the center of which bears S. 84° W. 450 ft. from Cor. No. 1 J. L. Grubb lode; 5 x 8 ft., 6 ft. deep. Value \$75.00.

No. 3 A cut, the mouth of which bears S. 65° 20' W., 587 ft. from Cor. No. 1, J. L. Grubb lode; 5 ft. wide, 6 ft. face, running S. 65° W., 20 ft. to face. Value \$150.00.

No. 4 A shaft, the center of which bears S. 63° 50' W., 550 ft. from Cor. No. 1 J. L. Grubb lode; 4 x 10 ft. deep. Value \$75.00.

No. 5 A cut, the mouth of which bears N. 4° 10' W., 265 ft. from Cor. No. 2 J. L. Grubb lode; 16 ft. wide, 12 ft. face, running N. 6 ft. to face. Value \$125.00.

No. 1 Discovery shaft of the J. D. McKinnon lode, the center of which being the discovery point is on the lode line 233 ft. from the center of line 1-2; 4x6 ft., 8 ft. deep. Value \$75.00.

No. 2 A cut, the face of which bears N. 3° 10' W., 363 ft. from Cor. No. 1 J. D. McKinnon lode; 5 ft. wide, 10 ft. face, running N. 80° W., 24 ft. to face Value \$175.00.

No. 3 A cut, the mouth of which bears No. 30° 15' W., 242 ft. from Cor. No. 1 J. D. McKinnon lode; 4 ft. wide, 4 ft. face, running N. 21° W., 16 ft. to face Value \$50.00.

No. 1 Discovery shaft of the Henry Applegate lode, the center of which being the discovery point is on the lode line, 1,495 ft. from the center of line 4-1; 4x5 ft., 7 ft. deep. Value \$75.00.

No. 2 A cut, the face of which bears N. 79° E., 372 ft. from Cor. No. 1 Henry Applegate lode; 5 ft. wide, 8 ft. face, running N. 24° E., 27 ft. to face. Value \$100.00.

No. 3 A cut, the mouth of which bears N. 73° 45' E., 140 ft. from Cor. No. 1 Henry Applegate lode; 4 ft. wide, 5 ft. face, running N. 77° E. 38 ft. to face. Value \$200.00.

No. 1 Discovery cut of the A. W. Dahlberg lode, the face of which being the discovery point is on the lode line 260 ft. from the center line 1-2; 6 ft. wide, 6 ft. face, running N. 19 ft. to face. Value \$125.00.

No. 2 A cut, the face of which bears S. 16°05' E., 365 ft. from Cor. No. 4 A. W. Dahlberg lode; 5 ft. wide, 8 ft. face, running N. 61°30' W., 22 ft. to face. At the face of cut is the portal of a tunnel, 5x7 ft. in size, running N. 9° W., 15 ft. to breast. Value of cut and tunnel \$300.00

No. 3 A cut, the face of which bears N. 83° W., 90 ft. from Cor. No. 1, A. W. Dahlberg lode; 6 ft. wide, 5 ft. face, running N. 31° E., 12 ft. to face. Value \$75.00.

No. 1 Discovery cut of the Telluride lode, the face of which being the discovery point is on the lode line 1,306.93 ft. from the center of line 1-2; 4 ft. wide, 10 ft. face, running N. 14° W., 10 ft. to face. Value \$100.00.

No. 2 A Tunnel 5x7 ft. in size, known as No. 4, the portal of which bears N 68° 54' E., 118.97 ft. from Cor. No. 4 Telluride lode, running N. 12 ft. to Sta. 1; thence N. 30°15' E., 15 ft. to Sta. 2; thence N. 3° E., 20 ft. to Sta. 3; thence N. 85° W. 5 ft. to breast. Value \$830.00.

No. 3 A cut, the face of which bears S. 33°30' E., 238 ft. from Cor. No. 1 Telluride lode; 6 ft. wide, 5 ft. face, running N. 75°15' W., 12 ft. to face. Value \$50.00.

No. 4 A Cut, the face of which bears S. 52°10' W., 415 ft. from Cor. No. 2 Telluride lode; 5 ft. wide, 10 ft. face, running N. 50° W., 12 ft. to face. Value \$60.00.

No. 1 Discovery cut of the Alabama lode, the center of which being the discovery point is on the lode line 1,452 ft. from the center of line 1-2; 4 ft. wide, 6 ft. face, running N. 15° W., 5 ft. to face and S. 15° E., 5 ft. to mouth. Value \$75.00.

No. 2 A cut, the face of which bears S. 31°25' W., 930 ft. from Cor. No. 1 Alabama lode; 5 ft. wide, 7 ft. face, running N. 51°15' W., 16 ft. to face. Value \$100.00.

No. 1 Discovery cut of the Rainboe lode, the face of which being the discovery point, is on the lode line 320 ft. from center of line 1-2; 8 ft. wide, 8 ft. face, running N. 63°30' W., 15 ft. to face. Value \$100.00.

No. 2 A shaft, the center of which bears N. 7° W., 455 ft. from Cor. No. 1 Rainboe lode; 4x6 ft., 3 ft. deep. Value \$35.00.

No. 3 A shaft, the center of which bears N. 15°30' W., 462 ft. from Cor. No. 1 Rainboe lode; 8x8 ft., 4 ft. deep. Value \$70.00.

No. 4 A shaft, the center of which bears S. 86° W., 320 ft. from Cor. No. 1 Rainboe lode; 4x6 ft., 5 ft. deep, partly caved. Value \$60.00.

No. 5 A cut, the mouth of which bears N. 49° 15' W., 574 ft. from Cor. No. 1 Rainboe lode; 5 ft. wide, 10 ft. face, running N. 44° W., 20 ft. to face. Value \$125.00.

No. 6 A shaft, the center of which bears N. 51° 20' W., 624 ft. from Cor. No. 1 Rainboe lode; 10 x 8 ft., 6 ft. deep, partly caved. Value \$100.00.

No. 1 Discovery cut of the Delia McKinnon lode, the center of which being the discovery point, is on the lode line 390 ft. from the center of line 1-2; 5 ft. wide, 10 ft. face, running S. 71° E., 12 ft. to mouth and N. 71° W. 12 ft. to face. Value \$165.00.

No. 2 A shaft, the center of which bears N. 84° W., 450 ft. from Cor. No. 1 Delia McKinnon lode; 6 x 6 ft., 5 ft. deep. Value \$60.00.

No. 3 A cut, the face of which bears S. 80° W., 310 ft. from Cor. No. 1 Delia McKinnon lode; 4 ft. wide, 4 ft. face, running N. 5° W., 20 ft. to face, partly caved. Value \$75.00.

No. 4 A shaft, the center of which is on the lode line 134 ft. from the center of line 1-2 Delia McKinnon lode; 4 x 8 ft., 4 ft. deep. Value \$50.00.

No. 5 A cut, the face of which bears N. 48° 15' W., 410 ft. from Cor. No. 1 Delia McKinnon lode; 8 ft. wide, 10 ft. face, running N. 76° W., 15 ft. to face. Value \$75.00.

No. 6 A cut, the mouth of which bears N. 56° W., 582 ft. from Cor. No. 1 Delia McKinnon lode; 5 ft. wide, 10 ft. face, running N. 74° W., 22 ft. to face. Value \$100.00.

No. 1 Discovery shaft of the Sulphide lode, the center of which being the discovery point, is on the lode line 643 ft. from the center of line 4-1; 4x11 ft., 4 ft. deep. Value \$50.00.

No. 2 A shaft, the center of which bears N. 16° 10' E. 526 ft. from Cor. No. 2 Sulphide lode; 5 x 8 ft., 10 ft. deep. Value \$100.00.

No. 3 A shaft, the center of which bears N. 67° E., 700 ft. from Cor. No. 3 Sulphide lode; 4 x 10 ft., 6 ft. deep. Value \$75.00.

No. 4 A shaft, the center of which bears N. 65° 45' E., 742 ft. from Cor. No. 3 Sulphide lode; 6 x 9 ft., 7 ft. deep. Value \$75.00.

No. 5 A shaft, the center of which bears S. 22° W., 724 ft. from Cor. No. 4 Sulphide lode; 4 x 8 ft., 3 ft. deep, partly caved. Value \$35.00.

No. 6 A shaft, the center of which bears N. 0° 32' W., 287.51 ft. from Cor. No. 2 Sulphide lode; 5 x 10 ft., 10 ft. deep. Value \$125.00.

No. 7 A cut, the face of which bears S. 18° 05' W., 780 ft. from Cor. No. 4 Sulphide lode; 4 ft. wide, 5 ft. face, running N. 5° E., 20 ft. to face. Value \$60.00.

No. 8 A cut, the face of which bears S. 18° 15' W., 847 ft. from Cor. No. 4 Sulphide lode; 5 ft. wide, 6 ft. face, running N. 16 ft. to face. Value \$60.00.

No. 9 A cut, the face of which bears S. 20° E., 73 ft. from Cor. No. 4 Sulphide lode; 5 ft. wide, 10 ft. face, running S. 83° 30' E., 7 ft. to face, partly caved. Value \$50.00.

No. 1 Discovery cut of the Staples lode, the face of which being the discovery point, is on the lode line 1,150 ft. from the center of line 1-2; 6 ft. wide, 10 ft. face, running N. 64° E., 12 ft. to face. Value \$100.00.

No. 2 A cut, the face of which bears S. 61° W., 718 ft. from cor. No. 2 Staples lode; 6 ft. wide, 5 ft. face, running N. 45° E., 12 ft. to face, partly caved. Value \$75.00.

No. 3 A cut, the face of which bears S. 55° E., 75 ft. from cor. No. 4, Staples lode; 12 ft. wide, 10 ft. face, running S. 72° E., 7 ft. to face. Value \$100.00.

No. 1 Discovery cut of the Manganese lode, the face of which being the discovery point, is on the lode line 1070.93 ft. from the center of line 4-1; 5 ft. wide, 9 ft. face, running N. 7 ft. to face. Value \$60.00.

No. 2 A cut, the face of which is on the lode line 1010 ft. from the center of line 4-1 Manganese lode, 5 ft. wide, 4 ft. face, running N. 88° W., 8 ft. to face. Value \$40.00.

No. 3 A cut, the face of which is on the lode line 818 ft. from the center line 4-1 Manganese lode, 5 ft. wide, 7 ft. face, running N. 5° W., 12 ft. to face. Value \$75.00.

No. 4 A cut, the face of which bears S. 61° 30' W., 860 ft. from Cor. No. 1 Manganese lode; 5 ft. wide, 2 ft. face, running N. 34° W., 15 ft. to face. Value \$35.00.

No. 1 Discovery cut of the La Jolla lode, the face of which being the discovery point, is on the lode line 1,330 ft. from the center of line 1-2; 8 ft. wide, 6 ft. face running N. 46° E., 12 ft. to face. Value \$100.00.

No. 2 A cut, the face of which is on the lode line 90 ft. from the center of line 3-4 La Jolla lode; 12 ft. wide, 5 ft. face, running N. 46° E., 6 ft. to face. Value \$65.00.

No. 3 A shaft, the center of which bears S. 31°30' E., 82 ft. from cor. No. 3 La Jolla lode; 5 x 6 ft., 8 ft. deep. Value \$75.00.

No. 1 Discovery out of the Arroyo Verde lode, the center of which being the discovery point, is on the lode line 780 ft. from the center of line 1-2, 8 ft. wide, 10 ft. face, running S. 5° W., 8 ft. to mouth and N. 5° E., 8 ft. to face. Value \$150.00.

A common improvement described as follows:

No. 1. A tunnel, 6 x 7 feet, in size, known as No. 2, the portal of which bears N. 53°39' W., 772.12 ft. from Cor. No. 1 A. W. Dahlberg lode, running N. 51°17' W., 28 ft. to Sta. A1; thence N. 33°32' W., 24 ft. to pt. AX and 40.44 ft. to Sta. A2, and North 25 ft. to pt. X. At pt. X a drift 5 x 7 ft. in size, runs N. 40° W. 30 ft. to breast. At pt. AX a crosscut, 5 x 7 ft. in size, runs W. 20 ft. to breast. At Sta. A2 a tunnel, 6 x 7 ft. in size, runs N. 39°35' W., 66.26 ft. to Sta. A3; thence N. 59°49' W. 38.82 ft. to Sta. A4; thence N. 66°37' W., 121.45 ft. to Sta. A5; thence N. 78°38' W., 170.33 ft. to Sta. A6; thence N. 41°45' W., 179.05 ft. to Sta. A7; thence N. 39°4' W., 71.22 ft. to Sta. A8; thence N. 33°40' W., 62.05 ft. to Sta. A9; thence N. 44°52' W., 129.74 ft. to Sta. A10; thence N. 44°52' W. 141.09 ft. to pt. X1 and 215.56 ft. to Sta. A15. At Sta. A10 a crosscut, 10 x 7 ft. in size, runs N. 42°09' E., 9.73 ft. to Sta. A16 and a crosscut, 6 x 7 ft. in size, runs S. 38° W., 13 ft. to Sta. A11; thence S. 72° W., 25 ft. to Sta. A12; thence S. 60° W., 105 ft. to Sta. A13; thence S. 48° W. 61 ft. to breast. At Sta. A16 a drift, 6 x 7 ft. in size, runs N. 39°51' W., 10 ft. to pt. D and 140 ft. to Sta. Y. This drift also runs S. 54°45' E., 23 ft. to breast. A crosscut, 6 x 7 ft. in size, beginning at Sta. A16 runs N. 52°30' E. 30 ft. to breast. Pt. D is at the beginning of No. 1 stope which averages 38 ft. long, 5 ft. wide, and 125 ft. high. At pt. X1 a crosscut, 8 x 7 ft. in size, runs N. 40° E., 25 ft. and connects with the drift at Sta. Y. At Sta. A15 a drift, 7 x 7 ft. in size, runs N. 50°30' W., 21.22 ft. to Sta. A18, and a crosscut, 10 x 7 ft. in size, runs N. 27°27' E. 15 ft. to Sta. A17. At Sta. A17 a drift, 8 x 7 ft. in size, runs N. 45° W., 15 ft. to breast; a crosscut, 6 x 7 ft. in size, runs N. 41° E., 24 ft. to a caved breast, and a drift, 6 x 7 ft. in size, runs S. 38° E., 15 ft. to breast. Sta. A17 is below a two compartment raise, 5 x 10 ft. in size, running up 30 ft. to Stope #4, which averages 30 ft. long, 5 ft. wide, and 30 ft. high. Sta. Y is in the center of stope 2-3 which averages 35 ft. long, 5 ft. wide, and 150 ft. high. At Sta. Y a drift, 7 x 7 ft. in size, runs N. 4° W., 44 ft. to Sta. Z; thence N. 70° W., 30 ft. to Sta. A17. At Sta. A18 a drift, 6 x 7 ft. in size, runs N. 25°31' W., 36.29 ft. to Sta. A19; thence N. 38° W., 22 ft. to Sta. A20, and N. 16°35' E., 40 ft. to the breast of a crosscut, 5 x 7 ft. in size. Sta. A19 is the beginning of stope No. 5, which averages 35 ft. long, 5 ft. wide, and 50 ft. high. At Sta. A20 a drift, 6 x 7 ft. in size, runs N. 40°11' W. 62.85 ft. to Sta. A21; thence N. 30°30' W., 60.29 ft. to Sta. A22. A crosscut, 5 x 7 ft. in size which begins at Sta. A21 runs S. 57° W., 50 ft. to breast, partly following Sta. A21 is the beginning of Stope 6-7 which averages 30 ft. long, 5 ft. wide, and 110 ft. high. Sta. A22 is below the center of stope No. 8, which averages 40 ft. long, 5 ft. wide, and 55 ft. high. At Sta. A22 a drift, 6 x 7 ft. in size, runs N. 25°15' W. 38.92 ft. to Sta. A23; thence N. 32° W., 80.82 ft. to Sta. A24; thence N. 36°25' W., 53.6 ft. to breast. Sta. A23 is at the beginning of stope No. 9 which averages 22 ft. long, 5 ft. wide, and 55 ft. high.

No. 2. A tunnel, 6 x 7 ft. in size known as No. 1, the portal of which bears S. 29°3' W., 521.02 ft. from Cor. No. 2 Peter Applegate lode, running S. 74° E., 176 ft. to Sta. B3; thence S. 73° 57' E., 112.73 ft. to Sta. B4; thence N. 30° E., 527.43 ft. to Sta. B5; thence N. 77°37' E., 53.5 ft. to breast. At Sta. B5 a drift, 7 x 7 ft. in size, runs N. 47° 16' W., 20 ft. to pt. A and 87.5 ft. to Sta. B6. Pt. A is at the top of a rise, 5 x 8 ft. in size, which comes up from Sta. No. 4 and connects with No. 2 tunnel at Sta. A17. The raise has a length of 290 ft. and partly timbered. At Sta. B5 a drift, 7 x 7 ft. in size, runs N. 33° W., 29.91 ft. to Sta. B7, thence N. 46° 00' W., 27.6 ft. to Sta. B8, thence N. 2° 19' W., 19 ft. to breast. At Sta. B5 a drift, 7 x 7 ft. in size, runs S. 37° 17' E. 45 ft. to pt. B and 100 ft. to breast. A stope, the center of which is above pt. B averages 80 ft. long, 5 ft. wide and 60 ft. high. Pt. B is also the center of a stope, below the level, which averages 43 ft. long, 5 ft. wide, 50 ft. deep and connects with the raise between tunnels No. 1 and No. 2.

No. 3 A tunnel, 5 x 7 ft. in size, known as No. 6, the portal of which bears N. 49° 41' E., 9.37 ft. from Cor. No. 4, H. McKenzie lode, running S. 66° 20' E., 52 ft. to pt. 1 and 107 ft. to Sta. 2. At pt. 1 a crosscut, 5 x 7 ft. in size, runs S. 25° E., 22 ft. to breast. At 8th, 2 a crosscut, 5 x 7 ft. in size, runs N. 33° E., 11 ft. to the top of a raise, 5 x 7 ft. in size, which connects with the top of the stope above tunnel No. 1. The raise has a length of 65 ft. At Sta. 2 a 5 x 7 ft. drift runs S. 47° 05' E., 65 ft. to Sta. 3; thence S. 30° E., 30 ft. to Sta. 4; thence S. 40° E., 46 ft. to Sta. 5. At Sta. 4 a crosscut 5 x 7 ft. in size, runs S. 69° W., 48 ft. to breast. At Sta. 5 a cross, 5 x 7 ft. in size runs W. 38° 45' E., 115 ft. to breast; another 5 x 7 ft. crosscut runs N. 83° 55' E., 31 ft. to breast, and a drift, 5 x 7 ft. in size, runs S. 4° W., 16 ft. to breast.

Value of tunnels, drifts, raises, crosscuts and stopes, \$63,500.00.

#### OTHER IMPROVEMENTS

A frame assay office, the east corner of which bears N. 43° 02' W., 511.08 ft. from Cor. No. 1, A. W. Dahlberg lode; 14 x 17 ft. in size, the long side bears S. 31° 30' W.

A frame tank shed, the east corner of which bears N. 47° 08' W., 478.8 ft. from Cor. No. 1, A. W. Dahlberg lode; 10 x 38 ft. in size, the long side bears N. 58° 30' W. A frame building which houses a flotation mill and a diesel power plant. The east corner of the building bears N. 49° 14' W., 523.42 ft. from Cor. No. 1, A. W. Dahlberg lode; 56 x 80 ft. in size, the long side bears N. 58° 30' W.

A frame concentrates drying shed, the south corner of which bears N. 52° 28' W., 497.36 ft. from Cor. No. 1, A. W. Dahlberg lode; 12 x 16 ft. in size, the long side bears N. 31° 30' W.

A frame shop and timber shed, the south corner of which bears N. 55° 24' W. 726.02 ft. from Cor. No. 1, A. W. Dahlberg lode, 30 x 42 ft. in size; the long side bears N. 37° 30' E.

A frame and log office and storehouse, the NE. Cor. of which bears N. 57° 40' W., 187 ft. from Cor. No. 1, A. W. Dahlberg lode; 18 x 52 ft. in size; the long side bears S. 25° 15' W.

A frame boarding house, the NE. Cor. of which bears N. 83° 30' W., 192 ft. from Cor. No. 1, A. W. Dahlberg lode; 18 x 38 ft. in size; the long side bears S. 25° W.

A frame bunk house the N.E. Cor. of which bears S. 85° W. 210 ft. from Cor. No. 1 A. W. Dahlberg lode; 17 x 32 ft. in size; the long side bears S. 25° W.

A frame bunk house, the N. E. Cor. of which bears S. 63° 50' W. 212 ft. from Cor. No. 1, A. W. Dahlberg lode; 14 x 20 ft. in size; the long side bears S. 20° W.

A frame bunk house, the N. E. Cor. of which bears S. 56° W., 265 ft. from Cor. No. 1 A. W. Dahlberg lode; 14 x 15 ft. in size; the long side bears S. 38° W.

4-207 (May 1954)

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington, D. C., February 16, 1956.

I hereby certify that the annexed photostatic copy of the field notes for Mineral Survey No. 879 in the Elk Creek Mining District, Oregon, is a true and literal exemplification of the record on file in this office.

In testimony whereof, I have hereunto subscribed my name and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL]

OSCAR E. COLLINS,  
Certifying Officer.

DEPARTMENT OF THE INTERIOR, BUREAU OF LAND MANAGEMENT  
MINERAL SURVEY No. 879—OREGON DISTRICT (LAND DISTRICT)

FIELD NOTES OF THE SURVEY OF THE MINING CLAIM OF AL SARENA MINES, INC., KNOWN  
AS THE AL SARENA GROUP

Elk Creek (unorganized) Mining District, Jackson County, Oregon, Sections 19, 20, 21, 28, 29, 30, Township 31 S., Range 2 E., W. M.

Surveyed under instructions dated October 15, 1946, by G. Cleveland Taylor, Mineral Surveyor.

Claim located, 5/11, 5/12, 5/14, 5/28, 6/6, 9/7; 10/20, 32; 12/9, 33; 5/25, 9/21, 34; 8/29, 10/26, 11/20, 36; 9/16, 39; 7/8, 44.

Survey commenced May 12, 1947.

Survey completed August 6, 1947.

Address of claimant: H. P. McDonald, Jr., Sec'y., Trail, Oregon.

Dates of amended locations: 8/31/97; 10/2/46; 7/3/47.

H. McKenzie lode, located May 11, 1897, amended July 3, 1947.

Mark Applegate lode, located May 11, 1897, amended July 3, 1947.

Peter Applegate lode, located May 11, 1897, amended July 3, 1947.

Delia McKinnon lode, located June 6, 1897, amended July 3, 1947.

J. L. Grubb lode, located May 11, 1897, amended July 3, 1947.

J. D. McKinnon lode, located May 11, 1897, amended July 3, 1947.

A. W. Dahlberg lode, located May 11, 1897, amended July 3, 1947.

W. C. Leever lode, located May 11, 1897, amended July 3, 1947.

Henry Applegate lode, located May 11, 1897, amended July 3, 1947.

J. W. Merritt lode, located May 11, 1897, amended July 3, 1947.

Sulphide lode, located Sept. 21, 1934, amended July 3, 1947.

Telluride lode, located Oct. 20, 1932, amended July 3, 1947.

Manganese lode, located Oct. 20, 1932, amended July 3, 1947.

Staples lode, located June 25, 1934, amended July 3, 1947.

Arroyo Verde lode, located Aug. 27, 1936, amended July 3, 1947.

Alabama lode, located May 25, 1934, amended July 3, 1947.

Oro Escondido lode, located Aug. 29, 1936, amended July 3, 1947.

Cougar lode, located Nov. 20, 1936, amended July 3, 1947.

Oro Real lode, located Nov. 20, 1936, amended July 3, 1947.

La Jolla lode, located Aug. 26, 1936, amended July 3, 1947.

Rainbow lode, located Dec. 9, 1933, amended July 3, 1947.

Oro Rico lode, located July 28, 1939, amended July 3, 1947.

Oro Alto lode, located July 28, 1939, amended July 3, 1947.

Ram lode, located July 8, 1944, amended July 3, 1947.

#### SURVEY NO. 879

##### Feet

Mineral Survey No. 879 was made with a Lietz Universal Transit No. 5426, with horizontal limb 5.75 ins. diam., having a double vernier, and full vertical circle 4.25 ins. diam., having one double vernier; the verniers read to one minute of arc; the eye piece is equipped with a colored glass shade set in the dust shutter for making direct observations upon the sun. The instrument was in good condition at the time of the survey and all adjustments were in good order. An a. m. altitude observation of the sun for time and azimuth, and at noon on the meridian for latitude, were made at the point of beginning, the details of which observation are shown in the calculation sheets herewith submitted for examination. All azimuths in this record are referred to the true meridian thus determined, by the method of deflection angles and calculated courses. The lines were measured with a Pioneer steel tape 300 feet in length, graduated every foot; and a K. & E. steel tape 6 feet in length, graduated to feet, tenths and hundredths; both tapes were compared with a K. & E. standard at the time of beginning the survey and found to be correct. All lines and connections of this survey were run by direct methods where the lines are accessible; the inaccessible lines were run by traverse methods, as shown by the calculation sheets herewith submitted.

The magnetic variation observed at each corner of the survey gave a uniform value of 20° 00' E.

#### RAM LODGE

Beginning at Cor. 1 of the Ram Lode, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked R-1-0 Ri-1-0 A-2-879; from which

The cor. of secs. 19, 20, 29, and 30, T. 31 S., R. 2 E., W. 11 Mer. bears N. 75° 57' W., 592.25 ft. dist.; a gray stone 8×10×12 ins. firmly set, marked and witnessed as described in the official record. A white fir, 12 ins. diam., bears N. 5° W., 16.0 ft. dist., m&d R-1-0 Ri-1-0 A-2-879 B T.

A chinquapin, 9 ins. diam., bears S. 17° E., 19.0 ft. dist., m&d

	<b>R-1-0 Ri-1-0 A-2-879 B T.</b>
	Thence N. 42°34' W.
<b>1, 451. 84</b>	Cor. No. 2.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. R-2-879; from which
	A white fir, 12 ins. diam., bears S. 34° E., 8.0 ft. dist., mkd. R-2-879 B T.
	Thence N. 45°50' E.
<b>300. 00</b>	Intersect lode line.
<b>600. 00</b>	Cor. No. 3.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, marked R-3-879; from which
	A hemlock, 11 ins. diam., bears S. 3° E., 23.5 ft. dist., mkd. R-3-879-B T.
	A white fir, 8 ins. diam., bears N. 45° E., 13.5 ft. dist., mkd. R-3-879-B T.
	Thence S. 42°34' E.
<b>1, 200. 00</b>	West Fork of Swanson Creek, 3 feet wide, course S. 15° E.
<b>1, 451. 84</b>	Cor. No. 4.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground, and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. R-4-0 Ri-2-879; from which
	A yew, 13 ins. diam., bears N. 79° E., 21.0 ft. dist., mkd. R-4-0 Ri-2-879-B T.
	A red fir, 24 ins. diam., bears S. 12° E., 12.5 ft. dist., mkd. R-4-0 Ri-2-879 B T.
	Thence S. 45°50' W.
<b>110. 00</b>	West Fork of Swanson Creek, 3 feet wide, course S. 5° E.
<b>300. 00</b>	Intersect lode line.
<b>600. 00</b>	Cor. No. 1 and place of beginning.

## ORO ALTO LODGE

Beginning at Cor. No. 1 of the Oro Alto lode, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked OA-1-879; from which

The cor. of secs. 19, 20, 29, and 30, T. 31 S., R. 2 E., Wil Mer., bears N. 14°22' W., 579.97 ft. dist.; previously described.

A white fir, 6 ins. diam., bears N. 67° W., 9.0 ft. dist., mkd. OA-1-879-BT.

A white fir, 6 ins. diam., bears N. 34° E., 11.0 ft. dist., mkd. OA-1-879-BT.

Thence N. 45°50' E.

**300. 00** Intersect lode line.

**600. 00** Cor. No. 2, which is identical with Cor. No. 1 of the Ram lode of this survey.

Thence S. 44°31' E.

**500. 00** West Fork of Swanson Creek, 3 feet wide, course south.

**1, 210. 00** Bitterlick road, bears N. 5° E. and S. 5° W.

**1, 435. 10** Cor. No. 3.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. OA-3-0 Ri-4-0 Re-4-C-2-879; from which

A red fir, 17 ins. diam., bears N. 59° E., 20.5 ft. dist., mkd. OA-3-0 Ri-4-0 Re-4-C-2-879-BT.

A red fir, 5 ins. diam., bears E., 21.0 ft. dist., mkd. O-A-3-0 Ri-4-0 Re-4-C-2-879-BT.

Thence S. 45°50' W.

**300. 00** Intersect lode line.

**600. 00** Cor. No. 4.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. OA-4-879; from which

Feet

A madrone, 8 ins. diam., bears N. 80° W., 13.0 ft. dist., mkd OA-4-879 BT.

A red fir, 10 ins. diam., bears S. 12° E., 5.5 ft. dist., mkd OA-4-879-BT.

Thence N. 44° 31' W.

- 30.00 Bitterlick road, bears northeast and southwest.
- 358.00 Bitterlick road, bears N. 25° W. and S. 25° E.
- 565.00 West Fork of Swanson Creek, 3.5 feet wide, course south.
- 585.00 Bitterlick road, bears northeast and southwest.
- 1,435.10 Cor. No. 1, and place of beginning.

## ORO RICO LODE

Beginning at Cor. No. 1 of the Oro Rico Lode, which is identical with Cor. No. 1 of the Ram lode and Cor. No. 2 of the Oro Alto lode of this survey.

Thence N. 45° 50' E.

- 300.00 Intersect lode line.
- 490.00 West Fork of Swanson Creek, 3 feet wide, course S. 5° E.
- 600.00 Cor. No. 2, which is identical with Cor. No. 4 of the Ram lode of this survey.
- Thence S. 44° 31' E.
- 710.00 Bitterlick road, bears north and south.
- 1,190.00 Swanson Creek, 5 feet wide, course S. 5° E.
- 1,240.00 Trail, bears N. 5° W. and S. 5° E.
- 1,435.10 Cor. No. 3.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and a mound of stone 18 ins. high, for Cor. No. 3, mkd. O Ri-3-879; from which

A red fir, 10 ins. diam., bears S. 68° W., 13.0 ft. dist., mkd O Ri-3-879-B T.

A red fir, 5 ins. diam., bears N. 42° E., 5.0 ft. dist., mkd O Ri-3-879-B T.

Thence S. 45° 50' W.

- 300.00 Intersect lode line.
- 335.00 Trail, bears N. 20° E. and S. 20° W.
- 425.00 Swanson Creek, 5 feet wide, course south.
- 600.00 Cor. No. 4, which is identical with Cor. No. 3 of the Oro Alto lode of this survey.
- Thence N. 44° 31' W.
- 225.10 Bitterlick road, bears N. 5° E. and S. 5° W.
- 885.10 West Fork of Swanson Creek, 3 feet wide, course south.
- 1,435.10 Cor. No. 1 and place of beginning.

## COUGAR LODE

Beginning at Cor. No. 1 of the Cougar Lode, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and a mound of stone 18 ins. high, for Cor. No. 1, marked C-1-879; from which

The ¼ sec. cor. between secs. 29 and 30, T. 31 S., R. 2 E., W. 1/4 Mer., bears S. 49° 01' W., 659.90 ft. dist.; a gray stone 8x10x14 ins. firmly set, marked and witnessed as described in the official record.

A white fir, 10 ins. diam., bears N. 45° W., 23.0 ft. dist., mkd C-1-879-B T.

A cedar, 5 ins. diam., bears N. 60° E., 10.0 ft. dist., mkd C-1-879-B T.

Thence N. 45° 50' E.

- 200.00 Bitterlick road, bears N. 8° W. and S. 10° E.
- 490.00 West Fork of Swanson Creek, 4 feet wide, course S. 10° E.
- 900.00 Corner No. 4 of the Oro Alto lode of this survey.
- 1,500.00 Cor. No. 2, which is identical with Cor. No. 3 of the Oro Alto lode and Cor. No. 4 of the Oro Rico lode, of this survey.
- Thence S. 45° 25' E.
- 280.36 Intersect lode line.
- 350.00 Swanson Creek, 5 feet wide, course S. 26° W.
- 390.00 Trail, bears N. 25° E. and S. 25° W.

Feet

580.36	Cor. No. 3. Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. C-3-O Re-3-P A-2-879; from which A hemlock, 12 ins. diam., bears S. 82° W., 14.0 ft. dist., mkd. C-3-O Re-3-P A-2-879-B T. A white fir, 9 ins. diam., bears N. 35° E., 17.5 ft. dist., mkd. C-3 O Re-3-P A 2-879-B T. Thence S. 45°50' W.
510.00	Swanson Creek, 5 feet wide, course S.; West Portal Road, bears N. 23° E. and S. 23° W.

1,360.00	Bitterlick road, bears north and south.
1,500.00	Cor. No. 4. Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. C-4-JWM-1-P A-1-879; from which A white fir, 8 ins. diam., bears N. 32° E., 44.0 ft. dist., mkd. C-4-JWM-1-P A-1-879-B T. A cedar, 18 ins. diam., bears E., 32.0 ft. dist., mkd. C-4-JWM-1-P A-1-879-B T. Thence N. 45°25' W.
300.00	Intersect lode line.
580.36	Cor. No. 1 and place of beginning.

## ORO REAL LODE

Beginning at Cor. No. 1 of the Oro Real Lode, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked O Re-1-879; from which

The ¼ sec. cor., between secs. 20 and 29, T. 31 S., R. 2 E., Wil. Mer., bears S. 10°26' E., 67.10 ft. dist.; a dark stone, 10 x 12 x 16 ins., firmly set, marked and witnessed as described in the official record.

A white fir, 11 ins. diam., bears N. 30° W., 6.0 ft. dist., mkd. O Re-1-879-B T.

A white fir, 9 ins. diam., bears N. 65° E., 7.0 ft. dist., mkd. O Re-1-879-B T.

Thence S. 45°25' E.

280.36 Intersect lode line.

550.00 Summit of ridge, bears N. and S.

580.36 Cor. No. 2.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. O Re-2-OE-1-879; from which

A red fir, 40 ins. diam., bears S. 45° W., 9.5 ft. dist., mkd. O Re-2-OE-1-879-B T.

A red fir, 48 ins. diam., bears N. 20° E., 24.0 ft. dist., mkd. O Re-2-OE-1-879-B T.

Thence S. 45°50' W.

35.00 Summit of ridge, bears north and south.

1,486.59 Cor. No. 3, which is identical with Cor. No. 3 of the Cougar lode of this survey.

Thence N. 45°25' W.

190.36 Trail, bears N. 25° E. and S. 25° W.

230.36 Swanson Creek, 5 feet wide, course S. 26° W.

300.00 Intersect lode line.

580.36 Cor. No. 4, which is identical with Cor. No. 3 of the Oro Alto lode, Cor. No. 4 of the Oro Rico lode, and Cor. No. 2 of the Cougar lode, of this survey.

Thence N. 45°50' E.

175.00 Swanson Creek, 5 feet wide, course S.

265.00 Trail, bears N. 20° E. and S. 20° W.

600.00 Cor. No. 3 of the Oro Rico lode of this survey.

1,486.59 Cor. No. 1 and place of beginning.

## J. W. MERRITT LODE

## Feet

	Beginning at Cor. No. 1 of the J. W. Merritt Lode, which is identical with Cor. No. 4 of the Cougar lode, of this survey, from which
	The $\frac{1}{4}$ sec. cor. between secs. 29 and 30, T. 31 S., R. 2 E., Wil Mer., bears S. $88^{\circ}24'$ W., 911.85 ft. dist., previously described.
	Thence S. $46^{\circ}38'$ E.
120.00	Bitterlick road, bears N. $9^{\circ}$ E. and S. $14^{\circ}$ W.
293.02	Intersect lode line.
390.00	West Portal road, bears N. $25^{\circ}$ E. and S. $24^{\circ}$ W.
450.00	Swanson Creek, 5 feet wide, course S. $25^{\circ}$ W.
593.02	Cor. No. 2.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. JWM-2-PA-4-MA-1-879; from which
	A hemlock, 9 ins. diam., bears S. $58^{\circ}$ W., 27.0 ft. dist., mkd. JWM-2-PA-4-MA-1-879-B T.
	A hemlock, 12 ins. diam., bears N. $49^{\circ}$ W., 32.0 ft. dist., mkd. JWM-2-PA-4-MA-1-879-B T.
	Thence S. $45^{\circ}50'$ W.
290.00	Swanson Creek, 5.5 ft. wide, course S. $18^{\circ}$ W.
395.00	West Portal road, bears N. $16^{\circ}$ E. and S. $16^{\circ}$ W.
1,500.00	Cor. No. 3.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. JWM-3-879; from which
	A white fir, 10 ins. diam., bears N. $17^{\circ}$ W., 34.0 ft. dist., mkd. JWM-3-879-B T.
	A red fir, 30 ins. diam., bears S. $20^{\circ}30'$ W.; 7.0 ft. dist., mkd. JWM-3-879-B T.
	Then N. $46^{\circ}38'$ W.
260.00	Bitterlick road, bears northeast and southwest.
300.00	Intersect lode line.
593.02	Cor. No. 4.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground, and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. JWM-4-879; from which
	A chinquapin, 7 ins. diam., bears N. $3^{\circ}$ E., 35.0 ft. dist., mkd. JWM-4-879-B T.
	A red fir, 10 ins. diam., bears S. $84^{\circ}$ E., 17.5 ft. dist., mkd. JWM-4-879-B T.
	Thence N. $45^{\circ}50'$ E.
1,500.00	Cor. No. 1 and place of beginning.

## PETER APPLGATE LODE

	Begining at Cor. No. 1 of the Peter Applegate Lode, which is identical with Cor. No. 4 of the Cougar lode and Cor. No. 1 of the J. W. Merritt lode, of this survey.
	Then No. $45^{\circ}50'$ E.
140.00	Bitterlick road, bears north and south.
380.00	West Fork of Swanson Creek, 4 feet wide, course S. $30^{\circ}$ E.
990.00	Swanson Creek, 5 feet wide, course N. and S.; West Portal road, bears N. $23^{\circ}$ E., and S. $23^{\circ}$ W.
1,500.00	Cor. No. 2, which is identical with Cor. No. 3 of the Cougar lode and Cor. No. 3 of the Oro Real lode, of this survey.
	Thence S. $46^{\circ}38'$ E.
293.02	Intersect lode line.
593.02	Cor. No. 3.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. PA-3-MA-2-HMcK 4-879; from which
	A red fir, 36 ins. diam., bears S. $17^{\circ}30'$ W., 22.0 ft. dist., mkd. PA-3-MA-2-HMcK 4-879-B T.
	A hemlock, 8 ins. diam., bears S. $88^{\circ}$ W., 32.0 ft. dist., mkd. PA-3-MA-2-HMcK 4-879-B T.
	Thence S. $45^{\circ}50'$ W.

**Feet**

- 1, 500. 00 Cor. No. 4, which is identical with corner No. 2 of the J. W. Merritt lode, of this survey.  
Thence N. 46° 38' W.
143. 02 Swanson Creek, 5 feet wide, course S. 25° W.
203. 02 West Portal road, bears N. 25° E. and S. 25° W.
300. 00 Intersect lode line.
473. 02 Bitterlick road, bears N. 9° E. and S. 14° W.
593. 02 Cor. No. 1 and place of beginning.

**ORO ESCONDIDO LODE**

Beginning at Cor. No. 1 of the Oro Escondido Lode, which is identical with Cor. No. 2 of the Oro Real lode, of this survey, from which

The ¼ sec. cor. between secs. 20 and 29, T. 31 S., R. 2 E., Wil. Mer., bears N. 49° 36' W., 526.74 ft. dist., previously described.

Thence N. 45° 50' E.

- 1, 448. 41 Cor. No. 2.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. OE-2-WCL-2-879; from which

A madrone, 9 ins. diam., bears N. 41° E., 20.0 ft. dist., mkd. OE-2-WCL-2-879-B T.

A cedar, 24 ins. diam., bears S. 60° E., 43.0 ft. dist., mkd. OE-2-WCL-2-879-B T.

Thence S. 46° 38' E.

293. 02 Intersect lode line.

593. 02 Cor. No. 3.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. OE-3-WCL-1-JLG-4-JDMcK-2-879; from which

A madrone, 8 ins. diam., bears S., 19.0 ft. dist., mkd. OE-3-WCL-1-JLG-4-JDMcK-2-879-B T.

A madrone, 9 ins. diam., bears S. 80° W., 24.0 ft. dist., mkd. OE-3-WCL-1-JLG-4-JDMcK-2-879-B T.

Thence S. 45° 50' W.

- 1,448.41 Cor. No. 4.

## A. W. DAHLBERG LODE

- Beginning at Cor. No. 1 of the A. W. Dahlberg Lode, where I—  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in  
a mound of stone 18 ins. high, for Cor. No. 1, marked AWD-1-879; from  
which
- The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T. 31 S., R. 2 E., W.  
Mer., bears N.  $78^{\circ}37'45''$  E., 1,194.31 ft. dist.; a stone, 8 x 10 x 12  
ins. firmly set, marked and witnessed as described in the official  
record.  
A white fir, 8 ins. diam., bears N.  $21^{\circ}$  W., 9.0 ft. dist., mkd.  
AWD-1-879-BT.  
A white fir, 24 ins. diam., bears N.  $55^{\circ}30'$  E., 30.5 ft. dist., mkd.  
AWD-1-879-BT.  
Thence S.  $45^{\circ}50'$  W.
- 220.00 Elk Creek road, bears N.  $10^{\circ}$  W. and S.  $10^{\circ}$  E.  
300.00 Intersect lode line.  
600.00 Cor. No. 2.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in  
a mound of stone 18 ins. high, for Cor. No. 2, marked AWD-2-879;  
from which  
A red fir, 11 ins. diam., bears S.  $81^{\circ}40'$  W., 11.0 ft. dist., mkd.

feet

## AWD-2-879-B T.

A red fir, 20 ins. diam., bears S. 55°15' E., 22.0 ft. dist., mkd.

## AWD-2-879-B T.

Thence N. 44°10' W.

900.00 Cor. No. 3 of the Henry Applegate lode of this survey.

1,500.00 Cor. No. 3, which is identical with Cor. No. 2 of the Henry Applegate lode of this survey.

Thence N. 45°50' E.

300.00 Intersect lode line; Cor. Nos. 3 of the Mark Applegate and H. McKenzie lodes of this survey.

600.00 Cor. No. 4 on line 2-3 H. McKenzie lode of this survey.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. AWD-4-T-4-879; from which

A red fir, 10 ins. diam., bears S. 5° W., 9.5 ft. dist., mkd. AWD-4-T-4-879-B T.

A cedar, 36 ins. diam., bears N. 55° W., 23.0 ft. dist., mkd. AWD-4-T-4-879-B T.

Thence S. 44°10' E.

1,320.00 Road, bears northeast and southwest.

1,370.00 Elk Creek road, bears N. 16° E. and S. 16° W.

1,500.00 Cor. No. 1 and place of beginning.

## TELLURIDE LODE

Beginning at Cor. No. 1 of the Telluride Lode, on line 1-2 J. L. Grubb lode of this survey, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked T-1-A-4-879; from which

The cor. of secs. 20, 21, 28, and 29, T. 31 S., R. 2 E., W11. Mer., bears N. 56°22' E., 1,444.83 ft. dist.; previously described.

A sugar pine, 11 ins. diam., bears E., 17.0 ft. dist., mkd. T-1-A-4-879-B T.

A red fir, 11 ins. diam., bears N., 17.0 ft. dist., mkd. T-1-A-4-879-B T.

Thence S. 44°10' E.

300.00 Intersect lode line.

380.00 Elk Creek road, bears N. 30° E. and S. 30° W.

585.00 Elk Creek, 10 feet wide, course S. 15° W.

600.00 Cor. No. 2.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. T-2-A-3-Su-4-St-4-879; from which

A red fir, 14 ins. diam., bears S. 27° E., 34.0 ft. dist., mkd. T-2-A-3-Su-4-St-4-879-B T.

A hemlock, 16 ins. diam., bears N. 3° W., 18.0 ft. dist., mkd. T-2-A-3-Su-4-St-4-879-B T.

Thence S. 45°50' W.

40.00 Elk Creek, 8 ft. wide, course south.

425.00 Elk Creek road, bears N. and S.

1,430.93 Cor. No. 3, on line 4-1 A. W. Dahlberg lode of this survey.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. T-3-Su-3-879; from which

A white fir, 10 ins. diam., bears N. 37° E., 7.5 ft. dist., mkd. T-3-Su-3-879-B T.

A madrone, 9 ins. diam., bears S. 5° E., 8.5 ft. dist., mkd. T-3-Su-3-879-B T.

Thence N. 44°10' W.

300.00 Intersect lode line.

600.00 Cor. No. 4, which is identical with Cor. No. 4 of the A. W. Dahlberg lode of this survey.

Thence N. 45°50' E.

1,186.59 Cor. Nos. 2 of the H. McKenzie and J. L. Grubb lodes of this survey.

1,430.93 Cor. No. 1 and place of beginning.

## ALABAMA LODGE

Feet

Beginning at Cor. No. 1 of the Alabama Lode, on line 4-1, J. I. McKinnon lode of this survey, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked A-1-879; from which

The cor. of secs. 20, 21, 28, and 29, T. 31 S., R. 2 E., W. 1/2 Mer. bears S. 35°40' E., 267.09 ft. dist.; previously described.

A white fir, 11 ins. diam., bears S. 71° E., 20.0 ft. dist., mkd A-1-879-B T.

A red fir, 36 ins. diam., bears S. 45° W., 27.0 ft. dist., mkd A-1-879-B T.

Thence S. 44°10' E.

180.00 Elk Creek road, bears north and south.

300.00 Intersect lode line.

480.00 Elk Creek road, bears N. 70° E. and S. 70° W.

600.00 Cor. No. 2.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in mound of stone 18 ins. high, for Cor. No. 2, mkd. A-2-St-1-879 from which

A white fir, 26 ins. diam., bears S. 65° E., 46.0 ft. dist., mkd A-2-St-1-879-B T.

A white fir, 12 ins. diam., bears S. 49° W., 22.0 ft. dist., mkd A-2-St-1-879-B T.

Thence S. 45°50' W.

1,460.00 Cor. No. 3, which is identical with Cor. No. 2 of the Telluride lode of this survey.

Thence N. 44°10' W.

15.00 Elk Creek, 10 ft. wide, course S. 15° W.

220.00 Elk Creek road, bears N. 30° E. and S. 30° W.

300.00 Intersect lode line.

600.00 Cor. No. 4, which is identical with Cor. No. 1 of the Telluride lode of this survey.

Thence N. 45°50' E.

1,204.07 Cor. No. 1 of the J. L. Grubb and the J. D. McKinnon lodes of this survey.

1,254.07 Elk Creek road, bears N. S.

1,444.00 Elk Creek, 10 ft. wide, course S. 10° W.

1,460.00 Cor. No. 1 and place beginning.

## RAINBOW LODGE

Beginning at Cor. No. 1 of the Rainbow Lode, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked Ra-1-DMcK-2-879; from which

The 1/4 sec. cor. between secs. 28 and 29, T. 31 S., R. 2 E., W. 1/2 Mer., bears N. 47°03'07'' E., 2,204.43 ft. dist.; previously described. This is the most accessible corner that could be found after diligent search.

A sugar pine, 6 ins. diam., bears N. 6°30' W., 18.0 ft. dist., mkd Ra-1-DMcK-2-879-B T.

A red fir, 9 ins. diam., bears S. 8°30' S., 3.5 ft. dist., mkd Ra-1-DMcK-2-879-B T.

Thence S. 45°50' W.

150.00 Elk Creek road, bears N. 43° E. and S. 28° W.

300.00 Intersect lode line.

600.00 Cor. No. 2.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. Ra-2-879; from which

A white fir, 10 ins. diam., bears S. 78° W., 11.0 ft. dist., mkd Ra-2-879-B T.

A madrone, 15 ins., diam., bears N. 1°10' W., 11.0 ft. dist., mkd Ra-2-879-B T.

Thence N. 44°10' W.

*Feet*

- 1,500.00 Cor. No. 3, on line 3-4 Henry Applegate lode of this survey.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. Ra-3-879; from which  
A cedar, 10 ins. diam., bears N. 20° E., 47.0 ft. dist., mkd. Ra-3-879-B T.  
A madrone, 8 ins. diam., bears S. 28° 30' E., 27.0 ft. dist., mkd. Ra-3-879-B T.  
Thence N. 45° 50' E.  
300.00 Intersect lode line.  
600.00 Cor. No. 4, on line 3-4 Henry Applegate lode of this survey.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. Ra-4-DMcK-3-879; from which  
A madrone, 11 ins. diam., bears N. 55° E., 18.0 ft. dist., mkd. Ra-4-DMcK-3-879-B T.  
A red fir, 30 ins. diam., bears S. 2° E., 19.0 ft. dist., mkd. Ra-4-DMcK-3-879-B T.  
Thence C. 44° 10' E.  
1,480.00 Elk Creek road, bears N. 33° E. and S. 33° W.  
1,500.00 Cor. No. 1 and place of beginning.

## DELIA M'KINNON LODGE

- Beginning at Cor. No. 1 of the Delia McKinnon Lode, where I—  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked DMcK-1-879; from which  
The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T. 31 S., R. 2 E., W11. Mer., bears N. 47° 30' 27'' E., 1,604.61 ft. dist.; previously described.  
A maple, 8 ins. diam., bears N. 48° W., 9.5 ft. dist., mkd. DMcK-1-879-B T.  
A white fir, 6 ins. diam., bears S. 56° 30' E., 19.0 ft. dist., mkd. DMcK-1-879-B T.  
Thence S. 45° 50' W.  
300.00 Intersect lode line.  
600.00 Cor. No. 2, which is identical with Cor. No. 1 of the Rainboe lode of this survey.  
Thence N. 44° 10' W.  
20.00 Elk Creek road, bears N. 33° E. and S. 33° W.  
1,500.00 Cor. No. 3, which is identical with Cor. No. 4 of the Rainboe lode of this survey.  
Thence N. 45° 50' E.  
300.00 Intersect lode line.  
600.00 Cor. No. 4, which is identical with Cor. No. 3 of the Henry Applegate lode of this survey.  
Thence S. 44° 10' E.  
900.00 Corner No. 2 of A. W. Dahlberg lode of this survey.  
1,105.00 Elk Creek road, bears N. 16° E. and S. 7° E.  
1,500.00 Corner No. 1 and place of beginning.

## SULPHIDE LODGE

Beginning at Cor. No. 1 of the Sulphide Lode, which falls in the East Ford of Elk Creek where a monument could not be established. From this point—

- The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T. 31 S., R. 2 E., W11. Mer., bears S. 19° 53' 36'' E., 1,038.70 ft. dist.; previously described.  
Thence S. 45° 50' W.  
510.00 East Fork of Elk Creek, 5 ft. wide, course S. 75° W.  
1,005.00 Elk Creek, 10 ft. wide, course south.  
1,240.00 Elk Creek road, bears N. 7° E. and S. 7° W.

## Feet

- 1,430.98 Cor. No. 2, on line 4-1 A. W. Dahlberg lode of this survey.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. Su-2-M-3-879; from which  
A cedar, 11 ins. diam., bears S. 77° 30' E., 9.0 ft. dist., mkd. Su-2-M-3-879-B T.  
A madrone, 8 ins. diam., bears S. 22° 30' W., 32.0 ft. dist., mkd. Su-2-M-3-879-B T.  
Thence N. 44° 10' W.  
300.00 Intersect lode line.

1,005.93 Elk Creek road, bears N. and S.  
1,390.93 Elk Creek, 8 feet wide, course south.  
1,430.93 Cor. No. 4, which is identical with Cor. No. 2 of the Telluride lode and Cor. No. 3 of the Alabama lode of this survey.  
Thence S. 44° 10' E.  
300.00 Intersect lode line.  
583.12 Witness Cor. No. 1.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for witness Cor. No. 1, mkd. WC-St-1-St-3-M-4-LJ-2-879; from which  
An alder, 16 ins. diam., bears N. 75° W., 40.0 ft. dist., mkd. Su-1-St-3-M-4-LJ-2-879-B T.  
A cedar, 32 ins. diam., bears N. 14° E., 5.0 ft. dist., mkd. Su-1-St-3-M-4-LJ-2-879-B T.  
600.00 Cor. No. 1 and place of beginning.

## STAPLES LODE

- Beginning at Cor. No. 1 of the Staples Lode, which is identical with Cor. No. 2 of the Alabama lode of this survey, from which  
The cor. of secs. 20, 21, 28, and 29, T. 31 S., R. 2 E., W. 1/2 Mer. bears N. 50° 52' W., 338.14 ft. dist.; previously described.  
Thence S. 44° 10' E.  
210.00 East Fork of Elk Creek 3 feet wide, course S. 15° W.  
300.00 Intersect lode line.  
600.00 Cor. No. 2.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. St-2-LJ-3-879; from which  
A cedar, 32 ins. diam., bears N. 4° E., 53.0 ft. dist., mkd. St-2-LJ-3-879-B T.  
A red fir, 20 ins. diam., bears S. 86° W., 12.5 ft. dist., mkd. St-2-LJ-3-879-B T.  
Thence, S. 45° 50' W.  
1,460.00 Cor. No. 3, which is identical with Cor. No. 1 of the Sulphide lode of this survey, and falls in the East Fork of Elk Creek where a monument could not be established.  
Thence N. 44° 10' W.  
16.88 Witness Cor. No. 3, which is identical with Witness Cor. No. 1 of the Sulphide lode of this survey.  
300.00 Intersect lode line.  
600.00 Cor. No. 4, which is identical with Cor. No. 2 of the Telluride lode, Cor. No. 3 of the Alabama lode, and Cor. No. 4 of the Sulphide lode of this survey.  
Thence N. 45° 50' E.  
1,460.00 Cor. No. 1 and place of beginning.

## MANGANESE LODE

Beginning at Cor. No. 1 of the Manganese Lode, where I-  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked M-1-879; from which

Feet

The  $\frac{1}{4}$  sec. cor. between secs 28 and 29, T. 31 S., R. 2 E., Wil. Mer., bears S.  $6^{\circ}44'$  W., 550.13 ft. dist.; previously described.

A sugar pine, 38 ins. diam., bears S.  $78^{\circ}$  E., 22.0 ft. dist., mkd. M-1-879-BT.

A madrone, 9 ins., diam, bears N.  $44^{\circ}$  W., 23.0 ft. dist., mkd. M-1-879-B T.

Thence S.  $45^{\circ}50'$  W.

1, 430.93

Cor. No. 2.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. M-2-879; from which

A sugar pine, 10 ins. diam., bears N.  $65^{\circ}$  W., 12.0 ft. dist., mkd.

M-2-879-B T.

A madrone, 10 ins. diam., bears N.  $15^{\circ}$  E., 25.0 ft. dist., mkd.

M-2-879-B T.

Thence N.  $44^{\circ}10'$  W.

110.00 Elk Creek, 10 feet wide, course S.

300.00 Intersect lode line, Cor. No. 1 of the A. W. Dahlberg lode of this survey.

430.00 Elk Creek road, bears N.  $16^{\circ}$  E. and S.  $16^{\circ}$  W.

480.00 Road, bears northeast and southwest.

600.00 Cor. No. 3, on line 4-1 A. W. Dahlberg lode and identical with Cor. No. 2 of the Sulphide lode of this survey.

Thence N.  $45^{\circ}50'$  E.

190.93 Elk Creek road, bears N.  $7^{\circ}$  E. and S.  $7^{\circ}$  W.

425.93 Elk Creek, 10 feet wide, course S.

920.93 East Fork of Elk Creek, 5 feet wide, course S.  $75^{\circ}$  W.

1,430.93 Cor. No. 4, which is identical with Cor. No. 1 of the Sulphide lode and Cor. No. 3 of the Staples lode of this survey, and falls in the East Fork of Elk Creek, previously described, where a monument could not be established.

Thence S.  $44^{\circ}10'$  E.

300.00 Intersect lode line.

600.00 Cor. No. 1 and place of beginning.

## LA JOLLA LODE

Beginning at Cor. No. 1 of the La Jolla lode, on line 4-1 of the Manganese lode of this survey, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked LJ-1-AV-2-879; from which

The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T. 31 S., R. 2 E., Wil. Mer., bears S.  $10^{\circ}44'$  E., 775.10 ft. dist.; previously described.

A chinquapin, 8 ins. diam., bears N.  $62^{\circ}$  E., 16.0 ft. dist., mkd. LJ-1-AV-2-879-B T.

A madrone, 12 ins. diam., bears S.  $15^{\circ}$  E., 17.5 ft. dist., mkd.

LJ-1-AV-2-879-B T.

Thence N.  $44^{\circ}10'$  W.

150.00 Intersect lode line.

300.00 Cor. No. 2, which is identical with Cor. No. 1 of the Sulphide lode, Cor. No. 3 of the Staples lode and Cor. No. 4 of the Manganese lode of this survey, and falls in a creek, previously described, where a monument could not be established.

Thence N.  $45^{\circ}50'$  E.

1,460.00 Cor. No. 3, which is identical with Cor. No. 2 of the Staples lode of this survey.

Thence S.  $44^{\circ}10'$  E.

150.00 Intersect lode line.

300.00 Cor. No. 4.

Set a cedar post, 48 ins. long 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. LJ-4-AV-3-879; from which

A white fir, 18 ins. diam., bears S.  $70^{\circ}$  E., 33.0 ft. dist., mkd. LJ-4-AV-3-879-B T.

*Feet*                      A hemlock, 13 ins. diam., bears S.53°W., 6.5 ft. dist., mkd.  
                                  LJ-4-AV-3-879-B T.  
                                  Thence S.45°50'W.  
 1,460.00              Cor. No. 1 and place of beginning.

## ARROYO VERDE LODE

Beginning at Cor. No. 1 of the Arroyo Verde Lode, where I—  
 Squared a cedar stump, 20 ins. diam., 18 ins. high, to 6x12 in.  
 marked AV-1-879; from which  
     The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T 31 S., R. 2 E., W. 11 Mer., bears S.39°34'W., 429.55 ft. dist., previously described.  
     A red fir, 30 ins. diam., bears N.3°W., 28.0 ft. dist., mkd AV-1-879-B T.  
     A cedar, 14 ins. diam., bears S.13°W., 44.0 ft. dist., mkd AV-1-879-B T.  
     Thence N.44°10'W.  
 300.00              Intersect lode line; Cor. No. 1 of the Manganese lode of this survey.  
 600.00              Cor. No. 2, on line 4-1 of the Manganese lode and identical with Cor. No. 1 of the La Jolla lode of this survey.  
     Thence N. 45°50'E.  
 1,460.00              Cor. No. 3, which is identical with Cor. No. 4 of the La Jolla lode of this survey.  
     Thence S.44°10'E.  
 300.00              Intersect lode line.  
 600.00              Cor. No. 4.  
     Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. AV-4-879; from which  
     A red fir, 40 ins. diam., bears N.40°W., 20.0 ft. dist., mkd AV-4-879-B T.  
     A hemlock, 18 ins. diam., bears S.53°E., 16.0 ft. dist., mkd AV-4-879-B T.  
     Thence S.45°50'W.  
 1,460.00              Cor. No. 1 and place of beginning.

## LODE LINES

The presumed course of the vein of each of the several lode locations embraced in this survey, counted from the respective points of discovery, is as follows:

Ram lode, S.42°34'E., 20 ft.; and N.42°34'W., 1,431.84 ft.  
 Oro Alto lode, S.44°31'E., 304 ft.; and N.44°31'W., 1,131.10 ft.  
 Oro Rico lode, S.44°31'E., 170 ft.; and N.44°31'W., 1,265.10 ft.  
 Cougar lode, S.45°50'W., 900 ft.; and N.45°50'E., 600 ft.  
 Oro Real lode, S.45°50'W., 510 ft.; and N.45°50'E., 976.59 ft.  
 J. W. Merritt lode, S.45°50'W., 1,240 ft.; and N.45°50'S., 260 ft.  
 Peter Applegate lode, S.45°50'W., 22 ft.; and N.45°50'E., 1,478.00 ft.  
 Oro Escondido lode, S.45°50'W., 1,258.41 ft.; and N.45°50'E., 190.00 ft.  
 W. C. Leever lode, S.45°50'W., 83 ft.; and N.45°50'E., 1,417.00 ft.  
 Mark Applegate lode, S.45°50'W., 1,499.00 ft.; and N.45°50'E., 1.00 ft.  
 H. McKenzie lode, S.45°50'W., 5.00 ft.; and N.45°50'E., 1,481.59 ft.  
 J. L. Grubb lode, S.45°50'W., 1,060.41 ft.; and N.45°50'E., 388 ft.  
 J. D. McKinnon lode, S.45°50'W., 233 ft.; and N.45°50'E., 1,267.00 ft.  
 Henry Applegate lode, S.45°50'W., 1,495.00 ft.; and N.45°50'E., 5.00 ft.  
 A. W. Dahlberg lode, S.44°10'E., 260.00 ft.; and N.44°10'W., 1240.00 ft.  
 Telluride lode, S.45°50'W., 70 ft.; and N.45°50'E., 1,360.93 ft.  
 Alabama lode, S.45°50'W., 8 ft.; and N.45°50'E., 1,452 ft.  
 Rainboe lode, S.44°10'E., 320 ft.; and N.44°10'W., 1,180 ft.  
 Della McKinnon lode, S.44°10'E., 390.00 ft.; and N.44°10'W., 1,110.00 ft.  
 Sulphide lode, S.45°50'W., 787.93 ft.; and N.45°50'E., 643.00 ft.  
 Staples lode, S.45°50'W., 310.00 ft.; and N.45°50'E., 1,150.00 ft.  
 Manganese lode, S.45°50'W., 360 ft.; and N.45°50'E., 1,070.93 ft.  
 La Jolla lode, S.45°50'W., 1,310.00 ft.; and N.45°50'E., 130.00 ft.  
 Arroyo Verde lode, S.45°50'W., 780 ft.; and N.45°50'E., 680.00 ft.

## AREAS

	Acres
Total area, Ram lode.....	19.990
Total area, Oro Alto lode.....	19.767
Total area, Oro Rico lode.....	19.767
Total area, Cougar lode.....	19.980
Total area, Oro Real lode.....	19.801
Total area, J. W. Merritt lode.....	20.402
Total area, Peter Applegate lode.....	20.402
Total area, Oro Escondido lode.....	19.700
Total area, W. C. Leever lode.....	20.402
Total area, Mark Applegate lode.....	20.661
Total area, H. McKenzie lode.....	20.478
Total area, J. L. Grubb lode.....	19.951
Total area, J. D. McKinnon lode.....	20.661
Total area, Henry Applegate lode.....	20.661
Total area, A. W. Dahlberg lode.....	20.661
Total area, Telluride lode.....	19.710
Total area, Alabama lode.....	20.110
Total area, Rainboe lode.....	20.661
Total area, Delia McKinnon lode.....	20.661
Total area, Sulphide lode.....	19.710
Total area, Staples lode.....	20.110
Total area, Manganese lode.....	19.710
Total area, La Jolla lode.....	10.055
Total area, Arroyo Verde lode.....	20.110

## LOCATION

This survey is located in the SE $\frac{1}{4}$  sec. 19, SE $\frac{1}{4}$  and SW $\frac{1}{4}$  sec. 20, SW $\frac{1}{4}$  sec. 21, NW $\frac{1}{4}$  sec. 28, NE $\frac{1}{4}$ , NW $\frac{1}{4}$ , SE $\frac{1}{4}$  and SW $\frac{1}{4}$  sec. 29, and SE $\frac{1}{4}$  sec. 30, of T. 31 S., R. 2 E., of the Willamette Meridian.

The survey of the Ram, Oro Alto, Oro Rico, Cougar, Oro Real, J. W. Merritt, Peter Applegate, Oro Escondido, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, Telluride, Alabama, Rainboe, Delia McKinnon, Sulphide, Staples, Manganese, La Jolla, and Arroyo Verde lodes is identical with the respective location or amended location as marked on the ground.

## EXPENDITURE OF \$500.00

I certify that the value of the labor and improvements made upon or for the benefit of each of the lode locations embraced in said mining claim by the claimant or its grantors is not less than \$500.00, with the exception of the Ram lode, and that said improvements consist of:

No. 1 The discovery cut of the Ram lode, the face of which being the discovery point, is on the lode line 20.00 ft. from the center of line 4-1; 4 ft. wide, 8 ft. face, running N. 42° W., 10 ft. to face.

Value \$100.00

No. 2 A shaft, the center of which bears S. 75°15' E., 395.00 ft. from Cor. No. 2 Ram lode; 4 x 8 ft., 4 ft. deep.

Value \$50.00

No. 3 A cut, the east end of which bears S. 5°30' E., 100.00 ft. from Cor. No. 3 Ram lode; 3 ft. wide, 4 ft. face, running West 18 ft., partly caved.

Value \$50.00

No. 1 The discovery shaft of the Oro Alto lode, the center of which being the discovery point, is on the lode line 1,131.10 ft. from center of line 1-2; 6 x 11 ft., 6 ft. deep, partly caved.

Value \$100.00

No. 2 A cut, the mouth of which bears S. 69° W., 120 ft. from Cor. No. 3 Oro Alto lode; 4 ft. wide, 5 ft. face, running N. 65° W., 13 ft. to face.

Value \$50.00

No. 3 A cut, the mouth of which bears S. 56° W., 100 ft. from Cor. No. 3 Oro Alto lode; 8 ft. wide, 10 ft. face, running N. 64° W., 20 ft. to face, partly caved.

Value \$100.00

No. 4 A cut, the mouth of which bears S. 70° W., 35 ft. from Cor. No. 3 Oro Alto lode; 8 ft. wide, 6 ft. face, running N. 10° W., 20 ft. to face, partly caved.

Value \$75.00

No. 1 Discovery shaft of the Oro Rico lode, the center of which being the discovery point, is on the lode line 1,265.10 ft. from center of line 1-2; 6 x 8 ft. 10 ft. deep, partly caved.

Value \$125.00

No. 2 A tunnel, 6 x 7 ft. in size, the portal of which bears N. 33° 21' E. 321.08 ft. from Cor. No. 4 Oro Rico lode; running N. 81° W., 30 ft. to pt. A, and 50 ft. to breast. At pt. A is a drift 5 x 7 ft. in size, running N. 60° W., 31 ft. to pt. B; thence N. 30° W., 6 ft. to breast.

Value of tunnel and drift \$1,200.00

No. 3 A shaft, the center of which bears N. 23° 30' E., 310 ft. from Cor. No. 4 Oro Rico lode; 6 x 20 ft., 10 ft. deep.

Value \$150.00

No. 4 A cut, the mouth of which bears N. 9° 30' W., 322 ft. from Cor. No. 4 Oro Rico lode; 8 ft. wide, 7 ft. face, running S. 82° W., 17 ft. to face.

Value \$100.00

No. 5 A cut, the mouth of which bears N. 50° 40' E., 280 ft. from Cor. No. 1 Oro Rico lode; 6 ft. wide, 6 ft. face, running N. 5° E., 25 ft. to face, partly caved.

Value \$100.00

No. 1 Discovery shaft of the Cougar lode, the center of which being the discovery point, is on the lode line 900 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 4 x 7 ft., 9 ft. deep, partly caved.

Value \$100.00

No. 2 A cut, the mouth of which is on the lode line of the Cougar lode 835 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 5 ft. wide, 4 ft. face, running west 14 ft. to face.

Value \$50.00

No. 3 A cut, the mouth of which bears N. 63° 50' E., 835 ft. from Cor. No. 1 Cougar lode; 5 ft. wide, 4 ft. face, running N. 80° E., 10 ft. to face, partly caved.

Value \$35.00

No. 4 A cut, the mouth of which bears N. 60° 40' E., 922 ft. from Cor. No. 1 Cougar lode; 4 ft. wide, 4 ft. face, running N. 60° E., 10 ft. to face, partly caved.

Value \$35.00

No. 5 A cut, the mouth of which bears S. 32° 50' E., 295 ft. from Cor. No. 2 Cougar lode; 5 ft. wide, 6 ft. face, running N. 70° W., 13 ft. to face, partly caved.

Value \$40.00

No. 6 A cut, the mouth of which bears S. 35° 15' E., 275 ft. from Cor. No. 2 Cougar lode; 4 ft. wide, 6 ft. face, running N. 77° W., 10 ft. to face.

Value \$35.00

No. 7 A cut, the face of which is on the lode line of the Cougar lode 110 ft. from a point on line 2-3, 280.36 ft. from Cor. No. 2; 6 ft. wide, 6 ft. face, running N. 45° W., 16 ft. to face.

Value \$100.00

No. 8 A cut, the mouth of which bears N. 50° 15' W., 280 ft. from Cor. No. 3 Cougar lode; 5 ft. wide, 10 ft. face, running N. 65° W., 14 ft. to face, partly caved.

Value \$75.00

No. 9 A tunnel, 5x7 ft. in size, the portal of which bears N. 46° E., 400 ft. from Cor. No. 4 Cougar lode; running S. 80° W., 40 ft. to breast, partly caved.

Value \$350.00

No. 1 Discovery shaft of the Oro Real lode, the center of which being the discovery point, is on the lode line 976.59 ft. from a point on line 1-2, 280.36 ft. from Cor. No. 1; 6x12 ft., 8 ft. deep.

Value \$100.00

No. 2 A cut, the mouth of which bears N. 76° E., 500 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 8 ft. face, running N. 45° E., 20 ft. to face, partly caved.

Value \$100.00

No. 3 A tunnel, 6x7 ft. in size, and known as No. 8, the portal of which bears N. 17° 59' W.; 209.35 ft. from Cor. No. 3 Oro Real lode; running N. 52° E., 135 ft. to breast, partly caved.

Value \$2,000.

No. 4 A cut, the mouth of which bears S.  $57^{\circ}30'$  E., 265 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 10 ft. face, running S.  $46^{\circ}$  W., 19 ft. to face.

Value \$125.

No. 5. A cut, the mouth of which bears S.  $30^{\circ}30'$  E., 110 ft. from Cor. No. 1 Oro Real lode; 6 ft. wide, 4 ft. face, running S.  $5^{\circ}$  W., 20 ft. to face.

Value \$50.

No. 1 Discovery cut of the J. W. Merritt lode, the face of which being the discovery point, is on the lode line 260 ft. from a point on line 1-2, 293.02 ft. from Cor. No. 1; 4 ft. wide, 8 ft. face, running N.  $45^{\circ}$  W., 12 ft. to face.

Value \$100.

No. 2 A cut, the mouth of which is on the lode line of the J. W. Merritt lode 185 ft. from a point on line 1-2, 293.02 ft. from Cor. No. 1; 4 ft. wide, 7 ft. face, running N.  $40^{\circ}$  W., 14 ft. to face.

Value \$75.

No. 3 A shaft, the center of which bears S.  $27^{\circ}15'$  E., 290 ft. from Cor. No. 1 J. W. Merritt lode; 4x5 ft., 4 ft. deep, partly caved.

Value \$35.

No. 4 A shaft, the center of which is on the lode line of the J. W. Merritt lode 80 ft. from a point on line 1-2, 293.02 ft. from Cor. No. 1; 4x6 ft. 5 ft. deep.

Value \$50.

No. 1 Discovery shaft of the Peter Applegate lode, the south side of which being the discovery point, is on the lode line 22 ft. from a point on line 4-1, 293.02 ft. from Cor. No. 1; 4x6 ft., 4 ft. deep.

Value \$40.

No. 2 A shaft, the center of which bears S.  $86^{\circ}10'$  E., 380 ft. from Cor. No. 1 Peter Applegate lode; 4x6 ft., 4 ft. deep.

Value \$50.

No. 3 A shaft, the center of which bears S.  $51^{\circ}30'$  E., 270 ft. from Cor. No. 1 Peter Applegate lode; 4x5 ft., 4 ft. deep.

Value \$35.

No. 4 A shaft, the center of which bears N.  $54^{\circ}25'$  E., 1,380 ft. from Cor. No. 1 Peter Applegate lode; 4x8 ft., 6 ft. deep.

Value \$100.

No. 5 A cut, the face of which bears N.  $85^{\circ}$  E., 200 ft. from Cor. No. 1 Peter Applegate lode; 5 ft. wide, 6 ft. face, running N.  $83^{\circ}$  W., 15 ft. to face.

Value \$70.

No. 6 A cut, the mouth of which bears N.  $6^{\circ}10'$  W., 350 ft. from Cor. No. 4 Peter Applegate lode; 5 ft. wide, 4 ft. face, running N.  $5^{\circ}$  E., 16 ft. to face, partly caved.

Value \$60.

No. 1 Discovery cut of the Oro Escondido lode, the center of which being the discovery point, is on the lode line, 1,258.41 ft., from a point on line 4-1, 293.02 ft. from Cor. No. 1; 12 ft. wide, 8 ft. face, running S.  $70^{\circ}$  E., 7 ft. to mouth and N.  $70^{\circ}$  W., 7 ft. to face.

Value \$150.

No. 2 A cut, the mouth of which bears N.  $38^{\circ}$  E., 45 ft. from Cor. No. 4 Oro Escondido lode; 8 ft. wide, 5 ft. face, running N.  $65^{\circ}$  W., 12 ft. to face.

Value \$100.

No. 1 Discovery cut of the W. C. Leever lode, the face of which being the discovery point, is on the lode line, 83 ft. from a point on line 1-2, 300 ft. from Cor. No. 1; 5 ft. wide, 6 ft. face, running W., 15 ft. to face.

Value \$85.

No. 2 A cut, the mouth of which bears N.  $42^{\circ}$  W., 182 ft. from Cor. No. 1 W. C. Leever lode; 4 ft. wide, 6 ft. face, running N.  $55^{\circ}30'$  E., 10 ft. to face.

Value \$60.

No. 3 A cut, the face of which bears N.  $28^{\circ}$  W., 360 ft. from Cor. No. 1 W. C. Leever lode; 12 ft. wide, 8 ft. face, running S.  $53^{\circ}$  W., 15 ft. to face.

Value \$200.

No. 1 Discovery tunnel of the Mark Applegate lode, the center of which being the discovery point is on the lode line, 1,499 ft. from the center of line 4-1; 6 x 7 ft. in size and known as No. 5, the portal of which bears N.  $46^{\circ}36'$  W., 175.46 ft. from Cor. No. 3, Mark Applegate lode, running N.  $41^{\circ}35'$  W., 51.25 ft. to Sta. 2; thence N.  $40^{\circ}05'$  W., 49.7 ft. to Sta. 3, and N.  $61^{\circ}30'$  E., 70.4 ft. to breast. At Sta. 3 a tunnel, 5 x 7 ft. in size, runs N.  $41^{\circ}04'$  W., 49.15 ft. to Sta. 4 and S.  $43^{\circ}32'$  W., 53.15 ft. to breast. At Sta. 4 the tunnel runs N.  $3^{\circ}41'$  E., 21.45 ft. to breast, partly caved.

Value \$3,500.

No. 2 A shaft, the center of which bears S. 11°06' E., 291.63 ft. from Cor. No. 2, Mark Applegate lode; 4 x 6 ft., 10 ft. deep.

Value \$100.

No. 1 Discovery shaft of the H. McKenzie lode, the center of which being the discovery point is on the lode line 1,481.59 ft. from center of line 1-2; 4 x 6 ft., 6 ft. deep.

Value \$75.

No. 2 A shaft, the center of which bears S. 62°30' E., 280 ft. from Cor. No. 4, H. McKenzie lode; 4 x 10 ft., 8 ft. deep.

Value \$100.

No. 3 A tunnel, 5 x 7 ft. in size, known as No. 3, the portal of which bears N. 9°16' E., 321.81 ft. from Cor. No. 3 H. McKenzie lode; running N. 43° W., 12 ft. to Sta. A; thence S. 44° W., 9 ft. to breast, and N. 44° E., 10 ft. to breast. At Sta. A a winze with an inclination of 35° runs N. 40° W., 23 ft. to bottom.

Value of tunnel and winze \$700.

No. 1 Discovery cut of the J. L. Grubb lode, the center of which being the discovery point is on the lode line, 388 ft. from the center of line 4-1; 5 ft. wide, 10 ft. face, running S. 10 ft. to the mouth and N. 10 ft. to face.

Value \$200.

No. 2 A shaft, the center of which bears S. 84° W., 450 ft. from Cor. No. 1, J. L. Grubb lode; 5 x 8 ft., 6 ft. deep.

Value \$75.

No. 3 A cut, the mouth of which bears S. 65°20' W., 587 ft. from Cor. No. 1, J. L. Grubb lode; 5 ft. wide, 6 ft. face, running S. 65° W., 20 ft. to face.

Value \$150.

No. 4 A shaft, the center of which bears S. 63°50' W., 550 ft. from Cor. No. 1, J. L. Grubb lode; 4 x 10 ft., 6 ft. deep.

Value \$75.

No. 5 A cut, the mouth of which bears N. 4°10' W., 265 ft. from Cor. No. 2, J. L. Grubb lode; 16 ft. wide, 12 ft. face, running N. 6 ft. to face.

Value \$125.

No. 1 Discovery shaft of the J. D. McKinnon lode, the center of which being the discovery point is on the lode line 233 ft. from the center of line 1-2; 4 x 6 ft., 8 ft. deep.

Value \$75.

No. 2 A cut, the face of which bears N. 3°10' W., 363 ft. from Cor. No. 1, J. D. McKinnon lode; 5 ft. wide, 10 ft. face, running N. 80° W., 24 ft. to face.

Value \$175.

No. 3 A cut, the mouth of which bears N. 30°15' W., 242 ft. from Cor. No. 1, J. D. McKinnon lode; 4 ft. wide, 4 ft. face, running N. 21° W., 16 ft. to face.

Value \$50.

No. 1 Discovery shaft of the Henry Applegate lode, the center of which being the discovery point is on the lode line, 1,495 ft. from the center of line 4-1; 4 x 6 ft., 7 ft. deep.

Value \$75.

No. 2 A cut, the face of which bears N. 79° E., 372 ft. from Cor. No. 1, Henry Applegate lode; 5 ft. wide, 8 ft. face, running N. 24° E., 27 ft. to face.

Value \$100.

No. 3 A cut, the mouth of which bears N. 73°45' E., 140 ft. from Cor. No. 1, Henry Applegate lode; 4 ft. wide, 5 ft. face, running N. 77° E., 38 ft. to face.

Value \$200.

No. 1 Discovery cut of the A. W. Dahlberg lode, the face of which being the discovery point is on the lode line 260 ft. from the center of line 1-2; 6 ft. wide, 6 ft. face, running N. 19 ft. to face.

Value \$125.

No. 2 A cut, the face of which bears S. 16°05' E., 365 ft. from Cor. No. 4, A. W. Dahlberg lode; 5 ft. wide, 8 ft. face, running N. 61°30' W., 22 ft. to face. At the face of cut is the portal of a tunnel, 5x7 ft. in size, running N. 9° W., 15 ft. to breast.

Value of cut and tunnel \$300.

No. 3 A cut, the face of which bears N. 83° W., 90 ft. from Cor. No. 1, A. W. Dahlberg lode; 6 ft. wide, 5 ft. face, running N. 31° E., 12 ft. to face.

Value \$75.

No. 1 Discovery cut of the Telluride lode, the face of which being the discovery point is on the lode line 1,360.93 ft. from the center of line 1-2; 4 ft. wide, 10 ft. face, running N. 14° W., 10 ft. to face.

Value \$100.

No. 2 A tunnel, 5x7 ft. in size, known as No. 4, the portal of which bears N. 68°54' E., 118.97 ft. from Cor. No. 4 Telluride lode, running north 12 ft. to Sta. 1; thence N. 30°15' E., 15 ft. to Sta. 2; thence N. 3° E., 20 ft. to Sta. 3; thence N. 85° W., 5 ft. to breast, and S. 85° E. 15 ft. to breast.

Value \$830.

No. 3 A cut, the face of which bears S. 33°30' E., 238 ft. from Cor. No. 1 Telluride lode; 6 ft. wide, 5 ft. face, running N. 75°15' W., 12 ft. to face.

Value \$50.

No. 4 A cut, the face of which bears S. 52°10' W., 415 ft. from Cor. No. 2 Telluride lode; 5 ft. wide, 10 ft. face, running N. 50° W., 12 ft. to face.

Value \$60.

No. 1 Discovery cut of the Alabama lode, the center of which being the discovery point is on the lode line 1,452 ft. from the center of line 1-2; 4 ft. wide, 6 ft. face, running N. 15° W., 5 ft. to face and S. 15° E., 5 ft. to mouth.

Value \$75.

No. 2 A cut, the face of which bears S. 31°25' W., 930 ft. from Cor. No. 1 Alabama lode; 5 ft. wide, 7 ft. face, running N. 51°15' W., 16 ft. to face.

Value \$100.

No. 1 Discovery cut of the Rainboe lode, the face of which being the discovery point, is on the lode line 320 ft. from center of line 1-2; 8 ft. wide, 8 ft. face, running N. 63°30' W., 15 ft. to face.

Value \$100.

No. 2 A shaft, the center of which bears N. 7° W., 455 ft. from Cor. No. 2 Rainboe lode; 4x6 ft., 3 ft. deep.

Value \$35.

No. 3 A shaft, the center of which bears N. 15°30' W., 462 ft. from Cor. No. 2 Rainboe lode; 8x8 ft., 4 ft. deep.

Value \$70.

No. 4 A shaft, the center of which bears S. 86° W., 320 ft. from Cor. No. 1 Rainboe lode; 4x6 ft., 5 ft. deep, partly caved.

Value \$60.

No. 5 A cut, the mouth of which bears N. 49°15' W., 574 ft. from Cor. No. 1 Rainboe lode; 5 ft. wide, 10 ft. face, running N. 44° W., 20 ft. to face.

Value \$125.

No. 6 A shaft, the center of which bears N. 51°20' W., 624 ft. from Cor. No. 1 Rainboe lode; 10x8 ft., 6 ft. deep, partly caved.

Value \$100.

No. 1 Discovery cut of the Delia McKinnon lode, the center of which being the discovery point, is on the lode line 390 ft. from the center of line 1-2; 5 ft. wide, 10 ft. face, running S. 71° E., 12 ft. to mouth and N. 71° W., 12 ft. to face.

Value \$165.

No. 2 A shaft, the center of which bears N. 84° W., 450 ft. from Cor. No. 1 Delia McKinnon lode; 6x6 ft., 5 ft. deep.

Value \$60.

No. 3 A cut, the face of which bears S. 80° W., 310 ft. from Cor. No. 1 Delia McKinnon lode; 4 ft. wide, 4 ft. face, running N. 5° W., 20 ft. to face, partly caved.

Value \$75.

No. 4 A shaft, the center of which is on the lode line 134 ft. from the center of line 1-2 Delia McKinnon lode; 4x8 ft., 4 ft. deep.

Value \$50.

No. 5 A cut, the face of which bears N. 48°15' W., 410 ft. from Cor. No. 1 Delia McKinnon lode; 8 ft. wide, 10 ft. face, running N. 76°30' W., 15 ft. to face.

Value \$75.

No. 6 A cut, the mouth of which bears N. 56° W., 582 ft. from Cor. No. 1 Delia McKinnon lode; 5 ft. wide, 10 ft. face, running N. 74° W., 22 ft. to face.

Value \$100.

No. 1 Discovery shaft of the Sulphide lode, the center of which being the discovery point, is on the lode line 643 ft. from the center of line 4-1; 4x11 ft., 4 ft. deep.

Value \$50.

No. 2 A shaft, the center of which bears N. 16°10' E., 528 ft. from Cor. No. 2 Sulphide lode; 5x8 ft., 10 ft. deep.

Value \$100.

No. 3 A shaft, the center of which bears N. 67° E., 700 ft. from Cor. No. 3 Sulphide lode; 4x10 ft., 6 ft. deep.

Value \$75.

No. 4 A shaft, the center of which bears N.65°45'E., 742 ft. from Cor. No. 3 Sulphide lode; 6x9 ft., 7 ft. deep.

Value \$75.

No. 5 A shaft, the center of which bears S.22°W., 724 ft. from Cor. No. 4 Sulphide lode; 4x8 ft., 3 ft. deep, partly caved.

Value \$35.

No. 6 A shaft, the center of which bears N.0°32'W., 287.51 ft. from Cor. No. 2 Sulphide lode; 5x10 ft., 10 ft. deep.

Value \$125.

No. 7 A cut, the face of which bears S.18°05'W., 780 ft. from Cor. No. 4 Sulphide lode; 4 ft. wide, 5 ft. face, running N.5°E., 20 ft. to face.

Value \$60.

No. 8 A cut, the face of which bears S.18°15'W., 847 ft. from Cor. No. 4 Sulphide lode; 5 ft. wide, 6 ft. face, running North 16 ft. to face.

Value \$60.

No. 9 A cut, the face of which bears S. 20° E., 73 ft. from Cor. No. 4, Sulphide lode; 5 ft. wide, 10 ft. face, running S. 83° 30' E., 7 ft. to face, partly caved.

Value \$50.

No. 1 Discovery cut of the Staples lode, the face of which being the discovery point, is on the lode line 1,150 ft. from the center of line 1-2; 6 ft. wide, 10 ft. face, running N. 64° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which bears S. 61° W., 718 ft. from Cor. No. 2, Staples lode; 6 ft. wide, 5 ft. face, running N. 45° E., 12 ft. to face, partly caved.

Value \$75.

No. 3 A cut, the face of which bears S. 55° E., 75 ft. from Cor. No. 4, Staples lode; 12 ft. wide, 10 ft. face, running S. 72° E., 7 ft. to face.

Value \$100.

No. 1 Discovery cut of the Manganese lode, the face of which being the discovery point, is on the lode line 1,070.98 ft. from the center of line 4-1; 5 ft. wide, 9 ft. face, running North 7 ft. to face.

Value \$60.

No. 2 A cut, the face of which is on the lode line 1,010 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 4 ft. face, running N. 88° W., 8 ft. to face.

Value \$40.

No. 3 A cut, the face of which is on the lode line 818 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 7 ft. face, running N. 5° W., 12 ft. to face.

Value \$75.

No. 4 A cut, the face of which bears S. 61° 30' W., 860 ft. from Cor. No. 1, Manganese lode; 5 ft. wide, 2 ft. face, running N. 34° W., 15 ft. to face.

Value \$35.

No. 1 Discovery cut of the La Jolla lode, the face of which being the discovery point, is on the lode line 1,330 ft. from the center of line 1-2; 8 ft. wide, 6 ft. face, running N. 46° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which is on the lode line 90 ft. from the center of line 3-4, La Jolla lode; 12 ft. wide, 5 ft. face, running N. 46° E., 6 ft. to face.

Value \$65.

No. 3 A shaft, the center of which bears S. 31° 30' E., 82 ft. from Cor. No. 3, La Jolla lode; 5 x 6 ft., 8 ft. deep.

Value \$75.

No. 1 Discovery cut of the Arroyo Verde lode, the center of which being the discovery point, is on the lode line 780 ft. from the center of line 1-2; 8 ft. wide, 10 ft. face, running S. 5° W., 8 ft. to mouth and N. 5° E., 8 ft. to face.

Value \$150.

A common improvement described as follows:

No. 1 A tunnel, 6x7 ft. in size, known as No. 2, the portal of which bears N. 53°39' W., 772.12 ft. from Cor. No. 1 A. W. Dahlberg lode, running N. 51°17' W., 28 ft. to Sta. A1; thence N. 33°32' W., 24 ft. to pt. AX and 40.44 ft. to Sta. A2, and North 25 ft. to pt. X. At pt. X a drift, 5x7 ft. in size, runs N. 40° W., 30 ft. to breast. At pt. AX a crosscut, 5x7 ft. in size, runs West 20 ft. to breast. At Sta. A2 a tunnel, 6x7 ft. in size, runs N. 39°35' W., 66.26 ft. to Sta. A3; thence N. 59°49' W., 38.82 ft. to Sta. A4; thence N. 66°37' W., 121.45 ft. to Sta. A5; thence N. 78°38' W., 170.33 ft. to Sta. A6; thence N. 41°45' W., 179.05 ft. to Sta. A7; thence N. 39°04' W., 71.22 ft. to Sta. A8; thence N. 33°40' W., 62.05 ft. to Sta. A9; thence N. 44°52' W., 129.74 ft. to Sta. A10; thence N. 44°52' W., 141.00

ft. to pt. X1 and 215.56 ft. to Sta. A15. At Sta. A10 a crosscut, 10x7 ft. in size, runs N. 42°09' E., 9.73 ft. to Sta. A16 and a crosscut, 6x7 ft. in size, runs S. 38° W., 13 ft. to Sta. A11; thence S. 72° W., 25 ft. to Sta. A12; thence S. 60° W., 105 ft. to Sta. A13; thence S. 48° W., 61 ft. to breast. At Sta. A16 a drift, 6x7 ft. in size, runs N. 39°51' W., 10 ft. to pt. D and 140 ft. to Sta. Y. This drift also runs S. 54°45' E., 23 ft. to breast. A crosscut, 6x7 ft. in size, beginning at Sta. A16 runs N. 52°30' E., 30 ft. to breast. Pt. D is at the beginning of No. 1 stope which averages 38 ft. long, 5 ft. wide and 125 ft. high. At pt. X1 a crosscut, 8x7 ft. in size, runs N. 40° E., 25 ft. and connects with the drift at Sta. Y. At Sta. A15 a drift, 7x7 ft. in size, runs N. 50°30' W., 21.92 ft. to Sta. A18, and a crosscut, 10x7 ft. in size, runs N. 27°27' E., 15 ft. to Sta. A17. At Sta. A17 a drift, 8x7 ft. in size, runs N. 45° W., 15 ft. to breast; a crosscut, 6x7 ft. in size, runs N. 41° E., 24 ft. to a caved breast, and a drift, 6x7 ft. in size, runs S. 38° E., 15 ft. to breast. Sta. A17 is below a two compartment raise 5x10 ft. in size, running up 30 ft. to stope No.4, which averages 30 ft. long, 5 ft. wide and 30 ft. high. Sta. Y is in the center of stope 2-3 which averages 55 ft. long, 5 ft. wide and 150 ft. high. At Sta. Y a drift, 7x7 ft. in size, runs N. 40° W., 44 ft. to Sta. Z; thence N. 70° W., 30 ft. to Sta. A17. At Sta. A18 a drift, 6x7 ft. in size, runs N. 25°31' W., 36.29 ft. to Sta. A19; thence N. 38° W., 22.34 ft. to Sta. A20, and N. 16°35' E., 40 ft. to the breast of a crosscut, 5x7 ft. in size. Sta. A19 is the beginning of stope No. 5, which averages 35 ft. long, 5 ft. wide, and 50 ft. high. At Sta. A20 a drift, 6x7 ft. in size, runs N. 40°11' W., 62.85 ft. to Sta. A21; thence N. 30°30' W., 60.29 ft. to Sta. A22. A crosscut, 5x7 ft. in size, which begins at Sta. A21 runs S. 57° W., 50 ft. to breast, partly filled. Sta. A21 is at the beginning of stope 6-7 which averages 30 ft. long, 5 ft. wide and 110 ft. high. Sta. A22 is below the center of stope No. 8, which averages 40 ft. long, 5 ft. wide, and 55 ft. high. At Sta. A22 a drift, 6x7 ft. in size, runs N. 25°15' W., 38.92 ft. to Sta. A23; thence N. 32° W., 80.82 ft. to Sta. A24; thence N. 36°25' W., 53.6 ft. to breast. Sta. A23 is at the beginning of stope No. 9 which averages 22 ft. long, 5 ft. wide, and 55 ft. high.

No. 2. A tunnel, 6x7 ft. in size, known as No. 1, the portal of which bears S.29°03'W., 521.02 ft. from Cor. No. 2 Peter Applegate lode, running S.74°48'E., 176 ft. to Sta. B3; thence S.73°57'E., 112.73 ft. to Sta. B4; thence N.75°13'E., 527.43 ft. to Sta. B5; thence N.77°37'E., 53.5 ft. to breast. At Sta. B5 a drift, 7x7 ft. in size, runs N.47°16'W., 20 ft. to pt. A and 87.5 ft. to Sta. B6. Pt. A is at the top of a raise, 5x8 ft. in size, which comes up from stope No. 4 and connects with No. 2 tunnel at Sta. A17. The raise has a length of 290 ft. and partly timbered. At Sta. B6 a drift, 7x7 ft. in size, runs N.33°07'W., 29.91 ft. to Sta. B7; thence N.46°00'W., 27.6 ft. to Sta. B8; thence N.28°19'W., 19 ft. to breast. At Sta. B5 a drift, 7x7 ft. in size, runs S.37°17'E., 45 ft. to pt. B and 100 ft. to breast. A stope, the center of which is above pt. B, averages 80 ft. long, 5 ft. wide and 60 ft. high. Pt. B is also the center of a stope, below the level, which averages 43 ft. long, 5 ft. wide, 50 ft. deep and connects with the raise between tunnels No. 1 and No. 2.

No. 3. A tunnel, 5x7 ft. in size, known as No. 6, the portal of which bears N.49°41'E., 9.37 ft. from Cor. No. 4, H. McKenzie lode, running S.66°20'E., 52 ft. to pt. 1 and 107 ft. to Sta. 2. At pt. 1 a crosscut, 5x7 ft. in size, runs S.25°E., 22 ft. to breast. At Sta. 2 a crosscut, 5x7 ft. in size, runs N.33°E., 11 ft. to the top of a raise, 5x7 ft. in size, which connects with the top of the stope above tunnel No. 1. The raise has a length of 65 ft. At Sta. 2 a 5x7 ft. drift runs S.47°05'E., 63 ft. to Sta. 3; thence S.30°30'E., 30 ft. to Sta. 4; thence S.40°E., 46 ft. to Sta. 5. At Sta. 4 a crosscut, 5x7 ft. in size, runs S.69°W., 48 ft. to breast. At Sta. 5 a cross, 5x7 ft. in size, runs N.38°45'E., 116 ft. to breast; another 5x7 ft. crosscut runs N.83°55'E., 31 ft. to breast, and a drift, 5x7 ft. in size, runs S.4°W., 16 ft. to breast.

Value of tunnels, drifts, raises, crosscuts and stopes \$63,500.

The major portion of this improvement was made when the claimant had only ten of the lodes of this survey, as follows: J. W. Merritt, Peter Applegate, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, and Della McKinnon. The remainder of the improvement has been made by the claimant since all of the lodes of this survey have been located, with the exception of the Ram.

Value of improvement for the benefit of 10 lodes \$55,000.

Value of one-tenth interest \$5,500.

Value of improvement for the benefit of 23 lodes \$8,500.

Value of one-twenty third interest \$369.

No. 4 A shaft, the center of which bears N.65°45'E., 742 ft. from Cor. No. 3 Sulphide lode; 6x9 ft., 7 ft. deep.

Value \$75.

No. 5 A shaft, the center of which bears S.22°W., 724 ft. from Cor. No. 4 Sulphide lode; 4x8 ft., 3 ft. deep, partly caved.

Value \$35.

No. 6 A shaft, the center of which bears N.0°32'W., 287.51 ft. from Cor. No. 2 Sulphide lode; 5x10 ft., 10 ft. deep.

Value \$125.

No. 7 A cut, the face of which bears S.18°05'W., 780 ft. from Cor. No. 4 Sulphide lode; 4 ft. wide, 5 ft. face, running N.5°E., 20 ft. to face.

Value \$60.

No. 8 A cut, the face of which bears S.18°15'W., 847 ft. from Cor. No. 4 Sulphide lode; 5 ft. wide, 6 ft. face, running North 16 ft. to face.

Value \$60.

No. 9 A cut, the face of which bears S. 20° E., 73 ft. from Cor. No. 4, Sulphide lode; 5 ft. wide, 10 ft. face, running S. 83° 30' E., 7 ft. to face, partly caved.

Value \$50.

No. 1 Discovery cut of the Staples lode, the face of which being the discovery point, is on the lode line 1,150 ft. from the center of line 1-2; 6 ft. wide, 10 ft. face, running N. 64° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which bears S. 61° W., 718 ft. from Cor. No. 2, Staples lode; 6 ft. wide, 5 ft. face, running N. 45° E., 12 ft. to face, partly caved.

Value \$75.

No. 3 A cut, the face of which bears S. 55° E., 75 ft. from Cor. No. 4, Staples lode; 12 ft. wide, 10 ft. face, running S. 72° E., 7 ft. to face.

Value \$100.

No. 1 Discovery cut of the Manganese lode, the face of which being the discovery point, is on the lode line 1,070.98 ft. from the center of line 4-1; 5 ft. wide, 9 ft. face, running North 7 ft. to face.

Value \$60.

No. 2 A cut, the face of which is on the lode line 1,010 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 4 ft. face, running N. 88° W., 8 ft. to face.

Value \$40.

No. 3 A cut, the face of which is on the lode line 818 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 7 ft. face, running N. 5° W., 12 ft. to face.

Value \$75.

No. 4 A cut, the face of which bears S. 61° 30' W., 800 ft. from Cor. No. 1, Manganese lode; 5 ft. wide, 2 ft. face, running N. 34° W., 15 ft. to face.

Value \$35.

No. 1 Discovery cut of the La Jolla lode, the face of which being the discovery point, is on the lode line 1,330 ft. from the center of line 1-2; 8 ft. wide, 6 ft. face, running N. 46° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which is on the lode line 90 ft. from the center of line 3-4, La Jolla lode; 12 ft. wide, 5 ft. face, running N. 46° E., 6 ft. to face.

Value \$65.

No. 3 A shaft, the center of which bears S. 31° 30' E., 82 ft. from Cor. No. 3, La Jolla lode; 5 x 6 ft., 8 ft. deep.

Value \$75.

No. 1 Discovery cut of the Arroyo Verde lode, the center of which being the discovery point, is on the lode line 780 ft. from the center of line 1-2; 8 ft. wide, 10 ft. face, running S. 5° W., 8 ft. to mouth and N. 5° E., 8 ft. to face.

Value \$150.

A common improvement described as follows:

No. 1 A tunnel, 6x7 ft. in size, known as No. 2, the portal of which bears N. 53°39' W., 772.12 ft. from Cor. No. 1 A. W. Dahlberg lode, running N. 51°17' W., 28 ft. to Sta. A1; thence N. 33°32' W., 24 ft. to pt. AX and 40.44 ft. to Sta. A2 and North 25 ft. to pt. X. At pt. X a drift, 5x7 ft. in size, runs N. 40° W., 30 ft. to breast. At pt. AX a crosscut, 5x7 ft. in size, runs West 20 ft. to breast. At Sta. A2 a tunnel, 6x7 ft. in size, runs N. 30°35' W., 66.26 ft. to Sta. A3; thence N. 59°49' W., 38.82 ft. to Sta. A4; thence N. 60°37' W., 121.45 ft. to Sta. A5; thence N. 78°38' W., 170.33 ft. to Sta. A6; thence N. 41°45' W., 179.05 ft. to Sta. A7; thence N. 39°04' W., 71.22 ft. to Sta. A8; thence N. 33°40' W., 62.05 ft. to Sta. A9; thence N. 44°52' W., 129.74 ft. to Sta. A10; thence N. 44°52' W., 141.06

ft. to pt. X1 and 215.56 ft. to Sta. A15. At Sta. A10 a crosscut, 10x7 ft. in size, runs N. 42° 00' E., 9.73 ft. to Sta. A16 and a crosscut, 6x7 ft. in size, runs S. 38° W., 13 ft. to Sta. A11, thence S. 72° W., 25 ft. to Sta. A12; thence S. 00° W., 105 ft. to Sta. A13, thence S. 48° W., 61 ft. to breast. At Sta. A16 a drift, 6x7 ft. in size, runs N. 30° 51' W., 10 ft. to pt. D and 140 ft. to Sta. Y. This drift also runs S. 54° 45' E., 23 ft. to breast. A crosscut, 6x7 ft. in size, beginning at Sta. A16 runs N. 52° 00' E., 30 ft. to breast. Pt. D is at the beginning of No. 1 stope which averages 38 ft. long, 5 ft. wide and 125 ft. high. At pt. X1 a crosscut, 8x7 ft. in size, runs N. 40° E., 25 ft. and connects with the drift at Sta. Y. At Sta. A15 a drift, 7x7 ft. in size, runs N. 50° 30' W., 21.92 ft. to Sta. A18, and a crosscut, 10x7 ft. in size, runs N. 27° 27' E., 15 ft. to Sta. A17. At Sta. A17 a drift, 8x7 ft. in size, runs N. 45° W., 15 ft. to breast; a crosscut, 6x7 ft. in size, runs N. 41° E., 24 ft. to a caved breast, and a drift, 6x7 ft. in size, runs S. 38° E., 15 ft. to breast. Sta. A17 is below a two-compartment raise 5x10 ft. in size, running up 30 ft. to stope No. 4, which averages 30 ft. long, 5 ft. wide and 30 ft. high. Sta. Y is in the center of stope 2-3 which averages 55 ft. long, 5 ft. wide and 150 ft. high. At Sta. Y a drift, 7x7 ft. in size, runs N. 40° W., 44 ft. to Sta. Z, thence N. 70° W., 30 ft. to Sta. A17. At Sta. A18 a drift, 6x7 ft. in size, runs N. 25° 41' W., 36.29 ft. to Sta. A19, thence N. 38° W., 22.34 ft. to Sta. A20, and N. 16° 45' E., 40 ft. to the breast of a crosscut, 5x7 ft. in size. Sta. A19 is the beginning of stope No. 5, which averages 35 ft. long, 5 ft. wide, and 50 ft. high. At Sta. A20 a drift, 6x7 ft. in size, runs N. 40° 11' W., 62.85 ft. to Sta. A21, thence N. 30° 30' W., 90.25 ft. to Sta. A22. A crosscut, 5x7 ft. in size, which begins at Sta. A21 runs S. 57° W., 50 ft. to breast, partly filled. Sta. A21 is at the beginning of stope 6-7 which averages 30 ft. long, 5 ft. wide and 110 ft. high. Sta. A22 is below the center of stope No. 8, which averages 40 ft. long, 5 ft. wide, and 55 ft. high. At Sta. A22 a drift, 6x7 ft. in size, runs N. 25° 15' W., 38.92 ft. to Sta. A23, thence N. 32° W., 80.82 ft. to Sta. A24, thence N. 36° 25' W., 116 ft. to breast. Sta. A23 is at the beginning of stope No. 9 which averages 22 ft. long, 5 ft. wide, and 55 ft. high.

No. 2. A tunnel, 6x7 ft. in size, known as No. 1, the portal of which bears S. 29° 03' W., 521.02 ft. from Cor. No. 2 Peter Applegate hole, running S. 74° 48' E., 176 ft. to Sta. B3; thence S. 73° 57' E., 112.73 ft. to Sta. B4; thence N. 75° 13' E., 525.43 ft. to Sta. B5, thence N. 77° 37' E., 53.5 ft. to breast. At Sta. B5 a drift, 7x7 ft. in size, runs N. 67° 16' W., 20 ft. to pt. A and 87.5 ft. to Sta. B9. Pt. A is at the top of a raise, 5x8 ft. in size, which comes up from stope No. 4 and connects with No. 2 tunnel at Sta. A17. The raise has a length of 200 ft. and partly timbered. At Sta. B9 a drift, 7x7 ft. in size, runs N. 31° 07' W., 20.91 ft. to Sta. B7; thence N. 46° 00' W., 27.0 ft. to Sta. B8; thence N. 28° 19' W., 10 ft. to breast. At Sta. B5 a drift, 7x7 ft. in size, runs S. 37° 17' E., 45 ft. to pt. B and 100 ft. to breast. A stope, the center of which is above pt. B, averages 80 ft. long, 5 ft. wide and 90 ft. high. Pt. B is also the center of a stope, below the level, which averages 43 ft. long, 5 ft. wide, 50 ft. deep and connects with the raise between tunnels No. 1 and No. 2.

No. 3. A tunnel, 5x7 ft. in size, known as No. 6, the portal of which bears N. 49° 41' E., 9.47 ft. from Cor. No. 4, H. McKenzie hole, running S. 06° 20' E., 52 ft. to pt. 1 and 107 ft. to Sta. 2. At pt. 1 a crosscut, 5x7 ft. in size, runs S. 25° E., 22 ft. to breast. At Sta. 2 a crosscut, 5x7 ft. in size, runs N. 33° E., 11 ft. to the top of a raise, 5x7 ft. in size, which connects with the top of the stope above tunnel No. 1. The raise has a length of 65 ft. At Sta. 2 a 5x7 ft. drift runs S. 47° 06' E., 63 ft. to Sta. 3; thence S. 30° 30' E., 30 ft. to Sta. 4; thence S. 40° E., 46 ft. to Sta. 5. At Sta. 4 a crosscut, 5x7 ft. in size, runs S. 62° W., 48 ft. to breast. At Sta. 5 a cross, 5x7 ft. in size, runs N. 38° 45' E., 116 ft. to breast; another 5x7 ft. crosscut runs N. 83° 55' E., 31 ft. to breast, and a drift, 5x7 ft. in size, runs S. 4° W., 16 ft. to breast.

Value of tunnels, drifts, raises, crosscuts and stopes \$63,500.

The major portion of this improvement was made when the claimant had only ten of the holes of this survey, as follows: J. W. Merritt, Peter Applegate, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, and Della McKinnon. The remainder of the improvement has been made by the claimant since all of the holes of this survey have been located, with the exception of the Ram.

Value of improvement for the benefit of 10 lodes \$55,000.

Value of one-tenth interest \$5,500.

Value of improvement for the benefit of 23 lodes \$8,500.

Value of one-twenty third interest \$369.

The rock formation covered by the lode claims of this survey is intensely sheared and has a widespread mineralization. The drifts, crosscuts and slopes described in this common development were constructed to further develop the whole area. In order to determine the quantity of the contained minerals the rock extracted in this development was milled on the ground in the flotation plant of the claimant.

Five hundred dollars or over has been expended in this improvement in such a manner as tends to the development of each lode of this survey, except the Ram lode, subsequent to its location and to the time since which common ownership and contiguity have prevailed; therefore an undivided one-twenty third interest in its value is hereby credited to each of the said lodges.

The Ram lode now has a deficiency of \$300 in the required development. Except as above stated, no portion of or interest in this improvement has been credited heretofore as patent expenditure to any lode claim.

#### OTHER IMPROVEMENTS

A frame assay office, the east corner of which bears N.43°02'W., 511.08 ft. from Cor. No. 1, A. W. Dahlberg lode; 14x17 ft. in size, the long side bears S.31°30'W. Claimant herein.

A frame tank shed, the east corner of which bears N.47°08'W., 478.8 ft. from Cor. No. 1, A. W. Dahlberg lode; 10x38 ft. in size, the long side bears N.58°30'W. Claimant herein.

A frame building which houses a flotation mill and a diesel power plant. The east corner of the building bears N.49°14'W., 523.42 ft. from Cor. No. 1, A. W. Dahlberg lode; 56x80 ft. in size, the long side bears N.58°30'W. Claimant herein.

A frame concentrate drying shed, the south corner of which bears N.52°28'W., 497.36 ft. from Cor. No. 1, A. W. Dahlberg lode; 12x16 ft. in size, the long side bears N.31°30'W.

Claimant herein.

A frame shop and timber shed, the south corner of which bears N.55°24'W., 726.02 ft. from Cor. No. 1, A. W. Dahlberg lode; 80x42 ft. in size, the long side bears N.37°30'E.

Claimant herein.

A frame and log office and storehouse, the NE. corner of which bears N.57°40'W., 187 ft. from Cor. No. 1, A. W. Dahlberg lode; 18x52 ft. in size; the long side bears S.25°15'W.

Claimant herein.

A frame boarding house, the NE. corner of which bears N.83°30'W., 192 ft. from Cor. No. 1, A. W. Dahlberg lode; 18x38 ft. in size; the long side bears S.25°W.

Claimant herein.

A frame bunk house, the NE. corner of which bears S.85°W., 210 ft. from Cor. No. 1, A. W. Dahlberg lode; 17x32 ft. in size; the long side bears S.25°W.

Claimant herein.

A frame bunk house, the NE. corner of which bears S.63°50'W., 212 ft. from Cor. No. 1, A. W. Dahlberg lode; 14x20 ft. in size; the long side bears S.20°W.

Claimant herein.

A frame bunk house, the NE. corner of which bears S.56°W., 265 ft. from Cor. No. 1, A. W. Dahlberg lode; 14x16 ft. in size; the long side bears S.38°W.

Claimant herein.

## DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE

### FINAL OATH OF MINERAL SURVEYOR

I, G. Cleveland Taylor, mineral surveyor, do solemnly swear that, in pursuance of instructions received from the regional cadastral engineer, at Portland Oreg., dated October 15, 1946, I have, in strict conformity to the laws of the United States, the official regulations and instructions thereunder, and the instructions of said regional cadastral engineer, faithfully and correctly executed the survey of the mining claim of Al Sarena Mines, Inc., known as the Al Sarena group, situate in Elk Creek (unorganized) Mining District, Jackson County, Oreg., in sections 19, 20, 21, 28, 29, 30, T. 31 S., R. 2 E., Willamette meridian and designated as survey No. 879, as represented in the foregoing field notes, which accurately show the boundaries of said mining claim as distinctly marked by monuments on the ground, and described in the attached copy of the location certificate, which was received by me from the regional cadastral engineer with said instructions, and that all corners of said survey have been established and perpetuated in strict accordance with the law, official regulations and instructions thereunder; and I do further solemnly swear that the foregoing are the true and original field notes of said survey and my report therein, and that the labor expended and improvements made upon said mining claim by claimant or its grantors are as therein fully stated, and that the character, extent, location, and itemized value thereof are specified therein with particularity and full detail, and that no portion of said labor or improvements so credited to this claim has been included in the estimate of expenditures upon any other claim.

G. CLEVELAND TAYLOR,

*Mineral Surveyor*

Subscribed and sworn to by the said G. Cleveland Taylor, mineral surveyor before me, a notary public, this 4th day of March 1948.

[SEAL]

I. G. PICKENS,

*Notary Public for Oregon.*

My commission expires December 9, 1951.

## CERTIFICATE OF APPROVAL OF FIELD NOTES AND SURVEY OF MINING CLAIM

UNITED STATES DEPARTMENT OF THE INTERIOR,

BUREAU OF LAND MANAGEMENT,

PUBLIC SURVEY OFFICE,

Portland, Oreg., September 7, 1948

I, regional cadastral engineer at Portland, Oreg., do hereby certify that the foregoing and hereto attached field notes and return of the survey of the mining claim of Al Sarena Mines, Inc., known as the Al Sarena group, situate in Elk Creek (unorganized) mining district in sections 19, 20, 21, 28, 29, and 30, T. 31 S., R. 2 E., Willamette meridian, designated as survey No. 879, executed by G. Cleveland Taylor, mineral surveyor, May 12 to August 6, 1948, under my instructions dated October 15, 1946, have been critically examined and the necessary corrections and explanations made, and the said field notes and return and the survey they describe, are hereby approved. The certified copy of the

location certificate filed by the applicant for survey is on file in this office and a true copy of said certified copy of said location certificate is included and made a part of the transcript of the field notes.

JOSEPH A. GANONG,  
*Regional Cadastral Engineer.*

# REGIONAL CADASTRAL ENGINEER'S FINAL CERTIFICATE ON FIELD NOTES

DEPARTMENT OF THE INTERIOR,  
PUBLIC SURVEY OFFICE,  
*Portland, Oreg., September 27, 1948.*

I, regional cadastral engineer at Portland, Oreg., do hereby certify that the foregoing transcript of the field notes, return and approval of the survey of the mining claim of Al Sarena Mines, Inc., known as the Al Sarena Group, situate in Elk Creek (unorganized) Mining District Jackson County, Oreg., in sections 19, 20, 21, 28, 29, and 30, T. 31 S., R. 2 E., Willamette meridian, and designated as survey No. 879, has been correctly copied from the originals on file in this office; that said field notes furnish such an accurate description of said mining claim as will, if incorporated into a patent, serve fully to identify the premises, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the locus thereof.

I further certify that \$500 worth of labor has been expended or improvements made upon, or for the benefit of, each location embraced in said mining claim by claimant or its grantors.

I further certify that the plat thereof, filed in the Oregon District Land Office at Portland, Oreg., is correct and in conformity with the foregoing field notes.

JOSEPH A. GANONG,  
*Regional Cadastral Engineer.*

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
*Washington 25, D. C., February 15, 1956*

U adjustments, Rogue River Mining Claims, Al Sarena.

Hon. CLARE E. HOFFMAN,  
*House of Representatives.*

DEAR CONGRESSMAN HOFFMAN: This will acknowledge receipt of your request of February 14 for certain correspondence in connection with the Al Sarena mining claims.

I am glad to enclose copies of the memoranda you requested of June 3 and July 14, 1955. The information from Mr. Hattan referred to in the memo of June 3 was not obtained in writing, but insofar as we have been able to learn was given verbally by Mr. Hattan to Mr. Folsom.

Sincerely yours,

RICHARD E. MCARDLE, *Chief.*

JUNE 3, 1955.

Division of Timber Management.  
Recreation and lands, Frank B. Folsom.

U adjustments—Rogue River mining claims, Al Sarena.

Mr. Hattan of BLM advised that a recent visit to the Al Sarena mine indicated a possible timber trespass.

They observed that about 5 acres of the Rhyolite claim (one which was not included in the group of 23 claims for which patent was issued) was logged over and logging roads crossed on other parts of the claim. The boundaries of this claim are common to the surrounding claims which have been patented. These common boundaries have been established by mineral surveys which are prerequisite to application for patent. This information has been passed on to the supervisor who is making a check of the situation to determine the facts.

FRANK B. FOLSOM.

JULY 14, 1955.

Forest Supervisor.

District ranger, Union Creek.

U adjustments, Al Sarena Mines.

Reference is made to your memorandum of June 27, 1955.

The unpatented claim named Riolite lying within the general area covered in Mineral Survey No. 879, Oregon, was checked on July 13, 1955 by George W. Kansky.

The  $\frac{1}{4}$  Sec. Cor. for Sections 20 and 29 T. 31 S., R. 2 E was located on the ground, and the surveyed boundary lines for the claims adjoining Riolite were located and examined.

There is no timber trespass on the unpatented claim as of this date. It is apparent that the cutover land which is seen looking eastward from the Bitterlick road is on patented claims.

GEORGE W. KANSKY.

# TWO TIMBER SALES ADJACENT TO AL SARENA MINES—MAP SHOWING LOCATION AND TOPOGRAPHICAL MAP OF AREA

## SUNSHINE CREEK SALE

### Facts:

This sale was made the same week of the Al Sarena patent grant.

The sale as in sections adjoining the Al Sarena mine.

The timber species are essentially the same as those on the mine property.

The weighted average price, including Sugar Pine was only \$10.79 per thousand board feet.

Excluding the Sugar Pine, the weighted average was \$8.24 MBF.

Leavengood of Forest Service testified in Portland hearings, page 87, that the net merchantable timber stand on the Al Sarena claims was 25 MBF per acre.

The 15 contested Al Sarena claims contained 292 acres.

Timber volume on contested claims— $292 \times 25 \times \$10.79 = \$78,659$ —not \$635,000.

Sunshine Creek Sale—Steve O. Wilson—February 9, 1954: Twp. 31 S., R. 2 E. Secs. 2, 3, 4, 9, 10, 11, 12, 14, 16. T. 30 S., R. 2 E., Sec. 34:

Species	Volume, MBF	Appraised price per MBF	Bid price per MBF
DF.....	15,900	\$10.35	\$10.35
IC.....	600	5.90	5.90
WF & O.....	11,200	4.40	4.40
SP & O.....	3,900	29.10	29.10
Total.....	31,600	329.875	329.875

Weighted average  $\frac{329,875}{31,600} = \$10.79$  per MBF.

## JIM CREEK SALE

### Facts:

This sale was made  $3\frac{1}{2}$  years after Al Sarena Mines filed application for patent.

The sale was in sections adjoining the Al Sarena Mine.

The timber species were essentially the same as those on the Al Sarena contested claims.

The weighted average price, including Sugar Pine, was \$11.59 per thousand board feet.

No. 2 A shaft, the center of which bears S. 11°06' E., 291.68 ft. from Cor. No. 2, Mark Applegate lode; 4 x 6 ft., 10 ft. deep.

Value \$100.

No. 1 Discovery shaft of the H. McKenzie lode, the center of which being the discovery point is on the lode line 1,481.59 ft. from center of line 1-2; 4 x 6 ft., 6 ft. deep.

Value \$75.

No. 2 A shaft, the center of which bears S. 62°30' E., 280 ft. from Cor. No. 4, H. McKenzie lode; 4 x 10 ft., 8 ft. deep.

Value \$100.

No. 3 A tunnel, 5 x 7 ft. in size, known as No. 3, the portal of which bears N. 9°16' E., 321.81 ft. from Cor. No. 3 H. McKenzie lode; running N. 43° W., 12 ft. to Sta. A; thence S. 44° W., 9 ft. to breast, and N. 44° E., 10 ft. to breast. At Sta. A a winze with an inclination of 35° runs N. 40° W., 23 ft. to bottom.

Value of tunnel and winze \$700.

No. 1 Discovery cut of the J. L. Grubb lode, the center of which being the discovery point is on the lode line, 388 ft. from the center of line 4-1; 5 ft. wide, 10 ft. face, running S. 10 ft. to the mouth and N. 10 ft. to face.

Value \$200.

No. 2 A shaft, the center of which bears S. 84° W., 450 ft. from Cor. No. 1, J. L. Grubb lode; 5 x 8 ft., 6 ft. deep.

Value \$75.

No. 3 A cut, the mouth of which bears S. 65°20' W., 587 ft. from Cor. No. 1, J. L. Grubb lode; 5 ft. wide, 6 ft. face, running S. 65° W., 20 ft. to face.

Value \$150.

No. 4 A shaft, the center of which bears S. 63°50' W., 550 ft. from Cor. No. 1, J. L. Grubb lode; 4 x 10 ft., 6 ft. deep.

Value \$75.

No. 5 A cut, the mouth of which bears N. 4°10' W., 265 ft. from Cor. No. 2, J. L. Grubb lode; 16 ft. wide, 12 ft. face, running N. 6 ft. to face.

Value \$125.

No. 1 Discovery shaft of the J. D. McKinnon lode, the center of which being the discovery point is on the lode line 233 ft. from the center of line 1-2; 4 x 6 ft., 8 ft. deep.

Value \$75.

No. 2 A cut, the face of which bears N. 3°10' W., 363 ft. from Cor. No. 1, J. D. McKinnon lode; 5 ft. wide, 10 ft. face, running N. 80° W., 24 ft. to face.

Value \$175.

No. 3 A cut, the mouth of which bears N. 30°15' W., 242 ft. from Cor. No. 1, J. D. McKinnon lode; 4 ft. wide, 4 ft. face, running N. 21° W., 16 ft. to face.

Value \$50.

No. 1 Discovery shaft of the Henry Applegate lode, the center of which being the discovery point is on the lode line, 1,495 ft. from the center of line 4-1; 4 x 6 ft., 7 ft. deep.

Value \$75.

No. 2 A cut, the face of which bears N. 79° E., 372 ft. from Cor. No. 1, Henry Applegate lode; 5 ft. wide, 8 ft. face, running N. 24° E., 27 ft. to face.

Value \$100.

No. 3 A cut, the mouth of which bears N. 73°45' E., 140 ft. from Cor. No. 1, Henry Applegate lode; 4 ft. wide, 5 ft. face, running N. 77° E., 38 ft. to face.

Value \$200.

No. 1 Discovery cut of the A. W. Dahlberg lode, the face of which being the discovery point is on the lode line 260 ft. from the center of line 1-2; 6 ft. wide, 6 ft. face, running N. 19 ft. to face.

Value \$125.

No. 2 A cut, the face of which bears S. 16°05' E., 365 ft. from Cor. No. 4, A. W. Dahlberg lode; 5 ft. wide, 8 ft. face, running N. 61°30' W., 22 ft. to face. At the face of cut is the portal of a tunnel, 5x7 ft. in size, running N. 9° W., 15 ft. to breast.

Value of cut and tunnel \$300.

No. 3 A cut, the face of which bears N. 83° W., 90 ft. from Cor. No. 1, A. W. Dahlberg lode; 6 ft. wide, 5 ft. face, running N. 31° E., 12 ft. to face.

Value \$75.

No. 1 Discovery cut of the Telluride lode, the face of which being the discovery point is on the lode line 1,360.93 ft. from the center of line 1-2; 4 ft. wide, 10 ft. face, running N. 14° W., 10 ft. to face.

Value \$100.

No. 2. A tunnel, 5x7 ft. in size, known as No. 4, the portal of which bears S. 54° E., 118.97 ft. from Cor. No. 4 Telluride lode, running north 12 ft. to Sta. 1, thence N. 30° 15' E., 15 ft. to Sta. 2, thence S. 3° E., 20 ft. to Sta. 3, thence S. 5° W., 5 ft. to breast, and S. 85° E. 15 ft. to breast.

Value \$8.90

No. 3. A cut, the face of which bears S. 33° 30' E., 228 ft. from Cor. No. 1 Telluride lode; 6 ft. wide, 5 ft. face, running N. 75° 15' W., 12 ft. to face.

Value \$70

No. 4. A cut, the face of which bears S. 52° 10' W., 415 ft. from Cor. No. 2 Telluride lode; 5 ft. wide, 10 ft. face, running N. 50° W., 12 ft. to face.

Value \$60

No. 1. Discovery cut of the Alabama lode, the center of which being the discovery point is on the lode line 1.4 1/2 ft. from the center of line 1-2; 4 ft. wide, 5 ft. face, running N. 15° W., 5 ft. to face and S. 15° E., 5 ft. to mouth.

Value \$75

No. 2. A cut, the face of which bears S. 31° 25' W., 930 ft. from Cor. No. 1 Alabama lode; 5 ft. wide, 7 ft. face, running N. 51° 15' W., 16 ft. to face.

Value \$100

No. 1. Discovery cut of the Rainbow lode, the face of which being the discovery point, is on the lode line 320 ft. from center of line 1-2; 8 ft. wide, 8 ft. face, running N. 63° 30' W., 15 ft. to face.

Value \$100

No. 2. A shaft, the center of which bears N. 7° W., 455 ft. from Cor. No. 2 Rainbow lode; 4x6 ft., 3 ft. deep.

Value \$35

No. 3. A shaft, the center of which bears N. 15° 30' W., 462 ft. from Cor. No. 2 Rainbow lode; 8x8 ft., 4 ft. deep.

Value \$70

No. 4. A shaft, the center of which bears S. 80° W., 320 ft. from Cor. No. 1 Rainbow lode; 4x6 ft., 5 ft. deep, partly caved.

Value \$60

No. 5. A cut, the mouth of which bears N. 49° 15' W., 574 ft. from Cor. No. 1 Rainbow lode; 5 ft. wide, 10 ft. face, running N. 44° W., 20 ft. to face.

Value \$125

No. 6. A shaft, the center of which bears N. 51° 20' W., 624 ft. from Cor. No. 1 Rainbow lode; 10x8 ft., 6 ft. deep, partly caved.

Value \$100

No. 1. Discovery cut of the Della McKinnon lode, the center of which being discovery point, is on the lode line 380 ft. from the center of line 1-2; 5 ft. wide, 10 ft. face, running S. 71° E., 12 ft. to mouth and N. 71° W., 12 ft. to face.

Value \$165

No. 2. A shaft, the center of which bears N. 84° W., 450 ft. from Cor. No. 1 Della McKinnon lode; 6x6 ft., 5 ft. deep.

Value \$60

No. 3. A cut, the face of which bears S. 80° W., 310 ft. from Cor. No. 1 Della McKinnon lode; 4 ft. wide, 4 ft. face, running N. 5° W., 20 ft. to face, partly caved.

Value \$75

No. 4. A shaft, the center of which is on the lode line 134 ft. from the center of line 1-2 Della McKinnon lode; 4x8 ft., 4 ft. deep.

Value \$50

No. 5. A cut, the face of which bears N. 48° 15' W., 410 ft. from Cor. No. 1 Della McKinnon lode; 8 ft. wide, 10 ft. face, running N. 76° 30' W., 15 ft. to face.

Value \$75

No. 6. A cut, the mouth of which bears N. 56° W., 582 ft. from Cor. No. 1 Della McKinnon lode; 5 ft. wide, 10 ft. face, running N. 74° W., 22 ft. to face.

Value \$100

No. 1. Discovery shaft of the Sulphide lode, the center of which being the discovery point, is on the lode line 643 ft. from the center of line 4-1; 4x11 ft., 10 ft. deep.

Value \$50

No. 2. A shaft, the center of which bears N. 16° 10' E., 526 ft. from Cor. No. 2 Sulphide lode; 5x8 ft., 10 ft. deep.

Value \$100

No. 3. A shaft, the center of which bears N. 67° E., 700 ft. from Cor. No. 3 Sulphide lode; 4x10 ft., 6 ft. deep.

Value \$75

No. 4 A shaft, the center of which bears N.65°45'E., 742 ft. from Cor. No. 3 Sulphide lode; 6x9 ft., 7 ft. deep.

Value \$75.

No. 5 A shaft, the center of which bears S.22°W., 724 ft. from Cor. No. 4 Sulphide lode; 4x8 ft., 3 ft. deep, partly caved.

Value \$35.

No. 6 A shaft, the center of which bears N.0°32'W., 287.51 ft. from Cor. No. 2 Sulphide lode; 5x10 ft., 10 ft. deep.

Value \$125.

No. 7 A cut, the face of which bears S.18°05'W., 780 ft. from Cor. No. 4 Sulphide lode; 4 ft. wide, 5 ft. face, running N.5°E., 20 ft. to face.

Value \$60.

No. 8 A cut, the face of which bears S.18°15'W., 847 ft. from Cor. No. 4 Sulphide lode; 5 ft. wide, 6 ft. face, running North 16 ft. to face.

Value \$60.

No. 9 A cut, the face of which bears S. 20° E., 73 ft. from Cor. No. 4, Sulphide lode; 5 ft. wide, 10 ft. face, running S. 83° 30' E., 7 ft. to face, partly caved.

Value \$50.

No. 1 Discovery cut of the Staples lode, the face of which being the discovery point, is on the lode line 1,150 ft. from the center of line 1-2; 6 ft. wide, 10 ft. face, running N. 64° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which bears S. 61° W., 718 ft. from Cor. No. 2, Staples lode; 6 ft. wide, 5 ft. face, running N. 45° E., 12 ft. to face, partly caved.

Value \$75.

No. 3 A cut, the face of which bears S. 55° E., 75 ft. from Cor. No. 4, Staples lode; 12 ft. wide, 10 ft. face, running S. 72° E., 7 ft. to face.

Value \$100.

No. 1 Discovery cut of the Manganese lode, the face of which being the discovery point, is on the lode line 1,070.98 ft. from the center of line 4-1; 5 ft. wide, 9 ft. face, running North 7 ft. to face.

Value \$60.

No. 2 A cut, the face of which is on the lode line 1,010 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 4 ft. face, running N. 88° W., 8 ft. to face.

Value \$40.

No. 3 A cut, the face of which is on the lode line 818 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 7 ft. face, running N. 5° W., 12 ft. to face.

Value \$75.

No. 4 A cut, the face of which bears S. 61° 30' W., 860 ft. from Cor. No. 1, Manganese lode; 5 ft. wide, 2 ft. face, running N. 34° W., 15 ft. to face.

Value \$35.

No. 1 Discovery cut of the La Jolla lode, the face of which being the discovery point, is on the lode line 1,330 ft. from the center of line 1-2; 8 ft. wide, 6 ft. face, running N. 46° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which is on the lode line 90 ft. from the center of line 3-4, La Jolla lode; 12 ft. wide, 5 ft. face, running N. 46° E., 6 ft. to face.

Value \$65.

No. 3 A shaft, the center of which bears S. 31° 30' E., 82 ft. from Cor. No. 2, La Jolla lode; 5 x 6 ft., 8 ft. deep.

Value \$75.

No. 1 Discovery cut of the Arroyo Verde lode, the center of which being the discovery point, is on the lode line 780 ft. from the center of line 1-2; 8 ft. wide, 10 ft. face, running S. 5° W., 8 ft. to mouth and N. 5° E., 8 ft. to face.

Value \$150.

A common improvement described as follows:

No. 1 A tunnel, 6x7 ft. in size, known as No. 2, the portal of which bears N. 53°39' W., 772.12 ft. from Cor. No. 1 A. W. Dahlberg lode, running N. 51°17' W., 28 ft. to Sta. A1; thence N. 33°32' W., 24 ft. to pt. AX and 40.44 ft. to Sta. A2 and North 25 ft. to pt. X. At pt. X a drift, 5x7 ft. in size, runs N. 40° W., 30 ft. to breast. At pt. AX a crosscut, 5x7 ft. in size, runs West 20 ft. to breast. At Sta. A2 a tunnel, 6x7 ft. in size, runs N. 39°35' W., 66.26 ft. to Sta. A3; thence N. 59°49' W., 38.82 ft. to Sta. A4; thence N. 60°37' W., 121.45 ft. to Sta. A5; thence N. 78°38' W., 170.33 ft. to Sta. A6; thence N. 41°45' W., 179.05 ft. to Sta. A7; thence N. 39°04' W., 71.22 ft. to Sta. A8; thence N. 33°40' W., 62.05 ft. to Sta. A9; thence N. 44°52' W., 129.74 ft. to Sta. A10; thence N. 44°52' W., 141 ft.

to pt. X1 and 215.56 ft. to Sta. A15. At Sta. A10 a crosscut, 10x7 ft. in size, runs S 42° 00' E, 9.73 ft. to Sta. A16 and a crosscut, 6x7 ft. in size, runs S 38° W, 1 ft. to Sta. A11, thence S 72° W, 25 ft. to Sta. A12, thence S 90° W, 105 ft. to Sta. A13, thence S 48° W, 61 ft. to breast. At Sta. A16 a drift, 6x7 ft. in size, runs N 30° 51' W, 10 ft. to pt. D and 140 ft. to Sta. Y. This drift also runs S 45° E, 23 ft. to breast. A crosscut, 6x7 ft. in size, beginning at Sta. A16 runs N 52° 30' E, 30 ft. to breast. Pt. D is at the beginning of No. 1 slope which averages 38 ft. long, 5 ft. wide and 125 ft. high. At pt. X1 a crosscut, 8x7 ft. in size, runs N 40° E, 25 ft. and connects with the drift at Sta. Y. At Sta. A15 a drift, 7x7 ft. in size, runs N 50° 30' W, 21.92 ft. to Sta. A18, and a crosscut, 7 ft. in size, runs N 27° 27' E, 15 ft. to Sta. A17. At Sta. A17 a drift, 8x7 ft. in size, runs N 45° W, 15 ft. to breast, a crosscut, 6x7 ft. in size, runs N 41° E, 2 ft. to a curved breast, and a drift, 6x7 ft. in size, runs S 38° E, 15 ft. to breast. A17 is below a two-compartment raise 5x10 ft. in size, running up 30 ft. to No. 4, which averages 30 ft. long, 5 ft. wide and 30 ft. high. Sta. Y is in center of slope 2-3 which averages 35 ft. long, 5 ft. wide and 170 ft. high. Sta. Y a drift, 7x7 ft. in size, runs N 40° W, 44 ft. to Sta. Z, thence N 70° W, 7 ft. to Sta. A17. At Sta. A18 a drift, 6x7 ft. in size, runs N 25° 41' W, 36.29 ft. to Sta. A19, thence N 38° W, 22.34 ft. to Sta. A20, and N 16° 45' E, 40 ft. to breast of a crosscut, 5x7 ft. in size. Sta. A19 is the beginning of slope No. 5, which averages 35 ft. long, 5 ft. wide, and 30 ft. high. At Sta. A20 a drift, 6x7 ft. in size, runs N 40° 11' W, 92.85 ft. to Sta. A21, thence N 30° 30' W, 60.29 ft. to Sta. A22. A crosscut, 5x7 ft. in size, which begins at Sta. A21 runs S 57° W, 9 ft. to breast, partly filled. Sta. A21 is at the beginning of slope 6-7 which averages 30 ft. long, 5 ft. wide and 110 ft. high. Sta. A22 is below the center of No. 8, which averages 40 ft. long, 5 ft. wide, and 35 ft. high. At Sta. A22 a drift, 6x7 ft. in size, runs N 25° 15' W, 48.92 ft. to Sta. A23, thence N 32° W, 2 ft. to Sta. A24, thence N 30° 25' W, 33.6 ft. to breast. Sta. A23 is at the beginning of slope No. 9 which averages 22 ft. long, 5 ft. wide, and 35 ft. high. No. 2. A tunnel, 6x7 ft. in size, known as No. 1, the portal of which bears S 63° W, 521.92 ft. from Cor. No. 2 Peter Applegate lode, running S 74° 48' E, 103 ft. to Sta. 130, thence S 73° 57' E, 112.73 ft. to Sta. 131, thence N 75° 13' E, 43 ft. to Sta. 135, thence N 77° 37' E, 33.5 ft. to breast. At Sta. 135 a drift, 6 ft. in size, runs N 47° 16' W, 20 ft. to pt. A and 87.5 ft. to Sta. 139. Pt. A is the top of a raise, 5x8 ft. in size, which comes up from slope No. 4 and meets with No. 2 tunnel at Sta. A17. The raise has a length of 280 ft. and is timbered. At Sta. 139 a drift, 7x7 ft. in size, runs N 33° 07' W, 29.91 ft. to Sta. 137, thence N 46° 00' W, 27.6 ft. to Sta. 138, thence N 28° 19' W, 19 ft. to breast. At Sta. 135 a drift, 7x7 ft. in size, runs S 37° 17' E, 45 ft. to pt. B and 2 ft. to breast. A slope, the center of which is above pt. B, averages 80 ft. long, 5 ft. wide and 90 ft. high. Pt. B is also the center of a slope, below the 1, which averages 43 ft. long, 5 ft. wide, 50 ft. deep and connects with the 2 between tunnels No. 1 and No. 2. No. 3. A tunnel, 5x7 ft. in size, known as No. 6, the portal of which bears S 74° E, 9.37 ft. from Cor. No. 4, H. McKenzie lode, running S 90° 20' E, 52 ft. to pt. 1 and 105 ft. to Sta. 2. At pt. 1 a crosscut, 5x7 ft. in size, runs S 25° E, 1 ft. to breast. At Sta. 2 a crosscut, 5x7 ft. in size, runs N 33° E, 11 ft. to the top of a raise, 5x7 ft. in size, which connects with the top of the slope above No. 1. The raise has a length of 95 ft. At Sta. 2 a 5x7 ft. drift runs S 66° E, 93 ft. to Sta. 3; thence S 30° 30' E, 30 ft. to Sta. 4; thence S 40° E, 7 ft. to Sta. 5. At Sta. 4 a crosscut, 5x7 ft. in size, runs S 60° W, 48 ft. to breast. Sta. 5 a crosscut, 5x7 ft. in size, runs N 38° 45' E, 116 ft. to breast; another 5x7 crosscut runs N 81° 55' E, 31 ft. to breast, and a drift, 5x7 ft. in size, runs N 16° W, 16 ft. to breast.

Value of tunnels, drifts, raises, crosscuts and slopes \$93,500.

The major portion of this improvement was made when the claimant had only the lodes of this survey, as follows: J. W. Merritt, Peter Applegate, W. C. Ver, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Legate, A. W. Dahlberg, and Della McKinnon. The remainder of the improvement has been made by the claimant since all of the lodes of this survey have been located, with the exception of the Ram.

Value of improvement for the benefit of 10 lodes \$55,000.

Value of one-tenth interest \$5,500.

Value of improvement for the benefit of 23 lodes \$8,500.

Value of one-twenty-third interest \$339.

	Beginning at Cor. No. 1 of the J. W. Merritt Lode, which is identical with Cor. No. 4 of the Cougar lode, of this survey, from which
	The $\frac{1}{4}$ sec. cor. between secs. 29 and 30, T. 31 S., R. 2 E., Wil Mer., bears S. 88°24' W., 911.85 ft. dist., previously described.
	Thence S. 46°38' E.
120.00	Bitterlick road, bears N. 9° E. and S. 14° W.
203.02	Intersect lode line.
390.00	West Portal road, bears N. 25° E. and S. 24° W.
450.00	Swanson Creek, 5 feet wide, course S. 25° W.
593.02	Cor. No. 2.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. JWM-2-PA-4-MA-1-879; from which
	A hemlock, 9 ins. diam., bears S. 58° W., 27.0 ft. dist., mkd. JWM-2-PA-4-MA-1-879-BT.
	A hemlock, 12 ins. diam., bears N. 49° W., 32.0 ft. dist., mkd. JWM-2-PA-4-MA-1-879-BT.
	Thence S. 45°50' W.
290.00	Swanson Creek, 5.5 ft. wide, course S. 18° W.
395.00	West Portal road, bears N. 16° E. and S. 16° W.
1,500.00	Cor. No. 3.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. JWM-3-879; from which
	A white fir, 10 ins. diam., bears N. 17° W., 34.0 ft. dist., mkd. JWM-3-879-BT.
	A red fir, 30 ins. diam., bears S. 20°30' W.; 7.0 ft. dist., mkd. JWM-3-879-BT.
	Then N. 46°38' W.
260.00	Bitterlick road, bears northeast and southwest.
300.00	Intersect lode line.
593.02	Cor. No. 4.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground, and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. JWM-4-879; from which
	A chinquapin, 7 ins. diam., bears N. 3° E., 35.0 ft. dist., mkd. JWM-4-879-BT.
	A red fir, 10 ins. diam., bears S. 84° E., 17.5 ft. dist., mkd. JWM-4-879-BT.
	Thence N. 45°50' E.
1,500.00	Cor. No. 1 and place of beginning.

## PETER APPLGATE LODGE

	Begining at Cor. No. 1 of the Peter Applegate Lode, which is identical with Cor. No. 4 of the Cougar lode and Cor. No. 1 of the J. W. Merritt lode, of this survey.
	Then No. 45°50' E.
140.00	Bitterlick road, bears north and south.
380.00	West Fork of Swanson Creek, 4 feet wide, course S. 30° E.
990.00	Swanson Creek, 5 feet wide, course N. and S.; West Portal road bears N. 23° E., and S. 23° W.
1,500.00	Cor. No. 2, which is identical with Cor. No. 3 of the Cougar lode and Cor. No. 3 of the Oro Real lode, of this survey.
	Thence S. 46°38' E.
293.02	Intersect lode line.
593.02	Cor. No. 3.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. PA-3-MA-2-HMcK-4-879; from which
	A red fir, 36 ins. diam., bears S. 17°30' W., 22.0 ft. dist., mkd. PA-3-MA-2-HMcK-4-879-BT.
	A hemlock, 8 ins. diam., bears S. 88° W., 32.0 ft. dist., mkd. PA-3-MA-2-HMcK-4-879-BT.
	Thence S. 45°50' W.

**Feet**

- 1,500.00 Cor. No. 4, which is identical with corner No. 2 of the J. W. Merritt lode, of this survey.  
Thence N. 46° 38' W.  
143.02 Swanson Creek 5 feet wide, course S. 25° W.  
203.02 West Portal road, bears N. 25° E. and S. 25° W.  
300.00 Intersect lode line.  
473.02 Lutterick road, bears N. 9° E. and S. 14° W.  
503.02 Cor. No. 1 and place of beginning.

**ORO ESCONDIDO LODGE**

Beginning at Cor. No. 1 of the Oro Escondido Lode, which is identical with Cor. No. 2 of the Oro Real lode, of this survey, from which

The 1<sub>4</sub> sec. cor. between sections 20 and 29, T. 31 S., R. 2 E., Wil. Mer., bears N. 49° 50' W., 520.74 ft. dist., previously described.

Thence N. 45° 50' E.

- 1,448.41 Cor. No. 2.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. OE-2 WCL-2-879, from which  
A madrone, 9 ins. diam., bears N. 41° E., 200 ft. dist., mkd. OE-2 WCL-2-879 B T.  
A cedar, 24 ins. diam., bears S. 60° E., 430 ft. dist., mkd. OE-2 WCL-2-879 B T.  
Thence S. 46° 38' E.  
203.02 Intersect lode line.  
303.02 Cor. No. 3.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. OE-3 WCL-1 JLG-4 JDM-K 2-879, from which  
A madrone, 8 ins. diam., bears S., 190 ft. dist., mkd. OE-3 WCL-1 JLG-4 JDM-K 2-879 B T.  
A madrone, 9 ins. diam., bears S. 80° W., 240 ft. dist., mkd. OE-3 WCL-1 JLG-4 JDM-K 2-879 B T.  
Thence S. 45° 50' W.  
1,448.41 Cor. No. 4.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. OE-4 HMK-1 JLG-3-879, from which  
A red fir, 18 ins. diam., bears N. 45° E., 190 ft. dist., mkd. OE-4 HMK-1 JLG-3-879 B T.  
A red fir, 14 ins. diam., bears S. 17° E., 70 ft. dist., mkd. OE-4 HMK-1 JLG-3-879 B T.  
Thence N. 46° 38' W.  
300.00 Intersect lode line.  
503.02 Cor. No. 1 and place of beginning.

**W. C. LEEVER LODGE**

Beginning at Cor. No. 1 of the W. C. Leever lode, which is identical with Cor. No. 3 of the Oro Escondido lode of this survey, from which

The cor. of sec. 20, 21, 28, and 29, T. 31 S., R. 2 E., Wil. Mer., bears S. 58° 14' E., 890.85 ft. dist.; a gray stone, 8 x 12 x 20 ins., firmly set, marked and witnessed as described in the official record.

Thence S. 46° 38' W.

- 300.00 Intersect lode line.  
503.02 Cor. No. 2, which is identical with Cor. No. 2 of the Oro Escondido lode of this survey.  
Thence N. 45° 50' E.  
1,500.00 Cor. No. 3.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. WCL-3-879; from which  
A hemlock, 12 ins. diam., bears N. 72° W., 17.0 ft. dist., mkd. WCL-3-879-B T.  
A hemlock 12 ins. diam., bears S. 35° E., 22.0 ft. dist., mkd.

<b>Feet</b>	<b>WCL-3-879-B T.</b>
	Thence S. 46° 38' E.
293.02	Interest lode line.
300.00	Elk Creek, 10 feet wide, course S. 24° W.
593.02	Cor. No. 4
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. WCL-4-JDMcK-3-879; from which
	A red fir, 30 ins. diam., bears S. 8° E., 23.0 ft. dist., mkd. WCL-4-JDMcK-3-879-B T.
	A red fir, 30 ins. diam., bears N. 75° W., 21.0 ft. dist., mkd. WCL-4-JDMcK-3-879-B T.
	Thence S. 45° 50' W.
570.00	Elk Creek, 10 feet wide, course S. 10° W.
1,500.00	Cor. No. 1 and place of beginning.

## MARK APPEGATE LODE

	Beginning at Cor. No. 1 of the Mark Applegate Lode, which is identical with Cor. No. 2 of the J. W. Merritt lode and Cor. N. 4 of the Peter Applegate lode of this survey, from which
	The ¼ sec. cor. between secs. 29 and 30, T. 31 S., R. 2 E., W. 11 Mer., bears N. 74° 07' 34" W., 1,395.82 ft. dist.; previously described.
	Thence N. 45° 50' E.
1,500.00	Cor. No. 2, which is identical with Cor. No. 3 of the Peter Applegate lode of this survey.
	Thence S. 44° 10' E.
300.00	Intersect lode line; summit of ridge, bears N. 30° E. and S. 30° W.
600.00	Cor. No. 3.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Co. No. 3, mkd. MA-3-HMcK-3-879; from which
	A red fir, 8 ins. diam., bears N. 76° E., 20.0 ft. dist., mkd. MA-3-HMcK-3-879-B T.
	A white fir, 12 in. diam., bears N. 65° W., 11.0 ft. dist., mkd. MA-3-HMcK-3-879-B T.
	Thence S. 45° 50' W.
1,500.00	Cor. No. 4.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. MA-4-879; from which
	A red fir, 36 ins. diam., bears N. 43° 40' W., 24.0 ft. dist., mkd. MA-4-879-B T.
	A chinquapin, 6 ins. diam., bears N. 67° 30' E., 2.0 ft. dist., mkd. MA-4-879-B T.
	Thence N. 44° 10' W.
60.00	Summit of ridge, bears northeast and southwest.
300.00	Intersect lode line.
600.00	Cor. No. 1 and place of beginning.

## H. M'KENZIE LODE

	Beginning at Cor. No. 1 of the H. McKenzie lode, which is identical with Cor. No. 4 of the Oro Escondido lode of this survey, from which
	The ¼ sec. cor. between secs. 20 and 29, T. 31 S., R. 2 E., W. 11 Mer., bears N. 48° 02' W., 1,119.47 ft. dist.; previously described.
	Thence S. 44° 10' E.
300.00	Intersect lode line.
600.00	Cor. No. 2.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. HMcK-2-JLG-2-879; from which
	A red fir, 14 ins. diam., bears S. 20° W., 33.0 ft. dist., mkd. HMcK-2-JLG-2-879-B T.
	A red fir, 12 ins. diam., bears N. 5° W., 10.0 ft. dist., mkd.

<i>Foot</i>	HMcK 2 JLG 2 879 B T.
	Thence S. 45° 50' W.
1,496.59	Cor. No. 3, which is identical with Cor. No. 3 of the Mark Applegate lode of this survey.
	Thence N. 44° 10' W.
300.00	Intersect lode line; summit of ridge, bears N. 30° E. and S. 30° W.
600.00	Cor. No. 4, which is identical with Cor. No. 3 of the Peter Applegate lode and Cor. No. 2 of the Mark Applegate lode of this survey.
	Thence N. 45° 50' E.
900.00	Summit of ridge, bears N. 12° E. and S. 12° W.
1,496.59	Cor. No. 1 and place of beginning.

## J. L. GRUBB LODGE

Beginning at Cor. No. 1 of the J. L. Grubb Lode, where I—  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked JLG-1-JDMcK-1-879; from which

	The cor. of sec. 20, 21, 28, and 29, T. 31 S., R. 2 E., W. 11 Mer., bears S. 83° 30' E., 341.51 ft. dist.; previously described.
	A white fir, 32 ins. diam., bears S. 78° E., 12.0 ft. dist., mkd. JLG 1 JDMcK 1 879 B T.
	A hemlock, 18 ins. diam., bears N. 80° W., 31.0 ft. dist., mkd. JLG-1-JDMcK-1-879 B T.
	Thence S. 45° 50' W.
1,448.41	Cor. No. 2, which is identical with Cor. No. 2 of the H. McKenzie lode of this survey.
	Thence N. 44° 10' W.
300.00	Intersect lode line.
600.00	Cor. No. 3, which is identical with Cor. No. 4 of the Oro Escondido lode and Cor. No. 1 of the H. McKenzie lode of this survey.
	Thence N. 45° 50' E.
1,448.41	Cor. No. 4, which is identical with Cor. No. 3 of the Oro Escondido lode and Cor. No. 1 of the W. C. Leever lode of this survey.
	Thence S. 44° 10' E.
300.00	Intersect lode line.
600.00	Cor. No. 1 and place of beginning.

## J. D. MCKINNON LODGE

Beginning at Cor. No. 1 of the J. D. McKinnon Lode, which is identical with Cor. No. 1 of the J. L. Grubb lode of this survey.

	Thence N. 44° 10' W.
300.00	Intersect lode line.
600.00	Cor. No. 2, which is identical with Cor. No. 3 of the Oro Escondido lode Cor. No. 1 of the W. C. Leever lode, and Cor. No. 4 of the J. L. Grubb lode of this survey.
	Thence N. 45° 50' E.
930.00	Elk Creek, 10 feet wide, course S. 10° W.
1,500.00	Cor. No. 3, which is identical with Cor. No. 4 of the W. C. Leever lode of this survey.
	Thence S. 44° 10' E.
300.00	Intersect lode line.
600.00	Cor. No. 4.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. JDMcK-4-879; from which
	A white fir, 15 ins. diam., bears N. 52° W., 9.0 ft. dist., mkd. JDMcK-4-879-B T.
	A white fir, 15 ins. diam., bears N. 52° W., 9.0 ft. dist., mkd. JDMcK-4-879-B T.
	Thence S. 45° 50' W.
1,080.00	Elk Creek road, bears north and south.
1,280.07	Elk Creek, 10 feet wide, course S. 10° W.
1,450.00	Elk Creek road, bears north and south.
1,500.00	Cor. No. 1 and place of beginning.

## HENRY APPLEGATE LODGE

Feet

- Beginning at Cor. No. 1 of the Henry Applegate Lode, where I—  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked HA-1-879; from which
- The  $\frac{1}{4}$  sec. cor. between secs. 29 and 30, T. 31 S., R. 2 E., W. Mer., bears N.  $56^{\circ}32'36''$  W., 1,852.36 ft. dist.; previously described.  
A red fir, 24 ins. diam., bears N.  $85^{\circ}$  W., 90 ft. dist., mkd. HA-1-879-B T.  
A cedar, 10 ins. diam., bears S.  $55^{\circ}$  E., 8.0 ft. dist., mkd., HA-i-879-B T.  
Thence N.  $45^{\circ}50'$  E.
- 300.00 Cor. No. 4, of the Mark Applegate lode of this survey.  
1,500.00 Cor. No. 2, on line 3-4 Mark Applegate lode of this survey.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. HA-2-AWD-3-879; from which  
A madrone, 9 ins. diam., bears S.  $18^{\circ}$  W., 8.5 ft. dist., mkd. HA-2-AWD-3-879-BT.  
A hemlock, 10 ins. diam., bears N.  $56^{\circ}$  W., 14.5 ft. dist., mkd. HA-2-AWD-3-879-BT.  
Thence S.  $44^{\circ}10'$  E.
- 300.00 Intersect lode line.  
600.00 Cor. No. 3.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. HA-3-DMcK-4-879; from which  
A cedar, 24 ins. diam., bears S.  $80^{\circ}$  E., 20.4 ft. dist., mkd. HA-3-DMcK-4-879-BT.  
A madrone, 10 ins. diam., bears N.  $19^{\circ}$  W., 24.0 ft. dist., mkd. HA-3-DMcK-4-879-BT.  
Thence S.  $45^{\circ}50'$  W.
- 1,500.00 Cor. No. 4.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. HA-4-879; from which  
A chinquapin, 12 ins. diam., bears N.  $15^{\circ}$  E., 13.0 ft. dist., mkd. HA-4-879-BT.  
A hemlock, 12 ins. diam., bears S.  $20^{\circ}$  E., 16.0 ft. dist., mkd. HA-4-879-BT.  
Thence N.  $44^{\circ}10'$  W.
- 300.00 Intersect lode line.  
600.00 Cor. No. 1 and place of beginning.

## A. W. DAHLBERG LODGE

- Beginning at Cor. No. 1 of the A. W. Dahlberg Lode, where I—  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked AWD-1-879; from which
- The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T. 31 S., R. 2 E., W. Mer., bears N.  $78^{\circ}37'45''$  E., 1,194.31 ft. dist.; a stone, 8 x 10 x 1 ins., firmly set, marked and witnessed as described in the official record.  
A white fir, 8 ins. diam., bears N.  $21^{\circ}$  W., 9.0 ft. dist., mkd. AWD-1-879-BT.  
A white fir, 24 ins. diam., bears N.  $55^{\circ}30'$  E., 30.5 ft. dist., mkd. AWD-1-879-BT.  
Thence S.  $45^{\circ}50'$  W.
- 220.00 Elk Creek road, bears N.  $10^{\circ}$  W. and S.  $10^{\circ}$  E.  
300.00 Intersect lode line.  
600.00 Cor. No. 2.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, marked AWD 2-879; from which  
A red fir, 11 ins. diam., bears S.  $81^{\circ}40'$  W., 11.0 ft. dist., mkd.

	AWD 2 879 B T.
	A red fir, 20 ins. diam., bears S. 55° 15' E., 22.0 ft. dist., mkd.
	AWD 2 879 B T.
	Thence N. 44° 10' W.
900.00	Cor. No. 3 of the Henry Applegate lode of this survey.
1,500.00	Cor. No. 2, which is identical with Cor. No. 2 of the Henry Applegate lode of this survey.
	Thence N. 45° 50' E.
300.00	Intersect lode line; Cor. Nos. 3 of the Mark Applegate and H. McKenzle lodes of this survey.
900.00	Cor. No. 4 on line 2 3 H. McKenzle lode of this survey.
	Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. AWD 4 T 4 879; from which
	A red fir, 10 ins. diam., bears S. 5° W., 9.5 ft. dist., mkd. AWD-4 T 4 879 B T.
	A cedar, 36 ins. diam., bears N. 55° W., 23.0 ft. dist., mkd. AWD-4 T 4 879 B T.
	Thence S. 44° 10' E.
1,320.00	Road, bears northeast and southwest.
1,370.00	Elk Creek road, bears N. 16° E. and S. 16° W.
1,500.00	Cor. No. 1 and place of beginning.

## TELLURIDE LODGE

Beginning at Cor. No. 1 of the Telluride Lode, on line 1 2 J. L. Grubb lode of this survey, where 1

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked T 1 A 4 879; from which

The cor. of sec. 20, 21, 28, and 29, T. 31 S., R. 2 E., W. 11 Mer., bears N. 56° 22' E., 1,414.83 ft. dist.; previously described.

A sugar pine, 11 ins. diam., bears E., 17.0 ft. dist., mkd. T 1-A-4 879 B T.

A red fir, 11 ins. diam., bears N., 17.0 ft. dist., mkd. T-1-A-4 879 B T.

Thence S. 44° 10' E.

300.00 Intersect lode line.

380.00 Elk Creek road, bears N. 30° E. and S. 30° W.

585.00 Elk Creek, 10 feet wide, course S. 15° W.

600.00 Cor. No. 2.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. T-2-A-3-Su-4-St 4 879; from which

A red fir, 14 ins. diam., bears S. 27° E., 34.0 ft. dist., mkd. T-2-A-3-Su-4-St 4 879 B T.

A hemlock, 16 ins. diam., bears N. 3° W., 18.0 ft. dist., mkd. T 2 A 3-Su 4 St 4 879-B T.

Thence S. 45° 50' W.

40.00 Elk Creek, 8 ft. wide, course south.

425.00 Elk Creek road, bears N. and S.

1,430.93 Cor. No. 3, on line 4-1 A. W. Dahlberg lode of this survey.

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. T-3-Su-3-879; from which

A white fir, 10 ins. diam., bears N. 37° E., 7.5 ft. dist., mkd. T-3 Su-3 879-B T.

A madrone, 9 ins. diam., bears S. 5° E., 8.5 ft. dist., mkd. T 3 Su 3 879 B T.

Thence N. 44° 10' W.

300.00 Intersect lode line.

600.00 Cor. No. 4, which is identical with Cor. No. 4 of the A. W. Dahlberg lode of this survey.

Thence N. 45° 50' E.

1,186.59 Cor. Nos. 2 of the H. McKenzle and J. L. Grubb lodes of this survey.

1,430.93 Cor. No. 1 and place of beginning.

## ALABAMA LODGE

Feet

- Beginning at Cor. No. 1 of the Alabama Lode, on line 4-1, J. D. McKinnon lode of this survey, where I—  
 Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked A-1-879; from which
- The cor. of secs. 20, 21, 28, and 29, T. 31 S., R. 2 E., W. Mer., bears S. 35°40' E., 267.09 ft. dist.; previously described.
- A white fir, 11 ins. diam., bears S. 71° E., 20.0 ft. dist., mkd. A-1-879-B T.
- A red fir, 36 ins. diam., bears S. 45° W., 27.0 ft. dist., mkd. A-1-879-B T.
- Thence S. 44°10' E.
- 180.00 Elk Creek road, bears north and south.
- 300.00 Intersect lode line.
- 480.00 Elk Creek road, bears N. 70° E. and S. 70° W.
- 600.00 Cor. No. 2.
- Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in mound of stone 18 ins. high, for Cor. No. 2, mkd. A-2-St-1-879; from which
- A white fir, 26 ins. diam., bears S. 65° E., 46.0 ft. dist., mkd. A-2-St-1-879-B T.
- A white fir, 12 ins. diam., bears S. 49° W., 22.0 ft. dist., mkd. A-2-St-1-879-B T.
- Thence S. 45°50' W.
- 1,460.00 Cor. No. 3, which is identical with Cor. No. 2 of the Telluride lode of this survey.
- Thence N. 44°10' W.
- 15.00 Elk Creek, 10 ft. wide, course S. 15° W.
- 220.00 Elk Creek road, bears N. 30° E. and S. 30° W.
- 300.00 Intersect lode line.
- 600.00 Cor. No. 4, which is identical with Cor. No. 1 of the Telluride lode of this survey.
- Thence N. 45°50' E.
- 1,204.07 Cor. No. 1 of the J. L. Grubb and the J. D. McKinnon lodes of this survey.
- 1,254.07 Elk Creek road, bears N. S.
- 1,444.00 Elk Creek, 10 ft. wide, course S. 10° W.
- 1,460.00 Cor. No. 1 and place beginning.

## RAINBOE LODGE

- Beginning at Cor. No. 1 of the Rainboe Lode, where I—  
 Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked Ra-1-DMcK-2-879; from which
- The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T. 31 S., R. 2 E., W. Mer., bears N. 47°03'07" E., 2,204.43 ft. dist.; previously described. This is the most accessible corner that could be found after diligent search.
- A sugar pine, 6 ins. diam., bears N. 6°30' W., 18.0 ft. dist., mkd. Ra-1-DMcK-2-879-B T.
- A red fir, 9 ins. diam., bears S. 8°30' S., 3.5 ft. dist., mkd. Ra-1-DMcK-2-879-B T.
- Thence S. 45°50' W.
- 150.00 Elk Creek road, bears N. 43° E. and S. 28° W.
- 300.00 Intersect lode line.
- 600.00 Cor. No. 2.
- Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. Ra-2-879; from which
- A white fir, 10 ins. diam., bears S. 78° W., 11.0 ft. dist., mkd. Ra-2-879-B T.
- A madrone, 15 ins., diam., bears N. 1°10' W., 11.0 ft. dist., mkd. Ra-2-879-B T.
- Thence N. 44°10' W.

*Feet*

- 1,500.00 Cor. No. 3, on line 3-4 Henry Applegate lode of this survey.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 3, mkd. Ra-3-879; from which  
A cedar, 10 ins. diam., bears N. 20° E., 47.0 ft. dist., mkd. Ra 3-879-B T.  
A madrone, 8 ins. diam., bears S. 28° 30' E., 27.0 ft. dist., mkd. Ra 3-879-B T.  
Thence N. 45° 50' E.  
300.00 Intersect lode line.  
600.00 Cor. No. 4, on line 3-4 Henry Applegate lode of this survey.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. Ra-4-DMcK-3-879; from which  
A madrone, 11 ins. diam., bears N. 55° E., 18.0 ft. dist., mkd. Ra 4-DMcK 3-879-B T.  
A red fir, 30 ins. diam., bears S. 2° E., 19.0 ft. dist., mkd. Ra-4-DMcK-3-879-B T.  
Thence C. 44° 10' E.  
1,480.00 Elk Creek road, bears N. 33° E. and S. 33° W.  
1,500.00 Cor. No. 1 and place of beginning.

## DELIA M'KINNON LODGE

- Beginning at Cor. No. 1 of the Delia McKinnon Lode, where I—  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked DMcK-1-879; from which  
The ¼ sec. cor. between secs. 28 and 20, T. 31 S., R. 2 E., W. 11 Mer., bears N. 47° 30' 27" E., 1,004.61 ft. dist.; previously described.  
A maple, 8 ins. diam., bears N. 43° W., 9.5 ft. dist., mkd. DMcK-1-879-B T.  
A white fir, 6 ins. diam., bears S. 56° 30' E., 19.0 ft. dist., mkd. DMcK-1-879-B T.  
Thence S. 45° 50' W.  
300.00 Intersect lode line.  
600.00 Cor. No. 2, which is identical with Cor. No. 1 of the Rainbow lode of this survey.  
Thence N. 44° 10' W.  
20.00 Elk Creek road, bears N. 33° E. and S. 33° W.  
1,500.00 Cor. No. 3, which is identical with Cor. No. 4 of the Rainbow lode of this survey.  
Thence N. 45° 50' E.  
300.00 Intersect lode line.  
600.00 Cor. No. 4, which is identical with Cor. No. 3 of the Henry Applegate lode of this survey.  
Thence S. 44° 10' E.  
900.00 Corner No. 2 of A. W. Dahlberg lode of this survey.  
1,105.00 Elk Creek road, bears N. 16° E. and S. 7° E.  
1,500.00 Corner No. 1 and place of beginning.

## SULPHIDE LODGE

- Beginning at Cor. No. 1 of the Sulphide Lode, which falls in the East Ford of Elk Creek where a monument could not be established. From this point—  
The ¼ sec. cor. between secs. 28 and 20, T. 31 S., R. 2 E., W. 11 Mer., bears S. 19° 53' 36" E., 1,038.70 ft. dist.; previously described.  
Thence S. 45° 50' W.  
510.00 East Fork of Elk Creek, 5 ft. wide, course S. 75° W.  
1,005.00 Elk Creek, 10 ft. wide, course south.  
1,240.00 Elk Creek road, bears N. 7° E. and S. 7° W.

## Feet

- 1, 430. 93 Cor. No. 2, on line 4-1 A. W. Dahlberg lode of this survey.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. Su-2-M-3-879; from which  
A cedar, 11 ins. diam., bears S. 77° 30' E., 9.0 ft. dist., mkd. Su-2-M-3-879-B T.  
A madrone, 8 ins. diam., bears S. 22° 30' W., 32.0 ft. dist., mkd. Su-2-M-3-879-B T.  
Thence N. 44° 10' W.  
300. 00 Intersect lode line.

300. 00 Intersect lode line.  
600. 00 Cor. No. 2.  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. St-2-LJ-3-879; from which  
A cedar, 32 ins., diam., bears N. 4° E., 53.0 ft. dist., mkd. St-2-LJ-3-879-B T.  
A red fir, 20 ins., diam., bears S. 86° W., 12.5 ft. dist., mkd. St-2-LJ-3-879-B T.  
Thence, S. 45° 50' W.  
1, 460. 00 Cor. No. 3, which is identical with Cor. No. 1 of the Sulphide lode of this survey, and falls in the East Fork of Elk Creek where a monument could not be established.  
Thence N. 44° 10' W.  
16. 88 Witness Cor. No. 3, which is identical with Witness Cor. No. 1 of the Sulphide lode of this survey.  
300. 00 Intersect lode line.  
600. 00 Cor. No. 4, which is identical with Cor. No. 2 of the Telluride lode, Cor. No. 3 of the Alabama lode, and Cor. No. 4 of the Sulphide lode of this survey.  
Thence N. 45° 50' E.  
1, 460. 00 Cor. No. 1 and place of beginning.

## MANGANESE LODE

Beginning at Cor. No. 1 of the Manganese Lode, where I-  
Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked M-1-879; from which

- Feet*
- The  $\frac{1}{4}$  sec. cor. between sec. 28 and 29, T. 31 S., R. 2 E., W. Mer., bears S. 6°44' W., 550.13 ft. dist.; previously described.  
 A sugar pine, 38 ins. diam., bears S. 78° E., 25.0 ft. dist., mkd. M 1-879-B T.  
 A madrone, 9 ins. diam., bears N. 44° W., 23.0 ft. dist., mkd. M 1-879-B T.  
 Thence S. 45°50' W.  
 1,430.00 Cor. No. 2.  
 Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 2, mkd. M 2-879; from which  
 A sugar pine, 10 ins. diam., bears N 65° W., 12.0 ft. dist., mkd. M 2-879-B T.  
 A madrone, 10 ins. diam., bears N.15° E., 25.0 ft. dist., mkd. M 2-879-B T.  
 Thence N 44°10' W.  
 110.00 Elk Creek, 10 feet wide, course S.  
 200.00 Intersect lode line, Cor. No. 1 of the A. W. Dahlberg lode of this survey.  
 430.00 Elk Creek road, bears N 16° E. and S 16° W.  
 480.00 Road, bears northeast and southwest.  
 600.00 Cor. No. 3, on line 4-1 A. W. Dahlberg lode and identical with Cor. No. 2 of the Sulphide lode of this survey.  
 Thence N 45°50' E.  
 190.03 Elk Creek road, bears N 7° E. and S 7° W.  
 425.03 Elk Creek, 10 feet wide, course S.  
 620.03 East Fork of Elk Creek, 5 feet wide, course S.75° W.  
 1,430.03 Cor. No. 4, which is identical with Cor. No. 1 of the Sulphide lode and Cor. No. 3 of the Staples lode of this survey, and falls in the East Fork of Elk Creek, previously described, where a monument could not be established.  
 Thence S 44°10' E.  
 300.00 Intersect lode line.  
 600.00 Cor. No. 1 and place of beginning.

## LA JOLLA LODE

Beginning at Cor. No. 1 of the La Jolla lode, on line 4-1 of the Manganese lode of this survey, where I—

Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 1, marked LJ-1-AV-2-879; from which

The  $\frac{1}{4}$  sec. cor. between sec. 28 and 29, T. 31 S., R. 2 E., W. Mer., bears S 10°44' E., 775.10 ft. dist.; previously described.

A chinquapin, 8 ins. diam., bears N.62° E., 16.0 ft. dist., mkd. LJ-1-AV-2-879-B T.

A madrone, 12 ins. diam., bears S.15° E., 17.5 ft. dist., mkd.

LJ-1-AV-2-879-B T.

Thence N.44°10' W.

150.00 Intersect lode line.

300.00 Cor. No. 2, which is identical with Cor. No. 1 of the Sulphide lode, Cor. No. 3 of the Staples lode and Cor. No. 4 of the Manganese lode of this survey, and falls in a creek, previously described, where a monument could not be established.

Thence N 45°50' E.

1,400.00 Cor. No. 3, which is identical with Cor. No. 2 of the Staples lode of this survey.

Thence S 44°10' E.

150.00 Intersect lode line.

300.00 Cor. No. 4.

Set a cedar post, 48 ins. long 4 ins. sq., 18 ins. in the ground and in a mound of stone 18 ins. high, for Cor. No. 4, mkd. LJ-4-AV-3-879; from which

A white fir, 18 ins. diam., bears S.70° E., 33.0 ft. dist., mkd.

LJ-4-AV-3-879-B T.

- Feet*            A hemlock, 13 ins. diam., bears S.53°W., 6.5 ft. dist., mkd.  
                  LJ-4-AV-3-879-B T.  
                  Thence S.45°50'W.  
 1,460.00       Cor. No. 1 and place of beginning.

## ARROYO VERDE LODE

- Beginning at Cor. No. 1 of the Arroyo Verde Lode, where I—  
 Squared a cedar stump, 20 ins. diam., 18 ins. high, to 6x12 in.,  
 marked AV-1-879; from which  
 The  $\frac{1}{4}$  sec. cor. between secs. 28 and 29, T 31 S., R. 2 E., W. 11  
 Mer., bears S.39°34'W., 429.55 ft. dist., previously described.  
 A red fir, 30 ins. diam., bears N.3°W., 28.0 ft. dist., mkd  
 AV-1-879-B T.  
 A cedar, 14 ins. diam., bears S.13°W., 44.0 ft. dist., mkd  
 AV-1-879-B T.  
 Thence N.44°10'W.  
 300.00       Intersect lode line; Cor. No. 1 of the Manganese lode of this survey.  
 600.00       Cor. No. 2, on line 4-1 of the Manganese lode and identical with  
              Cor. No. 1 of the La Jolla lode of this survey.  
              Thence N. 45°50'E.  
 1,460.00       Cor. No. 3, which is identical with Cor. No. 4 of the La Jolla lode  
              of this survey.  
              Thence S.44°10'E.  
 300.00       Intersect lode line.  
 600.00       Cor. No. 4.  
              Set a cedar post, 48 ins. long, 4 ins. sq., 18 ins. in the ground and in  
              a mound of stone 18 ins. high, for Cor. No. 4, mkd. AV-4-879; from  
              which  
              A red fir, 40 ins. diam., bears N.40°W., 20.0 ft. dist., mkd  
              AV-4-879-B T.  
              A hemlock, 18 ins. diam., bears S.53°E., 16.0 ft. dist., mkd  
              AV-4-879-B T.  
              Thence S.45°50'W.  
 1,460.00       Cor. No. 1 and place of beginning.

## LODE LINES

The presumed course of the vein of each of the several lode locations embraced in this survey, counted from the respective points of discovery, is as follows:

Ram lode, S.42°34'E., 20 ft.; and N.42°34'W., 1,431.84 ft.  
 Oro Alto lode, S.44°31'E., 304 ft.; and N.44°31'W., 1,131.10 ft.  
 Oro Rico lode, S.44°31'E., 170 ft.; and N.44°31'W., 1,265.10 ft.  
 Cougar lode, S.45°50'W., 900 ft.; and N.45°50'E., 600 ft.  
 Oro Real lode, S.45°50'W., 510 ft.; and N.45°50'E., 976.59 ft.  
 J. W. Merritt lode, S.45°50'W., 1,240 ft.; and N.45°50'S., 260 ft.  
 Peter Applegate lode, S.45°50'W., 22 ft.; and N.45°50'E., 1,478.00 ft.  
 Oro Escondido lode, S.45°50'W., 1,258.41 ft.; and N.45°50'E., 190.00 ft.  
 W. C. Leever lode, S.45°50'W., 83 ft.; and N.45°50'E., 1,417.00 ft.  
 Mark Applegate lode, S.45°50'W., 1,499.00 ft.; and N.45°50'E., 1.00 ft.  
 H. McKenzie lode, S.45°50'W., 5.00 ft.; and N.45°50'E., 1,481.59 ft.  
 J. L. Grubb lode, S.45°50'W., 1,060.41 ft.; and N.45°50'E., 388 ft.  
 J. D. McKinnon lode, S.45°50'W., 233 ft.; and N.45°50'E., 1,267.00 ft.  
 Henry Applegate lode, S.45°50'W., 1,495.00 ft.; and N.45°50'E., 5.00 ft.  
 A. W. Dahlberg lode, S.44°10'E., 260.00 ft.; and N.44°10'W., 1,240.00 ft.  
 Telluride lode, S.45°50'W., 70 ft.; and N.45°50'E., 1,360.93 ft.  
 Alabama lode, S.45°50'W., 8 ft.; and N.45°50'E., 1,452 ft.  
 Rainboe lode, S.44°10'E., 320 ft.; and N.44°10'W., 1,180 ft.  
 Delia McKinnon lode, S.44°10'E., 390.00 ft.; and N.44°10'W., 1,110.00 ft.  
 Sulphide lode, S.45°50'W., 787.93 ft.; and N.45°50'E., 643.00 ft.  
 Staples lode, S.45°50'W., 310.00 ft.; and N.45°50'E., 1,150.00 ft.  
 Manganese lode, S.45°50'W., 360 ft.; and N.45°50'E., 1,070.93 ft.  
 La Jolla lode, S.45°50'W., 1,330.00 ft.; and N.45°50'E., 130.00 ft.  
 Arroyo Verde lode, S.45°50'W., 780 ft.; and N.45°50'E., 680.00 ft.

Total area, Rainbow lode.....	20.661
Total area, Delta McKinnon lode.....	20.661
Total area, Sulphide lode.....	19.710
Total area, Staples lode.....	20.110
Total area, Manganese lode.....	19.710
Total area, La Jolla lode.....	10.055
Total area, Arroyo Verde lode.....	20.110

## LOCATION

This survey is located in the SE¼ sec. 19, SE¼ and SW¼ sec. 20, SW¼ sec. 21, NW¼ sec. 28, NE¼, NW¼, SE¼ and SW¼ sec. 29, and SE¼ sec. 30, of T. 31 S., R. 2 E., of the Willamette Meridian.

The survey of the Ram, Oro Alto, Oro Rico, Cougar, Oro Real, J. W. Merritt, Peter Applegate, Oro Escondido, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, Telluride, Alabama, Rainbow, Delta McKinnon, Sulphide, Staples, Manganese, La Jolla, and Arroyo Verde lodes is identical with the respective location or amended location as marked on the ground.

## EXPENDITURE OF \$500.00

I certify that the value of the labor and improvements made upon or for the benefit of each of the lode locations embraced in said mining claim by the claimant or its grantors is not less than \$500.00, with the exception of the Ram lode, and that said improvements consist of:

No. 1 The discovery cut of the Ram lode, the face of which being the discovery point, is on the lode line 20.00 ft. from the center of line 4-1; 4 ft. wide, 8 ft. face, running N. 42° W., 10 ft. to face.

Value \$100.00

No. 2 A shaft, the center of which bears S. 75°15' E., 305.00 ft. from Cor. No. 2 Ram lode; 4 x 8 ft., 4 ft. deep.

Value \$50.00

No. 3 A cut, the east end of which bears S. 5°30' E., 100.00 ft. from Cor. No. 3 Ram lode; 3 ft. wide, 4 ft. face, running West 18 ft., partly caved.

Value \$50.00

No. 1 The discovery shaft of the Oro Alto lode, the center of which being the discovery point, is on the lode line 1,131.10 ft. from center of line 1-2; 6 x 11 ft., 6 ft. deep, partly caved.

Value \$100.00

No. 2 A cut, the mouth of which bears S. 60° W., 120 ft. from Cor. No. 3 Oro Alto lode; 4 ft. wide, 5 ft. face, running N. 65° W., 13 ft. to face.

Value \$50.00

No. 3 A cut, the mouth of which bears S. 56° W., 100 ft. from Cor. No. 3 Oro Alto lode; 8 ft. wide, 10 ft. face, running N. 64° W., 20 ft. to face, partly caved.

**Value \$100.00**

No. 4 A cut, the mouth of which bears S. 70° W., 35 ft. from Cor. No. 3 Oro Alto lode; 8 ft. wide, 6 ft. face, running N. 10° W., 20 ft. to face, partly caved.

**Value \$75.00**

No. 1 Discovery shaft of the Oro Rico lode, the center of which being the discovery point, is on the lode line 1,265.10 ft. from center of line 1-2; 6 x 8 ft., 10 ft. deep, partly caved.

**Value \$125.00**

No. 2 A tunnel, 6 x 7 ft. in size, the portal of which bears N. 33°21' E. 321.08 ft. from Cor. No. 4 Oro Rico lode; running N. 81° W., 30 ft. to pt. A, and 50 ft. to breast. At pt. A is a drift 5 x 7 ft. in size, running N. 60° W., 31 ft. to pt. B; thence N. 30° W., 6 ft. to breast.

**Value of tunnel and drift \$1,200.00**

No. 3 A shaft, the center of which bears N. 23°30' E., 310 ft. from Cor. No. 4 Oro Rico lode; 6 x 20 ft., 10 ft. deep.

**Value \$150.00**

No. 4 A cut, the mouth of which bears N. 9°30' W., 322 ft. from Cor. No. 4 Oro Rico lode; 8 ft. wide, 7 ft. face, running S. 82° W., 17 ft. to face.

**Value \$100.00**

No. 5 A cut, the mouth of which bears N. 50°40' E., 260 ft. from Cor. No. 1 Oro Rico lode; 6 ft. wide, 6 ft. face, running N. 5° E., 25 ft. to face, partly caved.

**Value \$100.00**

No. 1 Discovery shaft of the Cougar lode, the center of which being the discovery point, is on the lode line 900 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 4 x 7 ft., 9 ft. deep, partly caved.

**Value \$100.00**

No. 2 A cut, the mouth of which is on the lode line of the Cougar lode 835 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 5 ft. wide, 4 ft. face, running west 14 ft. to face.

**Value \$50.00**

No. 3 A cut, the mouth of which bears N. 63°50' E., 835 ft. from Cor. No. 1 Cougar lode; 5 ft. wide, 4 ft. face, running N. 80° E., 10 ft. to face, partly caved.

**Value \$35.00**

No. 4 A cut, the mouth of which bears N. 60°40' E., 922 ft. from Cor. No. 1 Cougar lode; 4 ft. wide, 4 ft. face, running N. 60° E., 10 ft. to face, partly caved.

**Value \$35.00**

No. 5 A cut, the mouth of which bears S. 32°50' E., 295 ft. from Cor. No. 2 Cougar lode; 5 ft. wide, 6 ft. face, running N. 70° W., 13 ft. to face, partly caved.

**Value \$40.00**

No. 6 A cut, the mouth of which bears S. 35°15' E., 275 ft. from Cor. No. 2 Cougar lode; 4 ft. wide, 6 ft. face, running N. 77° W., 10 ft. to face.

**Value \$35.00**

No. 7 A cut, the face of which is on the lode line of the Cougar lode 110 ft. from a point on line 2-3, 280.36 ft. from Cor. No. 2; 6 ft. wide, 6 ft. face, running N. 45° W., 16 ft. to face.

**Value \$100.00**

No. 8 A cut, the mouth of which bears N. 50°15' W., 280 ft. from Cor. No. 3 Cougar lode; 5 ft. wide, 10 ft. face, running N. 65° W., 14 ft. to face, partly caved.

**Value \$75.00**

No. 9 A tunnel, 5x7 ft. in size, the portal of which bears N. 46° E., 400 ft. from Cor. No. 4 Cougar lode; running S. 80° W., 40 ft. to breast, partly caved.

**Value \$350.00**

No. 1 Discovery shaft of the Oro Real lode, the center of which being the discovery point, is on the lode line 976.59 ft. from a point on line 1-2, 280.36 ft. from Cor. No. 1; 6x12 ft., 8 ft. deep.

**Value \$100.00**

No. 2 A cut, the mouth of which bears N. 76° E., 500 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 8 ft. face, running N. 45° E., 20 ft. to face, partly caved.

**Value \$100.00**

No. 3 A tunnel, 6x7 ft. in size, and known as No. 8, the portal of which bears N. 17°59' W.; 209.35 ft. from Cor. No. 3 Oro Real lode; running N. 52° E., 135 ft. to breast, partly caved.

**Value \$2,000.**

No. 4 A cut, the mouth of which bears S. 57°30' E., 255 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 10 ft. face, running S. 46° W., 10 ft. to face.  
Value \$125.

No. 5 A cut, the mouth of which bears S. 30°30' E., 110 ft. from Cor. No. 1 Oro Real lode; 6 ft. wide, 4 ft. face, running S. 5° W., 20 ft. to face.  
Value \$50.

No. 1 Discovery cut of the J. W. Merritt lode, the face of which being the discovery point, is on the lode line 200 ft. from a point on line 1-2, 253.02 ft. from Cor. No. 1; 4 ft. wide, 8 ft. face, running N. 45° W., 12 ft. to face.  
Value \$100.

No. 2 A cut, the mouth of which is on the lode line of the J. W. Merritt lode 185 ft. from a point on line 1-2, 253.02 ft. from Cor. No. 1; 4 ft. wide, 7 ft. face, running S. 40° W., 14 ft. to face.  
Value \$75.

No. 3 A shaft, the center of which bears S. 27°15' E., 250 ft. from Cor. No. 1 J. W. Merritt lode; 4x5 ft., 4 ft. deep, partly caved.  
Value \$45.

No. 4 A shaft, the center of which is on the lode line of the J. W. Merritt lode 80 ft. from a point on line 1-2, 253.02 ft. from Cor. No. 1; 4x6 ft. 5 ft. deep.  
Value \$70.

No. 1 Discovery shaft of the Peter Applegate lode, the south side of which being the discovery point, is on the lode line 22 ft. from a point on line 4-1, 253.02 ft. from Cor. No. 1; 4x6 ft., 4 ft. deep.  
Value \$40.

No. 2 A shaft, the center of which bears S. 86°10' E., 390 ft. from Cor. No. 1 Peter Applegate lode; 4x6 ft., 4 ft. deep.  
Value \$70.

No. 3 A shaft, the center of which bears S. 51°30' E., 270 ft. from Cor. No. 1 Peter Applegate lode; 4x5 ft., 4 ft. deep.  
Value \$45.

No. 4 A shaft, the center of which bears N. 54°25' E., 1380 ft. from Cor. No. 1 Peter Applegate lode; 4x8 ft., 6 ft. deep.  
Value \$100.

No. 5 A cut, the face of which bears N. 85° E., 200 ft. from Cor. No. 1 Peter Applegate lode; 5 ft. wide, 6 ft. face, running N. 83° W., 15 ft. to face.  
Value \$70.

No. 6 A cut, the mouth of which bears N. 6°10' W., 350 ft. from Cor. No. 4 Peter Applegate lode; 5 ft. wide, 4 ft. face, running N. 5° E., 16 ft. to face, partly caved.  
Value \$60.

No. 1 Discovery cut of the Oro Escondido lode, the center of which being the discovery point, is on the lode line, 1,258.41 ft., from a point on line 4-1, 253.02 ft. from Cor. No. 1; 12 ft. wide, 8 ft. face, running S. 70° E., 7 ft. to mouth and N. 70° W., 7 ft. to face.  
Value \$150.

No. 2 A cut, the mouth of which bears N. 38° E., 45 ft. from Cor. No. 4 Oro Escondido lode; 8 ft. wide, 5 ft. face, running N. 65° W., 12 ft. to face.  
Value \$100.

No. 1 Discovery cut of the W. C. Leever lode, the face of which being the discovery point, is on the lode line, 83 ft. from a point on line 1-2, 300 ft. from Cor. No. 1; 5 ft. wide, 6 ft. face, running W., 15 ft. to face.  
Value \$85.

No. 2 A cut, the mouth of which bears N. 42° W., 182 ft. from Cor. No. 1 W. C. Leever lode; 4 ft. wide, 6 ft. face, running N. 55°30' E., 10 ft. to face.  
Value \$60.

No. 3 A cut, the face of which bears N. 28° W., 360 ft. from Cor. No. 1 W. C. Leever lode; 12 ft. wide, 8 ft. face, running S. 53° W., 15 ft. to face.  
Value \$200.

No. 1 Discovery tunnel of the Mark Applegate lode, the center of which being the discovery point is on the lode line, 1,466 ft. from the center of line 4-1; 6 x 7 ft. in size and known as No. 5, the portal of which bears N. 46°36' W., 175.46 ft. from Cor. No. 3, Mark Applegate lode, running N. 41°35' W., 51.25 ft. to Sta. 2; thence N. 40°05' W., 49.7 ft. to Sta. 3, and N. 61°39' E., 70.4 ft. to breast. At Sta. 3 a tunnel, 5 x 7 ft. in size, runs N. 41°04' W., 49.15 ft. to Sta. 4 and S. 43°32' W., 53.15 ft. to breast. At Sta. 4 the tunnel runs N. 3°41' E., 21.45 ft. to breast, partly caved.  
Value \$3,500.

Value \$100.00

No. 4 A cut, the mouth of which bears S. 70° W., 35 ft. from Cor. No. 3 Oro Alto lode; 8 ft. wide, 6 ft. face, running N. 10° W., 20 ft. to face, partly caved.

Value \$75.00

No. 1 Discovery shaft of the Oro Rico lode, the center of which being the discovery point, is on the lode line 1,265.10 ft. from center of line 1-2; 6 x 8 ft., 10 ft. deep, partly caved.

Value \$125.00

No. 2 A tunnel, 6 x 7 ft. in size, the portal of which bears N. 33°21' E. 321.08 ft. from Cor. No. 4 Oro Rico lode; running N. 81° W., 30 ft. to pt. A, and 50 ft. to breast. At pt. A is a drift 5 x 7 ft. in size, running N. 60° W., 31 ft. to pt. B; thence N. 30° W., 6 ft. to breast.

Value of tunnel and drift \$1,200.00

No. 3 A shaft, the center of which bears N. 23°30' E., 310 ft. from Cor. No. 4 Oro Rico lode; 6 x 20 ft., 10 ft. deep.

Value \$150.00

No. 4 A cut, the mouth of which bears N. 9°30' W., 322 ft. from Cor. No. 4 Oro Rico lode; 8 ft. wide, 7 ft. face, running S. 82° W., 17 ft. to face.

Value \$100.00

No. 5 A cut, the mouth of which bears N. 50°40' E., 260 ft. from Cor. No. 1 Oro Rico lode; 6 ft. wide, 6 ft. face, running N. 5° E., 25 ft. to face, partly caved.

Value \$100.00

No. 1 Discovery shaft of the Cougar lode, the center of which being the discovery point, is on the lode line 900 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 4 x 7 ft., 9 ft. deep, partly caved.

Value \$100.00

No. 2 A cut, the mouth of which is on the lode line of the Cougar lode 835 ft. from a point on line 4-1, 280.36 ft. from Cor. No. 1; 5 ft. wide, 4 ft. face, running west 14 ft. to face.

Value \$50.00

No. 3 A cut, the mouth of which bears N. 63°50' E., 835 ft. from Cor. No. 1 Cougar lode; 5 ft. wide, 4 ft. face, running N. 80° E., 10 ft. to face, partly caved.

Value \$35.00

No. 4 A cut, the mouth of which bears N. 60°40' E., 922 ft. from Cor. No. 1. Cougar lode; 4 ft. wide, 4 ft. face, running N. 60° E., 10 ft. to face, partly caved.

Value \$35.00

No. 5 A cut, the mouth of which bears S. 32°50' E., 295 ft. from Cor. No. 2 Cougar lode; 5 ft. wide, 6 ft. face, running N. 70° W., 13 ft. to face, partly caved.

Value \$40.00

No. 6 A cut, the mouth of which bears S. 35°15' E., 275 ft. from Cor. No. 2 Cougar lode; 4 ft. wide, 6 ft. face, running N. 77° W., 10 ft. to face.

Value \$35.00

No. 7 A cut, the face of which is on the lode line of the Cougar lode 110 ft. from a point on line 2-3, 280.36 ft. from Cor. No. 2; 6 ft. wide, 6 ft. face, running N. 45° W., 16 ft. to face.

Value \$100.00

No. 8 A cut, the mouth of which bears N. 50°15' W., 280 ft. from Cor. No. 3 Cougar lode; 5 ft. wide, 10 ft. face, running N. 65° W., 14 ft. to face, partly caved.

Value \$75.00

No. 9 A tunnel, 5x7 ft. in size, the portal of which bears N. 46° E., 400 ft. from Cor. No. 4 Cougar lode; running S. 80° W., 40 ft. to breast, partly caved.

Value \$350.00

No. 1 Discovery shaft of the Oro Real lode, the center of which being the discovery point, is on the lode line 976.59 ft. from a point on line 1-2, 280.36 ft. from Cor. No. 1; 6x12 ft., 8 ft. deep.

Value \$100.00

No. 2 A cut, the mouth of which bears N. 76° E., 500 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 8 ft. face, running N. 45° E., 20 ft. to face, partly caved.

Value \$100.00

No. 3 A tunnel, 6x7 ft. in size, and known as No. 8, the portal of which bears N. 17°59' W.; 209.35 ft. from Cor. No. 3 Oro Real lode; running N. 52° E., 135 ft. to breast, partly caved.

Value \$2,000.

No. 4 A cut, the mouth of which bears S. 57°30' E., 253 ft. from Cor. No. 4 Oro Real lode; 6 ft. wide, 10 ft. face, running S. 46° W., 10 ft. to face.

Value \$125.

No. 5 A cut, the mouth of which bears S. 30°30' E., 110 ft. from Cor. No. 1 Oro Real lode; 6 ft. wide, 4 ft. face, running S. 5° W., 20 ft. to face.

Value \$50.

No. 1 Discovery cut of the J. W. Merritt lode, the face of which being the discovery point, is on the lode line 200 ft. from a point on line 1-2, 253.02 ft. from Cor. No. 1; 4 ft. wide, 8 ft. face, running N. 45° W., 12 ft. to face.

Value \$100.

No. 2 A cut, the mouth of which is on the lode line of the J. W. Merritt lode 185 ft. from a point on line 1-2, 253.02 ft. from Cor. No. 1; 4 ft. wide, 7 ft. face, running N. 40° W., 14 ft. to face.

Value \$75.

No. 3 A shaft, the center of which bears S. 27°15' E., 250 ft. from Cor. No. 1 J. W. Merritt lode; 4x5 ft., 4 ft. deep, partly caved.

Value \$45.

No. 4 A shaft, the center of which is on the lode line of the J. W. Merritt lode 80 ft. from a point on line 1-2, 253.02 ft. from Cor. No. 1; 4x6 ft. 6 ft. deep.

Value \$50.

No. 1 Discovery shaft of the Peter Applegate lode, the south side of which being the discovery point, is on the lode line 22 ft. from a point on line 4-1, 253.02 ft. from Cor. No. 1; 4x6 ft., 4 ft. deep.

Value \$40.

No. 2 A shaft, the center of which bears S. 86°10' E., 350 ft. from Cor. No. 1 Peter Applegate lode; 4x6 ft., 4 ft. deep.

Value \$50.

No. 3 A shaft, the center of which bears S. 51°30' E., 270 ft. from Cor. No. 1 Peter Applegate lode; 4x5 ft., 4 ft. deep.

Value \$35.

No. 4 A shaft, the center of which bears N. 54°25' E., 1350 ft. from Cor. No. 1 Peter Applegate lode; 4x5 ft., 6 ft. deep.

Value \$100.

No. 5 A cut, the face of which bears N. 85° E., 200 ft. from Cor. No. 1 Peter Applegate lode; 5 ft. wide, 6 ft. face, running N. 83° W., 15 ft. to face.

Value \$70.

No. 6 A cut, the mouth of which bears N. 6°10' W., 350 ft. from Cor. No. 4 Peter Applegate lode; 5 ft. wide, 4 ft. face, running N. 5° E., 16 ft. to face, partly caved.

Value \$60.

No. 1 Discovery cut of the Oro Escondido lode, the center of which being the discovery point, is on the lode line, 1,258.41 ft., from a point on line 4-1, 253.02 ft. from Cor. No. 1; 12 ft. wide, 8 ft. face, running S. 70° E., 7 ft. to mouth and N. 70° W., 7 ft. to face.

Value \$150.

No. 2 A cut, the mouth of which bears N. 38° E., 45 ft. from Cor. No. 4 Oro Escondido lode; 8 ft. wide, 5 ft. face, running N. 65° W., 12 ft. to face.

Value \$100.

No. 1 Discovery cut of the W. C. Loever lode, the face of which being the discovery point, is on the lode line, 83 ft. from a point on line 1-2, 300 ft. from Cor. No. 1; 5 ft. wide, 6 ft. face, running W., 15 ft. to face.

Value \$85.

No. 2 A cut, the mouth of which bears N. 42° W., 182 ft. from Cor. No. 1 W. C. Loever lode; 4 ft. wide, 6 ft. face, running N. 55°30' E., 10 ft. to face.

Value \$60.

No. 3 A cut, the face of which bears N. 28° W., 300 ft. from Cor. No. 1 W. C. Loever lode; 12 ft. wide, 8 ft. face, running S. 53° W., 15 ft. to face.

Value \$200.

No. 1 Discovery tunnel of the Mark Applegate lode, the center of which being the discovery point is on the lode line, 1,439 ft. from the center of line 4-1; 6 x 7 ft. in size and known as No. 5, the portal of which bears N. 46°36' W., 175.46 ft. from Cor. No. 3, Mark Applegate lode, running N. 41°35' W., 51.25 ft. to Sta. 2; thence N. 40°05' W., 49.7 ft. to Sta. 3, and N. 61°30' E., 70.4 ft. to breast. At Sta. 3 a tunnel, 5 x 7 ft. in size, runs N. 41°04' W., 49.15 ft. to Sta. 4 and S. 43°32' W., 53.15 ft. to breast. At Sta. 4 the tunnel runs N. 3°41' E., 21.45 ft. to breast, partly caved.

Value \$3,500.

No. 2 A shaft, the center of which bears S. 11°06' E., 291.68 ft. from Cor. No. 2, Mark Applegate lode; 4 x 6 ft., 10 ft. deep.

Value \$100.

No. 1 Discovery shaft of the H. McKenzie lode, the center of which being the discovery point is on the lode line 1,481.59 ft. from center of line 1-2; 4 x 6 ft., 6 ft. deep.

Value \$75.

No. 2 A shaft, the center of which bears S. 62°30' E., 280 ft. from Cor. No. 4, H. McKenzie lode; 4 x 10 ft., 8 ft. deep.

Value \$100.

No. 3 A tunnel, 5 x 7 ft. in size, known as No. 3, the portal of which bears N. 9°16' E., 321.81 ft. from Cor. No. 3 H. McKenzie lode; running N. 43° W., 12 ft. to Sta. A; thence S. 44° W., 9 ft. to breast, and N. 44° E., 10 ft. to breast. At Sta. A a winze with an inclination of 35° runs N. 40° W., 23 ft. to bottom.

Value of tunnel and winze \$700.

No. 1 Discovery cut of the J. L. Grubb lode, the center of which being the discovery point is on the lode line, 388 ft. from the center of line 4-1; 5 ft. wide, 10 ft. face, running S. 10 ft. to the mouth and N. 10 ft. to face.

Value \$200.

No. 2 A shaft, the center of which bears S. 84° W., 450 ft. from Cor. No. 1, J. L. Grubb lode; 5 x 8 ft., 6 ft. deep.

Value \$75.

No. 3 A cut, the mouth of which bears S. 65°20' W., 587 ft. from Cor. No. 1, J. L. Grubb lode; 5 ft. wide, 6 ft. face, running S. 65° W., 20 ft. to face.

Value \$150.

No. 4 A shaft, the center of which bears S. 63°50' W., 550 ft. from Cor. No. 1, J. L. Grubb lode; 4 x 10 ft., 6 ft. deep.

Value \$75.

No. 5 A cut, the mouth of which bears N. 4°10' W., 265 ft. from Cor. No. 2, J. L. Grubb lode; 16 ft. wide, 12 ft. face, running N. 6 ft. to face.

Value \$125.

No. 1 Discovery shaft of the J. D. McKinnon lode, the center of which being the discovery point is on the lode line 233 ft. from the center of line 1-2; 4 x 6 ft., 8 ft. deep.

Value \$75.

No. 2 A cut, the face of which bears N. 3°10' W., 363 ft. from Cor. No. 1, J. D. McKinnon lode; 5 ft. wide, 10 ft. face, running N. 80° W., 24 ft. to face.

Value \$175.

No. 3 A cut, the mouth of which bears N. 30°15' W., 242 ft. from Cor. No. 1, J. D. McKinnon lode; 4 ft. wide, 4 ft. face, running N. 21° W., 16 ft. to face.

Value \$50.

No. 1 Discovery shaft of the Henry Applegate lode, the center of which being the discovery point is on the lode line, 1,495 ft. from the center of line 4-1; 4 x 6 ft., 7 ft. deep.

Value \$75.

No. 2 A cut, the face of which bears N. 79° E., 372 ft. from Cor. No. 1, Henry Applegate lode; 5 ft. wide, 8 ft. face, running N. 24° E., 27 ft. to face.

Value \$100.

No. 3 A cut, the mouth of which bears N. 73°45' E., 140 ft. from Cor. No. 1, Henry Applegate lode; 4 ft. wide, 5 ft. face, running N. 77° E., 38 ft. to face.

Value \$200.

No. 1 Discovery cut of the A. W. Dahlberg lode, the face of which being the discovery point is on the lode line 260 ft. from the center of line 1-2; 6 ft. wide, 6 ft. face, running N. 19 ft. to face.

Value \$125.

No. 2 A cut, the face of which bears S. 16°05' E., 365 ft. from Cor. No. 4, A. W. Dahlberg lode; 5 ft. wide, 8 ft. face, running N. 61°30' W., 22 ft. to face. At the face of cut is the portal of a tunnel, 5x7 ft. in size, running N. 9° W., 15 ft. to breast.

Value of cut and tunnel \$300.

No. 3 A cut, the face of which bears N. 83° W., 90 ft. from Cor. No. 1, A. W. Dahlberg lode; 6 ft. wide, 5 ft. face, running N. 31° E., 12 ft. to face.

Value \$75.

No. 1 Discovery cut of the Telluride lode, the face of which being the discovery point is on the lode line 1,360.93 ft. from the center of line 1-2; 4 ft. wide, 10 ft. face, running N. 14° W., 10 ft. to face.

Value \$100.

No. 2 A tunnel, 5x7 ft. in size, known as No. 4, the portal of which bears N. 68° 54' E., 118.97 ft. from Cor. No. 4 Telluride lode, running north 12 ft. to Sta. 1; thence N. 30° 15' E., 15 ft. to Sta. 2; thence N. 3° E., 20 ft. to Sta. 3; thence N. 85° W., 5 ft. to breast, and S. 85° E., 15 ft. to breast.

Value \$850

No. 3 A cut, the face of which bears S. 33° 30' E., 278 ft. from Cor. No. 1 Telluride lode; 6 ft. wide, 5 ft. face, running N. 75° 15' W., 12 ft. to face.

Value \$50

No. 4 A cut, the face of which bears S. 52° 10' W., 415 ft. from Cor. No. 2 Telluride lode; 5 ft. wide, 10 ft. face, running N. 50° W., 12 ft. to face.

Value \$90

No. 1 Discovery cut of the Alabama lode, the center of which being the discovery point is on the lode line 1,452 ft. from the center of line 1-2; 4 ft. wide, 6 ft. face, running N. 15° W., 5 ft. to face and S. 15° E., 5 ft. to mouth.

Value \$75

No. 2 A cut, the face of which bears S. 31° 25' W., 930 ft. from Cor. No. 1 Alabama lode; 5 ft. wide, 7 ft. face, running N. 51° 15' W., 16 ft. to face.

Value \$100

No. 1 Discovery cut of the Rainbow lode, the face of which being the discovery point, is on the lode line 320 ft. from center of line 1-2; 8 ft. wide, 8 ft. face, running N. 63° 30' W., 15 ft. to face.

Value \$100

No. 2 A shaft, the center of which bears S. 7° W., 455 ft. from Cor. No. 2 Rainbow lode; 4x6 ft., 3 ft. deep.

Value \$35

No. 3 A shaft, the center of which bears N. 15° 30' W., 462 ft. from Cor. No. 2 Rainbow lode; 8x8 ft., 4 ft. deep.

Value \$70

No. 4 A shaft, the center of which bears S. 80° W., 320 ft. from Cor. No. 1 Rainbow lode; 4x6 ft., 5 ft. deep, partly caved.

Value \$20

No. 5 A cut, the mouth of which bears N. 49° 15' W., 574 ft. from Cor. No. 1 Rainbow lode; 5 ft. wide, 10 ft. face, running N. 44° W., 20 ft. to face.

Value \$125

No. 6 A shaft, the center of which bears N. 51° 20' W., 624 ft. from Cor. No. 1 Rainbow lode; 10x8 ft., 6 ft. deep, partly caved.

Value \$100

No. 1 Discovery cut of the Della McKinnon lode, the center of which being the discovery point, is on the lode line 300 ft. from the center of line 1-2; 5 ft. wide, 10 ft. face, running S. 71° E., 12 ft. to mouth and N. 71° W., 12 ft. to face.

Value \$165

No. 2 A shaft, the center of which bears N. 84° W., 450 ft. from Cor. No. 1 Della McKinnon lode; 6x6 ft., 5 ft. deep.

Value \$60

No. 3 A cut, the face of which bears S. 80° W., 310 ft. from Cor. No. 1 Della McKinnon lode; 4 ft. wide, 4 ft. face, running N. 5° W., 20 ft. to face, partly caved.

Value \$75

No. 4 A shaft, the center of which is on the lode line 134 ft. from the center of line 1-2 Della McKinnon lode; 4x8 ft., 4 ft. deep.

Value \$50

No. 5 A cut, the face of which bears N. 48° 15' W., 410 ft. from Cor. No. 1 Della McKinnon lode; 8 ft. wide, 10 ft. face, running N. 76° 30' W., 15 ft. to face.

Value \$75

No. 6 A cut, the mouth of which bears N. 56° W., 582 ft. from Cor. No. 1 Della McKinnon lode; 5 ft. wide, 10 ft. face, running N. 74° W., 22 ft. to face.

Value \$100

No. 1 Discovery shaft of the Sulphide lode, the center of which being the discovery point, is on the lode line 643 ft. from the center of line 4-1; 4x11 ft., 4 ft. deep.

Value \$50

No. 2 A shaft, the center of which bears N. 16° 10' E., 528 ft. from Cor. No. 2 Sulphide lode; 5x8 ft., 10 ft. deep.

Value \$100

No. 3 A shaft, the center of which bears N. 67° E., 700 ft. from Cor. No. 3 Sulphide lode; 4x10 ft., 6 ft. deep.

Value \$75

No. 4 A shaft, the center of which bears N.65°45'E., 742 ft. from Cor. No. 3 Sulphide lode; 6x9 ft., 7 ft. deep.

Value \$75.

No. 5 A shaft, the center of which bears S.22°W., 724 ft. from Cor. No. 4 Sulphide lode; 4x8 ft., 3 ft. deep, partly caved.

Value \$35.

No. 6 A shaft, the center of which bears N.0°32'W., 287.51 ft. from Cor. No. 2 Sulphide lode; 5x10 ft., 10 ft. deep.

Value \$125.

No. 7 A cut, the face of which bears S.18°05'W., 780 ft. from Cor. No. 4 Sulphide lode; 4 ft. wide, 5 ft. face, running N.5°E., 20 ft. to face.

Value \$60.

No. 8 A cut, the face of which bears S.18°15'W., 847 ft. from Cor. No. 4 Sulphide lode; 5 ft. wide, 6 ft. face, running North 16 ft. to face.

Value \$60.

No. 9 A cut, the face of which bears S. 20° E., 73 ft. from Cor. No. 4, Sulphide lode; 5 ft. wide, 10 ft. face, running S. 83° 30' E., 7 ft. to face, partly caved.

Value \$50.

No. 1 Discovery cut of the Staples lode, the face of which being the discovery point, is on the lode line 1,150 ft. from the center of line 1-2; 6 ft. wide, 10 ft. face, running N. 64° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which bears S. 61° W., 718 ft. from Cor. No. 2, Staples lode; 6 ft. wide, 5 ft. face, running N. 45° E., 12 ft. to face, partly caved.

Value \$75.

No. 3 A cut, the face of which bears S. 55° E., 75 ft. from Cor. No. 4, Staples lode; 12 ft. wide, 10 ft. face, running S. 72° E., 7 ft. to face.

Value \$100.

No. 1 Discovery cut of the Manganese lode, the face of which being the discovery point, is on the lode line 1,070.93 ft. from the center of line 4-1; 5 ft. wide, 9 ft. face, running North 7 ft. to face.

Value \$80.

No. 2 A cut, the face of which is on the lode line 1,010 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 4 ft. face, running N. 88° W., 8 ft. to face.

Value \$40.

No. 3 A cut, the face of which is on the lode line 818 ft. from the center of line 4-1, Manganese lode; 5 ft. wide, 7 ft. face, running N. 5° W., 12 ft. to face.

Value \$75.

No. 4 A cut, the face of which bears S. 61° 30' W., 800 ft. from Cor. No. 1, Manganese lode; 5 ft. wide, 2 ft. face, running N. 34° W., 15 ft. to face.

Value \$35.

No. 1 Discovery cut of the La Jolla lode, the face of which being the discovery point, is on the lode line 1,330 ft. from the center of line 1-2; 8 ft. wide, 6 ft. face, running N. 46° E., 12 ft. to face.

Value \$100.

No. 2 A cut, the face of which is on the lode line 90 ft. from the center of line 3-4, La Jolla lode; 12 ft. wide, 5 ft. face, running N. 46° E., 6 ft. to face.

Value \$65.

No. 3 A shaft, the center of which bears S. 31° 30' E., 82 ft. from Cor. No. 3, La Jolla lode; 5 x 6 ft., 8 ft. deep.

Value \$75.

No. 1 Discovery cut of the Arroyo Verde lode, the center of which being the discovery point, is on the lode line 780 ft. from the center of line 1-2; 8 ft. wide, 10 ft. face, running S. 5° W., 8 ft. to mouth and N. 5° E., 8 ft. to face.

Value \$150.

A common improvement described as follows:

No. 1 A tunnel, 6x7 ft. in size, known as No. 2, the portal of which bears N. 53°39' W., 772.12 ft. from Cor. No. 1 A. W. Dahlberg lode, running N. 51°17' W., 28 ft. to Sta. A1; thence N. 33°32' W., 24 ft. to pt. AX and 40.44 ft. to Sta. A2, and North 25 ft. to pt. X. At pt. X a drift, 5x7 ft. in size, runs N. 40° W., 30 ft. to breast. At pt. AX a crosscut, 5x7 ft. in size, runs West 20 ft. to breast. At Sta. A2 a tunnel, 6x7 ft. in size, runs N. 39°35' W., 66.26 ft. to Sta. A3; thence N. 59°49' W., 38.82 ft. to Sta. A4; thence N. 60°37' W., 121.45 ft. to Sta. A5; thence N. 78°38' W., 170.33 ft. to Sta. A6; thence N. 41°45' W., 179.05 ft. to Sta. A7; thence N. 39°04' W., 71.22 ft. to Sta. A8; thence N. 33°40' W., 62.05 ft. to Sta. A9; thence N. 44°52' W., 129.74 ft. to Sta. A10; thence N. 44°52' W., 141.06

ft. to pt. X1 and 215.56 ft. to Sta. A15. At Sta. A10 a crosscut, 10x7 ft. in size, runs S. 42° 00' E., 9.73 ft. to Sta. A16 and a crosscut, 6x7 ft. in size, runs S. 38° W., 13 ft. to Sta. A11; thence S. 72° W., 25 ft. to Sta. A12; thence S. 00° W., 105 ft. to Sta. A13; thence S. 48° W., 61 ft. to breast. At Sta. A10 a drift, 6x7 ft. in size, runs N. 39° 51' W., 10 ft. to pt. D and 140 ft. to Sta. Y. This drift also runs S. 54° 45' E., 23 ft. to breast. A crosscut, 6x7 ft. in size, beginning at Sta. A16 runs N. 52° 30' E., 30 ft. to breast. Pt. D is at the beginning of No. 1 slope which averages 38 ft. long, 5 ft. wide and 125 ft. high. At pt. X1 a crosscut, 8x7 ft. in size, runs N. 40° E., 25 ft. and connects with the drift at Sta. Y. At Sta. A15 a drift, 7x7 ft. in size, runs N. 50° 30' W., 21.92 ft. to Sta. A18, and a crosscut, 10x7 ft. in size, runs N. 27° 27' E., 15 ft. to Sta. A17. At Sta. A17 a drift, 8x7 ft. in size, runs N. 45° W., 15 ft. to breast; a crosscut, 6x7 ft. in size, runs N. 41° E., 24 ft. to a caved breast, and a drift, 6x7 ft. in size, runs S. 38° E., 15 ft. to breast. Sta. A17 is below a two compartment raise 5x10 ft. in size, running up 30 ft. to slope No. 4, which averages 30 ft. long, 5 ft. wide and 30 ft. high. Sta. Y is in the center of slope 2-3 which averages 55 ft. long, 5 ft. wide and 150 ft. high. At Sta. Y a drift, 7x7 ft. in size, runs N. 40° W., 44 ft. to Sta. Z; thence N. 70° W., 30 ft. to Sta. A17. At Sta. A18 a drift, 6x7 ft. in size, runs N. 25° 31' W., 36.29 ft. to Sta. A19; thence N. 38° W., 22.34 ft. to Sta. A20, and N. 16° 35' E., 40 ft. to the breast of a crosscut, 5x7 ft. in size. Sta. A19 is the beginning of slope No. 5, which averages 35 ft. long, 5 ft. wide, and 50 ft. high. At Sta. A20 a drift, 6x7 ft. in size, runs N. 40° 11' W., 62.85 ft. to Sta. A21; thence N. 30° 30' W., 60.20 ft. to Sta. A22. A crosscut, 5x7 ft. in size, which begins at Sta. A21 runs S. 57° W., 50 ft. to breast, partly filled. Sta. A21 is at the beginning of slope 6-7 which averages 30 ft. long, 5 ft. wide and 110 ft. high. Sta. A22 is below the center of slope No. 8, which averages 40 ft. long, 5 ft. wide, and 55 ft. high. At Sta. A22 a drift, 6x7 ft. in size, runs N. 25° 15' W., 38.92 ft. to Sta. A23; thence N. 32° W., 80.82 ft. to Sta. A24; thence N. 36° 25' W., 53.6 ft. to breast. Sta. A23 is at the beginning of slope No. 9 which averages 22 ft. long, 5 ft. wide, and 55 ft. high.

No. 2. A tunnel, 6x7 ft. in size, known as No. 1, the portal of which bears S. 20° 03' W., 521.92 ft. from Cor. No. 2 Peter Applegate lode, running S. 74° 48' E., 176 ft. to Sta. B3; thence S. 73° 57' E., 112.73 ft. to Sta. B4; thence N. 55° 13' E., 527.43 ft. to Sta. B5; thence N. 77° 37' E., 53.5 ft. to breast. At Sta. B5 a drift, 7x7 ft. in size, runs N. 47° 16' W., 20 ft. to pt. A and 87.5 ft. to Sta. B0. Pt. A is at the top of a raise, 5x8 ft. in size, which comes up from slope No. 4 and connects with No. 2 tunnel at Sta. A17. The raise has a length of 280 ft. and partly timbered. At Sta. B6 a drift, 7x7 ft. in size, runs N. 33° 07' W., 25.91 ft. to Sta. B7; thence N. 40° 06' W., 27.6 ft. to Sta. B8; thence N. 28° 19' W., 19 ft. to breast. At Sta. B5 a drift, 7x7 ft. in size, runs S. 37° 17' E., 45 ft. to pt. B and 100 ft. to breast. A slope, the center of which is above pt. B, averages 80 ft. long, 5 ft. wide and 60 ft. high. Pt. B is also the center of a slope, below the level, which averages 43 ft. long, 5 ft. wide, 50 ft. deep and connects with the raise between tunnels No. 1 and No. 2.

No. 3. A tunnel, 5x7 ft. in size, known as No. 6, the portal of which bears N. 49° 41' E., 9.37 ft. from Cor. No. 4, H. McKenzie lode, running S. 06° 20' E., 52 ft. to pt. 1 and 107 ft. to Sta. 2. At pt. 1 a crosscut, 5x7 ft. in size, runs S. 25° E., 22 ft. to breast. At Sta. 2 a crosscut, 5x7 ft. in size, runs N. 33° E., 11 ft. to the top of a raise, 5x7 ft. in size, which connects with the top of the slope above tunnel No. 1. The raise has a length of 65 ft. At Sta. 2 a 5x7 ft. drift runs S. 47° 05' E., 63 ft. to Sta. 3; thence S. 30° 30' E., 30 ft. to Sta. 4; thence S. 40° E., 46 ft. to Sta. 5. At Sta. 4 a crosscut, 5x7 ft. in size, runs S. 80° W., 48 ft. to breast. At Sta. 5 a crosscut, 5x7 ft. in size, runs N. 38° 45' E., 116 ft. to breast; another 5x7 ft. crosscut runs N. 83° 55' E., 31 ft. to breast, and a drift, 5x7 ft. in size, runs S. 4° W., 16 ft. to breast.

Value of tunnels, drifts, raises, crosscuts and slopes \$63,500.

The major portion of this improvement was made when the claimant had only ten of the lodes of this survey, as follows: J. W. Merritt, Peter Applegate, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, and Delia McKinnon. The remainder of the improvement has been made by the claimant since all of the lodes of this survey have been located, with the exception of the Ram.

Value of improvement for the benefit of 10 lodes \$55,000.

Value of one-tenth interest \$5,500.

Value of improvement for the benefit of 23 lodes \$8,500.

Value of one-twenty third interest \$339.

The rock formation covered by the lode claims of this survey is intensely sheared and has a widespread mineralization. The drifts, crosscuts and stopes described in this common development were constructed to further develop the whole area. In order to determine the quantity of the contained minerals the rock extracted in this development was milled on the ground in the flotation plant of the claimant.

Five hundred dollars or over has been expended in this improvement in such a manner as tends to the development of each lode of this survey, except the Ram lode, subsequent to its location and to the time since which common ownership and contiguity have prevailed; therefore an undivided one-twenty third interest in its value is hereby credited to each of the said lodges.

The Ram lode now has a deficiency of \$300 in the required development.

Except as above stated, no portion of or interest in this improvement has been credited heretofore as patent expenditure to any lode claim.

#### OTHER IMPROVEMENTS

A frame assay office, the east corner of which bears N.43°02'W., 511.06 ft. from Cor. No. 1, A. W. Dahlberg lode; 14x17 ft. in size, the long side bears S.31°30'W. Claimant herein.

A frame tank shed, the east corner of which bears N.47°08'W., 478.8 ft. from Cor. No. 1, A. W. Dahlberg lode; 10x38 ft. in size, the long side bears N.58°30'W. Claimant herein.

A frame building which houses a flotation mill and a diesel power plant. The east corner of the building bears N.49°14'W., 523.42 ft. from Cor. No. 1, A. W. Dahlberg lode; 56x80 ft. in size, the long side bears N.58°30'W. Claimant herein.

A frame concentrate drying shed, the south corner of which bears N.52°28'W., 497.36 ft. from Cor. No. 1, A. W. Dahlberg lode; 12x16 ft. in size, the long side bears N.31°30'W. Claimant herein.

A frame shop and timber shed, the south corner of which bears N.55°24'W., 726.02 ft. from Cor. No. 1, A. W. Dahlberg lode; 80x42 ft. in size, the long side bears N.37°30'E. Claimant herein.

A frame and log office and storehouse, the NE. corner of which bears N.57°40'W., 187 ft. from Cor. No. 1, A. W. Dahlberg lode; 18x52 ft. in size; the long side bears S.25°15'W. Claimant herein.

A frame boarding house, the NE. corner of which bears N.83°30'W., 192 ft. from Cor. No. 1, A. W. Dahlberg lode; 18x38 ft. in size; the long side bears S.25°W. Claimant herein.

A frame bunk house, the NE. corner of which bears S.85°W., 210 ft. from Cor. No. 1, A. W. Dahlberg lode; 17x32 ft. in size; the long side bears S.25°W. Claimant herein.

A frame bunk house, the NE. corner of which bears S.63°50'W., 212 ft. from Cor. No. 1, A. W. Dahlberg lode; 14x20 ft. in size; the long side bears S.20°W. Claimant herein.

A frame bunk house, the NE. corner of which bears S.56°W., 265 ft. from Cor. No. 1, A. W. Dahlberg lode; 14x16 ft. in size; the long side bears S.35°W. Claimant herein.

#### FINAL OATHS FOR SURVEYS

#### LIST OF NAMES

A list of names of the individuals employed by G. Cleveland Taylor, mineral surveyor, to assist in running, measuring, and marking the lines, corners, and boundaries described in the foregoing field notes of the survey of the mining claim of Al Sarena Mines, Inc., known as the Ram, Oro Alto, Oro Rico, Oro Real, J. W. Merritt, Peter Applegate, Oro Escondido, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg.

Telluride, Alabama, Rainboe, Della McKinnon, Sulphide, Staples, Manganese, La Jolla, and Arroyo Verde, and showing the respective capacities in which they acted.

## FINAL OATHS OF ASSISTANTS

I, J. G. Miller, do solemnly swear that I assisted G. Cleveland Taylor, mineral surveyor, in marking the corners and surveying the boundaries of the mining claim of Al Sarena Mines, Inc., known as the Ram, Oro Alto, Oro Rico, Cougar, Oro Real, J. W. Merritt, Peter Applegate, Oro Escondido, W. C. Loeffer, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, Telluride, Alabama, Rainboe, Della McKinnon, Sulphide, Staples, Manganese, La Jolla, and Arroyo Verde lodes, represented in the foregoing field notes as having been surveyed by said mineral surveyor and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, faithfully and correctly executed, and the corner and boundary monuments established according to law and the instructions furnished by the regional cadastral engineer at Portland, Oreg.

-----, *Chainman.*  
 -----, *Chainman.*  
 J. G. MILLER, *Arman.*  
 -----, *Flagman.*

Subscribed and sworn to by the above-named persons before me this 10th day of February 1948.

[SEAL]

JOSEPH J. HALL,

*Notary Public for Oregon, County of Jackson.*

My commission expires October 10, 1948.

## FINAL OATHS OF ASSISTANTS

I, Dale L. Pratt, do solemnly swear that we assisted G. Cleveland Taylor, mineral surveyor, in marking the corners and surveying the boundaries of the mining claim of Al Sarena Mines, Inc., known as the Ram, Oro Alto, Oro Rico, Cougar, Oro Real, J. W. Merritt, Peter Applegate, Oro Escondido, W. C. Loeffer, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, Telluride, Alabama, Rainboe, Della McKinnon, Sulphide, Staples, Manganese, La Jolla, and Arroyo Verde lodes represented in the foregoing field notes as having been surveyed by said mineral surveyor and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, faithfully and correctly executed, and the corner and

boundary monuments established according to law and the instructions furnished by the regional cadastral engineer at Portland, Oreg.

DALE L. PRATT, *Chairman.*

-----, *Chairman.*

J. G. MILLER, *Arman.*

-----, *Flagman.*

Subscribed and sworn to by the above-named persons before me this 10th day of February 1948.

[SEAL]

ELMER HERRIED,

*Notary Public for Oregon.*

My commission expires March 18, 1949.

## DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE

### FINAL OATH OF MINERAL SURVEYOR

I, G. Cleveland Taylor, mineral surveyor, do solemnly swear that, in pursuance of instructions received from the regional cadastral engineer, at Portland Oreg., dated October 15, 1946, I have, in strict conformity to the laws of the United States, the official regulations and instructions thereunder, and the instructions of said regional cadastral engineer, faithfully and correctly executed the survey of the mining claim of Al Sarena Mines, Inc., known as the Al Sarena group, situate in Elk Creek (unorganized) Mining District, Jackson County, Oreg., in sections 19, 20, 21, 28, 29, 30, T. 31 S., R. 2 E., Willamette meridian and designated as survey No. 879, as represented in the foregoing field notes, which accurately show the boundaries of said mining claim as distinctly marked by monuments on the ground, and described in the attached copy of the location certificate, which was received by me from the regional cadastral engineer with said instructions, and that all corners of said survey have been established and perpetuated in strict accordance with the law, official regulations and instructions thereunder; and I do further solemnly swear that the foregoing are the true and original field notes of said survey and my report therein, and that the labor expended and improvements made upon said mining claim by claimant or its grantors are as therein fully stated, and that the character, extent, location, itemized value thereof are specified therein with particularity and full detail, and that no portion of said labor or improvements so credited to this claim has been included in the estimate of expenditures upon any other claim.

G. CLEVELAND TAYLOR,

*Mineral Surveyor*

Subscribed and sworn to by the said G. Cleveland Taylor, mineral surveyor, before me, a notary public, this 4th day of March 1948.

[SEAL]

I. G. PICKENS,

*Notary Public for Oregon*

My commission expires December 9, 1951.

## CERTIFICATE OF APPROVAL OF FIELD NOTES AND SURVEY OF MINING CLAIM

UNITED STATES DEPARTMENT OF THE INTERIOR,

BUREAU OF LAND MANAGEMENT,

PUBLIC SURVEY OFFICE,

Portland, Oreg., September 7, 1948

I, regional cadastral engineer at Portland, Oreg., do hereby certify that the foregoing and hereto attached field notes and return of the survey of the mining claim of Al Sarena Mines, Inc., known as the Al Sarena group, situate in Elk Creek (unorganized) mining district in sections 19, 20, 21, 28, 29, and 30, T. 31 S., R. 2 E., Willamette meridian, designated as survey No. 879, executed by G. Cleveland Taylor, mineral surveyor, May 12 to August 6, 1948, under my instructions dated October 15, 1946, have been critically examined and the necessary corrections and explanations made, and the said field notes and return and the survey they describe, are hereby approved. The certified copy of the

location certificate filed by the applicant for survey is on file in this office and a true copy of said certified copy of said location certificate is included and made a part of the transcript of the field notes.

JOSEPH A. GARONO,  
*Regional Cadastral Engineer.*

### REGIONAL CADASTRAL ENGINEER'S FINAL CERTIFICATE ON FIELD NOTES

DEPARTMENT OF THE INTERIOR,  
PUBLIC SURVEY OFFICE,  
Portland, Oreg., September 27, 1958.

I, regional cadastral engineer at Portland, Oreg., do hereby certify that the foregoing transcript of the field notes, return and approval of the survey of the mining claim of Al Sarena Mines, Inc., known as the Al Sarena Group, situate in Elk Creek (unorganized) Mining District Jackson County, Oreg., in sections 19, 20, 21, 28, 29, and 30, T. 31 S., R. 2 E., Willamette meridian, and designated as survey No. 879, has been correctly copied from the originals on file in this office; that said field notes furnish such an accurate description of said mining claim as will, if incorporated into a patent, serve fully to identify the premises, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the locus thereof.

I further certify that \$500 worth of labor has been expended or improvements made upon, or for the benefit of, each location embraced in said mining claim by claimant or its grantors.

I further certify that the plat thereof, filed in the Oregon District Land Office at Portland, Oreg., is correct and in conformity with the foregoing field notes.

JOSEPH A. GARONO,  
*Regional Cadastral Engineer.*

UNITED STATES DEPARTMENT OF AGRICULTURE,  
FOREST SERVICE,  
Washington 25, D. C., February 15, 1956

U adjustments, Rogue River Mining Claims, Al Sarena.

Hon. CLARE E. HOFFMAN,  
*House of Representatives.*

DEAR CONGRESSMAN HOFFMAN: This will acknowledge receipt of your request of February 14 for certain correspondence in connection with the Al Sarena mining claims.

I am glad to enclose copies of the memoranda you requested of June 3 and July 14, 1955. The information from Mr. Hattan referred to in the memo of June 3 was not obtained in writing, but insofar as we have been able to learn was given verbally by Mr. Hattan to Mr. Folsom.

Sincerely yours,

RICHARD E. McARDIE, *Chief.*

JUNE 3, 1955.

Division of Timber Management,  
Recreation and lands, Frank B. Folsom.

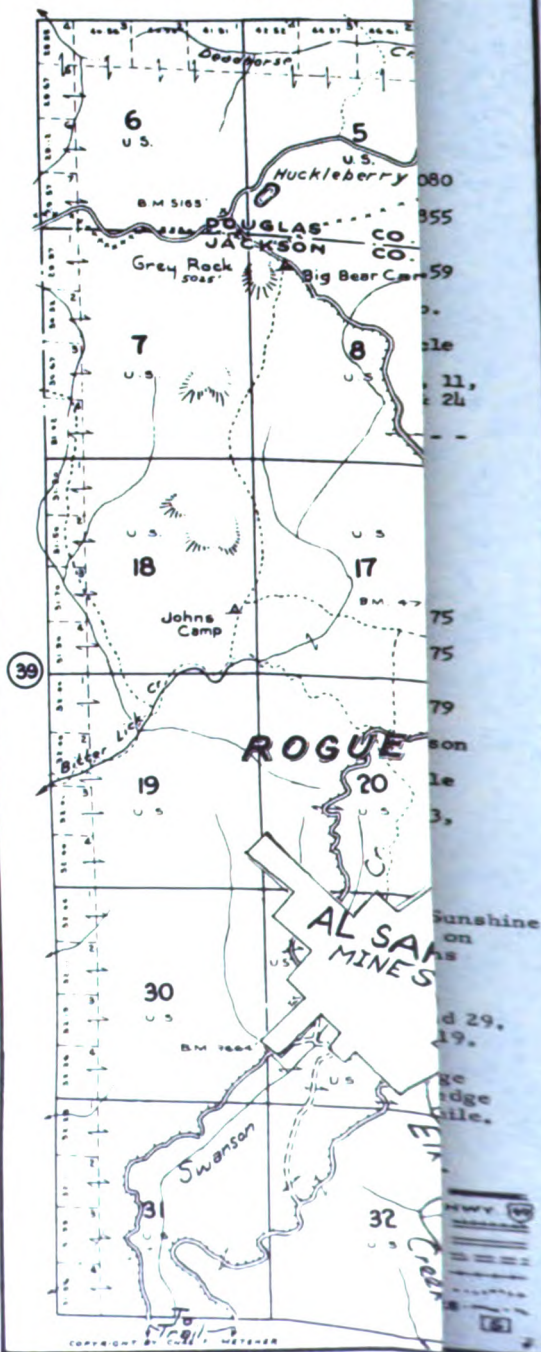

U adjustments—Rogue River mining claims, Al Sarena.

Mr. Hattan of BLM advised that a recent visit to the Al Sarena mine indicated a possible timber trespass.

They observed that about 5 acres of the Rhvolute claim (one which was not included in the group of 23 claims for which patent was issued) was logged over and logging roads crossed on other parts of the claim. The boundaries of this claim are common to the surrounding claims which have been patented. These common boundaries have been established by mineral surveys which are prerequisite to application for patent. This information has been passed on to the supervisor who is making a check of the situation to determine the facts.

FRANK B. FOLSOM.

Average price exclusive of sugar pine  $\frac{468,280}{25,300} = \$18.56$  MBF.

STATEMENT OF PHILLIP GABRIEL FILED WITH THE JOINT SENATE-HOUSE SUBCOMMITTEE HEARINGS OF THE AL SARENA MINING CLAIMS CASE, WASHINGTON, D. C., BEGINNING ON JANUARY 10, 1956

Legislative Oversight Subcommittee, Senate Interior and Insular Affairs Committee, Public Works and Resources Subcommittee, House Government Operations Committee

STATE OF ALABAMA,

County of Mobile, ss:

I, Phillip Gabriel, being first duly sworn, on oath, depose and say:

1. That on or about December 24, 1955, I received a letter from W. Kerr Scott, acting chairman, Legislative Oversight Subcommittee, Senate Interior and Insular Affairs Committee, dated December 22, 1955, notifying me that:

"On January 10, 1956, at 9 a. m., in room 224 of the Senate Office Building, Washington, D. C., this subcommittee will resume hearings in connection with the inquiry into the matter of Minerals Application Oregon 0665, Oregon Mineral Survey No. 879, Al Sarena Mines, Inc. \* \* \*

2. That the aforementioned letter specifically requested my appearance before the subcommittee at the time and place hereinabove cited in the following language:

"You are hereby requested to appear at such hearings for the purpose of answering such questions as the committee may wish to propound."

3. That, pursuant to the foregoing request, I appeared at the subject hearing, and after adjournment of the entire week's session I asked Mr. Redwine when I would be heard; that Mr. Redwine declined to state when, if ever, I would be heard.

4. That had I in fact testified, I would have testified in substance as follows:

A. That during the summer of 1955 I was questioned at Mobile, Ala., by one Robert W. Redwine, who presented credentials identifying him as the accredited agent of the committee.

B. That Mr. Redwine admitted that it was his duty as a paid committee employee to uncover or create material for political purposes.

C. That Mr. Redwine stated that the patent theretofore issued to Al Sarena Mines, Inc. could not be legally revoked or placed in jeopardy; that Al Sarena Mines, Inc., as such could not be injured; that his mission was political, and that the corporation had no cause for worry.

D. That the only other possible reason for these hearings was to "get even with the McDonalds" for having brought one W. O. (Otis) MacMahon to represent them at a hearing at Portland, Oreg. in September 1950, according to Mr. Redwine, who added that such action had caused departmental employees a great deal of trouble.

E. That apparently this last statement of Mr. Redwine arose from numerous averments made by Leonard B. Netzorg in a communication to James A. Lanigan dated September 28, 1950, apparently made to prejudice the agency against the McDonalds and MacMahon and repeatedly used against them throughout the contest, despite their protests, denials, and counteracting evidence offered. (See communication reprinted, pp. 1446-1447, Congressional Record, January 31, 1951).

F. That Mr. Redwine advised me that he was leaving town at about 3 p. m. on the day of our conference, would proceed to Atlanta, Ga., and would not be in Washington, D. C. until the following Tuesday—that he would not have any opportunity to discuss this with anyone, even in his own Department, until Tuesday; that no leak concerning our conversation could happen through his Department until after the following Tuesday.

G. That Mr. Redwine further suggested to me that, in the meantime, if I could, by using influence or information obtained as a director in Al Sarena Mines, Inc. or in any other way, get control of the company, I would have a very valuable mining property; that everyone would be happy if the McDonalds got "skinned" and the politicians involved in the Oregon elections were given some material with which to work for the next election.

H. That the statements made to me by Mr. Redwine are not repeated herein verbatim but are accurate in substance.

I. That I was informed by Mr. Morris Miller, of the A. W. Williams Inspection Co., Mobile, Ala., that Mr. Redwine advised Mr. Miller that the A. W. Williams Inspection Co. would be crucified for political purposes but that Mr. Redwine was gathering information to try to protect the Williams firm.

NOTE.—The record shows that Mr. Redwine himself read into the record a memorandum apparently constituting a charge of incompetence against the Williams firm. The record also shows that Mr. Redwine took this action when the firm's chief metallurgist appeared before the committee to testify that the samples and laboratory work were regular in all respects and that the samples bore no evidence, either contents or containers, of tampering, contamination, or other wrongdoing on the part of persons handling the samples prior to their receipt for assaying.

J. That the committee has not reimbursed or offered to reimburse me for any of the expenses incurred in complying with its request to appear at the hearings, as hereinbefore related.

PHILLIP GABRIEL.

Subscribed and sworn to before me this 9th day of February 1956:

MARGUERITE WALKER,

*Notary Public in and for Mobile County, Ala.*

My commission expires January 18, 1958.

A. W. WILLIAMS INSPECTION CO.,  
Mobile, Ala., February 7, 1956.

CONGRESSMAN CLARE HOFFMAN of Michigan,  
House Office Building, Washington, D. C.

DEAR MR. HOFFMAN: I WAS informed by long distance telephone that Mr. Redwine had been contacted and that he had stated that I would not be permitted to testify before the Legislative Oversight Subcommittee.

I am therefore taking the liberty of sending you a copy of significant papers I have in connection with the Al Sarena case, with the request that you make every effort to have them included in the hearing records. I realize now that we will not be given an opportunity to answer the charges made against us, but am most anxious for our prepared statements and other documents to be included in the record, if at all possible.

In order to accomplish this, I ask that you submit the papers to the committee.

Very briefly, my testimony is designed for the following manner of presentation:

(a) The A. W. Williams Inspection Co. is a well established, reputable, internationally recognized, and qualified laboratory, as is evidenced by our recognition and acceptance for membership in many of the technical societies in the United States, by our long list of satisfied clients with whom we have been dealing for many years, and by the quality of our facilities, the experience and education of our personnel, and the scope of our organization.

(b) Not a shred of evidence has been found of anything irregular, incompetent, or inaccurate in our dealings with the Al Sarena Mines, Inc., or with anyone connected with that company.

(c) The highly irrelevant GSA letter does not state that our services were unsatisfactory, but that "many of the assay reports on imported bauxite by the Williams Co. were questioned by the contractor supplying the bauxite \* \* \*." This, from the contractor against whom we were protecting the Government under our sampler-analyst contract. Furthermore, this particular contractor has a reputation for failing to agree with any sampling or analysis data other than his own, as is evidenced by a letter from Reynolds Metals Co. to us, copy of which is enclosed.

I have also enclosed one copy of a letter from Reynolds Metals Co. asking for an umpire sample to be mailed to another laboratory for umpire purposes. Note that the Reynolds Co. takes exception to the quality of the bauxite as specified by the contractor—we have 24 such letters in our files covering approximately 2 years, with approximately 1 shipment per month. As you can see, the umpiring of bauxite shipped through Mobile has been a common occurrence, whether we were involved in the assaying or not.

As to whether we were incorrect, divergent, or erratic, this statement is presumptuous. Because our results did not agree with those obtained from other laboratories is not sufficient grounds to call our results incorrect. The whole idea behind umpire samples is based on the fact that two laboratories will not agree, and a third is then called in to act as umpire, the latter being accepted as correct on a prearranged agreement basis. As a matter of fact, our chemists checked their results many times with the Reynolds Metals Co. chemists, with regularly acceptable accuracy. All GSA bauxite assays were performed by qualified experienced chemists, in accordance with methods as furnished by the Government.

The paragraph on chrome ore in the letter is answered in our statement titled "Chromite," copy of which is attached.

(d) We are attaching copies of letters from GSA personnel dated subsequent to the expiration of our final bauxite contract with GSA, which definitely show that there has been no dissatisfaction toward our services, by the GSA.

If it is possible to submit the above without introducing the names of the bauxite supplier or the Reynolds Metals Co., please do so. Enough reputations have been dragged through the mud already and we would prefer not to involve any others.

Note that page 4 of my statement in part II was made on a different machine. In the event this may be questioned, the answer is that I, without any coaching, advice, counsel, or even knowledge, on the part of any Government agency or official, decided to add to my statement after arriving in Washington, and I had the one page redone by an advertising agency at the National Press Building in Washington.

"You are hereby requested to appear at such hearings for the purpose of answering such questions as the committee may wish to propound."

3. That, pursuant to the foregoing request, I appeared at the subject hearings and after adjournment of the entire week's session I asked Mr. Redwine when I would be heard; that Mr. Redwine declined to state when, if ever, I would be heard.

4. That had I in fact testified, I would have testified in substance as follows:

A. That during the summer of 1955 I was questioned at Mobile, Ala., by one Robert W. Redwine, who presented credentials identifying him as the accredited agent of the committee.

B. That Mr. Redwine admitted that it was his duty as a paid committee employee to uncover or create material for political purposes.

C. That Mr. Redwine stated that the patent theretofore issued to Al Sarena Mines, Inc. could not be legally revoked or placed in jeopardy; that Al Sarena Mines, Inc., as such could not be injured; that his mission was political, and that the corporation had no cause for worry.

D. That the only other possible reason for these hearings was to "get even with the McDonalds" for having brought one W. O. (Otis) MacMahon to represent them at a hearing at Portland, Oreg. in September 1950, according to Mr. Redwine, who added that such action had caused departmental employees a great deal of trouble.

E. That apparently this last statement of Mr. Redwine arose from numerous averments made by Leonard B. Netzorg in a communication to James A. Lanigan dated September 28, 1950, apparently made to prejudice the agency against the McDonalds and MacMahon and repeatedly used against them throughout the contest, despite their protests, denials, and counteracting evidence offered. (See communication reprinted, pp. 1446-1447, Congressional Record, January 31, 1956).

F. That Mr. Redwine advised me that he was leaving town at about 3 p. m. on the day of our conference, would proceed to Atlanta, Ga., and would not be in Washington, D. C. until the following Tuesday—that he would not have any opportunity to discuss this with anyone, even in his own Department, until Tuesday; that no leak concerning our conversation could happen through his Department until after the following Tuesday.

G. That Mr. Redwine further suggested to me that, in the meantime, if I could, by using influence or information obtained as a director in Al Sarena Mines, Inc. or in any other way, get control of the company, I would have a very valuable mining property; that everyone would be happy if the McDonalds got "skinned" and the politicians involved in the Oregon elections were given some material with which to work for the next election.

H. That the statements made to me by Mr. Redwine are not repeated herein verbatim but are accurate in substance.

I. That I was informed by Mr. Morris Miller, of the A. W. Williams Inspection Co., Mobile, Ala., that Mr. Redwine advised Mr. Miller that the A. W. Williams Inspection Co. would be crucified for political purposes but that Mr. Redwine was gathering information to try to protect the Williams firm.

NOTE.—The record shows that Mr. Redwine himself read into the record a memorandum apparently constituting a charge of incompetence against the Williams firm. The record also shows that Mr. Redwine took this action when the firm's chief metallurgist appeared before the committee to testify that the samples and laboratory work were regular in all respects and that the samples bore no evidence, either contents or containers, of tampering, contamination, or other wrongdoing on the part of persons handling the samples prior to their receipt for assaying.

J. That the committee has not reimbursed or offered to reimburse me for any of the expenses incurred in complying with its request to appear at the hearings, as hereinbefore related.

PHILLIP GARKIN.

Subscribed and sworn to before me this 9th day of February 1956

MARGUERITE WALKER.

Notary Public in and for Mobile County, Ala

My commission expires January 18, 1958.

to anyone other than the regularly employed personnel of the A. W. Williams Inspection Co.

We have made a complete check of our records and ascertained that there was never any samples from the Al Sarena Mines, Inc., in our laboratory at the same time as any other gold and/or silver ore samples, for assaying. There was no possibility of the Al Sarena Mines, Inc., samples being confused, mixed up, contaminated by, or in any way intermingled with any material of any nature which might have led to erroneous results in the assaying procedure.

We are not aware of any factor or condition which might have influenced the samples to yield other than accurate mineral contents as actually contained in the samples, as received in this office.

The assayed results as determined by Mr. J. A. McDaniel were reported according to instructions as we received them. In some cases, the reports were mailed to the Trail, Oreg., address, while in other cases, they were mailed to the Mobile, Ala., address. Copies of some reports were mailed to Mr. Phil Gabriel, 24 N. Royal Street, Mobile, Ala. Instructions as to distribution of the reports were usually contained in letters from the Al Sarena Mines, Inc. or were received by telephone or personal visits from a local representative of the company.

We sincerely believe that our facilities are equal in quality to any general testing laboratory in the United States. While some laboratories may be larger, and others may be more highly specialized in one particular field of testing, we feel that the education, experience, competence, and integrity of our personnel and the quality of our laboratory facilities will compare favorably with any laboratory in the United States. We have graduate chemists, chemical engineers, civil engineers and foresters on our staff, along with other personnel who have had many years experience in testing materials. As of December 1955, we have 13 people actively engaged in the Mobile laboratory, 16 supervisors and clerical assistants on our office staff, 51 full-time field representatives stationed throughout the United States, and branch offices in New York, N. Y., and St. Louis, Mo.

The A. W. Williams Inspection Co. was established in 1921, and is an active member in the American Council of Independent Laboratories, and holds membership in such technical societies as American Society for Testing Materials, American Oil Chemists' Society, American Wood Preservers' Association, American Concrete Institute, Forest Products Research Society, Railway Tie Association, American Chemical Society, American Welding Society, American Society of Mechanical Engineers, and others.

We, therefore, honestly and sincerely believe, and are prepared to swear and affirm, that every action taken by the A. W. Williams Inspection Co. and its employees, in its dealings with the Al Sarena Mines, Inc., was ethical, legal, accurate, and in every way conforming to the best accepted and recognized business and professional practices.

MORRIS MILLER, *Laboratory Manager.*

Subscribed and sworn to before me, this 6th day of January, 1956.

My commission expires October 22, 1957.

[SEAL]

GERTRUDE A. BRINCOAT, *Notary Public.*

## PART II

I would like to state at this point that every action that Mr. McDaniel or I have taken in the Al Sarena Mines, Inc., case has been open and aboveboard, honest, ethical, and in my opinion, competent.

For example, on both Mr. Robert Redwine's trips to Mobile, Ala., to question us, we furnished him with all information he asked for, of which we were capable of supplying. We made no effort whatsoever to hold back or conceal any detail. Furthermore, since we have had nothing to hide from anyone, and since we became aware of the Government's interest in this case, we have not hesitated to offer this information to any interested governmental official. Not only that, but if Mr. Redwine were to visit our organization again with the same legal powers, whether on this case or any other, we would again make our files available to him for his investigation.

There have been a number of insinuations made against the competence of the A. W. Williams Inspection Co., and against Mr. J. A. McDaniel. A letter from the General Services Administration, addressed to Hon. James E. Murray, chairman, Committee on Interior and Insular Affairs, United States Senate, Washington 25, D. C., dated September 26, 1955, and signed by A. J. Walsh, Commissioner,

was read into the record. This letter was read in such a manner as to convey the meaning that the General Services Administration had questioned many of our assay reports. A careful reading of this letter reveals that the significant sentence in this letter reads as follows: Quote "Many of the assay reports on imported bauxite by the Williams Laboratory were questioned by the contractor supplying the bauxite and, as a result, such reports had to be umpired for settlement purposes." Unquote. Nothing in the letter is a direct allegation by the General Services Administration that our services were unsatisfactory.

As to the shipment of umpire samples to other laboratories this is commonly accepted procedure in the sampling and testing of bulk ores. As a matter of fact, we had another contract with the Reynolds Metals Co. to sample bauxite ore from the same supplier as was involved in the General Services Administration contract. In the Reynolds Metals case, we sampled only, and shipped the samples to their own laboratory for testing. We have on file many letters from the Reynolds Metals Co. stating that their chemical tests did not agree with those of the contractor-supplier, and requesting that we ship the retained umpire sample to another laboratory for umpire purposes. In fact this became so common, that it was quite unusual for a shipment not to be umpired.

Prior to my becoming involved in the Al Sarena Mines, Inc. case, I had never seen or heard of any statement of any dissatisfaction on the part of General Services Administration with the Williams Inspection Co., nor do I honestly believe that there is any such dissatisfaction. I have a number of letters from various officials in the General Services Administration expressing the fact that ours is a qualified and competent laboratory. (Quote letters from GSA. Dated August 16, 1950; May 11, 1951 and February 10, 1954.)

For further information of this committee, I have another file of letters from the General Services Administration. All of the letters in this file are marked "Restricted," and being classified information, I have no authority to make them available before a public hearing. However, if the committee will subpoena this file, or take such steps as are necessary to declassify this material, I believe that the committee will be convinced that the General Services Administration has been satisfied with our services.

I would now like to read a statement concerning our chromite contracts, which, I believe, will show that the A. W. Williams Inspection Co. took every possible step to do a competent job, in spite of most unfavorable circumstances and conditions. (Read chromite statement, which is attached.)

Furthermore, I would like to know the answers to the following: (a) If there was any dissatisfaction on the part of the General Services Administration, why was our bauxite contract renewed?

(b) If our services were unsatisfactory on bauxite, why were we awarded the chromite contract subsequently?

(c) If both the above contracts were handled unsatisfactorily, why was the A. W. Williams Inspection Co. subsequently retained by the General Services Administration to test paint samples?

I believe that the only possible answer to these questions is that the General Services Administration is not dissatisfied with our services, but that any dissatisfaction on record was expressed by the service contractors, against whom we were protecting the Government under our contracts.

To get back to the Al Sarena Mines, Inc. case, it was brought out in the testimony presented before this hearing, on Tuesday, January 10, 1956, that Mr. McDaniel is not a licensed assayer. Such is the truth, inasmuch as the State of Alabama does not license chemists, in the sense inferred. Any graduate of an accredited American college or university is allowed to practice the science of chemistry in the State of Alabama without any obligation on his part to become licensed.

Insofar as the laboratory equipment at the A. W. Williams Inspection Co. is concerned, it is, and it has been adequate to perform gold and silver assays, since before the first sample was received from the Al Sarena Mines, Inc. I offer the attached photographs of equipment, used by this company in the assaying of the subject samples, as evidence of their adequacy.

I would like to repeat once more that neither Mr. J. A. McDaniel nor myself (nor anyone else in our company) was aware, at the time, that the 28 samples of ore were to be used as the basis for the pending mineral patents, that the samples were handled, assayed, and reported on a routine basis just as we have handled hundreds of other samples, and that we attached no unusual significance to these samples.

All of our actions in this case have been in accordance with generally accepted practices in the testing and inspection business. If our chief chemist and metallurgist, J. A. McDaniel, is to be censured for performing his duties in the Al Sarena case competently, honestly, and ethically, then every scientist and technician in this country stands to be equally censured in the eyes of our Government.

## CHROMITE

On May 15, 1953, I relieved Mr. G. F. Bailey as laboratory manager for A. W. Williams Inspection Co. Prior to that time from February 1952 when Mr. J. A. McDaniel left A. W. Williams Inspection Co., I was the chief chemist and participated to some extent in the bauxite sampling program. My duties consisted of supervising all analytical work performed in the chemistry laboratory and, when called on by Mr. Bailey, supervising the bauxite sampling for Reynolds Metal Co.

On May 15, 1953, Mr. G. F. Bailey's resignation became effective, and I was appointed laboratory manager in his place. It was not until May 19, 1953, when I received notice from the General Services Administration that the Steamship *Reuben Tipton* was scheduled to arrive in Gulfport, Miss., on May 23, 1953, that I first learned of the chromite contract which had been awarded by the General Services Administration. I immediately began preparation for handling the sampling and analysis of the chromite cargo.

Two of our most experienced samplers were dispatched to Gulfport to sample the ore. On arrival of the Steamship *Reuben Tipton* in Gulfport, our samplers began the operation under the observation of a representative from the contractor-supplier. It had been our intention to perform the sample preparation at our Mobile, Ala., laboratory on completion of the sampling of the vessel. However, we quickly determined that it would be in the best interest of the Government to prepare the sample in Gulfport.

We immediately placed an order with W. H. Curtin Co., in New Orleans, La., for a jaw crusher and we purchased an electric motor locally in Mobile. The electric motor was dispatched to Gulfport by one of our trucks and the W. H. Curtin Co. was requested by telephone during the placement of the order to deliver the jaw crusher to Gulfport with all possible speed. In the meantime sampling of the steamship *Reuben Tipton* proceeded as stated above under the observation of the supplier's representative.

The jaw crusher was a number of days in arriving in Gulfport. During this interval, we were in constant communication by telephone with the W. H. Curtin Co., requesting that delivery of the jaw crusher be facilitated since the bulk samples were beginning to pile up at our warehouse in Gulfport. I do not recall exactly the reason for the excessive delay, but as I recall, there had been a hurricane on the gulf coast a short time prior to the arrival of the steamship *Reuben Tipton* at Gulfport, Miss., and all direct roads and railroad connections between New Orleans and Gulfport were closed. As I recall, it was due to the rerouting of all freight along the gulf coast that accounted for the delay in delivery of the jaw crusher to Gulfport. Immediately upon arrival of the jaw crusher in Gulfport, it was set up and sample preparation operations began.

Meanwhile, without prior release either from us or the supplier, the railroad, contrary to its previous instructions not to move any cars from the city without prior release, moved nine unsampled cars of the chromite ore to Paducah, Ky. On learning of this we immediately made arrangements to fly samplers along with the supplier's representative to Paducah to sample these nine cars. The cars were sampled in Kentucky, and the bulk samples were shipped to Gulfport to be processed along with the other bulk samples from the steamship *Reuben Tipton*.

Due to the fact that the unloading of the steamship *Reuben Tipton* proceeded on a 24-hour-per-day basis, and that there were no facilities whatsoever for sampling the cars after daylight hours, we found that we were falling behind in our sampling. Also, due to the fact that there was considerable switching around of the cars in the Gulfport yards by the railroads, we found it increasingly difficult to keep up with our sampling. As a result we dispatched two additional samplers to Gulfport so as to facilitate the job.

Reference the screen size of the lot from the steamship *Reuben Tipton*, we decided that it was to the best interest of the Government to actually screen a portion of the cargo to determine the screen analysis, rather than to make a visual estimate as we would have been permitted under our contract, and in accordance with commercial practice.

After approximately one-half of the material had been unloaded from the vessel, a 2-ton bucket on a dragline was dropped into the hold of the ship and a sample accounting to 2,924 pounds were scooped up, set on the docks and immediately screened, with results as shown in our report. We sincerely believe that the results of this screening, as shown in our report, was more accurate than any estimate could have been. Our company went to a great deal of

extra expense to screen the 2,924 pounds of ore, since we felt that the best interests of the Government would be served by reporting the screen sizes as determined by an actual test instead of by an estimate based purely on observation.

While all of the above was going on, I determined that the pulverizing machine in our Mobile laboratories was designed to handle bauxite and coal, and that the steel plates in the machine were not hard enough to handle chromite or satisfactorily. We located a company in New Orleans by telephone who had a satisfactory chromite pulverizer and, as soon as the bulk samples had been crushed, riffled, and quartered, the samples were sent by messenger to New Orleans for pulverizing. The messenger waited in New Orleans for this operation to be completed after which he delivered the pulverized samples to the Mobile laboratory for analysis.

In the meantime in order to avoid such an occurrence in the future, we placed an order by long-distance telephone with a company in California, whose name I do not recall, for special plates of the proper hardness to be shipped at express immediately, for installation in our own pulverizer. This was done because we felt that the best interest of the Government was served by eliminating the excessive time required to pulverize the samples in New Orleans.

Upon receipt of the analytical sample at our Mobile laboratory, our chemists immediately proceeded with the analytical tests. This, too, was done largely under the observation of the supplier's representative. The procedure used for making these tests was obtained from the Treadwell-Hall Analytical Chemistry. The chemists reported to me that the chromite material was not going into solution properly by the recommended methods of procedure in the above volume and I, along with the supplier's representative and our chemists, worked out after a number of attempts, a satisfactory method for dissolving the ore sample. The testing was then completed in accordance with the methods specified in Treadwell-Hall's Analytical Chemistry.

It is my very definite recollection that the supplier's representative expressed his satisfaction and approval of the methods used in the analytical procedure. The results of sampling and testing of the chromite ore from the steamship *Reuben Tipton* were subsequently reported to the General Services Administration.

The above and the subsequent chromite cargoes were sampled and analyzed in accordance with the methods as previously agreed upon by the Government, the contractor-supplier, and ourselves, including telegraphed amendments.

On June 16, 1953, we were advised by the General Services Administration that the Steamship *James McKay* was due in Gulfport, Miss., on June 17, 1953, and advised to make all preparations necessary to handle the sampling and analysis of this cargo. The steamship *James McKay* was handled in largely the same manner as the steamship *Reuben Tipton*, except that none of the difficulties described above were encountered.

As far as we knew both the sampling and the analysis of the material was performed in a satisfactory manner, and it was not until December 1955 that I learned that there may have been any dissatisfaction or complaint about the handling of this vessel.

Subsequently, both of the above cargo umpire samples were called for by General Services Administration, to be delivered to another laboratory. We were never informed as to the results of the umpire analysis.

MORRIS MILLER,

*Laboratory Manager, A. W. Williams Inspection Co., Mobile, Ala.*

STATE OF ALABAMA,

*County Mobile, City of Mobile:*

Subscribed and sworn to before me this 13th day of January 1956.

GERTRUDE A. BRINCAT, *Notary Public*

My commission expires October 22, 1957.

GENERAL SERVICES ADMINISTRATION,

FEDERAL SUPPLY SERVICE,

*Washington, D. C., August 16, 1959.*

HON. FRANK W. BOYKIN,

*House of Representatives, Washington, D. C.*

DEAR MR. BOYKIN: The current service contract for sampling and analyzing Government bauxite shipments entering the gulf ports was made in accordance

with established regulations to the lowest responsible bidder, as stated in your letter of August 12, 1950.

The policy of this Service, all other considerations being equal, is to award contracts to the bidder or bidders offering to perform the services required at the lowest cost to the Government, whether at one port or at all ports mentioned in the invitation to bid.

The current bauxite sampler-analyst service contract expires on March 31, 1951, with a provision for extension to June 30, 1951, at the option of the Government. The supply contracts under which bauxite is being delivered will have expired prior to the termination date of the sampler-analyst contracts, and additional purchase of bauxite is not contemplated at this time.

Your interest in this matter is appreciated, and the A. W. Williams Inspection Co. will be included in any future solicitation for bids on commercial sampler-analyst work required by this Service in the gulf port area.

Sincerely yours,

CLIFTON E. MACK, *Commissioner.*

August 22, 1950, original to Mr. A. W. Williams.

GENERAL SERVICES ADMINISTRATION,  
FEDERAL SUPPLY SERVICE,  
Washington, D. C., May 11, 1951.

Subject: Sampler-analyst services.

A. W. WILLIAMS INSPECTION Co.,  
*Mobile, Ala.*

GENTLEMEN: We acknowledge your letter of May 3, 1951, concerning the inspection and analysis of materials when and if such services are needed by the General Services Administration.

We are pleased to advise that the A. W. Williams Inspection Co. is on our approved list of contractors covering commercial sampler-analyst services when required on materials delivered under supply contracts. Your company will, therefore, be solicited for bids covering such required services in you field in the usual manner.

We appreciate your offer of additional information regarding your services and will place in our reference files any catalog or brochures describing your facilities or available services which you wish to submit as more specific information on inspection, sampling, or analyzing with respect to the areas covered, your specialized commodities, and laboratory locations. Such information would supplement your past performance record under service contracts with us and the general information contained in the current directories of sampler-analyst service contractors, as published by the American Council of Commercial Laboratories and the United States Department of Commerce, respectively.

Very truly yours,

O. W. TECKEMEYER,  
*Chief, Inspection Branch.*

GENERAL SERVICES ADMINISTRATION,  
FEDERAL SUPPLY SERVICE,  
Washington, D. C., February 10, 1954.

Mr. A. W. WILLIAMS,  
A. W. Williams Inspection Co.,  
*Mobile, Ala.*

DEAR MR. WILLIAMS: Your letter of February 5, 1954, addressed to the Emergency Procurement Service concerning the inspection and testing of materials under the Korean relief and rehabilitation program, has been referred to this office for reply.

At the present time it is anticipated that inspection required in connection with any materials purchased by the General Services Administration for the United Nations Korean Rehabilitation Administration will be performed by Government personnel in accordance with the practice customary under other programs. However, if it becomes necessary to utilize the services of commercial inspecting or testing facilities consideration will be given to your company.

Your interest in this matter is appreciated.

Yours very truly,

H. M. NEALE, *Assistant Chief, Inspection Branch.*

extra expense to screen the 2,924 pounds of ore, since we felt that the best interests of the Government would be served by reporting the screen sizes as determined by an actual test instead of by an estimate based purely on observation.

While all of the above was going on, I determined that the pulverizing machine in our Mobile laboratories was designed to handle bauxite and coal, and that the steel plates in the machine were not hard enough to handle chromite ore satisfactorily. We located a company in New Orleans by telephone who had a satisfactory chromite pulverizer and, as soon as the bulk samples had been crushed, riffled, and quartered, the samples were sent by messenger to New Orleans for pulverizing. The messenger waited in New Orleans for this operation to be completed after which he delivered the pulverized samples to the Mobile laboratory for analysis.

In the meantime in order to avoid such an occurrence in the future, we placed an order by long-distance telephone with a company in California, whose name I do not recall, for special plates of the proper hardness to be shipped air express immediately, for installation in our own pulverizer. This was done because we felt that the best interest of the Government was served by eliminating the excessive time required to pulverize the samples in New Orleans.

Upon receipt of the analytical sample at our Mobile laboratory, our chemists immediately proceeded with the analytical tests. GERTRUDE A. BRINCAT, *Notary Public*

My commission expires October 22, 1957.

GENERAL SERVICES ADMINISTRATION,  
FEDERAL SUPPLY SERVICE,  
*Washington, D. C., August 16, 1959.*

HON. FRANK W. BOYKIN,  
*House of Representatives, Washington, D. C.*

DEAR MR. BOYKIN: The current service contract for sampling and analyzing of Government bauxite shipments entering the gulf ports was made in accordance

obtained by Mr. Hattan, did not affect his apparent determination to file charges against these claims, which he proceeded to do in spite of notice of a material difference and with no effort on his part to reconcile those differences.

In addition, all of the certificates of the assay laboratories reporting upon the supplemental samples authorized by Hattan, from three separate laboratories, were suppressed from the record. Also suppressed from the record was all correspondence relating to these important material facts of the case.

CHARLES R. McDONALD.

Subscribed and sworn to before me this 14th day of February 1956.

[SEAL]

MARGUERITE WALKER,

*Notary Public, Mobile County, Ala.*

My commission expires February 18, 1958.

The foregoing information is submitted in relation to the statement made by Mr. Hattan in his testimony before the Joint Senate-House Subcommittee at Portland, Oreg., on November 25, 1955.

Mr. Hattan, in the testimony just mentioned, stated that he first met the McDonald brothers, to wit, Charles R. McDonald and Herbert P. McDonald, Jr., on his visit to the Al Sarena property during July 1949.

Contrary to Mr. Hattan's statement in the aforementioned testimony, Mr. Hattan had at least two prior conferences with Charles R. McDonald at the Swan Island offices of the Bureau of Land Management prior to that time. I am further advised that Mr. Hattan had additional conferences with Herbert P. McDonald, Jr., earlier than the conferences just mentioned, in which Charles McDonald did not participate.

I, Charles R. McDonald, first met Mr. Hattan about the middle of September 1948 at his office on the second floor of the old Swan Island Administration Building. In that conference Mr. Hattan stated that assays were not required in the applicant's mineral statement, but recommended that the applicant include at least one such assay from each claim, since one good assay within the lines of each claim would be sufficient to "clear list" the claims.

My second conference with Mr. Hattan occurred on the afternoon of October 1, 1948, at which time Mr. Hattan examined the patent application, and especially exhibit I, which had been included at his suggestion, made to us in the mid-September conference. During this second conference Mr. Hattan made in substance the following statement:

"I am satisfied. Unless the Forest Service requests a field examination within the next 60 days, I will not be down."

CHARLES R. McDONALD,

HERBERT P. McDONALD, Jr.

Subscribed and sworn to before me this 14th day of February 1956.

[SEAL]

MARGUERITE WALKER,

*Notary Public, Mobile County, Ala.*

My commission expires February 18, 1958.

---

CONGRESS OF THE UNITED STATES,  
HOUSE OF REPRESENTATIVES,  
Washington, D. C., June 6, 1950.

Hon. OSCAR L. CHAPMAN,  
*Secretary of Interior,*  
*Department of the Interior,*  
*Washington 25, D. C.*

DEAR OSCAR: The enclosed file, concerning mineral patent application, M. A. No. 0665, Oregon, is self-explanatory.

Dr. H. P. McDonald, president, Al Sarena Mines, Inc., is a close friend of mine and my constituent.

I shall appreciate your having a prompt investigation made into this matter and letting me have a report at your earliest opportunity.

Warm regards.

Sincerely,

FRANK W. BOYKIN, *Member of Congress.*

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington, D. C., March 14, 1950.

In reply refer to: Oregon 0665 "AD: RLW" M. S. No. 879

Memorandum to: Manager, Land Office, Portland, Oreg.

From: Director.

Subject: Adverse proceedings vacated.

By memorandum of February 10, 1950, adverse proceedings were ordered against certain of the mining claims embraced in mineral entry Oregon 0665 of Al Sarena Mines, Inc.

This action is wrong procedure as the land is within a national forest reservation, and adverse proceedings, if any against the claims, will be brought by the Forest Service. Accordingly the memorandum of February 10, 1950, is revoked.

ROSCOE BELL, Associate Director.

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington 25, D. C., November 24, 1950.

In reply refer to: Oregon 0665.

Memorandum to: Manager, Land Office, Portland, Oreg.

From: Director, Bureau of Land Management.

Subject: Returning record for the rendering of a decision.

On April 6, 1949, final certificate issued on mineral application Oregon 0665 filed October 4, 1948, by the Al Sarena Mines, Inc., for a patent to the Oro Alto Oro Rico, Cougar, Oro Real, J. W. Merritt, Peter Applegate, Oro Escondido, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, Telluride, Alabama Rainboe, Delia McKinnon, Sulphide, Manganese, La Jolla, Staples, and Arroyo Verde lode claims situated in sections 20, 21, 28, 29, and 30, T. 31 S., R. 2 E., Willamette Meridian, Oregon within the Rogue River National Forest.

On April 11, 1950, the Forest Service filed a protest against the entry charges that certain claims are invalid. Notice issued under contest No. 38. On May 22, 1950, an answer and certain motions and demurrers were filed. A hearing was set for September 13, 1950, at which you overruled the motions and demurrers made by the attorney for the defendant and directed that the hearing proceed. The attorney for the defendant appealed from your action and declined to take part in the hearing. The Forest Service submitted testimony in support of the charges and you, by memorandum dated October 2, transmitted the papers in the case and recommended that the entry be canceled as to the 15 claims involved in the protest.

Under the Rules of Practice (43 CFR 221.40 (c) and 221.41) you should have rendered your decision subject to the right of appeal. The entire record is returned herewith and you are directed to quickly render a decision instead of a recommendation and allow the party 30 days from notice to appeal or file an application for reopening the hearing. The decision should cover both the procedural matters and the merits of the case so far as presented.

C. R. BRADSHAW, Acting Director

STATE OF ALABAMA,  
County of Mobile, ss:

I, H. P. McDonald, Jr., being first duly sworn, depose and say that I am Secretary-Treasurer of Al Sarena Mines, Inc., an Oregon corporation; that said Al Sarena Mines, Inc., has made application for Mineral Patent to that property embraced in M. A. No. 0665, Oregon District Land Office; that the Notice of Publication as transmitted by the Oregon District Land Office was published in the Medford News, a weekly publication, for nine consecutive issues beginning November 12, 1948, and terminating January 7, 1949; that the Plat and Notice received from the Regional Cadastral Engineer for posting on the claims to remain posted in a conspicuous place continuously from September 22, 1948 to and including the date of this affidavit, said notice having been displayed on the southwest exterior wall of the mill building located on the A. W. Dahlberg Claim; that no adverse claim has been filed with any officer of said Al Sarena

Mines, Inc., during the time provided by law for that purpose; that no litigation of any description has been instituted by or against said Al Sarena Mines, Inc., since the filing of the Application for Patent; and that all fees and charges in connection with the patent proceedings have been paid, to wit:

Office Work (Reg. Cadastral Eng.)	\$416. 00
Patent Survey	3, 600. 00
Legal Services	50. 00
Proof of Citizenship (Corp. Dept.)	13. 50
Certified Copies (County Clerk) (& Rec.)	83. 70

H. P. McDONALD, Jr.

Subscribed and sworn to before me this 13th day of January 1949.

MARQUERITE WALKER,

Notary Public, Mobile County, Ala.

My Commission expires Dec. 1950.

#### EXHIBIT A

DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
OREGON DISTRICT LAND OFFICE,  
Portland, Oreg., February 8, 1949.

H. P. McDONALD, Jr.,  
Secretary, Al Sarena Mines, Inc.,  
Mobile, Ala.

DEAR MR. McDONALD: We have your two letters of January 13 and January 27, and enclose an application to purchase for your execution, which paper is required in connection with the final proceedings in patenting a mining claim. The amount of purchase money due is \$2,375. The total acreage is 474.119 acres, which, at the rate of \$5 per acre or fraction thereof amounts to the above sum.

Upon receipt of the application to purchase properly executed and the required amount of money, the papers will be examined with the idea of issuing final certificate.

Very truly yours,

SPAULDING,  
Assistant Manager.

#### EXHIBIT P

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington, D. C., November 2, 1950.

In reply refer to Oregon 0665.

HON. FRANK R. BOYKIN,  
House of Representatives, Washington, D. C.

MY DEAR MR. BOYKIN: Reference is made to your telephone conversation of October 24, with Mr. Mastin G. White, Solicitor of the Department of the Interior, relative to Contest No. 98 against mineral entry Oregon 0665 made by the Al Sarena Mines, Inc.

Solicitor White has requested that the decision in the case be expedited. The matter is under immediate consideration and it is hoped that the decision will be out in a very short time. I shall be glad to furnish you a copy of the decision when it is rendered.

Sincerely yours,

WILLIAM ZIMMERMAN, JR.,  
Assistant Director.

AL SARENA MINES, INC., TRAIL, OREG.,  
Mobile, Ala., June 23, 1951.

Mr. MASTIN G. WHITE,

*Acting Assistant Secretary of the Interior,  
Department of the Interior, Washington, D. C.*

DEAR MR. WHITE: We are advised that your letter to Hon. Frank W. Boykin, Member of Congress, replying to his letter of June 13, 1951, to you, contains a statement to the effect that oral argument of our case was had during the conference at your office by representatives of Al Sarena Mines, Inc., on June 15, 1951, and that all of the facts and circumstances would be given due consideration in the final adjudication by the Department of the Interior. We appreciate this consideration very much and wish, in addition, to clarify the record by adding that the conference had on June 15, 1951, was not the oral argument moved for in the brief of the appeal now before your office, there having been no counsel present, there having been no understanding at that time that this was the official oral argument, and there having been no introduction of the contents of the impartial tape recording made at the hearing, as such.

If, however, from the preponderance of facts before you by virtue of our conference and discussion on June 15, and otherwise, you find that a decision should be rendered in our favor, we shall be glad to waive our motion for oral argument on that basis, and it may be considered as waived on that condition.

The material presented to you was for the purpose of throwing light on the record. Thereafter, having perused the record briefly in the docket room, we discovered numerous fatal defects therein, too numerous to list. Among these fatal defects, which we promised to report to you, are the following:

1. The record recites that the hearing was formally opened by the manager. Subsequent to this formal opening, contestee read into the record a wealth of legal prima-facie evidence, which evidence was received therefor without objection, but which evidence could not be found in the record by an inspection thereof. This material evidence appears to have been withheld from the record in order to support an allegation by the manager that the contestee failed to participate in the hearing and its withholding has the effect of deceiving you and the other appellate authorities into whose hands the record might pass. From the context of the record and from letters in our files from various officials of your department, it is an admitted fact that Mr. Rice sent the record to Washington on the contestee's appeal from his rulings on demurrers and motions only, without decision, which rulings were in fact made during the hearing. Had contestee not participated therein, such action on Mr. Rice's part would have been impossible.

2. The first seven pages of the record, which pages deal with an appeal taken under the technical rules of pleading, appear deliberately erroneous to the extent that the stenographer has failed or refused to certify to any part of their correctness, as required.

3. The record states that Al Sarena Mines, Inc., requested the hearing, held September 13, 1950. The fact that Al Sarena Mines, Inc., had no desire for a hearing but was compelled to appear at a hearing ordered by the Government, making request only for an early date after having been advised that it must appear at such a hearing.

4. Al Sarena Mines, Inc., submitted a state of facts rending the charges immaterial, as provided by the regulations, constituting a set of charges preferred by Al Sarena Mines, Inc., under oath, against the validity of the proceeding. These charges, preferred by Al Sarena Mines, Inc., should have been taken as confessed (see brief), and the action so taken by Al Sarena Mines, Inc., obviated the necessity of any hearing.

5. The Forest Service witnesses were excused by their own counsel from the customary duty of subscribing their testimony as it appears in the record, to the facts. Such excuse from duty was apparently performed without right or authority under a false premise hereinabove recited in No. 1.

6. The record contains a statement to the effect that the demurrers were abolished and specifically ruled upon as motions. Be it remembered, from recitation in the original answer of Al Sarena Mines, Inc., that what was filed by said Al Sarena Mines, Inc., was and is "a state of facts" filed and submitted in the form of demurrers. So far as is known, it is not customary in any proceedings to rule upon a state of facts (which is subject to argument and proof) as though said state of facts were a motion (which is largely a discretionary matter). Furthermore, no representation was made at the hearing, either by the manager

or by opposing counsel, that the demurrers or state of facts would be treated as motions, which can easily be proven. It is also noted that even rule 40 of the Interior Department Rules of Practice provides for the use of demurrers, and that the manager defaulted under that rule.

7. The grounds given in the record for the rulings made by the manager are not the same grounds given for the record at the hearing, and do not correspond to the grounds actually given, as they appear in the record of the contestee.

8. Full, illegal, unprecedented, confiscatory jeopardy was imposed upon contestee during the hearing, it having been withdrawn at the close thereof. Therefore, all rulings of the manager, and the grounds therefor were made and given in the light of full, illegal, unprecedented, confiscatory jeopardy, specifically prohibited by the ruling handed down by the Supreme Court in the case of *El Paso Brick Co. v. McKnight* (233 U. S. 250, 257). The invalidity of the actual grounds given should receive special attention in adjudication for that they were given in the light of full, illegal, confiscatory jeopardy, but said grounds allege that the interests of the contestee are not adversely affected, which is impossible, as has been shown previously.

9. The record shows that a motion was illegally entertained and allowed, without knowledge of or notice to contestee, to change the name of the contestee in the illegal protest after the matter had been brought to trial. This practice violates legal and customary practice and procedure in judicial and administrative proceedings. Any such change must be made legally and properly before bringing the matter to trial. Al Sarena Mines, Inc. was first placed in jeopardy on charges brought against a nonexistent mining company. Subsequently, charges were again preferred by such action, on the same alleged cause, against Al Sarena Mines, Inc., constituting a second jeopardy on the same alleged cause of action. Said charges against Al Sarena Mines, Inc. were further preferred without the knowledge of Al Sarena Mines, Inc. and without any notice or notice thereof to said corporation whatsoever.

10. The testimony was not confined to the evidence upon which the charges were preferred. Assays submitted by Al Sarena Mines, Inc., apparently sufficiently valid to cause the official vacation of the adverse or contest proceedings on February 10, 1950, which notation, duly initialed "Jab" and followed by a notation dated March 14, 1950, directing that the matter be held until the Forest Service brings proceedings and has hearings, initialed "R. L. W.," appear conclusively to have established the matter as res adjudicata and it further appears that the present proceeding was deliberately brought upon a matter which was already res adjudicata, injuriously and knowingly depriving Al Sarena Mines, Inc. of material facts with which to defend itself. These entries in the official record of action taken further confirm the previous contention that the Interior Department, purportedly an impartial judge, was apparently aiding and abetting a third party, the Forest Service, illegally to intervene in a completed transaction between the Interior Department and Al Sarena Mines, Inc. and to strike down arbitrarily a title already conferred, with a further apparent attempt to enforce previous threats of summary confiscation, involving both real and personal property. The aforesaid vacation of the proceeding should in all good conscience have been allowed to stand for that it established the matter once and for all as res adjudicata, as aforesaid. The bringing of an action in April 1950, on a matter known to be res adjudicata and the subsequent setting of a hearing without adverse evidence, or with only the same evidence which was of record at the time the matter became res adjudicata as aforesaid was an arbitrary, capricious, illegal, and ultra-vires act. There is no getting away from this, and a court would hold it so. In addition, Mr. Hattan was allowed to use hearsay in his testimony, which would not be tolerated from a private citizen. The documentary evidence later submitted in support of the hearsay was prepared by the Department of the Interior, which has been shown to be at least a quasi accuser while purporting to be an impartial judge between the Forest Service and Al Sarena Mines, Inc., and which department apparently obtained its alleged original, and consequently all other, jurisdiction as said allegedly impartial judge by fraudulent misrepresentation, deceit, and improper use of the United States mails. Mr. Hattan is assumed to have had an assay report upon which to base statements made previous to the hearing alleging certain specific values from samples which he had obtained from the Annes Engineering Co., of Grants Pass, Oreg. The assay report of that firm, contained in the documentary evidence appears not to be the same assay report from which he was quoting previously, as it contains no such values as those previously recited by Mr. Hattan.

11. The testimony of Messrs. Hattan and Sanborn contradict each other in regard to the whereabouts of their samples after said samples left their dominion and custody. The testimony of these two men, which in part admits poor memory in this regard, also contradicts the statement of fact by Mr. Sanborn to representatives of Al Sarena Mines, Inc. at San Francisco, Calif., on or about April 11, 1949, while the matter was still current in his mind. This shows that the samples were in effect, as previously stated, lost and were apparently not in the hands of a common carrier, as was hesitatingly alleged in the testimony, and further shows the previously averred possibility or probability of substitution.

12. Contestant's motion to have its charges taken as confessed was entertained and the contestant was allowed to submit a "showing in support" thereof some 2 weeks later. Although contestant's motion was ultimately denied, it was entertained for an unreasonable time in the absence of any showing in support. Contestee's motion to dismiss, though backed by a showing in support thereof, was summarily denied on the alleged ground that no showing in support had been submitted prior to the hearing. In addition to the utter discrimination and prejudice just shown, the fact that the false grounds given for contestant's motion were that the contestee did not answer the charges, did not appear at the hearing, and did not participate in the hearing, or appear and offer evidence proves also the contention of Al Sarena Mines, Inc., hereinabove set out in No. 1. It further evidences, as has been stated in the brief, that counsel for contestant inserted such grounds for his motion in an apparent attempt to protect Mr. Rice from the consequences of his own acts, deliberately doing so to the prejudicial detriment of citizens, whose rights should be protected in any proceeding alleged to conform to the requirements of due process.

It is regretted that there was no opportunity during our conference to go fully into the multitude of other factors which would cast light on the record, such as the newly discovered evidence in the matter of iron pyrite, a strategic mineral contained in very large quantities. The presence of this strategic mineral is admitted and confirmed again and again even in the adverse testimony of Mr. Hattan, and the commercial and strategic significance of this important mineral has increased greatly since his examination. According to the official figures furnished you by Congressman Boykin in his letter of June 13, which figures are of record in projects originating within the Government and which figures were correctly prepared by a duly licensed registered professional engineer, the lowest figure given you by Mr. Boykin corresponds to more than \$50,000 per month in dollar value production. This figure, compared with the alleged total value of \$77,000 in timber shows conclusively that such production in sulfuric acid qualifies without doubt, even under the criterion in *U. S. v. Dawson* (35 I. D. 670), the validity of which criterion we still do not recognize. There can be no question as to the mineral value, when the official figures for such production reveal at least 63 years of such production, with considerably larger possibilities, and there can be no doubt that iron pyrite, with the increasingly acute shortage of native sulfur, is in fact a very valuable mineral. The averment that this property is patentable for iron pyrite alone, made by the Secretary-treasurer of Al Sarena Mines, Inc., at your office June 15, is therefore correct beyond reasonable doubt.

Your attention is again very respectfully invited to the fact that the original jurisdiction, and consequently all appellate jurisdiction arising therefrom, to dispute the title already conferred upon Al Sarena Mines, Inc., was apparently obtained and made possible only by fraudulent misrepresentation, deceit, and therefore improper use of the United States mails by the acting regional administrator of the Bureau of Land Management in his letter of April 14, 1949. In addition, the entire matter has otherwise been shown to be res adjudicata in our favor. Therefore, any question as to proper rules of practice and procedure, etc., is irrelevant, immaterial, and incompetent for that there was no legal jurisdiction and there should consequently have been no trial at all.

We feel sure that if you had been aware of the true facts at the time, you would have exercised your sense of fairness and justice and would have prevented the deplorable mishandling of affairs and abuse of citizens by subordinates in your department. We feel confident that you will do all within your power to right the wrongs which have been done and to correct the gross miscarriages and travesties of justice to which we have been subjected, which have herein and heretofore been specifically pointed out to you.

We wish once more to express appreciation for the courteous and thoughtful manner in which we were received and to express our regrets that it was not possible to report and discuss our findings in the record before leaving.

With kindest regards, we are

Sincerely yours,

AL SARENA MINES, INC.,  
H. P. McDONALD, Jr.,  
*Secretary-Treasurer.*

REPORT ON GEOPHYSICAL EXAMINATION OF PROPERTY OF AL SARENA MINES, INC.,  
TRAHL, OREG.

During the month of July 1949, prior to the visit of Messrs. Hattan and Sanborn, representatives of the United States Departments of the Interior and Agriculture, respectively, I personally supervised a geophysical examination of the property of Al Sarena Mines, Inc., for the purpose of obtaining further conclusive evidence of its mineral character. The examination employed the use of a Fisher M-Scope, which instrument is recognized generally for the determination of the presence of minerals and the intensity, or relative intensity, of mineralization. Such devices are being widely used by the major mining companies and by governmental departments for that purpose. The instrument was inspected by me personally before, during, and after the examination, having been found in each instance to be in good working order.

In terrain containing no underground piping, etc., as was the case in this examination, only mineral will produce a deflection of the needle, or the audible signal emitted by the instrument.

The aforesaid instrument was first used for testing ground known to be non-mineral in character, thereby establishing a zero position (for nonmineral ground) at actual zero, accompanied by no audible signal. Said instrument was then brought to the ground now in question without altering any of its adjustments. At no point on the ground now alleged by the Forest Service to be nonmineral in character, and at no other point visited on the property, did the instrument show the known zero or nonmineral reading. The needle instead assumed a new "normal" position, showing significant mineralization, accompanied by a pronounced audible signal throughout the examination. This new "normal" position, below which the needle never descended, was used as a basis for determining the number of points of rise of the needle, indicating corresponding increases in the intensity of mineralization in the various localities visited in the course of the examination. A deflection of the needle over the already productive enriched area showed a rise of 90 points, over ore having a minimum value estimated at 6 to 7 times the value necessary to render it commercial in this large-scale type of orebody. On this basis, it would appear that a rise of 13 to 15 points should constitute a satisfactory showing of commercial ore. Smaller rises would indicate the advisability of spending at least a limited amount of time and capital with the reasonable expectation of developing large quantities of commercial low-grade ore, especially in view of the definite, known, showing of mineralization even where no rise above the established norm is present.

Examples of the rises of the needle observed on claims later brought into question are as follows:

Name of claim	Reading No.	Number of points rise	Name of claim	Reading No.	Number of points rise
Cougar.....	1	20	Arroyo Verde.....	4	10
Do.....	2	10	Alabama.....	1	10
J. W. Merritt.....	1	80	Do.....	2	30
Do.....	2	70	Do.....	3	60
Do.....	3	70	Do.....	4	90
Staples.....	1	10	Do.....	5	30
Do.....	2	40	Do.....	6	70
Do.....	3	70	Do.....	7	90
Do.....	4	70	Do.....	8	70
La Jolla.....	1	10	J. D. McKinnon.....	1	80
Do.....	2	30	Do.....	2	20
Do.....	3	5	Do.....	3	20
Do.....	4	20	Delia McKinnon.....	1	30
Arroyo Verde.....	1	5	Do.....	1	30
Do.....	2	40	Rainboe.....	1	20
Do.....	3	20			

In addition to the foregoing findings, a group of samples was taken and assayed from these claims, later contested, at the direction of Mr. Hattan. Specific procedure and requirements were outlined for this sampling and assaying and were fully complied with. All samples were assayed and reported upon by reputable commercial laboratories who are recognized and patronized by the United States Government. Mr. Hattan directed that this sampling and assaying be done at the expense of Al Sarena Mines, Inc., and that the results thereof be reported to him in his own specified form, admitting at that time the inconclusive nature of his own examination. He further agreed that the results reported to him would be used as evidence in determining the outcome of the patent application filed by Al Sarena Mines, Inc. Results reported to Mr. Hattan, omitting results reported on uncontested claims, are as follows:

Sample No.	Description	Au, ounces	Ag, ounces	Au, value	Ag, value	Total value

The mineral content of this property is composed largely of galena, sphalerite, and iron pyrite, all of which are associated chemically with gold and silver. There are enormous quantities of iron pyrite present, carrying in most cases smaller amounts of gold and silver than in such minerals as galena. This iron pyrite, of which it is certain Mr. Hattan must have been aware, has a distinct value as a strategic mineral, it being a prime source of sulfuric acid, a basic chemical, and of sulfurous acid, from which sulfites are derived, chiefly for the paper industry. The ore is easy and inexpensive to mine and to treat and will show a profit on minimum values.

#### CONCLUSION AND RECOMMENDATIONS

Because of the known values and because of the essential uniformity of the geological formation and mineralization within clearly defined boundaries, this property may be designated properly as a broad lode or zone within the meaning of the decision in the *Eureka* case (103 U. S. 839) and others. It is recommended that the entire property be further developed by the systematic placing of significant numbers of diamond core drill holes throughout the entire Al Sarena group of 24 claims, using standard engineering procedure for the weighted sampling of the entire ore body. The data so obtained should be utilized for the purpose of furnishing mill heads of essentially constant value to a proposed ore dressing plant of very large capacity and low treatment cost per ton. The exact size of such mill should be determined on the basis of an economy study derived from the results of the core drilling program. The vast supply of iron pyrite should be exploited commercially, it having assumed far greater significance commercially and strategically since Mr. Hattan's examination.

The writer hereby concurs in and confirms the findings previously made by Messrs. D. Ford McCormick, George P. Sopp, and many other qualified and successful engineers, all of whom agree from their knowledge of the property that the nature and extent of mineralization, together with all known factors, definitely warrants the expenditure of time and capital by prudent persons in further development, especially along the lines hereinbefore outlined. It is the opinion of the writer that the vast mineralized deposit, confined within these claims by the clearly defined boundaries of the mineralized area near the exterior boundaries of the group of claims, constitutes a possibility of development of the largest low-grade, mass-production property on the North American continent. It is further the opinion of the writer that the systematic, miner-like development program outlined above should be prosecuted vigorously toward such a goal, even though considerable expenditure is involved in such program. With the preponderance of evidence of significant and valuable mineralization, such a program should not be abandoned or diminished unless, by some unforeseen and improbable chance, coredrill weighted sampling over the entire area for significant depths should then show the ore body to be not feasible even on large-scale operation. Under no circumstances should the officials of this corporation be influenced to abandon its plans for large-scale development and operation because of any allegations arising from alleged results from small, scattered samples, not weighted, and in all probability not assayed with the accuracy necessary when dealing with low-grade ore. Moreover, no reputable professional engineer can conscientiously, nor will he, condemn a property, as Mr. Hattan has done, without complete and comprehensive data, obtainable only by weighted sampling as outlined above. It is a fundamental principle of professional ethics to recommend neither heavy investment for commercial operation nor abandonment of such large-scale plans in the absence of data upon which to proceed intelligently. In the opinion of the writer, it is the duty of a member of the profession to recommend further expenditures for gathering such data and a distinct breach of professional ethics to attempt to prevent the necessary steps by management, such as patenting of the claims, for such scientific investigation and commercial development of an essential industry.

Respectfully submitted,

CHARLES R. McDONALD,  
Registered Professional Engineer,  
Alabama Certificate No. 1693.

MOBILE, ALA., June 21, 1951.

MARCH 19, 1951.

W. O. MACMAHON,  
Mobile, Ala.:

Talked at length to our friend, Mastin White, after my talk with you this morning. He had already asked Mr. Clawson to rush his decision all he could. He does not know how soon this will be, but will keep us fully posted. Warm regards.

FRANK W. BOYKIN,  
Member of Congress.

MOBILE, ALA., March 10, 1951.

Re Letter this date to Director of Bureau of Land Management, notice of default and legal demand for award of patent

MASTIN G. WHITE,  
Solicitor, Department of the Interior,  
Washington, D. C.

DEAR MR. WHITE: We hand you herewith for your information a copy of the subject notification of default and legal demand made this date upon Mr. Marion Clawson, Director of the Bureau of Land Management.

With kindest regards, we are

Sincerely yours,

W. O. MACMAHON,  
Special Counsel.

Re Oregon 0665, contest 39, notice of default and legal demand for award of patent

MARION CLAWSON,

*Director, Bureau of Land Management,  
Department of the Interior, Washington, D. C.*

DEAR MR. CLAWSON: The Bureau of Land Management, United States Department of the Interior, by and through the Oregon District Land Office, offered early in 1949 to sell, convey, transfer, and patent to Al Sarena Mines, Inc., a group of 23 claims in Jackson County, Oreg., after said Al Sarena Mines, Inc. had established, to the satisfaction of the Bureau of Land Management, its right to patent said claims in accordance with the applicable statutes. Said Bureau of Land Management consummated the sale by demanding the legal consideration therefor, which it had stipulated, and acknowledging the receipt thereof. The issuance of the final certificate, as evidence of transfer, even though it may have been encumbered with illegal addenda, was an admission of the completed transaction by the Bureau of Land Management, and vests title to the land in the purchaser (*Brummet v. Pearle*, 36 Ark. 471; *Broussard v. Broussard*, 43 La. Ann. 221).

On May 1, 1950, the Oregon District Land Office of said Bureau of Land Management served by registered mail on said Al Sarena Mines, Inc. an illegal and improper contest citation, based upon an adverse claim of the Forest Service, which claim was not sworn to, was not dated, was not made within the time prescribed for the filing of such claims, and was made not against the named contestee, but was made against a wholly nonexistent mining company. Said citation stipulated therein a 30-day procedure for responding to or answering said judicial proceeding held before the manager of the Oregon District Land Office, thereby establishing a 30-day procedure in this cause. Therefore, in accordance with established procedure binding the contestee, both the Interior Department and the Agriculture Department are likewise bound to the established 30-day procedure.

A state of facts, including countercharges, was set forth in demurrers and motions, as provided by your own regulations, in the answer that was submitted by the named contestee rendering the original charges immaterial, authority for which is also provided in your own regulations. Such countercharges, evidenced by and in the aforesaid demurrers and motions, require an answer within the 30-day period, and an adjudication "forthwith" by your manager in accordance with and as set out in your own rules.

Therefore: Predicated upon the rules made and prescribed as set forth in your own regulations furnished by your Department (and in no wise waiving any or all rights accruing to contestee under and by virtue of the rules of evidence and the rules of practice as obtain in Federal and State courts, as agreed upon with the Honorable Mastin G. White, Acting Assistant Secretary of the Interior), it appears that not having adjudicated the demurrers and motions "forthwith" or within the 30-day period which you yourselves set up as a time limit in this cause, your Department at the expiration of said 30 days was in default and is still in default and that the contestee is entitled to have taken as confessed against the Forest Service and the Interior Department the aforesaid demurrers and motions and all of the allegations otherwise officially made by contestee, and to have the proceedings brought under the aforesaid contest citation dismissed and the patent issued as prayed for.

Without apparent regard for its own default or for that of the Forest Service and without regard for right, equity, or justice, the Bureau of Land Management coerced Al Sarena Mines, Inc., into an apparently illegally and improperly conducted "hearing," by means of which it was attempted to violate the constitutional rights of the named contestee in an obviously discriminatory and prejudicial proceeding designed to confiscate from the rightful owners for the benefit of a third party seeking a preference right to the land for timber raising purposes.

This is evidenced by the illegally taken testimony, allegedly taken only for the convenience of the Government but without the right of cross-examination after the hearing had been legally closed. Having appealed on demurrers and motions under the rules of evidence and the rules of practice hereinbefore described, contestee was barred from introducing further testimony until the demurrers and motions, as appealed, had been adjudicated by the appellate authorities. The Forest Service and the Bureau of Land Management of the Interior Department were likewise barred from the introduction of further testimony until the demurrers and motions, as appealed, had been adjudicated by the appellate au-

thorities. Simply because the Forest Service and the Interior Department saw fit to proceed irregularly and to violate the rules, it was not incumbent upon the contestee to be a party to such violations.

Moreover, the aforementioned defaults were sufficient to have prevented the hearing altogether. In any event, the appeal on demurrers and motions, taken in open hearings and accepted by the manager of the land office acted as an immediate and automatic stay of all proceedings until adjudicated by the appellate authorities, and any testimony or evidence introduced thereafter is totally worthless and inadmissible.

After a series of further illegal and ultra-vires acts on the part of the Bureau of Land Management, among which was the absurdity of returning the "record" to the court of original jurisdiction while still on appeal and without rendering appellate adjudication, an adverse and apparently prejudicial "decision" was handed down by the manager of the Oregon District Land Office by the illegal means heretofore described, from which "decision" contestee again appealed, filing a supplemental appeal on January 4, 1951. A secondary answer was filed on February 8, 1951, in reply to comments made by the Forest Service relative to the supplemental appeal.

It should be remembered here that the Forest Service did not officially answer the charges made in contestee's original answer or in the official appeal, already taken, nor did said agency answer the questions raised or the charges made in the memorandum brief and argument, thereby defaulting any rights it might have had to answer said charges or questions. The only action taken was an attempt to have taken as confessed the charges made by the Forest Service against the contestee, such attempt being made in the form of a motion, which was denied, and which denial was never appealed from. The Forest Service, then, as well as the Bureau of Land Management, was and is also already in default.

Wherefore, the premises considered, including all answers, demurrers, motions, briefs, arguments, agreements, etc., heretofore filed by contestee in this cause, contestee herewith makes formal legal demand upon you as Director of the Bureau of Land Management to forthwith declare the proceedings brought under the contest citation in default, void all findings against contestee by the manager of the Oregon District Land Office, dismiss the proceedings, and authorize the issuance of the patent as prayed for.

Respectfully submitted.

AL SARENA MINES, INC.,  
W. O. MACMAHON,  
*Special Counsel.*

DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington, D. C., October 25, 1950.

Note to Director CLAWSON,

*Bureau of Land Management:*

C. October 24 I received a long-distance telephone call from Representative Boykin at Mobile, Ala. The purpose of his call was to request that the decision on the appeal of Al Sarena Mines, Inc., be expedited. I explained that the appeal is presently pending before you for a determination. Mr. Boykin thereupon asked that I pass his request on to you.

Portland, Oreg., October 2, 1950.

Mineral Entry Oregon 0665.

Contest No. 38.

*U. S. Forest Service v. Al Sarena Mines, Inc.*

Memorandum

To: Director, Bureau of Land Management, Washington, D. C.

From: Manager, Land Office, Portland, Oreg.

Subject: Mineral contest.

On April 13, 1950, the United States Forest Service filed notice of protest against the issuance of patent to 15 mining claims embraced in mineral entry Oregon 0665, made by the Al Sarena Mines, Inc., affecting lands within the Rogue River National Forest, Oreg. The protest was based on the charges

that the claims are nonmineral in character, and that minerals have not been found in sufficient quantity to constitute a valid discovery. It was further charged that the patent expenditures have not been made on or for the benefit of 5 of the 15 claims protested.

On April 25, 1950, notice of the charges was addressed to the Al Sarena Mines, Inc., and on May 22, 1950, the contestee filed an answer. The answer contains "demurrer" and motions for dismissal of the protest for the reasons therein stated. On April 26, 1950, these documents were forwarded to the Director, Bureau of Land Management. Thereafter, the Director of the Bureau of Land Management returned the record to the Land Office with instructions that the manager set an early date for a hearing as requested by the Al Sarena Mines, Inc. The hearing was arranged immediately and set for 10 a. m., September 13, 1950, before the manager of the Land Office, Portland, Oreg., and the parties were duly notified. The contestant and the contestee appeared at the hearing and each was represented by counsel.

Before the hearing was opened, Mr. W. O. MacMahon, counsel for contestee, proceeded to argue the motions contained in the answer, and demanded an immediate ruling thereon. Subsequently, the hearing was opened and the "demurrer" was considered along with other motions and they were held to be without merit. The motions were accordingly overruled, at the conclusion of which counsel for contestee charged the manager with insubordination and prejudice and demanded that the record be transmitted to the Solicitor of the Department of the Interior, pursuant to an alleged agreement or understanding between the counsel for the contestee and the Solicitor. The manager stated he had not been advised officially of any such an agreement and that the hearing having been requested by the contestee and ordered pursuant to instructions of the Director of the Bureau of Land Management and in strict conformity with established rules of practice, would proceed for the purpose of determining validity of the claims contested, and that any ruling or decision by the manager would be subject to review by the Director of the Bureau of Land Management and the Secretary of the Interior. The counsel for contestee announced that he would appeal to the Solicitor. At 11 a. m. counsel and representatives of contestee departed, taking with them what appeared to be various exhibits. On the following morning, September 14, 1950, counsel for contestee filed notice of appeal from decision on the motions.

Attention is invited to the fact that it was impossible for the stenographer in the hearing to take accurate notes of the preliminary proceedings because of the boisterous conduct and the rapid and incoherent manner in which counsel for contestee proceeded. The contestee installed a tape-recording machine prior to the hearing and a record was made of the preliminary proceedings. I requested counsel for contestee to furnish a copy of such recording for the record. However, up to this time a copy has not been furnished. It has therefore been necessary to prepare a summary of the preliminary proceedings from the stenographer's notes.

A copy of the transcript of the testimony, prepared at the sole expense of the United States, has not been furnished the contestee as requested because of its refusal to be liable for the payment of contestee's proportionate cost of the proceedings.

In view of the refusal of the counsel for contestee to attend the hearing and participate in the proceedings and his deliberate attempt to stall and prevent an orderly hearing to determine the validity of the mining claims on their merits as previously requested by contestee, and his absurd and unwarranted charge of prejudice, I am submitting this case with a recommendation only.

The hearing was resumed at 11 a. m., and the regional attorney for the United States Forest Service called Mr. Robert G. Leavengood, timber management assistant, as the first witness for the contestant. The witness, after being duly sworn, identified the contested claims and testified that he spent parts of 3 days,

September 6, 7, and 8, on the claims; that he examined the lands as to their timber values and for national-forest purposes. He stated that the lands contain 2 stands of timber— that 1 stand of timber is mature and averages 25,000 net merchantable board-feet per acre, and that an understory is about 50 years and very thrifty and fast growing. He estimated that the present merchantable timber to have a value of approximately \$77,000, and if cut there would remain a 25 percent stand of 8- to 14-inch growing stock.

Counsel for contestant introduced Mr. Elton M. Hattan, mineral examiner for the Bureau of Land Management, as the next witness for contestant. After being duly sworn, this witness identified the contested claims and stated that he visited each claim during the months of May and July 1949 and September 1950. He testified as to general topography and mineralization of the area and stated specifically that he went to all of the places on the claims designated as places of discovery and other places as indicated by representatives of the contestee; that samples of ore were taken by him from each claim and that these samples were marked and assayed for their mineral content and value. These samples were assayed by the United States Bureau of Mines and other responsible concerns, and reports issued. It appears from these reports that the mineral content of such samples, when considered on the basis of current standard of values, would not warrant the necessary expenditures of capital, time, and labor in their extraction and marketing, with a reasonable expectation of profit. It appears that the minerals found on the contested claims are therefore insufficient in quantity and value as to constitute valid discovery within the meaning of the United States mining laws.

Mineral Examiner Hattan was accompanied on some of his visits to the mining claims by Mineral Examiner William C. Sanborn of the United States Forest Service. The regional counsel for the Forest Service called Mr. Sanborn as his next witness to testify for the contestant. The testimony given by this witness corroborates the testimony given by Mineral Examiner Hattan. The mineral examiners also testified as to expenditures made on the 5 claims contested on the additional charge that patent expenditures in the sum of \$500 had not been made on or for the benefit of each claim. It appears from the testimony that these examinations were made by the witnesses after the date of mineral survey and subsequent to the expiration of the period of the publication of the notice of the application. The testimony based on these examinations indicates that expenditures and improvements made on or for the benefit of these claims do not in value amount to \$500 for each claim, nor does it appear that the improvements found bear a direct relation to the practical mineral development and facilitate the extraction of minerals.

It appears that the showing submitted in support of the charges contained in the contest consists of testimony based on personal knowledge of the witnesses who, in company with each other and representatives of the contestee, went upon and examined each claim contested. The findings of these mineral examiners as to mineral discoveries as verified by reliable reports show clearly that valid mineral discoveries have not been made on any of the 15 mining claims contested. Furthermore, it appears from such testimony that the character and the value of expenditures required for patent purposes have not been made on or for the benefit of the five mining claims contested on this charge. It is, therefore, respectfully recommended that the contest be sustained, and that the entry be cancelled as to the 15 claims protested.

On September 28, 1950, the regional attorney for the United States Forest Service filed in the land office a showing in support of the motion made by contestant in which it requests that the charges specified in the contest be taken as confessed because of the contestee's failure to appear and participate in the hearing as required by the rules of practice. In this connection it is my view that since contestant elected to proceed by the taking of testimony at the hearing, action on the motion should be held in abeyance pending a decision on the merits of the case.

PIERCE M. RICE, *Manager.*

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
LAND OFFICE,  
Portland, Oreg., December 14, 1950.

DECISION

Mineral Entry Oregon 0065—Contest No. 38

UNITED STATES OF AMERICA V. AL SARENA MINES, INC.

PROTEST SUSTAINED—MINERAL ENTRY CANCELED IN PART

On April 6, 1949, final mineral certificate was issued on application Oregon 0065, filed by the Al Sarena Mines, Inc., for the

Oro Alto	Mark Applegate	Rainboe
Oro Rico	H. McKenzie	Delia McKinnon
Cougar	J. L. Grubb	Sulphide
Oro Real	J. D. McKinnon	Staples
J. W. Merritt	Henry Applegate	Manganese
Peter Applegate	A. W. Dahlberg	La Jolla
Oro Escondido	Telluride	Arroyo Verde
W. C. Leever	Alabama	

lode mining claims situated in secs. 20, 21, 28, 29, 30, T. 31 S., R. 2 E., W. M. Oregon, within the Rogue River National Forest.

On April 13, 1950, the Forest Service filed protest against the entry as to the following claims:

Claim	Located	Claim	Located
Henry Applegate-----	May 12, 1897	J. L. Grubb-----	May 12, 1897
J. W. Merritt-----	May 14, 1897	J. D. McKinnon-----	May 12, 1897
Rainboe-----	Dec. 9, 1933	Manganese claim-----	Oct. 20, 1897
Sulphide-----	Sept. 21, 1934	Staples-----	June 25, 1934
Delia McKinnon-----	June 6, 1897	Arroyo Verde-----	Aug. 27, 1897
Cougar-----	Nov. 20, 1936	Alabama-----	May 25, 1897
Oro Escondido-----	Aug. 29, 1936	La Jolla-----	Aug. 27, 1897
W. C. Leever-----	May 12, 1897		

The protest was assigned contest No. 38, and it charges that the 15 mineral claims protested are invalid because the land is nonmineral in character and that minerals have not been found in sufficient quantities to constitute a valid discovery. The protest contains the further charge that the requisite expenditure of \$500 in improvements and developments has not been made on or for the benefit of the Manganese, Staples, Arroyo Verde, Alabama, and La Jolla claims.

On April 25, 1950, notice of the charges was addressed to the Al Sarena Mines, Inc., and on May 22, 1950, the Al Sarena Mines, Inc., as contestee, filed an answer. The answer sets forth demurrer and motions to dismiss the protest. Thereafter, pursuant to the request of the contestee, the Director of the Bureau of Land Management instructed the manager of the land office to set an early date for a hearing. A hearing was set for 10 a. m. September 13, 1950, before the manager of the land office, Portland, Oreg. The contestant and the contestee were so notified by registered mail. The contestant and the contestee appeared at the hearing, and each was represented by counsel.

The hearing was opened and counsel for contestee demanded an immediate ruling on the demurrer and the motions contained in the answer. The demurrer and the various motions are based on the grounds that—

1. The claims were located and filed prior to the inclusion of the lands in the Rogue River National Forest, and that the act of Congress is *ex post facto* as to the mining claims, and the Forest Service is without authority to protest them;

2. (a) That the notice by the Forest Service was not properly dated;

(b) That the notice, which is entitled *United States of America, Contestant, v. Al Sarena Mining Company, Contestee*, is no notice to the contestee as there is no such company; and

3. That the contest recites requirements that all answers of contestee shall be under oath, but that neither the contest citation nor the protest were under oath.

The foregoing motions were considered and ruled on as follows:

1. That the President of the United States had statutory authority to withdraw and reserve public lands for a public purpose; that the mining claims contested were all located subsequent to September 28, 1893, when the President by Executive order withdrew the lands in the national forest pursuant to act of March 3, 1891 (26 Stat. 103); and that the contention that the act is *ex post facto* is without merit for the reason that the constitutional provision relating to *ex post facto* laws has reference to penal statutes and does not apply in this case;

2. (a) That the United States may initiate a protest at any time before the issuance of patent and that failure to date the notice was immaterial;

(b) That the fact that the protest was entitled *United States of America v. Al Sarena Mining Company* is without merit since it appears that notice of the protest was addressed to and served on the Al Sarena Mines, Inc., the contestee, by registered mail, and the Al Sarena Mines, Inc., responded to the notice; and

3. The fact that neither the contest citation nor the protest were under oath is likewise without merit, since this requirement applies to private contests and does not apply to contest proceedings initiated on behalf of the United States, which are not required to be sworn to, as contended by contestee.

Accordingly, the demurrer and various motions appearing to be without merit, they were overruled. Whereupon counsel for contestee demanded that the record be transmitted to the Solicitor of the Department of the Interior pursuant to an alleged agreement or understanding between counsel for contestee and the Solicitor, to the effect that the Federal Code of Regulations and Departmental Rules of Practice would not be applicable in this case, and that, instead, the rules of civil procedure as obtains in local district courts would govern. The manager, not having been advised officially of any such agreement, refused the demand. At the request of counsel for contestant, the hearing was ordered to proceed with the taking of testimony to determine the validity or invalidity of the claims protested. Counsel for the contestee served notice of an appeal to the Solicitor of the Department of the Interior and stated that he would not attend the hearings, offer any evidence, interrogate any of the witnesses, nor would the contestee be bound by the proceedings. (The contestee has appealed the above ruling.) Counsel and representatives of the contestee departed, and counsel for the Forest Service requested permission to proceed to offer its testimony. The hearing was resumed and the Forest Service proceeded to offer testimony in order that the true character of the lands might be determined and the case decided on the merits.

The Forest Service introduced its witnesses and the testimony given by them was recorded verbatim, transcribed, certified, and is a part of the hearing record. Counsel for the Forest Service called as its first witness Mr. Robert G. Leavengood, timber management assistant, who, after being duly sworn, identified the contested claims and testified that he spent parts of 3 days, September 6, 7, and 8, 1950, on the claims; that he examined the lands as to their timber values and for national-forest purposes. He stated that the lands contain 2 stands of timber—that 1 stand of timber is mature and averages 25 thousand net merchantable board feet per acre, and that the understory is about 50 years and very thrifty and fast growing. He estimated the present merchantable timber to have a present value of approximately \$77,000, and if cut there would remain a 25-percent stand of 8- to 14-inch growing stock.

Mr. Elton M. Hattan, mineral examiner for the Bureau of Land Management, and Mr. William C. Sanborn, mining engineer for the United States Forest Service, were called to the stand by the contestant and, after being duly sworn, these witnesses identified the contested claims and stated that they, in company with each other and with representatives of the contestee, visited each claim during the month of July 1949. Mr. Hattan also visited the contested claims in company with the contestee's representative during the month of May 1949 and some of the claims during September 1950. These witnesses referred to the contents of various publications and testified from personal examinations and observations made by them as to the general topography and mineralization of the area covered by all the claims in the application. Specifically, they testified that they went to all of the places on the contested claims designated by contestee as places of discovery and other places on the claims as indicated by representatives of the contestee; that samples of rock were taken by them from such places on each claim and the samples were marked for identification; that these samples were personally taken or sent by them to the United States Bureau of Mines and to other responsible concerns mentioned, for assay and reports as

to the mineral content and value of such samples, and that assay reports were issued. These reports were marked for identification and submitted in evidence. Mineral Examiners Hattan and Sanborn testified that they did not find any evidence of mineral-bearing rock or other evidence of mineral on any of the claims contested which would justify a reasonably prudent man in the expenditure of time and capital with a reasonable expectation of developing a paying mine. The assay reports submitted show traces of gold and silver, or less, which is interpreted to mean 21 cents or under in gold value and 7 cents or under in silver, based on gold at \$35 per ounce and silver at 90 cents per ounce. Some of the assays made of the same samples show lead and zinc minerals in amounts less than 0.05 percent, which represents a value of less than 20 cents per ton, present prices, in either lead or zinc. The assay reports confirm the findings of the mineral examiners.

It appears from the testimony of Robert G. Leavengood, timber management assistant, that the lands covered by the contested claims contain a substantial amount of merchantable timber and that the lands are more valuable for the production of timber than they are for any other purpose. In this connection, reference is had to the case of *United States v. Dawson*, decided April 12, 1944, wherein the Department held in part that "A discovery of mineral which will validate a location under the mining laws must show that the land is more valuable for the removal and marketing of the mineral than for any other purpose; that the removal and marketing will yield a profit or that the mineral exists in such quantity as to justify a prudent man in expending labor and capital to obtain it." (58 L. D. 670.)

Mineral Examiners Hattan and Sanborn further testified as to expenditures found on the Manganese, Staples, Arroyo Verde, Alabama, and La Jolla mining claims contested on the additional charge that patent expenditures in the sum of \$500 had not been made on or for the benefit of each claim. They testified as to the location, character, and value of improvements found on these claims and stated that such improvements do not amount to \$500 for each of the claims, nor do the common improvements found bear a direct relation to the practical mineral development of the claims.

On September 28, 1950, counsel for contestant submitted a showing in support of a motion to consider the charges specified in the contest as confessed because of the contestee's failure to appear and participate in the hearing as required. The contestant having elected to make out a prima facie case by offering testimony at the hearing in support of the charges, the contestant's motion is denied, subject to the right of appeal within 30 days of receipt of notice hereof.

The record shows clearly that the contestee was afforded every opportunity to be heard and submit evidence at the hearing, and that its failure to do so is due to its refusal to comply with the rules of practice or to its deliberate disregard of their requirements.

In view of all the testimony and documentary evidence submitted in this case, it appears that the lands affected by the 15 claims contested are all more valuable for timber production than for any other purpose, and that valid mineral discoveries have not been made on any one of the 15 claims contested, that the lands are nonmineral in character, and that patent expenditures required by law have not been made on or for the benefit of the 5 mining claims contested on this charge. Accordingly, the charges set forth as the basis for the protest having been established, the protest is sustained, and the entry is canceled to the extent of the 15 claims protested.

The contestee is hereby allowed 30 days from receipt of notice hereof within which to file a motion to reopen the hearing, or appeal this decision to the Director of the Bureau of Land Management.

Any action taken by the contestant or contestee in response to this decision must bear evidence of service of notice of such action on opposing party.

**PIERCE M. RICE, Manager.**

UNITED STATES DEPARTMENT OF THE INTERIOR,  
BUREAU OF LAND MANAGEMENT,  
Washington, D. C., April 27, 1951.

## DECISION

## Mineral Contest No. 38—Rogue River National Forest

## UNITED STATES

v.

## AL SARENA MINES, INC.

## MINERAL ENTRY HELD FOR CANCELLATION IN PART

On April 6, 1949, final certificate issued on mineral application, Oregon 0665, filed October 4, 1948, by the Al Sarena Mines, Inc., for a patent to the Oro Alto, Oro Rico, Cougar, Oro Real, J. W. Merritt, Peter Applegate, Oro Escondido, W. C. Leever, Mark Applegate, H. McKenzie, J. L. Grubb, J. D. McKinnon, Henry Applegate, A. W. Dahlberg, Telluride, Alabama, Rainboe, Delia McKinnon, Sulphide, Manganese, La Jolla, Staples, and Arroyo Verde lode claims situated in secs. 20, 21, 28, 29, and 30, T. 31 S., R. 2 E., W. M., Oregon, within the Rogue River National Forest.

On April 25, 1950, the manager of the Portland Land Office issued a notice under contest No. 38 entitled, *United States v. Al Sarena Mines, Inc.*, wherein the defendant was notified that by authority of a letter dated April 11, 1950, from the Forest Service, the following charges have been filed by a representative of the United States Government against the validity of the mining claims embraced in the entry, to wit: That the land in the Henry Applegate claim, J. W. Merritt claim, Rainboe claim, Sulphide claim, Delia McKinnon claim, Cougar claim, Oro Escondido claim, W. C. Leever claim, J. L. Grubb claim, J. D. McKinnon claim, Manganese claim, Staples claim, Arroyo Verde claim, Alabama claim, and La Jolla claim, is nonmineral in character and that minerals have not been found within the claims in sufficient quantities to constitute a valid discovery; and that the requisite expenditure of \$500 in improvements and development has not been made on the Manganese claim, Staples claim, Arroyo Verde claim, Alabama claim, and La Jolla claim.

A copy of the protest of the Forest Service which was dated: "April —, 1950" and stamped on its face: "Received April 13, 1950, Land Office, Bur. Land Mgm't., Portland, Oregon," was attached to and made a part of the notice. It was stated in the protest that the "land embraced in mineral application No. 0665 is known as the Al Sarena Mine, and is situated in secs. 20, 21, 28, and 29, T. 31 S., R. 2 E., W. M., within the Rogue River National Forest." It appears that although this copy of the protest was styled *United States v. Al Sarena Mining Company*, the notice issued thereon was addressed to the defendant under its proper name.

On May 22, 1950, an answer was filed alleging that "all claims are mineral in character" and that the requisite expenditure of \$500 in improvements has been made on each of the claims. It is further stated in the answer:

"We herewith submit a state of facts rendering such charges worthless and immaterial. The state of facts rendering such charges immaterial is based upon the following data, submitted in this answer in the form of demurrers:

"Comes now Al Sarena Mines, Inc., of Trail, Ore., by and through its president, H. P. McDonald, and demurs to the complaint on the following separate and several grounds, to wit:

1. Inasmuch as many claims herein involved, to wit: Henry Applegate, J. W. Merritt, Delia McKinnon, W. C. Leever, J. L. Grubb, J. D. McKinnon, were filed and were of record before the land included in such claims was ever designated by act of Congress within the confines of a national forest, and since the Constitution of the United States forbids ex-post-facto laws, etc., the Forest Service is without right to file any contest under the circumstances against any claim made and filed prior to its acquiring any jurisdiction over this land.

2. Contestee demurs to the form and the manner and the lack of notice of the protest signed by H. J. Andrews, regional forester, allegedly in support of the allegations of the complaint upon the following separate and several grounds, to wit:

(a) First, the protest (contest No. 38) stamped "Received April 13, 1950," is not properly dated by Mr. Andrews and appears but the conclusion of the pleader.

(b) The protest recites *United States of America, Contestant, v. Al Sarena Mining Company, Contestee*. There is no such company as the Al Sarena Mining Co. Your complaint cites Al Sarena Mines, Inc., as contestee. Since the protest is made against a nonexistent company and not against Al Sarena Mines, Inc., cited in your complaint as contestee, your complaint is based upon a protest predicated upon a false premise against a nonexistent company, and should be dismissed as having no basis, because there is no protest of record against Al Sarena Mines, Inc.

3. Inasmuch as your contest recites requirement that all answers of contestee be under oath, it appears irregular that neither the contest citation nor the protest upon which it is based is under oath.

"Wherefore, the above premises considered, the contestee moves the court, commission, or other representative of Government acting as a court or sitting in judgment of this cause, that the contest be dismissed and the patent certificate issue forthwith as in all truth and verity it should.

"Contestee further demurs to any complaint of any nature being allegedly filed in opposition to the issuance of the patent prayed for, for that all requirements of the law and the land office having been met, including publication as is required, which publication was made from November 12, 1948, to January 7, 1949, inclusive during which time there was no protest filed, and contestee so advised by representative, Mr. Carl F. Spaulding, of the Bureau of Land Management, by long-distance telephone, to which conversation there were and are witnesses. Further contestee advised the Bureau of Land Management on January 13, 1949, therewith transmitting final proceedings in this matter, and again on January 27, 1949, contestee wrote to ascertain why your delay in reply; and on February 8, 1949, a communication was signed by Mr. Carl F. Spaulding, addressed to contestee, advising that the purchase money due is \$2,375 and further advising that upon receipt of the application to purchase accompanied by the required amount of purchase money, the papers would be examined with the idea of issuing final certificates. You will note that request was made for the money by the Bureau of Land Management and the papers would be examined by them with the idea of issuing final certificate. There is no mention in this letter of any protest, oral or written, made by the Forest Service or anyone else, which is quite conclusive that there was none, for had there been a protest or official question as to bona fides, such a letter as was received from Mr. Spaulding would have been contrary to the law and procedure in such cases.

"Pursuant to the above, the money, to-wit: \$2,375 was sent to the district land office and was accepted by them as evidenced by official receipt (bill No. 324 dated February 17, 1949) and on April 6, 1949, final certificate of mineral entry issued, signed by Charles D. Lee, who in addition to issuing the certificate inserted some several lines, which practically nullified the issuance of the certificate. This, contestee claims, was an utterly illegal and ultra-vires action on his part and contestee further charges in this connection that there is nothing of record of which contestee has been advised to evidence the allegation that any protest was ever legally made by the Forest Service or anyone else according to and within the time required by law.

"It appears, therefore, from the foregoing that the matter has been handled in an irregular manner, prejudicial to the interests of the contestee, without proper basis or probable cause. Wherefore, the premises considered, the contestee moves the commission or other representative of Government acting as a court or sitting in judgment of this cause, that this contest be dismissed forthwith, the contestee so advised, and the patent certificate issue immediately, as in all truth and verity it should."

A hearing was set for 10 a. m. September 13, 1950, before the manager of the land office at Portland, Oreg., and the interested parties notified thereof. On the date set for the hearing both parties appeared and were represented by counsel. At the beginning of the hearing there was presented a letter dated September 8, 1950, signed by the president of the Al Sarena Mines, Inc., authorizing W. O. MacMahon to represent it at the hearing. Counsel for the defendant insisted that action be had on the demurrers and motions set forth in the answer before proceeding with the hearing, whereupon the manager overruled the demurrers and motions set forth in the answer and ordered the hearing to proceed. Counsel for the defendant stated that he would appeal from the ruling and demanded that action be had on the appeal before proceeding with the hearing. Counsel for the Forest Service objected to the delay, stating that the Government had been put to considerable expense in preparing for the hearing and that under the rules of practice they should proceed with the hearing without additional

expense and delay. The manager directed that the hearing proceed and that testimony be submitted to establish the validity or invalidity of the mining claims. It was also ordered that each party must pay the cost of taking the direct examination of his own witnesses and the cross-examination on his behalf of other witnesses and that the cost of noting motions, objections, and exceptions must be paid by the party on whose behalf the same are made. Counsel for the Forest Service explained that it was not the intention of the Forest Service to secure the cancellation of the mining claims but only that the application for patent for the claims be denied. Counsel for the defendant stated that he had no objection to the amendment but stated that the contestee would not be responsible for the cost of taking any of the testimony and withdrew from the hearing whereupon the Forest Service proceeded to submit testimony in support of the charges. On September 14, 1950, a notice of appeal from the action of the manager, overruling the demurrers and motions to dismiss the proceedings, was filed in the manager's office.

By memorandum dated October 2 the manager transmitted the papers in the case, stating that at the opening of the hearing he held the demurrers and motions to dismiss the proceedings were without merit, overruled them and directed that the hearing proceed, whereupon counsel for the defendant stated that he would appeal and withdrew from the hearing.

On November 24, 1950, the record was returned to the manager with instructions that he render a decision as provided for under the rules of practices (43 C. F. R. 221.40 and 221.41). On December 14, 1950, the manager rendered his decision wherein it is stated that: " \* \* \* the demurrer and various motions appearing to be without merit, they were overruled. Whereupon, counsel for contestee demanded that the record be transmitted to the Solicitor of the Department of the Interior pursuant to an alleged agreement or understanding between counsel for contestee and the Solicitor, to the effect that the Federal Code of Regulations and Departmental Rules of Practice would not be applicable in this case, and that, instead, the rules of civil procedure as obtains in local district courts would govern. The manager, not having been advised officially of any such agreement, refused the demand. At the request of counsel for contestant, the hearing was ordered to proceed with the taking of testimony to determine the validity or invalidity of the claims protested. Counsel for the contestee served notice of an appeal to the Solicitor of the Department of the Interior and stated that he would not attend the hearing, offer any evidence, interrogate any of the witnesses, nor would the contestee be bound by the proceedings. \* \* \* counsel and representatives of the contestee departed, and counsel for the Forest Service requested permission to proceed to offer its testimony. The hearing was resumed and the Forest Service proceeded to offer testimony in order that the true character of the lands might be determined and the case decided on the merits."

After reviewing the testimony submitted by the Forest Service the manager found that: "In view of all the testimony and documentary evidence submitted in this case, it appears that the lands affected by the 15 claims contested are all more valuable for timber production than for any other purpose, and that valid mineral discoveries have not been made on any 1 of the 15 claims contested, that the lands are nonmineral in character, and that patent expenditures required by law have not been made on or for the benefit of the 5 mining claims contested on this charge. Accordingly, the charges set forth as the basis for the protest having been established, the protest is sustained and the entry is canceled to the extent of the 15 claims protested." The right to file a motion to reopen the hearing or to appeal was allowed.

In due time a "supplemental appeal" was filed, reiterating the objections set forth in the original appeal and insisting that the hearing should have been conducted under the rules of civil procedure as obtains in the local district courts and not under the Code of Federal Regulations and the Departmental Rules of Practice. It is also contended that this office was without jurisdiction to return the record to the manager's office for the rendering of a decision while an appeal from the denial of the motions to dismiss was pending.

Defendant having refused to pay its share of the cost of transcribing the testimony submitted at the hearing at the expense of the Government, the manager properly declined to furnish defendant's counsel a copy thereof without cost. Defendant's counsel was advised that a copy of the hearing record, consisting of 55 pages, would cost him \$55.

The act of June 4, 1897 (30 Stat. 36), provides that: "Any mineral lands in any forest reservation which have been or which may be shown to be such, and

subject to entry under the existing mining laws of the United States and the rules and regulations applying thereto shall continue to be subject to such location and entry," notwithstanding the reservation. The fact that there were mining locations on some of the land before it was included in the national forest would not relieve the Forest Service of its right and duty to file a protest with this Department against patenting of such mining claims if on investigation they were believed to be invalid.

The act of February 1, 1905 (16 U. S. C. 472), authorizes the Secretary of the Department of Agriculture to execute all laws affecting public lands reserved for national forests excepting such laws as affect the prospecting, locating, entering, and patenting of any such lands. Hence, this Department has the jurisdiction and authority necessary to determine whether mining claims have been perfected by valid discoveries and whether the owner thereof has complied with the provisions of the United States mining laws and the regulations thereunder and therefore is entitled to a patent. As it is fundamental that under the United States mining laws no mining claim can be patented without a valid discovery, it is the duty of this Department to determine whether such a discovery has been made and to order a hearing where an examination of the claim discloses that it may lack such a discovery or that \$500 may not have been expended for its benefit.

Pursuant to the joint regulations of the Department of the Interior and the Department of Agriculture, dated August 5, 1915 (43 CFR 205), the manager is required to notify the regional forester of the filing of an application for mineral patent for lands within a national forest and upon receipt of notice of the filing of such an application it is the duty of the Forest Service to make an investigation as to the validity of such a mining claim regardless of whether the location was made prior to or after the creation of the national forest and if it is believed that the mining claim is invalid to file a protest not under oath or corroborated against the entry or application for patent, plainly and briefly stating the grounds upon which the protest is based. It is also provided that upon receipt of such a protest the manager is required to issue notice of the charges and serve the same together with a copy of the protest upon the defendant; that upon an answer being filed the manager is required to set a date for a hearing and proceed as provided by the rules of practice; that a protest may be filed by the Forest Service against any application for mineral patent for mining claims located within a national forest at any time prior to the issuance of the patent; and that when a mineral application for patent is filed the proof shall be considered on its merits, and, if found regular, issue the final certificate, "but the claimant should be advised in such case that the patent will be withheld" pending the determination of the protest.

On March 18, 1949, the regional forester filed in the manager's office a request that action be withheld in accordance with the provisions of the joint regulations above referred to, until the Forest Service had an opportunity of having an investigation made as to the validity of the mining claims and a report submitted as to the apparent validity or invalidity of the claims. Accordingly, final certificate issued April 6, 1949, containing a notation on its face that patent would be withheld by the Bureau of Land Management pending a report upon the bona fides of the claims. The certificate contains a printed statement that a patent shall issue upon presentation of the certificate to the Director "if all then be found regular," meaning, of course, that patent will be issued if the applicant has met all of the requirements of the United States mining laws and regulations necessary to obtain a patent. After a field examination of the claims the Forest Service filed the protest.

The contest proceedings were conducted under rules of practice (43 CFR, pts. 221 and 222), and under authority of sections 453 and 2478, Revised Statutes (43 U. S. C. 2, 1201). Part 221 is devoted mostly to contests between private parties claiming the same land; while part 222 is confined to contests initiated by the Government, although section 222.14 states that proceedings under part 222 will be governed by the rules of practice under part 221, neither part 221 nor part 222 requires that Forest Service protests be under oath and regulations (43 CFR 205.3; 205.4) specifically state that such protests shall not be under oath. This office has not been advised that the established procedure governing hearings held for the purpose of establishing the validity of mining claims on the public domain has been modified as contended in the appeal. In a letter of November 16, 1950, appearing in the record, to the attorney for the appellant, Solicitor Mastin G. White, refuted the allegation that any agreement was made with respect to the procedure to be followed. Therefore the

appeal from the action of the manager overruling the demurrers and motions to dismiss the proceedings did not act as a stay of the proceedings instituted by this Department pending action on the appeal by the Secretary and this office acted within its jurisdiction when it returned the record to the manager for the rendering of a decision by him (43 CFR 221.40).

It was clearly set forth in the protest that the protest was against mineral application Oregon 0665, survey No. 879, and that the mining claims named in the protest were known as the Al Sarena Mine. The notice issued under the protests was addressed to the Al Sarena Mines, Inc., and notified it that the charges set forth in the protest were "filed by a representative of the United States Government against the validity of your entry."

The fact that there was a misnomer of the contestee in the heading of the protest or that the protest was incorrectly dated is immaterial, as the proper party received the notice issued on the protest and responded thereto. Section 221.8, title 43, Code of Federal Regulations, provides that if the defendant makes answer without questioning the service or proof of service the contest will proceed without further requirement in those particulars.

The requirement of section 2325, Revised Statutes (30 U. S. C. 29), that adverse claims be filed during the period of publication has no relation to contests initiated by the Government. It relates only to mining locations held by an owner other than the patent applicant and conflicting with the claims covered by the patent application. At any time before issuance of the patent, which would divest the Government of jurisdiction, the Government may contest a mineral entry on charges that the claims lack valid discovery or that an expenditure of \$500 has not been made for each location. Such a valid discovery and expenditure of \$500, on each claim, are each a prerequisite to obtaining a patent under the United States mining laws.

The contestee's refusal at the hearing to place its witnesses on the stand and to otherwise participate in the hearing apparently was for the purpose of obtaining a final ruling on its motion, which, if favorable, would make the charges immaterial within the meaning of section 222.5, title 43, Code of Federal Regulations, thus, in the opinion of the contestee, dispense with the necessity of this office further considering the question of whether each of the locations involved in the contest has a valid discovery and whether \$500 has been expended for the benefit of each of certain of those locations. However, any defect in the contest proceedings would not remove the lands from the jurisdiction of this Department or relieve it of the duty of determining whether each location has been perfected by a valid discovery and the requisite expenditures made. If necessary, because of irregularities in the contest proceedings a new contest could be initiated if the patent had not been issued but in the present case the motion and appeal contain nothing that would warrant sending out new notices and commencing anew.

For reasons set forth above, the action of the manager, overruling the demurrers and motions to dismiss the proceedings and directing that the hearing proceed is affirmed, and the testimony submitted in behalf of the Government in support of the charges will be considered. Although the defendant was afforded an opportunity to submit testimony to refute the showing made by the Government and to make whatever showing he wished in support of the alleged validity of the claims, he refused to do so, and withdrew from the hearing without submitting any testimony in support of the claims in question.

Mr. Elton M. Hattan, a mineral examiner for the Bureau of Land Management, testified that, with the assistance of a representative of the defendant, he examined the claims in May and July 1949 and again in September 1950; that in July 1949 he was also accompanied by Mr. William C. Sanborn, a mining engineer for the Forest Service; that they took samples of the rock they found exposed in the discovery cuts and various excavations on each claim and had them assayed for their mineral content, the assayer's certificate showing merely traces of gold and silver and, in some instances, lead and zinc, in amounts less than 0.05 percent; and that they did not find mineral-bearing rock on any of the claims which would justify a reasonably prudent man in the expenditure of time and money, with the reasonable expectation of developing a paying mine. Witness testified that in his opinion \$500 has not been expended in improvements on or for the benefit of the La Jolla, Alabama, Staples, Arroyo Verde, or the Manganese lode claims.

Mr. William C. Sanborn, mining engineer for the Forest Service, testified that in July 1949 he assisted Mr. Hattan, when a large number of samples were taken from the claims. He corroborated Mr. Hattan's testimony as to the

mineral character of the claims and the value of the improvements placed thereon.

Mr. G. Robert Leavengood, timber management assistant, for the Forest Service, testified that the value of the timber on the claims which could be cut, using Forest Service methods and leaving perhaps 25 percent of the growth standing as growing stock, would be approximately \$77,000.

In the case of the *United States v. Dawson* (58 I. D. 670) it was held, syllabus:

"A discovery of mineral which will validate a location under the mining laws must show that the land is more valuable for the removal and marketing of the mineral than for any other purpose; that the removal and marketing will yield a profit or that the mineral exists in such quantity as to justify a prudent man in expending labor and capital to obtain it."

The Department stated in unreported decision in the case of *United States v. Cathrine Ryan* (A. 23326), decided September 18, 1942:

"To constitute a valid discovery upon a lode mining claim for which patent is sought, there must actually and physically be exposed within the limits of the claim a vein or lode of mineral-bearing rock in place possessing in and of itself a present or prospective value for mining purposes. The exposure of substantially worthless deposits on the surface of a lode mining claim; the finding of mere surface indications of mineral within its limits; the discovery of valuable mineral deposits outside the claim; or deductions from established geological facts relating to it; one or all of which matters may reasonably give rise to the hope or belief, however strong it may be, that a valuable deposit exists within the claim, will neither suffice for a discovery thereon, nor be entitled to be accepted as to the equivalent thereof (*East Tintic Consolidated Mining Claim*, 40 L. D. 271. See also *Oregon Basin Oil and Gas Company*, 50 L. D. 253)."

As to the quantum of evidence to establish discovery in support of a patent application when contested, the Department stated in *United States v. Joseph Frederick Thompson* (A. 23511), decided January 19, 1943, unreported, that—

"A higher degree of proof of discovery is required by an applicant for patent than would be required simply to sustain a location in a controversy between rival mining claimants (*Brophy v. O'Hare*, 34 L. D. 596; *Clipper M. Co. v. Eli M. & L. Co.*, 33 L. D. 660). The Department must be satisfied that the land contains mineral in quantity and quality sufficient to render the land valuable for mining purposes (*Cataract Gold Mining Co. et. al.*, 43 L. D. 248). See also *Roy C. Kaufman* (A. 19232), decided November 7, 1935; *United States v. Louis des Cognets, Jr.* (A. 22884), decided December 22, 1941; *United States v. Grace Spence Callahan, Heir of George S. Spence* (A. 23337), decided September 18, 1942, all unreported."

The demurrers and motions to dismiss proceedings having been overruled by the manager, and the Government having submitted testimony which unrefuted clearly shows that a discovery has not been made on any of the claims contested and that the requisite expenditure of \$500 in improvements has not been made on or for the benefit of the La Jolla, Alabama, Staples, Arroyo Verde or the Manganese lode claims, it was incumbent upon the defendant to submit testimony overcoming that showing and establish that the applicant is entitled to a patent for the claims which he has not done.

The decision of the manager is affirmed and mineral entry Oregon 0665 is held for cancellation as to the Henry Applegate, J. W. Merritt, Rainbow, Sulphide, Delia McKinnon, Cougar, Oro Escondido, W. C. Leever, J. L. Grubb, J. D. McKinnon, La Jolla, Alabama, Staples, Arroyo Verde, and Manganese claims. This ruling does not invalidate the mining claims and the mineral claimants may retain possession thereof and continue prospecting work looking to the discovery of valuable mineral which will warrant the filing of an application for patent for the claims. This decision will become final 30 days from receipt of notice hereof. If an appeal to the Secretary of the Interior is filed within the time allowed it should be filed in this office and reference made therein to the serial number given above. Should no action be taken within the time allowed, the entry will be canceled as to the claims contested and the case closed without further notice from this office. A copy of this decision is being sent by registered mail to W. O. McMahon, attorney for the entryman.

WILLIAM ZIMMERMAN,  
Assistant Director.

HOUSE OF REPRESENTATIVES,  
COMMITTEE ON GOVERNMENT OPERATIONS,  
1501 HOUSE OFFICE BUILDING,  
Washington, D. C., February 17, 1956.

HON. JAMES E. MURRAY,  
*Chairman, Joint Committee on Federal Timber,*  
*Senate Office Building, Washington, D. C.*

MY DEAR SENATOR MURRAY: Supplementing my letter of today, listing the documents which the minority requested be included in the record of the Al Sarena hearings, herewith please find one additional document which we ask be also included, viz:

"Letter dated February 17, 1956, from Mr. James D. Parriott, Associated Solicitor, Department of the Interior, to me, giving certain information as to the number of patents which have been granted in the State of Oregon since the year 1933 to date."

Thanking you, I am,  
Sincerely yours,

CLARE E. HOFFMAN.

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington, D. C., February 17, 1956.

HON. CLARE HOFFMAN,  
*House of Representatives,*  
*Washington, D. C.*

MY DEAR MR. HOFFMAN: Pursuant to your oral request I have averaged the time between the date of location and the date of the issuance of patent of mining claims in Oregon since 1933. There were 37 claims, plus 4 cases which could not be located.

The Patent numbers of the cases averaged are as follows:

1134335, 1138469, 1139881, 1140120, 1146486, 1147217, 1147218, 1147219, 1147592, 1152924, 1147399, 1147398, 1147221, 1147220, 1134336, 1150084, 1148318, 1148319, 1154357, 1153701, 1153602, 1147782, 1147871, 1155456, 1155342, 1130355, 1123419, 1106842, 1110732, 1123923, 1106841, 1082333, 1100540, 1105948, 1130508, 1133311, 1092803

The time ranges from 1 year, 9 months, and 6 days to 60 years and 26 days, and averages 20.78 years.

Very truly yours,

JAMES D. PARRIOTT, JR.,  
*Associate Solicitor for Public Lands.*

---

INFORMATION SUBMITTED BY DEPARTMENT OF INTERIOR

UNITED STATES DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SOLICITOR,  
Washington, D. C. February 17, 1956.

HON. JAMES E. MURRAY,  
*United States Senate,*  
*Washington, D. C.*

MY DEAR SENATOR MURRAY: Under Secretary Davis is absent from the city and has asked me to submit to your committee certain information requested of him during his recent testimony in the Al Sarena Mines, Inc., case.

Attached hereto is a list of the cases which were pending in the Office of the Solicitor when Mr. Davis took office. You will note that the Al Sarena Mines case is the first listed under our chronological docketing system. The number of the Al Sarena case is A-26248. The closest case to it and the next case in line is A-26279. The third case is A-26440. As you can see, 191 cases were decided between the docketing of the Al Sarena case, which was the oldest case when Mr. Davis took office, and the docketing of the third oldest case at that time.

From the third case to the end of the list the numbers progress in a fairly even fashion.

mineral character of the claims and the value of the improvements placed thereon.

Mr. G. Robert Leavengood, timber management assistant, for the Forest Service, testified that the value of the timber on the claims which could be cut, using Forest Service methods and leaving perhaps 25 percent of the growth standing as growing stock, would be approximately \$77,000.

In the case of the *United States v. Dawson* (58 L. D. 670) it was held, syllabus: "A discovery of mineral which will validate a location under the mining laws must show that the land is more valuable for the removal and marketing of the mineral than for any other purpose; that the removal and marketing will yield a profit or that the mineral exists in such quantity as to justify a prudent man in expending labor and capital to obtain it."

The Department stated in unreported decision in the case of *United States v. Cathrine Ryan* (A. 23326), decided September 18, 1942:

"To constitute a valid discovery upon a lode mining claim for which patent is sought, there must actually and physically be exposed within the limits of the claim a vein or lode of mineral-bearing rock in place possessing in and of itself a present or prospective value for mining purposes. The exposure of substantially worthless deposits on the surface of a lode mining claim; the finding of mere surface indications of mineral within its limits; the discovery of valuable mineral deposits outside the claim; or deductions from established geological facts relating to it; one or all of which matters may reasonably give rise to the hope or belief, however strong it may be, that a valuable deposit exists within the claim, will neither suffice for a discovery thereon, nor be entitled to be accepted as to the equivalent thereof (*East Tintic Consolidated Mining Claim*, 40 L. D. 271. See also *Oregon Basin Oil and Gas Company*, 50 L. D. 253)."

As to the quantum of evidence to establish discovery in support of a patent application when contested, the Department stated in *United States v. Joseph Frederick Thompson* (A. 23511), decided January 19, 1943, unreported, that—

"A higher degree of proof of discovery is required by an applicant for patent than would be required simply to sustain a location in a controversy between rival mining claimants (*Brophy v. O'Hare*, 34 L. D. 596; *Clipper M. Co. v. Eli M. & L. Co.*, 33 L. D. 660). The Department must be satisfied that the land contains mineral in quantity and quality sufficient to render the land valuable for mining purposes (*Cataract Gold Mining Co. et. al.*, 43 L. D. 248). See also *Roy C. Kautman* (A. 19232), decided November 7, 1935; *United States v. Louis dea Connets, Jr.* (A. 22884), decided December 22, 1941; *United States v. Grace Spence Callahan, Heir of George S. Spence* (A. 23337), decided September 18, 1942, all unreported."

The demurrers and motions to dismiss proceedings having been overruled by the manager, and the Government having submitted testimony which unrefuted clearly shows that a discovery has not been made on any of the claims contested and that the requisite expenditure of \$500 in improvements has not been made on or for the benefit of the La Jolla, Alabama, Staples, Arroyo Verde or the Manganese lode claims, it was incumbent upon the defendant to submit testimony overcoming that showing and establish that the applicant is entitled to a patent for the claims which he has not done.

The decision of the manager is affirmed and mineral entry Oregon 0625 is held for cancellation as to the Henry Applegate, J. W. Merritt, Rainboe, Sulphide, Della McKinnon, Cougar, Oro Escondido, W. C. Leever, J. L. Grubb, J. D. McKinnon, La Jolla, Alabama, Staples, Arroyo Verde, and Manganese claims. This ruling does not invalidate the mining claims and the mineral claimants may retain possession thereof and continue prospecting work looking to the discovery of valuable mineral which will warrant the filing of an application for patent for the claims. This decision will become final 30 days from receipt of notice hereof. If an appeal to the Secretary of the Interior is filed within the time allowed it should be filed in this office and reference made therein to the serial number given above. Should no action be taken within the time allowed, the entry will be canceled as to the claims contested and the case closed without further notice from this office. A copy of this decision is being sent by registered mail to W. O. McMahon, attorney for the entryman.

MASS CHECKS PAYABLE TO STATE TAX COMMISSION

October 26, 1954

**Notice!** MAIL LETTER WITH ACCOMPANYING REMITTANCE TO OREGON STATE TAX COMMISSION Salem, Oregon.

\_\_\_\_\_

Digitized by Google

# **FOREST RESEARCH AND FIRE SUPPRESSION TAX RETURN**

Tax to be paid on all merchantable timber or other forest products cut, removed, or otherwise removed from any class B forest land.

<b>TAXPAYER</b> <u>Al Sarena &amp; Co., Inc.</u> (Name on 1946) <u>P.O. Box 122</u> (Postoffice Name) <u>Prineville, Oregon</u> (Address)	Tax return for quarter ended— (Name on 1946) September 30 ( ) December 31 ( ) March 31 ( ) <b>12</b> June 30 ( )
---	---

## **CLASS B FOREST LAND IS:**

- ALL FOREST LAND is situated west of the summit of the Cascades, including Mand River County, except:  
 1. Forest land not paying the fire patrol assessment within rural fire districts.  
 2. Forest lands within federal protection districts.

**TAX RETURN AND PAYMENTS ARE DUE ON OR BEFORE THE 10th OF THE MONTH** following the end of each quarter and must be paid on the total merchantable quantity of timber or other forest products harvested during the quarter, with the first 2,000 board feet harvested each fiscal year being exempt from tax. Tax quarters end on the following dates: September 30, December 31, March 31 and June 30.  
 The tax requires payment of \$1.00 plus penalty of 6% and interest at the rate of 1/2 of 1 percent per month on all delinquent tax, plus a deficiency assessment.  
 County or counties in which woods operation is being conducted: \_\_\_\_\_
